Various inputs are used in determining the value of the fund's investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below.

Level 1 - unadjusted quoted prices in active markets for identical investments.

Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - significant unobservable inputs (including the fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of June 30, 2011 in valuing the fund's investments:

	Level 1 - Unadjusted	Level 2 - Other	Level 3

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund's financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

Portfolio valuation: Investments in securities excluding short-term investments (other than U.S. Treasury Bills), swaps and forward foreign currency exchange contracts (forward contracts) are valued each business day by an independent pricing service (the Service) approved by the Board of Trustees. Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Other investments (which constitute a majority of the portfolio securities) are valued as determined by the Service, based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Restricted securities, as well as securities or other assets for which recent market quotations are not readily available and are not valued by a pricing service approved by the Board of Trustees, or are determined by the fund not to reflect accurately fair value, are valued at fair value as determined in good faith under the direction of the Board of Trustees. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold and public trading in similar securities of the issuer or comparable issuers. Short-term investments, excluding U.S. Treasury Bills, are carried at amortized cost, which approximates market value. Registered investment companies that are not traded on an exchange are valued at their net asset value. Investments in swap transactions are valued each business day by a pricing service approved by the Board of Trustees. Swaps are valued by the service by using a swap pricing model which incorporates among other

factors, default probabilities, recovery rates, credit curves of the underlying issuer and swap spreads on interest rates. Investments denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange. Forward contracts are valued at the forward rate.

Forward Foreign Currency Exchange Contracts: The fund enters into forward contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to settle foreign currency transactions or as a part of its investment strategy.

When executing forward contracts, the fund is obligated to buy or sell a foreign currency at a specified rate on a certain date in the future. With respect to sales of forward contracts, the fund incurs a loss if the value of the contract increases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract decreases between those dates. With respect to purchases of forward contracts, the fund incurs a loss if the value of the contract decreases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract increases between those dates. Any realized gain or loss which occurred during the period is reflected in the Statement of Operations. The fund is exposed to foreign currency risk as a result of changes in value of underlying financial instruments. The fund is also exposed to credit risk associated with counterparty nonperformance on these forward contracts, which is typically limited to the unrealized gain on each open contract.

Swaps: The fund enters into swap agreements to exchange the interest rate on, or return generated by, one nominal instrument for the return generated by another nominal instrument. The fund enters into these agreements to hedge certain market or interest rate risks, to manage the interest rate sensitivity (sometimes called duration) of fixed income securities, to provide a substitute for purchasing or selling particular securities or to increase potential returns.

The fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation (depreciation) on swap contracts in the Statement of Assets and Liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain (loss) on swaps, in addition to realized gain (loss) recorded upon the termination of

swaps contracts in the Statement of Operations. Upfront payments made and/or received by the fund, are recorded as an asset and/or liability in the Statement of Assets and Liabilities and are recorded as a realized gain or loss ratably over the contract's term/event with the exception of forward starting interest rate swaps which are recorded as realized gains or losses on the termination date. Fluctuations in the value of swap contracts are recorded for financial statement purposes as unrealized appreciation or depreciation on swap transactions.

Credit Default Swaps: Credit default swaps involve commitments to pay a fixed interest rate in exchange for payment if a credit event affecting a third party (the referenced company, obligation or index) occurs. Credit events may include a failure to pay interest or principal, bankruptcy, or restructuring. The fund enters into these agreements to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. For those credit default swaps in which the fund is paying a fixed rate, the fund is buying credit protection on the instrument. In the event of a credit event, the fund would receive the full notional amount for the reference obligation. For those credit default swaps in which the fund is receiving a fixed rate, the fund is selling credit protection on the underlying instrument. The maximum payouts for these contracts are limited to the notional amount of each swap. Credit default swaps may involve greater risks than if the fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

The maximum potential amount of future payments (undiscounted) that a fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement which may exceed the amount of unrealized appreciation or depreciation reflected in the Statement of Assets and Liabilities. Notional amounts of all credit default

swap agreements are disclosed in the following chart, which summarizes open credit default swaps on index issues entered into by the fund. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, underlying securities comprising the referenced index, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the fund for the same referenced entity or entities.

GAAP requires disclosure for (i) the nature and terms of the credit derivative, reasons for entering into the credit derivative, the events or circumstances that would require the seller to perform under the credit derivative, and the current status of the payment/performance risk of the credit derivative, (ii) the maximum potential amount of future payments (undiscounted) the seller could be required to make under the credit derivative, (iii) the fair value of the credit derivative, and (iv) the nature of any recourse provisions and assets held either as collateral or by third parties.

Additional investment related disclosures are hereby incorporated by reference to the annual and semi-annual reports previously filed with the Securities and Exchange Commission on Form N-CSR.

Item 2. Controls and Procedures.

(a) The Registrant's principal executive and principal financial officers have concluded, based on their evaluation of the Registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the Registrant's disclosure controls and procedures are reasonably designed to ensure that information required to be disclosed by the Registrant on Form N-Q is recorded, processed, summarized and reported within the required time periods and that information required to be disclosed by the Registrant in the reports that it files or submits on Form N-Q is accumulated and communicated to the Registrant's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) There were no changes to the Registrant's internal control over financial reporting that occurred during the Registrant's most recently ended fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

(a) Certifications of principal executive and principal financial officers as required by Rule 30a-2(a) under the Investment Company Act of 1940.

FORM N-Q

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.
