Security Valuation:

Debt securities generally are valued by pricing services approved by the Fund's Board of Trustees, based upon market transactions for normal, institutional-size trading units of similar securities. The services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes. Debt securities for which quotations are readily available are valued at an over-the-counter or exchange bid quotation. Certain debt securities, which tend to be more thinly traded and of lesser quality, are priced based on fundamental analysis of the financial condition of the issuer and the estimated value of any collateral. Valuations developed through pricing techniques may vary from the actual amounts realized upon sale of the securities, and the potential variation may be greater for those securities valued using fundamental analysis.

Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Investments in other investment companies are valued at net asset value.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded.

The Fund may engage in swap transactions such as interest rate (and forward) swaps, consistent with its investment objective and policies to obtain a desired return at a lower cost than if the Fund had invested directly in the asset that yielded the desired return. Swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest or total return throughout the lives of the agreements. The interest to be paid or received on swaps is included in net realized gain/(loss) on investments. Unrealized gains are reported as an asset and unrealized losses are reported as a liability on the Statement of Assets and Liabilities. A realized gain or loss is recorded upon termination of swap agreements and is equal to the difference between the Fund's basis in the swap and the proceeds from (or cost of) the closing transaction. Swap agreements are stated at fair value. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller.

If there is a default by the counterparty to a swap contract, the Fund will be limited to contractual remedies pursuant to the agreements related to the transaction. There is no assurance that the swap contract counterparties will be able to meet their obligations

pursuant to the swap contracts or that, in the event of default, the Fund will succeed in pursuing contractual remedies. The Fund thus assumes the risk that it may be delayed in or prevented from obtaining payments owed to it pursuant to the swap contracts.

Investments for which market quotations are not readily available, or have quotations which management believes are not appropriate, are valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. If a security is valued at a fair value, such value is likely to be different from the last quoted market price for the security.

- (a) Zero coupon bond.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At February 28, 2007, these securities, which did not include any illiquid securities except the following, amounted to \$4,049,682 which represents 3.1% of net assets.

Security	Acquisition Date	Par/Unit	Cost	Value

12/01/16	08/27/93	\$ 227,741	\$ 232,276	\$ 226,083

- (c) Security purchased on a delayed delivery basis.
- (d) The Fund has been informed that each issuer has placed direct obligations of the U.S. Government in an irrevocable trust, solely for the payment of principal and interest.

- (e) Step bond. This security is currently not paying coupon. Shown parenthetically is the next interest rate to be paid and the date the Fund will begin accruing at this rate.
- (f) Security represents the underlying bond transferred to a special purpose entity established in a floating rate note transaction in which the Fund acquired the residual interest. This security serves as collateral serve in the transaction.
- (g) The security or a portion of the security is pledged as collateral for open futures contracts. At February 28, 2007, the total market value of securities pledged amounted to \$1,010,750.
- (h) The issuer is in default of certain debt covenants. Income is not being accrued. At February 28, 2007, the value of this security represents 0.1% of net assets.
- (i) Variable rate demand notes. These securities are payable upon demand and are secured by letters of credit or other credit support agreements from banks. The interest rates change periodically and the interest rates shown reflect the rates at February 28, 2007.
- (j) Cost for federal income tax purposes is \$180,442,034.
- (k) Unrealized appreciation and depreciation at February 28, 2007 based on cost of investments for federal income tax purposes was:

Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation
