On April 6, 2005, Inverness Medical Innovations (the Company) entered into a binding settlement agreement of its pending litigation with Princeton BioMeditech Corporation (PBM). The settlement includes an agreement with PBM to form a joint venture pursuant to which both companies will make all their sales of existing drugs of abuse products (excluding sales to hospitals) (the New Joint Venture). All products sold by the New Joint Venture will be manufactured by PBM. The New Joint Venture will be owned equally by PBM and the Company and profits will be distributed in proportion to the trailing 12 month sales of products contributed to the venture.

The Company paid \$1.25 million to PBM on April 7, 2005 and will pay PBM another \$1.25 million by April 18, 2005 in resolution of all pending litigation between the companies, which will be dismissed without prejudice, but with both parties agreeing to certain limits on their ability to recommence litigation. PBM also receives an option to permanently settle with prejudice certain claims relating to the Company's acquisition of ABI in 2003 that are not part of any pending case in exchange for \$1.75 million of collaborative R&D funding from the Company. The parties also exchanged limited, non-transferable covenants not to sue the other for infringement of existing intellectual property and the parties have agreed to certain other terms and conditions relating to the use and enforcement of intellectual property owned by a previously existing joint venture between them.

The Company will record other expense of \$4.25 million in its first quarter of 2005 results of operations as a result of the settlements described above.
