

Edgar Filing: SPRINT CORP - Form 8-K

Kansas City, Mo., - May 15, 2001 - Sprint today updated performance expectations for the second quarter and for the full year 2001 for its FON Group operations.

Sprint continues to expect that its local telephone operations and product distribution and directory publishing businesses will perform in line with previous guidance.

Sprint continues to expect that total revenues for the FON Group in the second quarter will be similar to the year-ago period and revenues for the full year will grow at a very low single digit rate.

FON Group operating cash flow (EBITDA) and earnings forecasts are below the company's previous outlook due to lower-than-expected profit contributions from the Global Markets segment. This is largely due to several distinct factors in the company's long distance business. Global Markets is experiencing higher bad debt expense caused by bankruptcies by wholesale customers, and it expects to see continued higher bad debt from wholesale customers and reduced wholesale demand. Due to a near-term deceleration in overall market demand, the profit contribution from the recently launched Web hosting and related professional services businesses is expected to increase at a slower pace than previously expected.

As a result of the updated Global Markets forecast, Sprint expects that full year FON Group EBITDA, will be in the range of \$4.3 to \$4.4 billion. Sprint currently expects FON Group diluted earnings per share to be in the 28 to 30 cent range in the second quarter and between \$1.13 and \$1.18 for the full year 2001.

Sprint also announced that it now expects full-year FON Group capital expenditures to be approximately \$5.9 billion or about \$300 million below the previous forecast of \$6.2 billion. The company will continue to assess capital spending on an ongoing basis to balance capital expenditures with growth.
