HEARTLAND, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2008

NOTE A BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with Regulation S-K promulgated by the Securities and Exchange Commission and do not include all of the information and footnotes required by generally accepted accounting principles in the United States for complete financial statements. In the opinion of management, these interim financial statements include all adjustments, which include only normal recurring adjustments, necessary in order to make the financial statements not misleading. The results of operations for such interim periods are not necessarily indicative of results of operations for a full year. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto of the Company and management's discussion and analysis of financial condition and results of operations included in the Company's Annual Report for the year ended December 31, 2007 as filed with the Securities and Exchange Commission on Form 10-KSB.

The balance sheet at December 31, 2007 has been derived from the audited financial statement of that date, but does not include all of the information and footnotes required by accounting principles generally accepted in United States of America for complete financial statements.

NOTE B ACCOUNTING POLICIES

During September 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 157, Fair Value Measurements, which is effective for fiscal years beginning after November 15, 2007, with earlier adoption encouraged. SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. In February 2008, the FASB issued FASB Staff Position FAS 157-2, Effective Date of FASB Statement No. 157, which delayed the effective date of SFAS 157 for all non-financial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis, until January 1, 2009. The Company adopted SFAS 157 on January 1, 2008, for all financial assets and liabilities, but the implementation did not have a significant impact on the Company's financial position or results of operations. The Company has not yet determined the impact the implementation of SFAS 157 will have on the Company's non-financial assets and liabilities which are not recognized or disclosed on a recurring basis. However, the Company does not anticipate that the full adoption of SFAS 157 will significantly impact its consolidated financial statements.

During February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115, which permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of SFAS 159 is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The Company adopted SFAS 159 on January 1, 2008, but the implementation of SFAS 159 did not have a significant impact on the Company's financial position or results of operations.

During June 2008, the FASB issued EITF Issue No. 07-05, "Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock" (the final abstract is not available at this time) which is effective for fiscal years beginning after December 15, 2008. The Company has not yet determined the impact the implementation of EITF 07-05 will have on the Company's consolidated financial statements.

During June 2008, the FASB also issued EITF Issue No. 08-04, "Transition Guidance for Conforming Changes to EITF Issue No. 98-5, 'Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios'" (the final abstract is not available at this time) which is effective for fiscal years beginning after December 15, 2008. The Company has not yet determined the impact the implementation of this EITF will have on the Company's consolidated financial statements.

NOTE C GOING CONCERN

As reflected in the accompanying financial statements, the Company has an accumulated deficit of \$14,127,350. The Company has reduced certain administrative costs and has adapted a strategic plan for identifying profitable companies to acquire. The Company's ability to eliminate its accumulated deficit is dependent on its ability to obtain financing for profitable acquisitions and operate existing holdings efficiently.

NOTE D STOCKHOLDERS' EQUITY

Preferred Stock

In January 2007, the Board of Directors approved the authorization of 5,000,000 shares of Series A Convertible Preferred Stock - par value \$0.001. The preferred stock has a face value of \$0.25 per share and the basis of conversion is one share of the Company's common stock for each share of preferred stock. The preferred stock has liquidation priority rights over all other stockholders. The preferred shares can be converted at any time at the option of the stockholder, but will convert automatically at the end of three years into the Company's common stock.

As of June 30, 2008, the Company has 2,370,000 shares of Series A Convertible Preferred Stock issued and outstanding. The preferred shares carry a 10% annual stock dividend for the three years they are outstanding prior to conversion. The preferred dividend in arrears at June 30, 2008 and 2007 was \$75,286 and \$15,872, respectively.

Warrants

The preferred shares include a Series A and Series B common stock purchase warrant. The Series A warrant allows the holder to purchase 20% of the number of preferred shares purchased at \$0.75 per share; the Series B warrant allows the holder to purchase 20% of the number of preferred shares purchased at \$1.00 per share. Both series of warrants are exercisable over a three year period. The Company can call in the warrants after 12 months if the price of the common stock in the market is 150% of the warrant price for 10 consecutive days (i.e. \$1.13 for the A warrant and \$1.50 for the B warrant).

As a result, effective July 1, 2007, Karkela's operations, which comprised the construction and property management segment, have been discontinued and Karkela is no longer a subsidiary of the Company. (C) BUSINESS

Our mission is to become a leading diversified company with business interests in well established industries. We plan to successfully grow our revenues by acquiring companies with historically profitable results, strong balance sheets, high profit margins, and solid management teams in place. By providing access to financial markets, expanded marketing opportunities and operating expense efficiencies, we hope to become the facilitator for future growth and higher long-term profits. In the process, we hope to develop new synergies among the acquired companies, which should allow for greater cost effectiveness and efficiencies, thus further enhancing each individual company’s strengths. To date, we have completed an acquisition in the steel fabrication industry. Additionally, we have identified acquisition opportunities in gasoline distribution.

We are headquartered in Middlesboro, Kentucky and currently trade on the OTC Bulletin Board under the symbol HTLJ. Including the senior management team, we currently employ 71 people.

Currently, we operate one major subsidiary Mound Technologies, Inc. of Springboro, OH acquired in December 2003 (Steel Fabrication).

Mound Technologies, Inc. ("Mound") was incorporated in the state of Nevada in November of 2002, with its corporate offices located in Springboro, Ohio. Mound is in the business of steel fabrication ("Steel Fabrication").

Mound is a full service structural and miscellaneous steel fabricator. It also manufactures steel stairs and railings, both industrial and architectural quality. The present capacity of the facility is approximately 6,000 tons per year of structural and miscellaneous steel. Mound had been previously known as Mound Steel Corporation, which was started at the same location in 1964.

Mound is focused on the fabrication of metal products and produces structural steel, miscellaneous metals, steel stairs, railings, bar joists, metal decks and the erection thereof. Mound produced gross sales of approximately \$7.4 million in 2004. In the steel products segment, steel joists and joist girders, and steel deck are sold to general contractors and fabricators throughout the United States. Substantially all work is to order and no unsold inventories of finished products are maintained. All sales contracts are firm fixed-price contracts and are normally competitively bid against other suppliers. Cold finished steel and steel fasteners are manufactured in standard sizes and inventories are maintained.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED JUNE 30, 2008 COMPARED TO THE THREE MONTHS ENDED JUNE 30, 2007.

We are a company with operations in steel fabrication. Revenues for the three months ended June 30, 2008 were \$6,199,788 compared to \$3,086,271 for the same period in 2007, which represents an increase of \$3,113,517. The increase in revenues for the period ending June 30, 2008 as compared to the three months ended June 30, 2007 was partially the result of increases in the price of the raw materials used in the manufacturing process and those increases being passed along to the customers. The Company has been successful in securing a couple of school construction projects that have progressed a little faster than normally would have been expected and revenue for those projects under the percentage-of-completion have been recognized as the work has progressed. The Company has also been able to maintain a high backlog of projects over the last quarter and this has allowed management to be more efficient in the use of the resources available. Total operating expenses were \$5,783,210 for the three months ended June 30, 2008 compared to \$3,513,139 for the same period in 2007. Maintaining a better control over the administrative costs along with the heavy backlog of projects have allowed the Company to generate a positive operating income of approximately 6.7% in the current period versus an operating loss of about 13.8% in the same period of 2007. Our costs of goods sold increased from \$2,425,866 for the three months ended June 30, 2007 to \$5,292,264 for the three months ended June 30, 2008, which represented 78.9% as a percentage of sales and 85.3% as a percentage of sales, respectively. The reason for the increase in cost of good sold as a percentage of sales can be tied to steel and other various other raw materials used the fabrication processes having increased dramatically along with surcharges for materials and miscellaneous supplies that cover increasing transportation costs. The company would expect to see these surcharges continue as long as the price of fuel remains at this elevated level.

Interest expense for the three months ended June 30, 2008 was \$18,649 compared to \$46,220 for the same period in 2007. This decrease was primarily due to the conversion of convertible promissory notes and the reduction in an acquisition note payable upon the discontinued operations of Karkela. The Company saw an increase in the interest expense in the second quarter from the first quarter due primarily to the purchase of the Mound property in April and

the interest expense relating to this purchase should remain fairly constant during the first five years of the loan.

As a result, Income (Loss) from continuing operations was \$429,500 for the three months ended June 30, 2008, compared to (\$461,037) for the same period in 2007.

LIQUIDITY AND CAPITAL RESOURCES

Net cash provided from operating activities was \$629,536 for the six months ended June 30, 2008. The Company did obtain new funding in the form of a note from Commercial Bank in the original amount of \$900,000 to purchase the Mound property. This note along with a net settlement with the landlord for monies owed the Company along with company generated funds was used to make the acquisition.

Total short-term and long-term debt at June 30, 2008 was \$6,757,976 and total shareholders' equity was \$2,808,408.

Our business is seasonally working capital intensive and requires funding for purchases of raw materials used in production, replacement parts inventory, capital expenditures, expansion and upgrading of existing facilities, as well as for financing receivables from customers. Additionally, our auditors, in their opinion on our financial statements for the year ended December 31, 2007 issued a "going concern" qualification to their report dated April 10, 2008. We believe that cash generated from operations, together with our bank credit lines, and cash on hand, will provide us with a majority of our liquidity to meet our operating requirements. We believe that the combination of funds available through future anticipated financing arrangements, coupled with forecasted cash flows, will be sufficient to provide the necessary capital resources for our anticipated working capital, capital expenditures, and debt repayments for at least the next twelve months.

We may experience problems, delays, expenses, and difficulties sometimes encountered by an enterprise in our stage of development, many of which are beyond our control. For potential acquisitions, these include, but are not limited to, unanticipated problems relating to the identifying partner(s), obtaining financing, culminating the identified partner due to a number of possibilities (prices, dates, terms, etc). Due to limited experience in operating the combined entities for the Company, we may experience production and marketing problems, incur additional costs and expenses that may exceed current estimates, and competition.

During the three months ended June 30, 2008, the Company has not engaged in:

- Material off-balance sheet activities, including the use of structured finance or special purpose entities;
- Trading activities in non-exchange traded contracts; or
- Transactions with persons or entities that benefit from their non-independent relationship with the Company

Inflation

We are subject to the effects of inflation and changing prices. As previously mentioned, we experienced rising prices for steel and other commodities during fiscal 2007 and for the first six months of 2008 that had an impact on our gross margins and net earnings. In the remainder of fiscal 2008, we expect average prices of steel and other commodities to be higher than the average prices paid in fiscal 2007 and for the first three months of 2008. We will attempt to mitigate the impact of these anticipated increases in steel and other commodity prices and other inflationary pressures by actively pursuing internal cost reduction efforts and introducing price increases.

Critical Accounting Policies and Estimates

In preparing our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, we must make decisions that impact the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, we apply judgments based on our understanding and analysis of the relevant circumstances, historical experience, and actuarial valuations. Actual amounts could differ from those estimated at the time the consolidated financial statements are prepared.

Our significant accounting policies are described in Note A to the consolidated financial statements. Some of those significant accounting policies require us to make difficult subjective or complex judgments or estimates. An accounting estimate is considered to be critical if it meets both of the following criteria: (i) the estimate requires assumptions about matters that are highly uncertain at the time the accounting estimate is made, and (ii) different estimates that reasonably could have been used, or changes in the estimate that are reasonably likely to occur from period to period, would have a material impact on the presentation of our financial condition, changes in financial condition or results of operations.

Accounts Receivable Valuation. We value accounts receivable, net of an allowance for doubtful accounts. Each quarter, we estimate our ability to collect outstanding receivables that provides a basis for an allowance estimate for doubtful accounts. In doing so, we evaluate the age of our receivables, past collection history, current financial conditions of key customers, and economic conditions. Based on this evaluation, we establish a reserve for specific accounts receivable that we believe are uncollectible, as well as an estimate of uncollectible receivables not specifically known. A deterioration in the financial condition of any key customer or a significant slow down in the economy could have a material negative impact on our ability to collect a portion or all of the accounts and notes receivable.

OFF-BALANCE SHEET ARRANGEMENTS

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on us.
