## LETTER TO STOCKHOLDERS

### GLOBAL MARKET REVIEW AND ECONOMIC CONSIDERATIONS

In the second quarter of this year, the world markets improved with the ease in geopolitical tensions. Major equity markets have rallied nearly 25% from the lows reached in mid-March.

Some of the most important events of this past quarter have included the official end of the war in Iraq, the spread and control of SARS, and the passing of tax legislation in the U.S.

The virus SARS has impacted the overall economy but mainly the performance of Asian markets in April and May. Once the epidemic was officially declared under control, Asian markets rallied strongly. Asia is expected to experience the highest level of GDP growth this year with an average of 5.3%, reflecting in part the massive influence of China where growth is anticipated to be 7.3%.

Congress passed the third largest tax cut in U.S. history. The legislation is putting additional cash into the hands of consumers and will make equity investments much more attractive by reducing tax on both dividends and long term capital gains to 15%.

In Europe, there has not been a significant one-time event. However due to stagnant growth in the first quarter and an anemic second quarter, the European Central Bank (ECB) has continued to cut its growth forecast

for the region with a further r  
for 2003. The UK's 2003 GDP growth  
as well from a range of 2.5% -

### SWISS ECONOMIC NOTES

The SNB continues to pursue an expansionary monetary policy with, as noted above, a fluctuation range of the 3-month Libor, unchanged at 0.0% - 0.75%. The yield on the ten year Confederation bond decreased from 2.41% in the middle of May to 2.24% in the middle of June. While it was a small decrease in comparison with other countries, the yields are

historically very low. (In the U.

forecasting growth of 1.2% compared to a previous forecast of 1.6%.

June leading indicators worsened marginally by 0.6% to 42.2% and the Swiss unemployment rate pointed upwards to 3.8% in June from 3.6% for May.

The Consumer Price Index rose 0.5% for the year with higher prices for beverages and food offsetting declining costs for energy and leisure activities. This result is an easing on deflationary pressures. What does generate concern, however, is the anemic consumer spending in the face of a weak job market.

PERFORMANCE COMMENTARY AND SWISS MARKET REVIEW

Swiss Stock market behavior was quite hectic this year. The SPI reached a low point in March, dropping 20% in local currency and rallying back 18% in five days, mainly on short covering in a limited number of financial stocks. In a self-feeding process, the rise of the stock market improved the capital base of companies, allowing a reevaluation of their stocks. In this type of volatility and sharp counter trend rally, the active management of the fund underperformed the Index.

In addition, the Fund is less concentrated than the Index in the five largest stocks of the SPI, which penalized its relative performance since the beginning of the year, even though it reduced its volatility. The Fund's cumulative performance is superior to its Swiss peers and its benchmark. As of June 30, 2003, the Fund

maintained an overall rating Morningstar\*. The Fund also received a ranking for Western European closed-end funds performance for the period ended 6/30/03. PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.

While technology and financial services were performing well in the global market, defensive industries failed to attract attention causing the Swiss market to underperform well as U.S. markets. As an example, companies such as Givaudan and Nestle, have shown strong performance for the year.

Regarding the pharmaceutical industry, valuation, unlike that of the biotech industry, was again. The principal reasons we were worried about competition from generic drugs, control by local government, and improvement in the late-stage drug pipeline. Industry players, and the weakness of the industry performed in line with the SPI, Net Asset Value keep up, posting a flat year-to-date return.

SPECIFIC COMPANY NEWS

CREDIT SUISSE: CS is continually reshaping Winterthur's portfolio. It recently sold Churchill in the UK to the Royal Bank of Scotland Group and its insurance operations in Italy to Unipol. The sale of Churchill, which will involve the repayment of debt to CS, will strengthen Winterthur's consolidated European solvency ratio. Furthermore, this transaction will result in a significant capital gain expected to be realized in the third quarter of 2003.

NESTLE: The Federal Trade Commission (FTC) has cleared a merger between Nestle's ice cream company and Dreyer's. Since the combined ice cream business would have a dominant share of about 60% of the U.S. super-premium ice cream market, with the potential for reduced competition and

increased prices, the FTC imposed conditions that were agreed on the merger, which should be completed by the end of the year.

ROCHE: In May, Genentech released its second quarter results for Avastin, a drug developed by Roche. Although Avastin was developed by Roche, Roche licensed the rights for all countries outside Europe while Genentech has retained the rights to the product in the U.S. Since this drug is a blockbuster product, Roche's stock price has increased by 90%, and Roche is performing positively since Roche owns 50% of Genentech.

NOVARTIS: In its last annual report, Novartis stated that it was going to begin to report its results in U.S. dollars. It noted that an increasing proportion of its sales are generated in U.S. dollars and that this move would facilitate comparison with other pharmaceutical companies in America, competitors.

FURTHER COMPANY NEWS: Swiss insurance companies are pushing for Swiss government approval to increase the interest rate on group life policies to 3.5%.

COMMENTS ON THE CURRENCY

SWISS FRANC: The Swiss franc declined from mid-May to mid-June. The Swiss franc has perspectives and lower interest rates. The Swiss franc however, is expected to decline during the first quarter, but is expected to stabilize in the second quarter.

increased significantly in comparison to the U.S. dollar during the end of the second quarter, leaving a flat year-to-date return.

EURO: On June 5th, the ECB decided to decrease its rate from 2.5% to 2.0%. Since the market had been expecting the decrease for a long time, the news did not have any important impact on the currency.

U.S. DOLLAR: The dollar keeps decreasing in comparison with European currencies (down 2.9% against the euro and 3.4% against the pound). The uncertain economic outlook, low interest rates and the increasing trade deficit have contributed to this decline.

shares in 2003. During the period, the Fund repurchased and retired 8 million shares at a price of \$9.82 per share (including commissions) and a weighted average discount of 10%. The total cost of the repurchases, which had a total cost of \$78,656,000, resulted in an increase of \$168,921 to the Fund's net assets.

## OUTLOOK

The world markets improved in the second quarter, with a focus on technology and financial sectors. The Swiss Market should see a larger number of stocks participating in the upside move if the global economic recovery strengthens and the deflationary forces are successfully kept at bay by the Federal Reserve and U.S. government tax stimulus. These circumstances should provide the Fund with more investment opportunities.

### THE SWISS HELVETIA FUND, INC.

---

#### NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

##### NOTE 1—ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

###### A. ORGANIZATION

The Swiss Helvetia Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, (the "Act"), as a non-diversified, closed-end investment management company. The Fund is organized as a corporation under the laws of the State of Delaware.

The investment objective of the Fund is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies.

###### B. VALUATION OF SECURITIES

The Fund values its investments at market value.

When valuing listed equity securities, the Fund uses the last sale price prior to the calculation of the Fund's net asset value. When valuing equity securities that are not listed or that are listed but have not traded, the Fund uses the mean between the bid and asked prices for that day.

When valuing fixed income securities, the Fund uses the last bid price prior to the calculation of the Fund's net asset value. If a current bid price is not available, the Fund uses the mean between the latest quoted bid and asked prices. When valuing fixed income securities that mature within sixty days, the Fund uses amortized cost.

It is the responsibility of the Fund's Board of Directors (the "Board") to establish fair valuation procedures. When valuing securities for which market quotations are not readily available or for which the market quotations that are available are considered unreliable, the Fund determines a fair value in good faith in accordance with these procedures. The Fund may use these procedures to establish the fair value of securities when, for example, a significant event occurs between the time the market closes and the time the Fund values its investments. After consideration of various factors, the Fund may value the securities at their last reported price or at some other value. On June 30, 2003, there were no fair valued

proceeds of a sale or the cost of an offsetting transaction.

Dividend income, net of any foreign tax, is recorded on the ex-dividend date. Amortization of premiums and accretion of discounts are accrued daily. Estimated expenses

The Fund records Swiss withholding tax on any amount receivable from Switzerland in accordance with the tax treaty between the United States and Switzerland.

###### D. DISTRIBUTIONS

The Fund pays dividends annually based on net investment income and makes distributions of realized capital gains to the extent of net loss carryforwards. The Fund determines the timing of these distributions in accordance with the Internal Revenue Code. Distributions may be made in cash or in stock with an option to reinvest. The Fund records dividends and distributions on the ex-dividend date.

###### E. FEDERAL INCOME TAXES

The Fund's policy is to conform to the requirements of the Internal Revenue Code applicable to regulated investment companies. The Fund distributes all its taxable income to its shareholders. Therefore, no federal income tax

###### F. SECURITIES LENDING

The Fund may lend securities to its shareholders. The Fund retains beneficial ownership of securities loaned and continues to receive dividends paid on these securities. Changes in their market value are passed on to the borrowers of the securities to maintain the value of the Fund in the form of cash and/or securities. The Fund receives fees as compensation for the loan. Either the Fund or the borrower may terminate the loan at any time. On June 30, 2003,
