FOR RELEASE: IMMEDIATE

TDS REPORTS SECOND QUARTER RESULTS

Note: Comparisons are year over year unless otherwise noted.

2Q 2008 Highlights

Enterprise/TDS Corporate

Edgar Filing: TELEPHONE & DATA SYSTEMS INC /DE/ - Form 424B3

- 7 percent increase in operating revenues, to \$1,274.4 million.
- 3 percent decrease in operating income, to \$149.7 million.
- Repurchased 1,015,650 TDS special common shares using \$39.6 million of a \$250 million stock repurchase program authorized in 2007 (\$38.7 million remains).

Wireless/U.S. Cellular®

- 9 percent increase in service revenues, to \$987.4 million.
- 45 percent increase in data revenues, to \$123.7 million.
- 5.7 percent increase in ARPU (average monthly revenue per unit), to \$53.27.
- Retail postpay churn remained flat at 1.4 percent; postpay customers comprised 95 percent of retail customers.

Wireline/TDS Telecom

- 7 percent increase in operating income, to \$35.2 million, despite a 4 percent decrease in operating revenues.
- 29 percent increase in ILEC DSL (digital subscriber line) customers, to 164,100; CLEC DSL customers totaled 42,500.
- 24 percent increase in ILEC data revenue, to \$21.7 million.
- Acquired Mosinee Telephone Company, LLC in May; 4,900 physical access lines in Wisconsin.

- ILEC equivalent access lines grew nearly 2 percent to 774,300; ILEC physical access lines declined to 577,000.

CHICAGO Aug. 7, 2008 Telephone and Data Systems, Inc. [AMEX:TDS, TDS.S] reported operating revenues of \$1,274.4 million for the second quarter of 2008, an increase of seven percent from \$1,192.8 million in the comparable period one year ago. The company recorded operating income of \$149.7 million, down from \$154 million in the second quarter of 2007. Net income available to common and diluted earnings per share were \$87.7 million and \$0.75, respectively, for the second quarter of 2008, compared to a net loss available to common and diluted loss per share of \$8.6 million and \$.08, respectively, in the comparable period one year ago.

We continue to experience steady gains in service and data revenues and in average revenue per customer at our wireless business, U.S. Cellular®, and improved operating margins through cost controls at TDS Telecom, our wireline business, said LeRoy T. Carlson, Jr., TDS president and CEO. The company overall increased its year-over-year operating revenues, and at the corporate level we continued the share repurchase program begun in 2007.

Both businesses have challenges, as well as opportunities. The market for wireless voice services continues to mature, and the wireline sector has ongoing competition from cable and wireless companies. Consumer anxieties related to the slow economy might also be having an impact. At U.S. Cellular, however, the low churn rate for retail postpay customers, together with continued increases in data revenues and sales of high-ARPU plans and smartphones, demonstrate that customers believe in U.S. Cellular's commitment to excellent network quality, customer service, and product and service selection. As wireless voice penetration increases, customer loyalty and demand for data services are critical to ongoing wireless growth and profitability.

TDS Telecom achieved double-digit increases in DSL customers and related revenues, and added equivalent access lines in its ILEC operation, although physical access lines continued to decline. The company also increased its operating income through effective cost controls, despite a decline in operating revenues.

As part of its goal to be the preferred broadband provider in its markets, TDS Telecom continues to increase the broadband speeds offered to its residential and commercial customers, and to develop new broadband services. The company's Triple Play bundles of voice, high-speed data, and Dish Network TV services enable it to compete effectively with cable offerings. In the second quarter, TDS Telecom exceeded sales targets for both Triple Play bundles and DISH Network services.

Settlement of variable prepaid forward contracts

During the second quarter of 2008, the company settled all of its outstanding Deutsche Telekom (DT) forward contracts and disposed of its remaining DT shares. In the quarter, interest and dividend income decreased \$130.3 million primarily due to a \$118 million decrease in DT dividend income as a result of the disposition of DT shares prior to the 2008 dividend by DT. Additionally, interest expense decreased \$19.7 million due to the settlement of the variable prepaid forward contracts. In the second quarter of 2007, the company recorded a \$220.2 million loss related to its DT, Vodafone Group Plc and VeriSign marketable equity securities and related variable prepaid forward contracts.

Guidance

Guidance for the year ending Dec. 31, 2008 is as follows. There can be no assurance that final results will not differ materially from this guidance.

PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**SAFE HARBOR CAUTIONARY STATEMENT**

This Form 8-K and/or press release attached to this Form 8-K contain statements that are not based on historical fact and represent forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, that address activities, events or developments that TDS intends, expects, projects, believes, estimates, plans or anticipates will or may occur in the future are forward-looking statements. The words believes, anticipates, estimates, expects, plans, intends, projects, similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors include those set forth below, as more fully discussed under Risk Factors in the most recent filing of TDS Form 10-K, as updated by any TDS Form 10-Q filed subsequent to such Form 10-K. However, such factors are not necessarily all of the important factors that could cause actual results, performance or achievements to differ materially from those expressed in, or implied by, the forward-looking statements contained in this document. Other unknown or unpredictable factors also could have material adverse effects on future results, performance or achievements. TDS undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. You should carefully consider the Risk Factors in the most recent filing of TDS Form 10-K, as updated by any TDS Form 10-Q filed subsequent to such Form 10-K, the following factors and other information contained in, or incorporated by reference into, this Form 8-K and/or press release attached to this Form 8-K to understand the material risks relating to TDS business.

- *Intense competition in the markets in which TDS operates could adversely affect TDS revenues or increase its costs to compete.*
- *A failure by TDS service offerings to meet customer expectations could limit TDS ability to attract and retain customers and could have an adverse effect on TDS operations.*
- *TDS system infrastructure may not be capable of supporting changes in technologies and services expected by customers, which could result in lost customers and revenues.*
- *An inability to obtain or maintain roaming arrangements with other carriers on terms that are acceptable to TDS could have an adverse effect on TDS business, financial condition or results of operations. Such agreements cover traditional voice services as well as data services, which are an area of strong growth for TDS and other carriers. TDS rate of adoption of new technologies, such as those enabling high speed data services, could affect its ability to enter into or maintain roaming agreements with other carriers.*
- *TDS currently recognizes a significant amount of inbound roaming revenues from its wireless business. As a result of recently announced acquisitions in the wireless industry, TDS anticipates that inbound roaming revenues could decline significantly over the next several quarters, which could have an adverse effect on TDS business, financial condition or results of operations.*

Edgar Filing: TELEPHONE & DATA SYSTEMS INC /DE/ - Form 424B3

- *A failure by TDS to acquire adequate radio spectrum could have an adverse effect on TDS business and operations.*
 - *To the extent conducted by the FCC, TDS is likely to participate in FCC auctions of additional spectrum in the future and, during certain periods, will be subject to the FCC's anti-collusion rules, which could have an adverse effect on TDS.*
 - *An inability to attract and/or retain management, technical, sales and other personnel could have an adverse effect on TDS business, financial condition or results of operations.*
 - *TDS assets are concentrated in the U.S. telecommunications industry. As a result, its results of operations may fluctuate based on factors related entirely to conditions in this industry.*
-

- *The expected future completion of recently announced acquisitions will lead to increased consolidation in the wireless telecommunications industry. TDS' lower scale relative to larger wireless carriers could prevent or delay its access to new products including handsets, new technology and/or new content and applications which could adversely affect TDS' ability to attract and retain customers and, as a result, could adversely affect its business, financial condition or results of operations.*
- *Changes in general economic and business conditions, both nationally and in the markets in which TDS operates, could have an adverse effect on TDS' business, financial condition or results of operations.*
- *Changes in various business factors could have an adverse effect on TDS' business, financial condition or results of operations. These business factors may include but are not limited to, demand, pricing, growth, average revenue per unit, penetration, churn, expenses, customer acquisition and retention costs, roaming rates, minutes of use, and mix and costs of products and services.*
- *Advances or changes in telecommunications technology, such as Voice over Internet Protocol, WiMAX or LTE (Long-Term Evolution), could render certain technologies used by TDS obsolete, could reduce TDS' revenues or could increase its costs of doing business.*
- *Changes in TDS' enterprise value, changes in the supply or demand of the market for wireless licenses or telephone company franchises, adverse developments in the business or the industry in which TDS is involved and/or other factors could require TDS to recognize impairments in the carrying value of TDS' license costs, goodwill and/or physical assets.*
- *Costs, integration problems or other factors associated with acquisitions/divestitures of properties or licenses and/or expansion of TDS' business could have an adverse effect on TDS' business, financial condition or results of operations.*
- *A significant portion of TDS' wireless revenues is derived from customers who buy services through independent agents and dealers who market TDS' services on a commission basis. If TDS' relationships with these agents and dealers are seriously harmed, its wireless revenues could be adversely affected.*
- *TDS' investments in technologies which are unproven or for which success has not yet been demonstrated may not produce the benefits that TDS expects.*
- *A failure by TDS to complete significant network construction and system implementation as part of its plans to improve the quality, coverage, capabilities and capacity of its network could have an adverse effect on its operations.*
- *Financial difficulties of TDS' key suppliers or vendors, termination or impairment of TDS' relationships with such suppliers or vendors, or a failure by TDS to manage its supply chain effectively could result in delays or termination of TDS' receipt of required equipment*

Edgar Filing: TELEPHONE & DATA SYSTEMS INC /DE/ - Form 424B3

or services, or could result in excess quantities of required equipment or services, any of which could adversely affect TDS' business, financial condition or results of operations.

- *TDS has significant investments in entities that it does not control. Losses in the value of such investments could have an adverse effect on TDS' results of operations or financial condition.*
 - *War, conflicts, hostilities and/or terrorist attacks or equipment failure, power outages, natural disasters or breaches of network or information technology security could have an adverse effect on TDS' business, financial condition or results of operations.*
 - *The market prices of TDS' Common Shares and Special Common Shares are subject to fluctuations due to a variety of factors such as: general economic conditions; wireless and telecommunications industry conditions; fluctuations in TDS' quarterly customer activations, churn rate, revenues, results of operations or cash flows; variations between TDS' actual financial and operating results and those expected by analysts and investors; and announcements by TDS' competitors.*
-

- *Changes in interpretations of accounting requirements, changes in industry practice, identification of errors or changes in management assumptions could require amendments to or restatements of financial information or disclosures included in this or prior filings with the SEC.*
- *Restatements of financial statements by TDS and related matters, including resulting delays in filing periodic reports with the SEC, could have an adverse effect on TDS' credit rating, liquidity, financing arrangements including the ability to borrow under its revolving credit facility, capital resources or ability to access the capital markets, including pursuant to shelf registration statements; could adversely affect TDS' listing arrangements on the American Stock Exchange and/or New York Stock Exchange; and/or could have other negative consequences, any of which could have an adverse effect on the trading prices of TDS' publicly traded equity and/or debt and/or on TDS' business, financial condition or results of operations.*
- *Changes in facts or circumstances, including new or additional information that affects the calculation of potential liabilities for contingent obligations under guarantees, indemnities or otherwise, could require TDS to record charges in excess of amounts accrued in the financial statements, if any, which could have an adverse effect on TDS' financial condition or results of operations.*
- *A failure to successfully remediate the existing material weakness in internal control over financial reporting in a timely manner or the identification of additional material weaknesses in the effectiveness of internal control over financial reporting could result in inaccurate financial statements or other disclosures or fail to prevent fraud, which could have an adverse effect on TDS' business, financial condition or results of operations.*
- *Early redemptions of debt or repurchases of debt, issuances of debt, changes in prepaid forward contracts, changes in operating leases, changes in purchase obligations or other factors or developments could cause the amounts reported under Contractual Obligations in TDS' most recent Annual Report on Form 10-K, as updated by the Quarterly Reports on Form 10-Q, to be different from the amounts actually incurred.*
- *An increase in the amount of TDS' debt in the future could subject TDS to higher interest costs and restrictions on its financing, investing and operating activities and could decrease its cash flows and earnings.*
- *Uncertainty of access to capital for telecommunications companies, deterioration in the capital markets, other changes in market conditions, changes in TDS' credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to TDS, which could require TDS to reduce its construction, development and acquisition programs.*
- *Changes in the regulatory environment or a failure by TDS to timely or fully comply with any regulatory requirements could adversely affect TDS' financial condition, results of operations or ability to do business.*
- *Changes in income tax rates, laws, regulations or rulings, or federal or state tax assessments could have an adverse effect on TDS' financial condition or results of operations.*

- *Settlements, judgments, restraints on its current or future manner of doing business and/or legal costs resulting from pending and future litigation could have an adverse effect on TDS' financial condition, results of operations or ability to do business.*
 - *The possible development of adverse precedent in litigation or conclusions in professional studies to the effect that radio frequency emissions from handsets, wireless data devices and/or cell sites cause harmful health consequences, including cancer or tumors, or may interfere with various electronic medical devices such as pacemakers, could have an adverse effect on TDS' wireless business, financial condition or results of operations.*
 - *Certain matters, such as control by the TDS Voting Trust and provisions in the TDS Restated Certificate of Incorporation, may serve to discourage or make more difficult a change in control of TDS.*
-

- *Any of the foregoing events or other events could cause revenues, customer additions, operating income, capital expenditures and/or any other financial or statistical information to vary from TDS forward-looking estimates by a material amount.*

TDS undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. Readers should evaluate any statements in light of these important factors.
