QUOTIENT TECHNOLOGY INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Description of Business

Quotient Technology Inc. (“Quotient” or, the “Company”), is a provider of an industry leading digital platform that enables consumer packaged goods (“CPG”) brands and retailers to engage shoppers through personalized and targeted promotions and media. Through our platform, CPGs and retailers are able to use online and in-store point-of-sale (POS) shopper data and analytics to drive sales with improved efficiency, as compared to traditional offline promotional and advertising vehicles.

2. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) and applicable rules and regulations of the Securities and Exchange Commission (“SEC”) regarding interim financial reporting. Certain information and note disclosures normally included in the financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. As such, the information included in this Quarterly Report on Form 10-Q should be read in conjunction with the audited consolidated financial statements and accompanying notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

The Company’s condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated. Certain prior period balances have been reclassified to conform to the current period’s presentation. The accompanying unaudited condensed consolidated financial statements reflect all normal recurring adjustments necessary to present fairly the financial position, results of operations, comprehensive loss, and cash flows for the interim periods, but are not necessarily indicative of the results of operations to be anticipated for the full year ending December 31, 2017 or for any other period.

There have been no changes to the Company’s significant accounting policies described in the Annual Report on Form 10-K that have had a material impact on its condensed consolidated financial statements and related notes, except for Company electing to change its accounting policy to account for forfeitures as they occur. The change was applied on a modified retrospective basis with a cumulative effect adjustment of \$3.4 million recorded to accumulated deficit balance as of January 1, 2017.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported and disclosed in the Company’s condensed consolidated financial statements and accompanying notes. Such management estimates include, but are not limited to, revenue recognition, collectability of accounts receivable, recoverability of non-refundable distribution fees, the valuation and useful lives of intangible assets and property and equipment, goodwill, stock-based compensation, contingent consideration and

income taxes. Actual results may differ from the Company's estimates, and such differences may be material to the accompanying condensed consolidated financial statements.

Recently Issued Accounting Pronouncements

Accounting Pronouncements Not Yet Adopted

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") 2014-09, Revenue from Contracts with Customers (Topic 606). In addition, the FASB issued subsequent ASUs, which serve to clarify certain aspects of ASU 2014-09. The amendments are based on the principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additionally, the standard requires reporting companies to also disclose the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. In July 2015, the FASB agreed to delay the effective date of this amendment by one year, accordingly, the Company is required to adopt the amendments in the first quarter of 2018. The amendments may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. Early adoption is permitted, but not before the original effective date of the amendment, which was the first quarter of 2017.

The Company is continuing to evaluate the overall impact of the new standard on its accounting policies, processes, system requirements, and internal controls over financial reporting. In addition to internal resources, the Company engaged third-party service providers to assist with the evaluation. The Company has made and will continue to make investments in systems to enable timely and accurate reporting under the new standard. The Company currently anticipates adopting the standard using the modified retrospective method. While the Company is still in the process of completing its analysis on the impact the guidance will have on its consolidated financial statements, related disclosures, and internal controls over financial reporting, it does not expect the impact to be material.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The guidance requires lessees to put most leases on their balance sheets but recognize expenses on their income statements in a manner similar to today's accounting. Lessees initially recognize a lease liability for the obligation to make lease payments and a right-of-use asset for the right to use the underlying asset for the lease term. The lease liability is measured at the present value of the lease payments over the lease term. The right-of-use asset is measured at the lease liability amount, adjusted for lease prepayments, lease incentives received and the lessee's initial direct costs. The standard is effective for public business entities for annual reporting periods beginning after December 15, 2018, and interim periods within that reporting period, which is the first quarter of 2019 for the Company. Early adoption is permitted. ASU 2016-02 is required to be adopted using a modified retrospective approach. The Company is currently evaluating the impact of adopting this new accounting guidance on the consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (ASU 2016-15), which clarifies how companies present and classify certain cash receipts and cash payments in the statement of cash flows. The standard is effective for public business entities for annual reporting years beginning after December 15, 2017, and interim periods within that reporting period, which is the first quarter of 2018 for the Company. Early adoption is permitted. The Company is currently evaluating the impact of adopting this new accounting guidance on the consolidated financial statements.

Accounting Pronouncements Adopted

In March 2016, the FASB issued ASU 2016-09, Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The guidance requires all of the tax effects related to share based payments to be recorded through the income statement. The guidance also removes the present requirement to delay recognition of an excess tax benefit ("windfall tax benefit") until it reduces current taxes payable; instead it is recognized at the time of settlement, subject to normal valuation allowance consideration. While the simplification will eliminate some administrative complexities, it will increase the volatility of income tax expense. The standard was effective for the Company beginning January 1, 2017, and interim periods within that reporting period. Early adoption was permitted. The Company adopted ASU 2016-09 in the first quarter of 2017. Upon adoption, the Company elected to change its accounting policy to account for forfeitures as they occur. The change was applied on a modified retrospective basis with a cumulative effect adjustment of \$3.4 million recorded to accumulated deficit balance as of January 1, 2017. The amendments related to accounting for previously unrecognized excess tax benefits as deferred tax assets have been adopted on a modified retrospective basis with a cumulative-effect adjustment to opening retained earnings of \$25.5 million, fully offset by a valuation allowance. This adjustment resulted in no impact to retained earnings upon adoption. The amendments related to accounting for excess tax benefits have been adopted prospectively, resulting in no impact as the Company is in a net operating loss position with a full valuation allowance.

3. Fair Value Measurements

The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3—Inputs that are generally unobservable and typically reflect management’s estimate of assumptions that market participants would use in pricing the asset or liability.

8

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

The Company's fair value hierarchy for its financial assets and liabilities that are measured at fair value on a recurring basis are as follows (in thousands):

	September 30, 2017			
	Level 1	Level 2	Level 3	Total
Assets:				
Cash and cash equivalents:				
Money market funds	\$25,068	—	—	\$25,068
Certificate of deposit	—	35,092	—	35,092
Short-Term investments:				
Certificate of deposit	—	24,607	—	24,607
Total	\$25,068	\$59,699	\$—	\$84,767
Liabilities:				
Contingent consideration related to Crisp acquisition ⁽¹⁾	—	—	16,200	16,200
Contingent consideration related to Shopmium acquisition ⁽¹⁾	—	—	—	—
Total	\$—	\$—	\$16,200	\$16,200

	December 31, 2016			
	Level 1	Level 2	Level 3	Total
Assets:				
Short-Term investments:				
Certificate of deposit	—	69,172	—	69,172
Total	\$—	\$69,172	\$—	\$69,172
Liabilities:				
Contingent consideration related to Shopmium acquisition ⁽¹⁾	—	—	185	185
Total	\$—	\$—	\$185	\$185

⁽¹⁾Included in contingent consideration related to acquisitions

The valuation technique used to measure the fair value of money market funds included using quoted prices in active markets. The money market funds have a fixed net asset value (NAV) of \$1. The valuation technique to measure the fair value of certificate of deposits included using quoted prices in active markets for similar assets.

The fair value of contingent consideration related to the acquisition of Crisp Media, Inc. ("Crisp") was estimated using an option pricing method and was based on significant inputs not observable in the market, thus classified as a Level 3 instrument. The inputs include expected achievement of certain financial metrics over the contingent consideration period, historical volatility and discount rate. Refer to Note 6 for further details related to the acquisition.

The fair value of contingent consideration related to the acquisition of Shopmium S.A. ("Shopmium") was estimated using a Monte Carlo simulation and was based on significant inputs not observable in the market, thus classified as a Level 3 instrument. The inputs include the expected achievement of certain revenue and profit milestones for the years ending December 31, 2016 and 2017, historical volatility and risk-free interest rate.

The following table represents the change in the contingent consideration (in thousands):

	Three Months Ended September 30, 2017 Shopmi Level 3	September 30, 2017 Shopmi Level 3	Nine Months Ended September 30, 2017 Shopmi Level 3	Nine Months Ended September 30, 2017 Shopmi Level 3
Balance at the beginning of period	\$—	\$14,800	\$185	\$—
Addition related to acquisition	—	—	—	14,800
Change in fair value	—	1,400	(185)	1,400
Balance as of September 30, 2017	\$—	\$16,200	\$—	\$16,200

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

For the three and nine months ended September 30, 2017, the Company recorded losses of \$1.4 million and \$1.2 million, respectively, related to the changes in fair value of contingent consideration. The change in fair value of Shopmium contingent consideration is due to a decline in expected revenue and profit milestones for the years ending December 31, 2016 and 2017. The change in fair value of Crisp contingent consideration is due to an increase in expected achievement of certain financial metrics over the contingent consideration period. The changes in the fair value of the contingent consideration are included as a component of operations in the accompanying condensed consolidated statements of operations.

There were no transfers between fair value hierarchies during the three and nine months ended September 30, 2017 and 2016.

4. Allowance for Doubtful Accounts

The summary of activity in the allowance for doubtful accounts is as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Balance at the beginning of period	\$1,035	\$883	\$1,338	\$833
Additions related to Crisp acquisition	—	—	229	—
Bad debt expense (recovery)	(51)	86	(548)	237
Write-offs, net	(71)	(38)	(106)	(139)
Balance at the end of period	\$913	\$931	\$913	\$931

5. Balance Sheet Components

Property and Equipment, Net

Property and equipment consist of the following (in thousands):

	September 30, 2017	December 31, 2016
Software	\$ 32,803	\$ 32,286
Computer equipment	24,133	22,664
Leasehold improvements	8,187	8,141
Furniture and fixtures	2,354	2,296
Total	67,477	65,387
Accumulated depreciation and amortization	(55,493)	(50,249)

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

Projects in process	3,654	1,238
Property and equipment, net	\$ 15,638	\$ 16,376

Depreciation and amortization expense related to property and equipment was \$1.6 million and \$4.1 million for the three months ended September 30, 2017 and 2016, respectively, and \$5.3 million and \$12.0 million for the nine months ended September 30, 2017 and 2016, respectively.

The Company capitalized internal use software development and enhancement costs of \$1.0 million and \$0.3 million during the three months ended September 30, 2017 and 2016, respectively, and \$3.1 million and \$0.4 million during the nine months ended September 30, 2017 and 2016, respectively. During the three and nine months ended September 30, 2017, the Company had zero and \$0.6 million in amortization expense related to internal use software, included in property and equipment depreciation and amortization expense above, and recorded as cost of revenues, as compared to \$2.6 million and \$7.9 million, respectively, during the comparable period of 2016. The unamortized capitalized development and enhancement costs were \$3.7 million and \$1.2 million as of September 30, 2017 and December 31, 2016, respectively.

Accrued Compensation and Benefits

Accrued compensation and benefits consist of the following (in thousands):

	September 30, 2017	December 31, 2016
Bonus	\$ 5,164	\$ 5,985
Commissions	2,549	3,572
Vacation	1,380	1,916
Payroll and related expenses	2,718	1,729
Accrued compensation and benefits	\$ 11,811	\$ 13,202

Other Current Liabilities

Other current liabilities consist of the following (in thousands):

	September 30, 2017	December 31, 2016
Distribution fees	\$ 16,633	\$ 12,463
Marketing expenses	1,915	3,383
Prefunded Liability	1,890	1,345
Traffic Acquisition Cost	1,747	—
Other	6,654	3,673
Other current liabilities	\$ 28,839	\$ 20,864

6. Acquisitions

On May 31, 2017, the Company acquired all the outstanding shares of Crisp, a mobile marketing and advertising company, delivering shopper marketing media campaigns for CPGs and retailers. Crisp's mobile media expertise complements Quotient's proprietary shopper data, retail network and existing promotions and media offerings.

The total preliminary acquisition consideration of \$51.9 million consisted of \$24.1 million in cash, 1,177,927 shares of the Company's common stock with a fair value of \$13.0 million or \$11.00 per share, and contingent consideration of up to \$24.5 million payable in cash with a fair value of \$14.8 million. The contingent consideration payout is based on Crisp achieving certain financial metrics over a period of one year after closing and is payable within 105 days after May 31, 2018. At the date of acquisition, the contingent consideration's fair value of \$14.8 million was determined by using an option pricing method. Fair value of contingent consideration is remeasured every reporting period. Refer to Note 3 for the fair value of contingent consideration at September 30, 2017.

The Crisp acquisition provides the Company with customer relationships, developed technologies and trade names. The fair value of the customer relationships intangible asset was determined by using a discounted cash flow model.

The fair values of developed technologies and trade names intangible assets were determined by using the relief from royalty methods. The excess of the consideration paid over the fair value of the net tangible assets and identifiable intangible assets acquired is recorded as goodwill. The goodwill is attributable to expected synergies from combined operations and Crisp's knowhow.

The transaction was accounted for as a business combination. Accordingly, assets acquired and liabilities assumed were recorded at their estimated fair values as of the acquisition date. The Company expensed all transaction costs in the period in which they were incurred.

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

The following table summarizes the preliminary acquisition consideration and the related fair values of the assets acquired and liabilities assumed (in thousands):

	Net				
	Tangible				(1)
	Assets				
	Acquired/	Identifiable		Goodwill	Acquisition
Purchase	(Liabilities	Intangible		Deductible	Related
Consideration	Assumed)	Assets	Goodwill	for Taxes	Expenses
Crisp \$ 51,904	\$ 5,893	\$ 9,400	\$ 36,611	Not Deductible	\$ 1,504

(1) Expensed as general and administrative

The following sets forth each component of identifiable intangible assets acquired in connection with the Crisp acquisition (in thousands):

		Estimated Useful Life
	(in Crisp Years)	
Developed technologies	\$5,000	4.0
Customer relationships	2,800	7.0
Trade names	1,600	4.0
Total identifiable intangible assets	\$9,400	

7. Intangible Assets

Intangible assets consist of the following (in thousands):

September 30, 2017				
Gross	Accumulated	Foreign	Net	Weighted
	Amortization	Currency		Average
		Translation		Amortization
				Period

Amortization expense related to intangible assets subject to amortization was \$2.9 million and \$2.1 million during the three months ended September 30, 2017 and 2016, respectively, and \$7.9 million and \$4.3 million during the nine months ended September 30, 2017 and 2016, respectively. Estimated future amortization expense related to intangible assets as of September 30, 2017 is as follows (in thousands):

	Total
2017, remaining three months	\$2,955
2018	11,467
2019	10,379
2020	8,962
2021	7,104
2022 and beyond	8,226
Total estimated amortization expense	\$49,093

8. Stock-based Compensation

2013 Equity Incentive Plan

In October 2013, the Company adopted the 2013 Equity Incentive Plan (the “2013 Plan”), which became effective in March 2014 and serves as the successor to the Company’s 2006 Stock Plan (the “2006 Plan”). Under the 2013 Plan, the

Company may grant stock options, stock appreciation rights, restricted stock and restricted stock units, performance shares and units to employees, directors and consultants.

Stock Options

The fair value of each option was estimated on the date of grant for the period presented using the following assumptions:

	Three Months Ended		Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Expected life (in years)	6.25	6.08	5.50	2.50 - 6.08
Risk-free interest rate			1.87%	-
	1.98%	1.22%	2.14%	0.68% - 1.34%
Volatility	50%	55%	50%	55% - 70%
Dividend yield	—	—	—	—

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

The weighted-average grant-date fair value of options granted was \$5.81 and \$6.87 per share during the three months ended September 30, 2017 and 2016, respectively, and \$6.33 and \$5.25 per share during the nine months ended September 30, 2017 and 2016, respectively.

Restricted Stock Units

The fair value of restricted stock units (“RSUs”) equals the market value of the Company’s common stock on the date of the grant. The RSUs are excluded from issued and outstanding shares until they are vested.

On September 28, 2017 (the “Grant Date”), the Company granted 128,205 performance-based RSUs (“PSU Award”), under the 2013 Equity Incentive Plan, to Mir Aamir, in connection with his promotion to President and Chief Executive Officer. The PSU Award represents the right to receive shares of the Company’s common stock upon meeting certain vesting conditions which were tied to achievement of certain Company stock price goals. The fair value of the PSU Award was measured using a Monte Carlo simulation. During the three months ended September 30, 2017, the expense recognized in the consolidated financial statements related to the PSU Award was insignificant. Subsequent to September 30, 2017, the Company modified the terms of the PSU Award to provide incentives based on targets that can be directly tied to the Company’s performance. Refer to Part II – Other Information, Item 5. for further details.

A summary of the Company’s stock option and RSU award activity under the 2013 Plan is as follows:

	RSUs Outstanding			Options Outstanding			
	Shares Available for Grant	Number of Shares	Weighted Average Grant Date Fair Value	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance as of December 31, 2016	3,424,730	5,504,084	\$ 12.02	7,746,067	\$ 8.83	6.12	\$ 30,507
Increase in shares authorized	3,542,416	—	—	—	—	—	—
Options granted	(1,319,680)	—	—	1,319,680	\$ 12.76	—	—
Options exercised	—	—	—	(1,262,802)	\$ 4.01	—	\$ 9,683
Options canceled or expired	184,359	—	—	(184,359)	\$ 9.86	—	—
RSUs granted	(2,401,441)	2,401,441	\$ 11.95	—	—	—	—
RSUs vested	—	(1,774,008)	\$ 12.49	—	—	—	—
RSUs canceled or expired	684,840	(684,840)	\$ 11.45	—	—	—	—
RSUs withheld for taxes	178,748	—	—	—	—	—	—
Balance as of September 30, 2017	4,293,972	5,446,677	\$ 12.12	7,618,586	\$ 10.29	6.41	\$ 48,718
Vested and exercisable as of							
September 30, 2017				5,279,392	\$ 9.80	5.33	\$ 38,421

The aggregate intrinsic value disclosed in the table above is based on the difference between the exercise price of the options and the fair value of the Company's common stock.

The aggregate total fair value of options which vested was \$1.5 million and \$0.9 million during the three months ended September 30, 2017 and 2016, respectively, and \$5.5 million and \$2.4 million during the nine months ended September 30, 2017 and 2016, respectively.

Employee Stock Purchase Plan

Eligible employees can enroll and elect to contribute up to 15% of their base compensation through payroll withholdings in each offering period which is six months in duration, subject to certain limitations. The purchase price of the stock is the lower of 85% of the fair market value on (a) the first day of the offering period or (b) the purchase date.

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

The fair value of the option feature is estimated using the Black-Scholes model for the period presented based on the following assumptions:

	Three Months Ended		Nine Months Ended	
	September 30, 2017 2016		September 30, 2017 2016	
Expected life (in years)	0.50	0.50	0.50	0.50
Risk-free interest rate			0.62%	0.33%
	1.04%	0.38%	-	-
			1.04%	0.38%
Volatility	50%	74%	50%	72% - 74%
Dividend yield	—	—	—	—

As of September 30, 2017, a total of 642,124 shares of common stock were issued under the 2013 Employee Stock Purchase Plan (“ESPP”), since inception of the plan. As of September 30, 2017, a total of 1,757,876 shares are available for issuance under the ESPP.

Stock-based Compensation Expense

The following table sets forth the total stock-based compensation expense resulting from stock options, RSUs and ESPP included in the Company’s condensed consolidated statements of operations (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2017 2016		September 30, 2017 2016	
Cost of revenues	\$ 521	\$ 467	\$ 1,457	\$ 1,457
Sales and marketing	1,832	1,155	4,858	4,279
Research and development	1,894	1,837	5,890	5,728
General and administrative	4,233	3,269	12,097	10,183
Total stock-based compensation expense	\$8,480	\$ 6,728	\$24,302	\$21,647

As of September 30, 2017, there was \$62.9 million of unrecognized stock-based compensation expense, of which \$12.2 million is related to stock options and ESPP shares and \$50.7 million is related to RSUs. The total unrecognized stock-based compensation expense related to stock options and ESPP as of September 30, 2017 will be amortized over a weighted-average period of 2.7 years. The total unrecognized stock-based compensation expense related to RSUs as of September 30, 2017 will be amortized over a weighted-average period of 2.4 years.

During the three and nine months ended September 30, 2017, the Company capitalized \$0.2 million of stock-based compensation cost in projects in process as part of property and equipment, net on the accompanying consolidated balance sheets.

9. Common Stock Repurchase Program

The Company's Board of Directors has approved programs for it to repurchase shares of its common stock. In April 2017, the Board of Directors authorized a share repurchase program ("2017 Program") for the Company to repurchase up to \$50.0 million of its common stock. The 2017 Program has a one year duration beginning on May 5, 2017. Stock repurchases may be made from time-to-time and the timing of any repurchases and the actual number of shares repurchased will depend on a variety of factors. The Company may suspend, modify or terminate this repurchase program at any time without prior notice. During the nine months ended September 30, 2017, the Company did not repurchase any shares of its common stock. As of September 30, 2017, \$50.0 million remains available for future share repurchases under the 2017 Program.

Subsequent to September 30, 2017, the Board of Directors authorized the retirement of 9,647,708 shares of the Company's treasury stock.

10. Income Taxes

The Company recorded an income tax benefit of \$0.1 million and an income tax provision \$0.1 million during the three and nine months ended September 30, 2017, respectively, and an income tax provision of \$0.1 million and \$0.2 million during the three and nine months ended September 30, 2016, respectively. The income tax benefit for the three months

ended September 30, 2017 was primarily attributable to a net decrease in foreign profits. The income tax provision for the nine months ended September 30, 2017 was primarily attributable to foreign income taxed at non-US tax rates. The income tax provision for the three and nine months ended September 30, 2016 was primarily attributable to a net increase in deferred tax liabilities associated with the change in fair value of contingent consideration related to an acquisition and a decrease in foreign income taxed at non-US tax rates.

11. Net Loss Per Share

The computation of the Company's basic and diluted net loss per share is as follows (in thousands, except per share data):

	Three Months Ended		Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Net loss	\$(10,827)	\$(11,312)	\$(19,259)	\$(23,013)
Weighted-average number of common shares used in computing net loss per share, basic and diluted	90,492	84,732	89,000	83,484
Net loss per share, basic and diluted	\$(0.12)	\$(0.13)	\$(0.22)	\$(0.28)

The outstanding common equivalent shares excluded from the computation of the diluted net loss per share for the periods presented because including them would have been antidilutive are as follows (in thousands):

	Three and Nine Months Ended	
	September 30, 2017	September 30, 2016
Stock options and ESPP	7,770	8,287
Restricted stock units	5,447	6,017
Shares held in escrow	2,000	2,000
	15,217	16,304

12. Commitments and Contingencies

Leases

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

As of September 30, 2017, the Company's minimum payments under its non-cancelable operating and capital leases are as follows (in thousands):

	Operating Leases	Capital Leases
2017, remaining three months	\$ 1,125	\$ 12
2018	4,787	42
2019	4,506	10
2020	2,176	—
2021	805	—
2022	825	—
2023 and thereafter	1,327	—
Total minimum payments	\$ 15,551	\$ 64
Less: Amount representing interest		2
Present value of capital lease obligations		62
Less: Current portion		46
Capital lease obligation, net of current portion		\$ 16

The Company leases various office facilities, including its corporate headquarters in Mountain View, California and various sales offices, under non-cancelable operating lease agreements that expire through December 2024. In the first quarter of 2016, the Company entered into a lease agreement for an office facility located in Cincinnati, Ohio which will expire in June 2024.

The terms of the lease agreements provide for rental payments on a graduated basis. The Company recognizes rent expense on a straight-line basis over the lease periods. Additionally, the Company leases certain equipment under non-cancelable operating leases at its facilities and its leased data center operations.

Rent expense pursuant to all operating lease agreements was \$1.1 million and \$1.3 million for the three months ended September 30, 2017 and 2016, respectively, and \$3.3 million and \$3.2 million during the nine months ended September 30, 2017 and 2016, respectively.

Purchase Obligations

The Company has unconditional purchase commitments which expire through 2034 in the amount of \$6.5 million for marketing arrangements relating to the purchase of a 20-year suite license for a professional sports team which it uses for sales and marketing purposes.

The Company also has unconditional purchase commitments, primarily related to software license fees and marketing services, of \$5.7 million as of September 30, 2017.

Promissory Note

In January 2017, the Company entered into a promissory note agreement with a lender to finance the purchase of computer equipment for \$0.8 million to be paid in quarterly installments over three years. As of September 30, 2017, the Company had a remaining balance of \$0.7 million under the agreement, which is included in other current liabilities and other non-current liabilities on the condensed consolidated balance sheets.

Indemnification

In the normal course of business, to facilitate transactions related to the Company's operations, the Company indemnifies certain parties, including CPGs, advertising agencies and other third parties including retailers. The Company has agreed to hold certain parties harmless against losses arising from claims of intellectual property infringement or other liabilities relating to or arising from our products or services or other contractual infringement. The term of these indemnity provisions generally survive termination or expiration of the applicable agreement. To date, the Company has not recorded any liabilities related to these agreements.

Litigation

In the ordinary course of business, the Company may be involved in lawsuits, claims, investigations, and proceedings consisting of intellectual property, commercial, employment, and other matters. The Company records a provision for these claims when it is both probable that a liability has been incurred and the amount of the loss, or a range of the potential loss, can be reasonably estimated. These provisions are reviewed regularly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information or events pertaining to a particular case. In the event that one or more of these matters were to result in a claim against the Company, an adverse outcome, including a judgment or settlement, may cause a material adverse effect on the Company's future business, operating results, or financial condition.

The Company believes that liabilities associated with existing claims are remote, therefore the Company has not recorded any accrual for claims as of September 30, 2017 and December 31, 2016. The Company expenses legal fees

in the period in which they are incurred.

13. Employee Benefit Plan

The Company maintains a defined-contribution plan under Section 401(k) of the Internal Revenue Code. The 401(k) plan provides retirement benefits for eligible employees. Eligible employees may elect to contribute to the 401(k) plan. The Company provides a match of up to the lesser of 3% of each employee's annual salary or \$6,000, which vests fully over four years of continuous employment. The Company's matching contribution expense was \$0.4 million and \$0.3 million during the three months ended September 30, 2017 and 2016, respectively, and \$1.3 million and \$1.4 million during the nine months ended September 30, 2017 and 2016, respectively.

14. Information About Geographic Areas

Revenues generated outside of the United States were insignificant for all periods presented. Additionally, as the Company's assets are primarily located in the United States, information regarding geographical location is not presented, as such amounts are immaterial to these condensed consolidated financial statements taken as a whole.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q and with our Annual Report on Form 10-K filed on February 16, 2017 with the SEC. In addition to historical financial information, the following discussion contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934. The forward looking statements reflect our plans, estimates, beliefs and expectations that involve risks and uncertainties. Our actual results and the timing of events could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences are described in "Risk Factors" set forth in our Annual Report on Form 10-K and elsewhere in this Quarterly Report on Form 10-Q.

Overview

Quotient Technology Inc. is a provider of an industry leading digital platform that enables consumer packaged goods ("CPG") brands and retailers to engage shoppers through personalized and targeted promotions and media. Through our platform, CPGs and retailers are able to use online engagement data and in-store point-of-sale ("POS") shopper data and analytics to drive sales with improved efficiency, as compared to traditional offline promotional and advertising vehicles.

We operate our platform across a broad distribution network, reaching over 40 million shoppers at critical moments in their paths to purchase. Our network includes the website and mobile app of our flagship consumer brand, Coupons.com, as well as our other owned and operated properties, and thousands of our publisher partners. In addition, we operate our platform, Retailer iQ, on a co-branded or white label basis with our retailer partners, providing them a digital platform to directly engage with their shoppers across their websites, mobile, ecommerce, and social channels. Retailer iQ integrates with retailers' POS technology and leverages a broad set of shopper insights, including online behaviors, purchase, and purchase intent data to deliver personalized and targeted promotions and media. Retailers using Retailer iQ are primarily in the grocery, drug, dollar, club and mass merchandise channels, where most CPG products are sold.

Our network is made up of three constituents: more than 2,000 brands from approximately 700 CPGs; retailers across multiple classes of trade such as grocery, drug, dollar, club, and mass merchandise channels; and consumers visiting our web, mobile properties, social channels, as well as those of our CPGs and retailers.

The relationship between our CPGs, retailers, publishers and shoppers, has resulted in a network effect, which we believe gives us a significant competitive advantage over both offline and other online competitors. As our shopper audience increases, our platform becomes more valuable to CPGs and retailers, which, in turn, rely more heavily on our platform for their digital promotions and media. In addition, the breadth of content offered from these leading brands enables us to attract and retain more retailers, publishers and shoppers. As our network expands, we generate more shopper data and insights, which improve our ability to deliver more relevant and personalized promotions and media.

We primarily generate revenue by providing digital promotions and media solutions to our customers. Our customers include many of the leading food, beverage, drug, personal and household product manufacturers. Together, these CPG companies represent over 2,000 brands.

Our retailer partners include leading grocery, drug, dollar, club and mass merchandise retailers which distribute and accept coupons distributed through Quotient. Our retailers also include a broad range of specialty stores, including clothing, electronics, home improvement and many others which offer coupon codes through our platform.

We generate promotion revenues from digital transactions on our network. Each time a consumer activates a digital coupon on our platform we are generally paid a fee. Activation of a digital coupon can include: printing it for physical redemption at a retailer; saving it to a retailer loyalty account for automatic digital redemption; using a mobile device to scan a retailer receipt with the appropriate purchase for automatic digital redemption and cash back. As our business evolves, we will continue to experiment with different pricing models and fee arrangements with CPGs and retailers, which may impact how we monetize transactions. For example, we have recently experimented with pricing strategies based on return on investment, or ROI, some of which require us to receive fees upon redemption of digital coupons rather than activation, as further discussed below in “Risk Factors”. Promotion revenues includes coupon codes in which we are generally paid a fee when a consumer makes a purchase using a coupon code from our platform. We generally pay a distribution fee to retailers or publishers when a consumer activates a digital promotion on their website or mobile app. See Management’s Discussion and Analysis of Financial Condition and Results of Operations – “Non-GAAP Financial Measure and Key Operating Metrics” for more information.

We generate media revenue through the placement of online advertisements from CPGs and retailers that are displayed on our websites and mobile apps, as well as those of our publishers, retailers and other third parties. We also generate media revenue by leveraging our verified buyer audience reach and proprietary data to serve targeted media and measurement across the web, and mobile. We generally pay a distribution fee to select retailers or publishers when certain shopper data is used to conduct targeted media campaigns.

Seasonality

Some of the Company's products experience seasonal sales and buying patterns mirroring those in the CPG, retail, and e-commerce markets, including back-to-school and holiday campaigns, where demand increases during the second half of the Company's fiscal year. We believe that this seasonality pattern has affected, and will continue to affect, our business and the associated revenues during the first half and second half of our fiscal year. We recognized 52%, 53% and 53% of our annual revenue during the second half of 2016, 2015 and 2014, respectively.

Third Quarter 2017 Overview

Quarterly revenues of \$82.0 million in the third quarter of 2017 increased by \$15.5 million, or 23%, from revenues of \$66.5 million in the same period in 2016. Our net loss of \$10.8 million in the third quarter of 2017 decreased by \$0.5 million, as compared to the net loss of \$11.3 million in the same period in 2016. The year over year increase in our quarterly revenues primarily related to an increase in media revenue, including revenue related to Crisp, and an increase in digital promotions driven by the continued growth of Retailer iQ. The decrease in our net loss in the third quarter of 2017, as compared to the same period in 2016, was primarily the result of the growth in revenues and the benefit from the non-recurring one-time charge of \$7.4 million, recorded during the third quarter of 2016, associated with certain distribution fees under an arrangement with a retailer partner, partially offset by the change in fair value of escrowed shares and contingent consideration resulting from the Crisp acquisition, an increase in cost of revenues due to the increase in distribution fees paid to retailers and third-parties, and an increase in operating expenses including sales, marketing, general and administrative. While we continue to make important investments in our technology and infrastructure, we remain focused on operational efficiencies and expense management.

Our operating expenses may increase in the future as we continue to (1) invest in (i) research and development to enhance our platform and investments in newer product offerings including Quotient Insights; (ii) sales and marketing to acquire new CPG and retailer customers and increase revenues from our existing customers; and; (iii) corporate infrastructure; (2) incur additional general and administrative expenses associated with being a public company, including increased legal and accounting expenses, and compliance costs associated with the Sarbanes-Oxley Act; (3) amortize expenses related to intangibles assets associated with a services and data agreement and other strategic acquisitions; and (4) remeasure the fair value of shares held in escrow until released and changes in fair value of contingent consideration over the earnout periods.

Non-GAAP Financial Measure and Key Operating Metrics

Adjusted Earnings Before Income Taxes, Depreciation and Amortization ("Adjusted EBITDA"), a non-GAAP financial measure, is a key metric used by our management and our Board of Directors to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget, to develop short and long-term operational plans, and to determine bonus payouts. In particular, we believe that the exclusion of certain income and expenses in calculating Adjusted EBITDA can provide a useful measure for period-to-period comparisons of our core business. Additionally, Adjusted EBITDA is a key financial metric used by the compensation committee of our board of directors in connection with the determination of compensation for our executive officers. Accordingly, we believe that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors.

Adjusted EBITDA excludes non-cash charges, such as depreciation, amortization and stock-based compensation, because such non-cash expenses in any specific period may not directly correlate to the underlying performance of our business operations and can vary significantly between periods. Additionally, it excludes the effects of income taxes, other (income) expense net, one-time charge for certain distribution fees, change in fair value of escrowed shares and contingent consideration, net, charges related to Enterprise Resource Planning (“ERP”) software implementation costs, certain acquisition related costs and restructuring charges.

We define a “transaction” as any action that generates revenue, directly or indirectly, including per item transaction fees, set up fees, volume-based fixed fees and revenue sharing. Transactions continue to exclude retailer offers that generate no direct revenue. Transactions indirectly generate revenue when the action is not paid for on a per item basis, but is part of an agreement which generates revenue for offer services; for example, transactions after a fixed fee cap has been reached would be included in our definition. This definition of transaction does not impact the number of transactions reported in prior filings. While the number of transactions on our platform has been an important indicator of our ability to

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

grow our revenues historically, as our business continues to evolve with the shift to digital paperless and we experiment with different pricing models to monetize transactions, we believe transaction volume on our platform can become a less predictive indicator of future operating performance.

Net loss, Adjusted EBITDA and number of transactions for each of the periods presented were as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Net loss	\$(10,827)	\$(11,312)	\$(19,259)	\$(23,013)
Adjusted EBITDA	12,466	8,781	33,095	21,133
Transactions	986,671	682,106	2,575,179	1,754,145

Our use of Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not consider the potentially dilutive impact of stock-based compensation;
- Adjusted EBITDA does not reflect tax payments that may represent a reduction in cash available to us;
- Adjusted EBITDA also does not include the effects of charges related to ERP software implementation costs, one-time charge for certain distribution fees, change in fair value of escrowed shares and contingent consideration, net, other (income) expense net, income taxes, certain acquisition related costs and restructuring charges, and;
- other companies, including companies in our industry, may calculate Adjusted EBITDA differently, which reduces its usefulness as a comparative measure.

A reconciliation of Adjusted EBITDA to net loss, the most directly comparable GAAP financial measure, for each of the periods presented is as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Net loss	\$(10,827)	\$(11,312)	\$(19,259)	\$(23,013)
Adjustments:				
Stock-based compensation	8,480	6,728	24,302	21,647
Depreciation, amortization and other ⁽¹⁾	5,496	6,144	17,508	16,252
One-time charge for certain distribution fees	—	7,435	—	7,435
Change in fair value of escrowed shares and contingent consideration, net	9,700	105	11,015	(963)
Other (income) expense, net	(276)	(398)	(537)	(418)

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

Provision for (benefit from) income taxes	(107)	79	66	193
Total adjustments	\$23,293	\$20,093	\$52,354	\$44,146
Adjusted EBITDA	\$12,466	\$8,781	\$33,095	\$21,133

(1) For the three and nine months ended September 30, 2017, Other includes ERP software implementation costs related to service agreements of \$0.5 million and \$1.0 million, respectively, certain acquisition related costs of \$0.4 million and \$1.9 million, respectively, and restructuring charges of zero and \$1.3 million, respectively. Acquisition related costs primarily represent diligence, accounting, and legal expenses incurred related to the Crisp acquisition and restructuring charges relates to severance for impacted employees which we generally would not have otherwise incurred in the periods presented as part of our ongoing operations.

This non-GAAP financial measure is not intended to be considered in isolation from, as substitute for, or as superior to, the corresponding financial measure prepared in accordance with GAAP. Because of these and other limitations, Adjusted EBITDA should be considered along with GAAP based financial performance measures, including various cash flow metrics, net loss, and our other GAAP financial results.

Factors Affecting Our Performance

Obtaining high quality coupons and increasing the number of CPG-authorized activations. Our ability to grow revenue will depend upon our ability to shift more dollars to our platform from our CPG customers, continue to obtain high quality coupons and increase the number of CPG-authorized activations available through our platform. If we are unable to do these, growth in our revenue will be adversely affected.

Increasing revenue from CPGs on our platform. Our ability to grow our revenue in the future depends upon our ability to continue to increase revenues from existing CPGs on our platform through national brand coupons, targeted media and measurement, trade promotions, and increasing the number of brands that are using our platform within each CPG. As CPGs spend more on our platform, volume discounts that we offer to our existing CPGs may slow our revenue growth or reduce our revenues on a per transaction basis.

Variability in promotional spend by CPGs. Our revenues may fluctuate due to changes in promotional spending budgets of CPGs and retailers and the timing of their promotional spending. Decisions by major CPGs or retailers to delay or reduce their promotional and media spending, move campaigns, or divert spending away from digital promotions or media could slow our revenue growth or reduce our revenues.

Ability to scale Retailer iQ and further integrate with Retailers. Our ability to grow our revenues will depend upon our ability to continue to successfully implement and scale Retailer iQ among retailers. If we are unable to continue to successfully implement Retailer iQ, or if the implementation or marketing of Retailer iQ is delayed or it is not adopted and supported with sufficient resources by retailers, the growth in our revenues will be adversely affected. Our ability to grow our revenue in the future is also dependent upon our ability to further integrate digital promotions and media into retailers' loyalty or point of sale systems and other channels so that CPGs and retailers can more effectively engage consumers and drive their own sales.

Growth of our consumer selection and digital offerings. Our ability to grow our revenue in the future will depend on our ability to innovate and invest in promotion and media solutions, including Retailer iQ, Quotient Media Exchange ("QMX"), mobile solutions for consumers, including digital print, mobile solutions and digital promotion offerings for specialty/franchise retail, leverage our reach to consumers and the strength of our platform to broaden the selection and use of digital coupons by consumers, manage the transition from digital print coupons to digital paperless coupons as well as the transition from desktop to mobile platforms, and invest in emerging solutions around our data and analytic capabilities, referred to as Quotient Insights, for CPGs and retailers.

International Growth and Acquisitions. Our ability to grow our revenues will also depend on our ability to grow our operations and offerings in existing international markets and expand our business through selective acquisitions, similar to our acquisition of Crisp and Shopmium, and their integration with the core business of the company.

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

Results of Operations

The following tables set forth our consolidated results of operations and our consolidated results of operations as a percentage of revenues for the periods presented:

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017		2016		2017		2016	
Revenues	\$81,950	100.0%	\$66,470	100.0%	\$229,022	100.0%	\$199,768	100.0%
Cost of revenues	37,501	45.8%	35,126	52.8%	96,734	42.2%	85,500	42.8%

Comparison of the Three and Nine Months Ended September 30, 2017 and 2016

Revenues

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Revenues	\$81,950	\$66,470	\$15,480	23%	\$229,022	\$199,768	\$29,254	15%

Revenues for the three months ended September 30, 2017 increased by \$15.5 million, or 23%, as compared to the same period in 2016. The increase was due to growth in media revenue, including revenue related to Crisp, and digital promotions driven by the continued growth of Retailer iQ transactions. Revenues from digital promotion transactions and digital media campaigns were 71% and 29%, respectively, of total revenues for the three months ended September 30, 2017, as compared to 78% and 22%, respectively, of total revenues during the same period in 2016. Transactions during the three months ended September 30, 2017 were 986.7 million, as compared to 682.1 million during the same period in 2016.

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

Revenues for the nine months ended September 30, 2017 increased by \$29.3 million, or 15%, as compared to the same period in 2016. The increase was due to growth in digital promotions driven by the continued growth of Retailer iQ transactions and media revenue, including revenue related to Crisp. Revenues from digital promotion transactions and digital media campaigns were 76% and 24%, respectively, of total revenues for the nine months ended September 30, 2017, as compared to 77% and 23%, respectively, of total revenues during the same period in 2016. Transactions during the nine months ended September 30, 2017 were 2.6 billion, as compared to 1.8 billion during the same period in 2016.

We expect revenue growth in 2017 from deployments of Retailer iQ and the anticipated marketing campaigns as well as adoption of our platform by consumers.

Cost of Revenues and Gross Profit

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,				
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change	
Cost of revenues	\$37,501	\$35,126	\$2,375	7	% \$96,734	\$85,500	\$11,234	13	%
Gross profit	\$44,449	\$31,344	\$13,105	42	% \$132,288	\$114,268	\$18,020	16	%
Gross margin	54	% 47	%		58	% 57	%		

23

Cost of revenues for the three months ended September 30, 2017 increased by \$2.4 million, or 7%, as compared to the same period in 2016. The quarter over quarter increase was primarily due to an increase of \$9.9 million in distribution fees, attributable to a greater number of Retailer iQ transactions completed through our platform, as well as third-party services fees related to the Crisp acquisition which closed in the second quarter of 2017, an increase in data center expenses of \$1.0 million, an increase in other revenue related expenses of \$0.6 million, an increase in amortization expense of \$0.5 million related to certain exclusive rights acquired under a services and data agreement, and an increase in amortization expense of \$0.4 million related to the acquisition of Crisp. This increase was partially offset by the benefit from the non-recurring one-time charge of \$7.4 million, recorded during the third quarter of 2016, associated with certain distribution fees under an arrangement with a retailer partner and a decrease in amortization expense of \$2.6 million associated with our Retailer iQ platform.

Cost of revenues for the nine months ended September 30, 2017 increased by \$11.2 million, or 13%, as compared to the same period in 2016. The year over year increase was primarily due to an increase of \$19.9 million in distribution fees as well as third-party services fees related to the Crisp acquisition, an increase in amortization expense of \$3.5 million related to a services and data agreement, an increase in data center expenses of \$1.1 million, an increase in other revenue related expenses of \$0.6 million, an increase in amortization expense of \$0.6 million related to the acquisition of Crisp, and an increase in restructuring charges of \$0.2 million primarily related to severance for the impacted employees. This increase was partially offset by the benefit from the non-recurring one-time charge of \$7.4 million, recorded during the third quarter of 2016, associated with certain distribution fees under an arrangement with a retailer partner and a decrease in amortization expense of \$7.3 million associated with our Retailer iQ platform.

Gross margin for the three and nine months ended September 30, 2017 increased to 54%, and 58%, respectively, as compared to 47% and 57%, respectively, during the same periods in 2016, primarily due to the benefit from the non-recurring one-time charge of \$7.4 million, recorded during the third quarter of 2016, associated with certain distribution fees under an arrangement with a retailer partner. This increase was partially offset by an increase in distribution fees resulting from a greater number of Retailer iQ transactions completed through our platform, attributable to an increase in digital promotion revenues, and due to the shift in revenue mix from promotions to media campaigns.

We expect the costs associated with distribution and third-party service fees to continue to increase in the future as we continue to expand and scale our distribution network and reach, and as we continue to pursue opportunities to expand our business through selective acquisitions.

Sales and Marketing

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Sales and marketing	\$22,002	\$20,415	\$ 1,587	8 %	\$67,456	\$67,656	\$ (200)	(0)%
Percent of revenues	27 %	31 %			29 %	34 %		

Sales and marketing expenses for the three months ended September 30, 2017 increased by \$1.6 million, or 8%, as compared to the same period in 2016. The increase was primarily due an increase in salaries and related expenses of \$1.2 million and an increase in stock-based compensation of \$0.7 million, partially offset by a reduction in promotional and advertising costs of \$0.3 million resulting from our expense management efforts.

Sales and marketing expenses for the nine months ended September 30, 2017 decreased by \$0.2 million, as compared to the same period in 2016. The decrease was primarily due to a reduction in promotional and advertising costs of \$2.0 million, partially offset by an increase in salaries and related expenses of \$0.8 million and an increase in stock-based compensation of \$0.6 million, and an increase in restructuring costs of \$0.4 million primarily related to severance for the impacted employees.

We expect to continue to invest in sales and marketing in order to support our growth and business objectives, while continuing to optimize our investment in promotional and advertising activities.

Research and Development

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Research and development	\$12,255	\$12,414	\$ (159)	(1)%	\$38,149	\$38,419	\$ (270)	(1)%
Percent of revenues	15 %	19 %			17 %	19 %		

Research and development expenses for the three months ended September 30, 2017 decreased by \$0.2 million, or 1%, as compared to the same period in 2016. The decrease was primarily due to the capitalization of Quotient Insights software development costs of \$1.0 million, partially offset by an increase in salaries and related expenses of \$0.2 million, an increase in research and development support activities of \$0.5 million, and an increase in stock-based compensation expense of \$0.1 million.

Research and development expenses for the nine months ended September 30, 2017 decreased by \$0.3 million, or 1%, as compared to the same period in 2016. The decrease was primarily due to the capitalization of Quotient Insights software development costs of \$3.1 million, partially offset by an increase in research and development support activities of \$1.8 million, an increase in salaries and related expenses of \$0.4 million, an increase in restructuring costs of \$0.4 million, and an increase in stock-based compensation expense of \$0.2 million.

We believe that continued investment in technology is critical to attaining our strategic objectives. Our investment in research and development will be balanced with our continued operational and cost optimization efforts, as it provides us with the ability to invest in strategic areas, while managing growth in future periods.

General and Administrative

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
General and administrative	\$11,702	\$10,041	\$ 1,661	17 %	\$35,398	\$32,394	\$ 3,004	9 %
Percent of revenues	14 %	15 %			15 %	16 %		

General and administrative expenses for the three months ended September 30, 2017 increased by \$1.7 million, or 17%, as compared to the same period in 2016. The increase was primarily due to an increase in stock-based compensation expense of \$1.0 million, an increase in ERP software implementation costs of \$0.5 million, and an increase in certain acquisition related fees of \$0.4 million due to the Crisp acquisition, partially offset by a decrease in salaries and related expenses of \$0.2 million.

General and administrative expenses for the nine months ended September 30, 2017 increased by \$3.0 million, or 9%, as compared to the same period in 2016. The increase was primarily due to an increase in certain acquisition related fees of \$1.9 million due to the Crisp acquisition, an increase in stock-based compensation expense of \$1.9 million, an increase in ERP software implementation costs of \$1.0 million, an increase in salaries and related expenses of \$0.1 million, and an increase in restructuring costs of \$0.2 million primarily related to severance for the impacted employees, partially offset by a decrease in third party consultation services of \$1.3 million, and a decrease in allowance for doubtful accounts of \$0.8 million.

We expect to continue to incur additional general and administrative expenses in future periods as we continue to invest in corporate infrastructure and incur additional expenses associated with being a public company, including increased legal and accounting expenses, and compliance costs associated with the Sarbanes-Oxley Act.

Change in Fair Value of Escrowed Shares and Contingent Consideration

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Change in fair value of escrowed shares and contingent consideration, net	\$9,700	\$105	\$9,595	9,138 %	\$11,015	\$(963)	\$11,978	(1,244)%
Percent of revenues	12 %	0 %			5 %	(0)%		

Edgar Filing: LOUISIANA-PACIFIC CORP - Form 8-K

For the three and nine months ended September 30, 2017, we recorded an expense of \$9.7 million and \$11.0 million, respectively, due to the changes in fair value of escrowed shares and contingent consideration. During the three months ended September 30, 2017, we recorded a loss of \$8.3 million due to the increase in fair value of certain escrowed shares resulting from the increase in the Company's stock price and a loss of \$1.4 million due to the change in fair value of Crisp contingent consideration related to the increase in expected achievement of certain financial metrics over the contingent consideration period. During the nine months ended September 30, 2017, we recorded a loss of \$9.8 million due to the increase in fair value of certain escrowed shares resulting from the increase in the Company's stock price and a loss of \$1.4 million due to the change in fair value of Crisp contingent consideration, partially offset by a gain of \$0.2 million due to the change in fair value of the Shopmium contingent consideration related to a decline in expected revenue and profit milestones for the year ending December 31, 2017.

For the three and nine months ended September 30, 2016, we recorded an expense of \$0.1 million and a gain of \$1.0 million, respectively, due to the changes in fair value of escrowed shares and contingent consideration. During the three months ended September 30, 2016, we recorded a loss of \$0.2 million due to the increase in fair value of certain shares held in escrow, which was partially offset by a gain of \$0.1 million due to the change in fair value of the Shopmium contingent consideration related to a decline in expected revenue and profit milestones for the years ending December 31, 2016 and 2017. During the nine months ended September 30, 2016, we recorded a gain of \$0.9 million due to the change in fair value of Shopmium contingent consideration and a gain of \$0.3 million due to the change in fair value of Eckim contingent consideration related to a decrease in the Company's stock price when the Company and the sellers of Eckim agreed on the performance against the milestones and when the shares were issued, which was partially offset by the charge of \$0.2 million due to the increase in fair value of certain shares held in escrow related to the change in the Company's stock price.

We expect that the change in fair value of escrowed shares and contingent consideration will fluctuate as we continue to remeasure the fair values of shares held in escrow until they are released and contingent consideration is remeasured over the earnout periods.

Non-Operating Income (Expense)

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Other income (expense), net	\$276	\$398	\$ (122)	(31)%	\$537	\$418	\$ 119	28 %

The change in other income (expense), net during the three and nine months ended September 30, 2017, as compared to the same period in 2016 was due to interest income earned on short-term certificate of deposits, net of the effect of re-measuring balances in foreign currency due to exchange rate fluctuations.

Provision for (Benefit from) Income Taxes

(in thousands, except percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	2016	\$ Change	% Change	2017	2016	\$ Change	% Change
Provision for (benefit from) income taxes	\$(107)	\$79	\$ (186)	(235)%	\$66	\$193	\$ (127)	(66)%

We recorded an income tax benefit of \$0.1 million and an income tax provision \$0.1 million during the three and nine months ended September 30, 2017, respectively. The income tax benefit for the three months ended September 30,

2017 was primarily attributable to a net decrease in foreign profits. The income tax provision for the nine ended September 30, 2017 was primarily attributable to foreign income taxed at non-US tax rates. We recorded an income tax expense of \$0.1 million and \$0.2 million for the three and nine months ended September 30, 2016, respectively, primarily attributable to a net increase in deferred tax liabilities associated with the change in fair value of contingent consideration from an acquisition and a decrease in foreign income taxed at non-US tax rates.

Liquidity and Capital Resources

As of September 30, 2017, we had \$158.7 million in cash and cash equivalents and \$24.6 million in short-term investments, which were held for working capital purposes. Our cash equivalents and short-term investments are comprised primarily of money market funds and certificate of deposits. As of September 30, 2017, \$2.2 million of cash was held by our foreign subsidiaries. We do not presently anticipate a need to repatriate these funds for use in our domestic operations, but if we were to do so, any such repatriated cash and cash equivalents could be subject to U.S. income taxes, less any previously paid foreign income taxes.

In the near term, although we intend to continue to manage our operating expenses in line with our existing cash and available financial resources, we anticipate we will incur increased spending in future periods in order to execute our long-term business plan and to support our growth and the costs associated with being a public company. As a public company, we have incurred and expect to continue to incur significant legal, accounting, regulatory compliance and other costs that we did not incur in the periods prior to our IPO with higher increases in future periods as we continue to invest in corporate infrastructure and incur additional expenses associated with being a public company, including increased legal and accounting expenses, and compliance costs associated with the Sarbanes-Oxley Act. In addition, we may use cash to fund acquisitions or invest in other business, repurchase the Company's common stock under the publicly announced share repurchase program or incur capital expenditures including leasehold improvements or technologies.

Our Board of Directors has approved programs for us to repurchase shares of our common stock. In April 2017, our Board of Directors authorized a share repurchase program ("2017 Program") for us to repurchase up to \$50.0 million of the Company's common stock. The 2017 Program has a one year duration beginning on May 5, 2017. Stock repurchases may be made from time-to-time and the timing of any repurchases and the actual number of shares repurchased will depend on a variety of factors. The Company may suspend, modify or terminate this repurchase program at any time without prior notice. During the nine months ended September 30, 2017, the Company did not repurchase any shares of its common stock. As of September 30, 2017, \$50.0 million remains available for future share repurchases under the 2017 Program.

Subsequent to September 30, 2017, the Board of Directors authorized the retirement of 9,647,708 shares of the Company's treasury stock. The Company will account for the retirement of treasury stock under the par value method by allocating the excess purchase price over par of the repurchased shares between additional paid-in capital and accumulated deficit.

We believe our existing cash, cash equivalents and cash flow from operations will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months and the foreseeable future. To the extent that current and anticipated future sources of liquidity are insufficient to fund our future business activities and requirements, we may be required to seek additional equity or debt financing. In the event additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us or at all.

Cash Flows

The following table summarizes our cash flows for the periods presented (in thousands):

	Nine Months Ended	
	September 30, 2017	2016
Net cash provided by operating activities	\$29,995	\$8,975
Net cash provided by (used in) investing activities	19,134	(49,183)
Net cash provided by (used in) financing activities	3,393	(2,244)
Effects of exchange rates on cash	(32)	1
Net increase (decrease) in cash and cash equivalents	\$52,490	\$(42,451)

Operating Activities

Cash provided by operating activities is primarily influenced by the amount of cash we invest in personnel and infrastructure to support the anticipated growth of our business and the increase in our revenues. Cash provided by (used in) operating activities has typically been due to our net losses and to changes in our operating assets and liabilities.

During the nine months ended September 30, 2017, net cash provided by operating activities of \$30.0 million reflects our net loss of \$19.3 million, adjusted for net non-cash expenses of \$48.1 million, and cash provided as a result of changes in working capital of \$1.1 million. Non-cash expenses included depreciation and amortization, stock-based compensation, recovery from allowance for doubtful accounts, change in fair value of escrowed shares and contingent consideration, net, and deferred income taxes. The sources of cash from working capital items included an increase in accounts payable and other current liabilities of \$5.9 million due to the timing of services and payments and an increase in deferred revenues of \$0.7 million, partially offset by an increase in prepaid and other current assets of \$2.2 million related to prepaid subscription and support fees, an increase in accounts receivable of \$1.8 million due to timing of invoicing and collections and a decrease in accrued compensation and benefits of \$1.5 million related to the payout of the annual bonus.

During the nine months ended September 30, 2016, net cash provided by operating activities of \$9.0 million reflected our net loss of \$23.0 million, adjusted for net non-cash expenses of \$45.0 million, partially offset by cash used as a result of changes in working capital of \$13.1 million. Non-cash expenses included depreciation and amortization, stock-based compensation, one-time charge for certain distribution fees under an arrangement with a retailer partner, change in the fair value of escrowed shares and contingent consideration, loss on disposal of property and equipment, deferred income taxes and recovery from allowance for doubtful accounts. The non-cash expenses were primarily due to depreciation from capital expenditures and headcount growth, and a one-time charge for certain distribution fees under an arrangement with a retailer partner. The remaining use of cash was from the net change in working capital items, most notably a decrease in accrued compensation and benefits of \$5.2 million, an increase in accounts receivable of \$4.0 million, a decrease in accounts payable and other current liabilities of \$3.7 million, and an increase in prepaid expenses and other assets of \$0.6 million related to the timing of payments, partially offset by an increase in deferred revenues of \$0.4 million.

Investing Activities

Purchases of property and equipment may vary from period-to-period due to the timing of the expansion of our operations, the addition of headcount and the development activities related to our future offerings including Quotient Insights. We expect to continue to invest in property and equipment and in the further development and enhancement of our software platform for the foreseeable future. In addition, from time to time, we may consider potential acquisitions that would complement our existing service offerings, enhance our technical capabilities or expand our marketing and sales presence. Any future transaction of this nature could require potentially significant amounts of capital or could require us to issue our stock and dilute existing stockholders.

During the nine months ended September 30, 2017, net cash provided by investing activities of \$19.1 million, primarily reflects the proceeds from maturities of certificates of deposits of \$109.2 million, partially offset by purchases of certificates of deposits of \$64.7 million, net cash consideration paid for the Crisp acquisition of \$21.0 million, and purchases of property and equipment of \$4.4 million, which includes capitalized software development costs related to Quotient Insights, and technology hardware and software to support our growth.

During the nine months ended September 30, 2016, net cash used in investing activities of \$49.2 million, primarily reflects purchases of certificates of deposits of \$69.1 million, purchases of property and equipment of \$5.0 million that included technology hardware and software, and leasehold improvements, as well as capitalized development and enhancement costs related to Retailer iQ, partially offset by proceeds from the maturity of a certificate of deposit of \$25.0 million.

Financing Activities

During the nine months ended September 30, 2017, net cash provided by financing activities of \$3.4 million primarily reflects proceeds received from exercises of stock options under stock plans, net of shares withheld to cover the required payroll withholding taxes.

During the nine months ended September 30, 2016, net cash used in financing activities was \$2.2 million, which reflects repurchases of our common stock of \$11.8 million, partially offset by \$9.6 million of proceeds received from exercises of stock options.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of September 30, 2017.

Contractual Obligations and Commitments

Refer to Note 12 of our notes to condensed consolidated financial statements contained in this Quarterly Report on Form 10-Q for further information. There have been no significant changes outside the ordinary course of business during the three and nine months ended September 30, 2017 to our commitments and contingencies disclosed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in our Annual Report on Form 10-K for the year ended December 31, 2016 filed on February 16, 2017 with the SEC.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates.

There were no significant changes in our critical accounting policies and estimates during the three and nine months ended September 30, 2017, as compared to the critical accounting policies and estimates disclosed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in our Annual Report on Form 10-K for the year ended December 31, 2016 filed on February 16, 2017 with the SEC, except for Company electing to change its accounting policy to account for forfeitures as they occur. The change was applied on a modified retrospective basis with a cumulative effect adjustment of \$3.4 million recorded to accumulated deficit balance as of January 1, 2017.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported and disclosed in our condensed consolidated financial statements and accompanying notes. Such management estimates include, but are not limited to, revenue recognition, collectability of accounts receivable, recoverability of non-refundable prepayments, the valuation and useful lives of intangible assets and property and equipment, goodwill, stock-based compensation, contingent consideration and income taxes. Actual results may differ from the Company’s estimates, and such differences may be material to the accompanying condensed consolidated financial statements.

Recently Issued and Adopted Accounting Pronouncements

Refer to Note 2 of the Notes to Condensed Consolidated Financial Statements contained in this Form 10-Q for further information.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

During the three and nine months ended September 30, 2017, there were no significant changes to our quantitative and qualitative disclosures about market risk. Please refer to Quantitative and Qualitative Disclosures About Market Risk included in our Annual Report on Form 10-K for the year ended December 31, 2016 filed on February 16, 2017 with the SEC for a more complete discussion on the market risks we encounter.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of our “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of September 30, 2017, have concluded that our disclosure controls and procedures

were effective at the reasonable assurance level based on their evaluation of these controls and procedures.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the third quarter of 2017 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on the Effectiveness of Controls

Our disclosure controls and procedures or our internal controls are not designed to prevent all errors and all frauds. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

For a discussion of legal proceedings, see Note 12, "Commitments and Contingencies," of the Notes to Condensed Consolidated Financial Statements of this Form 10-Q.

Item 1A. Risk Factors.

Our operations and financial results are subject to various risks and uncertainties, including those described below, which could adversely affect our business, results of operations, cash flows, financial conditions, and the trading price of our common stock.

Risks Related to Our Business

We have incurred net losses since inception and we may not be able to generate sufficient revenues to achieve or subsequently maintain profitability.

We have incurred net losses of \$19.5 million and \$26.7 million in 2016 and 2015, respectively, and incurred net loss of \$19.3 million for the nine months ended September 30, 2017. We have an accumulated deficit of \$261.0 million as of September 30, 2017. We anticipate that our costs and expenses will increase in the foreseeable future as we continue to invest in:

- sales and marketing;
- research and development, including new product development;
- our technology infrastructure;
- general administration, including legal and accounting expenses related to our growth and continued expenses with respect to being a public company;
- efforts to expand into new markets; and
- strategic opportunities, including commercial relationships and acquisitions.

For example, we have incurred and expect to continue to incur expenses developing, improving, integrating, investing, marketing and maintaining our retailer platform Retailer iQ, our data and analytics platform, Quotient Insights, and our data-driven media solutions, Quotient Media Exchange or QMX, and we may not succeed in increasing our revenues sufficiently to offset these expenses.

If we are unable to gain efficiencies in our operating costs, our business could be adversely impacted. We cannot be certain that we will be able to attain or maintain profitability on a quarterly or annual basis. If we are unable to effectively manage these risks and difficulties as we encounter them, our business, financial condition and results of operations may suffer.

We may not achieve revenue growth.

We may not be able to achieve revenue growth, and we may not be able to generate sufficient revenues to achieve profitability. In addition, historically the growth rate of our business, and as a result, our revenue growth, has varied from quarter-to-quarter and year-to-year, and we expect that variability to continue. For example, our revenues may fluctuate due to changes in promotional spending budgets (including shopper marketing budgets) of CPGs and retailers and the timing of their promotional spending and we may not always be able to anticipate such fluctuations. Decisions by major CPGs or retailers to delay or reduce their promotional spending or divert spending away from digital promotions, or from our platform, or changes in our fee arrangements with CPGs and retailers, could slow our revenue growth or reduce our revenues. Additionally, as our business evolves, we will continue to experiment with different pricing models and fee arrangements with CPGs and retailers, which may impact how we monetize

transactions. For example, we have recently experimented with ROI-based pricing strategies. As we shift a greater number of our arrangements with CPGs to ROI-based pricing models, some of which require us to receive fees upon the actual redemption of digital coupons on our platform rather than activation as is generally done, our revenue growth and revenues could be harmed.

We believe that our continued revenue growth will depend on our ability to:

- increase our share of CPG spending on overall coupon and trade promotions, increase the number of brands that are using our platform within each CPG, and increase shopper marketing and media spend on our platform;
- adapt to changes in promotional spending budgets of CPGs and retailers and the timing of their promotional spending;
- further integrate, grow and maintain our digital promotions, shopper marketing and media solutions into retailers' in-store and point of sale systems and consumer channels;
- manage the transition from digital print coupons to digital paperless coupons;
- develop and deploy our data solutions in support of Retailer iQ and QMX;
- grow the number of CPGs and retailers in our current customer base and add new industry segments such as convenience, specialty/franchise retail, restaurants and entertainment;
- grow and maintain our retailer network through direct and indirect partnerships;
- expand the use by consumers of our newest digital promotion and media offerings and broaden the selection and use of digital coupons;
- manage the shift from desktop to mobile devices;
- innovate our product offerings to retain and grow our consumer base;
- obtain and increase the number of high quality coupons;
- grow the number of transactions across our platform;
 - expand the number, variety and relevance of digital coupons available on our web, mobile and social channels, as well as those of our CPGs, retailers and network of publishers;
- develop and implement our media strategies including the integration of Crisp Media;
- increase the awareness of our brands, and earn and build our reputation;
- hire, integrate and retain talented personnel;
- effectively manage scaling our operations; and
- successfully compete with existing and new competitors.

However, we cannot assure you that we will successfully accomplish any of these actions. Failure to do so could harm our business and cause our operating results to suffer.

If we fail to attract and retain CPGs, retailers and publishers and expand our relationships with them, our revenues and business will be harmed.

The success of our business depends in part on our ability to increase our share of CPG spending on overall coupons and trade promotions, increase media spending on our platform, increase the number of brands that are using our platform within each CPG, increase adoption and scale of Retailer iQ, and development and deployment of Quotient Insights and QMX. It also depends on (i) our ability to further integrate our digital promotions and media solutions into retailers' in-store and point of sale systems and consumer channels, (ii) our ability to obtain the right to distribute Retailer iQ digital promotions more broadly through our websites and mobile apps and those of our publishers, and (iii) our ability to obtain and maintain data license agreements with our retailer partners, and (iv) our retail partners' commitment in promoting our digital solutions to their customers. In addition, we must acquire new CPGs and retailers in our current customer base and add new industry segments such as convenience, specialty/franchise retail, restaurants and entertainment venues. If CPGs and retailers do not find that offering digital promotions and media on our platform enables them to reach consumers and sufficiently increase sales with the scale and effectiveness that is compelling to them, CPGs and retailers may not increase their distribution of digital promotions and media on our platform, or they may decrease them or stop offering them altogether, and new CPGs and retailers may decide not to use our platform.

For example, if CPGs decide that utilizing our platform provides a less effective means of connecting with consumers, we may not be able to increase our prices or CPGs may pay us less. Likewise, if retailers decide that our platform is less effective at increasing sales to and loyalty of existing and new consumers, retailers may demand a higher percentage of the total proceeds from each digital promotion that is activated or redeemed or demand minimum guaranteed payments. Furthermore, if existing and new retailers using Retailer iQ do not find that it increases consumer engagement and loyalty, our overall success may be harmed. In addition, we expect to face increased competition, and competitors may accept lower payments from CPGs to attract and acquire new CPGs, or provide retailers and publishers a higher distribution fee than we currently offer to attract and acquire new retailers and publishers. In addition, we may experience attrition in our CPGs, retailers and publishers in the ordinary course of business resulting from several factors, including losses to competitors, changes in CPG budgets, and decisions by CPGs, retailers and publishers to offer digital coupons through their own websites or other channels without using a third-party platform such as ours or through a competitive third party network or platform, and failure to maintain distribution agreements with third party digital promotions networks and platforms. If we are unable to retain and expand our relationships with existing CPGs, retailers and publishers or if we fail to attract new CPGs, retailers and publishers to the extent sufficient to grow our business, or if too many CPGs, retailers and publishers are unwilling to offer digital coupons and media with compelling terms through our platform, we may not increase the number of high quality coupons and marketing campaigns on our platform and our revenues, gross margin and operating results will be adversely affected.

The loss of any significant customer could materially and adversely affect our results of operations and financial condition.

Our business is exposed to risks related to customer concentration, particularly among CPGs. For the years ended December 31, 2016 and 2015, total revenue from The Procter and Gamble Company accounted for more than 10% of our total revenues. The loss of any of our significant customers or deterioration in our relations with any of them could materially and adversely affect our results of operations and financial condition.

If we are unable to grow or successfully respond to changes in the digital promotions market, our business could be harmed.

As consumer demand for digital coupons has increased, promotion spending has shifted from traditional coupons through traditional channels, such as newspapers and direct mail, to digital coupons. However, it is difficult to predict whether the pace of transition from traditional to digital coupons will continue at the same rate and whether the growth of the digital promotions market will continue. In order to expand our business, we must appeal to and attract consumers who historically have used traditional promotions to purchase goods or may prefer alternatives to our offerings, such as those of our competitors. If the demand for digital coupons does not continue to grow as we expect, or if we fail to successfully address this demand, our business will be harmed. For example, the growth of our revenues will require increasing the number of brands that are using our platform within each CPG and further integrating such digital promotions with Retailer iQ. If our projections regarding the adoption and usage of Retailer iQ by retailers, CPGs and consumers, do not occur or are slower than expected, our business, financial condition, results of operations and prospects will be harmed. A variety of factors could slow the success of Retailer iQ generally, including insufficient time, resources or funds committed by retailers to the implementation and promotion of Retailer iQ, a retailer's decision to delay or forego launching or marketing Retailer iQ, our inability to obtain sufficient data rights to maximize the functionality of Retailer iQ, Quotient Insights, or QMX, our inability to monetize enhanced Retailer iQ functionality, and our inability to efficiently integrate Retailer iQ with a retailer's system. Even if we are successful in driving the adoption and usage of Retailer iQ by retailers, CPGs and consumers, if Retailer iQ fee arrangements or transaction volumes, or the mix of offers, change or do not meet our projections, our revenues may be harmed. We expect that the market will evolve in ways which may be difficult to predict. It is also possible that digital coupon offerings generally could lose favor with CPGs, retailers or consumers. In the event of these or any other changes to the market, our continued success will depend on our ability to successfully adjust our strategy to meet the changing market dynamics. In addition, we will need to continue to grow demand for our digital promotions platform

by CPGs, retailers and consumers, including through continued innovation and implementation of new initiatives associated with the digital coupons. For example, if consumer demand for our software-free print solution or our new mobile application does not grow as we expect, our business may be harmed. If we are unable to grow or successfully respond to changes in the digital promotions market, our business could be harmed and our results of operations could be negatively impacted. For example, we are seeing a shift from digital paper coupons to digital paperless coupons. Our revenues may be harmed if we are unable to manage this transition and the growth of digital paperless coupons is slower than the decline in digital print coupons.

We expect a number of factors to cause our operating results to fluctuate on a quarterly and annual basis, which may make it difficult to predict our future performance.

Historically, our revenue growth has varied from quarter-to-quarter and year-to-year, and we expect that variability to continue. In addition, our operating costs and expenses have fluctuated in the past, and we anticipate that our costs and expenses will increase over time as we continue to invest in growing our business and incur additional costs of being a public company. Our operating results could vary significantly from quarter-to-quarter and year-to-year as a result of these and other factors, many of which are outside of our control, and as a result we have a limited ability to forecast the amount of future revenues and expenses, which may adversely affect our ability to predict financial results accurately, and our operating results may vary from quarter-to-quarter and may fall below our estimates or the expectations of public market analysts and investors. Fluctuations in our quarterly operating results may lead analysts to change their long-term models for valuing our common stock, cause us to face short-term liquidity issues, impact our ability to retain or attract key personnel or cause other unanticipated issues, all of which could cause our stock price to decline. As a result of the potential variations in our quarterly revenues and operating results, we believe that quarter-to-quarter comparisons of our revenues and operating results may not be meaningful and the results of any one quarter or historical patterns should not be considered indicative of our future sales activity, expenditure levels or performance.

In addition to other factors discussed in this section, factors that may contribute to the variability of our quarterly and annual results include:

- our ability to grow our revenues by increasing our share of CPG spending and the number of brands using our platform, including Retailer iQ, increasing media spending on our platform, further integrating with our retailers and increasing the use of retailer coupon codes by consumers, adding new CPGs and retailers to our network and growing our current consumer base and expanding into new industry segments such as convenience, specialty/franchise retail, restaurants and entertainment;
- our ability to successfully respond to changes in the digital promotions and media market and continue to grow the market and demand for our platform;
- our ability to grow consumer selection and use of our digital promotion offerings and attract new consumers to our platform;
- the amount and timing of digital promotions and marketing campaigns by CPGs, which are affected by budget cycles, economic conditions, seasonality and other factors;
- the impact of global business or macroeconomic conditions, including the resulting effects on the level of coupon and trade promotion spending by CPGs and spending by consumers;
- the impact of competitors or competitive products and services, and our ability to compete in the digital promotions market;
- our ability to obtain and increase the number of high quality coupons;
 - changes in consumer behavior with respect to digital promotions and how consumers access digital coupons and our ability to develop applications that are widely accepted and generate revenues;
- the costs of investing, maintaining and enhancing our technology infrastructure;
- the costs of developing new products and solutions and enhancements to our platform;
- our ability to manage our growth, including scaling Retailer iQ, developing and deploying Quotient Insights, and growing QMX;
- the success of our sales and marketing efforts;
- the costs of acquiring new companies which we anticipate will help us grow our business;
- the costs of successfully integrating acquired companies and employees into our operations, including cost related to the integration of Crisp Media;
- government regulation of e-commerce and m-commerce and requirements to comply with security and privacy laws and regulations affecting our business, and changes in government regulation affecting our business or our becoming subject to new government regulation;
- our ability to deal effectively with fraudulent transactions or customer disputes;

the attraction and retention of qualified employees and key personnel, which can be affected by changes in U.S. immigration policies;

33

the effectiveness of our internal controls; and
changes in accounting rules, tax laws or interpretations thereof.

The effects of these factors individually or in combination could cause our quarterly and annual operating results to fluctuate, and affect our ability to forecast those results and our ability to achieve those forecasts. As a result, comparing our operating results on a period-to-period basis may not be meaningful. You should not rely on our past results as an indication of our future performance. This variability and unpredictability could also result in our failing to meet the expectations of our investors or financial analysts for any period. We may release guidance in our quarterly earnings conference calls, quarterly earnings releases, or otherwise, based on predictions of our management, which are necessarily uncertain in nature. Our guidance may vary materially from actual results. If our revenue or operating results, or the rate of growth of our revenue or operating results, fall below the expectations of our investors or financial analysts, or below any forecasts or guidance we may provide to the market, or if the forecasts we provide to the market are below the expectations of analysts or investors, the price of our common stock could decline substantially. Such a stock price decline could occur even when we have met our own or other publicly stated revenue or earnings forecasts. Our failure to meet our own or other publicly stated revenue or earnings forecasts, or even when we meet our own forecasts but fall short of analyst or investor expectations, could cause our stock price to decline and expose us to costly lawsuits, including securities class action suits. Such litigation against us could impose substantial costs and divert our management's attention and resources.

If the distribution fees that we pay as a percentage of our revenues increase, our gross profit and business will be harmed.

When we deliver a digital coupon on a retailer's website or mobile app or through its loyalty program, or the website or mobile app of a publisher, or through our Retailer iQ platform, and the consumer takes certain actions, we pay a distribution fee to the retailer or other publisher, which, in some cases may be prepaid prior to being incurred. Such fees have increased as a percentage of our revenues in recent periods. If such fees as a percentage of our revenues continue to increase, our cost of revenues as a percentage of revenues could increase and our operating results would be adversely affected. Additionally, if the adoption and usage of Retailer iQ does not meet projections, certain prepaid distribution fees with some of the retailers will not be recoverable and the distribution fee will increase as a percentage of revenue. During the third quarter of 2016, we recorded a one-time charge associated with certain distribution fees under an arrangement with a retailer partner that were deemed unrecoverable. We considered various factors in our assessment including our historical experience with the transaction volumes through the retailer and comparative retailers, ongoing communications with the retailer to increase its marketing efforts to promote the digital platform, as well as the projected revenues, and associated revenue share payments. Accordingly, during the third quarter of 2016, we recognized a loss of \$7.4 million related to such distribution fee arrangement. At September 30, 2017 we had no prepaid non-refundable payments with our Retailer iQ partners.

If we fail to maintain and expand the use by consumers of digital coupons on our platform, our revenues and business will be harmed.

We must continue to maintain and expand the use by consumers of digital coupons in order to increase the attractiveness of our platform to CPGs and retailers and to increase revenues and achieve profitability. If consumers do not perceive that we offer a broad selection of personalized and high quality digital coupons, or that the usage of digital coupons is easy and convenient through our platform, we may not be able to attract or retain consumers on our platform. For instance, we are retiring our coupon printing software and if consumers who use that software do not move to our upgraded print solution or other products or their transition to our other products is slower than anticipated, our revenues could be adversely affected. Further, if there is increased competition for the trade promotions and marketing budgets of CPGs and retailers, the result could be increased pricing pressure. If we are unable to maintain and expand the use by consumers of digital coupons on our platform, including through our software-free print solution, updated Coupons.com mobile application and Shopmium cash back application, and do so to a greater extent than our competitors, CPGs may find that offering digital promotions on our platform does not reach consumers with the scale and effectiveness that is compelling to them. Likewise, if retailers find that using our

platform, including Retailer iQ, does not increase sales of the promoted products and consumer loyalty to the retailer to the extent they expect, then the revenues we generate may not increase to the extent we expect or may decrease. Any of these would adversely affect our operating results.

If we are not successful in responding to changes in consumer behavior and do not develop products and solutions that are widely accepted and generate revenues, our results of operations and business could be adversely affected.

The methods by which consumers access digital coupons are varied and evolving. Our platform has been designed to engage consumers at the critical moments when they are choosing the products they will buy and where they will shop. Consumers can select our digital coupons both online through web and mobile and in-store. In order for us to maintain and increase our revenues, we must be a leading provider of digital coupons in each of the forms by which consumers access them. As consumer behavior in accessing digital coupons changes and new distribution channels emerge, if we do not successfully respond and do not develop products or solutions that are widely accepted and generate revenues we may be unable to retain consumers or attract new consumers and as a result, CPGs and retailers, and our business may suffer. As another example, we are seeing a transition from digital print coupons to digital paperless coupons. If we do not manage this transition and digital print transactions decline faster than digital paperless transactions increase, our revenues may be harmed.

Consumers are increasingly using mobile devices to access our content, and if we are unsuccessful in expanding the capabilities of our digital coupon solutions for our mobile platforms to allow us to generate net revenues as effectively as our website platforms, our net revenues could decline.

Web usage and the consumption of digital content are increasingly shifting from desktop to mobile platforms such as smartphones. The growth of our business depends in part on our ability to drive engagement, activation and shopping behavior for our retailers and CPGs through these new mobile channels. Our success on mobile platforms will be dependent on our interoperability with popular mobile operating systems that we do not control, such as Android and iOS, and any changes in such systems that degrade our functionality, ease of convenience or that give preferential treatment to competitive services could adversely affect usage of our services through mobile devices.

Further, to deliver high quality mobile offerings, it is important that our platform integrates with a range of other mobile technologies, systems, networks and standards that we do not control. We may not be successful in developing relationships with key participants in the mobile industry or in developing products that operate effectively with these technologies, systems, networks or standards. If we fail to achieve success with our mobile applications and mobile website, or if we otherwise fail to deliver effective solutions to CPGs and retailers for mobile platforms and other emerging platforms, our ability to monetize these growth opportunities will be constrained, and our business, financial condition and operating results would be adversely affected.

Our success on mobile platforms will also be dependent on our ability to develop features or products that will make our mobile platform attractive to, and drive engagement by, consumers. For example, we launched an updated Coupons.com mobile application in January 2017 providing enhanced functionality and features, however, there is no guarantee that consumers will adopt our new mobile application or that it will result in increased engagement. If we fail to develop such features or products after investing in their development, our ability to monetize these growth opportunities will be constrained, and our business, financial condition and operating results would be adversely affected.

We depend in part on third-party advertising agencies as intermediaries, and if we fail to develop and maintain these relationships, our business may be harmed.

A growing portion of our business is conducted indirectly with third-party advertising agencies acting on behalf of CPGs and retailers. Third-party advertising agencies are instrumental in assisting CPGs and retailers to plan and purchase media and promotions, and each third-party advertising agency generally allocates media and promotion spend from CPGs and retailers across numerous channels. We are still developing relationships with, and do not have exclusive relationships with, third-party advertising agencies and we depend in part on third-party agencies to work with us as they embark on marketing campaigns for CPGs and retailers. While in most cases we have developed relationships directly with CPGs and retailers, we nevertheless depend in part on third-party advertising agencies to

present to their CPG and retailer clients the merits of our platform. Inaccurate descriptions of our platform by third-party advertising agencies, over whom we have no control, negative recommendations regarding use of our service offerings or failure to mention our platform at all could hurt our business. In addition, if a third-party advertising agency is disappointed with our platform on a particular campaign or generally, we risk losing the business of the CPG or retailer for whom the campaign was run, and of other CPGs and retailers represented by that agency. Since many third-party advertising agencies are affiliated with other third-party agencies in a larger corporate structure, if we fail to develop and maintain good relations with one third-party advertising agency in such an organization, we may lose business from the affiliated third-party advertising agencies as well.

Our sales could be adversely impacted by industry changes relating to the use of third-party advertising agencies. For example, if CPGs or retailers seek to bring their campaigns in-house rather than using an agency, we would need to develop direct relationships with the CPGs or retailers, which we might not be able to do and which could increase our sales and marketing expenses. Moreover, to the extent that we do not have a direct relationship with CPGs or retailers, the value we provide to CPGs and retailers may be attributed to the third-party advertising agency rather than to us, further limiting our ability to develop long-term relationships directly with CPG and retailers. CPGs and retailers may move from one third-party advertising agency to another, and we may lose the underlying business. The presence of third-party advertising agencies as intermediaries between us and the CPGs and retailers thus creates a challenge to building our own brand awareness and affinity with the CPGs and retailers that are the ultimate source of our revenues. In addition, third-party advertising agencies conducting business with us may offer their own digital promotion solutions. As such, these third-party advertising agencies are, or may become, our competitors. If they further develop their own capabilities they may be more likely to offer their own solutions to advertisers, and our ability to compete effectively could be significantly compromised and our business, financial condition and operating results could be adversely affected.

Competition presents an ongoing threat to the success of our business.

We expect competition in digital promotions to continue to increase. The market for digital promotions is competitive, fragmented and rapidly changing. We compete against a variety of companies with respect to different aspects of our business, including:

- traditional offline coupon and discount services, as well as newspapers, magazines and other traditional media companies that provide coupon promotions and discounts on products and services in free standing inserts or other forms, including Valassis Communications, Inc., News America Marketing Interactive, Inc. and Catalina Marketing Corporation;
- providers of digital coupons such as Valassis' Redplum.com, Catalina Marketing Corporation's Cellfire, News America Marketing's SmartSource., Inmar, You Technology, and companies that offer coupon codes such as RetailMeNot, Inc., Groupon, Inc., Exponential Interactive, Inc.'s TechBargains.com, Savings.com, Inc and Ebates Performance Marketing, Inc., companies that offer cash back solutions such as iBotta, Inc., and News America Marketing's Checkout 51, and companies providing other e-commerce based services that allow consumers to obtain direct or indirect discounts on purchases;
- Internet sites and blogs that are focused on specific communities or interests that offer coupons or discount arrangements related to such communities or interests;
- companies offering online and marketing services to retailers and CPGs, such as MyWebGrocer, Inc. and Flipp Corp.; and
- companies offering media services, such as Triad Media Inc. and Rich Relevance, Inc.

We believe the principal factors that generally determine a company's competitive advantage in our market include the following:

- scale and effectiveness of reach in connecting CPGs and retailers to consumers in a digital manner, through web, mobile and other online properties;
- ability to attract consumers to use digital coupons delivered by it;
- platform security, scalability, reliability and availability;
- number of channels by which a company engages with consumers;
- integration of products and solutions;
- rapid deployment of products and services for customers;
- breadth, quality and relevance of the Company's digital coupons;
- ability to deliver high quality and increasing number of digital coupons that are widely available and easy to use in consumers' preferred form;
- integration with retailer applications and point of sales systems;
- brand recognition and reputation;

quality of tools, reporting and analytics for planning, development and optimization of promotions; and breadth and expertise of the Company's sales organization.

We are subject to competition from large, well-established companies which have significantly greater financial, marketing and other resources than we do and have offerings that compete with our platform or may choose to offer digital promotions as an add-on to their core business on their own or in partnership with one of our competitors that would directly compete with ours. Many of our larger actual and potential competitors have the resources to significantly change the nature of the digital promotions industry to their advantage, which could materially disadvantage us. For example, Google, Yahoo!, Microsoft and Facebook and online retailers such as Amazon have highly trafficked industry platforms which they have leveraged, or could leverage, to distribute digital coupons or other digital promotions that could negatively affect our business. In addition, these potential competitors may be able to respond more quickly than we can to new or emerging technologies and changes in consumer habits. These competitors may engage in more extensive research and development efforts, undertake more far-reaching marketing campaigns and adopt more aggressive pricing policies, which may allow them to attract more consumers and, as a result, more CPGs and retailers, or generate revenues more effectively than we do. Our competitors may offer digital coupons that are similar to the digital coupons we offer or that achieve greater market acceptance than those we offer. We are also subject to competition from smaller companies that launch similar or new products and services that we do not offer and that could gain market acceptance.

Our success depends on the effectiveness of our platform in connecting CPGs and retailers with consumers and with attracting consumer use of the digital coupons delivered through our platform. To the extent we fail to provide digital coupons for high quality, relevant products, or otherwise fail to successfully reach consumers on their mobile device or elsewhere, consumers may become dissatisfied with our platform and decide not to use our digital coupons and elect to use the digital coupons distributed by one of our competitors. As a result of these factors, our CPGs and retailers may not receive the benefits they expect, and CPGs may use the offerings of one of our competitors, and retailers may elect to handle coupons themselves or exclude us from integrating with their in-store and point of sale systems or consumer channels, and our operating results would be adversely affected. Similarly, if retailers elect to use a competitive distribution network or platform, and we do not have, or fail to maintain, an agreement to distribute content through that network or platform, CPGs may elect to provide digital coupons directly to that network or platform, instead of through our platform. If retailers and CPGs require our platform to integrate with competitive offerings instead of using our products, we could lose some of our competitive advantage and our business could be harmed.

We also face significant competition for trade promotion and marketing spending. We compete against online and mobile businesses, including those referenced above, and traditional advertising outlets, such as television, radio and print, for trade promotion and marketing spending. In order to grow our revenues and improve our operating results, we must increase our share of CPG spending on digital coupons and media relative to traditional sources and relative to our competitors, many of whom are larger companies that offer more traditional and widely accepted media products.

We also directly and indirectly compete with retailers for consumer traffic. Many retailers market and offer their own digital coupons directly to consumers using their own websites, email newsletters and alerts, mobile applications and social media channels. Additionally, some retailers also market and offer their own digital coupons directly to consumers using our platform for which we earn no revenue. Our retailers could be more successful than we are at marketing their own digital coupons and could decide to terminate their relationship with us.

We may face competition from companies we do not yet know about. If existing or new companies develop, market or offer competitive digital coupon solutions, acquire one of our existing competitors or form a strategic alliance with one of our competitors, our ability to compete effectively could be significantly compromised and our operating results could be harmed.

Indemnity provisions in various agreements potentially expose us to substantial liability for intellectual property infringement and other losses.

Our agreements with CPGs, retailers and other third parties may include indemnification provisions under which we agree to indemnify them for losses suffered or incurred as a result of claims of intellectual property infringement or other liabilities relating to or arising from our products, services or other contractual obligations. The term of these indemnity provisions generally survives termination or expiration of the applicable agreement. Large indemnity payments could harm our business.

Acquisitions, joint ventures and strategic investments could result in operating difficulties, dilution and other harmful consequences.

We expect to evaluate and consider a wide array of potential strategic transactions, including acquisitions and dispositions of businesses, joint ventures, technologies, services, products and other assets and strategic investments. At any given time, we may be engaged in discussions or negotiations with respect to one or more of these types of transactions. Any of these transactions could be material to our financial condition and results of operations. We have limited experience managing acquisitions and integrating acquired businesses and our ability to successfully integrate acquisitions is unproven. The process of integrating any acquired business may create unforeseen operating difficulties and expenditures and is itself risky. The areas where we may face difficulties include:

- expected and unexpected costs incurred in identifying and pursuing strategic transactions and performing due diligence regarding potential strategic transactions that may or may not be successful;
- failure of an acquired company to achieve anticipated revenue, earnings, cash flows or other desired technological and business goals;
- effectiveness of our due diligence review and our ability to evaluate the results of such due diligence are dependent upon the accuracy and completeness of statements and disclosures made by the acquired company;
- diversion of management time, as well as a shift of focus from operating the businesses to issues related to integration and administration;
- the need to integrate the acquired company's accounting, management, information, human resource and other administrative systems to permit effective management, and the lack of control if such integration is delayed or not implemented;
- retention of key employees from the acquired company and cultural challenges associated with integrating employees from the acquired company into our organization;
- the need to implement or improve controls, procedures and policies appropriate for a public company at companies that prior to acquisition had lacked such controls, procedures and policies;
- in some cases, the need to transition operations and customers onto our existing platforms;
- liability for activities of the acquired company before the acquisition, including violations of laws, rules and regulations, commercial disputes, tax liabilities and other known and unknown liabilities;
- write-offs or charges; and
- litigation or other claims in connection with the acquired company, including claims from terminated employees, users, former stockholders or other third parties and intellectual property infringement claims.

For example, we have acquired businesses whose technologies are new to us and with which we did not have significant experience. We have made and are making investments of resources to support such acquisitions, which will result in ongoing operating expenses and may divert resources and management attention from other areas of our business. We cannot assure you that these investments and the integration of these acquisitions will be successful. If we fail to successfully integrate the companies we acquire, we may not realize the benefits expected from the transaction and our business may be harmed.

Our failure to address these risks or other problems encountered in connection with our past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of any or all of our acquisitions or joint ventures, or we may not realize them in the time frame expected or cause us to incur unanticipated liabilities, and harm our business. Future acquisitions or joint ventures may require us to issue dilutive additional equity securities, spend a substantial portion of our available cash, incur debt or contingent liabilities, amortize expenses related to intangible assets or incur incremental operating expenses or write-offs of goodwill or impaired acquired intangible assets, which could adversely affect our results of operations and harm our business.

If we fail to effectively manage our growth, our business and financial performance may suffer.

We have significantly expanded our operations and anticipate expanding further to pursue our growth strategy. Such expansion increases the complexity of our business and places significant demands on our management, operations,

technical performance, financial resources and internal control over financial reporting functions. Continued growth could strain our ability to deliver digital coupons and media on our platform, develop and improve our operational, financial, legal and management controls, and enhance our reporting systems and procedures. Failure to manage our expansion may limit our growth, damage our reputation and negatively affect our financial performance and harm our business.

38

To effectively manage this growth, we will need to continue to improve our operational, financial and management controls, and our reporting systems and procedures. If we do not effectively manage the growth of our business and operations the scalability of our business could suffer.

Our current and planned personnel, systems, procedures and controls may not be adequate to support and effectively manage our future operations. We may not be able to hire, train, retain, motivate and manage required personnel. As we continue to grow, we must effectively integrate, develop and motivate a large number of new employees. We intend to continue to expand our research and development, sales and marketing, and general and administrative organizations, and over time, expand our international operations. To attract top talent, we have had to offer, and believe we will need to continue to offer, highly competitive compensation packages before we can validate the productivity of those employees. If we fail to effectively manage our hiring needs and successfully integrate our new hires, our efficiency and ability to meet our forecasts and our employee morale, productivity and retention could suffer, and our business and operating results could be adversely affected.

Providing our products and services to our CPGs, retailers and consumers is costly and we expect our expenses to continue to increase in the future as we grow our business with existing and new CPGs and retailers and develop new products and services that require enhancements to our technology infrastructure. In addition, our operating expenses, such as our sales, marketing and engineering expenses are expected to continue to grow to support our anticipated future growth. As a result of the requirements of being a public company we incur significant legal, accounting and other expenses. Our expenses may grow faster than our revenues, and our expenses may be greater than we anticipate. Managing our growth will require significant expenditures and allocation of valuable management resources. If we fail to achieve the necessary level of efficiency in our organization as it grows, our business, operating results and financial condition would be harmed.

If we do not effectively grow and train our sales and media teams, we may be unable to grow our business with CPGs and retailers and our business will be adversely affected.

We continue to be dependent on our sales and media teams to obtain new CPGs and retailers and to drive sales from our existing CPGs and retailers. We believe that there is significant competition for sales and media personnel with the skills and technical knowledge that we require. Our ability to achieve significant revenue growth will depend, in large part, on our success in recruiting, training, integrating and retaining sufficient numbers of sales and media personnel to support our growth. New hires require significant training and it may take time before they achieve full productivity. Our recent hires and planned hires may not become productive as quickly as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals in the markets where we do business or plan to do business. In addition, if we continue to grow rapidly, a large percentage of our sales and media teams will be new to the Company and our solution. If we are unable to hire and train sufficient numbers of effective sales and media personnel, or the sales and media personnel are not successful in obtaining new CPGs and retailers or increasing sales to our existing CPGs and retailers, our business will be adversely affected.

Our sales cycle with new CPGs and retailers is long and unpredictable and may require us to incur expenses before executing a customer agreement, which makes it difficult to project when, if at all, we will obtain new CPGs and retailers and when we will generate additional revenues from those customers.

We market our services and products directly to CPGs and retailers. New CPG and retailer relationships typically take time to obtain and finalize. A significant time period may pass between selection of our services and products by key decision-makers and the signing of a contract. The length of time between the initial sales call and the realization of a final contract is difficult to predict. As a result, it is difficult to predict when we will obtain new CPGs and retailers and when performance and delivery of services will be initiated with these potential CPGs and retailers. As part of our sales cycle, we may incur significant expenses before executing a definitive agreement with a prospective CPG or retailer and before we are able to generate any revenues from such agreement. If conditions in the marketplace generally or with a specific prospective CPG or retailer change negatively, it is possible that no definitive agreement

will be executed, and we will be unable to recover any expenses incurred before a definitive agreement is executed, which would in turn have an adverse effect on our business, financial condition and results of operations.

The success and scale of Retailer iQ depends, in part, on the level of commitment and support by retailers.

If retailers do not commit sufficient time, resources and funds towards the marketing of their digital promotions and programs on Retailer iQ, the growth and scale of Retailer iQ and its penetration into the consumer market will be adversely affected. Further, the successful implementation of Retailer iQ requires integration with a retailer's point of sales system, loyalty programs and consumer channels. These integration efforts require time and effort from both the retailer and ourselves, which also involves our working with third-party systems and solutions, some of whom may be our competitors. We may not be able to integrate and launch Retailer iQ with a retailer's systems in a timely and efficient manner. If we are unable to successfully implement Retailer iQ, which includes increased consumer adoption of Retailer iQ, or it is not adopted, marketed and supported with sufficient resources by retailers, the success and scale of Retailer iQ will be adversely affected, impacting the recoverability of certain prepaid non-refundable payments with some of our retail partners and our revenues and business may suffer.

Our business depends on our ability to maintain and scale the network infrastructure necessary to operate our platform, including our websites, mobile applications and Retailer iQ platform, and any significant disruption in service could result in a loss of CPGs, retailers and consumers.

We deliver digital coupons via our platform, including over our websites and mobile applications, as well as through those of our CPGs and retailers and our publishers and other third parties. Our reputation and ability to acquire, retain and serve CPGs and retailers, as well as consumers who use digital coupons or view media on our platform are dependent upon the reliable performance of our platform. As the number of our CPG customers, retailers and consumers and the number of digital promotions and information shared through our platform continue to grow, we will need an increasing amount of network capacity and computing power. Our technology infrastructure is hosted across two data centers in co-location facilities in California and Nevada. In addition, we use two other co-location facilities in California and Virginia to host our Retailer iQ platform. We have spent and expect to continue to spend substantial amounts in our data centers and equipment and related network infrastructure to handle the traffic on our platform. The operation of these systems is expensive and complex and could result in operational failures. In the event that the number of transactions or the amount of traffic on our platform grows more quickly than anticipated, we may be required to incur significant additional costs. Interruptions in these systems or service disruptions, whether due to system failures, computer viruses, malware, ransomware, denial of service attacks, attempts to degrade or disrupt services, or physical or electronic break-ins, could affect the security or availability of our websites and platform, and prevent CPGs, retailers or consumers from accessing our platform. A substantial portion of our network infrastructure is hosted by third-party providers. Any disruption in these services or any failure of these providers to handle existing or increased traffic could significantly harm our business. Any financial or other difficulties these providers face may adversely affect our business, and we exercise little control over these providers, which increases our vulnerability to problems with the services they provide. If we do not maintain or expand our network infrastructure successfully or if we experience operational failures, we could lose current and potential CPGs and retailers and consumers, which could harm our operating results and financial condition.

If our websites or those of our publishers fail to rank prominently in unpaid search results from search engines like Google, Yahoo! and Bing, traffic to our websites could decline and our business would be adversely affected.

Our success depends in part on our ability to attract consumers through unpaid Internet search results on search engines like Google, Yahoo! and Bing. The number of consumers we attract to our websites from search engines is due in large part to how and where our websites rank in unpaid search results. These rankings can be affected by a number of factors, many of which are not in our direct control, and they may change frequently. For example, major search engines frequently modify their ranking algorithms, methodologies or design layouts. As a result, links to our websites may not be prominent enough to drive traffic to our websites or we may receive less favorable placement which could reduce traffic to our website, and we may not know how or otherwise be in a position to influence the results. In some instances, search engine companies may change these rankings in order to promote their own competing products or services or the products or services of one or more of our competitors. Our websites have

experienced fluctuations in search result rankings in the past, and we anticipate fluctuations in the future. For example, the search result rankings of our websites have fallen relative to the same time last year. In addition, websites must comply with search engine guidelines and policies. These guidelines and policies are complex and may change at any time. If we fail to follow such guidelines and policies properly, search engines may rank our content lower in search results or could remove our content altogether from their index. Any reduction in the number of consumers directed to our websites could reduce the effectiveness of our coupon codes for specialty retailers and digital promotions for CPGs and retailers and could adversely impact our business and results of operations.

If we fail to continue to obtain and increase the number of high quality coupons through our platform, our revenue growth or our revenues may be harmed.

We generally generate revenues as consumers select, or activate, a digital coupon through our platform. Our business model depends upon the availability of high quality and increasing number of digital coupons. CPGs and retailers have a variety of channels through which to promote their products and services. If CPGs and retailers elect to distribute their digital coupons through other channels or not to promote digital coupons at all, or if our competitors are willing to accept lower prices than we are, our ability to obtain high quality digital coupons available on our platform may be impeded and our business, financial condition and operating results will be adversely affected. If we cannot maintain sufficient digital coupons inventory to offer through our platform, consumers may perceive our service as less relevant, consumer traffic to our websites and those of our publishers will decline and, as a result, CPGs and retailers may decrease their use of our platform to deliver digital coupons and our revenue growth or revenues may be harmed.

Our business relies in part on electronic messaging, including emails and SMS text messages, and any technical, legal or other restrictions on the sending of electronic messages or an inability to timely deliver such communications could harm our business.

Our business is in part dependent upon electronic messaging. We provide emails, mobile alerts and other messages to consumers informing them of the digital coupons on our websites, and we believe these communications help generate a significant portion of our revenues. We also use electronic messaging, in part, as part of the consumer sign-up and verification process. Because electronic messaging services are important to our business, if we are unable to successfully deliver electronic messages to consumers, if there are legal restrictions on delivering these messages to consumers, or if consumers do not or cannot open our messages, our revenues and profitability could be adversely affected. Changes in how webmail applications or other email management tools organize and prioritize email may result in our emails being delivered or routed to a less prominent location in a consumer's inbox or viewed as "spam" by consumers and may reduce the likelihood of that consumer opening our emails. Actions taken by third parties that block, impose restrictions on or charge for the delivery of electronic messages could also harm our business. From time to time, Internet service providers or other third parties may block bulk email transmissions or otherwise experience technical difficulties that result in our inability to successfully deliver emails or other messages to consumers.

Changes in laws or regulations, or changes in interpretations of existing laws or regulations, including the Telephone Consumer Protection Act, or TCPA, in the United States and laws regarding commercial electronic messaging in other jurisdictions, that would limit our ability to send such communications or impose additional requirements upon us in connection with sending such communications could also adversely impact our business. For example, the Federal Communications Commission amended certain of its regulations under the TCPA in recent years in a manner that could increase our exposure to liability for certain types of telephonic communication with customers, including but not limited to text messages to mobile phones. Under the TCPA, plaintiffs may seek actual monetary loss or statutory damages of \$500 per violation, whichever is greater, and courts may treble the damage award for willful or knowing violations. Given the enormous number of communications we send to consumers, a determination that there have been violations of the TCPA or other communications-based statutes could expose us to significant damage awards that could, individually or in the aggregate, materially harm our business. Moreover, even if we prevail, such litigation against us could impose substantial costs and divert our management's attention and resources.

We also rely on social networking messaging services to send communications. Changes to these social networking services' terms of use or terms of service that limit promotional communications, restrictions that would limit our ability or our customers' ability to send communications through their services, disruptions or downtime experienced by these social networking services or reductions in the use of or engagement with social networking services by customers and potential customers could also harm our business.

We rely on a third-party service for the delivery of daily emails and other forms of electronic communication, and delay or errors in the delivery of such emails or other messaging we send may occur and be beyond our control, which could damage our reputation or harm our business, financial condition and operating results. If we were unable to use our current electronic messaging services, alternate services are available; however, we believe our sales could be impacted for some period as we transition to a new provider, and the new provider may be unable to provide equivalent or satisfactory electronic messaging service. Any disruption or restriction on the distribution of our electronic messages, termination or disruption of our relationship with our messaging service providers, including our third-party service that delivers our daily emails, or any increase in our costs associated with our email and other messaging activities could harm our business.

We are dependent on technology systems and electronic communications networks that are supplied and managed by third parties, which could result in our inability to prevent or respond to disruptions in our services.

Our ability to provide services to consumers depends on our ability to communicate with CPGs, retailers and customers through the public Internet and electronic networks that are owned and operated by third parties. Our products and services also depend on the ability of our users to access the public Internet. In addition, in order to provide services promptly, our computer equipment and network servers must be functional 24 hours per day, which requires access to telecommunications facilities managed by third parties and the availability of electricity, which we do not control. A severe disruption of one or more of these networks, including as a result of utility or third-party system interruptions, could impair our ability to process information, which could impede our ability to provide digital promotions to consumers, harm our reputation, result in a loss of customers or CPGs and retailers and adversely affect our business and operating results.

If our security measures are compromised and information we collect and maintain is publicly exposed, CPGs, retailers and consumers may curtail or stop using our platform.

We collect and maintain data about consumers, including personally identifiable information, as well as other confidential or proprietary information. Like all businesses that use computer systems and the Internet, our security measures, and those of our third-party service providers, may not detect or prevent all attempts to hack our systems, denial-of-service attacks, viruses, malicious software, break-ins, phishing attacks, social engineering, security breaches or other attacks and similar disruptions that may jeopardize the security of information stored in or transmitted by our systems or solutions or that we or our third-party service providers otherwise maintain, including payment systems, any of which could lead to interruptions, delays, or website shutdowns, causing loss of critical data or the unauthorized disclosure or use of personally identifiable or other confidential information, or subject us to fines or higher transaction fees or limit or result in the termination of our access to certain payment methods. If we experience compromises to our security that result in performance or availability problems, the complete shutdown of one or more of our websites and mobile applications or the loss or unauthorized disclosure of confidential information, CPGs, retailers, and consumers may lose trust and confidence in us and decrease their use of our platform or stop using our platform entirely.

Because the techniques used to obtain unauthorized access are often sophisticated and change frequently, neither we nor third-party service providers can guarantee that our systems will not be breached. In addition, consumer information including email addresses, phone numbers and data on consumer usage of our websites and mobile applications could be hacked, hijacked, altered or otherwise claimed or controlled by unauthorized persons. Security breaches can also occur as a result of non-technical issues, including intentional or inadvertent breaches by our employees or by persons with whom we have commercial relationships. Any or all of these issues could negatively impact our reputation and our ability to attract and retain CPGs and retailers as well as consumers or could reduce the frequency with which our platform is used, cause existing or potential CPG or retailer customers to cancel their contracts or subject us to third-party lawsuits, regulatory fines or other action or liability, thereby harming our results of operations.

Remediation of any potential cyber security breach may involve significant time, resources, and expenses, which may result in potential regulatory inquiries, litigation or other investigations, and can affect our financial and operational condition.

Failure to deal effectively with fraudulent or other improper transactions could harm our business.

Digital coupons are issued in the form of redeemable coupons or coupon codes with unique identifiers. It is possible that third parties may create counterfeit digital coupons or coupon codes or exceed print or use limits in order to fraudulently or improperly claim discounts or credits for redemption. While we use advanced anti-fraud technologies, it is possible that individuals will circumvent our anti-fraud systems using increasingly sophisticated methods or

methods that our anti-fraud systems are not able to counteract. Further, we may not detect any of these unauthorized activities in a timely manner. Third parties who succeed in circumventing our anti-fraud systems may sell the fraudulent or fraudulently obtained digital coupons on social networks, which would damage our brand and relationships with CPGs and harm our business. Legal measures we take or attempt to take against these third parties may be costly and may not be ultimately successful. In addition, our service could be subject to employee fraud or other internal security breaches, and we may be required to reimburse CPGs and retailers for any funds stolen or revenues lost as a result of such breaches. Our CPGs and retailers could also request reimbursement, or stop using digital coupons, if they are affected by buyer fraud or other types of fraud. We may incur significant losses from fraud and counterfeit digital coupons. If our anti-fraud technical and legal measures do not succeed, our business will suffer.

Factors adversely affecting performance marketing programs and our relationships with performance marketing networks and brand partners, or the termination of these relationships, may adversely affect our ability to attract and retain merchants and our coupon codes business.

A portion of our business is based upon consumers using coupon codes from specialty retailers in connection with the purchase of goods or services. The commissions we earn for coupon codes accessed through our platform are tracked by performance marketing networks. Third-party performance marketing networks provide publishers with affiliate tracking links that allow for revenues to be attributed to publishers. When a consumer executes a purchase on a publisher's website as a result of a performance marketing program, most performance marketing conversion tracking tools credit the most recent link or ad clicked by the consumer prior to that purchase. This practice is generally known as "last-click attribution." We generate revenues through transactions for which we receive last-click attribution. Risks that may adversely affect our performance marketing programs and our relationships with performance marketing networks include the following, some of which are outside our control:

- we may not be able to adapt to changes in the way in which CPGs and merchants attribute credit to us in their performance marketing programs, whether it be "first-click attribution" or "multichannel attribution," which applies weighted values to each of a retailer's advertisements and tracks how each of those advertisements contributed to a purchase, or otherwise;
- we may not receive revenue if consumers make purchases from their mobile devices as many retailers currently do not recognize affiliate tracking links on their mobile-optimized websites or applications, and tracking mechanisms on mobile websites or applications may not function to allow retailers to properly attribute sales to us;
 - we may not generate revenue if consumers use mobile devices for shopping research but make purchases using coupon codes found on our sites in ways where we do not get credit;
- refund rates for products delivered on merchant sites may be greater than we estimate;
- performance marketing networks may not provide accurate and timely reporting on which we rely, we could fail to properly recognize and report revenues and misstate financial reports, projections and budgets and misdirect our advertising, marketing and other operating efforts for a portion of our business;
- we primarily rely on a small number of performance marketing networks in non-exclusive arrangements, the loss of which could adversely affect our coupon codes business;
- we primarily rely, in connection with our search engine marketing business, on a small number of brand partners that work with us in non-exclusive arrangements, the loss of which could adversely affect our coupon codes business;
- industry changes relating to the use of performance marketing networks could adversely impact our commission revenues;
- to the extent performance marketing networks serve as intermediaries between us and merchants, it may create challenges to building our own brand awareness and affinity with merchants, and the termination of our relationship with the performance marketing networks would terminate our ability to receive payments from merchants we service through that network; and
- performance marketing networks may compete with us.

While coupon codes from specialty retailers represent a declining portion of our business, any of these risks could adversely affect our revenues in this area.

Our business is subject to complex and evolving laws, regulations and industry standards, and unfavorable interpretations of, or changes in, or failure by us to comply with these laws, regulations and industry standards could substantially harm our business and results of operations.

We are subject to a variety of federal, state, local and municipal laws, regulations and industry standards that relate to privacy, electronic communications, data protection, intellectual property, e-commerce, competition, price discrimination, consumer protection, taxation, and the use of promotions. Many of these laws, regulations, and standards are still evolving and being tested in courts and industry standards are still developing. Our business, including our ability to operate and expand, could be adversely affected if legislation, regulations or industry standards are adopted, interpreted or implemented in a manner that is inconsistent with our current business practices

and that require changes to these practices or the design of our platform. Existing and future laws, regulations and industry standards could restrict our

43

operations, and our ability to retain or increase our CPGs and retailers and consumers' use of digital promotions delivered on our platform may be adversely affected and we may not be able to maintain or grow our revenues as anticipated.

If the use of third-party cookies is rejected by Internet users, restricted by third parties outside of our control, or otherwise subject to unfavorable regulation, our performance could decline and we could lose customers and revenue.

We use small text files (referred to as "cookies"), placed through an Internet browser on an Internet user's computer and correspond to a data set that we keep on our servers, to gather important data to help deliver our solution. Certain of our cookies, including those that we predominantly use in delivering our solution, are known as "third-party" cookies because they are delivered where we do not have a direct relationship with the Internet user. Our cookies collect anonymous information, such as when an Internet user views an advertisement, clicks on an advertisement, or visits one of our advertisers' websites. On mobile devices, we may also obtain location based information about the user's device through our cookies. We use these cookies to achieve our customers' campaign goals, to ensure that the same Internet user does not unintentionally see the same media too frequently, to report aggregate information to our customers regarding the performance of their digital promotions and marketing campaigns, and to detect and prevent fraudulent activity throughout our network. We also use data from cookies to help us decide whether and how much to bid on an opportunity to place an advertisement in a certain Internet location and at a given time in front of a particular Internet user. A lack of data associated with or obtained from cookies may significantly detract from our ability to make decisions about which inventory to purchase for an advertiser's campaign and may undermine the effectiveness of our solution and harm our business.

Cookies may easily be deleted or blocked by Internet users. All of the most commonly used Internet browsers (including Chrome, Firefox, Internet Explorer, and Safari) allow Internet users to prevent cookies from being accepted by their browsers. Internet users can also delete cookies from their computers at any time. Some Internet users also download "ad blocking" software that prevents cookies from being stored on a user's computer. If more Internet users adopt these settings or delete their cookies more frequently than they currently do, our business could be harmed. In addition, the Safari browser blocks third-party cookies by default, the developers of the Firefox browser have announced that a future version of the Firefox browser will also block third-party cookies by default, and other browsers may do so in the future. Unless such default settings in browsers were altered by Internet users to permit the placement of third-party cookies, we would be able to set fewer of our cookies in users' browsers, which could adversely affect our business. In addition, companies such as Google have publicly disclosed their intention to move away from cookies to another form of persistent unique identifier, or ID, to identify individual Internet users or Internet-connected devices in the bidding process on advertising exchanges. If companies do not use shared IDs across the entire ecosystem, this could have a negative impact on our ability to find the same anonymous user across different web properties, and reduce the effectiveness of our solution.

In addition, in the European Union, or EU, Directive 2009/136/EC, commonly referred to as the "Cookie Directive," directs EU member states to ensure that accessing information on an Internet user's computer, such as through a cookie, is allowed only if the Internet user has appropriately given his or her consent. We may experience challenges in obtaining appropriate consent to our use of cookies from consumers within the EU, which may affect our operating results and business in European markets, and we may not be able to develop or implement additional tools that compensate for the lack of data associated with cookies. Moreover, even if we are able to do so, such additional tools may be subject to further regulation, time consuming to develop or costly to obtain, and less effective than our current use of cookies.

Failure to comply with federal, state and international privacy, data protection, marketing and consumer protection laws, regulations and industry standards, or the expansion of current or the enactment or adoption of new privacy, data protection, marketing and consumer protection laws, regulations or industry standards, could adversely affect our business.

We are subject to a variety of federal, state and international laws, regulations and industry standards regarding privacy, data protection, data security, marketing and consumer protection, which address the collection, storing, sharing, using, processing, disclosure and protection of data relating to individuals, as well as the tracking of consumer behavior and other consumer data. Many of these laws, regulations and industry standards are changing and may be subject to differing interpretations, costly to comply with or inconsistent among countries and jurisdictions. For example, the Federal Trade Commission, or the FTC, expects companies like ours to comply with guidelines issued under the Federal Trade Commission Act that govern the collection, use, disclosure, and storage of consumer information, and establish principles relating to notice, consent, access and data integrity and security. The laws and regulations in many foreign countries relating to privacy, data protection, data security, marketing and consumer protection often are more restrictive than in the United States, and may in some cases be interpreted to have a greater scope. Additionally, the laws, regulations and

industry standards, both foreign and domestic, relating to privacy, data protection, data security, marketing and consumer protection are dynamic and may be expanded or replaced by new laws, regulations or industry standards. We believe our policies and practices comply in all material respects with applicable privacy, data protection, data security, marketing and consumer protection guidelines, laws and regulations. However, if our belief is incorrect, or if these guidelines, laws or regulations or their interpretation change or new legislation or regulations are enacted, we may be compelled to provide additional disclosures to our consumers, obtain additional consents from our consumers before collecting, using, or disclosing their information or implement new safeguards to help our consumers manage our use of their information, among other changes.

Various industry standards on privacy have been developed and are expected to continue to develop, which may be adopted by industry participants at any time. We are subject to the terms of our privacy policies and obligations to third parties relating to privacy, data protection and data security, including contractual obligations relating to privacy rights, data protection, data use and data security measures. Certain of our solutions, including Retailer IQ and Quotient Insights, depend in part on our ability to use data that we obtain in connection with our offerings, and our ability to use this data may be subject to restrictions in our commercial agreements and subject to the privacy policies of the entities that provide us with this data. Our failure to adhere to these third-party restrictions on data use may result in claims, proceedings or actions against us by our business counterparties or other parties, or other liabilities, including loss of business, reputational damage, and remediation costs, which could adversely affect our business.

We strive to comply with applicable laws, policies, contractual and other legal obligations and certain applicable industry standards of conduct relating to privacy, data security, data protection, marketing and consumer protection. However, these obligations and standards of conduct often are complex and difficult to comply with fully, and it is possible that these obligations and standards of conduct may be interpreted and applied in new ways and/or in a manner that is inconsistent with each other or that new laws, regulations or other obligations may be enacted. It is possible that our practices may be argued or held to conflict with applicable laws, policies, contractual or other legal obligations, or applicable industry standards of conduct relating to privacy, data security, data protection, marketing or consumer protection. Any failure, or perceived failure, by us to comply with our posted privacy policies or with any data-related consent orders, FTC, other regulatory requirements or orders or other federal, state or, as we continue to expand internationally, international privacy, data security, data protection, marketing or consumer protection-related laws, regulations, contractual obligations or self-regulatory principles or other industry standards could result in claims, proceedings or actions against us by governmental entities or others or other liabilities or could result in a loss of consumers using our digital coupons or loss of CPGs and retailers. Any of these circumstances could adversely affect our business. Further, if third parties we work with violate applicable laws, our policies or other privacy-related obligations, such violations may also put our consumers' information at risk and could in turn have an adverse effect on our business.

With respect to personal data transfers from the European Economic Area, or EEA, we have in the past relied on adherence to the U.S. Department of Commerce's Safe Harbor Privacy Principles and compliance with the U.S.-EU and U.S.-Swiss Safe Harbor Frameworks as agreed to and set forth by the U.S. Department of Commerce, and the EU and Switzerland, which established a means for legitimizing the transfer of personally identifiable information by U.S. companies doing business in Europe from the EEA to the U.S. As a result of an October 2015 decision of the European Union Court of Justice, or ECJ, the U.S.-EU Safe Harbor Framework is now deemed to be an invalid method of compliance with restrictions set forth in the Data Protection Directive (and member states' implementations thereof) regarding the transfer of data outside of the EEA. U.S. and EU authorities reached a political agreement in February 2016 regarding a new means for legitimizing personal data transfers from the EEA to the U.S., the EU-U.S. Privacy Shield. It is unclear, however whether the EU-U.S. Privacy Shield will serve as an appropriate means for us to legitimize personal data transfers from the EEA to the U.S. We have engaged in certain actions in an effort to legitimize our transfers of personal data from the EEA to the U.S., and we anticipate engaging in additional activities in an effort to do so going forward. We may continue to be unsuccessful in establishing legitimate means of transferring all personal data from the EEA, we may experience reluctance or refusal by European consumers, retailers or CPGs to continue to use our solutions due to the potential risk exposure to such individuals and organizations as a

result of the ECJ ruling, and we and our CPG and retailer partners are at risk of enforcement actions taken by an EU data protection authority until we ensure that all applicable data transfers to us from the EEA are legitimized. In addition, legislators in the EU recently adopted the General Data Protection Regulation, or GDPR, a new regulation set to become effective in May 2018 that will supersede the 1995 EU Data Protection Directive, and include more stringent operational requirements for processors and controllers of personal data, including payment card information, and impose significant penalties for non-compliance. We may incur liabilities, expenses, costs, and other operational losses when the GDPR is effective and in connection with any measures we take to comply with it.

We expect that there will continue to be new proposed laws, regulations and industry standards concerning privacy, data protection and information security in the United States and other jurisdictions, and we cannot yet determine the impact such future laws, regulations and standards may have on our business. Future laws, regulations, standards and other obligations could, for example, impair our ability to collect or use information that we utilize to provide targeted digital promotions and media to consumers, CPGs and retailers, thereby impairing our ability to maintain and grow our total customers and increase revenues. Future restrictions on the collection, use, sharing or disclosure of our users' data or additional requirements for express or implied consent of users for the use and disclosure of such information could require us to modify our solutions, possibly in a material manner, and could limit our ability to develop new solutions and features. Any such new laws, regulations, other legal obligations or industry standards, or any changed interpretation of existing laws, regulations or other standards may require us to incur additional costs and restrict our business operations. If our measures fail to comply with current or future laws, regulations, policies, legal obligations or industry standards relating to privacy, data protection, data security, marketing or consumer protection, we may be subject to litigation, regulatory investigations, fines or other liabilities, as well as negative publicity and a potential loss of business. Moreover, if future laws, regulations, other legal obligations or industry standards, or any changed interpretations of the foregoing limit our users' or CPGs' or retailers' ability to use and share personally identifiable information or our ability to store, process and share personally identifiable information or other data, demand for our solutions could decrease, our costs could increase, our revenue growth could slow, and our business, financial condition and operating results could be harmed.

We may not be able to adequately protect our intellectual property rights

We regard our trademarks, service marks, copyrights, patents, trade dress, trade secrets, proprietary technology, and similar intellectual property as critical to our success.

We strive to protect our intellectual property rights in a number of jurisdictions, a process that is expensive and may not be successful or which we may not pursue in every location. We strive to protect our intellectual property rights by relying on federal, state and common law rights, contractual restrictions as well as rights provided under foreign laws. These laws are subject to change at any time and could further restrict our ability to protect our intellectual property rights.

We also may not be able to acquire or maintain appropriate domain names in all countries in which we do business. Furthermore, regulations governing domain names may not protect our trademarks and similar proprietary rights. We may be unable to prevent third parties from acquiring domain names that are similar to, infringe upon, or diminish the value of our trademarks and other proprietary rights.

We typically enter into confidentiality and invention assignment agreements with our employees and contractors, and confidentiality agreements with parties with whom we conduct business in order to limit access to, and disclosure and use of, our proprietary information. Also, from time to time, we make our intellectual property rights available to others under license agreements. However, these contractual arrangements and the other steps we have taken to protect our intellectual property may not prevent the misappropriation or disclosure of our proprietary information, infringement of our intellectual property rights or deter independent development of similar technologies by others and may not provide an adequate remedy in the event of such misappropriation or infringement. Third parties that license our proprietary rights also may take actions that diminish the value of our proprietary rights or reputation.

Obtaining and maintaining effective intellectual property rights is expensive, including the costs of defending our rights. Even where we have such rights, they may be later found to be unenforceable or have a limited scope of enforceability. We may not be able to discover or determine the extent of any unauthorized use of our proprietary rights. Litigation may be necessary to enforce our intellectual property rights, protect our respective trade secrets or determine the validity and scope of proprietary rights claimed by others. Any litigation of this nature, regardless of outcome or merit, could result in substantial costs and diversion of management and technical resources, any of which could adversely affect our business and operating results. If we fail to maintain, protect and enhance our intellectual

property rights, our business and operating results may be harmed.

46

We may be accused of infringing intellectual property rights of third parties.

Other parties may claim that we infringe their proprietary rights. We have been subject to, and expect to continue to be subject to, claims and legal proceedings regarding alleged infringement by us of the intellectual property rights of third parties. Such claims, whether or not meritorious, may result in the expenditure of significant financial and managerial resources, injunctions against us, or the payment of damages, including to satisfy indemnification obligations. We may need to obtain licenses from third parties who allege that we have infringed their rights, but such licenses may not be available on terms acceptable to us or at all. In addition, we may not be able to obtain or utilize on terms that are favorable to us, or at all, licenses or other rights with respect to intellectual property we do not own. These risks have been amplified by the increase in third parties whose sole or primary business is to assert such claims.

We may be unable to continue to use the domain names that we use in our business, or prevent third parties from acquiring and using domain names that infringe on, are similar to, or otherwise decrease the value of our brand or our trademarks or service marks.

We may lose significant brand equity in our “Coupons.com” domain name, our “Quotient.com” domain name, and other valuable domain names. If we lose the ability to use a domain name, whether due to trademark claims, failure to renew an applicable registration, or any other cause, we may be forced to market our products under new domain names, which could cause us substantial harm, or to incur significant expense in order to purchase rights to the domain names in question. In addition, our competitors and others could attempt to capitalize on our brand recognition by using domain names similar to ours. We also may not be able to acquire or maintain appropriate domain names or trademarks in all countries in which we do business. Domain names similar to ours have been registered in the United States and elsewhere. We may be unable to prevent third parties from acquiring and using domain names that infringe on, are similar to, or otherwise decrease the value of our brand or our trademarks or service marks. Protecting and enforcing our rights in our domain names may require litigation, which could result in substantial costs and diversion of management’s attention and harm our business.

Our business depends on strong brands, and if we are not able to maintain and enhance our brands, or if we receive unfavorable media coverage, our ability to retain and expand our number of CPGs, retailers and consumers will be impaired and our business and operating results will be harmed.

We believe that the brand identity that we have developed has significantly contributed to the success of our business. We also believe that maintaining and enhancing our brands are critical to expanding our base of CPGs, retailers and consumers. Maintaining and enhancing our brands may require us to make substantial investments and these investments may not be successful. If we fail to promote and maintain our brands, or if we incur excessive expenses in this effort, our business would be harmed. We anticipate that, as our market becomes increasingly competitive, maintaining and enhancing our brands may become increasingly difficult and expensive. Maintaining and enhancing our brands will depend on our ability to continue to provide sufficient quantities of reliable, trustworthy and high quality digital coupons, which we may not do successfully.

Unfavorable publicity or consumer perception of our websites, platform, practices or service offerings, or the offerings of our CPGs and retailers, could adversely affect our reputation, resulting in difficulties in recruiting, decreased revenues and a negative impact on the number of CPGs and retailers we feature and our user base, the loyalty of our consumers and the number and variety of digital coupons we offer. As a result, our business could be harmed.

Some of our solutions contain open source software, which may pose particular risks to our proprietary software and solutions.

We use open source software in our solutions and will use open source software in the future. From time to time, we may face claims from third parties claiming ownership of, or demanding release of, the open source software and/or

derivative works that we developed using such software (which could include our proprietary source code), or otherwise seeking to enforce the terms of the applicable open source license. These claims could result in litigation and could require us to purchase a costly license or cease offering the implicated solutions unless and until we can re-engineer them to avoid infringement. This re-engineering process could require significant additional research and development resources. In addition to risks related to license requirements, use of certain open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on the origin of software. Any of these risks could be difficult to eliminate or manage, and, if not addressed, could have a negative effect on our business and operating results.

We may be required to record a significant charge to earnings if our goodwill or amortizable intangible assets become impaired.

We are required under GAAP to review our amortizable intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Goodwill is required to be tested for impairment at least annually. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable. The events and circumstances we consider include the business climate, legal factors, operating performance indicators and competition. In the future we may be required to record a significant charge to earnings in our condensed consolidated financial statements during the period in which any impairment of our goodwill or amortizable intangible assets is determined. This could adversely impact our results of operations and harm our business.

Our gross margins are dependent on many factors, some of which are not directly controlled by the Company.

These factors include:

- Significant variations in our gross margin among products. Any substantial change in product mix could change our gross margin,
- As we continue to scale customers on Retailer IQ we will continue to experiment with various fee arrangements (including volume based fees) which might have an impact on our gross margins; and
- Pricing and acceptance of higher-margin new products.

Our inability to control any one of these factors could negatively impact our gross margins and operating results.

If we fail to expand effectively in international markets, our revenues and our business may be harmed.

We currently generate almost all of our revenues from the United States. We also operate to a limited extent in the United Kingdom, France and other countries in Europe. Many CPGs and retailers on our platform have global operations and we plan to grow our operations and offerings through expansion in existing international markets and by partnering with our CPGs and retailers to enter new geographies that are important to them. Further expansion into international markets will require management attention and resources and we have limited experience entering new geographic markets. Entering new foreign markets will require us to localize our services to conform to a wide variety of local cultures, business practices, laws and policies. The different commercial and Internet infrastructure in other countries may make it more difficult for us to replicate our business model. In some countries, we will compete with local companies that understand the local market better than we do, and we may not benefit from first-to-market advantages. We may not be successful in expanding into particular international markets or in generating revenues from foreign operations. As we expand internationally, we will be subject to risks of doing business internationally, including the following:

- competition with strong local competitors and preference for local providers, or foreign companies entering the same markets;
- the cost and resources required to localize our platform;
- burdens of complying with a wide variety of different laws and regulations, including intellectual property laws and regulation of digital coupon terms, Internet services, privacy and data protection, marketing and consumer protection laws, anti-competition regulations and different liability standards, which may limit or prevent us from offering of our solutions in some jurisdictions or limit our ability to enforce contractual obligations;
- differences in how trade promotion spending is allocated;
- differences in the way digital coupons and advertising are delivered and how consumers access and use digital coupons;
- technology compatibility;

- difficulties in recruiting and retaining qualified employees and managing foreign operations;
- different employee/employer relationships and the existence of workers' councils and labor unions;
- shorter payment cycles, different accounting practices and greater problems in collecting accounts receivable;
- higher product return rates;

48

seasonal reductions in business activity;
adverse tax effects and foreign exchange controls making it difficult to repatriate earnings and cash; and
political and economic instability.

Changes in the U.S. taxation of international activities may increase our worldwide effective tax rate and harm our financial condition and results of operations. The taxing authorities of the jurisdictions in which we plan to operate may challenge our methodologies for valuing developed technology or intercompany arrangements, including our transfer pricing, or determine that the manner in which we operate our business does not achieve the intended tax consequences, which could increase our worldwide effective tax rate and harm our financial position and results of operations. Significant judgment will be required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there will be many transactions and calculations for which the ultimate tax determination is uncertain. As we expand our business to operate in numerous taxing jurisdictions, the application of tax laws may be subject to diverging and sometimes conflicting interpretations by tax authorities of these jurisdictions. It is not uncommon for taxing authorities in different countries to have conflicting views. In addition, tax laws are dynamic and subject to change as new laws are passed and new interpretations of the law are issued or applied. In particular, there is uncertainty in relation to the U.S. tax legislation in terms of the future corporate tax rate but also in terms of the U.S. tax consequences of income derived from intellectual property earned overseas in low tax jurisdictions.

Our planned corporate structure and intercompany arrangements will be implemented in a manner we believe is in compliance with current prevailing tax laws. However, the tax benefits which we intend to eventually derive could be undermined if we are unable to adapt the manner in which we operate our business and due to changing tax laws.

Our failure to manage these risks and challenges successfully could materially and adversely affect our business, financial condition and results of operations.

The loss of one or more key members of our management team, or our failure to attract, integrate and retain other highly qualified personnel in the future, could harm our business.

We currently depend on the continued services and performance of the key members of our management team, including Steven R. Boal, our Executive Chairman, and Mir Aamir, our President and Chief Executive Officer. Mr. Boal is one of our founders and his leadership has played an integral role in our growth. Mr. Aamir's deep industry experience and long-standing relationships with both CPGs and retailers are key to our business. Key institutional knowledge remains with a small group of long-term employees and directors whom we may not be able to retain. The loss of key personnel, including key members of management as well as our marketing, sales, product development and technology personnel, could disrupt our operations and have an adverse effect on our ability to grow our business. Moreover, some of our management are new to our team.

As we become a more mature company, we may find our recruiting and retention efforts more challenging. We are seeking to continue to hire a significant number of personnel, including certain key management personnel. If we do not succeed in attracting, hiring and integrating excellent personnel, or retaining and motivating existing personnel, we may be unable to grow effectively.

Changes to financial accounting standards or SEC's rules and regulations may affect our results of operations and cause us to change our business practices.

We prepare our financial statements to conform to generally accepted accounting principles in the United States. These accounting principles are subject to interpretation by the Financial Accounting Standards Board, American Institute of Certified Public Accountants, the SEC and various bodies formed to interpret and create appropriate accounting policies. A change in those policies can have a significant effect on our reported results and may affect our reporting of transactions completed before a change is announced. Changes to those rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business. For example, in May

2014, the Financial Accounting Standards Board issued a comprehensive new revenue recognition standard for contracts with customers that will supersede most current revenue recognition guidance, including industry-specific guidance. This guidance will be applicable to us at the beginning of our first quarter of fiscal year 2018.

We are currently or could be exposed in the future to fluctuations in currency exchange rates and interest rates.

To date, we have generated almost all of our revenues from within the United States. As a result, we currently do not have significant revenues or expenses in our international operations and we do not hedge our foreign currency exchange risk. However, we plan to grow our operations and offerings through expansion in existing international markets and by partnering with our existing CPGs and retailers to enter new geographies that are important to them. For example, we opened a research and development facility in Bangalore, India and acquired Shopmium S.A., which has research and development operations in Paris, France. As we expand our business outside the United States we will face exposure to adverse movements in currency exchange rates. We will be exposed to foreign exchange rate fluctuations from the conversion of collections and expenses not denominated in U.S. dollars. If the U.S. dollar weakens against foreign currencies, the conversion of these foreign currency denominated transactions will result in increased revenues, operating expenses and net income. Similarly, if the U.S. dollar strengthens against foreign currencies, the conversion of these foreign currency denominated transactions will result in decreased revenues, operating expenses and net income. As exchange rates vary, sales and other operating results, when translated, may differ materially from expectations. Our risks related to currency fluctuations will increase as our international operations become an increasing portion of our business. In addition, we face exposure to fluctuations in interest rates which may impact our investment income unfavorably.

Our use of and reliance on international research and development resources and operations may expose us to unanticipated costs or events

We have research and development centers in India and France. We expect to increase our headcount, development, and operations activity in India. There is no assurance that our reliance upon international research and development resources and operations will enable us to achieve our research and development and operational goals or greater resource efficiency. Further, our international research and development and operations efforts involve significant risks, including:

- difficulty hiring and retaining appropriate personnel due to intense competition for such resources and resulting wage inflation in the cities where our research and development activities and operations are located;
- the knowledge transfer related to our technology and resulting exposure to misappropriation of intellectual property or information that is proprietary to us, our customers and other third parties;
- heightened exposure to change in the economic, security and political conditions in the countries where our research and development activities and operations are located;
- fluctuations in currency exchange rates and regulatory compliance in the countries where our research and development activities and operations are located;
- delays and inefficiencies caused by geographical separation of our international research and development activities and operations; and
- interruptions to our operations in the countries where our research and development activities and operations are located as a result of floods and other natural catastrophic events as well as manmade problems such as power disruptions or terrorism.

Difficulties resulting from the factors above could increase our research and development or operational expenses, delay the introduction of new products, or impact our product quality, the occurrence of which could adversely affect our business and operating results.

Our business is subject to interruptions, delays or failures resulting from earthquakes, other natural catastrophic events or terrorism.

Our headquarters is located in Mountain View, California. Our current technology infrastructure is hosted across two data centers in co-location facilities in California and Nevada. In addition, we use two other co-location facilities in California and Virginia to host our Retailer iQ platform. Our services, operations and the data centers from which we provide our services are vulnerable to damage or interruption from earthquakes, fires, floods, power losses, telecommunications failures, terrorist attacks, acts of war, human errors, break-ins and similar events. A significant natural disaster, such as an earthquake, fire or flood, could have a material adverse impact on our business, financial condition and results of operations and our insurance coverage may be insufficient to compensate us for losses that may occur. Acts of terrorism could cause disruptions to the Internet, our business or the economy as a whole. We may not have sufficient protection or recovery plans in certain circumstances, such as natural disasters affecting areas where data centers upon which we rely are located, and our business interruption insurance may be insufficient to compensate us for losses that may occur. Such disruptions could negatively impact our ability to run our websites, which could harm our business.

Our management team has limited experience managing a public company, and regulatory compliance may divert its attention from the day-to-day management of our business.

Our management team has limited experience managing a publicly-traded company and limited experience complying with the increasingly complex laws pertaining to public companies. Our management team may not successfully or efficiently manage our transition to being a public company that will be subject to significant regulatory oversight and reporting obligations under the federal securities laws. In particular, these new obligations will require substantial attention from our senior management and could divert their attention away from the day-to-day management of our business, which could adversely impact our business operations.

Our ability to raise capital in the future may be limited, and our failure to raise capital when needed could prevent us from growing.

We may in the future be required to raise capital through public or private financing or other arrangements. Such financing may not be available on acceptable terms, or at all, and our failure to raise capital when needed could harm our business. Additional equity financing may dilute the interests of our stockholders, and debt financing, if available, may involve restrictive covenants and could reduce our profitability. If we cannot raise funds on acceptable terms, we may not be able to grow our business or respond to competitive pressures.

Our ability to use our net operating losses to offset future taxable income may be subject to certain limitations.

In general, under Section 382 of the U.S. Internal Revenue Code of 1986, as amended, or the Code, and similar state law provisions, a corporation that undergoes an “ownership change” is subject to limitations on its ability to utilize its pre-change net operating losses, or NOLs, to offset future taxable income. If our existing NOLs are subject to limitations arising from ownership changes, our ability to utilize NOLs could be limited by Section 382 of the Code. Future changes in our stock ownership, some of which are outside of our control, also could result in an ownership change under Section 382 of the Code. There is also a risk that our NOLs could expire, or otherwise be unavailable to offset future income tax liabilities due to changes in the law, including regulatory changes, such as suspensions on the use of NOLs or other unforeseen reasons. For these reasons, we may not be able to utilize all of our NOLs, even if we attain profitability.

State and foreign laws regulating money transmission could impact our mobile shopping and receipt scanning cash-back application platform.

Many states and certain foreign jurisdictions impose license and registration obligations on those companies engaged in the business of money transmission, with varying definitions of what constitutes money transmission. If our mobile shopping and receipt scanning cash-back platform were to subject us to any applicable state or foreign laws, it could subject us to increased compliance costs and delay our ability to offer this product in certain jurisdictions pending receipt of any necessary licenses or registrations. If we need to make product and operational changes in light of these laws, the growth and adoption of this product may be adversely impacted and our revenues may be harmed.

Risks Related to Ownership of our Common Stock

The trading prices of the securities of technology companies have been highly volatile. Accordingly, the market price of our common stock has been, and is likely to continue to be, subject to wide fluctuations and could subject us to litigation.

The price of our stock may change in response to variations in our operating results and also may change in response to other factors, including factors specific to technology companies, many of which are beyond our control. As a result, our stock price may experience significant volatility. Among other factors that could affect our stock price are:

- the financial projections that we or analysts may choose to provide to the public, any changes in these projections or our failure for any reason to meet these projections;
- actual or anticipated changes or fluctuations in our results of operations;
- whether our results of operations meet the expectations of securities analysts or investors;
- the development and sustainability of an active trading market for our common stock;
- price and volume fluctuations in the overall stock market from time to time;
- fluctuations in the trading volume of our shares or the size of our public float;
- success of competitive products or services;
- the public's response to press releases or other public announcements by us or others, including our filings with the SEC;
- announcements relating to litigation;
- speculation about our business in the press or the investment community;
- future sales of our common stock by our significant stockholders, officers and directors;
- changes in our capital structure, such as future issuances of debt or equity securities;
- our entry into new markets;
- regulatory developments in the United States or foreign countries;
- strategic actions by us or our competitors, such as acquisitions or restructurings; and
- changes in accounting principles.

In addition, the stock market in general has experienced substantial price and volume volatility that is often seemingly unrelated to the operating results of any particular companies. Moreover, if the market for technology stocks or the stock market in general experiences uneven investor confidence, the market price of our common stock could decline for reasons unrelated to our business, operating results or financial condition. The market price for our stock might also decline in reaction to events that affect other companies within, or outside, our industry, even if these events do not directly affect us. Some companies that have experienced volatility in the trading price of their stock have been subject of securities litigation. If we are the subject of such litigation, it could result in substantial costs and a diversion of management's attention and resources.

Substantial future sales of shares by our stockholders could negatively affect our stock price.

Sales of a substantial number of shares of our common stock in the public market could depress the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. We have approximately 92,688,435 shares of common stock outstanding as of September 30, 2017, assuming no exercise of our outstanding options or vesting of our outstanding RSUs.

Our equity incentive plans allow us to issue, among other things, stock options, restricted stock and restricted stock units and we have filed a registration statement under the Securities Act to cover the issuance of shares upon the exercise or vesting of awards granted under those plans.

The concentration of our common stock ownership with our executive officers, directors and affiliates will limit your ability to influence corporate matters.

Our executive officers, directors and owners of 5% or more of our outstanding common stock together beneficially own approximately 48% of our outstanding common stock, based on the number of shares outstanding as of September 30, 2017. These stockholders therefore have significant influence over management and affairs and over all matters requiring stockholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets, for the foreseeable future. This concentrated control limits your ability to influence corporate matters and, as a result, we may take actions that our stockholders do not view as beneficial. This ownership could affect the value of your shares of common stock.

Our stock repurchase program could affect the price of our common stock and increase volatility and may be suspended or terminated at any time, which may result in a decrease in the trading price of our common stock.

In April of 2017, our board of directors approved a share repurchase program pursuant to which we are authorized to repurchase shares of our stock having an aggregate value of up to \$50.0 million. From January 1, 2015 through September 30, 2017, we repurchased \$34.5 million in stock under our total authorized amounts under previously approved share purchase programs. The timing and actual number of shares repurchased will depend on a variety of factors including the timing of open trading windows, price, corporate and regulatory requirements, an assessment by management and our board of directors of cash availability and other market conditions. The stock repurchase program may be suspended or discontinued at any time without prior notice. Repurchases pursuant to our stock repurchase program could affect the price of our common stock and increase its volatility. The existence of our stock repurchase program could also cause the price of our common stock to be higher than it would be in the absence of such a program and could potentially reduce the market liquidity for our common stock. Additionally, repurchases under our stock repurchase program will diminish our cash reserves, which could impact our ability to further develop our technology, access and/or retrofit additional facilities and service our indebtedness. There can be no assurance that any stock repurchases will enhance stockholder value because the market price of our common stock may decline below the levels at which we repurchased such shares. Any failure to repurchase shares after we have announced our intention to do so may negatively impact our reputation and investor confidence in us and may negatively impact our stock price. Although our stock repurchase program is intended to enhance long-term stockholder value, short-term stock price fluctuations could reduce the program's effectiveness.

If we fail to maintain an effective system of disclosure controls and internal control over financial reporting, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired.

As a public company, we are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act and the rules and regulations of the New York Stock Exchange, or the NYSE. We expect that the requirements of these rules and regulations will continue to increase our legal, accounting and financial compliance costs, make some activities more difficult, time consuming and costly, and place significant strain on our personnel, systems and resources.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. We are continuing to develop and refine our disclosure controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we will file with the SEC is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that information required to be disclosed in reports under the Exchange Act is accumulated and communicated to our principal executive and financial officers. We are also continuing to improve our internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we have expended, and anticipate that we will continue to expend, significant resources, including accounting-related costs and significant management oversight. Any failure to implement and maintain effective internal control over financial reporting also could adversely affect the results of

periodic management evaluations and annual independent registered public accounting firm attestation reports regarding the effectiveness of our internal control over financial reporting that we will be required to include in our periodic reports we will file with the SEC under Section 404 of the Sarbanes-Oxley Act. In the event that we are not able to demonstrate compliance with Section 404 of the Sarbanes-Oxley Act, that our internal control over financial reporting is perceived as inadequate or that we are unable to produce timely or accurate financial statements, investors may lose confidence in our operating results and our stock price could decline.

Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business. Further, weaknesses in our disclosure controls or our internal control over financial reporting may be discovered in the future. Any failure to develop or maintain effective controls, or any difficulties encountered in their implementation or improvement, could harm our operating results or cause us to fail to meet our reporting obligations and could result in a restatement of our financial statements for prior periods. Any failure to implement and maintain effective internal control over financial reporting also could adversely affect the results of management evaluations and independent registered public accounting firm audits of our internal control over financial reporting that we will eventually be required to include in our periodic reports that will be filed with the SEC. Ineffective disclosure controls and procedures and internal control over financial reporting could also cause investors to lose confidence in our reported financial and other information, which would likely have a negative effect on the trading price of our common stock. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on the NYSE.

Our independent registered public accounting firm is not required to audit the effectiveness of our internal control over financial reporting until after we are no longer an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act. At such time, our independent registered public accounting firm may issue a report that is adverse in the event it concludes that our internal control over financial reporting is not effective.

Any failure to maintain effective disclosure controls and internal control over financial reporting could have a material and adverse effect on our business and operating results, and cause a decline in the price of our common stock.

We are an “emerging growth company” and the reduced disclosure requirements applicable to emerging growth companies may make our common stock less attractive to investors.

We are an “emerging growth company”, as defined in the JOBS Act, and we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies” including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced financial disclosure obligations, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and any golden parachute payments not previously approved. We may take advantage of these provisions for up to five years or such earlier time that we are no longer an “emerging growth company.” We would cease to be an “emerging growth company” upon the earliest to occur of: the last day of the fiscal year in which we have more than \$1.0 billion in annual revenues; the date we are deemed a “large accelerated filer” as defined in the Exchange Act; and the last day of the fiscal year ending after the fifth anniversary of our IPO. We may choose to take advantage of some but not all of these reduced reporting burdens. If we take advantage of any of these reduced reporting burdens in future filings, the information that we provide our security holders may be different than you might get from other public companies in which you hold equity interests. We cannot predict if investors will find our common stock less attractive because we may rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

If securities analysts do not publish research or if securities analysts or other third parties publish inaccurate or unfavorable research about us, the price of our common stock could decline.

The trading market for our common stock will rely in part on the research and reports that securities analysts and other third parties choose to publish about us. We do not control these analysts or other third parties. The price of our common stock could decline if one or more securities analysts downgrade our common stock or if one or more securities analysts or other third parties publish inaccurate or unfavorable research about us or cease publishing reports about us.

We do not intend to pay dividends for the foreseeable future.

We intend to retain all of our earnings for the foreseeable future to finance the operation and expansion of our business and do not anticipate paying cash dividends on our common stock. As a result, you can expect to receive a return on your investment in our common stock only if the market price of the stock increases.

Provisions in our charter documents and under Delaware law could discourage a takeover that stockholders may consider favorable.

Provisions in our certificate of incorporation and by-laws may have the effect of delaying or preventing a change of control or changes in our management. Amongst other things, these provisions:

- authorize the issuance of “blank check” preferred stock that could be issued by our board of directors to defend against a takeover attempt;
 - establish a classified board of directors, as a result of which the successors to the directors whose terms have expired will be elected to serve from the time of election and qualification until the third annual meeting following their election;
 - require that directors only be removed from office for cause and only upon a majority stockholder vote;
 - provide that vacancies on the board of directors, including newly created directorships, may be filled only by a majority vote of directors then in office rather than by stockholders;
 - prevent stockholders from calling special meetings; and
 - prohibit stockholder action by written consent, requiring all actions to be taken at a meeting of the stockholders.
- In addition, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in a broad range of business combinations with any “interested” stockholder for a period of three years following the date on which the stockholder becomes an “interested” stockholder.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.
Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program ⁽¹⁾	Approximate Dollar
				Value of Shares that May Yet Be Purchased Under the Program ⁽¹⁾
July 1 - 31, 2017	—	\$ —	—	\$50,000,000
August 1 - 31, 2017	—	—	—	50,000,000
September 1 - 30, 2017	—	—	—	50,000,000
Total	—	\$ —	—	\$50,000,000

(1) In April 2017, the Company’s board of directors authorized the 2017 Program to repurchase up to \$50.0 million of the Company’s common stock through April 2018. During the three and nine months ended September 30, 2017,

the Company did not repurchase any shares of its common stock. As of September 30, 2017, \$50.0 million remains available for future share repurchases under the 2017 Program.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.
Director Resignations

On October 30, 2017, Ms. Dawn G. Lepore, who has served as a director of the Company since February 2012, and Mr. David E. Siminoff, who has served as a director of the Company since December 2010, offered their letters of resignation from the Board of Directors effective November 3, 2017. The Board of Directors accepted their resignation letters and thanked them for their service. The resignations of Ms. Lepore and Mr. Siminoff are not a result of any disagreement with the Company, its management, the Board of Directors or any committee of the Board of Directors, or any matter relating to the Company's operations, policies or practices.

Composition of Committees of the Board of Directors

In connection with the resignations of Ms. Lepore and Mr. Siminoff, the Board of Directors reduced its size from nine members to seven members effective November 3, 2017. As of such date: (i) the Audit Committee consists of Mr. David Oppenheimer (serving as Chairperson), Ms. Michelle McKenna-Doyle and Mr. Andrew J. Gessow; (ii) the Nominating and Corporate Governance Committee consists of Mr. Gessow (serving as Chairperson), Ms. McKenna-Doyle and Mr. Steve M. Horowitz; and (iii) the Compensation Committee consists of Mr. Scott D. Raskin (serving as Chairperson) and Mr. Gessow.

Lead Independent Director

In addition, the Board of Directors appointed Mr. Raskin as lead independent director of the Board of Directors effective November 3, 2017. Mr. Raskin has served on the Board since February 2017.

Revisions to Director Compensation Policy

On October 30, 2017, the Board of Directors approved a revision to the Company's outside director compensation policy (the "Director Compensation Policy") such that each person who first becomes a non-employee director on or following such date will receive an award of restricted stock units as compensation for their service. The number of restricted stock units subject to this initial award will equal \$250,000 divided by the Company's closing stock price on the grant date, which will be the fifth trading day of the month immediately following the month in which the individual becomes a non-employee director. This initial award will vest in equal annual installments over the four (4) year period commencing on the individual's initial service date. Except as described above, the most recently approved Director Compensation Policy remains in effect.

Amendment to Performance-Based Restricted Stock Units

On September 28, 2017, the Compensation Committee approved an equity grant of 128,205 performance-based restricted stock units ("PSUs") to Mr. Mir Aamir, the Company's President and Chief Executive Officer. The PSUs were originally scheduled to vest upon the achievement of certain Company stock price goals, but were subsequently modified to provide incentives based on targets that can be directly tied to the Company's performance. On October 30, 2017, the Compensation Committee amended the performance goals applicable to the PSUs so that the PSUs will vest, if at all, upon the achievement of certain Company revenue and EBITDA performance targets over the three (3) year period from the date of grant. In addition, in the event of a change of control of the Company that occurs prior to the expiration of the three (3) year period following the grant date, any unvested PSUs will be assessed as if they were subject to a three (3) year time-based vesting schedule and will be subject to any severance protections set forth in Mr. Aamir's Change of Control Severance Agreement, dated August 2, 2016. Except as otherwise modified by the Compensation Committee, the PSUs remain subject to the terms originally approved by the Compensation Committee on September 28, 2017.
