PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in this prospectus and does not contain all of the information that you should consider in making your investment decision. Before investing in our common stock, you should carefully read this entire prospectus, including our consolidated financial statements and the related notes included in this prospectus and the information set forth under the headings "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Our Company

We provide solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. Our solutions for restaurants include our Electronic Reservation Book, or ERB, which combines proprietary software and computer hardware that computerizes restaurant host-stand operations and replaces traditional pen-and-paper reservation books. Our ERB streamlines and enhances a number of business-critical functions and processes for restaurants, including reservation management, table management, guest recognition and email marketing. The ERBs at our restaurant customers connect via the Internet to form an online network of restaurant reservation books. Our solutions for diners include our popular restaurant reservation website, www.opentable.com, which enables diners to find, choose and book tables at restaurants on the OpenTable network in real time, overcoming the inefficiencies associated with the traditional process of reserving by phone. Restaurants pay us a one-time installation fee for onsite installation and training, a monthly subscription fee for the use of our software and hardware and a fee for each restaurant guest seated through online reservations. Our online reservation service is free to diners.

We initially focused on acquiring a critical mass of local restaurant customers in four metropolitan areas: Chicago, New York, San Francisco and Washington, D.C. These markets have since developed into active, local networks of restaurants and diners that continue to grow. We have applied and continue to apply the same fundamental strategy in developing and penetrating our other markets. As of June 30, 2009, the OpenTable network included approximately 11,000 OpenTable restaurant customers spanning all 50 states as well as select markets outside of the United States. Since our inception in 1998, we have seated approximately 110 million diners through OpenTable reservations, and during the three months ended June 30, 2009, we seated an average of approximately three million diners per month. For the twelve months ended December 31, 2007 and 2008, our revenues were $41.1 million and $55.8 million, respectively. For the twelve months ended December 31, 2007 and 2008, our subscription revenues accounted for 55% and 54% of our total revenues, respectively, and our reservation revenues accounted for 41% and 41% of our total revenues, respectively. For the six months ended June 30, 2008 and 2009, our subscription revenues accounted for 53% and 53% of our total revenues, respectively, and our reservation revenues accounted for 43% and 43% of our total revenues, respectively.

Market Opportunity

We target our solutions, by which we mean our ERB and the OpenTable website, to reservation-taking restaurants and diners, respectively. We believe based on our internal estimates that there are approximately 30,000 reservation-taking restaurants in North America that seat approximately 600 million diners through reservations annually, though this number fluctuates with economic and other conditions.

The ability of the restaurant industry to leverage the power of the Internet for reservation transactions has been inhibited by two key characteristics. First, the reservation-taking restaurant industry has been slow to computerize host-stand operations. Restaurant reservations historically have been largely handled by the traditional pen-and-paper reservation book, despite the inherent operational inefficiencies and potential for error. Second, the reservation-taking restaurant industry is

Table of Contents

highly fragmented, with independent restaurants and small, local restaurant groups comprising a significant majority of restaurant locations. The restaurant industry is also inherently local, making it time-consuming and costly to aggregate the breadth of local restaurant table inventory required to attract a critical mass of diners to make reservations online and create an online restaurant reservation network.

Historically, diners learned about restaurants through word of mouth and local print media, such as dining guides, newspapers and magazines. While diners continue to value personal recommendations, the Internet now puts a wealth of restaurant information at their fingertips. However, the ability to book restaurant reservations has largely been missing from online dining sources. Moreover, reserving by phone remains a highly inefficient and inconvenient process. In order for diners to fully embrace online restaurant reservations, they need real-time access to table inventory across a broad selection of local restaurants and the ability to instantly book confirmed reservations around-the-clock.

We believe the Internet can streamline operations and fill additional seats for reservation-taking restaurants and redefine the reservation experience for diners. In addition, we believe that there is a significant opportunity to provide solutions to reservation-taking restaurants and diners, as the network connecting the two groups is created and expanded.

Our Solution

Reservation-taking restaurants and diners have interconnected needs. Restaurants require cost-effective ways to attract guests and manage their reservations, while diners seek convenient ways to find available restaurants, choose among them and secure reservations. By creating an online network of restaurants and diners that transact with each other through real-time reservations, we have developed a specialized platform for addressing the needs of both.

Essential to this network is building a critical mass of local, computerized restaurant reservation books. We achieve this by offering software that provides important operational benefits for the restaurant, bundling it with computer hardware and installing this solution at the restaurant host stand, thereby creating a compelling solution for restaurants. We provide our solutions to individual restaurants within a market, one by one, via a direct sales force. We believe that we deliver a strong return on investment for our restaurant customers by streamlining their operations, filling additional seats and improving their quality of service. As a result, we have historically enjoyed high customer satisfaction and retention rates.

The OpenTable website gives diners real-time access to tables at restaurants on the OpenTable network. As more local restaurants are added to the network, the utility provided to diners increases and more diners discover the benefits of researching restaurants and making reservations on our website. The more diners who use our website to make their dining decisions, the more value we deliver to our restaurant customers and the more restaurants are attracted to our network.

Benefits of OpenTable to Reservation-Taking Restaurants

In response to the needs of reservation-taking restaurants, we offer the OpenTable ERB, a bundled solution consisting of proprietary OpenTable software, which is installed on a touch-screen computer system and supported by various asset-protection and security tools. Additionally, we provide restaurants with access to diners via our website as well as through reservation links on our partners' websites and on restaurants' own websites. Our solutions help restaurants participating in the OpenTable network to:

- fill seats that might otherwise remain empty and minimize "no-shows" by offering the convenience of online reservations directly through the OpenTable website as well as indirectly through the websites of our partners and restaurant customers;

Table of Contents

create operational efficiencies by replacing the restaurant's pen-and-paper system with a computerized reservation book and helping restaurants maximize seat utilization, facilitate server rotations and improve table turns;

boost guest recognition and overall guest service by recording diner preferences and histories and by collecting and delivering feedback from OpenTable diners;

computerize their host-stand operations by providing a solution that combines proprietary software and computer hardware and customized, on-site installation, training and technical support; and

market to a targeted audience with measurable results by giving restaurants valuable marketing exposure during the diners' decision-making process and requiring payment by restaurants only for those diners whom they ultimately serve.

Benefits of OpenTable to Diners

In response to the needs of diners, we offer the OpenTable website, a destination website for those seeking a convenient way to research restaurants and make reservations. Our website enables diners to:

find available tables by allowing diners to search for reservations by location, date, time and party size and view real-time table availability across a variety of restaurants;

choose a restaurant by providing diners with restaurant information such as restaurant descriptions, photos and menus as well as lists of restaurants that are most highly rated by OpenTable diners in different categories; and

book instantly-confirmed reservations for free by allowing diners to make reservations through the OpenTable website, which are instantly recorded in the ERB located at the restaurant.

Our Strategy

As our network of reservation-taking restaurants and diners grows, the value we deliver grows as well. Because the foundation of our network is building a critical mass of computerized reservation books, we enhance our offering to diners by adding new restaurant customers. In turn, as more diners use the OpenTable website to make their dining decisions and book their reservations, we deliver more value to our restaurant customers by helping them fill more of their seats. In this process, we grow the value of our business. The key elements of this strategy include:

Continue to Build the OpenTable Network in North America

The value of the OpenTable network grows as participation among restaurants and diners grows. Experience in our earliest markets provided a successful model that we have implemented while entering new markets, and, as a result, our newer North American markets have grown relatively predictably over time. We intend to continue to build our North American network in the United States, Canada and Mexico by employing this proven model, which includes the following elements:

producing and maintaining superior solutions by continuing to evolve our ERB based on nearly a decade of in-field experience as well as feedback from our installed base of approximately 11,000 restaurant customers, and optimizing our website through insights gained from the experience of seating approximately 110 million diners through online reservations;

providing excellent customer service and support by continuing to employ highly trained operational teams to provide installation and training services for our restaurant customers

Table of Contents

and continuing to augment our in-house support staff with contract support services to deliver superior customer assistance;

leveraging our direct sales force, which is experienced in selling the benefits of OpenTable to reservation-taking restaurants, which operate in a highly fragmented industry; and

continuing to attract diners to our website by offering the best reservation experience through enhanced ease of use and restaurant content, thereby increasing market adoption of our solutions, building our brand awareness and driving word-of-mouth referrals to our website.

Expand Internationally

We intend to augment our growing North American business by selectively expanding into countries outside of North America that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. We currently have operations in Germany, Japan and the United Kingdom, each supported with a direct sales force and operational staff. We have approximately 1,200 restaurant customers in these markets. In general, our strategy internationally is to replicate the model we have successfully employed in North America. In particular, our initial focus in new international markets is to increase our restaurant customer base, and we believe the localized versions of our software solution will compete favorably against competitive software offerings, enabling us to expand our network of computerized reservation books across a broad selection of local restaurants.

Risk Factors

Our business is subject to numerous risks and uncertainties, including those highlighted in the section entitled "Risk Factors" immediately following this prospectus summary, that primarily represent challenges we face in connection with the successful implementation of our strategy and the growth of our business. Our limited operating history makes it difficult for us to accurately forecast revenues and appropriately plan our expenses. We expect a number of factors to cause our operating results to fluctuate on a quarterly and annual basis, which may make it difficult to predict our future performance. Such factors include deteriorating global economic conditions and our ability to maintain an adequate rate of growth, effectively manage our growth, retain and attract restaurant customers and visitors to our website, provide a high-quality customer experience through our website and ERB and successfully enter new markets and manage our international expansion.

Corporate Information

We were originally incorporated as easyeats.com, Inc., a California corporation, on October 13, 1998. On June 2, 1999, we changed our name to OpenTable.com, Inc. We subsequently reincorporated in Delaware on September 20, 2000 under our current name, OpenTable, Inc. Our principal executive offices are located at 799 Market Street, 4th Floor, San Francisco, California 94103, and our telephone number is (415) 344-4200. Our website address is www.opentable.com. Information contained on our website is not a part of this prospectus and the inclusion of our website address in this prospectus is an inactive textual reference only. Unless the context requires otherwise, the words "OpenTable," "we," "company," "us" and "our" refer to OpenTable, Inc. and our wholly owned subsidiaries.

THE OFFERING

Common stock offered by the selling stockholders	3,326,799 shares
Shares outstanding after the offering	shares (or shares if the underwriters exercise their overallotment option in full)
Underwriters' option to purchase additional shares	The underwriters may purchase an additional 499,019 shares from the selling stockholders if the underwriters exercise in full their option to purchase additional shares.
Use of proceeds	The selling stockholders, including certain members of our board of directors and management, will receive all of the proceeds from this offering and we will not receive any proceeds from the sale of shares in this offering. Any proceeds received by us in connection with the exercise of options or warrants to purchase shares of our common stock by the selling stockholders in connection with this offering will be used for general corporate purposes. See "Use of Proceeds." For more information on the selling stockholders, see "Principal and Selling Stockholders."
Risk factors	See "Risk Factors" beginning on page 9 and the other information included in this prospectus for a discussion of factors you should carefully consider before deciding to invest in our common stock.
NASDAQ Global Market symbol	"OPEN"

The number of shares of our common stock outstanding after this offering is based on 22,128,580 shares outstanding as of June 30, 2009, plus an aggregate of shares of common stock subject to outstanding options or warrants being exercised by certain selling stockholders for the purpose of selling shares in this offering.

As of June 30, 2009, we had 22,128,580 shares outstanding, excluding:

- 1,405,664 shares of common stock, subject to increase on an annual basis, reserved for issuance under our 2009 Equity Incentive Award Plan;
- 2,395,096 shares of common stock issuable upon the exercise of outstanding options to purchase our common stock granted pursuant to our 1999 Stock Plan (including an aggregate of shares of common stock that will be issued upon the exercise of options at a weighted average exercise price of $ per share by certain selling stockholders and sold by them in this offering) at a weighted average exercise price of $7.34 per share; and
- 88,691 shares of common stock issuable upon the exercise of an outstanding warrant (including shares of common stock that will be issued upon the exercise of the warrant by a selling stockholder and sold by a selling stockholder in this offering) at an exercise price of $1.00 per share.

Except as otherwise indicated, information in this prospectus reflects or assumes no exercise of the underwriters' overallotment option to purchase up to 499,019 additional shares of our common stock from the selling stockholders. All share and per share information referenced through this prospectus have been retroactively adjusted to reflect a 1-for-12.5 reverse stock split of our common stock and preferred stock effected on May 20, 2009.

Table of Contents

SUMMARY CONSOLIDATED FINANCIAL DATA

The following tables summarize the consolidated financial data for our business. You should read this summary financial data in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes, all included elsewhere in this prospectus.

We derived the consolidated statements of operations data for the years ended December 31, 2006, 2007 and 2008 from our audited consolidated financial statements included elsewhere in this prospectus. The unaudited consolidated statements of operations data for the six months ended June 30, 2008 and 2009, and the unaudited consolidated balance sheet data as of June 30, 2009, are derived from our unaudited consolidated financial statements included elsewhere in this prospectus. We have prepared the unaudited information on the same basis as the audited consolidated financial statements and have included, in our opinion, all adjustments, consisting only of normal recurring adjustments, that we consider necessary for a fair presentation of the financial information set forth in those statements. Results for the six months ended June 30, 2009 are not necessarily indicative of the results to be expected for the fiscal year ending December 31, 2009. Our historical results are not necessarily indicative of the results to be expected in the future.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this prospectus before making a decision to invest in our common stock. If any of such risks actually occur, our business, operating results or financial condition could be adversely affected. In those cases, the trading price of our common stock could decline and you may lose all or part of your investment.

Risks Related to Our Business

Our limited operating history makes it difficult for us to accurately forecast revenues and appropriately plan our expenses.

We were formed in October 1998 and have a limited operating history. As a result, it is difficult to accurately forecast our revenues and plan our operating expenses. We base our current and future expense levels on our operating forecasts and estimates of future revenues from restaurants, which pay us an installation fee for our Electronic Reservation Book, or ERB, a monthly subscription fee and a fee for each restaurant guest seated through online reservations. Revenues and operating results are difficult to forecast due to the uncertainty of the volume and timing of obtaining new restaurant customers and of diners seated through OpenTable reservations. Some of our expenses are fixed, and, as a result, we may be unable to adjust our spending in a timely manner to compensate for any unexpected shortfall in revenues. This inability could cause our net income in a given quarter to be lower than expected.

The impact of worldwide economic conditions, including the resulting effect on consumer spending, may adversely affect our business, operating results and financial condition.

Our performance is subject to worldwide economic conditions and their impact on levels of consumer spending, which may remain depressed, or be subject to further deterioration, for the foreseeable future. Some of the factors having an impact on discretionary consumer spending include general economic conditions, unemployment, consumer debt, reductions in net worth, residential real estate and mortgage markets, taxation, energy prices, interest rates, consumer confidence and other macroeconomic factors.

Consumer purchases of discretionary items generally decline during recessionary periods and other periods in which disposable income is adversely affected. Because spending for restaurant dining is generally considered to be discretionary, declines in consumer spending may have a more negative effect on our business than on those businesses that sell products or services considered to be necessities. In particular, a significant majority of our restaurant customers are fine-dining restaurants which have been particularly affected by economic downturns such as the one we are currently experiencing.

Unfavorable changes in the above factors or in other business and economic conditions affecting our restaurant customers and diners could result in continued reduced traffic in some or all of the restaurants that use our solutions, result in fewer reservations made through our website or the websites of our partners or restaurant customers and lower our profit margins, cause our restaurant customers to go out of business, cause our restaurant customers to terminate their subscriptions to our solutions or default on their payment obligations to us and have a material adverse effect on our financial condition and operating results.

Moreover, the majority of our restaurant customers are located in major metropolitan areas like New York City and the San Francisco Bay Area, and to the extent any one of these geographic areas experiences any of the above described conditions to a greater extent than other geographic areas, the material adverse effect on our financial condition and operating results could be exacerbated.

Table of Contents

We expect a number of factors to cause our operating results to fluctuate on a quarterly and annual basis, which may make it difficult to predict our future performance.

Our revenues and operating results could vary significantly from quarter to quarter and year to year because of a variety of factors, many of which are outside of our control. As a result, comparing our operating results on a period-to-period basis may not be meaningful. In addition to other risk factors discussed in this section, factors that may contribute to the variability of our quarterly and annual results include:

- our ability to accurately forecast revenues and appropriately plan our expenses;
- the impact of worldwide economic conditions, including the resulting effect on consumer spending;
- our ability to maintain an adequate rate of growth;
- our ability to effectively manage our growth;
- our ability to attract new restaurant customers;
- our ability to increase the number of visitors to our website and convert those visitors into diners who reserve a table using our website and then dine with our restaurant customers;
- our ability to retain existing restaurant customers and diners or encourage repeat reservations;
- our ability to provide a high-quality customer experience through our website and ERB;
- our ability to successfully enter new markets and manage our international expansion;
- the impact of fluctuations in currency exchange rates;
- the effects of increased competition in our business;
- our ability to keep pace with changes in technology and our competitors;
- our ability to successfully manage any future acquisitions of businesses, solutions or technologies;
- the success of our marketing efforts;
- changes in consumer behavior and any related impact on the restaurant industry, especially in the geographic markets where we operate;

seasonal patterns in restaurant dining;

interruptions in service and any related impact on our reputation;

the attraction and retention of qualified employees and key personnel;

our ability to protect our intellectual property, including our proprietary ERB;

costs associated with defending intellectual property infringement and other claims;

the effects of natural or man-made catastrophic events;

the effectiveness of our internal controls; and

changes in government regulation affecting our business.

Table of Contents

As a result of these and other factors, the results of any prior quarterly or annual periods should not be relied upon as indications of our future operating performance. In addition, our operating results may not meet the expectations of investors or public market analysts who follow our company.

Our recent growth rate will likely not be sustainable and a failure to maintain an adequate growth rate will adversely affect our net income and our business.

Our revenues have grown rapidly, increasing from $27.2 million in 2006 to $41.1 million in 2007 to $55.8 million in 2008, representing a compound annual growth rate of 43%. We do not expect to sustain our recent growth rate in future periods, and you should not rely on the revenue growth of any prior quarterly or annual periods as an indication of our future performance. If we are unable to maintain adequate revenue growth, our net income will be adversely affected, and we may not have adequate resources to execute our business strategy.

Growth may place significant demands on our management and our infrastructure.

We have experienced substantial growth in our business. This growth has placed and may continue to place significant demands on our management and our operational and financial infrastructure. As our operations grow in size, scope and complexity, we will need to improve and upgrade our systems and infrastructure to offer an increasing number of customers enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. Continued growth could also strain our ability to maintain reliable service levels for our customers, develop and improve our operational, financial and management controls, enhance our reporting systems and procedures and recruit, train and retain highly skilled personnel.

Managing our growth will require significant expenditures and allocation of valuable management resources. If we fail to achieve the necessary level of efficiency in our organization as it grows, our business, operating results and financial condition would be harmed.

If we fail to increase the number of our customers or retain existing customers, our revenues and our business will be harmed.

In 2008, almost all of our revenues were generated by our restaurant customers, who pay us a one-time installation fee, a monthly subscription fee for our ERB and a fee for each restaurant guest seated through online reservations. Our growth depends in large part on increasing the number of our restaurant customers, increasing the number of visitors to our website and then converting those visitors into diners who use our website to make restaurant reservations. Either category of customers may decide not to continue to use our solutions in favor of other means of reserving tables or because of budgetary constraints or other reasons.

To grow our base of restaurant customers, we must convince prospective restaurant customers of the benefits of our ERB and related solutions and encourage them to forego the traditional pen-and-paper reservation book to which they are likely accustomed. Due to the fragmented nature of the restaurant industry, many prospective restaurant customers may not be familiar with our solutions and will generally favor using more traditional methods of taking reservations.

To increase the number of diners who use our website, we must convince them of the value of our solutions. Our ability to do so is driven in large part by increasing the number of restaurant listings available on our website and also by making the diner's visit to our website a convenient and user-friendly experience.

Table of Contents

We cannot assure you that we will be successful in continuing to expand our restaurant customer base or in continuing to attract diners to make reservations on our website. Our future sales and marketing efforts may be ineffective. If diners choose not to use our solutions or decrease their use of our solutions or we are unable to attract new diners, listings on our website could be reduced, search activity on our website could decline, the usefulness of our solutions could be diminished and we could experience declining revenues.

We may be unable to successfully execute our business strategy if we fail to continue to provide our customers with a high-quality customer experience.

A critical component of our strategy is providing a high-quality customer experience for both restaurants and diners. Accordingly, the effective performance, reliability and availability of our ERB, website and network infrastructure are critical to our reputation and our ability to attract and retain customers. In order to provide a high-quality customer experience, we have invested and will continue to invest substantial resources in our ERB, website development and functionality and customer service operations. If we do not continue to make such investments and as a result, or due to other reasons, fail to provide a high-quality customer experience, we may lose restaurants and diners from our network, which could significantly decrease the value of our solutions to both groups. Moreover, failure to provide our customers with high-quality customer experiences for any reason could substantially harm our reputation and adversely affect our efforts to develop as a trusted website.

We may be unsuccessful in expanding our operations internationally, which could harm our business, operating results and financial condition.

In 2004, we established our European headquarters in London and expanded our North American presence in Canada. In 2006, we opened an office in Tokyo and further expanded our North American presence in Mexico. In 2007, we expanded our European presence with offices in France, Germany and Spain. Our ability to expand internationally involves various risks, including the need to invest significant resources in such expansion, the possibility that returns on such investments will not be achieved in the near future and competitive environments with which we are unfamiliar. Our international operations may not prove to be successful in certain markets. For example, in 2008, we decided to close our offices in France and Spain. In addition, we have incurred and expect to continue to incur significant expenses in advance of generating material revenues as we attempt to establish our presence in particular international markets. Our current and any future international expansion plans we choose to undertake will require management attention and resources and may be unsuccessful. We do not have substantial experience in selling our solutions in international markets or in conforming to the local cultures, standards or policies necessary to successfully compete in those markets, and we must invest significant resources in order to build a direct sales force and operational infrastructure in such markets. Furthermore, in many international markets we are not the first entrant and there exists greater competition with stronger brand names than we have faced in North American markets. Our ability to expand internationally will also be limited by the demand for our solutions and the adoption of the Internet in these markets. Different privacy, censorship and liability standards and regulations and different intellectual property laws in foreign countries may cause our business and operating results to suffer.

Any future international operations may also fail to succeed due to other risks inherent in foreign operations, including:

- difficulties or delays in acquiring a network of restaurant customers in one or more international markets;
- different restaurant preferences and dining patterns than those in North America;

Table of Contents

varied, unfamiliar and unclear legal and regulatory restrictions;

unexpected changes in international regulatory requirements and tariffs;

legal, political or systemic restrictions on the ability of U.S. companies to market services or otherwise do business in foreign countries;

less extensive adoption of the Internet as a commerce medium or information source and increased restriction on the content of websites;

difficulties in staffing and managing foreign operations;

greater difficulty in accounts receivable collection;

currency fluctuations;

potential adverse tax consequences;

lack of infrastructure to adequately conduct electronic commerce transactions; and

price controls or other restrictions on foreign currency.

As a result of these obstacles, we may find it impossible or prohibitively expensive to expand internationally or we may be unsuccessful in our attempt to do so, which could harm our business, operating results and financial condition.

We face risks associated with currency exchange rate fluctuations.

For the six months ended June 30, 2009, we incurred approximately 19% of our operating expenses in pounds sterling, euros, yen and other foreign currencies, while most of our revenues were denominated in U.S. dollars. Conducting business in currencies other than U.S. dollars subjects us to fluctuations in currency exchange rates that could have a negative impact on our reported operating results. Fluctuations in the value of the U.S. dollar relative to other currencies affect our revenues, costs and expenses, and operating margins, and result in foreign currency transaction gains and losses. To date, we have not engaged in exchange rate hedging activities. Even if we were to implement hedging strategies to mitigate this risk, these strategies might not eliminate our exposure to foreign exchange rate fluctuations and would involve costs and risks of their own, such as ongoing management time and expertise, external costs to implement the hedging activities and potential accounting implications.

The markets for our solutions in North America may become more competitive, and there can be no certainty that we will maintain our current restaurant customers and diners or attract new restaurants and diners or that our operating margins will not be affected by competition.

We expect that the competitive environment for our solutions may become more intense as additional companies enter our North American markets. Currently, our primary competitors in North America are the pen-and-paper reservation book used by most restaurants and the phone used by diners. Secondary competitors include companies who provide computerized reservation management systems with a variety of technologies, as well as allocation-based reservation-taking websites that offer diners the ability to book reservations for a limited selection of restaurant table inventory. These secondary competitors may enhance their technologies to be more competitive, and additional competitors may enter our markets in North America. Any new competitors could have greater name recognition among restaurants and diners and greater financial, technical and marketing resources. Greater financial resources and product development capabilities may allow these competitors to

respond more quickly to new or emerging technologies and changes in restaurant and diner requirements that may render our solutions obsolete. These competitors could introduce new solutions

Table of Contents

with competitive price and performance characteristics or undertake more aggressive marketing campaigns than ours. If we lose existing restaurant customers and diners or fail to attract new restaurants and diners as a result of increased competition, our business, operating results and financial condition could be adversely affected.

Rapid technological changes may render our technology obsolete or decrease the attractiveness of our solutions to our customers.

To remain competitive, we must continue to enhance and improve the functionality and features of our website and ERB. The Internet and the online commerce industry are rapidly changing. If competitors introduce new solutions embodying new technologies, or if new industry standards and practices emerge, our existing website, technology and ERB may become obsolete. Our future success will depend on our ability to:

- enhance our existing solutions;
- develop and potentially license new solutions and technologies that address the increasingly sophisticated and varied needs of our prospective customers; and
- respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis.

Developing our ERB, website and other technology entails significant technical and business risks. We may use new technologies ineffectively, or we may fail to adapt our website, transaction processing systems and network infrastructure to consumer requirements or emerging industry standards. For example, our website functionality that allows searches and displays of reservation availability is a critical part of our service, and it may become out-of-date or insufficient from our customers' perspective or in relation to the search and display functionality of our competitors' websites. If we face material delays in introducing new or enhanced solutions, our customers may forego the use of our solutions in favor of those of our competitors.

Future acquisitions could disrupt our business and harm our financial condition and operating results.

Our success will depend, in part, on our ability to expand our offerings and markets and grow our business in response to changing technologies, customer demands and competitive pressures. In some circumstances, we may determine to do so through the acquisition of complementary businesses, solutions or technologies rather than through internal development. The identification of suitable acquisition candidates can be difficult, time-consuming and costly, and we may not be able to successfully complete identified acquisitions. Furthermore, even if we successfully complete an acquisition, we may not be able to successfully assimilate and integrate the business, technologies, solutions, personnel or operations of the company that we acquired, particularly if key personnel of an acquired company decide not to work for us. In addition, we may issue equity securities to complete an acquisition, which would dilute our stockholders' ownership and could adversely affect the price of our common stock. Acquisitions may also involve the entry into geographic or business markets in which we have little or no prior experience. Consequently, we may not achieve anticipated benefits of the acquisitions which could harm our operating results.

We rely on our marketing efforts to attract new customers and must do so in a cost-effective manner; otherwise our operations will be harmed.

A significant component of our business strategy is the promotion of the OpenTable website and ERB. We believe that the attractiveness of our solutions to our current and potential customers, both restaurants and diners, will increase as new restaurants provide additional restaurant listings and

Table of Contents

diners increasingly use our website to conduct searches and make restaurant reservations. This is because an increase in the number of restaurant listings and the number of diners searching those listings increases the utility of our website and its associated search, listing and reservation services. If we do not continue to grow the use of our website and ERB, we may fail to build the critical mass of both restaurant customers and diners required to substantially increase our revenues.

While our marketing efforts do not currently involve significant expenditures, in the future we may find it necessary to invest more heavily in direct marketing or online or traditional advertising. If we are unable to effectively market our solutions to new customers or are unable to do so in a cost-effective manner, our operating results could be adversely affected.

System interruptions that impair access to our website would damage our reputation and brand and substantially harm our business and operating results.

The satisfactory performance, reliability and availability of our ERB, website and network infrastructure are critical to our reputation, our ability to attract and retain both restaurant customers and diners and our ability to maintain adequate customer service levels. Any systems interruption that results in the unavailability of our website or any restaurant connected to our website could result in negative publicity, damage our reputation and brand and cause our business and operating results to suffer. We may experience temporary system interruptions (either to our website or at our restaurant customer locations) for a variety of reasons, including network failures, power failures, software errors or an overwhelming number of visitors trying to reach our website during periods of strong demand. In addition, our primary data center is hosted by a third party. Because we are dependent in part on third parties for the implementation and maintenance of certain aspects of our systems and because some of the causes of system interruptions may be outside of our control, we may not be able to remedy such interruptions in a timely manner, or at all.

We depend on key and highly skilled personnel to operate our business, and if we are unable to retain our current personnel or hire additional personnel our ability to develop and successfully market our business could be harmed.

We believe our future success will depend in large part upon our ability to attract and retain highly skilled managerial, technical, finance, creative and sales and marketing personnel. Moreover, we believe that our future success is highly dependent on the contributions of our named executive officers, as defined in "Management Executive Compensation." All of our U.S. officers and other employees are at-will employees, which means they may terminate their employment relationship with us at any time, and their knowledge of our business and industry would be extremely difficult to replace. In addition, the loss of any key employees or the inability to attract or retain qualified personnel could delay the development and introduction of, and harm our ability to sell, our solutions and harm the market's perception of us. Competition for qualified personnel is particularly intense in the San Francisco Bay Area, where our headquarters are located. Further, our principal overseas operations are based in London and Tokyo, which are cities that, similar to our headquarters region, have high costs of living and consequently high compensation standards. Qualified individuals are in high demand, and we may incur significant costs to attract them. We may be unable to attract and retain suitably qualified individuals who are capable of meeting our growing sales, operational and managerial requirements, or may be required to pay increased compensation in order to do so. If we are unable to attract and retain the qualified personnel we need to succeed, our business will suffer.

Volatility or lack of performance in our stock price may also affect our ability to attract and retain our key employees. Our named executive officers have become, or will soon become, vested in a substantial amount of stock or stock options. Employees may be more likely to leave us if the shares they own or the shares underlying their options have significantly appreciated in value relative to the

Table of Contents

original purchase prices of the shares or the exercise prices of the options, or if the exercise prices of the options that they hold are significantly above the market price of our common stock. If we are unable to retain our employees, our business, operating results and financial condition will be harmed.

Failure to adequately protect our intellectual property could substantially harm our business and operating results.

Because our business is heavily dependent on our intellectual property, including our proprietary software, the protection of our intellectual property rights is crucial to the success of our business. We rely on a combination of patent, trademark, trade secret and copyright law and contractual restrictions to protect our intellectual property. These afford only limited protection. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our website features, software and functionality or obtain and use information that we consider proprietary, such as the technology used to operate our website, our content and our trademarks. Moreover, policing our proprietary rights is difficult and may not always be effective. In particular, because we sell our solutions internationally, we may need to enforce our rights under the laws of countries that do not protect proprietary rights to as great an extent as do the laws of the United States.

We have registered "OpenTable" and our other trademarks as trademarks in the United States and in certain other countries. Competitors may adopt service names similar to ours, thereby impeding our ability to build brand identity and possibly leading to customer confusion. In addition, there could be potential trade name or trademark infringement claims brought by owners of other registered trademarks or trademarks that incorporate variations of the term OpenTable or our other trademarks. From time to time, we have acquired Internet domain names held by others when such names were causing consumer confusion or had the potential to cause consumer confusion.

We currently hold the "OpenTable.com" Internet domain name and various other related domain names. Domain names generally are regulated by Internet regulatory bodies. If we lose the ability to use a domain name in a particular country, we would be forced to either incur significant additional expenses to market our solutions within that country, including the development of a new brand and the creation of new promotional materials, or elect not to sell solutions in that country. Either result could substantially harm our business and operating results. The regulation of domain names in the United States and in foreign countries is subject to change. Regulatory bodies could establish additional top-level domains, appoint additional domain name registrars or modify the requirements for holding domain names. As a result, we may not be able to acquire or maintain the domain names that utilize the name OpenTable in all of the countries in which we currently conduct or intend to conduct business.

Litigation or proceedings before the U.S. Patent and Trademark Office or other governmental authorities and administrative bodies in the United States and abroad may be necessary in the future to enforce our intellectual property rights, to protect our patent rights, trade secrets and domain names and to determine the validity and scope of the proprietary rights of others. Our efforts to enforce or protect our proprietary rights may be ineffective and could result in substantial costs and diversion of resources and could substantially harm our operating results.

Assertions by third parties of infringement by us of their intellectual property rights could result in significant costs and substantially harm our business and operating results.

Other parties have asserted, and may in the future assert, that we have infringed their intellectual property rights. Such litigation may involve patent holding companies or other adverse patent owners who have no relevant product revenue, and therefore our own issued and pending patents may provide little or no deterrence. For example, on May 12, 2009, Mount Hamilton

Table of Contents

Partners, LLC, or Mount Hamilton, filed a patent infringement lawsuit against us in the United States District Court for the Northern District of California, seeking, among other things, a judgment that we have infringed a certain patent held by Mount Hamilton, an injunctive order against the alleged infringing activities and an award for damages. If an injunction is granted, it could force us to stop or alter certain of our business activities, such as certain aspects of the OpenTable Dining Rewards program. We could also be required to pay damages in an unspecified amount. Neither the outcome of the litigation nor the amount and range of potential damages or exposure associated with the litigation can be assessed with certainty.

Furthermore, we cannot predict whether assertions of third party intellectual property rights or claims arising from such assertions will substantially harm our business and operating results. We are currently involved in the defense of the alleged infringement claims of Mount Hamilton. The defense of these claims and any future infringement claims of Mount Hamilton or another party, whether they are with or without merit or are determined in our favor, may result in costly litigation and diversion of technical and management personnel. Furthermore, an adverse outcome of a dispute may require us to pay damages, potentially including treble damages and attorneys' fees, if we are found to have willfully infringed a party's patent or copyright rights; cease making, licensing or using solutions that are alleged to incorporate the intellectual property of others; expend additional development resources to redesign our solutions; and enter into potentially unfavorable royalty or license agreements in order to obtain the right to use necessary technologies. Royalty or licensing agreements, if required, may be unavailable on terms acceptable to us, or at all. In any event, we may need to license intellectual property which would require us to pay royalties or make one-time payments.

We depend in part on licenses of technologies from third parties in order to deliver our solutions, and, as a result, our business is dependent in part on the availability of such licenses on commercially reasonable terms.

We currently, and will continue to, license certain technologies from third parties. We cannot be certain that these third-party content licenses will be available to us on commercially reasonable terms or that we will be able to successfully integrate the technology into our solutions. These third-party in-licenses may expose us to increased risk, including risks associated with the assimilation of new technology sufficient to offset associated acquisition and maintenance costs. The inability to obtain any of these licenses could result in delays in solution development until equivalent technology can be identified and integrated. Any such delays in services could cause our business, operating results and financial condition to suffer.

Confidentiality agreements with employees and others may not adequately prevent disclosure of trade secrets and other proprietary information.

We have devoted substantial resources to the development of our proprietary technology, including the proprietary software component of our ERB, and related processes. In order to protect our proprietary technology and processes, we rely in part on confidentiality agreements with our employees, licensees, independent contractors and other advisors. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover trade secrets and proprietary information, and in such cases we could not assert any trade secret rights against such parties. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and failure to obtain or maintain trade secret protection could adversely affect our competitive business position.

Table of Contents

Our failure to protect confidential information of our customers and our network against security breaches could damage our reputation and brand and substantially harm our business and operating results.

Currently, some of our restaurant customers require that diners enter their credit card information to hold a reservation. We rely on encryption and authentication technology licensed from third parties to effect secure transmission of confidential information, including credit card numbers. Advances in computer capabilities, new discoveries in the field of cryptography or other developments may result in a compromise or breach of the technology used by us to protect customer transaction data. Any such compromise of our security could damage our reputation and brand and expose us to a risk of loss or litigation and possible liability which would substantially harm our business and operating results. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches.

We rely on a third-party customer support service provider for the majority of our customer service calls. If this service provider experiences operational difficulties or disruptions, our business could be adversely affected.

We depend on a U.S.-based third-party customer support service provider to handle most of our routine support cases. While we have a small customer service center in our San Francisco headquarters, if our customer support service provider experienced operational difficulties, our ability to respond to customer service calls in a timely manner and the quality of our customer service would be adversely affected, which in turn could affect our reputation and results of operations. While we have a contract with our customer support service provider, either party may terminate the contract for convenience by providing the other party at least 90 days prior notice of its intent to terminate. If for any reason our relationship with our customer support service provider were to end, it would require a significant amount of time to either scale up our San Francisco call center or to hire and train a new customer support service provider.

We outsource a portion of our software development to a third-party service provider located in India. Any interruption in our relationship with this service provider could adversely affect our business.

If for any reason our relationship with our third-party software development service provider were to end, it would require a significant amount of time to transition the software development work either in-house or to a new third-party service provider. Our contract with this software development service provider has a term ending on January 31, 2010. Either party may terminate the contract at any time by providing the other party at least 30 days prior notice of its intent to terminate. If our third-party software development service provider fails to perform its obligations in a timely manner or at satisfactory quality levels, our ability to bring solutions to market and our reputation could suffer. In addition, our third-party software development service provider is located in India and, as a result, may be subject to geopolitical uncertainty.

We may require additional capital to respond to business opportunities, challenges, acquisitions or unforeseen circumstances. If such capital is not available to us, our business, operating results and financial condition may be harmed.

We may require additional capital to expand our business. However, additional funds may not be available when we need them, on terms that are acceptable to us, or at all. For example, any debt financing secured by us in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. If we do not have funds available to enhance our solutions, maintain the competitiveness of our technology or pursue business opportunities, we may not be able to service our existing customers or acquire new

Table of Contents

customers. In addition, if we do not have funds available to make strategic acquisitions, we may not be able to expand our business. The inability to raise additional capital could have an adverse effect on our business, operating results and financial condition.

If we issue additional shares of common stock to raise capital, it may have a dilutive effect on your investment.

If we raise additional capital through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution in their percentage ownership of us. Moreover, any new equity securities we issue could have rights, preferences and privileges senior to those of holders of our common stock, including shares of common stock sold in this offering.

A further tightening of the credit markets may have an adverse effect on our ability to obtain short-term debt financing.

The current state of the global economy threatens to cause further tightening of the credit markets, more stringent lending standards and terms and higher volatility in interest rates. Persistence of these conditions could have a material adverse effect on our access to short-term debt and the terms and cost of that debt. As a result, we may not be able to secure additional financing in a timely manner, or at all, to meet our future capital needs which may have an adverse effect on our business, operating results and financial condition.

Our business is subject to the risks of earthquakes, fires, floods and other natural catastrophic events and to interruption by man-made problems such as computer viruses or terrorism.

Our systems and operations are vulnerable to damage or interruption from earthquakes, fires, floods, power losses, telecommunications failures, terrorist attacks, acts of war, human errors, break-ins and similar events. For example, a significant natural disaster, such as an earthquake, fire or flood, could have a material adverse impact on our business, operating results and financial condition, and our insurance coverage may be insufficient to compensate us for losses that may occur. Our U.S. corporate offices and the facility we lease to house our computer and telecommunications equipment are located in the San Francisco Bay Area, a region known for seismic activity. In addition, acts of terrorism, which may be targeted at metropolitan areas which have higher population density than rural areas, could cause disruptions in our or our restaurant customers' businesses or the economy as a whole. Our servers may also be vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems, which could lead to interruptions, delays, loss of critical data or the unauthorized disclosure of confidential customer data. We may not have sufficient protection or recovery plans in certain circumstances, such as natural disasters affecting the San Francisco Bay Area, and our business interruption insurance may be insufficient to compensate us for losses that may occur. As we rely heavily on our servers, computer and communications systems and the Internet to conduct our business and provide high quality customer service, such disruptions could negatively impact our ability to run our business and either directly or indirectly disrupt our restaurant customers' businesses, which could have an adverse affect on our business, operating results and financial condition.

As a public company, we incur significant costs which may adversely affect our operating results and financial condition.

As a public company, we incur significant accounting, legal and other expenses that we did not incur as a private company, including costs associated with our public company reporting requirements. We have also incurred, and anticipate that we will continue to incur, costs associated with corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002, as well as rules implemented by the SEC and The NASDAQ Stock Market. Furthermore, these laws and

Table of Contents

regulations could make it more difficult or more costly for us to obtain certain types of insurance, including director and officer liability insurance, and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these requirements could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers.

New laws and regulations as well as changes to existing laws and regulations affecting public companies, including the provisions of the Sarbanes-Oxley Act of 2002 and rules adopted by the SEC and by The NASDAQ Stock Market, would likely result in increased costs to us as we respond to their requirements. We are investing resources to comply with evolving laws and regulations, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from revenue-generating activities to compliance activities.

Risks Related to Our Industry

Seasonality may cause fluctuations in our financial results.

We generally experience some effects of seasonality due to increases in restaurant dining tied to certain holidays and restaurant industry promotions. Accordingly, the number of reservations made through our system has generally increased at a higher rate in the first and fourth quarters compared to the second and third quarters. Although historically our revenue has increased in each quarter as we have added restaurant customers and diners, in the future this seasonality may cause fluctuations in our financial results. In addition, other seasonality trends may develop and the existing seasonality and consumer behavior that we experience may change.

If use of the Internet, particularly with respect to online restaurant reservations, does not continue to increase as rapidly as we anticipate, our business will be harmed.

Our future net profits are substantially dependent upon the continued use of the Internet as an effective medium of business and communication by our target customers. Internet use may not continue to develop at historical rates, and consumers may not continue to use the Internet and other online services as a medium for commerce. In addition, the Internet may not be accepted as a viable long-term marketplace or resource for a number of reasons, including:

- actual or perceived lack of security of information or privacy protection;
- possible disruptions, computer viruses or other damage to Internet servers or to users' computers; and
- excessive governmental regulation.

Our success will depend, in large part, upon third parties maintaining the Internet infrastructure to provide a reliable network backbone with the speed, data capacity, security and hardware necessary for reliable Internet access and services. Our business, which relies on a contextually rich website that requires the transmission of substantial data, is also significantly dependent upon the availability and adoption of broadband Internet access and other high-speed Internet connectivity technologies.

Government regulation of the Internet is evolving, and unfavorable changes could substantially harm our business and operating results.

We are subject to general business regulations and laws as well as regulations and laws specifically governing the Internet. Existing and future laws and regulations may impede the growth of the Internet or other online services. These regulations and laws may cover taxation, tariffs, user privacy, data protection, pricing, content, copyrights, distribution, electronic contracts and other

Table of Contents

communications, consumer protection, broadband residential Internet access and the characteristics and quality of services. It is not clear how existing laws governing issues such as property ownership, sales and other taxes, libel and personal privacy apply to the Internet. Unfavorable resolution of these issues may substantially harm our business and operating results.

Risks Related to Owning Our Common Stock

Our stock price may be volatile, and the value of an investment in our common stock may decline.

Shares of our common stock were sold in our initial public offering, or IPO, in May 2009 at a price of $20.00 per share, and our common stock has subsequently traded as high as $35.50. An active, liquid and orderly market for our common stock may not be sustained, which could depress the trading price of our common stock. The trading price of our common stock may be subject to wide fluctuations in response to various factors, some of which are beyond our control, including:

- our operating performance and the operating performance of similar companies;
- the overall performance of the equity markets;
- the number of shares of our common stock publicly owned and available for trading;
- threatened or actual litigation;
- changes in laws or regulations relating to our solutions;
- any major change in our board of directors or management;
- publication of research reports about us or our industry or positive or negative recommendations or withdrawal of research coverage by securities analysts;
- large volumes of sales of our shares of common stock by existing stockholders; and
- general political and economic conditions.

In addition, the stock market in general, and the market for Internet-related companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. These fluctuations may be even more pronounced in the trading market for our stock shortly following this offering. Securities class action litigation has often been instituted against companies following periods of volatility in the overall market and in the market price of a company's securities. This litigation, if instituted against us, could result in very substantial costs, divert our management's attention and resources and harm our business, operating results and financial condition.

Our directors, executive officers and principal stockholders will continue to have substantial control over us after this offering and could delay or prevent a change in corporate control.

After this offering, our directors, executive officers and holders of more than 5% of our common stock, together with their affiliates, will beneficially own, in the aggregate, approximately % of our outstanding common stock, assuming no exercise of the

underwriters' option to purchase additional shares of our common stock in this offering from the selling stockholders. Moreover, after this offering, will beneficially own, in the aggregate, approximately % of our outstanding common stock, assuming no exercise of the underwriters' option to purchase additional shares of our common stock in this offering from the selling stockholders. As a result, these stockholders, acting together, would have the ability to control the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets. In addition, these stockholders, acting

Table of Contents

together, would have the ability to control the management and affairs of our company. Accordingly, this concentration of ownership might harm the market price of our common stock by:

- delaying, deferring or preventing a change in corporate control;
- impeding a merger, consolidation, takeover or other business combination involving us; or
- discouraging a potential acquiror from making a tender offer or otherwise attempting to obtain control of us.

Future sales of shares of our common stock by stockholders could depress the price of our common stock.

Based on shares outstanding as of June 30, 2009, upon the completion of this offering, we will have shares of our common stock outstanding, assuming no exercise of our outstanding options or warrants other than those options or warrants exercised by selling stockholders for the purpose of selling shares in this offering. Of these shares, the common stock sold in our IPO and the shares sold in this offering will be freely tradable, except for any shares purchased by our "affiliates" as defined in Rule 144 under the Securities Act of 1933. The holders of shares of common stock have signed lock-up agreements under which they have agreed not to sell, transfer or dispose of, directly or indirectly, any shares of our common stock or any securities into or exercisable or exchangeable for shares of our common stock without the prior written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated for a period of 90 days, subject to a possible extension under certain circumstances, after the date of this prospectus. Another shares will not be subject to the new 90-day restricted period but remain subject to the 180-day restricted period in connection with our IPO, ending November 17, 2009, subject to a possible extension under certain circumstances. After the expiration of the lock-up period, these shares may be sold in the public market, subject to prior registration or qualification for an exemption from registration, including, in the case of shares held by affiliates, compliance with the volume restrictions of Rule 144. To the extent that any of these stockholders sell, or indicate an intent to sell, substantial amounts of our common stock in the public market after the contractual lock-ups and other legal restrictions on resale discussed in this prospectus lapse, the trading price of our common stock could decline significantly.

In addition, (i) the 2,395,096 shares subject to outstanding options under our 1999 Stock Plan, as amended, as of June 30, 2009, and (ii) the 1,405,664 shares reserved for future issuance under our 2009 Equity Incentive Award Plan, as of June 30, 2009, that will become available for issuance under our 2009 Equity Incentive Award Plan, will become eligible for sale in the public market in the future, subject to certain legal and contractual limitations. If these additional shares are sold, or if it is perceived that they will be sold, in the public market, the price of our common stock could decline substantially.

If securities or industry analysts cease to publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. If one or more of the analysts who cover us downgrade our stock or publish inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, demand for our stock could decrease, which might cause our stock price and trading volume to decline.

Table of Contents

Our management will continue to have broad discretion over the use of the proceeds we received in our IPO and might not apply the proceeds in ways that increase the value of your investment.

Our management will continue to have broad discretion to use the net proceeds to us from our IPO. Our management might not apply the net proceeds from the IPO in ways that increase the value of our common stock. To date we have not utilized any of our proceeds from the IPO. We expect to use the net proceeds to us from the IPO for working capital and other general corporate purposes, including the funding of our marketing activities and the costs of operating as a public company, as well as further investment in the development of our proprietary technologies. We may also use a portion of the net proceeds for the acquisition of businesses, solutions and technologies that we believe are complementary to our own. We have not allocated the net proceeds from our IPO for any specific purposes. Until we use the net proceeds to us from the IPO, we plan to invest them, and these investments may not yield a favorable rate of return. If we do not invest or apply the net proceeds from the IPO in ways that enhance stockholder value, we may fail to achieve expected financial results, which could cause our stock price to decline.

Certain provisions in our charter documents and Delaware law could discourage takeover attempts and lead to management entrenchment.

Our certificate of incorporation and bylaws contain provisions that could have the effect of delaying or preventing changes in control or changes in our management without the consent of our board of directors. These provisions include:

- a classified board of directors with three-year staggered terms, which may delay the ability of stockholders to change the membership of a majority of our board of directors;
- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;
- the ability of our board of directors to determine to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquiror;
- a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;
- the requirement that a special meeting of stockholders may be called only by the chairman of the board of directors, the chief executive officer or the board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors; and
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us.

We are also subject to certain anti-takeover provisions under Delaware law. Under Delaware law, a corporation may not, in general, engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus includes forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting the financial condition of our business. Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking statements are based on information available at the time those statements are made and/or management's good faith belief as of that time with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

- our ability to accurately forecast revenues and appropriately plan our expenses;
- the impact of worldwide economic conditions, including the resulting effect on consumer spending;
- our ability to maintain an adequate rate of growth;
- our ability to effectively manage our growth;
- our ability to attract new restaurant customers;
- our ability to increase the number of visitors to our website and convert those visitors into diners who reserve a table using our website and then dine with our restaurant customers;
- our ability to retain existing restaurant customers and diners or encourage repeat reservations;
- our ability to provide a high-quality customer experience through our website and ERB;
- our ability to successfully enter new markets and manage our international expansion;
- the impact of fluctuations in currency exchange rates;
- the effects of increased competition in our business;
- our ability to keep pace with changes in technology and our competitors;
- our ability to successfully manage any future acquisitions of businesses, solutions or technologies;
- the success of our marketing efforts;

interruptions in service and any related impact on our reputation;

the attraction and retention of qualified employees and key personnel;

our ability to protect our intellectual property, including our proprietary ERB;

costs associated with defending intellectual property infringement and other claims;

the effects of natural or man-made catastrophic events;

the effectiveness of our internal controls;

changes in government regulation affecting our business; and

other risk factors included under "Risk Factors" in this prospectus.

Table of Contents

In addition, in this prospectus, the words "believe," "may," "will," "estimate," "continue," "anticipate," "intend," "expect," "predict," "potential" and similar expressions, as they relate to our company, our business and our management, are intended to identify forward-looking statements. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this prospectus may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements.

Forward-looking statements speak only as of the date of this prospectus. You should not put undue reliance on any forward-looking statements. We assume no obligation to update forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

Table of Contents

USE OF PROCEEDS

The selling stockholders, including certain members of our board of directors and management, will receive all of the proceeds from this offering, and we will not receive any proceeds from the sale of shares in this offering. See "Principal and Selling Stockholders." Any proceeds received by us in connection with the exercise of options or warrants to purchase shares of our common stock by the selling stockholders in connection with this offering will be used for general corporate purposes.

PRICE RANGE OF COMMON STOCK

Our common stock has been listed on The NASDAQ Global Market under the symbol "OPEN" since our IPO. Before then, there was no public market for our common stock. The following table sets forth, for the periods indicated, the high and low sales prices of our common stock as reported by The NASDAQ Global Market:

	High	Low
Second Quarter 2009 (beginning May 21, 2009)	$35.50	$24.50
Third Quarter 2009 (through August 25, 2009)	$32.94	$27.15

On August 25, 2009, the closing price as reported on The NASDAQ Global Market of our common stock was $31.06 per share. As of June 30, 2009, we had approximately 290 holders of record of our common stock.

DIVIDEND POLICY

We have never declared or paid, and do not anticipate declaring or paying, any cash dividends on our common stock. Any future determination as to the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects and other factors our board of directors may deem relevant.

Table of Contents

CAPITALIZATION

The following table sets forth our cash, cash equivalents and short-term investments and capitalization as of June 30, 2009.

	As of June 30, 2009 (In thousands)
Cash, cash equivalents and short-term investments	$ 63,343
Stockholders' equity:	
Common stock (100,000,000 shares authorized and 22,128,580 shares issued and outstanding)	2
Additional paid-in capital	122,989
Treasury stock	(647)
Accumulated other comprehensive loss	(37)
Accumulated deficit	(57,285)
Total stockholders' equity	65,022
Total capitalization	$ 65,022

The outstanding share information set forth above is as of June 30, 2009 and excludes:

- 1,405,664 shares of common stock, subject to increase on an annual basis, reserved for issuance under our 2009 Equity Incentive Award Plan;
- 2,395,096 shares of common stock issuable upon the exercise of outstanding options to purchase our common stock granted pursuant to our 1999 Stock Plan (including an aggregate of shares of common stock that will be issued upon the exercise of options at a weighted average exercise price of $ per share by certain selling stockholders and sold by them in this offering) at a weighted average exercise price of $7.34 per share; and
- 88,691 shares of common stock issuable upon the exercise of an outstanding warrant (including shares of common stock that will be issued upon the exercise of the warrant by a selling stockholder and sold by a selling stockholder in this offering) at an exercise price of $1.00 per share.

All share and per share information referenced through this prospectus have been retroactively adjusted to reflect a 1-for-12.5 reverse stock split of our common stock and preferred stock effected on May 20, 2009.

SELECTED CONSOLIDATED FINANCIAL DATA

You should read the following selected historical consolidated financial data below in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the consolidated financial statements, related notes and other financial information included in this prospectus. The selected consolidated financial data in this section are not intended to replace the consolidated financial statements and are qualified in their entirety by the consolidated financial statements and related notes included in this prospectus.

The consolidated statements of operations data for the years ended December 31, 2006, 2007 and 2008 and the consolidated balance sheets data as of December 31, 2007 and 2008 are derived from our audited consolidated financial statements included in this prospectus. The consolidated statements of operations data for the years ended December 31, 2004 and 2005 and the consolidated balance sheets data as of December 31, 2004, 2005 and 2006 are derived from our audited consolidated financial statements not included in this prospectus. The unaudited consolidated statements of operations data for the six months ended June 30, 2008 and 2009, and the unaudited consolidated balance sheet data as of June 30, 2009, are derived from our unaudited consolidated financial statements that are included elsewhere in the prospectus. We have prepared the unaudited information on the same basis as the audited consolidated financial statements and have included, in our opinion, all adjustments, consisting only of normal recurring adjustments, that we consider necessary for a fair presentation of the financial information set forth in those statements. Results for the six months ended June 30, 2009 are not necessarily indicative of the results to be expected for the fiscal year ending December 31, 2009. Historical results are not necessarily indicative of the results to be expected in the future.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our financial condition and results of operations in conjunction with the financial statements and the notes thereto included elsewhere in this prospectus. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this prospectus, particularly in "Risk Factors."

Overview

We provide solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. Our solutions include our proprietary Electronic Reservation Book, or ERB, for restaurant customers and www.opentable.com, a popular restaurant reservation website for diners. The OpenTable network includes approximately 11,000 OpenTable restaurant customers spanning all 50 states as well as select markets outside of the United States. Since our inception in 1998, we have seated approximately 110 million diners through OpenTable reservations; during the three months ended June 30, 2009, we seated an average of approximately three million diners per month. Restaurants pay us a one-time installation fee for onsite installation and training, a monthly subscription fee for the use of our software and hardware and a fee for each restaurant guest seated through online reservations. Our online restaurant reservation service is free to diners. For the twelve months ended December 31, 2008 and the six months ended June 30, 2009, our net revenues were $55.8 million and $32.4 million, respectively. For the twelve months ended December 31, 2008 and the six months ended June 30, 2009, our subscription revenues accounted for 54% and 53% of our total revenues, respectively, and our reservation revenues accounted for 41% and 43% of our total revenues, respectively.

In 2004, we began to selectively expand outside of North America into countries that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. To date, we have concentrated our international efforts in Germany, Japan and the United Kingdom. Our revenues outside of North America for the twelve months ended December 31, 2008 and the six months ended June 30, 2009, were $2.8 million and $1.7 million, respectively, or 5% and 5% of our total revenues, respectively. We intend to continue to incur substantial expenses in advance of recognizing material related revenues as we attempt to further penetrate our existing international markets and selectively enter new markets. Some international markets may fail to meet our expectations, and we may decide to realign our focus, as we did when we closed our offices in Spain and France in the fourth quarter of 2008.

Basis of Presentation

General

We report consolidated operations in U.S. dollars and operate in two geographic segments: North America and International. The North America segment is comprised of all of our operations in the United States, Canada and Mexico, and the International segment is comprised of all non-North America operations, which includes operations in Europe and Asia.

Revenues

We generate substantially all of our revenues from our restaurant customers; we do not charge any fees to diners. Our revenues include installation fees for our ERB (including training), monthly subscription fees and a fee for each restaurant guest seated through online reservations. Installation fees are recognized on a straight-line basis over an estimated customer life of approximately six years.

Table of Contents

Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered to our restaurant customers. Revenues from online reservations are recognized on a transaction basis as the diners are seated by the restaurant. Revenues are shown net of redeemable Dining Points issued to diners as described in "Critical Accounting Policies and Estimates Dining Rewards Loyalty Program" below.

Costs and Expenses

Operations and support. Our operations and support expenses consist primarily of payroll and related costs, including bonuses and stock-based compensation, for those employees associated with installation, support and maintenance for our restaurant customers, as well as costs related to our outsourced call center. Operations and support expenses also include restaurant equipment costs, such as depreciation on restaurant-related hardware, shipping costs related to restaurant equipment, restaurant equipment costs that do not meet the capitalization threshold, referral payments and website connectivity costs. Operations and support expenses also include amortization of capitalized website and development costs (see "Critical Accounting Policies and Estimates Website and Software Development Costs" below). Also included in operations and support expenses are travel and related expenses incurred by the employees providing installation and support services for our restaurant customers, plus allocated facilities costs.

Sales and marketing. Our sales and marketing expenses consist primarily of salaries, benefits and incentive compensation for sales and marketing employees, including stock-based compensation. Also included are expenses for trade shows, public relations and other promotional and marketing activities, travel and entertainment expenses and allocated facilities costs.

Technology. Our technology expenses consist primarily of salaries and benefits, including bonuses and stock-based compensation, for employees and contractors engaged in the development and ongoing maintenance of our website, infrastructure and software, as well as allocated facilities costs.

General and administrative. Our general and administrative costs consist primarily of salaries and benefits, including stock-based compensation, for general and administrative employees and contractors involved in executive, finance, accounting, risk management, human resources and legal roles. In addition, general and administrative costs include consulting, legal, accounting and other professional fees. Bad debt, third party payment processor, credit card, bank processing fees and allocated facilities costs are also included in general and administrative expenses.

Headcount consists of full-time equivalent employees, as well as full-time equivalent contractors, in all of the sections noted below.

Other Income, Net

Other income, net consists primarily of the interest income earned on our cash accounts. Foreign exchange gains and losses are also included in other income, net.

Income Taxes

We are subject to tax in the United States as well as other tax jurisdictions or countries in which we conduct business. Earnings from our non-U.S. activities are subject to local country income tax and may be subject to current U.S. income tax.

As of December 31, 2008, for federal and state tax purposes, we had $10.4 million of federal and $9.8 million of state net operating loss carryforwards available to reduce future taxable income. These net operating loss carryforwards begin to expire in 2023 and 2009 for federal and state tax purposes, respectively. Our ability to use our net operating loss carryforwards to offset any future

Table of Contents

taxable income will be subject to limitations attributable to equity transactions that resulted in a change of ownership as defined by Section 382 of the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code. We have $15.0 million in unrecognized tax benefits primarily as a result of the limitations on our net operating loss carryforwards. In the event that any unrecognized tax benefits are recognized, the effective tax rate will be affected. Approximately $14.3 million of the unrecognized tax benefit would impact the effective tax rate if recognized. Our policy is to classify interest accrued or penalties related to unrecognized tax benefits as a component of income tax expense. No such interest or penalties have been recorded to date.

Our net deferred tax assets consist primarily of net operating loss carryforwards generated before we achieved profitability. During the fourth quarter of 2007, we concluded that it was more likely than not that we would be able to realize the benefit of these deferred tax assets in the future. Consequently, we recognized a net tax benefit of $9.4 million in the fourth quarter of 2007 resulting primarily from the release of substantially all of the net deferred tax valuation allowance. We based this conclusion on historical and projected operating performance, as well as our expectation that our operations will generate sufficient taxable income in future periods to be able to realize a portion of the tax benefits associated with the deferred tax assets. We will continue to assess the need for a valuation allowance on the deferred tax asset by evaluating both positive and negative evidence that may exist. Any adjustment to the deferred tax asset valuation allowance would be recorded in the income statement of the periods that the adjustment is determined to be required.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP). The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates.

We believe that the assumptions and estimates associated with revenue recognition, the points-based loyalty program, website and software development costs, income taxes and stock-based compensation have the greatest potential impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting policies and estimates. For further information on all of our significant accounting policies, please see Note 2 of the accompanying notes to our consolidated financial statements.

Revenue Recognition

Our revenues include installation fees for our ERB (including training), monthly subscription fees and a fee for each restaurant guest seated through online reservations. We provide our application as a service, and follow the provisions of SEC Staff Accounting Bulletin No. 104, *Revenue Recognition* (SAB No. 104) and FASB Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables* (EITF No. 00-21). We recognize revenue when all of the following conditions are met: there is persuasive evidence of an arrangement; the service has been provided to the customer; the collection of the fees is reasonably assured; and the amount of fees to be paid by the customer is fixed or determinable. Amounts paid by the customer include the right to use our hardware during the service period. Proportionate revenue related to the right to use our hardware accounts for less than 10% of revenues for the periods presented.

Revenues from the installation of our ERB are recognized on a straight-line basis over the estimated customer life, commencing with customer acceptance. The estimated customer life is approximately six years, based on historical restaurant customer termination activity. Estimates made by

Table of Contents

us may differ from actual customer lives. These differences may materially impact installation and other revenue by increasing or decreasing revenue, depending on whether the estimated customer life decreases or increases. A change in the estimated customer life by one year in either direction would have a minimal impact to total revenue of less than 1%. Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered. Reservation revenues (or per seated diner fees) are recognized on a transaction-by-transaction basis as diners are seated by our restaurant customers. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenues or revenues, depending on whether the revenue recognition criteria have been met. Revenues are shown net of redeemable Dining Points issued to diners (as described below).

Dining Rewards Loyalty Program

We provide a points-based loyalty program, OpenTable Dining Rewards, to registered diners who book and honor reservations through the OpenTable website. OpenTable Dining Rewards involves the issuance of "Dining Points," which can be accumulated and redeemed for "Dining Cheques." The standard award is 100 points per reservation, but diners can earn 1,000 points for reservations during featured times under the OpenTable Dining Rewards program. When a diner accumulates a minimum of 2,000 points, he or she may redeem them for a $20 Dining Cheque. Every 100 Dining Points is equal to one dollar. Diners may present Dining Cheques at any OpenTable restaurant and their bill is reduced by the cheque amount. The restaurant then deposits the Dining Cheque to its bank.

If a diner does not make a seated reservation within any 12-month period, then his or her account is considered inactive and the Dining Points balance is reset to zero. As is typical with points-based incentive programs, many Dining Points expire unused. In addition, some Dining Cheques are never used. The recorded expense is an estimate of the eventual cash outlay related to the issued Dining Points and is booked at the time the points are earned by the diner (i.e., when the diner is "seated" by the restaurant). We estimate the cost of the issued Dining Points by analyzing historical patterns of redemption and cheque cashing activity. These historical patterns are evaluated in light of any current or proposed program changes that may impact future point redemption. Actual redemption rates could differ from our estimates used in assessing the contra-revenue amounts and corresponding liability, particularly if participation in our premium listings programs, with higher point awards, increases. These differences could materially impact reservation revenues. For example, an increase of 10% in the redemption rate as of June 30, 2009 would result in a reduction in revenues of $1.8 million and an increase in the dining rewards payable liability of 19%.

We recognize the cost and a corresponding liability associated with Dining Points as contra-revenue in accordance with EITF Issue No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)* (EITF 01-09) and EITF Issue No. 00-22, *Accounting for "Points" and Certain Other Time- or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to be Delivered in the Future* (EITF 00-22).

Website and Software Development Costs

Costs related to website and internal-use software are accounted for in accordance with American Institute of Certified Public Accountants Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* (SOP 98-1) and EITF Issue No. 00-2, *Accounting for Website Development Costs* (EITF 00-2). Such software is primarily related to our website, including support systems. In accordance with SOP 98-1 and EITF 00-2, we capitalize our costs to develop software when preliminary development efforts are successfully completed, management has authorized and committed project funding and it is probable that the project will be completed and the software will be used as intended. Such costs are amortized on a straight-line basis over the estimated useful life of the related asset, generally estimated between two to four years. Costs incurred prior to

Table of Contents

meeting these criteria are expensed as incurred. Costs incurred for enhancements that are expected to result in additional features or functionality are capitalized and expensed over the estimated useful life of the enhancements.

We follow the guidance in Statement of Financial Accounting Standard No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed* (SFAS 86) in accounting for costs incurred in connection with development of the software contained in the ERB used by all restaurant customers, and in a limited number of certain transactions we sell reservation systems that do not include our ongoing service. All costs incurred to establish the technological feasibility of a computer product to be sold, leased or otherwise marketed are expensed as incurred. Costs incurred subsequent to establishing technological feasibility and through general product release are capitalized and amortized over the estimated product life. The period between technological feasibility and general product release is extremely short for us, and the costs incurred during this stage are not considered to be material and are expensed as incurred.

Income Taxes

We record income taxes using the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in our financial statements or tax returns. In estimating future tax consequences, generally all expected future events other than enactments or changes in the tax law or rates are considered. Valuation allowances are provided when necessary to reduce deferred tax assets to the amount expected to be realized.

We operate in various tax jurisdictions and are subject to audit by various tax authorities. We provide for tax contingencies whenever it is deemed probable that a tax asset has been impaired or a tax liability has been incurred for events such as tax claims or changes in tax laws. Tax contingencies are based upon their technical merits, relevant tax law and the specific facts and circumstances as of each reporting period. Changes in facts and circumstances could result in material changes to the amounts recorded for such tax contingencies.

On January 1, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109* (FIN 48), which supplements FASB Statement No. 109 by defining the confidence level that a tax position must meet in order to be recognized in the financial statements. FIN 48 requires that the tax effects of a position be recognized only if it is "more likely than not" to be sustained based solely on its technical merits as of the reporting date. We consider many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and which may not accurately anticipate actual outcomes.

With the adoption of FIN 48, companies are required to adjust their financial statements to reflect only those tax positions that are more likely than not to be sustained. Any necessary adjustment would be recorded directly to retained earnings and reported as a change in accounting principle as of the date of adoption. FIN 48 prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns.

Stock-based Compensation

Prior to January 1, 2006, we accounted for stock-based employee compensation arrangements using the intrinsic value method of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25) and related interpretations, and complied with the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123) as amended by SFAS No. 148, *Accounting for Stock-Based Compensation, Transition and Disclosure, an amendment to SFAS*

Table of Contents

Statement No. 123 (SFAS 148). Under APB 25 compensation expense for employees is based on the excess, if any, of the fair value of our common stock over the exercise price of the option on the date of grant.

Effective January 1, 2006, we adopted SFAS No. 123R, *Share-Based Payment* (SFAS No. 123R), which requires compensation expense related to share-based transactions, including employee stock options, to be measured and recognized in the financial statements based on fair value. SFAS No. 123R revises SFAS No. 123, as amended, and supersedes APB 25. We adopted SFAS No. 123R using the modified prospective method. Under modified prospective application, SFAS No. 123R applies to new awards and to awards modified, repurchased or cancelled after the required effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered that are outstanding as of the required effective date are recognized as the requisite service is rendered on or after the required effective date. The compensation expense for that portion of awards is based on the grant-date fair value of those awards. The compensation expense for awards with grant dates prior to January 1, 2006, are attributed to periods beginning on or after the effective date using the attribution method that was used under SFAS No. 123, except that the method of recognizing forfeitures only as they occur is not continued.

We are using the graded vesting attribution method prescribed by SFAS No. 123R, over the option vesting period, for all options granted on or after January 1, 2006. All options granted prior to 2006 are being amortized using a straight-line method.

The fair values of the common stock underlying stock options granted during the fourth quarter of 2007 and 2008 were estimated by our board of directors, which intended all options granted to be exercisable at a price per share not less than the per share fair value of our common stock underlying those options on the date of grant. In the absence of a public trading market, our board of directors considered numerous objective and subjective factors to determine its best estimate of the fair market value of our common stock as of the date of each option grant, including but not limited to, the following factors: (i) the rights, preferences and privileges of our preferred stock relative to the common stock; (ii) our performance and stage of development; (iii) valuations of our common stock; and (iv) the likelihood of achieving a liquidity event for the shares of common stock underlying these stock options, such as an initial public offering or sale of our company, given prevailing market conditions. The assumptions we use in the valuation model are based on subjective future expectations combined with management judgment. If any of the assumptions used in the Black-Scholes model changes significantly, stock-based compensation for future awards may differ materially compared with the awards granted previously.

In April 2008, in connection with the preparation of our consolidated financial statements, we performed a retrospective analysis to reassess the fair value of our common stock at certain option grant dates for financial reporting purposes. We performed a retrospective valuation analysis as of December 2007 and March 2008. The valuation analysis consisted of two major steps: the estimation of the aggregate value of the entire company (referred to as Business Enterprise Value, or BEV) and the allocation of this aggregate value to each element of the contemporary capital structure (preferred stock, common stock, options and warrants). As described below, the BEV was estimated using a combination of income and market-based methods. The allocation of the BEV to equity classes was performed using an option-based method as of each valuation date.

Significant Factors, Assumptions and Methodologies Used in Determining Fair Value

In determining the fair value of our BEV and common stock, we used a combination of the income approach and the market approach to estimate our aggregate BEV at each valuation date: December 2007 and March 2008.

Table of Contents

The income approach is an estimate of the present value of the future monetary benefits expected to flow to the owners of a business. It requires a projection of the cash flows that the business is expected to generate over a forecast period and an estimate of the present value of cash flows beyond that period, which is referred to as residual value. These cash flows are converted to present value by means of discounting, using a rate of return that accounts for the time value of money and the appropriate degree of risks inherent in the business. The market approach considers multiples of financial metrics based on both acquisitions and trading multiples of a peer group of companies. These multiples are then applied to our financial metrics to derive an indication of value.

Our indicated BEV at each valuation date was then allocated to the shares of redeemable convertible preferred stock, warrants to purchase shares of redeemable convertible preferred stock, and common stock, using a contingent claim methodology. This methodology treats the various components of our capital structure as a series of call options on the proceeds expected from the sale of the company or the liquidation of our assets at some future date. These call options are then valued using the Black-Scholes option pricing model. This model defines the securities' fair values as functions of the current fair value of the company and assumptions based on the securities' rights and preferences. As a result, the option-pricing method requires assumptions regarding the anticipated timing of a potential liquidity event, such as an initial public offering, and the estimated volatility of our equity securities. The anticipated timing of a liquidity event utilized in these valuations was based on then current plans and estimates of our board of directors and management regarding an initial public offering. Estimates of the volatility of our stock were based on available information on the volatility of capital stock of comparable publicly traded companies.

Common Stock Valuations

We granted stock options with the following exercise prices during the twelve months ended December 31, 2008:

Option Grant Dates	Number of Shares Underlying Options	Exercise Price Per Share	Fair Market Value Per Underlying Share as of Grant Date	Intrinsic Value
March 2008	398,446	$ 7.75	$ 10.63	$ 2.88
May 2008	48,000	10.63	10.63	
December 2008	115,400	10.63	10.63	

No stock options were granted in the six months ended June 30, 2009.

In determining the fair value of our BEV and common stock, we conducted retrospective valuations using the approaches mentioned above. These valuations resulted in estimated fair value of our common stock for accounting purposes of $10.63 per share at March 2008.

Under SFAS No. 123R, the fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. We determined weighted average valuation assumptions as follows:

Volatility. As we do not have a trading history for our common stock, the expected stock price volatility for our common stock was estimated by taking the median historic price volatility for industry peers based on daily price observations over a period equivalent to the expected term of the stock option grants. Industry peers consist of several public companies in the technology industry similar in size, stage of life cycle and financial leverage. We did not rely on implied volatilities of traded options in our industry peers' common stock because the volume of activity was relatively low.

Table of Contents

Expected term. The expected term was estimated using the simplified method allowed under SEC Staff Accounting Bulletin No. 107, *Share-Based Payment*.

Risk free rate. The risk free interest rate is based on the yields of U.S. Treasury securities with maturities similar to the expected term of the options for each option group.

Forfeiture rate. We estimated the forfeiture rate using our historical experience with forfeitures. We review the estimated forfeiture rates each period end and make changes as factors affecting the forfeiture rate calculations and assumptions change.

Dividend yield. We have never declared or paid any cash dividends and do not presently plan to pay cash dividends in the foreseeable future. Consequently, we used an expected dividend yield of zero.

The following table summarizes the assumptions relating to our stock options for the year ended December 31, 2008:

	Year Ended December 31, 2008
Dividend yield	0%
Volatility	55%
Risk free interest rate	1.54%-3.34%
Expected term, in years	5.92-6.53

No stock options were granted in the six months ended June 30, 2009.

Using the Black-Scholes option pricing model, we recorded non-cash stock-based compensation expenses related to employee stock options granted of approximately $4.0 million in 2008 and approximately $1.7 million for the six months ended June 30, 2009, in accordance with the requirements of SFAS No. 123R.

Table of Contents

Our operations and support expenses increased $1.8 million, or 21%, for the six months ended June 30, 2009 compared to the six months ended June 30, 2008. The increase in operations and support expenses was primarily attributable to an increase of $0.8 million in headcount related costs due to an increase in operations and support headcount, as well as a $0.8 million increase in restaurant equipment depreciation, as a result of the increased installed base of restaurants.

Sales and Marketing

	Six Months Ended June 30,		
	2008	2009	% Change
	(Dollars in thousands)		
Sales and marketing	$ 7,310	$ 7,808	7%
Headcount (at period end):

Total	43	52	21%

Our general and administrative expenses increased $0.4 million, or 6%, for the six months ended June 30, 2009 compared to the six months ended June 30, 2008. The increase was primarily attributable to a $0.1 million increase in headcount related costs as a result of increases in headcount, and a $0.5 million increase in bad debt expense.

Other Income, Net

	Six Months Ended June 30,		
	2008	2009	% Change
	(Dollars in thousands)		
Other income, net	$ 323	$ 146	(55)%

Other income, net decreased $0.2 million, or 55%, for the six months ended June 30, 2009 compared to the six months ended June 30, 2008. The decrease was the result of less interest income being earned on cash, cash equivalents and short-term investments in 2009, as a result of lower short-term interest rates in 2009 compared to 2008.

Income Taxes

	Six Months Ended June 30,		
	2008	2009	% Change
	(Dollars in thousands)		
Income tax expense	$513	$1,294	152%

Income tax expense increased $0.8 million, or 152%, for the six months ended June 30, 2009 compared to the six months ended June 30, 2008. Our effective tax rate is expected to be lower in 2009 than 2008 due to our largest permanent difference, non-deductible stock-based compensation, being a smaller percentage of taxable income, than experienced in 2008.

2007 compared to 2008. Total revenues increased $14.7 million, or 36%, from 2007 to 2008. Subscription revenues increased to $30.3 million in 2008 from $22.4 million in 2007, an increase of $7.9 million, or 35%. Subscription revenues increased due to the increase in installed restaurants. Reservation revenues increased to $23.1 million in 2008 from $17.0 million in 2007, an increase of $6.1 million, or 36%. Reservation revenues increased as a result of an increase in seated diners.

2006 compared to 2007. Total revenues increased $14.0 million, or 51%, from 2006 to 2007. Subscription revenues increased to $22.4 million in 2007 from $15.5 million in 2006, an increase of $7.0 million, or 45%. Subscription revenues increased due to the increase in installed restaurants. Reservation revenues increased to $17.0 million in 2007 from $10.7 million in 2006, an increase of $6.3 million, or 60%. Reservation revenues increased as a result of an increase in seated diners.

Total	63	79	106	25%	34%

2007 compared to 2008. Operations and support expenses for the year ended December 31, 2008 were $17.8 million compared to $12.6 million for the year ended December 31, 2007, an increase of $5.2 million, or 41%. The increase in operations and support expenses was primarily attributable to a $1.9 million increase in headcount related expenses, including a $0.4 million increase in cost at our outsourced customer support center, plus a $1.6 million increase in restaurant equipment costs, including depreciation on restaurant hardware, equipment and shipping costs in connection with the increase in the installed base of restaurants.

2006 compared to 2007. Operations and support expenses for the year ended December 31, 2007 were $12.6 million compared to $9.5 million for the year ended December 31, 2006, an increase of $3.1 million, or 32%. The increase in operations and support expenses was primarily attributable to a $1.6 million increase in headcount related expenses related to our expansion into international markets, including a $0.5 million increase in capacity at our outsourced customer support center, plus a $0.7 million increase in depreciation on restaurant hardware in connection with the increase in the installed customer base. The increase in both internal and external resources was a result of increasing capacity to meet the growth of new restaurant customers and an increase in the number of customers with more complex implementation requirements.

Sales and Marketing

	Years Ended December 31,			2006 to 2007 % Change	2007 to 2008 % Change

2007 compared to 2008. Sales and marketing expenses for the year ended December 31, 2007 were $14.8 million compared to $11.3 million for the year ended December 31, 2007, an increase of $3.5 million, or 31%. The increase in sales and marketing expenses was primarily attributable to a $2.5 million increase in headcount related costs, consistent with the increase in headcount. Also included in headcount and related costs was an increase in commissions of $0.3 million consistent with the increase in newly contracted restaurant customers compared to the prior year.

2006 compared to 2007. Sales and marketing expenses for the year ended December 31, 2007 were $11.3 million compared to $7.7 million for the year ended December 31, 2006, an increase of $3.7 million, or 48%. The increase in sales and marketing expenses was primarily attributable to a

Table of Contents

$3.1 million increase in headcount related costs, consistent with the increase in headcount. Also included in headcount and related costs was an increase in commissions of $1.0 million consistent with the increase in newly contracted restaurant customers compared to the prior year.

2007 compared to 2008. Technology expenses for the year ended December 31, 2008 were $9.5 million compared to $5.9 million for the year ended December 31, 2007, an increase of $3.6 million, or 62%. The increase in technology expenses was primarily attributable to a $3.2 million increase in headcount related costs, consistent with the increase in headcount that began in the second half of 2007.

2006 compared to 2007. Technology expenses for the year ended December 31, 2007 were $5.9 million compared to $4.0 million for the year ended December 31, 2006, an increase of $1.8 million, or 46%. The increase in technology expenses was primarily attributable to a $1.6 million increase in headcount related costs, consistent with the increase in headcount. We significantly increased the size of our technology team during 2007 to support website and ERB enhancements, the international expansion of our solutions and website, and system control enhancements.

General and Administrative

	Years Ended December 31,			2006 to 2007 % Change	2007 to 2008 % Change
	2006	2007	2008		
	(Dollars in thousands)				
General and administrative	$5,972	$12,212	$13,117	104%	7%
Headcount (at period end):

International	4	3	7	(25)	133
Total	28	33	50	18%	52%

2007 compared to 2008. General and administrative expenses for the year ended December 31, 2008 were $13.1 million compared to $12.2 million for the year ended December 31, 2007, an increase of $0.9 million, or 7%. The increase in general and administrative expenses was primarily the result of an increase of $1.6 million in headcount related costs and a $0.6 million increase in bad debt expense. These amounts were offset by a one-time legal settlement in the amount of $1.6 million included in the 2007 period.

2006 compared to 2007. General and administrative expenses for the year ended December 31, 2007 were $12.2 million compared to $6.0 million for the year ended December 31, 2006, an increase of $6.2 million, or 104%. The increase in general and administrative expenses was primarily the result of an increase of $2.3 million in headcount related costs, as a result of increased headcount, and an increase in professional services of $1.7 million to support international accounting efforts. A one-time $1.6 million legal settlement was also included in the 2007 period. Excluding the one-time

Table of Contents

legal settlement costs, general and administrative costs increased as a result of the growth of our financial and accounting resources.

Other Income, Net

	Years Ended December 31,			2006 to 2007	2007 to 2008
	2006	2007	2008	% Change	% Change
	(Dollars in thousands)				
Other income, net	$421	$951	$468	126%	(51)%

2007 compared to 2008. Other income, net for the year ended December 31, 2008 was $0.5 million compared to $1.0 million for the year ended December 31, 2007, a decrease of $0.5 million, or 51%. The decrease in other income, net was primarily the result of a $0.2 million decrease in interest income earned on cash, cash equivalents and short-term investments as a result of experiencing lower short-term borrowing interest rates, and a $0.3 million increase in foreign exchange transaction loss.

2006 compared to 2007. Other income, net for the year ended December 31, 2007 was $1.0 million compared to $0.4 million for the year ended December 31, 2006, an increase of $0.5 million, or 126%. The increase in other income, net was primarily the result of a $0.4 million increase in interest income earned on cash, cash equivalents and short-term investments. Cash increased $11.4 million from 2006 to 2007, which together with higher short-term interest rates during the first half of 2007 resulted in significantly higher interest income.

Income Taxes

	Years Ended December 31,		
	2006	2007	2008
	(Dollars in thousands)		
Income tax expense (benefit)	$176	$(9,121)	$2,118

2007 compared to 2008. Income tax expense for the year ended December 31, 2008 was $2.1 million compared to an income tax benefit of $9.1 million for the year ended December 31, 2007. Our income tax expense in 2008 was higher than the amount using the expected statutory rate by $1.6 million due to permanent differences, the largest of which was non-deductible stock-based compensation. The income tax benefit in 2007 was primarily the result of releasing substantially all of the valuation allowance against our deferred tax asset.

2006 compared to 2007. In 2006, we recorded income taxes that were principally attributable to foreign taxes and other minimum corporate taxes. In those periods, we offset our taxable income through the utilization of net operating loss carryforwards. In the fourth quarter of 2007, we determined that it would be more likely than not that the cumulative net operating losses and other deferred tax benefits would be realizable by us, creating a $9.1 million income tax benefit due to the deferred tax asset recorded on our balance sheet at the end of 2007.

Table of Contents

Quarterly Results of Operations Data

The following tables set forth our unaudited quarterly consolidated statements of operations data and our unaudited statements of operations data as a percentage of revenues for each of the nine quarters in the period ended June 30, 2009. We have prepared the quarterly data on a consistent basis with the audited consolidated financial statements included in this prospectus, and the financial information reflects all necessary adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of this data and reflects a 1-for-12.5 reverse stock split of our common stock and preferred stock effected on May 20, 2009. The results of historical periods are not necessarily indicative of the results of operations for a full year or any future period.

Revenue has increased sequentially as a result of adding more installed restaurants each quarter. As the number of installed restaurants increases, subscription revenues increase. As the number of restaurants on our network increases, the number of diners using our services generally increases, and reservation revenues tend to increase. While we generally experience some seasonality in our reservation revenues, typically peaking during the holiday season from November through February (Valentine's Day), we have historically been able to consistently increase our revenues in each quarter. We expect that reservation revenues, as a percentage of total revenues, will continue to increase as our installed base of restaurants and seated diners increases over time.

Our operations and support expenses have generally increased sequentially in absolute dollars, and have remained generally consistent as a percentage of revenues over time. We expect operations and support expenses to continue to increase in absolute dollars as we add more restaurant customers to our network.

Our sales and marketing expenses have increased sequentially in absolute dollars, and have remained generally consistent as a percentage of revenues over time. We expect sales and marketing expenses to increase in absolute dollars as we increase our headcount to support further growth in North American and international markets.

Our technology expenses have generally increased sequentially in absolute dollars, and increased as a percentage of revenues beginning in the fourth quarter of 2007 when we significantly increased technology headcount focused on projects related to website and ERB enhancements, internationalization and system control enhancements. We expect technology expenses to modestly increase in absolute dollars as we slow our recent rate of headcount growth in the future.

Excluding a one-time legal settlement for $1.6 million in the third quarter of 2007, our general and administrative expenses have generally increased sequentially in absolute dollars, and have remained generally consistent as a percentage of revenues over time, as we increased our financial and accounting resources and headcount focused on our international efforts. We expect general and administrative expenses to modestly increase in absolute dollars in the future.

In the fourth quarter of 2007, we determined that it would be more likely than not that our cumulative net operating losses and other deferred tax benefits would be realizable by us, creating a

50

Table of Contents

$9.4 million income tax benefit due to the deferred tax asset recorded on our balance sheet at the end of 2007. In the short term, we will experience high effective tax rates as a result of stock-based compensation amounts not being deductible as an expense for tax purposes and being sizable compared to our overall income (loss) before taxes.

As of June 30, 2009, we had cash and cash equivalents of $20.7 million and short-term investments of $42.7 million. Cash and cash equivalents consist of cash and money market accounts. Short-term investments consist of U.S. government agency securities, commercial paper and certificates of deposit. To date, we have experienced no loss or lack of access to our invested cash, cash equivalents or short-term investments; however, we can provide no assurances that access to our invested cash, cash equivalents and short-term investments will not be impacted by adverse conditions in the financial markets.

Amounts deposited with third party financial institutions exceed the Federal Deposit Insurance Corporation, or FDIC, and Securities Investor Protection Corporation, or SIPC, insurance limits, as applicable. These cash, cash equivalents and short-term investment balances could be impacted if the underlying financial institutions fail or are subjected to other adverse conditions in the financial markets. To date we have experienced no loss or lack of access to our cash, cash equivalents or short-term investments.

We have a $3.0 million line of credit to fund working capital under which we have no amounts drawn down as of June 30, 2009. This line of credit expires in July 2010.

Prior to 2005, we financed our operations and capital expenditures through private sales of preferred stock, lease financing, the use of a bank-provided line of credit and operations. Since 2005, we have been able to finance our operations, including international expansion, through cash from operating activities and proceeds from the exercise of vested and unvested employee stock options. We had cash and cash equivalents of $20.7 million at June 30, 2009, which is an increase of $15.1 million from December 31, 2008, due to the receipt of net proceeds in the amount of $35.0 million from our IPO in May 2009. We believe we will have sufficient cash and cash equivalents and short-term investments to support our operating activities for at least the next twelve months.

Operating Activities

For the six months ended June 30, 2009, operating activities provided $7.8 million in cash, as a result of net income of $1.1 million, plus $2.5 million in depreciation and amortization, $1.1 million in provision for bad debts and $1.7 million in stock-based compensation. These amounts were offset by a cash usage of $1.2 million as a result of an increased accounts receivable balance.

Table of Contents

In 2008, operating activities provided $8.5 million in cash, as a result of a net loss of $1.0 million, offset by $4.4 million in depreciation and amortization and $4.0 million in stock-based compensation. These amounts were offset by a cash usage of $2.2 million as a result of an increase in accounts receivable.

In 2007, operating activities provided $11.2 million in cash as a result of net income of $9.2 million, depreciation and amortization amounts of $3.0 million and stock-based compensation amounts of $3.1 million, combined with sources of cash from a $2.8 million increase in accounts payable and accrued expenses, a $2.3 million increase in the Dining Points payable, and a $1.1 million increase from deferred revenues. These amounts were offset by deferred taxes of $9.4 million and a cash usage of $1.8 million resulting from the increase in accounts receivable.

In 2006, operating activities provided $5.9 million in cash as a result of $0.2 million net income, $2.1 million in depreciation and amortization, increases in the Dining Points payable of $1.5 million, increases in deferred revenues of $1.0 million and $0.7 million in stock-based compensation.

Investing Activities

Our primary investing activities have consisted of purchases and sales of short-term investments and purchases of property and equipment. We expect to have ongoing capital expenditure requirements to support our growing restaurant installed base and other infrastructure needs. We expect to fund this investment with our existing cash, cash equivalents and short-term investments.

In addition to purchases of property and equipment, we purchased $25.4 million (net of sales) of short-term investments in the six months ended June 30, 2009 and $5.7 million in the six months ended June 30, 2008.

Financing Activities

Our financing activities have consisted entirely of proceeds from the issuance and repurchase of common stock, in each of the periods presented, including our IPO in May 2009. We received $35.0 million in proceeds, net of issuance costs, from the sale of common stock in our IPO which was completed on May 21, 2009.

Quantitative and Qualitative Disclosure About Market Risk

We are exposed to market risks in the ordinary course of our business. These risks include primarily interest rate, foreign exchange risks and inflation.

Interest Rate Fluctuation Risk

We do not have any long-term borrowings.

Our investments include cash, cash equivalents and short-term investments. Cash and cash equivalents consist of cash and money market accounts. Short-term investments consist of U.S. government agency securities, commercial paper and certificates of deposit. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. We do not enter into investments for trading or speculative purposes. Our investments are exposed to market risk due to a fluctuation in interest rates, which may affect our interest income and the fair market value of our investments. Due to the short-term nature of our investment portfolio, we do not believe an immediate 10% increase in interest rates would have a material effect on the fair market value of our portfolio, and therefore we do not expect our operating results or cash flows to be materially affected to any degree by a sudden change in market interest rates.

Table of Contents

Foreign Currency Exchange Risk

We have foreign currency risks related to our revenues and operating expenses denominated in currencies other than the U.S. dollar, principally the British pound sterling, the euro, the Japanese yen, the Canadian dollar and the Mexican peso. We do not believe movements in the foreign currencies in which we transact will significantly affect future net earnings. Foreign currency risk can be quantified by estimating the change in cash flows resulting from a hypothetical 10% adverse change in foreign exchange rates. We believe such a change would not have a material impact on our results of operations.

Inflation Risk

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

Off Balance Sheet Arrangements

As of June 30, 2009, we did not have any off balance sheet arrangements.

Contractual Obligations

We lease our primary office space in San Francisco, California and other locations under various non-cancelable operating leases that expire between 2009 and 2013. We have no debt obligations, other than a $3.0 million line of credit for working capital, which to date has not had any borrowings under it. This credit facility expires in July 2010. Additionally, all property and equipment have been purchased for cash, and accordingly we have no capital lease obligations. Finally, we have no material long-term purchase obligations outstanding with any vendors or third parties.

	Payments Under Operating Leases (In thousands)
Year ending December 31:	
2009	$ 784
2010	1,413

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), *Business Combinations* (SFAS No. 141(R)). SFAS No. 141(R) establishes principles and requirements for how the acquiror of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree. SFAS No. 141(R) also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. We are required to adopt SFAS No. 141(R) for the fiscal year beginning January 1, 2009. The adoption of SFAS No. 141(R) did not have a material impact on our financial position or results of operations at the time of adoption.

Table of Contents

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements* (SFAS No. 160) which amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements* (ARB No. 51), to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a non-controlling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity separate and apart from the parent's equity in the consolidated financial statements. In addition to the amendments to ARB No. 51, this statement amends SFAS No. 128, *Earnings Per Share*, so that earnings per share data will continue to be calculated the same way those data were calculated before this statements was issued. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The adoption of SFAS No. 160 did not have a material impact on our financial position or results of operations at the time of adoption.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162). This statement documents the hierarchy of the various sources of accounting principles and the framework for selecting the principles used in preparing financial statements. This statement shall be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. SFAS No. 162 will not have a material impact on our consolidated financial statements.

Table of Contents

BUSINESS

Overview

We provide solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. Our solutions include our proprietary Electronic Reservation Book, or ERB, for restaurant customers and www.opentable.com, a popular restaurant reservation website for diners. The OpenTable network includes approximately 11,000 OpenTable restaurant customers spanning all 50 states as well as select markets outside of the United States. Since our inception in 1998, we have seated approximately 110 million diners through OpenTable reservations, and during the three months ended June 30, 2009, we seated an average of approximately three million diners per month. Restaurants pay us a one-time installation fee for onsite installation and training, a monthly subscription fee for the use of our software and hardware and a fee for each restaurant guest seated through online reservations. Our online restaurant reservation service is free to diners. For the twelve months ended December 31, 2007 and 2008, our net revenues were $41.1 million and $55.8 million, respectively. For the twelve months ended December 31, 2007 and 2008, our subscription revenues accounted for 55% and 54% of our total revenues, respectively, our reservation revenues accounted for 41% and 41% of our total revenues, respectively, and our installation and other revenues accounted for 4% and 5% of our total revenues, respectively. For the six months ended June 30, 2008 and 2009, our subscription revenues accounted for 53% and 53% of our total revenues, respectively, our reservation revenues accounted for 43% and 43% of our total revenues, respectively, and our installation and other revenues accounted for 4% and 4% of our total revenues, respectively.

The OpenTable ERB combines proprietary software and computer hardware to deliver a solution that computerizes restaurant host-stand operations and replaces traditional pen-and-paper reservation books. Our ERB streamlines and enhances a number of business-critical functions and processes for restaurants, including reservation management, table management, guest recognition and email marketing. This enables restaurants to manage all of their reservations those booked by phone or online as well as walk-in diners in one unified system. The ERB also automatically accepts online reservations in real time directly from the OpenTable website as well as from websites of our partners and restaurant customers. The ERBs at our restaurant customers connect via the Internet to form an online network of restaurant reservation books. We also operate the OpenTable website, which enables diners to quickly and conveniently find, choose and book tables at restaurants on the OpenTable network, overcoming the inefficiencies associated with the traditional process of reserving by phone. Diners appreciate the convenience of being able to secure a reservation at any time, even when the restaurant is closed, and the time savings of being able to instantly find and reserve available tables without having to call restaurants one by one until they find an available reservation that suits their needs. Online visitors come to the OpenTable website directly, via natural search engine results and via our partners' and restaurant customers' websites. During the twelve months ended December 31, 2008, less than 1% of reservations made through our website were attributable to paid-search advertising.

We initially focused on acquiring a critical mass of local restaurant customers in four metropolitan areas: Chicago, New York, San Francisco and Washington, D.C. These markets have since developed into active, local networks of restaurants and diners that continue to grow. We have applied and continue to apply the same fundamental strategy in developing and penetrating our other markets in the United States, Canada and Mexico. In 2004, we began to selectively expand into countries outside of North America that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. To date, we have concentrated our international efforts in Germany, Japan and the United Kingdom. Our revenues outside of North America for the twelve months ended December 31, 2007 and 2008, were $1.5 million and $2.8 million, respectively, or 4% and 5% of our total revenues, respectively. Our revenues outside of North America for the six months ended June 30, 2009, were $1.7 million, or 5% of our total revenues.

Table of Contents

Restaurant Industry Background

The commercial restaurant industry is broadly divided into "quick-service" and "full-service" segments. We target our offerings to full-service restaurants that accept reservations. We believe based on our internal estimates that there are approximately 30,000 reservation-taking restaurants in North America that seat approximately 600 million diners through reservations annually, though this number fluctuates with economic and other conditions.

The ability of the restaurant industry to leverage the power of the Internet for reservation transactions has been inhibited by two key characteristics. First, the reservation-taking restaurant industry has been slow to computerize host-stand operations. During the last decade, other reservation-taking industries, such as airlines and hotels, have experienced a dramatic shift in consumer behavior as reservations have migrated from the phone to the Internet. In contrast, given the restaurant industry's relatively basic transaction needs, generally requiring only the diner's name and phone number and no advance payment, restaurant reservations historically have been largely handled by the traditional pen-and-paper reservation book, despite the inherent operational inefficiencies and potential for error. Second, the reservation-taking restaurant industry is highly fragmented, with independent restaurants and small, local restaurant groups comprising a significant majority of restaurant locations. Unlike other industries in which suppliers can deliver goods and services to customers around the world, the restaurant industry is inherently local. These conditions make it time-consuming and costly to aggregate the breadth of local restaurant table inventory required to attract a critical mass of diners to make reservations online and to create an online restaurant reservation network.

In addition, reservation-taking restaurants generally share the following operational challenges:

Profitability is dependent on filling seats. Because restaurants typically have a high fixed cost structure, restaurant profitability is heavily dependent on filling as many seats as possible. Similar to hotel rooms and airplane seats, restaurant table inventory is highly perishable, with unfilled seats representing a significant lost revenue opportunity.

Prospective business is lost due to the inefficiencies of reserving by phone. Most restaurants are not staffed to answer the phone until late morning or early afternoon, and many are only open six days per week. As a result, they lose potential business when prospective guests are not able to secure reservations by phone at their convenience. Additionally, restaurants experience costly "no-shows" when guests fail to cancel their reservations because of the inconvenience of doing so over the phone.

Managing and preserving guest information is difficult. One of the ways in which restaurants compete is by providing exceptional, personalized service, for example, by recognizing repeat diners and recalling their preferences or special occasions. Guest histories and preferences are typically stored in the memories of the maitre d' or host, and therefore the implications of losing a staff member who is familiar with a restaurant's best and most frequent guests are considerable. In an industry characterized by a high rate of employee turnover, the ability to preserve and transfer this information is critical.

Information technology resources to install and support computer-based systems are limited. Few restaurants have the technical knowledge, resources or time to install computer systems and troubleshoot problems with computer systems or Internet connectivity. At the same time, the fast pace of business operations means that restaurants cannot tolerate service interruptions from an equipment or networking failure.

Marketing opportunities with measurable results are limited. Typically, restaurants promote themselves through magazines and newspapers as well as online dining guides and directories. However, restaurants generally do not have the ability to track the number of people who ultimately dine in response to their advertisements, nor are the costs of these advertisements tied to the number of diners they attract. Therefore, restaurants usually are unable to measure or compare the effectiveness of these marketing channels.

Table of Contents

Diner Behavior and Trends

For many diners, part of the appeal of dining out is experiencing a variety of restaurants. Therefore, diners value sources that help them discover new restaurants and provide information about these restaurants. Historically, diners learned about restaurants through word of mouth and local print media, such as dining guides, newspapers and magazines. While diners continue to value personal recommendations, the Internet now puts a wealth of restaurant information at their fingertips. However, arguably the most important piece of information what restaurants can accommodate a dining party has been missing from online dining sources. As a result, when it comes to booking a restaurant reservation, diners have had to use the phone instead of the Internet.

Reserving by phone can be a highly inefficient and inconvenient process, requiring diners to call one restaurant at a time until they find an available reservation that meets their needs, and then make a reservation without knowing the full range of available choices. Phone reservations can only be secured during the restaurant's business hours. Diners who call when a restaurant is closed or during peak service hours oftentimes must leave a voicemail message and wait for the restaurant to call back. Diners who do get through to a reservationist may be put on hold or informed that there are no available tables at the desired time, requiring them to call another restaurant and repeat the process until they find a suitable reservation. Diners who need to change or cancel an existing reservation experience similar difficulties in doing so by phone.

The Internet has the potential to redefine the reservation experience for diners and streamline the operations and increase the return on marketing spend for reservation-taking restaurants. In order for diners to fully embrace online restaurant reservations, they need real-time access to table inventory across a broad selection of local restaurants and the ability to instantly book confirmed reservations around-the-clock.

Our Solution

Reservation-taking restaurants and diners have interconnected needs. Restaurants require cost-effective ways to attract guests and manage their reservations, while diners seek convenient ways to find available restaurants, choose among them and secure reservations. By creating an online network of restaurants and diners that transact with each other through real-time reservations, we have developed a specialized platform for addressing the needs of both.

Essential to this network is building a critical mass of local, computerized restaurant reservation books. We achieve this by offering software that provides important operational benefits for the restaurant, bundling it with computer hardware and installing this solution at the restaurant host stand, thereby creating a compelling solution for restaurants. We sell our solutions to individual restaurants within a market, typically one by one, via a direct sales force. We believe that we deliver a strong return on investment for our restaurant customers by streamlining their operations, filling additional seats and improving their quality of service. As a result, we have historically enjoyed high customer satisfaction and retention rates.

The OpenTable website gives diners real-time access to tables at restaurants on the OpenTable network. As more local restaurants are added to the network, the utility provided to diners increases and more diners discover the benefits of researching restaurants and making reservations on our website. The more diners who use our website to make their dining decisions, the more value we deliver to our restaurant customers and the more restaurants are attracted to our network.

Benefits of OpenTable to Reservation-Taking Restaurants

In response to the needs of reservation-taking restaurants, we offer the OpenTable ERB, an integrated solution consisting of proprietary OpenTable software which is installed on a touch-screen computer system and supported by various asset-protection and security tools. Additionally, we provide

Table of Contents

restaurants with access to diners via our website as well as through our partners' websites. Participation in the OpenTable network helps restaurants:

Fill seats that might otherwise remain empty. We help restaurants fill their seats and minimize "no-shows" by offering the convenience of online reservations directly through the OpenTable website as well as indirectly through the websites of our partners and restaurant customers, all of which are stored in the ERB. In addition, restaurants may elect to be featured in OpenTable marketing programs, which drive incremental business to participating restaurants through enhanced listings on the OpenTable website. Participating restaurants pay OpenTable a premium per-seated diner fee for diners seated in response to these special listings.

Create operational efficiencies by automating reservations and table management. The reservation module of the ERB replaces the restaurant's pen-and-paper system with a computerized reservation book that records and tracks all reservations (online, phone and walk-in) in the same system, thereby improving accuracy and efficiency. Floor management capabilities improve operational efficiencies by helping restaurants maximize seat utilization, facilitate server rotations and improve table turns.

Boost guest recognition and overall guest service. The integrated guest-management database included in the ERB enables restaurant staff to record diner preferences and histories in order to recognize repeat diners and provide them with personalized service. The ERB also includes email capabilities which provide restaurants with a cost-effective channel to reach and attract repeat diners. Additionally, we help restaurants monitor customer satisfaction by collecting and delivering guest feedback from OpenTable diners.

Computerize host-stand operations with customized, on-site installation and training and technical support. We install our ERB, which combines proprietary software and computer hardware, at the restaurant, verifying Internet connectivity, configuring the system for the restaurant's unique needs and training staff members on its use. We monitor Internet connectivity and assist the restaurant in resolving connectivity issues. Additionally, we perform nightly data backups that enable us to restore the reservation book if necessary, and we provide around-the-clock technical support.

Market to a targeted audience with measurable results. Our website enables diners to find restaurants that can accommodate them, giving restaurants valuable marketing exposure during the diners' decision-making process. Moreover, restaurants pay OpenTable only for those diners whom they ultimately serve, unlike other marketing channels such as magazines, newspapers and online dining guides and directories. Consequently, restaurants know the number of diners acquired through OpenTable and the costs of acquiring each of these diners.

Benefits of OpenTable to Diners

In response to the needs of diners, we offer the OpenTable website, a destination website for those seeking a convenient way to research restaurants and make reservations. Our website enables diners to:

Find available tables. Diners can search for reservations by location, date, time and party size and view table availability across a variety of restaurants. Because our website connects directly to the thousands of ERBs residing at OpenTable restaurants, reservation search results reflect real-time availability.

Choose a restaurant. In response to their searches on our website, diners are presented with a list of restaurants with available reservations at their desired dining times. Diners may also click on a restaurant listing to view additional information, including restaurant descriptions,

Table of Contents

photos and menus. While making their restaurant choices, diners may also consult the OpenTable Diners' Choice lists that highlight restaurants that are most highly rated by OpenTable diners, for example, Best Overall, Best Italian, Most Romantic or Good for Groups.

Book instantly confirmed reservations for free. When a diner reserves through the OpenTable website, the reservation is instantly recorded in the ERB located at the restaurant the same system in which the host would record a phone reservation. Diners can also change or cancel reservations online as well as invite guests via email. Diners receive on-screen and email messages confirming their reservation details. Additionally, registered diners can earn Dining Reward Points when they make and honor OpenTable reservations. Points can be redeemed for Dining Cheques that are accepted at OpenTable restaurant customers.

Our Strategy

As our network of reservation-taking restaurants and diners grows, the value we deliver grows as well. Because the foundation of our network is building a critical mass of computerized reservation books, we enhance our offering to diners by adding new restaurant customers. In turn, as more diners use the OpenTable website to make their dining decisions and book their reservations, we deliver more value to our restaurant customers by helping them fill more of their seats. In this process, we grow the value of our business. The key elements of this strategy include:

Continue to Build the OpenTable Network in North America

The value of the OpenTable network grows as participation among restaurants and diners grows. Experience in our earliest markets provides a successful model that we have implemented while entering new markets, and, as a result, our newer markets in North America have grown relatively predictably over time. We intend to continue to build our North American network by employing this proven model.

Produce and maintain superior solutions. We continue to evolve our ERB based on nearly a decade of in-field experience as well as feedback from our installed base of approximately 11,000 restaurant customers. Additionally, we will continue to optimize our website through insights gained from the experience of seating approximately 110 million diners through online reservations.

Leverage our direct sales force. Over the last ten years, we have expended considerable resources to build a direct sales force skilled at selling the benefits of OpenTable to reservation-taking restaurants, which operate in an industry that is highly fragmented. We will continue to leverage our skilled direct sales force to add more restaurants to the network.

Provide excellent customer service and support. We believe that our superior customer service is an integral component of high satisfaction rates among our restaurant customers and provides us with a deep understanding of restaurant needs and general industry trends. We will continue to employ highly trained operational teams to provide installation and training services for our restaurant customers and augment our in-house support staff with contract support services to deliver superior customer assistance.

Continue to attract diners to our website by offering the best reservation experience. We believe that providing the best diner reservation experience increases market adoption of our services, builds our brand awareness and drives word-of-mouth referrals to our website. We continue to enhance our website for ease of use and augment it with unique, helpful restaurant content. For example, we have begun to leverage the collective feedback of OpenTable diners to publish user-generated content that diners use while making restaurant

Table of Contents

choices. We will continue to evolve the diner reservation experience on our website through usability testing and website analytics.

Expand Internationally

We intend to augment our growing North American business by selectively expanding into countries outside of North America that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. We currently have operations in Germany, Japan and the United Kingdom, each supported with a direct sales force and operational staff. We have approximately 1,200 restaurant customers in these markets. In general, our strategy internationally is to replicate the model we have successfully employed in North America. In particular, our initial focus in new international markets is to increase our restaurant customer base, and we believe the localized versions of our software solution will compete favorably against competitive software offerings, enabling us to expand our network of computerized reservation books across a broad selection of local restaurants.

Our Products

We have created a proprietary technology system comprised of stand-alone client-server applications located at each restaurant that connect via the Internet to our central servers which host our website. The distributed nature of this system design enables us to provide real-time solutions to our restaurant customers and to diners.

Restaurant Software and Hardware and Related Solutions

The ERB is an integrated solution consisting of proprietary OpenTable software that is installed on a dedicated, touch-screen computer system at the restaurant's host stand and supported by various asset-protection and security tools. The ERB supports reservation management, table and floor management, guest management, marketing and a number of other business processes. This functionality has evolved through seven major software releases over nine years based on feedback from and experience with thousands of restaurant customers. The software is built on a foundation that supports rapid translation into local languages.

We provide on-site installation, training and round-the-clock customer support for the ERB as part of our monthly subscription fee. We monitor Internet connectivity to the ERB, alerting restaurants when they are offline and working with them to resolve any problems we detect. We also provide data protection services, including managing firewalls and virus scanning software on all computers on our network to protect restaurants from harmful intrusions and performing nightly backups of each restaurant's database to prevent data loss in the event of a hardware failure. Our restaurant customers also receive a hardware replacement, populated with the restaurant's backed-up data, in the event of a computer failure, and software upgrades and updates, which are deployed automatically via the Internet to each ERB, requiring minimal interference with the restaurant's operations.

OpenTable Website

We design, build and operate the OpenTable website in North America and the United Kingdom as well as websites localized for Germany and Japan. Our system is a real-time reservation system with a patent pending on our high-speed inventory tracking and search technology. The OpenTable website maintains around-the-clock communications with restaurants on our online reservation network. As a result, any change made at the restaurant to the table inventory that affects the OpenTable website is updated on the website in real time, and diners using the website get current inventory information on every search request, typically in a few seconds.

In addition to the OpenTable website, we offer versions of the OpenTable website optimized for use on mobile devices.

Table of Contents

OTRestaurant Website

We design, build and operate the OTRestaurant website, which serves as an information and services portal for our restaurant customers. The website provides restaurant customers with secure access to client-specific materials including detailed online reservation reports, online invoicing and feedback forms from recent diners. In addition, a restaurant can visit the OTRestaurant website to learn about upcoming OpenTable promotions, submit date-specific information such as Valentine's Day menus and update the profile information displayed on the OpenTable website, for example, restaurant description and hours of operation. The OTRestaurant website serves as a two-way communication channel between us and our restaurant customers, which ultimately improves the support we provide and drives increased operational efficiencies.

Sales and Marketing

Sales and Marketing to Restaurants

We employ a direct sales force of regional account executives. Our sales and marketing efforts focus on identifying qualified sales leads, communicating the benefits of computerizing the restaurant reservation book and filling seats through online reservations. Our marketing activities include lead generation, direct marketing, public relations and participation in trade shows and conferences.

Marketing to Diners

We enjoy significant word-of-mouth referrals and natural-search traffic to our website. We encourage repeat usage through our points-based loyalty program, OpenTable Dining Rewards, which allows diners to earn Dining Points when they make and honor OpenTable reservations. We also optimize our website to improve our positioning in natural search engine results. To date, we have found limited value in print, broadcast, online or paid-search advertising, and, as a result, we do not purchase a material amount of marketing from those channels.

In addition to operating our own destination website, we work with hundreds of partners to enhance their restaurant listings with OpenTable online reservation capabilities. We also encourage our restaurant customers to incorporate OpenTable reservation capabilities into their own websites, which not only introduces diners to the convenience of online reservations but also helps restaurants fill more seats by providing around-the-clock reservation capabilities.

Customer Support

One of the reasons we enjoy high satisfaction among our restaurant customers is the quality of the solutions we provide. These solutions include the following:

Implementation Services for Restaurants

Once the customer agreement is signed, an OpenTable Project Coordinator, or PC, contacts the restaurant to begin the implementation process. The PC works with a contact at the restaurant to schedule and plan for successful system installation and training. This includes the completion of a site survey to gather restaurant-specific information such as table layouts, reservation timeslot configuration, network and Internet connectivity setup, and other information necessary to properly set up the OpenTable system. Armed with a completed site survey, a Field Operations Specialist, or FOS, configures the OpenTable system for the restaurant prior to the on-site installation.

During a typical installation, the FOS loads the software onto the computer system provided by OpenTable, establishes proper network connectivity and checks the system by entering a test reservation from the OpenTable website. Working with the restaurant manager, the FOS then uses the administrative functionality of the ERB software to configure and optimize the restaurant's

Table of Contents

computerized reservation book. The FOS also provides training to restaurant staff on using the various modules in the ERB.

Ongoing Restaurant Relationship Management

Each of our restaurant customers is assigned to an OpenTable Client Relations Manager, or CRM, who is the primary contact for that restaurant and owns the post-implementation restaurant relationship. CRMs encourage maximum utilization of the ERB to ensure that the restaurant realizes the full value of the system. For example, the CRM assists restaurants in adjusting their reservation books to maximize capacity utilization, reservation-enabling their websites, tracking guest preferences and marketing to their diners.

Restaurant Telephone Support

After the initial installation and training, restaurants may contact OpenTable via a toll-free number to receive technical support and follow-up training as part of our monthly service fee. Live telephone support is available 14 hours per day, seven days a week, with emergency support available around-the-clock.

All customer contacts are tracked in our proprietary Restaurant Operations Management System, or ROMS, to ensure cases are resolved quickly and completely. Cases are categorized by reason and sub-reason codes to identify trends and support root-cause analyses. These analyses provide important feedback to drive future process improvements and solutions enhancements.

Most routine support cases are handled by a U.S.-based third-party customer support partner. When necessary, the support partner escalates calls to our in-house support team located at our headquarters in San Francisco. Our support partner receives equivalent training and access to the same tools as the San Francisco support team.

Consumer Support for Website Users

Diners with questions about the OpenTable reservation network or the OpenTable website can access an online list of dynamically ordered frequently asked questions, or FAQs. If none of the FAQs address the concern, a diner can email our support team via a web-based form. We use a third-party email management system to queue, assign, track, categorize and report on these email inquiries. Emails are categorized to support analysis for website enhancement and continuous process improvement.

Technology

Our technology infrastructure supports the network of restaurants and diners critical to our business.

Data Centers and Network Access

Our primary data center is hosted by a leading provider of hosting services in Santa Clara, California. Backup systems in our corporate headquarters in San Francisco can be brought online in the event of a failure at the primary data center. We also maintain a second data center site at a facility outside of California. The site enables additional fault tolerance and will support our continued growth.

The data centers host the OpenTable website, the OTRestaurant website and intranet applications that are used to manage the website content. The websites are designed to be fault-tolerant, with a collection of identical web servers connecting to an enterprise database. The design also includes load balancers, firewalls and routers that connect the components and provide connections to

Table of Contents

the Internet. The failure of any individual component is not expected to affect the overall availability of our website.

Our system also includes a proprietary method of accessing website-relevant, real-time restaurant inventory from the data centers, providing very fast response times. The system is designed to scale to accommodate the foreseeable growth in the number of restaurants and diners on our network.

Network Security

The data center and restaurant systems maintain real-time communication with proprietary, encrypted message protocols. We also use leading commercial antivirus, firewall and patch-management technology to protect and maintain the systems located at the data centers and at each restaurant.

Internal Management Systems

We have developed proprietary systems to ensure rapid, high-quality customer service, software development and website updates. ROMS is a system-integrated customer support application that gives us unique customer resource management tools designed specifically for the restaurant industry. It houses detailed restaurant customer information encompassing the entire customer lifecycle, including initiating a contract, installing the OpenTable system, issuing monthly bills, tracking restaurant inventory and providing ongoing support. In addition, ROMS leverages system-integrated tools allowing for remote technical diagnosis and repair, while operating under multi-tiered security protocols to ensure restaurant customer information is protected. The Customer Help and Restaurant Management system, or CHARM, is a proprietary web content management and consumer support tool that enables rapid website customization. Restaurant profiles, descriptions, maps, partner reviews, restaurant messaging and reservation parameter configurations are all driven out of CHARM.

Development

We devote a substantial portion of our resources to developing new solutions and enhancing existing solutions, conducting product testing and quality assurance testing, improving core technology and strengthening our technological expertise in the restaurant table management and reservation market. As of June 30, 2009, our technical group consisted of 72 employees, who are focused on new feature development for existing solutions and the design of new solutions. We also outsource a portion of our software development to a third-party service provider located in India. For the twelve months ended December 31, 2007 and 2008 and the six months ended June 30, 2009, technology expenses totaled $5.9 million, $9.5 million and $5.3 million, respectively.

Intellectual Property

Our success depends upon our ability to protect our core technology and intellectual property. To accomplish this, we rely on a combination of intellectual property rights, including trade secrets, patents, copyrights and trademarks, as well as contractual restrictions. We enter into confidentiality and proprietary rights agreements with our employees, consultants and business partners, and we control access to and distribution of our proprietary information.

We have one issued patent which expires in 2020 and four patent applications pending in the United States. We have one patent application pending in India. We intend to pursue corresponding patent coverage in additional countries to the extent we believe such coverage is appropriate and cost effective.

Our registered trademarks in the United States, Japan and the European Union include "OpenTable" and the OpenTable logo. "OpenTable" is also registered in Canada, China, Mexico and

Table of Contents

Australia. "OpenTable.com" is also registered in the European Union. We have filed other trademark applications in the United States and certain other countries.

We are the registrant of the Internet domain name for our websites, www.opentable.com, www.otrestaurant.com and our international websites.

In addition to the foregoing protections, we generally control access to and use of our proprietary software and other confidential information through the use of internal and external controls, including contractual protections with employees, contractors, customers and partners. Our software is protected by United States and international copyright laws.

Competition

Competition for Reservation-Taking Restaurants

The primary competitor for the OpenTable ERB is the traditional pen-and-paper reservation book. Paper-based reservation books enjoy the advantage of being extremely familiar and simple; however, they are also time-consuming, error-prone, manual and not easily reproduced in case of loss or damage. Through our sales efforts, we explain the benefits of automation to restaurants including greater operational efficiency, superior guest recognition and service and the ability to fill additional seats by offering reservations over the Internet. Other companies attempt to address restaurant needs for computerized reservation management with a variety of technologies.

We believe the principal competitive factors in the market for computerized restaurant reservation management solutions include:

comprehensive reservation, table and guest management functionality;

ability to fill incremental seats for the restaurant;

ability to deliver strong return on investment for restaurant customers;

system responsiveness and ease-of-use;

on-site, custom system installation and training;

robust support; and

security, reliability and data protection.

In international markets that we entered more recently and where we have not yet achieved a high degree of penetration, we face more intense competition from local software-development and application service provider, or ASP, vendors. We believe that, over time, the advantages that have established us as a leading provider in North America will help us as we compete in international markets.

Competition for Diners

Our primary competitor for diners making reservations is the phone. The phone enjoys two inherent advantages over online reservations. First, every restaurant and diner has a phone. Second, making reservations by phone is a familiar, ingrained experience for diners.

In order to compete effectively with the phone, the OpenTable website must offer diners a critical mass of restaurants from which to choose and access to reservation inventory comparable to that available by phone. When combined with the growing number of restaurant

customers, the OpenTable online reservation network achieves these requirements by communicating directly and in real time with the ERB maintained at each restaurant. Additionally, we offer diners all the conveniences and time savings associated with booking reservations online, including the ability to:

Table of Contents

book reservations around-the-clock, even when restaurants are closed; find available tables in real time across a selection of local restaurants; receive immediate confirmation of the reservation via email; change or cancel reservations online; and earn Dining Reward Points, redeemable for Dining Cheques accepted by our restaurant customers.

Secondary competition comes from allocation-based reservation-taking websites that offer diners the ability to book reservations for a limited selection of restaurant table inventory. Participating restaurants identify specific reservations, generally at non-peak and unpopular times, which can be offered for booking via these allocation sites. Unlike OpenTable reservations which are immediately recorded in the ERB residing at the restaurant host stand, these allocation reservations are communicated to the restaurant by traditional phone and fax systems, email or web-based accounts that restaurants can check to access reservation requests. These methods are prone to errors, such as lost or double-booked reservations, and require additional effort on the part of restaurants. We believe the limited reservation inventory and unreliable reservation processing methods associated with these allocation-based websites limit their value proposition for diners.

Employees

As of June 30, 2009, we had 313 full-time employees including 102 in operations and support, 87 in sales and marketing, 72 in technology and 52 in general and administrative functions. None of our employees are covered by collective bargaining agreements. In addition, as of June 30, 2009, we had six contractors who are full-time equivalents, including two in operations and support, two in technology and two in general and administrative functions.

Facilities

Our principal executive offices are located in San Francisco, California, in a 34,236-square-foot facility, under a lease expiring on April 30, 2013. We also have regional offices in Chicago, Illinois; Frankfurt, Germany; New York, New York; London, England; Mexico City, Mexico; and Tokyo, Japan.

Legal Proceedings

On May 12, 2009, Mount Hamilton Partners, LLC, or Mount Hamilton, filed a patent infringement lawsuit against us in the United States District Court for the Northern District of California, seeking, among other things, a judgment that we have infringed a certain patent held by Mount Hamilton, an injunctive order against the alleged infringing activities and an award for damages. If an injunction is granted, it could force us to stop or alter certain of our business activities, such as certain aspects of the OpenTable Dining Rewards program. We have denied Mount Hamilton's allegations and asserted counterclaims seeking judicial declarations that the Mount Hamilton patent is not infringed, is unenforceable and is invalid. While we believe that we have substantial and meritorious defenses to these claims and intend to vigorously defend our position, neither the outcome of the litigation nor the amount and range of potential damages or exposure associated with the litigation can be assessed with certainty.

We are also subject to various other legal proceedings and claims arising in the ordinary course of business. Although occasional adverse decisions or settlements may occur, management believes that the final disposition of such matters will not have a material adverse effect on our business, financial position, results of operations or cash flows.

Table of Contents

MANAGEMENT

The following table provides information regarding our executive officers and directors as of July 31, 2009:

Name	Age	Position(s)
Jeffrey Jordan	50	Chief Executive Officer, Director
Matthew Roberts	41	Chief Financial Officer
Joel Brown	48	Senior Vice President, Operations
Michael Dodson	50	Senior Vice President, Sales
Charlie McCullough	58	Senior Vice President, Engineering
A. George "Skip" Battle(1)(2)	65	Director
Adam R. Dell	39	Director
J. William Gurley(2)	43	Director
Thomas H. Layton	46	Director
Danny Meyer(2)	51	Director
Michelle Peluso(1)	37	Director
Paul Pressler(1)	53	Director

(1) Member of the audit committee

(2) Member of the compensation committee

Executive Officers

Jeffrey Jordan has served as our chief executive officer since June 2007 and as a member of our board of directors since July 2007. From October 2004 to September 2006, Mr. Jordan served as the president of PayPal, the Internet-based payment system owned by eBay, Inc. For five years prior to that, Mr. Jordan served as senior vice president and general manager for eBay North America. From September 1998 to September 1999, Mr. Jordan served as chief financial officer for Hollywood Entertainment Corporation, a video rental company, and then president of its subsidiary, Reel.com. Previously, Mr. Jordan served in various capacities at The Walt Disney Corporation for eight years, most recently as senior vice president and chief financial officer of The Disney Store Worldwide. Before that, he worked for The Boston Consulting Group. Mr. Jordan holds a Master of Business Administration degree from the Stanford Graduate School of Business and a Bachelor of Arts degree from Amherst College.

Matthew Roberts has served as our chief financial officer since June 2005. Mr. Roberts was chief financial officer of E-LOAN, Inc., a provider of loans, from December 2000 to May 2005 and vice president of finance of E-LOAN, Inc. from January 1999 to November 2000. Mr. Roberts previously served as corporate controller of NetDynamics, Inc., an enterprise software company, and held a general manager position with Berkeley Systems, Inc., a consumer entertainment software company. Mr. Roberts is a Certified Public Accountant and holds a Bachelor of Science degree in Accounting from Santa Clara University.

Joel Brown has served as our senior vice president of operations since November 2001. From March 2000 to May 2001, Mr. Brown served as executive vice president of Charitableway, Inc., an application service provider linking businesses and the nonprofit sector. From April 1992 to March 2000, Mr. Brown served as vice president and general manager of the financial supplies group and the employer services group at Intuit, Inc., a provider of Internet and desktop finance solutions for consumers and small businesses. Mr. Brown holds a Master of Business Administration degree from the Harvard Business School and a Bachelor of Science degree in Industrial Engineering and Operations Research from the University of Michigan.

Table of Contents

Michael Dodson has served as our senior vice president of sales since March 2002. From June 2000 to December 2001, Mr. Dodson served as a principal at The Destination Group, a private equity firm. From September 1997 to June 2000, Mr. Dodson served as vice president/general manager in the establishment services division of American Express, Inc. Mr. Dodson holds a Master of Business Administration degree from New York University's Stern School and a Bachelor of Science degree in Finance from Florida State University.

Charlie McCullough has served as our senior vice president, engineering since October 2003. From August 1998 to November 2002, Mr. McCullough served as executive vice president of engineering and operations of Wink Communications, Inc., an interactive television technology company. Mr. McCullough holds a Bachelor of Science degree in Software Engineering from the University of the State of New York, Regents College.

Board of Directors

A. George "Skip" Battle has served on our board of directors since December 2006. From January 2004 to July 2005, Mr. Battle served as executive chairman of Ask Jeeves, Inc., an Internet search engine company, and from December 2000 to January 2004 he served as chief executive officer of Ask Jeeves, Inc. From December 1995 to January 2006, Mr. Battle served as a member of the board of directors for PeopleSoft, Inc., an enterprise software company, and from August 1996 to June 2002 he served as a member of the board of directors for Barra, Inc., a software company. From 1968 until his retirement in 1995, Mr. Battle served in management roles at Arthur Andersen LLP and then Andersen Consulting LLP (now Accenture), where he became worldwide managing partner of market development and a member of the firm's executive committee. Mr. Battle is currently the chairman of the board of directors for Fair Isaac Corporation, an analytic products company, and is also a member of the board of directors for Netflix, Inc., an online DVD rental company, Expedia, Inc., an online travel reservations provider, and Advent Software, Inc., a software and consulting company, and a member of the board of the Masters Select family of mutual funds. Mr. Battle is also a member of the board of directors of Workday, Inc., a private company, and Berkeley Community Fund, a not-for-profit organization, and a member of the board of trustees of the United States Olympic Cycling Development Foundation. Mr. Battle holds a Master of Business Administration from the Stanford Graduate School of Business and a Bachelor of Arts degree in Economics from Dartmouth College.

Adam R. Dell has served on our board of directors since January 2000. Since January 2000, Mr. Dell has been the managing general partner of Impact Venture Partners, a venture capital firm focused on information technology investments. Prior to this time, Mr. Dell was a partner with Crosspoint Venture Partners in Northern California and a senior associate with Enterprise Partners in Southern California. Prior to becoming a venture capitalist, Mr. Dell worked as a corporate attorney in Austin, Texas, with the law firm of Winstead, Sechrest & Minick. Mr. Dell also founded and served as chairman of the board of MessageOne, which was acquired by Dell, Inc. in 2008. He currently serves on the board of directors of XO Communications and BagBorrowOrSteal and is a member of the Board of Trustees of the Santa Fe Institute. Mr. Dell holds a law degree from the University of Texas School of Law and a Bachelor of Arts degree in Political Economy from Tulane University.

J. William Gurley has served on our board of directors since October 2000. Mr. Gurley is a general partner of Benchmark Capital, a venture capital firm, which he joined in March 1999. Prior to joining Benchmark Capital, Mr. Gurley was a partner with Hummer Winblad Venture Partners, a venture capital firm, and a research analyst for Credit Suisse First Boston, an investment bank. Mr. Gurley holds a Master of Business Administration degree from the University of Texas and a Bachelor of Science degree in Computer Science from the University of Florida.

Thomas H. Layton has served on our board of directors since May 1999. From September 2001 to June 2007, Mr. Layton served as our chief executive officer. Mr. Layton is currently the chief

Table of Contents

executive officer of Metaweb Technologies, Inc., an Internet technology company. From November 1995 to June 1999, Mr. Layton served as president and chief operating officer and was co-founder of CitySearch, Inc., a company that provided online city guides, which later merged with Ticketmaster, Inc., an event ticketing agency. Prior to his experience at CitySearch, Mr. Layton served as chief financial officer of Score Learning Corporation, an educational services company, from April 1994 to October 1995, and as president and chief operating officer from March 1995 to October 1995. From January 1989 to August 1992, Mr. Layton served as vice president and general manager of MicroFinancial Corporation, an equipment leasing company. From 1986 to 1988, Mr. Layton was an associate consultant with The Boston Consulting Group. Mr. Layton is a member of the board of directors of oDesk Corporation, a private company, and a co-founder and member of the board of directors of MAPLight.org, a non-profit organization. Mr. Layton holds a Master of Business Administration degree from the Stanford Graduate School of Business and a Bachelor of Science degree from the University of North Carolina at Chapel Hill.

Danny Meyer has served on our board of directors since February 2000. Mr. Meyer has been the president of Union Square Hospitality Group, or USHG, since 1996. USHG owns and operates a number of restaurants including Union Square Café, Eleven Madison Park, Gramercy Tavern, Tabla and The Modern, which have been featured in the *Michelin Guide*, *The New York Times* and Zagat Surveys. Mr. Meyer is currently a member of the board of directors of the following not-for-profit organizations: Share Our Strength, City Harvest, Irving Harris Foundation and New Yorkers for Parks. Mr. Meyer is also a member of the executive committees of the Madison Square Park Conservancy, Union Square Partnership and NYC & Co. Mr. Meyer holds a Bachelor degree in Political Science from Trinity College.

Michelle Peluso has served on our board of directors since March 2008. From December 2003 to February 2009, Ms. Peluso served as chief executive officer of Travelocity Global, an Internet travel company. From April 2002 to November 2003, Ms. Peluso served as Travelocity's chief operating officer and as senior vice president of product strategy and distribution. Prior to Travelocity, Ms. Peluso served as chief executive officer and founder of Site59, an Internet travel site purchased by Travelocity, from November 1999 to March 2002. Ms. Peluso is currently consulting to several companies and is a member of the board of directors of the following non-profit organizations: Pembroke College NA Foundation, Christa House and TechnoServe. Ms. Peluso holds a Master's degree in Economics, Politics and Philosophy from Pembroke College at Oxford University and a Bachelor of Science degree from the Wharton School of Business at the University of Pennsylvania.

Paul Pressler has served on our board of directors since March 2008. Since July 2009, Mr. Pressler has been an Advisory Partner at Clayton, Dubilier & Rice, Inc., a private equity firm. Mr. Pressler was president and chief executive officer of Gap, Inc. from September 2002 to January 2007. Mr. Pressler also served on Gap, Inc.'s board of directors from October 2002 until January 2007. Prior to joining Gap Inc., Mr. Pressler spent 15 years with The Walt Disney Company. Most recently, he was chairman of the company's global theme park and resorts division. Mr. Pressler previously served as President of Disneyland, President of The Disney Stores and Senior Vice President of Disney Licensing. Mr. Pressler is currently a member of the board of directors of Avon Products, Inc., a beauty products company, and Overture Acquisition Corporation, a blank check company formed for the purpose of completing a business combination transaction, and Vice Chairman of Advance Sensor Technology, Inc., a water conservation technology Company. Mr. Pressler holds a Bachelor of Science degree in Business Economics from the State University of New York at Oneonta.

Board Composition

Our board of directors consists of eight members, six of whom qualify as "independent" according to the rules and regulations of The NASDAQ Stock Market.

Table of Contents

In accordance with our amended and restated certificate of incorporation, our board of directors is divided into three classes with staggered three-year terms. At each annual general meeting of stockholders, the successors to directors whose terms then expire will be elected to serve from the time of election and qualification until the third annual meeting following election. Our directors are divided among the three classes as follows:

The Class I directors are Messrs. Dell and Layton and their terms will expire at the annual general meeting of stockholders to be held in 2010;

The Class II directors are Messrs. Gurley, Jordan and Meyer and their terms will expire at the annual general meeting of stockholders to be held in 2011; and

The Class III directors are Messrs. Battle and Pressler and Ms. Peluso and their terms will expire at the annual general meeting of stockholders to be held in 2012.

Any additional directorships resulting from an increase in the number of directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors.

The division of our board of directors into three classes with staggered three-year terms may delay or prevent a change of our management or a change in control.

Board Committees

Our board of directors has the following committees: an audit committee, a compensation committee and a nominating and corporate governance committee. The composition and responsibilities of each committee are described below. Members serve on these committees until their resignation or until otherwise determined by our board.

Audit Committee

Our audit committee oversees our corporate accounting and financial reporting process. Among other matters, the audit committee evaluates the independent auditors' qualifications, independence and performance; determines the engagement of the independent auditors; reviews and approves the scope of the annual audit and the audit fee; discusses with management and the independent auditors the results of the annual audit and the review of our quarterly consolidated financial statements; approves the retention of the independent auditors to perform any proposed permissible non-audit services; monitors the rotation of partners of the independent auditors on the OpenTable engagement team as required by law; reviews our critical accounting policies and estimates; oversees our internal audit function and annually reviews the audit committee charter and the committee's performance. The current members of our audit committee are A. George "Skip" Battle, who is the chair of the committee, Michelle Peluso and Paul Pressler. All members of our audit committee meet the requirements for financial literacy under the applicable rules and regulations of the SEC and The NASDAQ Stock Market. Our board has determined that Mr. Battle is an audit committee financial expert as defined under the applicable rules of the SEC and has the requisite financial sophistication as defined under the applicable rules and regulations of The NASDAQ Stock Market. Mr. Battle, Ms. Peluso and Mr. Pressler are independent directors as defined under the applicable rules and regulations of the SEC and The NASDAQ Stock Market. The audit committee operates under a written charter that satisfies the applicable standards of the SEC and The NASDAQ Stock Market.

Compensation Committee

Our compensation committee reviews and recommends policies relating to compensation and benefits of our officers and employees. The compensation committee reviews and approves corporate

Table of Contents

goals and objectives relevant to compensation of our chief executive officer and other executive officers, evaluates the performance of these officers in light of those goals and objectives, and sets the compensation of these officers based on such evaluations. The compensation committee also administers the issuance of stock options and other awards under our stock plans. The compensation committee reviews and evaluates, at least annually, the performance of the compensation committee and its members, including compliance of the compensation committee with its charter. The current members of our compensation committee are J. William Gurley, A. George "Skip" Battle and Danny Meyer, with Mr. Gurley serving as the chair of the committee. All of the members of our compensation committee are independent under the applicable rules and regulations of the SEC, The NASDAQ Stock Market and the Internal Revenue Code.

Nominating and Corporate Governance Committee

The nominating and corporate governance committee is responsible for making recommendations regarding candidates for directorships and the size and composition of our board. In addition, the nominating and corporate governance committee is responsible for overseeing our corporate governance guidelines and reporting and making recommendations concerning governance matters. The nominating and corporate governance committee is comprised of all of the members of our board of directors. Potential candidates will be discussed by the entire board, and director nominees will be subject to the approval of the independent members of the board.

There are no family relationships among any of our directors or executive officers.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation committee is or has at any time during the past year been an officer or employee of ours. None of our executive officers currently serves or in the past year has served as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving on our board or compensation committee.

Code of Business Conduct and Ethics

We have adopted a code of business conduct and ethics that applies to all of our employees, officers and directors, including those officers responsible for financial reporting. The code of business conduct and ethics is available on our website at www.opentable.com. Any amendments to the code, or any waivers of its requirements, will be disclosed on our website.

Director Compensation

We do not currently provide any cash compensation to our non-employee directors. Prior to our IPO, we granted stock options from time to time to our non-employee directors as compensation for their services, but we did not have a formal policy in place with respect to such awards. Our directors who are also employees are compensated for their service as employees and do not receive any additional compensation for their service on our board.

Following our IPO, under our 2009 Equity Incentive Award Plan, each non-employee director will receive an initial stock option grant to purchase 32,000 shares of our common stock when he or she joins our board of directors, and thereafter an annual stock option grant to purchase 10,800 shares of our common stock on the date of each annual meeting of stockholders (provided that such non-employee director shall have served on our board of directors for at least six months prior to the date of such annual meeting). The shares subject to the initial stock option grants will vest as to 25% of the underlying shares on each anniversary of the date of grant, and subsequent annual stock option grants will vest on the first anniversary of the date of grant. The shares subject to the initial stock option grants and subsequent annual stock option grants will automatically vest in full and become

Table of Contents

exercisable immediately prior to a change in control of the company. Members of our board of directors who are employees of our company and who subsequently terminate employment with our company and remain members of the board of directors will not receive an initial stock option grant, but, to the extent that they are otherwise eligible, such persons will receive, after termination of employment with our company, annual stock option grants as described above in this paragraph. Notwithstanding the foregoing, Messrs. Dell, Gurley and Layton will not receive the annual stock option grant described above until the 2011 annual meeting of stockholders.

The following table sets forth information regarding compensation earned by our directors who are not named executive officers during the fiscal year ended December 31, 2008.

Name	Option Awards(1)	All Other Compensation	Total
A. George Battle(2)	$ 46,703	$	$ 46,703
Adam Dell			
J. William Gurley			
Thomas H. Layton			
Danny Meyer(3)	100,092		100,092
Michelle Peluso(4)	96,346		96,346
Paul Pressler(4)	96,346		96,346

(1) Amount reflects the total compensation expense for the year ended December 31, 2008 calculated in accordance with SFAS No. 123R. The valuation assumptions used in determining such amounts are described in Note 2 to our financial statements included in this prospectus.

(2) As of December 31, 2008, Mr. Battle held 26,562 shares of our common stock subject to repurchase by us at the original purchase price, all of which were acquired upon the exercise of stock options prior to vesting. The shares of common stock held by Mr. Battle vest as to 1/48th of the shares subject to the option on each monthly anniversary of the vesting commencement date, subject to his continued service as a member of our board of directors.

(3) On March 27, 2008, we granted Mr. Meyer an option to purchase 32,000 shares of our common stock having an exercise price per share equal to $7.75 and a grant date fair value of $209,880. This option vests as to 1/48th of the shares subject to the option on each monthly anniversary of February 12, 2008, subject to Mr. Meyer's continued service as a member of our board of directors. This option remained outstanding as of December 31, 2008. The grant date fair value of this option was computed in accordance with SFAS No. 123R using the valuation assumptions set forth in Note 2 to our consolidated financial statements included in this prospectus.

(4) In connection with the appointment of Ms. Peluso and Mr. Pressler to our board of directors, on March 27, 2008, we granted each an option to purchase 32,000 shares of our common stock having an exercise price per share equal to $7.75 and a grant date fair value of $209,880. Each option vests as to 1/48th of the shares subject to the option on each monthly anniversary of the date of grant, subject to the director's continued service as a member of our board of directors. Each of these options remained outstanding as of December 31, 2008. The grant date fair value of each option was computed in accordance with SFAS No. 123R using the valuation assumptions set forth in Note 2 to our consolidated financial statements included in this prospectus.

Table of Contents

Executive Compensation

Compensation Discussion and Analysis

This section discusses the principles underlying our policies and decisions with respect to the compensation of our executive officers who are named in the "2008 Summary Compensation Table" and the most important factors relevant to an analysis of these policies and decisions. These "named executive officers" for 2008 include Jeffrey Jordan, president and chief executive officer; Matthew Roberts, chief financial officer; Joel Brown, senior vice president, operations; Michael Dodson, senior vice president, sales; and Charlie McCullough, senior vice president, engineering.

Overview

We recognize that the ability to excel depends on the integrity, knowledge, imagination, skill, diversity and teamwork of our employees. To this end, we strive to create an environment of mutual respect, encouragement and teamwork that rewards commitment and performance and that is responsive to the needs of our employees. The principles and objectives of our compensation and benefits programs for our employees generally, and for our named executive officers specifically, are to:

attract, engage and retain individuals of superior ability, experience and managerial talent enabling us to be an employer of choice in the highly-competitive and dynamic information technology industry;

ensure compensation is closely aligned with our corporate strategies, business and financial objectives and the long-term interests of our stockholders;

motivate and reward executives whose knowledge, skills and performance ensure our continued success; and

ensure that total compensation is fair, reasonable and competitive.

Most of our compensation components simultaneously fulfill one or more of these principles and objectives. These components consist of (1) base salary, (2) performance bonuses, (3) equity incentives, (4) retirement savings opportunity, (5) perquisites and health and welfare benefits and (6) post-termination benefits. We view each component of executive compensation as related but distinct, and we also review total compensation of our executive officers to ensure that our overall compensation objectives are met. Not all elements are provided to all named executive officers. Instead, we determine the appropriate level for each compensation component based in part, but not exclusively, on our understanding of the market based on the experience of members of our board of directors and consistent with our recruiting and retention goals, our view of internal equity and consistency, the length of service of our executives, our overall performance and other considerations we deem relevant.

Our philosophy is to make a greater percentage of an executive officer's compensation tied to stockholder returns and to keep cash compensation to a nominally competitive level while providing the opportunity to be well-rewarded through equity if we perform well over time. We believe that because the achievement of our business and financial objectives will be reflected in the value of our equity, our executive officers will be incentivized to achieve these objectives when a portion of their compensation is tied to the value of our equity. To this end, we use stock options as a significant component of compensation because we believe that this best ties individual compensation to the creation of stockholder value. While we offer competitive base salaries, we believe stock-based compensation is a significant motivator in attracting employees for Internet-related and other technology companies. Except as described below, we have not adopted any formal or informal policies or guidelines for allocating compensation between long-term and currently paid out compensation, between cash and non-cash compensation or among different forms of non-cash compensation.

Table of Contents

Each of the primary elements of our executive compensation program is discussed in more detail below. While we have identified particular compensation objectives that each element of executive compensation serves, our compensation programs are designed to be flexible and complementary and to collectively serve all of the executive compensation objectives described above. Accordingly, whether or not specifically mentioned below, we believe that, as a part of our overall executive compensation policy, each individual element, to a greater or lesser extent, serves each of our objectives.

Compensation Determination Process

Compensation for our named executive officers historically has been highly individualized, resulted from arm's-length negotiations and has been based on a variety of informal factors including, in addition to the factors listed above, our financial condition and available resources, our need for that particular position to be filled, our board of directors' evaluation of the competitive market based on the experience of the members of our board of directors with other companies and their review of anonymous private company compensation surveys, the length of service of an executive and the compensation levels of our other executive officers, each as of the time of the applicable compensation decision. In years past, our president and chief executive officer, and, with respect to our president and chief executive officer, our board of directors, reviewed the performance of each named executive officer, generally on an annual basis, and based on this review and the factors described above, set the executive compensation package for him or her for the coming year. However, there was no predetermined time of year for such review. In 2008, there were no increases in compensation for our named executive officers. Following our IPO, the compensation committee became responsible for this annual review and decision-making process.

Historically, our board of directors has reviewed anonymous private company compensation surveys in setting the compensation of our named executive officers. In 2008, however, neither our president and chief executive officer nor our board of directors reviewed market compensation data in setting named executive officer compensation. Our compensation committee is currently contemplating engaging a management consulting firm providing executive compensation advisory services, as a compensation consultant to help evaluate our compensation philosophy and provide guidance in administering our compensation program in the future. We anticipate that our compensation committee will determine executive compensation, at least in part, by reference to the compensation information for the executives of a peer group of comparable companies, although no such peer group has yet been determined. Our compensation committee plans to have our compensation consultant provide market data on a peer group of companies in the technology sector on an annual basis, and we intend to review this information and other information obtained by the members of our compensation committee in light of the compensation we offer to help ensure that our compensation program is competitive. We anticipate that our compensation committee may make adjustments in executive compensation levels in the future as a result of this more formal market comparison process.

We strive to achieve an appropriate mix between equity incentive awards and cash payments in order to meet our objectives. Any apportionment goal is not applied rigidly and does not control our compensation decisions, and our compensation committee does not have any policies for allocating compensation between long-term and short-term compensation or cash and non-cash compensation. Our mix of compensation elements is designed to reward recent results and motivate long-term performance through a combination of cash and equity incentive awards. We believe the most important indicator of whether our compensation objectives are being met is our ability to motivate our named executive officers to deliver superior performance and retain them to continue their careers with us on a cost-effective basis.

The compensation levels of the named executive officers reflect to a significant degree the varying roles and responsibilities of such executives, as well as the length of time those executives have

Table of Contents

served our company. As a result of our board of directors' assessment of our president and chief executive officer's roles and responsibilities within our company, there is a significant compensation differential between his compensation levels and those of our other named executive officers.

Base Salaries

In general, base salaries for our named executive officers are initially established through arm's-length negotiation at the time the executive is hired, taking into account such executive's qualifications, experience and prior salary. Base salaries of our named executive officers are approved and reviewed periodically by our president and chief executive officer, and in the case of our president and chief executive officer's base salary, by our board of directors, and adjustments to base salaries are based on the scope of an executive's responsibilities, individual contribution, prior experience and sustained performance. Decisions regarding salary increases may take into account the executive officer's current salary, equity ownership and the amounts paid to an executive officer's peers inside our company by conducting an internal analysis, which compares the pay of each executive officer to other members of the management team. In making decisions regarding salary increases, we may also draw upon the experience of members of our board of directors with other companies and have historically reviewed anonymous private company compensation surveys when setting base salaries. Base salaries are also reviewed in the case of promotions or other significant changes in responsibility. No formulaic base salary increases are provided to our named executive officers. This strategy is consistent with our intent of offering base salaries that are cost-effective while remaining competitive.

None of our named executive officers received an increase in base salary during 2008, as our president and chief executive officer and our board of directors determined that prior increases in equity compensation better aligned the interests of our executives with our stockholders for 2008.

The actual base salaries paid to all of our named executive officers during fiscal year 2008 are set forth in the "2008 Summary Compensation Table."

Annual Cash Bonuses

In addition to base salaries, annual cash bonus opportunities have been awarded to our named executive officers when our board of directors or our president and chief executive officer has determined that such an incentive is necessary to align our corporate goals with the cash compensation payable to an executive. Historically, such annual cash bonus opportunities have been awarded to two of our named executive officers, namely Mr. Dodson, our senior vice president, sales and Mr. McCullough, our senior vice president, engineering.

In 2008, Mr. Dodson was eligible to receive an incentive bonus under a sales commission plan based on the number of new restaurant customers acquired during 2008. The target incentive bonus for Mr. Dodson was set at $200,000, which we determined was necessary to align his individual incentives with corporate sales objectives and to maintain competitive total compensation for his position in light of his lower base salary as compared to other senior vice presidents in our company. Mr. Dodson achieved new restaurant customer sales in 2008 that were 106% of the objective under his sales commission plan. As such, Mr. Dodson was awarded $212,787, or 106% of his target incentive. There is currently a similar 2009 incentive arrangement in place for Mr. Dodson. For both 2008 and 2009, Mr. Dodson's sales objectives were set at levels we determined to be challenging and requiring substantial effort on the part of Mr. Dodson to achieve. The objectives will not be achieved by average or below average performance by Mr. Dodson. For example, in order to achieve these objectives, Mr. Dodson must manage sales in a manner that increases the number of new restaurant customers at a rate that exceeds current projections. In August 2009, the compensation committee approved an increase to Mr. Dodson's 2009 target bonus for the last two fiscal quarters of 2009 from $100,000 to $112,500, effective as of July 1, 2009. The compensation committee approved such increase based on

Table of Contents

the recommendation of our president and chief executive officer in order to provide Mr. Dodson additional incentive to achieve sales targets that were set at higher levels.

During 2008, Mr. McCullough was eligible to receive an annual cash incentive bonus of up to $30,000, based upon his individual performance, as measured using qualitative goals related to network reliability and product deliverables. Mr. McCullough received his full bonus of $30,000 for 2008. Under a similar bonus arrangement established for Mr. McCullough for 2009, the qualitative goals have been mutually agreed upon between Mr. McCullough and our president and chief executive officer. These goals were set in a manner to challenge Mr. McCullough and require him to achieve system performance improvements and new product developments at higher than historic levels.

In June 2009, the compensation committee approved a one-time bonus of $15,000 payable to Mr. Roberts in recognition of Mr. Roberts' efforts leading to our IPO.

The foregoing bonuses paid to our named executive officers during fiscal year 2008 are set forth in the "2008 Summary Compensation Table."

Long-Term Equity Incentives

The goals of our long-term, equity-based incentive awards are to align the interests of our named executive officers with the interests of our stockholders. Because vesting is based on continued employment, our equity-based incentives also encourage the retention of our named executive officers through the vesting period of the awards. In determining the size of the long-term equity incentives to be awarded to our named executive officers, we take into account a number of internal factors, such as the relative job scope, the value of existing long-term incentive awards, individual performance history, prior contributions to us and the size of prior grants. Although our board of directors did not refer to any competitive market data during 2008, historically, our board of directors has reviewed anonymous private company compensation surveys and drawn upon the experience of its members in determining long-term equity incentive awards. Based upon these factors, our board of directors determines the size of the long-term equity incentives at levels it considers appropriate to create a meaningful opportunity for reward predicated on the creation of long-term stockholder value. In addition, our board of directors has historically allowed our named executive officers to exercise their awards prior to vesting, with any shares issued upon such exercise subject to repurchase by us at the exercise price in the event the executive terminates his or her employment with us. We have not granted any equity awards other than stock options to our named executive officers to date. Our compensation committee currently oversees our long-term equity incentive program.

To reward and retain our named executive officers in a manner that best aligns employees' interests with stockholders' interests, we use stock options as the primary incentive vehicles for long-term compensation. We believe that stock options are an effective tool for meeting our compensation goal of increasing long-term stockholder value by tying the value of the stock options to our future performance. Because employees are able to profit from stock options only if our stock price increases relative to the stock option's exercise price, we believe stock options provide meaningful incentives to employees to achieve increases in the value of our stock over time.

We use stock options to compensate our named executive officers both in the form of initial grants in connection with the commencement of employment and additional or "refresher" grants. To date there has been no set program for the award of refresher grants, and our board of directors retains discretion to make stock option awards to employees at any time, including in connection with the promotion of an employee, to reward an employee, for retention purposes or for other circumstances recommended by management.

The exercise price of each stock option grant is the fair market value of our common stock on the grant date. For 2008, the determination of the appropriate fair market value was made by the

Table of Contents

board of directors. In the absence of a public trading market, the board considered numerous objective and subjective factors to determine its best estimate of the fair market value of our common stock as of the date of each option grant, including but not limited to, the following factors: (i) the rights, preferences and privileges of our preferred stock relative to our common stock; (ii) our performance and stage of development; (iii) valuations of our common stock; and (iv) the likelihood of achieving a liquidity event for the shares of common stock underlying these stock options, such as an initial public offering or sale of our company, given prevailing market conditions. Initial stock option awards to our named executive officers typically vest over a four-year period as follows: 25% of the shares underlying the option vest on the first anniversary of the date of the vesting commencement date, which is typically the date of hire, and the remainder of the shares underlying the option vest in equal monthly installments over the remaining 36 months thereafter. Other than as described below for February 5, 2007 stock option grants, refresher grants vest in equal monthly installments over four years from the vesting commencement date, typically the date of grant or the date the employee was promoted. We believe these vesting schedules appropriately encourage long-term employment with our company while allowing our executives to realize compensation in line with the value they have created for our stockholders. We do not have any security ownership requirements for our named executive officers.

Our board of directors typically provides for the acceleration of vesting of stock options in the event of a change in control of our company. In the event of a change in control, if our stock options are not assumed or substituted for by a successor, the vesting of the options fully accelerates. In the event stock options are assumed or substituted for, then typically the options immediately vest with respect to that percentage of the shares of the option, up to 100%, that equals (A)(i) six months plus (ii) the number of complete months the named executive officer has provided continuous service to us; divided by (B) the total number of months of the original vesting schedule for the shares, with any remaining unvested shares continuing to vest in accordance with the original vesting schedule. With respect to options granted to Mr. Roberts in 2005 and Mr. McCullough in 2004, vesting acceleration for options assumed or substituted for in a change in control is limited to 25% of the unvested shares subject to the option as of the date of the change in control and an additional 25% in the event Mr. Roberts or Mr. McCullough is terminated without cause or otherwise constructively terminated following the change in control. We believe that these acceleration opportunities further align the interests of our executives with those of our stockholders by providing our executives an opportunity to benefit alongside our stockholders in a corporate transaction.

On February 5, 2007, our board of directors granted each of our named executive officers, other than Mr. Jordan who was not yet employed by us, an option to purchase shares of our common stock that is subject to vesting terms different from that described above and not subject to accelerated vesting. These option grants were provided as a special incentive to our named executive officers to encourage further short-term and long-term growth of our company. The vesting schedule of each option is detailed in the section entitled " Outstanding Equity Awards at 2008 Fiscal Year-End."

As a privately owned company, there was no market for our common stock. Accordingly, in 2008, we had no program, plan or practice pertaining to the timing of stock option grants to executive officers coinciding with the release of material non-public information. Going forward, the compensation committee intends to adopt a formal policy regarding the timing of grants.

Retirement Savings

All of our full-time employees in the United States, including our named executive officers, are eligible to participate in our 401(k) plan. Pursuant to our 401(k) plan, employees may elect to reduce their current compensation by up to the statutorily prescribed annual limit, which was $15,500 in 2008, and to have the amount of this reduction contributed to our 401(k) plan. We currently match up to the first $500 of employee contributions under our 401(k) plan.

Table of Contents

Perquisites

Historically, from time to time, our board of directors has provided certain of our named executive officers with perquisites that we believe are reasonable. We do not view perquisites as a significant element of our comprehensive compensation structure, but do believe they can be useful in attracting, motivating and retaining the executive talent for which we compete. We believe that these additional benefits may assist our executive officers in performing their duties and provide time efficiencies for our executive officers in appropriate circumstances, and we may consider providing additional perquisites in the future.

As the result of arm's-length negotiations in connection with the offer letter we entered into with Mr. Jordan in June 2007, Mr. Jordan is entitled to payment of, or reimbursement for, all expenses reasonably incurred by him in connection with his option to use a third party car service for his commute, along with the payment of any taxes incurred by him related to that car service. As the result of the same arm's-length negotiation, we have also agreed to reimburse Mr. Jordan for any taxes he might incur in connection with Section 409A of the Internal Revenue Code as the result of the options we have granted to him.

In the future, we may provide additional perquisites to our executive officers as an element of their overall compensation structure. We do not expect these perquisites to be a significant element of our compensation structure. All future practices regarding perquisites will be approved and subject to periodic review by our compensation committee.

Termination-Based Compensation

As the result of arm's-length negotiations in connection with the offer letter we entered into with Mr. Jordan, we have agreed to provide Mr. Jordan severance benefits if his employment is terminated by our company without cause at any time or if he is constructively terminated by us within twelve months following a change in control of our company. In such an event, Mr. Jordan is entitled to continued payment of his base salary for twelve months, continued health benefits coverage for twelve months, and six months', or in the case of a termination within twelve months following a change in control, twelve months', vesting acceleration with respect to the options granted to him in connection with his commencement of employment with us. Mr. Jordan must execute and not revoke a general release of all claims against us and our affiliates in order to receive any severance benefits. For a further description of Mr. Jordan's offer letter, see " Offer Letter Agreements" below.

We have routinely granted and will continue to grant our named executive officers stock options under our equity incentive plans. For a description of the change in control provisions in such equity incentive plans applicable to these stock options, see " Employee Benefit and Stock Plans 2009 Equity Incentive Award Plan" and " Amended and Restated 1999 Stock Plan" below. The estimated value of these benefits, along with the benefits payable to Mr. Jordan upon a termination of his employment, is set forth below in the section entitled "Potential Payments Upon Change in Control and Upon Termination Following Change in Control."

Tax Considerations

Our board of directors has considered the potential future effects of Section 162(m) of the Internal Revenue Code on the compensation paid to our executive officers. Section 162(m) disallows a tax deduction for any publicly held corporation for individual compensation exceeding $1.0 million in any taxable year for our president and chief executive officer and each of the other named executive officers (other than our chief financial officer), unless compensation is performance based. Prior to our stock being publicly-traded, our board of directors did not take the deductibility limit imposed by Section 162(m) into consideration in setting compensation. We expect that our compensation committee, however, will adopt a policy that, where reasonably practicable, we will seek to qualify the

Table of Contents

variable compensation paid to our executive officers for an exemption from the deductibility limitations of Section 162(m). As such, in approving the amount and form of compensation for our executive officers in the future, our compensation committee will consider all elements of the cost to our company of providing such compensation, including the potential impact of Section 162(m). However, our compensation committee may, in its judgment, authorize compensation payments that do not comply with the exemptions in Section 162(m) when it believes that such payments are appropriate to attract and retain executive talent.

2008 Summary Compensation Table

The following table summarizes the compensation that we paid to our chief executive officer, chief financial officer and each of our three other most highly compensated executive officers during the year ended December 31, 2008. We refer to these officers in this prospectus as our named executive officers.

Name and Principal Position	Year	Salary ($)	Option Awards ($)(1)	Non-Equity Incentive Plan Compensation ($)	All Other Compensation ($)(2)	Total ($)
Jeffrey Jordan, President and Chief Executive Officer	2008	$360,000	$1,146,592	$	$ 19,578	$1,526,170
Matthew Roberts, Chief Financial Officer	2008	225,000	124,828		500	350,328
Joel Brown, Senior Vice President, Operations	2008	225,000	93,627		500	319,127
Michael Dodson, Senior Vice President, Sales	2008	175,000	84,305	212,787	500	472,592
Charlie McCullough, Senior Vice President, Engineering	2008	235,000	100,764	30,000	500	366,264

(1) The amounts included in the "Option Awards" column represent the compensation cost that was recognized by us in the year ended December 31, 2008, determined in accordance with SFAS No. 123R. The valuation assumptions used in determining such amounts are described in Note 2 to our consolidated financial statements included in this prospectus.

(2) Represents a $500 401(k) matching contribution made by us for each of our named executive officers. Mr. Jordan's amount includes $12,887 for the provision of a car and driver and $6,191 for the reimbursement of taxes incurred by him for the provision of such benefit.

Grants of Plan-Based Awards in 2008 Table

The following table provides information regarding grants of non-equity incentive plan-based awards made during the year ended December 31, 2008, to each of our named executive officers.

Name	Estimated Future Payouts Under Non-Equity Incentive Plan Awards Target ($)(1)
Michael Dodson	$ 200,000
Charlie McCullough	30,000

(1)

Represents the annual cash bonus opportunity for 2008 for Mr. Dodson and Mr. McCullough.

Outstanding Equity Awards at 2008 Fiscal Year-End

The following table shows grants of stock options outstanding on December 31, 2008, the last day of our fiscal year, to each of our named executive officers. The unvested stock awards listed below reflect options exercised by our named executive officers prior to vesting.

	Option Awards						Stock Awards	
Name	Date of Grant	Vesting Commencement Date	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Option Exercise Price ($)	Option Expiration Date	Number of Shares of Stock That Have Not Vested (#)	Market Value of Shares of Stock That Have Not Vested ($)
Jeffrey Jordan	7/9/2007(1)	6/1/2007					479,810	$5,097,983
	7/9/2007(1)	6/1/2007	123,379	205,633	23.38	7/8/2017		
Matthew Roberts	8/9/2005(2)	6/16/2005	68,266		1.50	8/8/2015	8,333	88,542
	2/5/2007(3)	6/16/2009		72,000	4.88	2/4/2017		
Joel Brown	2/19/2004(4)	8/20/2007					13,333	141,667
	2/5/2007(5)	2/20/2007	23,334	64,666	4.88	2/4/2017		
Michael Dodson	2/19/2004(4)	8/20/2007					33,333	354,167
	2/5/2007(6)	2/20/2007	39,334	80,666	4.88	2/4/2017		
Charlie McCullough	2/19/2004(4)	8/20/07					20,000	212,500
	2/5/2007(7)	11/1/2007	4,000	82,000	4.88	2/4/2017		

(1) These options and these shares, which were acquired upon exercise of options prior to vesting, vest as to 1/48th of the shares subject to the option on each monthly anniversary of the vesting commencement date until all shares are vested.

(2) These options and these shares, which were acquired upon exercise of options prior to vesting, vest as to 25% of the shares subject to the option on the first anniversary of the vesting commencement date and 1/48th of the shares subject to the option on each monthly anniversary of the vesting commencement date thereafter until all shares are vested.

(3) These options vest as to 1/24th of the total number of shares subject to the option on each monthly anniversary of the vesting commencement date until all shares are vested.

(4) These shares, which were acquired upon exercise of options prior to vesting, vest as to 1/36th of the total number of shares subject to the option on each monthly anniversary of the vesting commencement date until all shares are vested.

(5) On each monthly anniversary of the vesting commencement date, this option and these shares, which were acquired upon exercise of the option prior to vesting, vest as to 3,000 shares subject to the option for the first six months, 2,333 shares subject to the option for the next 36 months and 3,000 shares subject to the option for the following six months.

(6) On each monthly anniversary of the vesting commencement date, this option vests as to 3,000 shares subject to the option for the first six months, 1,333 shares subject to the option for the next 36 months and 3,000 shares subject to the option for the following 18 months.

(7) On each monthly anniversary of the vesting commencement date, this option and these shares vest as to 2,000 shares subject to the option for the first 26 months, 3,000 shares subject to the option for the next 12 months and 2,000 shares subject to the option for the following ten months.

Table of Contents

Option Exercises and Stock Vested in 2008 Table

The following table shows information regarding the vesting of stock awards during the year ended December 31, 2008. The amounts listed below for stock awards reflect the vesting of options that were exercised by our named executive officers prior to vesting.

	Stock Awards	
Name	**Number of Shares Acquired on Vesting (#)**	**Value Realized on Vesting ($)**
Jeffrey Jordan	191,924	$1,055,582
Matthew Roberts	16,666	152,083
Joel Brown	12,666	133,782
Michael Dodson	20,000	210,500
Charlie McCullough	26,000	275,650

Pension Benefits

We do not maintain any defined benefit pension plans.

Nonqualified Deferred Compensation

We do not maintain any nonqualified deferred compensation plans.

Offer Letter Agreements

On June 5, 2007, we entered into an offer letter agreement with Mr. Jordan, setting forth the terms and conditions of his employment as our president and chief executive officer, effective as of June 1, 2007. We amended and restated the offer letter agreement on October 15, 2008. The offer letter agreement provides for an annual base salary of $360,000. The offer letter agreement, as amended and restated, provides for the payment of any taxes Mr. Jordan incurs solely as a result of Section 409A of the Internal Revenue Code with respect to the grant or vesting of the options granted to him in connection with his offer letter agreement. Mr. Jordan is also entitled to payment of, or reimbursement for, all expenses reasonably incurred by him in connection with the use of a third party car service, along with the payment of any taxes incurred by him related to the car service.

Mr. Jordan is also entitled to receive severance benefits if his employment is terminated by us without cause at any time or if he is constructively terminated by us within twelve months following a change in control of our company. In such an event, Mr. Jordan is entitled to continued payment of his base salary for twelve months and continued health benefits coverage for twelve months. Mr. Jordan is also entitled to six months', or in the case of a termination within twelve months following a change in control, twelve months', vesting acceleration with respect to the options granted to him in connection with his commencement of employment with us. Mr. Jordan must execute and not revoke a general release of all claims against us and our affiliates in order to receive any severance benefits.

We have also entered into offer letter agreements with each of our other named executive officers in connection with their commencement of employment with us. These offer letter agreements typically include the executive officer's initial base salary and stock option grant along with any vesting acceleration provisions with respect to that initial stock option grant. We no longer have any executory obligations under these agreements.

Table of Contents

Potential Payments Upon Change in Control and Upon Termination Following Change in Control

Potential Payments Upon a Change in Control

The following table sets forth quantitative estimates of the benefits that would have accrued to each of our named executive officers upon a change in control of our company on December 31, 2008. Amounts below reflect potential payments pursuant to stock options granted under our 1999 Stock Plan.

Name of Executive Officer	Value of Accelerated Options if Not Assumed or Substituted(1)
Jeffrey Jordan	$ 2,638,956
Matthew Roberts	229,951
Joel Brown	140,334
Michael Dodson	350,834
Charlie McCullough	210,500

(1) Amounts calculated based on the aggregate amount by which the fair market value of the common stock subject to unvested equity awards exceeded the aggregate exercise price of the awards as of December 31, 2008, using a per share fair market value equal to $10.63.

Potential Payments Upon Termination Apart From a Change in Control

The following table sets forth quantitative estimates of the benefits that would have accrued to Mr. Jordan if his employment had been terminated by us without cause on December 31, 2008, in the event such termination occurred prior to or more than twelve months following a change in control of our company, pursuant to Mr. Jordan's offer letter agreement described above under " Offer Letter Agreements." No other named executive officer was eligible for benefits in the event of termination of employment during 2008.

Name of Executive Officer	Salary Continuation	Value of Accelerated Equity Awards(1)	Value of Continued Health Care Coverage Premiums	Total
Jeffrey Jordan	$ 360,000	$ 527,791	$ 15,085	$902,876

(1) Amounts calculated based on the aggregate amount by which the fair market value of the common stock subject to unvested equity awards exceeded the aggregate exercise price of the awards as of December 31, 2008, using a per share fair market value equal to $10.63.

Potential Payments Upon Termination Following a Change in Control

The following table sets forth quantitative estimates of the benefits that would have accrued to Mr. Jordan pursuant to Mr. Jordan's offer letter agreement described above under " Offer Letter Agreements" and to Mr. Roberts and Mr. McCullough pursuant to their option agreements if their employment had been terminated by us without cause or if they experienced a constructive termination

Table of Contents

upon a change in control consummating on December 31, 2008. No other named executive officer was eligible for benefits in the event of termination of employment during 2008.

Name of Executive Officer	Salary Continuation	Value of Accelerated Equity Awards(1)	Value of Continued Health Care Coverage Premiums	Total
Jeffrey Jordan	$ 360,000	$ 1,055,582	$ 15,085	$ 1,430,667
Matthew Roberts		57,488		57,488
Charlie McCullough		52,625		52,625

(1) Amounts calculated based on the aggregate amount by which the fair market value of the common stock subject to unvested equity awards exceeded the aggregate exercise price of the awards as of December 31, 2008, using a per share fair market value equal to $10.63.

Proprietary Information and Inventions Agreements

Each of our named executive officers has entered into a standard form agreement with respect to proprietary information and inventions. Among other things, this agreement obligates each named executive officer to refrain from disclosing any of our proprietary information received during the course of employment and, with some exceptions, to assign to us any inventions conceived or developed during the course of employment.

Employee Benefit and Stock Plans

2009 Equity Incentive Award Plan

Our board of directors adopted, and our stockholders approved, the 2009 Equity Incentive Award Plan, or the 2009 Plan, in May 2009. The principal purpose of the 2009 Plan is to attract, retain and motivate selected employees, consultants and directors through the granting of stock-based compensation awards and cash-based performance bonus awards. The 2009 Plan is also designed to permit us to make cash-based awards and equity-based awards intended to qualify as "performance-based compensation" under Section 162(m) of the Internal Revenue Code.

The principal features of the 2009 Plan are summarized below. This summary is qualified in its entirety by reference to the text of the 2009 Plan, which is filed as an exhibit to the registration statement of which this prospectus is a part.

Share reserve. Under the 2009 Plan, 1,405,664 shares of our common stock have been initially reserved for issuance pursuant to a variety of stock-based compensation awards, including stock options, stock appreciation rights, or SARs, restricted stock awards, restricted stock unit awards, deferred stock awards, dividend equivalent awards, performance share awards, performance stock unit awards, stock payment awards, performance-based awards and other stock-based awards. The number of shares initially reserved for issuance or transfer pursuant to awards under the 2009 Plan will be increased by (i) the number of shares represented by awards outstanding under our 1999 Stock Plan that are forfeited or lapse unexercised and which following our IPO are not issued under the 1999 Stock Plan and (ii) an annual increase on the first day of each calendar year beginning in 2010 and ending in 2019, equal to the least of (A) 744,063 shares, (B) three percent (3%) of the shares of stock outstanding (on an as converted basis) on the last day of the immediately preceding calendar year and (C) such smaller number of shares of stock as determined by our board of directors; provided, however, no more than 8,680,734 shares of stock may be issued upon the exercise of incentive stock options.

Table of Contents

The following counting provisions are in effect for the share reserve under the 2009 Plan:

- To the extent that an award terminates, expires or lapses for any reason, any shares subject to the award at such time will be available for future grants under the 2009 Plan;
- To the extent shares are tendered or withheld to satisfy the grant, exercise price or tax withholding obligation with respect to any award under the 2009 Plan, such tendered or withheld shares will be available for future grants under the 2009 Plan;
- The payment of dividend equivalents in cash in conjunction with any outstanding awards will not be counted against the shares available for issuance under the 2009 Plan; and
- To the extent permitted by applicable law or any exchange rule, shares issued in assumption of, or in substitution for, any outstanding awards of any entity acquired in any form of combination by us or any of our subsidiaries will not be counted against the shares available for issuance under the 2009 Plan.

Currently, there is no limit on the number of shares that may be covered by stock-based awards or the maximum aggregate dollar amount subject to cash-based performance awards granted to any individual during any calendar year. However, after a limited transition period, no individual may be granted stock-based awards under the 2009 Plan covering more than 620,052 shares in any calendar year. The limited transition period will expire on the earliest of:

- the first material modification of the 2009 Plan;
- the issuance of all of the shares of our common stock reserved for issuance under the 2009 Plan;
- the expiration of the 2009 Plan;
- the first meeting of our stockholders at which members of our board of directors are to be elected that occurs after December 31, 2012; or
- such earlier date as may be required by Section 162(m) of the Internal Revenue Code.

Administration. The compensation committee of our board of directors will administer the 2009 Plan unless our board of directors assumes authority for administration. The compensation committee must consist of at least two members of our board of directors, each of whom is intended to qualify as an "outside director," within the meaning of Section 162(m) of the Internal Revenue Code, a "non-employee director" for purposes of Rule 16b-3 under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and an "independent director" within the meaning of the rules of The NASDAQ Stock Market, or other principal securities market on which shares of our common stock are traded. Our compensation committee currently meets these requirements. The 2009 Plan provides that the compensation committee may delegate its authority to grant awards to employees other than executive officers and certain senior executives of our company to a committee consisting of one or more members of our board of directors or one or more of our officers.

Subject to the terms and conditions of the 2009 Plan, the administrator has the authority to select the persons to whom awards are to be made, to determine the number of shares to be subject to awards and the terms and conditions of awards, and to make all other determinations and to take all other actions necessary or advisable for the administration of the 2009 Plan. The administrator is also authorized to adopt, amend or rescind rules relating to administration of the 2009 Plan. Our board of directors may at any time remove the compensation committee as the administrator and revest in itself the authority to administer the 2009 Plan. The full board of directors will administer the 2009 Plan with respect to awards to non-employee directors.

Eligibility. Options, SARs, restricted stock and all other stock-based and cash-based awards under the 2009 Plan may be granted to individuals who are then our officers, employees or consultants

Table of Contents

or are the officers, employees or consultants of certain of our subsidiaries. Such awards also may be granted to our directors. Only employees may be granted incentive stock options, or ISOs.

Awards. The 2009 Plan provides that the administrator may grant or issue stock options, SARs, restricted stock, restricted stock units, deferred stock, dividend equivalents, performance awards, stock payments and other stock-based and cash-based awards, or any combination thereof. Each award will be set forth in a separate agreement with the person receiving the award and will indicate the type, terms and conditions of the award.

Nonqualified stock options, or NQSOs, will provide for the right to purchase shares of our common stock at a specified price which may not be less than fair market value on the date of grant, and usually will become exercisable (at the discretion of the administrator) in one or more installments after the grant date, subject to the participant's continued employment or service with us and/or subject to the satisfaction of corporate performance targets and individual performance targets established by the administrator. NQSOs may be granted for any term specified by the administrator, but may not exceed ten years.

Incentive stock options will be designed in a manner intended to comply with the provisions of Section 422 of the Internal Revenue Code and will be subject to specified restrictions contained in the Internal Revenue Code. Among such restrictions, ISOs must have an exercise price of not less than the fair market value of a share of common stock on the date of grant, may only be granted to employees, and must not be exercisable after a period of ten years measured from the date of grant. In the case of an ISO granted to an individual who owns (or is deemed to own) at least 10% of the total combined voting power of all classes of our capital stock, the 2009 Plan provides that the exercise price must be at least 110% of the fair market value of a share of common stock on the date of grant and the ISO must not be exercisable after a period of five years measured from the date of grant.

Restricted stock may be granted to any eligible individual and made subject to such restrictions as may be determined by the administrator. Restricted stock, typically, may be forfeited for no consideration or repurchased by us at the original purchase price if the conditions or restrictions on vesting are not met. In general, restricted stock may not be sold, or otherwise transferred, until restrictions are removed or expire. Purchasers of restricted stock, unlike recipients of options, will have voting rights and will have the right to receive dividends, if any, prior to the time when the restrictions lapse; however, extraordinary dividends will generally be placed in escrow, and will not be released until restrictions are removed or expire.

Restricted stock units may be awarded to any eligible individual, typically without payment of consideration, but subject to vesting conditions based on continued employment or service or on performance criteria established by the administrator. Like restricted stock, restricted stock units may not be sold, or otherwise transferred or hypothecated, until vesting conditions are removed or expire. Unlike restricted stock, stock underlying restricted stock units will not be issued until the restricted stock units have vested, and recipients of restricted stock units generally will have no voting or dividend rights prior to the time when vesting conditions are satisfied.

Deferred stock awards represent the right to receive shares of our common stock on a future date. Deferred stock may not be sold or otherwise hypothecated or transferred until issued. Deferred stock will not be issued until the deferred stock award has vested, and recipients of deferred stock generally will have no voting or dividend rights prior to the time when the vesting conditions are satisfied and the shares are issued. Deferred stock awards generally will be forfeited, and the underlying shares of deferred stock will not be issued, if the applicable vesting conditions and other restrictions are not met.

Table of Contents

Stock appreciation rights may be granted in connection with stock options or other awards, or separately. SARs granted in connection with stock options or other awards typically will provide for payments to the holder based upon increases in the price of our common stock over a set exercise price. The exercise price of any SAR granted under the 2009 Plan must be at least 100% of the fair market value of a share of our common stock on the date of grant. Except as required by Section 162(m) of the Internal Revenue Code with respect to a SAR intended to qualify as performance-based compensation as described in Section 162(m) of the Internal Revenue Code, there are no restrictions specified in the 2009 Plan on the exercise of SARs or the amount of gain realizable therefrom, although restrictions may be imposed by the administrator in the SAR agreements. SARs under the 2009 Plan will be settled in cash or shares of our common stock, or in a combination of both, at the election of the administrator.

Dividend equivalents represent the value of the dividends, if any, per share paid by us, calculated with reference to the number of shares covered by the stock options, SARs or other awards held by the participant. Dividend equivalents may be settled in cash or shares and at such times as determined by the compensation committee or board of directors, as applicable.

Performance awards may be granted by the administrator on an individual or group basis. Generally, these awards will be based upon specific performance targets and may be paid in cash or in common stock or in a combination of both. Performance awards may include "phantom" stock awards that provide for payments based upon the value of our common stock. Performance awards may also include bonuses that may be granted by the administrator on an individual or group basis and which may be payable in cash or in common stock or in a combination of both.

Stock payments may be authorized by the administrator in the form of common stock or an option or other right to purchase common stock as part of a deferred compensation arrangement in lieu of all or any part of compensation, including bonuses, that would otherwise be payable in cash to the employee, consultant or non-employee director.

Change in control. In the event of a change in control where the acquiror does not assume or replace awards granted under the 2009 Plan, awards issued under the 2009 Plan will be subject to accelerated vesting such that 100% of such award will become vested and exercisable or payable, as applicable. In addition, the administrator will also have complete discretion to structure one or more awards under the 2009 Plan to provide that such awards will become vested and exercisable or payable on an accelerated basis. The administrator may also make appropriate adjustments to awards under the 2009 Plan and is authorized to provide for the acceleration, cash-out, termination, assumption, substitution or conversion of such awards in the event of a change in control or certain other unusual or nonrecurring events or transactions. Under the 2009 Plan, a change in control is generally defined as:

the transfer or exchange in a single or series of related transactions by our stockholders of more than 50% of our voting stock to a person or group;

a change in the composition of our board of directors over a two-year period such that 50% or more of the members of the board were elected through one or more contested elections;

a merger, consolidation, reorganization or business combination in which we are involved, directly or indirectly, other than a merger, consolidation, reorganization or business combination which results in our outstanding voting securities immediately before the transaction continuing to represent a majority of the voting power of the acquiring company's outstanding voting securities and after which no person or group beneficially owns

Table of Contents

50% or more of the outstanding voting securities of the surviving entity immediately after the transaction;

the sale, exchange, or transfer of all or substantially all of our assets; or

stockholder approval of our liquidation or dissolution.

Adjustments of awards. In the event of any stock dividend, stock split, combination or exchange of shares, merger, consolidation, spin-off, recapitalization, distribution of our assets to stockholders (other than normal cash dividends) or any other corporate event affecting the number of outstanding shares of our common stock or the share price of our common stock that would require adjustments to the 2009 Plan or any awards under the 2009 Plan in order to prevent the dilution or enlargement of the potential benefits intended to be made available thereunder, the administrator will make appropriate, proportionate adjustments to:

the aggregate number and type of shares subject to the 2009 Plan;

the terms and conditions of outstanding awards (including, without limitation, any applicable performance targets or criteria with respect to such awards); and

the grant or exercise price per share of any outstanding awards under the 2009 Plan.

Amendment and termination. Our board of directors or the committee (with board approval) may terminate, amend or modify the 2009 Plan at any time and from time to time. However, we must generally obtain stockholder approval:

to increase the number of shares available under the 2009 Plan (other than in connection with certain corporate events, as described above);

to grant options with an exercise price that is below 100% of the fair market value of shares of our common stock on the grant date;

to extend the exercise period for an option beyond ten years from the date of grant; or

to the extent required by applicable law, rule or regulation (including any applicable stock exchange rule).

Notwithstanding the foregoing, an option may be amended to reduce the per share exercise price below the per share exercise price of such option on the grant date and no options may be granted in exchange for, or in connection with, the cancellation or surrender of options having a higher per share exercise price without receiving additional stockholder approval.

Expiration date. The 2009 Plan will expire on, and no option or other award may be granted pursuant to the 2009 Plan after May 26, 2019. Any award that is outstanding on the expiration date of the 2009 Plan will remain in force according to the terms of the 2009 Plan and the applicable award agreement.

Securities laws and federal income taxes. The 2009 Plan is designed to comply with various securities and federal tax laws as follows:

Securities laws. The 2009 Plan is intended to conform to all provisions of the Securities Act and the Exchange Act and any and all regulations and rules promulgated by the SEC thereunder, including, without limitation, Rule 16b-3. The 2009 Plan will be administered, and options will be granted and may be exercised, only in such a manner as to conform to such laws, rules and regulations.

Section 409A of the Internal Revenue Code. Certain awards under the 2009 Plan may be considered "nonqualified deferred compensation" for purposes of Section 409A of the Internal Revenue Code, which imposes certain additional requirements regarding the

Table of Contents

payment of deferred compensation. Generally, if at any time during a taxable year a nonqualified deferred compensation plan fails to meet the requirements of Section 409A, or is not operated in accordance with those requirements, all amounts deferred under the 2009 Plan and all other equity incentive plans for the taxable year and all preceding taxable years, by any participant with respect to whom the failure relates, are includible in gross income for the taxable year to the extent not subject to a substantial risk of forfeiture and not previously included in gross income. If a deferred amount is required to be included in income under Section 409A, the amount also is subject to interest and an additional income tax. The interest imposed is equal to the interest at the underpayment rate plus one percentage point, imposed on the underpayments that would have occurred had the compensation been includible in income for the taxable year when first deferred, or if later, when not subject to a substantial risk of forfeiture. The additional federal income tax is equal to 20% of the compensation required to be included in gross income. In addition, certain states, including California, have laws similar to Section 409A, which impose additional state penalty taxes on such compensation.

Section 162(m) of the Internal Revenue Code. In general, under Section 162(m) of the Internal Revenue Code, income tax deductions of publicly held corporations may be limited to the extent total compensation (including, but not limited to, base salary, annual bonus, and income attributable to stock option exercises and other non-qualified benefits) for certain executive officers exceeds $1,000,000 (less the amount of any "excess parachute payments" as defined in Section 280G of the Internal Revenue Code) in any taxable year of the corporation. However, under Section 162(m), the deduction limit does not apply to certain "performance-based compensation" established by an independent compensation committee that is adequately disclosed to, and approved by, stockholders. In particular, stock options and SARs will satisfy the "performance-based compensation" exception if the awards are made by a qualifying compensation committee, the 2009 Plan sets the maximum number of shares that can be granted to any person within a specified period and the compensation is based solely on an increase in the stock price after the grant date. Specifically, the option exercise price must be equal to or greater than the fair market value of the stock subject to the award on the grant date. Under a Section 162(m) transition rule for compensation plans of corporations which are privately held and which become publicly held in an IPO, the 2009 Plan will not be subject to Section 162(m) until a specified transition date, which is the earlier of:

the material modification of the 2009 Plan;

the issuance of all of the shares of our common stock reserved for issuance under the 2009 Plan;

the expiration of the 2009 Plan; or

the first meeting of our stockholders at which members of our board of directors are to be elected that occurs after December 31, 2012.

After the transition date, rights or awards granted under the 2009 Plan, other than options and SARs, will not qualify as "performance-based compensation" for purposes of Section 162(m) unless such rights or awards are granted or vest upon pre-established objective performance goals, the material terms of which are disclosed to and approved by our stockholders. Thus, we expect that such other rights or awards under the plan will not constitute performance-based compensation for purposes of Section 162(m).

We have attempted to structure the 2009 Plan in such a manner that, after the transition date the compensation attributable to stock options, SARs and other performance-based awards which meet

Table of Contents

the other requirements of Section 162(m) will not be subject to the $1,000,000 limitation. We have not, however, requested a ruling from the IRS or an opinion of counsel regarding this issue.

Amended and Restated 1999 Stock Plan

Our board of directors adopted, and our stockholders approved, the 1999 Stock Plan in March 1999, which was amended and restated in March 2008. An aggregate of 7,640,841 shares of our common stock is reserved for issuance under the 1999 Stock Plan. The 1999 Stock Plan provides for the grant of ISOs, NQSOs and restricted stock. As of June 30, 2009, options to purchase 2,395,096 shares of our common stock at a weighted average exercise price per share of $7.34 remained outstanding under the 1999 Stock Plan.

Our board of directors, or a committee thereof appointed by our board of directors, has the authority to administer the 1999 Stock Plan and the awards granted under it. Since our IPO, no further awards have been or will be granted under the 1999 Stock Plan; all outstanding awards will continue to be governed by their existing terms.

Stock options. The 1999 Stock Plan provides for the grant of ISOs under the federal tax laws or NQSOs. ISOs may be granted only to employees. NQSOs and stock purchase rights may be granted to employees, directors or consultants. The exercise price of ISOs granted to employees who at the time of grant own stock representing more than 10% of the voting power of all classes of our common stock may not be less than 110% of the fair market value of our common stock on the date of grant, and the exercise price of ISOs granted to any other employees may not be less than 100% of the fair market value of our common stock on the date of grant. The exercise price of NQSOs to employees, directors or consultants who at the time of grant own stock representing more than 10% of the voting power of all classes of our common stock may not be less than 110% of the fair market value of our common stock on the date of grant, and the exercise price of nonstatutory stock options to all other employees, directors or consultants may not be less than 85% of the fair market value of our common stock on the date of grant. Shares subject to options under the 1999 Stock Plan generally vest in a series of installments over an optionee's period of service. Except with respect to options granted to officers, outside directors (as defined in the 1999 Stock Plan) and consultants, a grant of an option to purchase shares shall become exercisable at least as rapidly as 20% per year over the five-year period commencing on the date of grant.

In general, the maximum term of options granted is ten years. The maximum term of ISOs granted to an optionee who owns stock representing more than 10% of the voting power of all classes of our common stock is five years. If an optionee's service relationship with us terminates other than by death or disability, the optionee may exercise the vested portion of any option in such period of time as specified in the optionee's option agreement, but in no event will such period be less than three months following the termination of service. If an optionee's service relationship with us terminates by disability, the optionee may exercise the vested portion of any option in such period of time as specified in the optionee's option agreement, but in no event will such period be less than six months following the termination of service. If an optionee's service relationship with us terminates as a result of the optionee's death, the optionee's designee may exercise the vested portion of any option in such period of time as specified in the optionee's option agreement, but in no event will such period be less then twelve months following the optionee's death. Shares of common stock representing any unvested portion of the option on the date of termination shall immediately cease to be issuable and shall become available for issuance under the 1999 Stock Plan. No option shall continue to be exercisable after the optionee's termination of service after the ten-year anniversary of the date of grant. If, after termination, the optionee does not exercise the option within the time period specified, the option shall terminate and the shares of common stock covered by such option will become available for issuance under the 1999 Stock Plan.

Table of Contents

Restricted stock. Under the 1999 Stock Plan, restricted stock may be granted or sold to employees, directors or consultants, and made subject to such restrictions as may be determined by the administrator. The right to acquire restricted stock under the 1999 Stock Plan automatically expires if not exercised by the purchaser within 30 days after the grant of such right was communicated to the purchaser. The right to purchase restricted stock shall not be transferable and shall be exercisable only by the purchaser to whom such right was granted. The purchase price of restricted stock offered under the 1999 Stock Plan shall not be less than 85% of the fair market value of such shares, or in the case of purchase by an individual who owns more than 10% of the total combined voting power of all classes of outstanding stock of our company, it parent or any of our subsidiaries, the purchase price shall be at least 100% of the fair market value. For restricted stock subject to a repurchase right that is awarded to or purchased by an individual who is not an officer, outside director (as defined in the 1999 Plan) or consultant, the 1999 Stock Plan provides that such repurchase price shall lapse at least as rapidly as 20% per year over the five-year period beginning on the date of the award or sale. The repurchase right may be exercised only within 90 days after the termination of the purchaser's service with our company. Purchasers of restricted stock, unlike recipients of options, will have voting rights and will have the right to receive dividends, if any, prior to the time when the restrictions lapse, however, extraordinary dividends will generally be placed in escrow, and will not be released until restrictions are removed or expire.

Corporate transactions. In the event of a sale, transfer or other disposition of all or substantially all of our company's assets, or the consummation of certain mergers or consolidations of our company with or into another entity or any other corporate reorganization, the administrator of the 1999 Stock Plan has the discretion to take one or more of the following actions: (a) provide that any option shall immediately vest if such option is not assumed or substituted for by the surviving corporation or its parent and the surviving corporation; or (b) provide that the repurchase right of any restricted stock or option that is not assigned to the entity, or its parent or subsidiary, that employs the holder immediately after such corporate transaction shall lapse and all such shares shall become vested. In addition, in the event of such corporate transaction, the restricted stock repurchase right shall lapse with respect to that percentage of shares equal to (a)(i) six months plus (ii) the number of complete months the optionee has provided continuous service to our company, divided by (b) the total number of months of the original vesting schedule for the shares underlying the award.

401(k) Plan

Currently, all of our employees over the age of 18 are eligible to participate in our 401(k) Plan. Under the 401(k) Plan, eligible employees may elect to reduce their current compensation by up to the lesser of 100% of their base salary and cash compensation or the prescribed annual limit and contribute these amounts to the 401(k) Plan. The annual limit in 2008 was $15,500. We may make matching or other contributions to the 401(k) Plan on behalf of eligible employees. In 2008, we matched up to $500 in employee contributions to the 401(k) Plan. The 401(k) Plan is intended to qualify under Section 401 of the Internal Revenue Code so that contributions by employees to the 401(k) Plan, and income earned on the 401(k) Plan contributions, are not taxable to employees until withdrawn from the 401(k) Plan. The trustees under the 401(k) Plan, at the direction of each participant, invest the 401(k) Plan employee salary deferrals in selected investment options.

Limitation on Liability and Indemnification Matters

Our amended and restated certificate of incorporation and amended and restated bylaws provide that we will indemnify our directors and officers, and may indemnify our employees and other agents, to the fullest extent permitted by the Delaware General Corporation Law, which prohibits our amended and restated certificate of incorporation from limiting the liability of our directors for the following:

any breach of the director's duty of loyalty to us or to our stockholders;

Table of Contents

acts or omissions not in good faith or that involve intentional misconduct or a knowing violation of law;

unlawful payment of dividends or unlawful stock repurchases or redemptions; and

any transaction from which the director derived an improper personal benefit.

If Delaware law is amended to authorize corporate action further eliminating or limiting the personal liability of a director, then the liability of our directors will be eliminated or limited to the fullest extent permitted by Delaware law, as so amended. Our amended and restated certificate of incorporation does not eliminate a director's duty of care and, in appropriate circumstances, equitable remedies, such as injunctive or other forms of non-monetary relief, remain available under Delaware law. This provision also does not affect a director's responsibilities under any other laws, such as the federal securities laws or other state or federal laws. Under our amended and restated bylaws, we are also empowered to purchase insurance on behalf of any person whom we are required or permitted to indemnify.

In addition to the indemnification required in our amended and restated certificate of incorporation and amended and restated bylaws, we have entered into indemnification agreements with each of our current directors, officers and some employees. These agreements provide for the indemnification of our directors, officers and some employees for certain expenses and liabilities incurred in connection with any action, suit, proceeding or alternative dispute resolution mechanism, or hearing, inquiry or investigation that may lead to the foregoing, to which they are a party, or are threatened to be made a party, by reason of the fact that they are or were a director, officer, employee, agent or fiduciary of our company, or any of our subsidiaries, by reason of any action or inaction by them while serving as an officer, director, agent or fiduciary, or by reason of the fact that they were serving at our request as a director, officer, employee, agent or fiduciary of another entity. In the case of an action or proceeding by or in the right of our company or any of our subsidiaries, no indemnification will be provided for any claim where a court determines that the indemnified party is prohibited from receiving indemnification. We believe that these bylaw provisions and indemnification agreements are necessary to attract and retain qualified persons as directors and officers. We also maintain directors' and officers' liability insurance.

The limitation of liability and indemnification provisions in our amended and restated certificate of incorporation and amended and restated bylaws may discourage stockholders from bringing a lawsuit against directors for breach of their fiduciary duties. They may also reduce the likelihood of derivative litigation against directors and officers, even though an action, if successful, might benefit us and our stockholders. A stockholder's investment may be harmed to the extent we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions. Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers and controlling persons pursuant to the foregoing provisions, or otherwise, we have been advised that, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act, and is, therefore, unenforceable. There is no pending litigation or proceeding naming any of our directors or officers as to which indemnification is being sought, nor are we aware of any pending or threatened litigation that may result in claims for indemnification by any director or officer.

Rule 10b5-1 Sales Plans

Our directors and executive officers may adopt written plans, known as Rule 10b5-1 plans, in which they will contract with a broker to buy or sell shares of our common stock on a periodic basis. Under a Rule 10b5-1 plan, a broker executes trades pursuant to parameters established by the director or officer when entering into the plan, without further direction from them. The director or officer may amend or terminate the plan in some circumstances. Our directors and executive officers may also buy or sell additional shares outside of a Rule 10b5-1 plan when they are not in possession of material, nonpublic information.

Table of Contents

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

We describe below transactions and series of similar transactions, during our last three fiscal years, to which we were a party or will be a party, in which:

- the amounts involved exceeded or will exceed $120,000; and
- any of our directors, executive officers, holders of more than 5% of our common stock or any member of their immediate family had or will have a direct or indirect material interest.

Participation in Initial Public Offering

Directors A. George "Skip" Battle, Michelle Peluso and Paul Pressler purchased 37,500, 3,750 and 5,000 shares of our common stock, respectively, in our IPO at the IPO price of $20.00 per share.

Investors' Rights Agreement

We are party to an investors' rights agreement which provides that certain holders of our common stock have the right to demand that we file a registration statement or request that their shares be covered by a registration statement that we are otherwise filing. For a more detailed description of these registration rights, see "Description of Capital Stock Registration Rights."

Other Transactions

Director Danny Meyer is the founder and president of Union Square Hospitality Group, or USHG. USHG is a restaurant customer of ours, and during the twelve-month periods ended December 31, 2006, 2007 and 2008, USHG made aggregate payments to us of approximately $153,000, $163,000 and $175,000, respectively. Since January 1, 2009, USHG has made aggregate payments to us of approximately $112,000, and we currently expect that USHG may make aggregate payments to us that exceed $120,000, during 2009.

We have entered into an offer letter agreement with our chief executive officer that, among other things, provides for certain severance and change of control benefits. For a description of this agreement, see "Management Executive Compensation Compensation Discussion and Analysis Offer Letter Agreements."

We have granted stock options to our executive officers and certain of our directors. For a description of these options, see "Management Executive Compensation Grants of Plan-Based Awards in 2008 Table."

We have indemnification agreements with each of our current directors, officers and some employees. See "Management Limitation on Liability and Indemnification Matters."

Other than as described above under this section "Certain Relationships and Related Transactions," since the beginning of our last fiscal year, we have not entered into any transactions, nor are there any currently proposed transactions, between us and a related party where the amount involved exceeds, or would exceed, $120,000, and in which any related person had or will have a direct or indirect material interest. We believe the terms of the transactions described above were comparable to terms we could have obtained in arm's length dealings with unrelated third parties.

Policies and Procedures for Related Party Transactions

Our board of directors has adopted a written related person transaction policy, which sets forth the policies and procedures for the review and approval or ratification of related person transactions. This policy covers any transaction, arrangement or relationship, or any series of similar transactions, arrangements or relationships, in which we were or are to be a participant, the amount involved

Table of Contents

exceeds $50,000 and a related person had or will have a direct or indirect material interest. While the policy covers related party transactions in which the amount involved exceeds $50,000, the policy states that related party transactions in which the amount involved exceeds $120,000 are required to be disclosed in applicable filings as required by the Securities Act, Exchange Act and related rules. Our board of directors set the $50,000 threshold for approval of related party transactions in the policy at an amount lower than that which is required to be disclosed under the Securities Act, Exchange Act and related rules because we believe it is appropriate for our audit committee to review transactions or potential transactions in which the amount involved exceeds $50,000, as opposed to $120,000. Pursuant to this policy, our audit committee will (i) review the relevant facts and circumstances of each related party transaction, including if the transaction is on terms comparable to those that could be obtained in arm's length dealings with an unrelated third party and the extent of the related party's interest in the transaction, and (ii) take into account the conflicts of interest and corporate opportunity provisions of our code of business conduct and ethics. Management will present to our audit committee each proposed related party transaction, including all relevant facts and circumstances relating thereto, and will update the audit committee as to any material changes to any related party transaction. All related party transactions may only be consummated if our audit committee has approved or ratified such transaction in accordance with the guidelines set forth in the policy. Certain types of transactions have been pre-approved by our audit committee under the policy. These pre-approved transactions include: (i) certain compensation arrangements; (ii) transactions in the ordinary course of business where the related party's interest arises only (a) from his or her position as a director of another entity that is party to the transaction, and/or (b) from an equity interest of less than 5% in another entity that is party to the transaction, or (c) from a limited partnership interest of less than 5%, subject to certain limitations; and (iii) transactions in the ordinary course of business where the interest of the related party arises solely from the ownership of a class of equity securities in our company where all holders of such class of equity securities will receive the same benefit on a pro rata basis. No director may participate in the approval of a related party transaction for which he or she is a related party.

Table of Contents

PRINCIPAL AND SELLING STOCKHOLDERS

The following table sets forth, as of June 30, 2009, information regarding beneficial ownership of our capital stock by:

- each person, or group of affiliated persons, known by us to beneficially own more than 5% of our voting securities;
- each of our named executive officers;
- each of our directors;
- all of our executive officers and directors as a group; and
- each of the selling stockholders.

Beneficial ownership is determined according to the rules of the SEC and generally means that a person has beneficial ownership of a security if he, she or it possesses sole or shared voting or investment power of that security, including options and warrants that are currently exercisable or exercisable within 60 days. Except as indicated by the footnotes below, we believe, based on the information furnished to us, that the persons named in the table below have sole voting and investment power with respect to all shares of common stock shown that they beneficially own, subject to community property laws where applicable.

This table lists applicable percentage ownership prior to the offering based on 22,128,580 shares of common stock outstanding as of June 30, 2009 and applicable percentage ownership after the offering based on shares of common stock outstanding upon the completion of the offering (including an aggregate of shares of common stock that will be issued upon the exercise of options held by certain selling stockholders and sold by them in this offering and shares of common stock that will be issued upon the exercise of the warrant by a selling stockholder and sold by a selling stockholder in this offering and assuming no exercise of the underwriters' overallotment option).

Common stock subject to stock options and warrants currently exercisable or exercisable within 60 days of June 30, 2009, are deemed to be outstanding for computing the percentage ownership of the person holding these options and warrants and the percentage ownership of any group of which the holder is a member but are not deemed outstanding for computing the percentage of any other person.

Table of Contents

Unless otherwise noted below, the address for each of the stockholders in the table below is c/o OpenTable, Inc., 799 Market Street, 4th Floor, San Francisco, California 94103.

*

Represents beneficial ownership of less than one percent (1%) of the outstanding common stock.

If the underwriters exercise their option to purchase additional shares in full, the selling stockholders will sell a total of 499,019 additional shares in the offering, which shares shall be allocated on a pro rata basis based on the number of shares initially sold by each selling stockholder.

(1)

Shares shown in the table above include shares held in the beneficial owner's name or jointly with others, or in the name of a bank, nominee or trustee for the beneficial owner's account.

Table of Contents

(2)

Consists of 5,290,211 shares held by Benchmark Capital Partners IV, L.P., or BCP IV, as nominee for Benchmark Capital Partners IV, L.P., Benchmark Founders' Fund IV, L.P., Benchmark Founders' Fund IV-A, L.P., Benchmark Founders' Fund IV-B, L.P., Benchmark Founders' Fund IV-X, L.P. and related individuals, or Benchmark Funds. Benchmark Capital Management Co. IV, L.L.C., or BCMC IV, is the general partner of BCP IV. BCMC IV's managing members of the general partner are Alexandre Balkanski, Bruce Dunlevie, J. William Gurley, Kevin Harvey, Robert Kagle, Andrew Rachleff and Steven Spurlock. These individuals may be deemed to have shared voting and investment power over the shares held by the Benchmark Funds. Each of these individuals disclaims beneficial ownership of such shares, except to the extent of his pecuniary interest therein.

(3)

Represents 3,262,439 shares held by Impact Venture Partners, L.P. and 241,414 shares held by Impact Entrepreneurs Fund, L.P. Impact Venture Advisors, LLC is the sole general partner of Impact Venture Partners, L.P. and Impact Entrepreneurs Fund, L.P. Adam Dell is the sole managing member of Impact Venture Advisors, LLC. Mr. Dell may be deemed to have sole voting and investment power over the shares held by Impact Venture Partners, L.P. and Impact Entrepreneurs Fund, L.P. Mr. Dell disclaims beneficial ownership of such shares, except to the extent of his pecuniary interest therein.

(4)

Barry Diller, the chairman and chief executive officer of IAC/InterActiveCorp, effectively controls the outcome of all matters submitted to a vote or for the consent of IAC stockholders, subject to limited exceptions. As a result of this voting power, Mr. Diller may be deemed to have sole voting and investment power over the shares held by IAC/InterActiveCorp. Mr. Diller disclaims beneficial ownership of the shares held by IAC/InterActiveCorp, except to the extent of his pecuniary interest therein.

(5)

Represents 1,480,725 shares held by Integral Capital Partners V, L.P., 19,568 shares held by Integral Capital Partners V Side Fund, L.P. and 2,779 shares held by Integral Capital Partners V SLP Side Fund, LLC. The sole general partner of Integral Capital Partners V, L.P. is Integral Capital Management V, LLC. The managers of Integral Capital Management V, LLC are Pamela Hagenah, Glen Kacher, Roger McNamee, Charles Morris, John Powell and Brian Stansky. The sole general partner of Integral Capital Partners V Side Fund, L.P. and the sole manager of Integral Capital Partners V SLP Side Fund, LLC is ICP Management V, LLC. The managers of ICP Management V, LLC are Pamela Hagenah, Glen Kacher, Roger McNamee and John Powell. These individuals may be deemed to have shared voting and investment power over the shares held by Integral Capital Partners V, L.P., Integral Capital Partners V Side Fund, L.P. and Integral Capital Partners V SLP Side Fund, LLC, as applicable. Each of these individuals disclaims beneficial ownership of such shares, except to the extent of his or her pecuniary interest therein.

(6)

Includes 431,829 shares held by the Jordan Family Revocable Trust U/A 8/25/95, 52,700 shares held by the Jeffrey D. Jordan Annuity Trust dated February 5, 2008, 63,974 shares held by the Jeffrey D. Table of Contents

DESCRIPTION OF CAPITAL STOCK

General

Our amended and restated certificate of incorporation authorizes us to issue up to 100,000,000 shares of common stock, $0.0001 par value per share, and 5,000,000 shares of preferred stock, $0.0001 par value per share.

As of June 30, 2009, there were outstanding:

- no shares of preferred stock;
- 22,128,580 shares of common stock held by approximately 290 stockholders; and
- 2,395,096 shares of common stock issuable upon exercise of outstanding stock options.

All of our issued and outstanding shares of common stock are duly authorized, validly issued, fully paid and non-assessable. Our shares of common stock are not redeemable and do not have preemptive rights.

As of June 30, 2009, there was one warrant outstanding for the purchase of 88,691 shares of common stock at an exercise price of $1.00 per share.

The following description of our capital stock and provisions of our amended and restated certificate of incorporation and amended and restated bylaws are summaries and are qualified by reference to the amended and restated certificate of incorporation and the amended and restated bylaws, which have been filed with the SEC.

Common Stock

Dividend Rights

Subject to preferences that may be applicable to any then outstanding preferred stock, holders of our common stock are entitled to receive dividends, if any, as may be declared from time to time by our board of directors out of legally available funds.

Voting Rights

Each holder of our common stock is entitled to one vote for each share on all matters submitted to a vote of the stockholders, including the election of directors. Our stockholders do not have cumulative voting rights in the election of directors. Accordingly, holders of a majority of the voting shares are able to elect all of the directors.

Liquidation

In the event of our liquidation, dissolution or winding up, holders of our common stock will be entitled to share ratably in the net assets legally available for distribution to stockholders after the payment of all of our debts and other liabilities and the satisfaction of any liquidation preference granted to the holders of any then outstanding shares of preferred stock.

Rights and Preferences

Holders of our common stock have no preemptive, conversion, subscription or other rights, and there are no redemption or sinking fund provisions applicable to our common stock. The rights, preferences and privileges of the holders of our common stock are subject to and may be adversely affected by, the rights of the holders of shares of any series of our preferred stock that we may designate in the future.

Table of Contents

Warrants

As of June 30, 2009, there was one warrant outstanding for the purchase of 88,691 shares of common stock at an exercise price of $1.00 per share. This warrant may be exercised at any time prior to May 21, 2012.

Preferred Stock

Our board of directors has the authority, without further action by our stockholders, to issue up to 5,000,000 shares of preferred stock in one or more series and to fix the rights, preferences, privileges and restrictions thereof. These rights, preferences and privileges could include dividend rights, conversion rights, voting rights, terms of redemption, liquidation preferences, sinking fund terms and the number of shares constituting any series or the designation of such series, any or all of which may be greater than the rights of common stock. The issuance of our preferred stock could adversely affect the voting power of holders of common stock and the likelihood that such holders will receive dividend payments and payments upon liquidation. In addition, the issuance of preferred stock could have the effect of delaying, deferring or preventing a change of control of our company or other corporate action. As of June 30, 2009, no shares of preferred stock were outstanding, and we have no present plan to issue any shares of preferred stock.

Registration Rights

Demand Registration Rights

The holders of approximately shares of our common stock are entitled to certain demand registration rights. The holders of at least a majority of these shares can, on not more than two occasions, request that we register all or a portion of their shares. Such request for registration must cover at least 35% of the shares entitled to registration rights or that number of shares with an anticipated aggregate offering price, net of underwriting discounts and commissions, exceeding $15,000,000. Additionally, we will not be required to effect a demand registration during the period beginning 60 days prior to the filing and 180 days following the effectiveness of a registration statement relating to a public offering of our securities.

Piggyback Registration Rights

In the event that we propose to register any of our securities under the Securities Act, either for our own account or for the account of other security holders, the holders of approximately shares of our common stock will be entitled to certain "piggyback" registration rights allowing the holder to include their shares in such registration, subject to certain marketing and other limitations. As a result, whenever we propose to file a registration statement under the Securities Act, other than with respect to a registration related to employee benefit plans, debt securities or corporate reorganizations, the holders of these shares are entitled to notice of the registration and have the right, subject to limitations that the underwriters may impose on the number of shares included in the registration, to include their shares in the registration. The piggyback registration rights have either been exercised or waived in connection with this offering.

Form S-3 Registration Rights

The holders of approximately shares of our common stock are entitled to certain Form S-3 registration rights. The holders of at least 35% of these shares can make a written request that we register their shares on Form S-3 if we are eligible to file a registration statement on Form S-3 and if the aggregate price to the public of the shares offered is at least $3 million. These stockholders may make an unlimited number of requests for registration on Form S-3. However, we will not be

Table of Contents

required to effect a registration on Form S-3 if we have effected one such registration in a given 12-month period.

We will pay the registration expenses of the holders of the shares registered pursuant to the demand, piggyback and Form S-3 registrations described above. In an underwritten offering, the managing underwriter, if any, has the right, subject to specified conditions, to limit the number of shares such holders may include.

The demand, piggyback and Form S-3 registration rights described above will expire, with respect to any particular stockholder, after our IPO, when that stockholder can sell all of its shares under Rule 144 of the Securities Act during any three-month period. In any event, all such registration rights shall expire upon the earlier of five years after the consummation of our IPO or the consummation of certain events, including the sale of all of our assets, a change of control of our company or a liquidation, dissolution or winding up of our company.

Pursuant to the investors' rights agreement, each stockholder that has registration rights has agreed that such stockholder will not sell or otherwise dispose of any securities for a period of up to 180 days following our IPO. See section entitled "Underwriting."

Anti-Takeover Provisions

Certificate of Incorporation and Bylaws

Our amended and restated certificate of incorporation provides for our board of directors to be divided into three classes with staggered three-year terms. Only one class of directors will be elected at each annual meeting of our stockholders, with the other classes continuing for the remainder of their respective three-year terms. Because our stockholders do not have cumulative voting rights, our stockholders holding a majority of the shares of common stock outstanding will be able to elect all of our directors. Our amended and restated certificate of incorporation and amended and restated bylaws provide that all stockholder actions must be effected at a duly called meeting of stockholders and not by a consent in writing, and that only our board of directors, chairman of the board, chief executive officer or president (in the absence of a chief executive officer) may call a special meeting of stockholders.

Our amended and restated certificate of incorporation and amended and restated bylaws require a $66^{2}/_{3}\%$ stockholder vote for the removal of a director without cause or the rescission, alteration, amendment or repeal of the bylaws by stockholders. The combination of the classification of our board of directors, the lack of cumulative voting and the $66^{2}/_{3}\%$ stockholder voting requirements will make it more difficult for our existing stockholders to replace our board of directors as well as for another party to obtain control of us by replacing our board of directors. Since our board of directors has the power to retain and discharge our officers, these provisions could also make it more difficult for existing stockholders or another party to effect a change in management. In addition, the authorization of undesignated preferred stock makes it possible for our board of directors to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to change our control.

These provisions may have the effect of deterring hostile takeovers or delaying changes in our control or management. These provisions are intended to enhance the likelihood of continued stability in the composition of our board of directors and its policies and to discourage certain types of transactions that may involve an actual or threatened acquisition of us. These provisions are designed to reduce our vulnerability to an unsolicited acquisition proposal. The provisions also are intended to discourage certain tactics that may be used in proxy fights. However, such provisions could have the effect of discouraging others from making tender offers for our shares and, as a consequence, they also

Table of Contents

may inhibit fluctuations in the market price of our stock that could result from actual or rumored takeover attempts. Such provisions may also have the effect of preventing changes in our management.

Section 203 of the Delaware General Corporation Law

We are subject to Section 203 of the Delaware General Corporation Law, which prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions:

- before such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding (but not the outstanding voting stock owned by the interested stockholder) those shares owned (i) by persons who are directors and also officers and (ii) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- on or after such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least $66^{2}/_{3}\%$ of the outstanding voting stock that is not owned by the interested stockholder.

In general, Section 203 defines business combination to include the following:

- any merger or consolidation involving the corporation and the interested stockholder;
- any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder;
- subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;
- any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; or
- the receipt by the interested stockholder of the benefit of any loss, advances, guarantees, pledges or other financial benefits by or through the corporation.

In general, Section 203 defines an "interested stockholder" as an entity or person who, together with the person's affiliates and associates, beneficially owns, or within three years prior to the time of determination of interested stockholder status did own, 15% or more of the outstanding voting stock of the corporation.

Acceleration of Options Upon Change of Control

Generally, under our 1999 Stock Plan and 2009 Plan, in the event of certain mergers, a reorganization or consolidation of our company with or into another corporation or the sale of all or substantially all of our assets or all of our capital stock wherein the successor corporation does not assume outstanding options or issue equivalent options, our board of directors is required to accelerate vesting of options outstanding under such plans.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Mellon Investor Services LLC.

Table of Contents

SHARES ELIGIBLE FOR FUTURE SALE

Future sales of our common stock in the public market, or the availability of such shares for sale in the public market, could adversely affect market prices prevailing from time to time. As described below, only a limited number of shares will be available for sale shortly after this offering due to contractual and legal restrictions on resale. Nevertheless, sales of our common stock in the public market after such restrictions lapse, or the perception that those sales may occur, could adversely affect the prevailing market price at such time and our ability to raise equity capital in the future.

Based on the number of shares outstanding as of June 30, 2009, upon the completion of this offering, shares of common stock will be outstanding, assuming no exercise of the underwriters' overallotment option and no exercise of outstanding options or warrants other than those options or warrants exercised by selling stockholders for the purpose of selling shares in this offering. Of the outstanding shares, all of the shares sold in our IPO are, and in this offering will be, freely tradable, except that any shares held by our affiliates, as that term is defined in Rule 144 under the Securities Act, may only be sold in compliance with the limitations described below.

The remaining shares of common stock outstanding after this offering will be restricted as a result of securities laws or lock-up agreements as described below. Following the expiration of the lock-up period, all shares will be eligible for resale in compliance with Rule 144 or Rule 701 to the extent such shares have been released from any repurchase option that we may hold. "Restricted securities" as defined under Rule 144 were issued and sold by us in reliance on exemptions from the registration requirements of the Securities Act. These shares may be sold in the public market only if registered pursuant to an exemption from registration, such as Rule 144 or Rule 701 under the Securities Act.

Rule 144

In general, a person who has beneficially owned restricted shares of our common stock for at least six months is entitled to sell their securities provided that such person is not deemed to have been one of our affiliates at the time of, or at any time during the 90 days preceding, a sale. Persons who have beneficially owned restricted shares of our common stock for at least six months but who are our affiliates at the time of, or any time during the 90 days preceding, a sale, are subject to additional restrictions, by which such persons would be entitled to sell within any three-month period only a number of securities that does not exceed the greater of either of the following:

- 1% of the number of shares of our common stock then outstanding, which equals approximately 221,286 shares based on the number of shares of common stock outstanding as of June 30, 2009; or
- the average weekly trading volume of our common stock on The NASDAQ Global Market during the four calendar weeks preceding the filing of a notice on Form 144 with respect to the sale.

Such sales both by affiliates and by non-affiliates must also comply with the manner of sale, current public information and notice provisions of Rule 144.

Rule 701

Rule 701 under the Securities Act, as in effect on the date of this prospectus, permits resales of shares in reliance upon Rule 144 but without compliance with certain restrictions of Rule 144, including the holding period requirement. Most of our employees, executive officers or directors who purchased shares under a written compensatory plan or contract may be entitled to rely on the resale provisions of Rule 701, but all holders of Rule 701 shares were required to wait until 90 days after the date of the

Table of Contents

prospectus relating to our IPO before selling their shares. However, substantially all Rule 701 shares are subject to lock-up agreements as described below and under "Underwriting" included elsewhere in this prospectus and will become eligible for sale upon the expiration of the restrictions set forth in those agreements.

Lock-Up Agreements

In connection with our IPO, all of our directors and officers and substantially all of our stockholders signed lock-up agreements under which they agreed not to sell, transfer or dispose of, directly or indirectly, any shares of our common stock or any securities into or exercisable or exchangeable for shares of our common stock without the prior written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated until November 17, 2009, subject to a possible extension under certain circumstances. The holders of approximately 82.4% of our outstanding shares of common stock are subject to lock-up agreements expiring November 17, 2009, subject to a possible extension under certain circumstances. These agreements are described below under "Underwriting."

Certain of our directors, officers and the selling stockholders have signed lock-up agreements under which they have agreed not to sell, transfer or dispose of, directly or indirectly, any shares of our common stock or any securities into or exercisable or exchangeable for shares of our common stock without the prior written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated for a period of 90 days, subject to a possible extension under certain circumstances, after the date of this prospectus. These agreements are described below under "Underwriting."

Registration Rights

The holders of approximately shares of our common stock, or their transferees, are entitled to certain rights with respect to the registration of those shares under the Securities Act. For a description of these registration rights, please see "Description of Capital Stock Registration Rights." After these shares are registered, they will be freely tradable without restriction under the Securities Act.

Stock Options

On June 2, 2009, we filed a Form S-8 registration statement under the Securities Act to register shares of our common stock subject to options outstanding or reserved for issuance under our 1999 Stock Plan and 2009 Plan. The shares covered by this registration statement are eligible for sale in the public markets, subject to vesting restrictions, the lock-up agreements described above and Rule 144 limitations applicable to affiliates. For a more complete discussion of our stock plans, see "Management Employee Benefit and Stock Plans."

Table of Contents

MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES TO NON-U.S. HOLDERS OF OUR COMMON STOCK

The following is a summary of the material United States federal income tax consequences to non-U.S. holders (as defined below) of the acquisition, ownership and disposition of our common stock issued pursuant to this offering. This discussion is not a complete analysis of all the potential United States federal income tax consequences relating thereto, nor does it address any estate and gift tax consequences or any tax consequences arising under any state, local or foreign tax laws, or any other United States federal tax laws. This discussion is based on the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code, Treasury Regulations promulgated thereunder, judicial decisions, and published rulings and administrative pronouncements of the Internal Revenue Service, or IRS, all as in effect as of the date of this offering. These authorities may change, possibly retroactively, resulting in United States federal income tax consequences different from those discussed below. No ruling has been or will be sought from the IRS with respect to the matters discussed below, and there can be no assurance that the IRS will not take a contrary position regarding the tax consequences of the acquisition, ownership or disposition of our common stock, or that any such contrary position would not be sustained by a court.

This discussion is limited to non-U.S. holders who purchase our common stock issued pursuant to this offering and who hold our common stock as a "capital asset" within the meaning of Section 1221 of the Internal Revenue Code (generally, property held for investment). This discussion does not address all of the United States federal income tax consequences that may be relevant to a particular holder in light of such holder's particular circumstances. This discussion also does not consider any specific facts or circumstances that may be relevant to holders subject to special rules under the United States federal income tax laws, including, without limitation, U.S. expatriates, partnerships or other pass-through entities, real estate investment trusts, regulated investment companies, "controlled foreign corporations," "passive foreign investment companies," corporations that accumulate earnings to avoid United States federal income tax, financial institutions, insurance companies, brokers, dealers or traders in securities, commodities or currencies, tax-exempt organizations, tax-qualified retirement plans, persons subject to the alternative minimum tax, persons that own, or have owned, actually or constructively, more than 5% of our common stock and persons holding our common stock as part of a hedging or conversion transaction or straddle, or a constructive sale, or other risk reduction strategy.

PROSPECTIVE INVESTORS SHOULD CONSULT THEIR TAX ADVISORS REGARDING THE PARTICULAR UNITED STATES FEDERAL INCOME TAX CONSEQUENCES TO THEM OF ACQUIRING, OWNING AND DISPOSING OF OUR COMMON STOCK, AS WELL AS ANY TAX CONSEQUENCES ARISING UNDER ANY STATE, LOCAL OR FOREIGN TAX LAWS AND ANY OTHER UNITED STATES FEDERAL TAX LAWS.

Definition of Non-U.S. Holder

For purposes of this discussion, a non-U.S. holder is any beneficial owner of our common stock that is not a "U.S. person" or a partnership (or other entity treated as a partnership) for United States federal income tax purposes. A U.S. person is any of the following:

- an individual citizen or resident of the United States;
- a corporation (or other entity treated as a corporation for United States federal income tax purposes) created or organized under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income tax regardless of its source; or

Table of Contents

a trust (1) whose administration is subject to the primary supervision of a United States court and which has one or more United States persons who have the authority to control all substantial decisions of the trust, or (2) that has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

Distributions on Our Common Stock

If we make cash or other property distributions on our common stock, such distributions will constitute dividends for United States federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. Amounts not treated as dividends for United States federal income tax purposes will constitute a return of capital and will first be applied against and reduce a holder's tax basis in the common stock, but not below zero. Any excess will be treated as gain realized on the sale or other disposition of the common stock and will be treated as described under " Gain on Disposition of Our Common Stock" below.

Dividends paid to a non-U.S. holder of our common stock generally will be subject to United States federal withholding tax at a rate of 30% of the gross amount of the dividends, or such lower rate specified by an applicable income tax treaty. To receive the benefit of a reduced treaty rate, a non-U.S. holder must furnish to us or our paying agent a valid IRS Form W-8BEN (or applicable successor form) certifying such holder's qualification for the reduced rate. This certification must be provided to us or our paying agent prior to the payment of dividends and must be updated periodically. Non-U.S. holders that do not timely provide us or our paying agent with the required certification, but that qualify for a reduced treaty rate, may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

If a non-U.S. holder holds our common stock in connection with the conduct of a trade or business in the United States, and dividends paid on the common stock are effectively connected with such holder's United States trade or business, the non-U.S. holder will be exempt from United States federal withholding tax. To claim the exemption, the non-U.S. holder must generally furnish to us or our paying agent a properly executed IRS Form W-8ECI (or applicable successor form).

Any dividends paid on our common stock that are effectively connected with a non-U.S. holder's United States trade or business (and if required by an applicable income tax treaty, attributable to a permanent establishment maintained by the non-U.S. holder in the United States) generally will be subject to United States federal income tax on a net income basis at the regular graduated United States federal income tax rates in much the same manner as if such holder were a resident of the United States. A non-U.S. holder that is a foreign corporation also may be subject to an additional branch profits tax equal to 30% (or such lower rate specified by an applicable income tax treaty) of its effectively connected earnings and profits for the taxable year, as adjusted for certain items. Non-U.S. holders should consult any applicable income tax treaties that may provide for different rules.

A non-U.S. holder who claims the benefit of an applicable income tax treaty generally will be required to satisfy applicable certification and other requirements prior to the distribution date. Non-U.S. holders should consult their tax advisors regarding their entitlement to benefits under a relevant income tax treaty.

Gain on Disposition of Our Common Stock

Subject to the discussion below regarding backup withholding, a non-U.S. holder generally will not be subject to United States federal income tax on any gain realized upon the sale or other disposition of our common stock, unless:

the gain is effectively connected with the non-U.S. holder's conduct of a trade or business in the United States, and if required by an applicable income tax treaty, attributable to a permanent establishment maintained by the non-U.S. holder in the United States;

Table of Contents

the non-U.S. holder is a nonresident alien individual present in the United States for 183 days or more during the taxable year of the disposition, and certain other requirements are met; or

our common stock constitutes a "United States real property interest" by reason of our status as a United States real property holding corporation, or USRPHC, for United States federal income tax purposes at any time within the shorter of the five-year period preceding the disposition or the non-U.S. holder's holding period for our common stock and our common stock has ceased to be regularly traded on an established securities market prior to the beginning of the calendar year in which the sale or other disposition occurs. The determination of whether we are a USRPHC depends on the fair market value of our United States real property interests relative to the fair market value of our other trade or business assets and our foreign real property interests.

We believe we are not currently and do not anticipate becoming a USRPHC for United States federal income tax purposes.

Gain described in the first bullet point above will be subject to United States federal income tax on a net income basis at the regular graduated United States federal income tax rates in the same manner as if such holder were a resident of the United States. A non-U.S. holder that is a foreign corporation also may be subject to an additional branch profits tax equal to 30% (or such lower rate specified by an applicable income tax treaty) of its effectively connected earnings and profits for the taxable year, as adjusted for certain items. Non-U.S. holders should consult any applicable income tax treaties that may provide for different rules.

Gain described in the second bullet point above will be subject to United States federal income tax at a flat 30% rate (or such lower rate specified by an applicable income tax treaty), but may be offset by United States source capital losses (even though the individual is not considered a resident of the United States), provided that the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses.

Information Reporting and Backup Withholding

We must report annually to the IRS and to each non-U.S. holder the amount of distributions on our common stock paid to such holder and the amount of any tax withheld with respect to those distributions. These information reporting requirements apply even if no withholding was required because the distributions were effectively connected with the holder's conduct of a United States trade or business, or withholding was reduced or eliminated by an applicable income tax treaty. This information also may be made available under a specific treaty or agreement with the tax authorities in the country in which the non-U.S. holder resides or is established. Backup withholding, currently at a 28% rate, however, generally will not apply to distributions to a non-U.S. holder of our common stock provided the non-U.S. holder furnishes to us or our paying agent the required certification as to its non-U.S. status, such as by providing a valid IRS Form W-8BEN or IRS Form W-8ECI, or certain other requirements are met. Notwithstanding the foregoing, backup withholding may apply if either we or our paying agent has actual knowledge, or reason to know, that the holder is a U.S. person that is not an exempt recipient.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a non-U.S. holder's United States federal income tax liability, provided the required information is timely furnished to the IRS.

Table of Contents

UNDERWRITING

Merrill Lynch, Pierce, Fenner & Smith Incorporated is acting as representative of each of the underwriters named below. Subject to the terms and conditions set forth in a purchase agreement among us, the selling stockholders and the underwriters, the selling stockholders have agreed to sell to the underwriters, and each of the underwriters has agreed, severally and not jointly, to purchase from the selling stockholders, the number of shares of common stock set forth opposite its name below.

Underwriter	Number of Shares
Merrill Lynch, Pierce, Fenner & Smith Incorporated	
Allen & Company LLC	
Stifel, Nicolaus & Company, Incorporated	
ThinkEquity LLC	
Total	3,326,799

Subject to the terms and conditions set forth in the purchase agreement, the underwriters have agreed, severally and not jointly, to purchase all of the shares sold under the purchase agreement if any of these shares are purchased. If an underwriter defaults, the purchase agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the purchase agreement may be terminated.

We and the selling stockholders have agreed to indemnify the underwriters against certain liabilities, including liabilities arising from any untrue statement of a material fact included in, or the omission of a material fact from, this prospectus, the registration statement of which this prospectus is a part or any free writing prospectus, as well as settlement payments or other expenses related to any litigation, investigation or proceeding by any governmental agency, or claim based upon any such untrue statement or omission. We and the selling stockholders have also agreed to contribute to payments the underwriters may be required to make in respect of such liabilities. The indemnification and contribution obligations of our company and the selling stockholders shall not apply to liabilities arising from any untrue statement or omission made in reliance upon written information furnished to us by the underwriters.

The underwriters are offering the shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the shares, and other conditions contained in the purchase agreement, such as the receipt by the underwriters of officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

Commissions and Discounts

The underwriters have advised us and the selling stockholders that they propose initially to offer the shares to the public at the public offering price on the cover page of this prospectus and to dealers at that price less a concession not in excess of $ per share. After the offering, the public offering price, concession and discount may be changed.

Table of Contents

The following table shows the public offering price, underwriting discount and proceeds before expenses to the selling stockholders. The information assumes either no exercise or full exercise by the underwriters of their overallotment option.

	Per Share	Without Option	With Option
Public offering price	$	$	$
Underwriting discount	$	$	$
Proceeds, before expenses, to the selling stockholders	$	$	$

The expenses of the offering, not including the underwriting discount, are estimated at approximately $ million, a portion of which is payable by the selling stockholders. The underwriters have agreed to reimburse us for up to $800,000 of our out-of-pocket expenses in connection with the offering.

Overallotment Option

The selling stockholders have granted an option to the underwriters to purchase up to 499,019 additional shares at the public offering price, less the underwriting discount. The underwriters may exercise this option for 30 days from the date of this prospectus solely to cover any overallotments. If the underwriters exercise this option, each will be obligated, subject to conditions contained in the purchase agreement, to purchase from the selling stockholders a number of additional shares proportionate to that underwriter's initial amount reflected in the above table.

No Sales of Similar Securities

We and certain of our directors and officers and the selling stockholders have agreed, subject to certain exceptions, not to offer, sell or transfer any common stock or securities convertible into, exchangeable for, exercisable for, or repayable with common stock, other than the shares which the selling stockholders may sell in this offering, for 90 days after the date of this prospectus without first obtaining the written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated. Specifically, we and these other individuals have agreed not to directly or indirectly:

- offer, pledge, sell or contract to sell any common stock;
- sell any option or contract to purchase any common stock;
- purchase any option or contract to sell any common stock;
- grant any option, right or warrant for the sale of any common stock;
- lend or otherwise dispose of or transfer any common stock;
- request or demand that we file a registration statement related to the common stock; or
- enter into any swap or other agreement that transfers, in whole or in part, the economic consequence of ownership of any common stock, whether any such swap or transaction is to be settled by delivery of shares or other securities, in cash or otherwise.

This lock-up provision applies to common stock and to securities convertible into or exchangeable or exercisable for or repayable with common stock. It also applies to common stock owned now or acquired later by the person executing the agreement or for which the person executing the agreement later acquires the power of disposition. The 90-day restricted period will be automatically extended if (1) during the last 17 days of the 90-day restricted period we issue an earning release or material news or a material event relating to its business occurs or (2) prior to the expiration of the 90-day restricted period, we announce that we will release earnings results or we become aware that material news or a

Table of Contents

material event will occur during the 16-day period beginning on the last day of the 90-day restricted period, in which case the restrictions described above will continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event, unless such extension is waived in writing by Merrill Lynch, Pierce, Fenner & Smith Incorporated.

In connection with our IPO, all of our directors and officers and substantially all of our stockholders entered into lock-up agreements substantially similar to the contractual lock-up described above, except that such lock-up agreements expire on November 17, 2009, subject to extension under certain circumstances.

NASDAQ Global Market Listing

Our common stock is listed on The NASDAQ Global Market under the symbol "OPEN."

Price Stabilization, Short Positions and Penalty Bids

Until the distribution of the shares is completed, SEC rules may limit underwriters and selling group members from bidding for and purchasing our common stock. However, the representative may engage in transactions that stabilize the price of the common stock, such as bids or purchases to peg, fix or maintain that price.

In connection with the offering, the underwriters may purchase and sell our common stock in the open market. These transactions may include short sales, purchases on the open market to cover positions created by short sales and stabilizing transactions. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering. "Covered" short sales are sales made in an amount not greater than the underwriters' option to purchase additional shares in the offering. The underwriters may close out any covered short position by either exercising their overallotment option or purchasing shares in the open market. In determining the source of shares to close out the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the overallotment option. "Naked" short sales are sales in excess of the overallotment option. The underwriters must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of our common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of shares of common stock made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representative has repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Similar to other purchase transactions, the underwriters' purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market.

Neither we nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our common stock. In addition, neither we nor any of the underwriters make any representation that the representative will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Table of Contents

Passive Market Making

In connection with the offering, the underwriters and selling group members may engage in passive market-making transactions in the common stock on The NASDAQ Stock Market in accordance with Rule 103 of Regulation M under the Exchange Act during the period before the commencement of offers or sales of common stock and extending through the completion and distribution. A passive market-maker must display its bids at a price not in excess of the highest independent bid of the security. However, if all independent bids are lowered below the passive market-maker's bid, that bid must be lowered when specified purchase limits are exceeded.

Electronic Offer, Sale and Distribution of Shares

A prospectus in electronic format will be made available on the websites maintained by one or more of the underwriters of this offering. Other than the electronic prospectus, the information on the websites of the underwriters is not part of this prospectus. The underwriters may agree to allocate a number of shares to underwriters for sale to their online brokerage account holders. Internet distributions will be allocated to underwriters that may make Internet distributions on the same basis as other allocations.

Other than the prospectus in electronic format, the information on any underwriter's or selling group member's web site and any information contained in any other website maintained by an underwriter or selling group member is not part of this prospectus or the registration statement of which this prospectus forms a part.

Other Relationships

Some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with us. They have received customary fees for these transactions.

Selling Restrictions

EEA/UK

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive, each referred to as Relevant Member State, an offer to the public of any shares which are the subject of the offering contemplated by this prospectus, may not be made in that Relevant Member State except that an offer to the public in that Relevant Member State of any shares may be made at any time under the following exemptions under the Prospectus Directive, if they have been implemented in that Relevant Member State:

(a) to legal entities which are authorised or regulated to operate in the financial markets or, if not so authorised or regulated, whose corporate purpose is solely to invest in securities;

(b) to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than €43,000,000 and (3) an annual net turnover of more than €50,000,000, as shown in its last annual or consolidated accounts;

(c) by the underwriters to fewer than 100 natural or legal persons (other than "qualified investors" as defined in the Prospectus Directive) subject to obtaining the prior consent of Merrill Lynch, Pierce Fenner & Smith Incorporated for any such offer; or

Table of Contents

(d) in any other circumstances falling within Article 3(2) of the Prospectus Directive, provided that no such offer of shares shall result in a requirement for the publication by us or any underwriter of a prospectus pursuant to Article 3 of the Prospectus Directive.

Any person making or intending to make any offer within the European Economic Area of shares which are the subject of the offering contemplated in this Prospectus should only do so in circumstances in which no obligation arises for us or any of the underwriters to produce a prospectus for such offer. Neither we nor the underwriters have authorized, nor do they authorize, the making of any offer of shares through any financial intermediary, other than offers made by the underwriters which constitute the final offering of shares contemplated in this prospectus.

For the purposes of this provision, and the buyer's representation below, the expression an "offer to the public" in relation to any shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares to be offered so as to enable an investor to decide to purchase any shares, as the same may be varied in that Relevant Member State by any measure implementing the Prospectus Directive in that Relevant Member State and the expression "Prospectus Directive" means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.

Buyer's Representation

Each person in a Relevant Member State who receives any communication in respect of, or who acquires any shares under, the offers contemplated in this prospectus will be deemed to have represented, warranted and agreed to and with each underwriter and us that:

(a) it is a qualified investor within the meaning of the law in that Relevant Member State implementing Article 2(1)(e) of the Prospectus Directive; and

(b) in the case of any shares acquired by it as a financial intermediary, as that term is used in Article 3(2) of the Prospectus Directive, (i) the shares acquired by it in the offering have not been acquired on behalf of, nor have they been acquired with a view to their offer or resale to, persons in any Relevant Member State other than "qualified investors" as defined in the Prospectus Directive, or in circumstances in which the prior consent of the representative has been given to the offer or resale; or (ii) where shares have been acquired by it on behalf of persons in any Relevant Member State other than qualified investors, the offer of those shares to it is not treated under the Prospectus Directive as having been made to such persons.

Switzerland

This document as well as any other material relating to the shares do not constitute an issue prospectus pursuant to Article 652a of the Swiss Code of Obligations. The shares will not be listed on the SWX Swiss Exchange and, therefore, the documents relating to the shares, including, but not limited to, this document , do not claim to comply with the disclosure standards of the listing rules of SWX Swiss Exchange and corresponding prospectus schemes annexed to the listing rules of the SWX Swiss Exchange.

The shares are being offered in Switzerland by way of a private placement, i.e. to a small number of selected investors only, without any public offer and only to investors who do not purchase the shares with the intention to distribute them to the public. The investors will be individually approached by the Issuer from time to time.

This document as well as any other material relating to the shares is personal and confidential and do not constitute an offer to any other person. This document may only be used by those investors to whom it has been handed out in connection with the offering described herein and may neither

Table of Contents

directly nor indirectly be distributed or made available to other persons without our express consent. It may not be used in connection with any other offer and shall in particular not be copied and/or distributed to the public in (or from) Switzerland.

NOTICE TO PROSPECTIVE INVESTORS IN THE DUBAI INTERNATIONAL FINANCIAL CENTRE

This document relates to an exempt offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority. This document is intended for distribution only to persons of a type specified in those rules. It must not be delivered to, or relied on by, any other person. The Dubai Financial Services Authority has no responsibility for reviewing or verifying any documents in connection with exempt offers. The Dubai Financial Services Authority has not approved this document nor taken steps to verify the information set out in it, and has no responsibility for it. The shares may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the shares offered should conduct their own due diligence on the shares. If you do not understand the contents of this document you should consult an authorized financial adviser.

Table of Contents

LEGAL MATTERS

Certain legal matters with respect to the legality of the issuance of the shares of common stock offered by the selling stockholders by this prospectus will be passed upon for the selling stockholders by Latham & Watkins LLP, Menlo Park, California. The underwriters are being represented by Davis Polk & Wardwell LLP, Menlo Park, California, in connection with the offering.

EXPERTS

The consolidated financial statements as of December 31, 2007 and 2008 and for each of the three years in the period ended December 31, 2008 included in this prospectus, have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report appearing herein and elsewhere in the registration statement (which report expresses an unqualified opinion on the consolidated financial statements and includes an explanatory paragraph relating to the Company's adoption of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes An Interpretation of FASB No. 109*). Such consolidated financial statements have been so included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to this offering of our common stock by the selling stockholders. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement, some items of which are contained in exhibits to the registration statement as permitted by the rules and regulations of the SEC. For further information with respect to us and our common stock, we refer you to the registration statement, including the exhibits and the financial statements and notes filed as a part of the registration statement. Statements contained in this prospectus concerning the contents of any contract or any other document are not necessarily complete. If a contract or document has been filed as an exhibit to the registration statement, please see the copy of the contract or document that has been filed. Each statement is this prospectus relating to a contract or document filed as an exhibit is qualified in all respects by the filed exhibit. The exhibits to the registration statement should be referenced for the complete contents of these contracts and documents. You may obtain copies of this information by mail from the Public Reference Section of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549, at prescribed rates. You may obtain information on the operation of the public reference rooms by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website that contains reports, proxy statements and other information about issuers, like us, that file electronically with the SEC. The address of that website is www.sec.gov.

We are subject to the information and reporting requirements of the Securities Exchange Act and, in accordance with this law, we file periodic reports, proxy statements and other information with the SEC. These periodic reports, proxy statements and other information are available for inspection and copying at the SEC's public reference facilities and the website of the SEC referred to above.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
OpenTable, Inc.
San Francisco, California

We have audited the accompanying consolidated balance sheets of OpenTable, Inc. and subsidiaries (the "Company") as of December 31, 2007 and 2008, and the related consolidated statements of operations, stockholders' equity and comprehensive income (loss), and cash flows for each of the three years in the period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2007 and 2008, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the consolidated financial statements, effective January 1, 2007, the Company adopted the provisions of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an Interpretation of FASB No. 109.*

/s/ DELOITTE & TOUCHE LLP

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

1. Organization and Description of Business

OpenTable, Inc. and subsidiaries (collectively, the "Company"), a Delaware corporation, was formed on October 13, 1998. The Company provides solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. For restaurant customers, the Company provides a proprietary Electronic Reservation Book, or ERB, which combines proprietary software and computer hardware to deliver a solution that computerizes restaurant host-stand operations and replaces traditional pen-and-paper reservation books. The OpenTable ERB streamlines and enhances a number of business-critical functions and processes for restaurants, including reservation management, table management, guest recognition and email marketing. For diners, the Company operates www.opentable.com, a popular restaurant reservation website. The OpenTable website enables diners to find, choose and book tables at restaurants on the OpenTable network in real time, overcoming the inefficiencies associated with the traditional process of reserving by phone.

Certain Significant Risks and Uncertainties

The Company operates in a dynamic industry, and accordingly, can be affected by a variety of factors. For example, management of the Company believes that changes in any of the following areas could have a significant negative effect on the Company in terms of its future financial position, results of operations or cash flows: the ability to maintain an adequate rate of growth; the impact of the current economic climate on its business; the ability to effectively manage its growth; the ability to attract new restaurant customers; the ability to increase the number of visitors to its website and convert those visitors into diners; and the ability to retain existing restaurant customers and diners or encourage repeat reservations.

2. Summary of Significant Accounting Policies

Principles of Consolidation

These consolidated financial statements include the accounts of OpenTable, Inc. and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. These estimates are based on information available as of the date of the financial statements; therefore, actual results could differ from those estimates.

Unaudited Interim Financial Information

The accompanying consolidated balance sheet as of June 30, 2009, the consolidated statements of operations and of cash flows for the six months ended June 30, 2008 and 2009 and the consolidated statement of stockholders' equity and comprehensive income (loss) for the six months ended June 30, 2009 are unaudited. The unaudited interim financial statements have been prepared on the same basis

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

as the annual consolidated financial statements and, in the opinion of management, reflect all adjustments, which include only normal recurring adjustments, necessary to present fairly the Company's financial position and results of operations and cash flows for the six months ended June 30, 2008 and 2009. The financial data and other information disclosed in these notes to the consolidated financial statements related to the six-month periods are unaudited. The results of the six months ended June 30, 2009 are not necessarily indicative of the results to be expected for the year ending December 31, 2009 or for any other interim period of for any other future year.

Foreign Currency Translation

The Company's operations are conducted in various countries around the world and the financial statements of its foreign subsidiaries are reported in the applicable foreign currencies (functional currencies). Financial information is translated from the applicable functional currency to the U.S. dollar, the reporting currency, for inclusion in the Company's consolidated financial statements. Income, expenses, and cash flows are translated at average exchange rates prevailing during the fiscal year, and assets and liabilities are translated at fiscal year-end exchange rates. Resulting translation adjustments are included as a component of accumulated other comprehensive income (loss), net, in stockholders' equity. Foreign exchange transaction gains and losses are included in Other Income, net in the accompanying consolidated statements of operations. Exchange gains and losses on intercompany balances that are considered permanently invested are also included as a component of accumulated other comprehensive loss, in stockholders' equity.

Cash and Cash Equivalents

The Company considers all highly liquid short-term investments with original maturities of three months or less at the time of purchase to be cash equivalents. At December 31, 2007 and 2008, and June 30, 2009, cash and cash equivalents consist of cash, money market accounts and commercial paper.

Restricted Cash

Restricted cash represents money market accounts and a certificate of deposit held at a financial institution principally as security for deposits maintained in connection with the Company's credit card processors.

Short-term Investments

Short-term investments consist mainly of U.S. government agency securities, commercial paper and certificates of deposit. The Company classifies its investments as available-for-sale securities. Available-for-sale securities are carried at fair value with unrealized gains and losses reported as a component of accumulated other comprehensive income (loss), net, in stockholders' equity. For the periods ended December 31, 2007 and 2008, and June 30, 2009, realized and unrealized gains and losses on investments were not material. An impairment charge is recorded in the consolidated statements of operations for declines in fair value below the cost of an individual investment that are deemed to be other than temporary. Management judges whether a decline in value is temporary based

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

on the length of time that the fair market value has been below cost combined with the severity of the decline.

Concentrations of Credit Risk

Financial instruments which potentially subject the Company to concentration of credit risk consist primarily of cash and cash equivalents, restricted cash, short-term investments and accounts receivable. The Company places its cash and cash equivalents, short-term investments and restricted cash with major financial institutions throughout the world, which management assesses to be of high credit quality, in order to limit the exposure of each investment.

Credit risk with respect to accounts receivable is dispersed due to the large number of customers. In addition, the Company's credit risk is mitigated by the relatively short collection period. Collateral is not required for accounts receivable. The Company maintains an allowance for doubtful accounts receivable balances. The allowance is based upon historical loss patterns, the number of days that billings are past due and an evaluation of the potential risk of loss associated with problem accounts. Accounts receivable written-off against the allowance for doubtful accounts were $437,000, $457,000, and $747,000 for the years ended December 31, 2006, 2007 and 2008, respectively, and $237,000 and $911,000 for the six months ended June 30, 2008 and 2009, respectively.

Deferred Offering Costs

Deferred offering costs of $1,183,000 are included in other assets on the Company's consolidated balance sheet at December 31, 2008. Upon the consummation of the initial public offering in May 2009, these amounts were offset against the proceeds of the offering and included in stockholder's equity. There were no amounts capitalized as of December 31, 2007.

Property and Equipment, net

Property and equipment, net is stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, which is four years for restaurant hardware and three years for all other asset categories except leasehold improvement, which are amortized over the shorter of the lease term or expected useful life of the improvements.

Website and Software Development Costs

Costs related to website and internal-use software development are accounted for in accordance with American Institute of Certified Public Accountants Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* (SOP 98-1) and Emerging Issues Task Force Issue No. 00-2*, Accounting for Website Development Costs* (EITF 00-2). Such software is primarily related to the Company's website, including support systems. In accordance with SOP 98-1 and EITF 00-2, the Company begins to capitalize its costs to develop software when preliminary development efforts are successfully completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

intended. Such costs are amortized on a straight-line basis over the estimated useful life of the related asset, generally estimated between two to four years. Costs incurred prior to meeting these criteria are expensed as incurred and recorded within Technology expenses within the accompanying consolidated statements of operations. Costs incurred for enhancements that are expected to result in additional features or functionality are capitalized and expensed over the estimated useful life of the enhancements, generally between two and three years.

The Company capitalized $150,000, $419,000, and $1,003,000 in website and internal-use software development costs during the years ended December 31, 2006, 2007 and 2008, respectively. The amounts capitalized for the six months ended June 30, 2008 and 2009, were $456,000 and $486,000, respectively. Amortization expense totaled $103,000, $175,000 and $431,000 during the fiscal years ended December 31, 2006, 2007 and 2008, respectively, and $170,000 and $304,000 for the six months ended June 30, 2008 and 2009, respectively. Such costs are recorded in Operations and Support within the accompanying consolidated statements of operations.

The Company follows the guidance in Statement of Financial Accounting Standard No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed* (SFAS 86) in accounting for costs incurred in connection with development of the software contained in the ERB used by all restaurant customers, and in a limited number of certain transactions the Company sells reservation systems which do not include the Company's ongoing service. All costs incurred to establish the technological feasibility of a computer product to be sold, leased or otherwise marketed are expensed as incurred. Costs incurred subsequent to establishing technological feasibility and through general product release are capitalized and amortized over the estimated product life. The period between technological feasibility and general product release is extremely short and the costs incurred during this stage are not material for the fiscal years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2008 and 2009, and are expensed as incurred.

Impairment of Long-Lived Assets and Long-Lived Assets to be Disposed of

The Company evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset group to future undiscounted net cash flows expected to be generated by the asset group. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Revenue Recognition

The Company's revenues include installation fees for the Company's ERB (including training), monthly subscription fees and a per-seated diner fee for each diner seated through the Company's online reservation system. As the Company provides its application as a service, the Company follows the provisions of Securities and Exchange Commission Staff Accounting Bulletin No. 104, *Revenue Recognition* (SAB 104) and Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables* (EITF 00-21). The Company recognizes revenue when all of the following

Table of Contents

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

conditions are met: there is persuasive evidence of an arrangement; the service has been provided to the customer; the collection of the fees is reasonably assured; and the amount of fees to be paid by the customer is fixed or determinable. Amounts paid by the customer include the right to use Company hardware during the service period. Proportionate revenue related to the right to use Company hardware accounts for less than 10% of revenue for all periods presented.

Revenue from the installation of the ERB is recognized on a straight-line basis over the estimated customer life, commencing with customer acceptance. The estimated customer life is approximately six years, based on historical restaurant customer termination activity. To date, the impact of changes in the estimated customer life has not been material to the Company's results of operations or financial position. Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered. Reservation revenues (or per-seated diner fees) are recognized on a transaction-by-transaction basis, as diners are seated by restaurant customers. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue or revenues, depending on whether the revenue recognition criteria have been met. Revenues are shown net of $2,490,000, $4,032,000 and $5,184,000 for the fiscal years ended December 31, 2006, 2007 and 2008, respectively, and $2,555,000 and $3,288,000 for the six months ended June 30, 2008 and 2009, respectively, related to redeemable Dining Points issued to diners during the respective periods.

Installation Costs

The incremental direct customer acquisition costs associated with on-site system installations, including direct compensation costs of technicians providing installation services, are expensed as incurred.

Dining Point Loyalty Program

The Company provides a points-based loyalty program, "OpenTable Dining Rewards", to registered diners who book and honor reservations through the OpenTable website. OpenTable Dining Rewards involves the issuance of "Dining Points" which can be accumulated and redeemed for "Dining Cheques". When a diner accumulates a defined minimum number of points, he/she may redeem them for a Dining Cheque. Diners may present Dining Cheques at any OpenTable restaurant and their bill is reduced by the cheque amount. If a diner does not make a seated reservation within any 12 month period, then his or her account is considered inactive and the accumulated Dining Points for the diner are reset to zero.

The recorded contra-revenue is an estimate of the eventual cash outlay related to the issued Dining Points and is booked at the time the points are earned by the diner (when the diner is "seated" by the restaurants). The Company estimates the expense for the issued Dining Points by analyzing the historical patterns of redemption and cheque cashing activity.

The Company recognizes the cost associated with Dining Points as contra-revenue in accordance with EITF No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)*, and EITF No. 00-22, *Accounting for "Points" and Certain*

2. Summary of Significant Accounting Policies (Continued)

Other Time- or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to be Delivered in the Future.

Technology

In the consolidated statement of operations, technology expense includes employee compensation associated with the development of new technologies.

Operations and Support

In the consolidated statements of operations, operations and support expense includes employee compensation associated with the installation, support and maintenance of restaurant customers, as well as costs associated with restaurant equipment and connectivity, referral payments and shipping costs associated with restaurant equipment. Operations and Support expenses also include amortization of capitalized website and development costs.

Advertising Expense

Advertising costs are expensed when incurred and are included in sales and marketing expense in the accompanying consolidated statements of operations. Advertising costs include direct-marketing costs such as email marketing, market research, printing, public relations and tradeshow expenses. The Company incurred $906,000, $1,072,000 and $1,355,000 of advertising costs during the fiscal years ended December 31, 2006, 2007 and 2008, respectively, and $611,000 and $618,000 for the six months ended June 30, 2008 and 2009, respectively.

Stock-Based Compensation

Prior to January 1, 2006, the Company accounted for stock-based employee compensation arrangements using the intrinsic value method of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25) and related interpretations, and complied with the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, (SFAS No. 123) as amended by SFAS No. 148, *Accounting for Stock-Based Compensation, Transition and Disclosure, an amendment to SFAS Statement No. 123* (SFAS No. 148). Under APB No. 25 compensation expense for employees is based on the excess, if any, of the fair value of the Company's common stock over the exercise price of the option on the date of grant.

Effective January 1, 2006, the Company adopted SFAS No. 123R, *Share-Based Payment* (SFAS No. 123R), which requires compensation expense related to share-based transactions, including employee stock options, to be measured and recognized in the financial statements based on fair value. SFAS No. 123R revises SFAS No. 123, as amended, and supersedes APB No. 25. The Company adopted SFAS No. 123R using the modified prospective method. Under modified prospective application, SFAS No. 123R applies to new awards and to awards modified, repurchased, or cancelled after the required effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered that are outstanding as of the required effective date are recognized as the requisite service is rendered on or after the required effective date. The

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

compensation expense for that portion of awards is based on the grant-date fair value of those awards. The compensation expense for awards with grant dates prior to January 1, 2006, are attributed to periods beginning on or after the effective date using the attribution method that was used under SFAS No. 123, except that the method of recognizing forfeitures only as they occur is not continued.

The Company is using the graded vesting attribution method prescribed by SFAS 123R over the option vesting period, for all options granted on or after January 1, 2006. All options granted prior to January 1, 2006 are being amortized using a straight-line method.

Net Income (Loss) Per Share

Basic net income (loss) per share attributed to common shares is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period as reduced by the weighted average unvested common shares subject to repurchase by the Company. Diluted net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common and potential dilutive shares outstanding during the period, to the extent such potential dilutive shares are dilutive. Potential dilutive shares are composed of incremental common shares issuable upon the exercise of stock options and warrants, unvested common shares subject to repurchase and convertible preferred stock. Nonvested performance-based awards are included in the diluted shares outstanding each period if established performance criteria have been met at the end of the respective periods. 343,000 shares were excluded from the dilutive shares outstanding for the years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2008 and 2009, as the performance criteria had not been met as of the respective dates. Anti-dilutive shares in the amounts of 768,000, 667,000 and 11,669,000 were excluded from the dilutive shares outstanding for the fiscal years ended December 31, 2006, 2007 and 2008. Anti-dilutive shares in the amounts of 673,000 and 774,000 were excluded from the dilutive shares outstanding for the six

2. Summary of Significant Accounting Policies (Continued)

months ended June 30, 2008 and 2009. The following table sets forth the computation of basic and diluted net income (loss) per share for the periods indicated:

	Years Ended December 31,			Six Months Ended June 30,	
	2006	2007	2008	2008	2009
				(Unaudited)	
Net income (loss)	$ 194,000	$ 9,216,000	$ (1,024,000)	$ 141,000	$ 1,058,000
Basic shares:					
Weighted average common shares outstanding	9,132,000	9,522,000	10,016,000	9,906,000	12,802,000
Diluted shares:					
Weighted average shares used to compute basic net income (loss) per share	9,132,000	9,522,000	10,016,000	9,906,000	12,802,000
Effect of potentially dilutive securities:					
Unvested common shares subject to repurchase	788,000	659,000		796,000	466,000
Warrants to purchase common stock	7,000	24,000		33,000	
Warrants to purchase convertible preferred stock	64,000	76,000		80,000	83,000
Employee stock options	456,000	662,000		863,000	1,192,000
Convertible preferred stock	9,076,000	9,076,000		9,076,000	7,059,000
Weighted average shares used to compute diluted net income (loss) per share	19,523,000	20,019,000	10,016,000	20,754,000	21,602,000
Net income (loss) per share:					
Basic	$ 0.02	$ 0.97	$ (0.10)	$ 0.01	$ 0.08
Diluted	$ 0.01	$ 0.46	$ (0.10)	$ 0.01	$ 0.05

Comprehensive Income (Loss)

In accordance with SFAS No. 130, *Reporting Comprehensive Income* (SFAS No. 130), the Company reports by major components and as a single total, the change in its net assets during the period from nonowner sources. Comprehensive income (loss) consists of net income (loss) and accumulated other comprehensive income (loss), which includes certain changes in equity that are excluded from net income (loss). Specifically, it includes cumulative foreign currency translation and the unrealized gain (loss) from investments. Comprehensive income (loss) for the fiscal years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2008 and 2009, is included within the Consolidated Statement of Stockholders' Equity and Comprehensive Income (Loss).

Accumulated other comprehensive loss of $37,000 as of June 30, 2009 was comprised of $15,000 of unrealized gain on investments and $52,000 of foreign currency translation losses.

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

Income Taxes

The Company records income taxes using the asset and liability method which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. In estimating future tax consequences, generally all expected future events other than enactments or changes in the tax law or rates are considered. Valuation allowances are provided when necessary to reduce deferred tax assets to the amount expected to be realized.

The Company operates in various tax jurisdictions and is subject to audit by various tax authorities. The Company provides for tax contingencies whenever it is deemed probable that a tax asset has been impaired or a tax liability has been incurred for events such as tax claims or changes in tax laws. Tax contingencies are based upon their technical merits, relative tax law, and the specific facts and circumstances as of each reporting period. Changes in facts and circumstances could result in material changes to the amounts recorded for such tax contingencies.

On January 1, 2007, the Company adopted Financial Accounting Standards Board ("FASB") Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109* (FIN No. 48), which supplements SFAS No. 109, *Accounting for Income Taxes*, by defining the confidence level that a tax position must meet in order to be recognized in the financial statements. FIN No. 48 requires that the tax effects of a position be recognized only if it is "more-likely-than-not" to be sustained based solely on its technical merits as of the reporting date. The Company considers many factors when evaluating and estimating its tax positions and tax benefits, which may require periodic adjustments and which may not accurately anticipate actual outcomes.

With the adoption of FIN No. 48, companies are required to adjust their financial statements to reflect only those tax positions that are more-likely-than-not to be sustained. Any necessary adjustment would be recorded directly to retained earnings and reported as a change in accounting principle as of the date of adoption. FIN No. 48 prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. The total amount of unrecognized tax benefits as of the adoption date was $14,879,000. The Company's policy is to recognize interest and penalties related to unrecognized tax benefits in income tax expense. See Note 9 for additional information, including the effects of adoption on the Company's consolidated financial position, results of operations and cash flows.

Recently Issued Accounting Standards

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), *Business Combinations* (SFAS No. 141 (R)). SFAS No. 141(R) establishes principles and requirements for how the acquiror of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree. SFAS No. 141(R) also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The Company is required to adopt SFAS

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

2. Summary of Significant Accounting Policies (Continued)

No. 141(R) for the fiscal year beginning January 1, 2009. The adoption of SFAS No. 141(R) did not have a material impact on the Company's financial position or results of operations at the time of adoption.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements* (SFAS No. 160) which amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements* (ARB No. 51), to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a non-controlling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity separate and apart from the parent's equity in the consolidated financial statements. In addition to the amendments to ARB No. 51, this statement amends SFAS No. 128, *Earnings Per Share*, so that earnings per share data will continue to be calculated the same way those data were calculated before this statements was issued. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The adoption of SFAS No. 160 did not have a material impact on the Company's financial position or results of operations at the time of adoption.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162). This statement documents the hierarchy of the various sources of accounting principles and the framework for selecting the principles used in preparing financial statements. This statement shall be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. SFAS No. 162 will not have a material impact on the Company's consolidated financial statements.

3. Short-Term Investments and Fair Value Measurements

Short-term investments, all of which have a term of less than one year, are summarized as follows:

	Amortized Cost	Unrealized Gains	Estimated Fair Market Value
At December 31, 2008:			
Commercial paper	$ 898,000	$ 1,000	899,000
U.S. government and agency securities	10,595,000	65,000	10,660,000
Certificates of deposit	5,700,000		5,700,000
Total	$17,193,000	$ 66,000	$17,259,000

Table of Contents

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

3. Short-Term Investments and Fair Value Measurements (Continued)

	Amortized Cost	Unrealized Gains (Losses)	Estimated Fair Market Value
At June 30, 2009 (unaudited):			
Commercial paper	$ 9,674,000	$ (3,000)	$ 9,671,000
U.S. government and agency securities	25,102,000	22,000	25,124,000
Certificates of deposit	7,902,000	(4,000)	7,898,000
Total	$42,678,000	$ 15,000	$42,693,000

SFAS No. 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, SFAS No. 157 establishes a three-tier value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs other than the quoted prices in active markets that are observable either directly or indirectly; and (Level 3) significant unobservable inputs in which there is little or no market data, which requires the Company to develop its own assumptions. This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. On a recurring basis, the Company measures its marketable securities at fair value.

Investment instruments are classified within Level 1 or Level 2 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. The types of instruments that are generally classified within Level 1 of the fair value hierarchy include money market securities and U.S. government and agency securities. The types of investments that are generally classified within Level 2 of the fair value hierarchy include, corporate securities and certificates of deposit.

In accordance with SFAS No. 157, the following table represents the Company's fair value hierarchy for its financial assets as follows:

	December 31, 2008			June 30, 2009		
	Aggregate Fair Value	Level 1	Level 2	Aggregate Fair Value	Level 1	Level 2
Commercial paper	$ 899,000	$ 899,000	$	$ 9,671,000	$ 9,671,000	$

assets and liabilities not carried at fair value, such as accounts payable, are still reported at their carrying values.

4. Property and Equipment

Property and equipment consists of the following:

	Years Ended December 31,		
	2007	2008	June 30, 2009 (Unaudited)
Restaurant hardware	$11,838,000	$16,049,000	$ 16,184,000
Computer equipment	1,544,000	2,140,000	2,194,000
Software	657,000	824,000	965,000
Capitalized development	806,000	1,809,000	2,296,000
Furniture and fixtures	161,000	168,000	305,000
Total	15,006,000	20,990,000	21,944,000
Accumulated depreciation	(6,628,000)	(9,865,000)	(10,825,000)
Property and equipment, net	$ 8,378,000	$11,125,000	$ 11,119,000

5. Line of Credit

In August 2007, the Company entered into a $2,000,000 line of credit for working capital needs. In September 2008, the Company increased the line of credit to $3,000,000. This line of credit is available through July 2010 and no amounts were outstanding under this line of credit as of December 31, 2007 and 2008 or June 30, 2009. This line of credit agreement requires the Company to comply with various financial and non-financial covenants, including a minimum revenue requirement, and precludes the payment of dividends to shareholders without the permission of the lender. The Company was in compliance with all financial covenants for all periods and at December 31, 2007 and 2008, and June 30, 2009.

6. Other Income, Net

Other income, net, consists of the following:

	Years Ended December 31,			Six Months Ended June 30,	
	2006	2007	2008	2008	2009
				(Unaudited)	
Interest income	$426,000	$785,000	$ 545,000	$305,000	$167,000

7. Commitments and Contingencies

Office Facility Leases

The Company leases its office facilities under operating lease agreements that expire at various dates through 2013. The terms of the lease agreements provide for rental payments on a graduated basis. The Company recognizes rent expense on a straight-line basis over the lease period.

Rental expense, principally for leased office space under operating lease commitments, was $620,000, $710,000 and $1,420,000 for the years ended December 31, 2006, 2007 and 2008, respectively, and $668,000 and $820,000 for the six months ended June 30, 2008 and 2009, respectively.

Aggregate Future Lease Commitments

The Company minimum payments under non-cancelable operating leases for office space having initial terms in excess of one year are as follows at December 31, 2008:

	Operating Leases
Years ending December 31:	
2009	$1,458,000
2010	1,305,000
2011	1,312,000
2012	1,347,000
2013	456,000
Total minimum lease payments	$5,878,000

Litigation

In July 2007, a complaint was filed against the Company by Online Reservations LLC ("Online Reservations") alleging intellectual property rights infringement. Online Reservations sought damages and injunctive relief. On March 19, 2008 the Company reached a settlement with Online Reservations in the amount of $1,600,000. The settlement was recorded as general and administrative expense in the third quarter of fiscal year 2007.

The Company is also subject to various other legal proceedings and claims arising in the ordinary course of business. Although occasional adverse decisions or settlements may occur, management believes that the final disposition of such matters will not have a material adverse effect on the Company's business, financial position, results of operations or cash flows.

8. Stockholders' Equity

Common Stock

At December 31, 2008, there were 24,000,000 shares of common stock authorized, 11,154,668 shares issued and 10,944,421 shares outstanding. Holders of common stock are entitled to dividends if and when declared by the board of directors.

8. Stockholders' Equity (Continued)

Common Stock Subject To Repurchase

Historically, the Company typically allowed employees to exercise options prior to vesting. However, beginning with May 2008, options granted did not contain an early exercise provision. The Company has the right to repurchase at the original purchase price any unvested (but issued) common shares upon termination of service of an employee. The consideration received for an exercise of an option is considered to be a deposit of the exercise price and the related dollar amount is recorded as a liability. The shares and liability are reclassified into equity on a ratable basis as the award vests. The Company recorded a liability in accounts payable and accrued expenses of $4,331,000, $2,984,000, and $2,359,000 relating to 1,110,030, 728,028, and 547,516 options that were exercised and are unvested at December 31, 2007 and 2008, and June 30, 2009, respectively. These shares which are subject to a repurchase right held by the Company are included in issued and outstanding shares as of December 31, 2007 and 2008, and June 30, 2009.

Treasury Stock

In November 2006, the Company repurchased 207,047 common shares at $3.13 per share, for $647,000.

In May 2007, in connection with litigation against a former employee, 3,200 shares of common stock were transferred back to the Company. As part of the settlement, the Company was not required to pay any consideration in return for the shares. These shares have been accounted for as treasury stock.

Common Stock Reserved For Future Issuance

At December 31, 2008, the Company has reserved the following shares of common stock for future issuances in connection with:

Series A convertible preferred stock	6,898,187
Series B convertible preferred stock	2,177,550
Warrants to purchase common stock	93,368
Warrants to purchase Series A convertible preferred stock	88,691
Stock option plan:	
Options outstanding	2,417,850
Options available for future grants	162,836
Total	11,838,482

Preferred Stock

Prior to the initial public offering, the Company had outstanding 6,898,187 shares of Series A convertible preferred stock and 2,177,550 shares of Series B convertible preferred stock. Each share of preferred stock was convertible into one share of common stock. The conversion of all shares of preferred stock into 9,075,737 shares of common stock occurred automatically upon the completion of the Company's initial public offering on May 21, 2009.

8. Stockholders' Equity (Continued)

Stock Based Compensation under SFAS No. 123R

Effective January 1, 2006, the Company adopted SFAS No. 123R, which requires compensation costs related to share-based transactions, including employee stock options, to be recognized in the financial statements based on fair value.

Under SFAS No. 123R, the fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The Company determined weighted average valuation assumptions as follows:

Volatility As the Company does not have trading history for its common stock, the expected stock price volatility for the Company's common stock was estimated by taking the median historic price volatility for industry peers based on daily price observations over a period equivalent to the expected term of the stock option grants. Industry peers consist of several public companies in the technology industry similar in size, stage of life cycle and financial leverage. The Company did not rely on implied volatilities of traded options in its industry peers' common stock because the volume of activity was relatively low.

Expected term The expected term was estimated using the simplified method allowed under Securities and Exchange Commission Staff Accounting Bulletin No. 107, *Share-Based Payment*.

Risk free rate The risk free interest rate is based on the yields of U.S. Treasury securities with maturities similar to the expected term of the options for each option group.

Forfeiture rate The Company estimated the forfeiture rate based on our historical experience with forfeitures. The Company reviews the estimated forfeiture rates each period end and makes changes as factors affecting the forfeiture rate calculations and assumptions change.

Dividend yield The Company has never declared or paid any cash dividends and does not presently plan to pay cash dividends in the foreseeable future. Consequently, the Company used an expected dividend yield of zero.

The following table summarizes the assumptions relating to the Company's stock options for the years ended December 31, 2006, 2007 and 2008, as permitted under SFAS No. 123R:

	Years Ended December 31,		
	2006	**2007**	**2008**
Dividend yield	0%	0%	0%
Volatility	50%	48%-54%	55%
Risk free interest rate	4.56%-5.05%	3.61%-5.16%	1.54%-3.34%
Expected term, in years	5.50-7.00	5.27-6.65	5.92-6.53

No stock options were granted in the six months ended June 30, 2009.

As a result of adopting SFAS No. 123R, the Company recorded net stock-based compensation expense of $709,000, $3,103,000 and $3,970,000 for the years ended December 31, 2006, 2007 and 2008, respectively and $2,131,000 and $1,684,000 for the six months ended June 30, 2008 and 2009,

8. Stockholders' Equity (Continued)

respectively. The Company capitalized $45,000 of stock-based compensation for the year ended December 31, 2008, and $37,000 for the six months ended June 30, 2009, in association with website and software development costs (see Note 2). No amounts were capitalized for the years ended December 31, 2006 and 2007.

Stock Options Plan

Under the 1999 Stock Plan (the "Plan"), 0 shares of common stock as of June 30, 2009 are reserved for the issuance of incentive stock options ("ISOs") or nonstatutory stock options ("NSOs") to eligible participants. During fiscal year 2006 and through June 30, 2009, the Board of Directors increased the number of shares of common stock authorized for issuance under the Plan by an additional 2,568,000. The ISOs were granted at a price per share not less than the fair market value at the date of grant. The NSOs were granted at a price per share not less than 85% of the fair market value at the date of grant. Options granted to date generally vest over a four-year period from the date of grant at a rate of 25% after one year, then monthly on a straight-line basis thereafter. Options granted generally are exercisable up to 10 years. Certain option holders are allowed to exercise unvested options to acquire restricted shares. Upon termination of service, the Company has the right to repurchase at the original purchase price any unvested (but issued) common shares. Common shares purchased under the Plan are subject to certain restrictions, including the right of first refusal by the Company for sale or transfer of these shares to outside parties. The Company's right of first refusal terminates upon completion of an initial public offering of common stock.

In January 2003, the Company initiated an option exchange program, under which plan participants could elect to cancel existing options. Participants electing cancellation were offered the opportunity to exchange such options for new options to be granted at least six months and one day following the cancellation, subject to the plan participant continuing to provide services to the Company through the grant date of the new options. The new options were subject to the same terms and conditions of the cancelled options with a modified vesting schedule under which employees received credit of 1/48th of the new grant for every four months of employment prior to February 2003. The remaining unvested options vest monthly over the 48 months beginning March 2003. Under the option exchange program, 242,491 options were canceled and replaced with 242,491 options with an exercise price of $0.10 per share. Through December 31, 2005, the replacement options were subject to variable plan accounting under APB No. 25. Stock-based compensation cost of $34,000 was recognized in the year ended December 31, 2005, related to these options for the difference between the option exercise price and the estimated fair value of the underlying common stock. On January 1, 2006, the Company adopted SFAS No. 123R, and the unamortized expense calculated under SFAS No. 123R was expensed in accordance with the remaining vesting period of these options.

Under the Plan, the Company granted 342,574 performance-based stock options to two executives. The first option was granted in November 2005 for 244,974 shares at an exercise price of $1.50 per share. The second option was granted in July 2006 for 97,600 shares at an exercise price of $1.50 per share. Beginning January 1, 2006, the Company accounted for this stock option as a fixed award in accordance with SFAS No. 123R. The grant-date fair value for this option, based on the Black-Scholes valuation model (using a 50% volatility factor, 6.11 years estimated life of the warrant, exercise price of $1.50, 0% dividend yield and 4.57% risk-free interest rate) was $380,000. The fair

value is to be amortized over the period during which management has estimated the performance metrics will be achieved. Stock-based compensation expense in the amount of $88,000, $88,000, and $71,000 was recognized in each of the years ended December 31, 2006, 2007 and 2008, respectively as well as $44,000 and $55,000 for the six months ended June 30, 2008 and 2009, respectively. The grant-date fair value for the second option, based on the Black-Scholes valuation model (using a 50% volatility factor, 6.26 estimated life of the warrant, exercise price of $1.50, 0% dividend yield and 5.05% risk-free interest rate) was $255,000. The fair value is to be amortized over the period during which management has estimated the performance metrics will be achieved by. Stock-based compensation expense, for the second option, in the amount of $46,000, $65,000 and $48,000 was recognized in the years ended December 31, 2006, 2007 and 2008, respectively as well as $28,000 and $19,000 for the six months ended June 30, 2008 and 2009, respectively.

A summary of the Company's stock option activity follows:

	Options Outstanding		Weighted Average Remaining Contractual Term (In Years)	Aggregate Intrinsic Value
	Number of Shares	Weighted Average Exercise Price		
Outstanding January 1, 2006	994,676	$ 1.31

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

8. Stockholders' Equity (Continued)

The Company has computed the aggregate intrinsic value amounts disclosed in the above table based on the difference between the original exercise price of the options and the fair value of the Company's common stock of $30.17 at June 30, 2009. The aggregate intrinsic value of awards exercised during the year ended December 31, 2006, 2007 and 2008 was $222,000, $6,220,000 and $502,000, respectively. As of December 31, 2008, the total stock options vested and expected to vest were 2,158,314 and had a weighted average exercise price of $7.63 per share, a weighted average contractual term of 8.16 years and a total intrinsic value of $10,584,000.

The options outstanding and exercisable as of December 31, 2008 have been segregated into ranges for additional disclosure as follows:

	Options Outstanding			Options Vested and Exercisable	
Exercise Price	Number Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
$0.10-$0.50	43,516	4.91	$ .22	43,516	$ .22
$1.50	669,060	7.04	1.50	224,709	1.50
$3.75-4.88	625,596	8.10	4.87	188,998	4.87
$4.88-$23.38	1,079,678	8.95	12.60	229,927	15.60
Total	2,417,850	8.13	$ 7.31	687,150	$ 7.06

As of June 30, 2009, total unrecognized compensation costs, adjusted for estimated forfeitures, related to non-vested stock options was $3,176,000, which is expected to be recognized over the next 2.46 years.

Warrants

In May 2000, the Company issued two warrants to purchase 14,455 fully paid and non-assessable shares of the Company's common stock at an exercise price of $3.75 per share in connection with executive recruitment. The warrants for 11,122 and 3,333, expired unexercised in May 2007 and October 2007, respectively.

In connection with an equipment lease agreement, during 2000 and 1999, the lessor received warrants from the Company to purchase shares of convertible preferred stock as follows:

In 1999, the Company issued to the lessor warrants to purchase 6,940 shares of Series B convertible preferred stock at an exercise price of $8.75 per share and 1,202 shares of Series B preferred stock at an exercise price of $10.63 per share. The warrants are exercisable until August 2, 2009, or five years from an initial public offering by the Company, whichever is earlier.

In 2000, the Company issued warrants to a lessor to purchase 11,764 shares of Series D redeemable convertible preferred stock at an exercise price of $10.63 per share and 11,851 shares of Series D redeemable convertible preferred stock at an exercise price of $33.75 per share. The warrants are exercisable until April 25, 2010, or five years from an initial public offering by the Company, whichever is shorter.

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

8. Stockholders' Equity (Continued)

During 2003, all of these outstanding Series B convertible preferred stock warrants and Series D redeemable convertible preferred stock warrants were converted into common stock warrants to purchase 6,315, 1,094, 41,056 and 41,362 shares, respectively, of the Company's common stock, at prices of $9.63, $11.63, $3.00 and $9.63 per share, respectively. In June 2009, all four warrants were net exercised in full using a cashless exercise feature, for 69,116 shares of common stock.

During June 2003, in connection with a past financing agreement, the Company issued a warrant to purchase 88,691 shares of Series A convertible preferred stock with an exercise price of $1.00 per share. In connection with the Company's initial public offering, the warrant was converted into a warrant to purchase 88,691 shares of common stock and the expiration date of the warrant was automatically extended until May 2013. At June 30, 2009, the warrant for 88,691 shares of common stock remains outstanding.

In March 2007, the Company issued a warrant to purchase 3,541 shares of common stock at an exercise price of $4.88 per share to a contractor. The warrant is exercisable through March 4, 2017, a liquidation event, or the consummation of an initial public offering by the Company, whichever is earlier. The fair value of the warrant based on the Black-Scholes valuation model (using a 50% volatility factor, 10 year expected life, exercise price of $4.88, 0% dividend yield and 4.51% risk-free interest rate) was $11,000 which was reflected as general and administrative expense in the year ended December 31, 2007. Upon the completion of the Company's initial public offering, this warrant expired unexercised.

9. Income Taxes

The Company accounts for income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and income tax bases of assets and liabilities, and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse.

The Company's provisions for income taxes are as follows:

	Years Ended December 31,		
	2006	2007	2008
Current tax expense:			
Federal	$ 78,000	$ 94,000	$ 161,000
State	9,000	34,000	400,000
Foreign	89,000	121,000	273,000
Total current tax expense	176,000	249,000	834,000
Deferred tax expense:			
Federal		(7,876,000)	1,496,000
State		(1,494,000)	(212,000)
Foreign			
Total deferred tax expense		(9,370,000)	1,284,000
Total income tax provision	$176,000	$(9,121,000)	$2,118,000

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

9. Income Taxes (Continued)

The difference between the actual rate and the federal statutory rate was as follows:

	Years Ended December 31,		
	2006	2007	2008
Tax at federal statutory rate	34.0%	34.0%	34.0%
State tax, net of federal benefit	26.2	145.7	11.2
Foreign rate differential	145.3	12.4	1.4
Stock-based compensation	59.0	1164.2	98.4
Other	27.7	28.4	32.2
Valuation allowance	(248.0)	(12,643.6)	16.7
Effective tax rate	44.2%	(11,259.0)	193.9%

As of December 31, 2007 and 2008 the Company had net deferred tax assets before valuation allowance of approximately $9,586,000 and $8,484,000, respectively. Realization of the deferred tax assets is dependent upon future taxable income, if any, the amount and timing of which are uncertain. Management evaluates the recoverability of deferred tax assets and the level of the valuation allowance in light of this uncertainty and had established a valuation allowance in an amount equal to the deferred tax assets at December 31, 2006. During the fourth quarter of 2007, management determined that it is more likely than not that the deferred tax assets will be realizable, based on the Company's earnings history and its projected future U.S. taxable income, and therefore the valuation allowance was substantially removed. A full valuation allowance for foreign tax credits in the amount of $131,000 and $313,000 was put in place at December 31, 2007 and 2008, respectively. The net valuation allowance decreased by approximately $10,326,000 during the year ended December 31, 2007 and increased $182,000 during the year ended December 31, 2008.

The components of the Company's net deferred tax assets for federal and state income taxes at December 31 are as follows:

	2007	2008
Deferred tax assets:		
Net operating loss carryforwards	$ 6,606,000	$ 4,313,000
Deferred revenue	1,647,000	1,516,000
Dining rewards points		1,736,000
Accruals and reserves not currently deductible	1,565,000	1,715,000
Tax credits	348,000	628,000
Other	267,000	(1,000)
Total deferred tax assets	10,433,000	9,907,000
Deferred tax liabilities:		
Basis difference in fixed assets	(405,000)	(968,000)
State taxes	(442,000)	(455,000)
Total deferred tax liabilities	(847,000)	(1,423,000)
Net deferred tax assets before valuation allowance	9,586,000	8,484,000
Valuation allowance	(131,000)	(313,000)
Net deferred tax asset	$ 9,455,000	$ 8,171,000

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

9. Income Taxes (Continued)

At December 31, 2008, the Company had federal and state net operating loss carryforwards of approximately $10,373,000 and $9,818,000, respectively. The federal net operating losses will begin to expire in 2023. The state net operating losses will begin to expire in 2009. Utilization of the net operating loss carryforwards are subject to limitation due to the ownership change limitations provided by the Internal Revenue Code of 1986, as amended and similar state provisions. The Company has performed detailed analyses for purposes of Section 382 and determined an ownership change occurred in February 2003. Applicable limitations have been incorporated and some net operating losses will not be available. At December 31, 2008, the Company had federal minimum tax credits of $315,000 which have no expiration date. The Company also has foreign tax credits of approximately $313,000 which begin to expire in 2016.

The Company has deferred calculating U.S. income tax on certain foreign earnings that are deemed to be permanently reinvested overseas. Determination of the unrecognized deferred tax liability is not currently practical and the amount is not expected to be material.

Effective January 1, 2007, the Company adopted FIN No. 48. FIN No. 48 prescribes the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. The Company did not recognize any material net adjustment in its liability for unrecognized income tax benefits upon adoption of FIN No. 48, including any amounts for interest and penalties.

Unrecognized tax benefits on January 1, 2007 totaled $14,879,000. There was no change in unrecognized tax benefits during 2007. Unrecognized tax benefits on January 1, 2008 totaled $14,879,000. Additions based on tax positions related to the current year total $141,000. There were no reductions for tax positions related to prior years. Thus, unrecognized tax benefits at December 31, 2008 totaled $15,020,000.

In the event that any unrecognized tax benefits are recognized, the effective tax rate will be affected. Approximately $14,185,000 and $14,327,000 unrecognized tax benefit would impact the effective tax rate at December 31, 2007 and 2008, respectively, if recognized. The Company's policy is to classify interest accrued or penalties related to unrecognized tax benefits as a component of income tax expense. No such interest or penalties have been recorded to date for unrecognized tax benefits. The Company accrued approximately $15,000 and $39,000 for the payment of interest and penalties for other filings at December 31, 2007 and 2008, respectively.

All tax years remain open to examination by major taxing jurisdictions to which the Company is subject. The Company files a federal and many state returns. The Company does not anticipate significant changes to its uncertain tax positions through the next fiscal year.

10. Employee Benefit Plan

In 1999, the Company adopted a defined contribution plan that is intended to qualify under section 401(k) of the Internal Revenue Code. The 401(k) plan provides retirement benefits for eligible employees. The 401(k) plan stipulates that eligible employees may elect to contribute to it upon date of hire. The Company began matching employee contributions under the terms of the 401(k) plan in 2007. Matching contributions totaled $82,000, $99,000 and $87,000 for the years ended 2007 and 2008 and the six months ended June 30, 2009, respectively. No matching contributions were made during 2006.

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

11. Related Party Transactions

Compensation payments for contracting work were made to one of the members of the board of directors in the amount of $81,000, which the Company believes is the fair value of the services received for the year ended December 31, 2006. No amounts were paid in 2007 or 2008.

The Company paid a total of $5,000 and $0 to three members of the board of directors for reimbursable expenses incurred during the year ended December 31, 2008 and the six months ended June 30, 2009. There were no amounts incurred in 2006 or 2007.

12. Segment Information

The Company has concluded that it operates in one industry online reservations and guest management solutions. The Company has two reportable segments: North America and International, as defined by SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. Reportable segments have been identified based on how management makes operating decisions, assesses performance and allocates resources. The chief executive officer acts as the chief operating decision maker on behalf of both segments. Management reviews asset information on a global basis, not by segment.

Summarized financial information concerning the reportable segments is as follows:

	North America Segment(1)	International Segment	Total Consolidated
Year ended December 31, 2006			
Revenues subscription	$15,014,000	$ 440,000	$15,454,000
Revenues reservations	10,605,000	59,000	10,664,000
Revenues installation and other	1,035,000	15,000	1,050,000
Income (loss) from operations	3,106,000	(3,157,000)	(51,000)
Interest income	424,000	2,000	426,000

YEARS ENDED DECEMBER 31, 2006, 2007 AND 2008, AND THE SIX MONTHS ENDED JUNE 30, 2008 AND 2009 (UNAUDITED)

13. Subsequent Events (unaudited)

On January 21, 2009, the Board approved the filing of a registration statement with the Securities and Exchange Commission for an initial public offering of the Company's common stock.

On May 1, 2009, the Board approved a 1-for-12.5 reverse stock split of the Company's common stock and preferred stock which became effective immediately prior to the effectiveness of the Company's initial public offering. All shares and per share information referenced throughout the consolidated financial statements have been retroactively adjusted to reflect this stock split.

On May 1, 2009, the Board approved the 2009 Equity Incentive Award Plan. A total of 1,240,104 shares of common stock, subject to increase on an annual basis, were reserved for future issuance under the plan, which became effective upon the completion of the Company's planned initial public offering.

On May 12, 2009, a patent infringement lawsuit was filed against the Company by Mount Hamilton Partners, LLC ("Mount Hamilton"). Mount Hamilton seeks damages and injunctive relief. If an injunction is granted, it could force the Company to stop or alter certain of its business activities, such as certain aspects of its points-based loyalty program. The Company believes it has substantial and meritorious defenses to these claims and intends to vigorously defend its position. The Company is not currently able to estimate the loss, if any, that may result from this claim.

On May 21, 2009, the Company completed its initial public offering whereby the Company sold 2,022,684 shares of common stock for a price of $20.00 per share. As part of the offering 1,427,316 shares were also sold by existing shareholders at a price of $20.00 per share. Approximately $5.8 million in offering costs were incurred and have been deducted from additional paid-in capital.

Also in connection with the initial public offering, the Board approved an amendment to the Articles of Incorporation increasing the authorized common stock to 100,000,000 and authorizing undesignated preferred stock of 5,000,000 shares with a par value of $0.0001 per share.

The Company has evaluated subsequent events through August 26, 2009.

Item 13. Other Expenses of Issuance and Distribution

The following table sets forth the costs and expenses, other than underwriting discounts and commissions, payable in connection with the sale and distribution of the securities being registered. All amounts are estimated except the SEC registration fee and the FINRA filing fee. Except as otherwise noted, all the expenses below will be paid by OpenTable, Inc.

Item	Amount
SEC Registration fee	$
FINRA filing fee	
Legal fees and expenses	
Accounting fees and expenses	
Printing and engraving expenses	
Transfer Agent and Registrar fees	
Blue Sky fees and expenses	
Directors and Officers Insurance	
Miscellaneous Fees and expenses	
Total	$

Item 14. Indemnification of Directors and Officers

Section 145 of the Delaware General Corporation Law authorizes a court to award, or a corporation's board of directors to grant, indemnity to directors and officers in terms sufficiently broad to permit such indemnification under certain circumstances for liabilities, including reimbursement for expenses incurred, arising under the Securities Act of 1933, as amended. Our amended and restated certificate of incorporation provides for indemnification of our directors, officers, employees and other agents to the maximum extent permitted by the Delaware General Corporation Law, and our amended and restated bylaws provide for indemnification of our directors, officers, employees and other agents to the maximum extent permitted by the Delaware General Corporation Law. In addition, we have entered into indemnification agreements with our directors, officers and some employees containing provisions which are in some respects broader than the specific indemnification provisions contained in the Delaware General Corporation Law. The indemnification agreements may require us, among other things, to indemnify our directors against certain liabilities that may arise by reason of their status or service as directors and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. Reference is also made to Section 6 of the purchase agreement to be filed as Exhibit 1.1 hereto, which provides for indemnification by the underwriter of our officers and directors against certain liabilities.

Item 15. Recent Sales of Unregistered Securities

During the last three years, Opentable, Inc. made sales of the following unregistered securities:

1. On March 5, 2007, we issued a warrant to purchase an aggregate of 3,541 shares of our common stock at an exercise price of $4.88 per share to a consultant. The warrant was terminated upon the consummation of our IPO.

2. Since June 30, 2006, we have granted stock options to purchase an aggregate of 3,167,161 shares of our common stock at exercise prices ranging from $1.50 to $23.38 per share to a total of 326 employees, consultants and directors under our 1999 Stock Plan.

Table of Contents

3. Since June 30, 2006, we have issued and sold an aggregate of 1,267,338 shares of our common stock to employees, consultants and directors at prices ranging from $0.10 to $7.75 per share pursuant to exercises of options granted under our 1999 Stock Plan.

Unless otherwise stated, the sales of the above securities were deemed to be exempt from registration under the Securities Act in reliance upon Section 4(2) of the Securities Act or Regulation D or Regulation S promulgated thereunder, or Rule 701 promulgated under Section 3(b) of the Securities Act as transactions by an issuer not involving any public offering or pursuant to benefit plans and contracts relating to compensation as provided under Rule 701. The recipients of the securities in each of these transactions represented their intentions to acquire the securities for investment only and not with a view to or for sale in connection with any distribution thereof, and appropriate legends were placed upon the stock certificates issued in these transactions. All recipients had adequate access, through their relationships with OpenTable, Inc., to information about OpenTable, Inc.

Item 17. Undertakings

Insofar as indemnification for liabilities arising under the Securities Act may be permitted as to directors, officers and controlling persons of the registrant pursuant to the provisions described in Item 14, or otherwise, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned registrant hereby undertakes that:

(1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus as filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus

filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(2) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.
