\* Definition of AIFRS cash earnings under review

[LOGO]

**Pro- forma cash earnings under AIFRS**

Indicative impact of a reduction of \$8 million driven largely by recognition of expense for share based payments of \$66 million, offset by a decrease in pension expense of \$36 million, together with a number of other small adjustments.

These numbers will form the basis of comparatives within 2006 results.

Definition of AIFRS cash earnings under review. For the purposes of this slide this excludes the impact of Treasury shares (movement in value of Wealth Management trusts holdings in NAB own shares).

Excludes impact of AIFRS standards that do not apply until 1 October 2005 onwards.

Primary area of impact from 1 October 2005 is Financial Instruments standard AASB 139. This covers loan loss provisioning and hedging. This is likely to give rise to increased volatility in cash earnings going forward.

Global growth strong

Growth underpinned by US, China and India

Inflationary concerns remain

## **Economic outlook**

### **Economic environment to soften in our key market:**

Overall, sustained income and credit growth, albeit at a bit slower. Slightly higher unemployment & inflation. Monetary conditions remain about neutral .

2005/06 GDP growth is forecast to be 3% in Australia, 2.5% in the UK & 2.2% in NZ

In Australia, some moderation in domestic activity (largely household spending) offset by a pick up in exports.

In NZ, domestic conditions are forecast to moderate significantly during the next year, due to tighter financial conditions & slower immigration.

In the UK, business activity is expected to ease back to trend reflecting some moderation in household spending & external demand.

<b>Real GDP</b>	2.3	2.8	3.1
<b>System Credit</b>	13.3	10.3	8.8

<b>Other Personal</b>	11.4	9.7	9.2
<b>Business Credit</b>	12.0	8.8	5.6

**Macro risks to outlook estimates**

**Geo politics** - Both political, oil & trade tensions overhang the outlook.

**Unbalanced global growth** Much still depends on the US & Asia. Continental Europe continues to lag.

**Australia, New Zealand and UK household leverage** Increased household gearing, low savings and expensive housing leaves some consumers vulnerable to higher interest rates & sustained loss of jobs.

**Financial instability** As interest rates rise to more normal levels, some asset valuations may become volatile & lead to instability amongst investors and institutions.

**Oil prices** - Sustained high prices would prove a headwind to the global recovery under way.

**Bird flu** Likely to be contained, albeit watch for human pandemic.
