(1) Basis of Presentation: The accompanying financial statements of Advanced 3-D Ultrasound Services, Inc. (the Company) have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and item 310(b) of Regulation S-B. adjustments (consisting of normal required adjustments) considered necessary for a fair presentation have been included.

Operating results for the three-month period ended March 31, 2004, are not necessarily indicative of the results that may be expected for the year ending December 31, 2004. For further information, refer to the financial statements and footnotes included in the Company's annual report of Form 10-KSB for the year ended December 31, 2003.

Net loss per common share is computed in accordance with the requirements of Statement of Financial Accounting Standards No. 128 (SFAS 128). SFAS 128 requires net loss per share information to be computed using a simple weighted average of common shares outstanding during the periods presented. In computing diluted loss per share, warrants exercisable into common shares were excluded because the effect is antidilutive.

(2) Stock Transactions: During the three months ended March 31, 2004, the Company sold 16,000 shares of common stock for cash of \$80,000. During the three months ended March 31, 2003, the Company sold 9,500 shares of common stock for cash of \$57,000. On February 1, 2003, the Company entered into a consulting agreement with an individual to investigate a potential business opportunity for a period of ninety days. In exchange for services, the consultant received \$10,000 and 2,500 common shares. The Company recognized an expense of \$15,000 related to the shares issued which represents the market value of the shares.

Item 2. Management's Discussion and Analysis or Plan of Operation

PLAN OF OPERATION

The Company's plans include developing a profitable business in 3-D fetal photography. On February 1, 2003, the Company entered into a consulting agreement with an individual to investigate this potential business opportunity for a period of ninety days. In exchange for these services, the consultant received \$10,000 and 2,500 common shares. Currently the Company is actively pursuing the business of 3-D fetal photography. 3-D fetal photography provides clear color photographs of an unborn child. The Company believes recent improvements make this technology practical and desired by parents. In response to the Company's decision to pursue this business venture, the Company received shareholder approval to pursue this venture and therefore changed its name to Advanced 3-D Ultrasound Services, Inc. at its shareholders meeting on May 2, 2003.

The Company is currently working on the business model for a 3-D fetal photography center and a marketing plan for the first center. The Company is investigating potential leases for the first center, determined the design of such space and has negotiated with vendors to provide equipment. The Company is also pursuing trademark protection. The Company is currently working on a business and marketing plan. The Company has launched a web site to educate consumers on the opportunity for 3-D photographs of their baby. The website address is www.3dbabyphotos.com. The web site is in its early stages but it displays example images and answers questions about the service and provides general information about 3-D fetal photography. Lastly, the Company has entered into a lease for its corporate offices. The lease is an operating lease for six months and it commenced March 18, 2004. The total rent for the six months is \$3,600.

The Company's plans to develop a profitable 3-D fetal photography business will require additional funds.

The Company adopted a subscription agreement to raise \$300,000 of which \$200,000 was to be used for fetal photography development and \$100,000 for working capital. From September 2002 through December 2002, the Company received

Edgar Filing: YSEEK INC - Form 10QSB

\$138,730 from sales of common stock, of which \$35,000 was from one of the new officers who is a major stockholder. This initial funding was used primarily to pay off debts and to fund minimal administrative costs. In 2003, the Company received \$164,300 from sales of common stock. This funding was used to fund administrative costs and to fund the consulting agreement noted in a preceding paragraph. The Company plans to fund its near-term operations through additional sales of common stock.

In January 2004, the Company issued a private placement memorandum to issue up to 1,000,000 common shares at \$5.00 per share to raise up to \$5,000,000 to develop and operate imaging centers to provide ultrasound pictures of fetuses. These centers will be for elective, non-diagnostic purposes and will be located in commercial office parks, malls and shopping centers. The funds raised will be used for development costs, equipment, salaries, marketing and future public offering costs.

In the first quarter of 2004, the Company received \$80,000 from sales of common stock. Approximately half of this funding has been used for administrative costs and the balance is in cash.
