SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2011

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-32609

Rockwood Holdings, Inc.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

52-2277366
(I.R.S. Employer
Identification No.)

100 Overlook Center, Princeton, New Jersey 08540

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(Address of principal executive offices) (Zip Code)

(609) 514-0300

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$0.01 per share	New York Stock Exchange

Securities registered pursuant to section 12(g) of the Act:

None

(Title of class)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold as of June 30, 2011 was \$3,256,700,260.

As of February 17, 2012, there were 77,380,090 outstanding shares of common stock, par value \$0.01 per share, of the Registrant.

DOCUMENTS INCORPORATED BY REFERENCE

The definitive proxy statement relating to the registrant's Annual Meeting of Stockholders, to be held on May 18, 2012, is incorporated by reference in Part III to the extent described therein.

PART I

Forward-Looking Statements

This document contains forward-looking statements. Forward-looking statements within the context of the Private Securities Litigation Reform Act of 1995 are not statements of historical fact and may involve a number of risks and uncertainties. Forward-looking statements give our current expectations or forecasts of future events and estimates of amounts not yet determinable. We have used the words anticipate, estimate, expect, project, intend, plan, believe, predict, could, may and other words and terms of similar meaning, including references to assumptions, in this report to identify forward-looking statements. These forward-looking statements are made based on expectations and beliefs concerning future events affecting us and are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those expressed in or implied by these forward-looking statements. In particular, these factors include, among other things:

- our business strategy;
- changes in the general economic conditions in North America and Europe and in other locations in which we currently do business;
- competitive pricing or product development activities affecting demand for our products;
- technological changes affecting production of our materials;
- fluctuations in interest rates, exchange rates and currency values;
- availability and pricing of raw materials;
- governmental and environmental regulations and changes in those regulations;
- fluctuations in energy prices;
- changes in the end-use markets in which our products are sold;
- hazards associated with chemicals manufacturing;
- our ability to access capital markets;
- our high level of indebtedness;
- risks associated with negotiating, consummating and integrating acquisitions;
- risks associated with competition and the introduction of new competing products, especially from the Asia-Pacific region;
- risks associated with international sales and operations; and
- risks associated with information security.

You should keep in mind that any forward-looking statements made by us in this document or elsewhere speak only as of the date on which we make them. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We disclaim any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 1. Business.

Unless we indicate otherwise or the context otherwise requires, any references to we, our, us, the Company or Rockwood refer to Rockwood Holdings, Inc. and its consolidated subsidiaries.

Unless otherwise noted, all balance sheet related items as of December 31, 2011 which are denominated in Euros are converted at the December 31, 2011 exchange rate of 1.00 = \$1.2961.

General

Rockwood is a global developer, manufacturer and marketer of high value-added specialty chemicals and advanced materials used for industrial and commercial purposes. Rockwood is focused on surface treatment and lithium chemicals, advanced ceramics, titanium dioxide pigments, iron-oxide pigments, timber-treatment chemicals and clay-based additives. Rockwood was incorporated in Delaware in September 2000 in connection with an acquisition of certain assets, stock and businesses from Laporte plc (Laporte) on November 20, 2000 (the KKR Acquisition) by affiliates of Kohlberg Kravis Roberts & Co. L.P. (KKR). Affiliates of KKR control significantly less than a majority (approximately 10.3% as of December 31, 2011) of the voting power of the Company s outstanding common stock.

Our products consist primarily of inorganic chemicals and solutions and engineered materials. They are often customized to meet the complex needs of our customers and to enhance the value of their end products by improving performance, providing essential product attributes, lowering costs and/or making them more environmentally friendly. We generally compete in niche markets in a wide range of end-use markets, including chemicals and plastics, metal treatment and general industry, automotive, life sciences (including pharmaceutical and medical markets), construction, specialty coatings, and electronics and telecommunications. No single end-use market accounted for more than 17% of our 2011 net sales.

We have a number of growth product lines, such as lithium in our Fine Chemicals business, aerospace products in our Surface Treatment business and ceramic medical device components in our Advanced Ceramics business, which are complemented by a diverse portfolio of businesses that historically have generated stable revenues. Our high margins, diverse customer and end-use market base, capital discipline and ongoing productivity improvements provide us with a platform to capitalize on market growth opportunities.

We operate globally, manufacturing our products in 81 facilities in 23 countries and selling our products and providing our services to more than 60,000 customers, including some of the world's preeminent companies. We believe our products are generally critical to our customers' products performance, but account for a small percentage of the total cost of their products. No single customer accounted for more than 2% of our 2011 net sales. For a geographic description of the origin of our net sales and location of our long-lived assets, see Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, in the accompanying consolidated financial statements.

On January 7, 2011, we completed the sale of our plastic compounding business, which manufactured specialty plastic compounds for the wire and cable business, as well as medical applications and other uses. This business comprised substantially all of our former Specialty Compounds segment. In the financial statements contained herein, the results of the plastic compounding business sold have been presented as discontinued operations for all periods presented. The rubber/thermoplastic compounding business was retained and is included in the Corporate and other category for segment reporting purposes. See Item 8. Financial Statements and Supplementary Data - Note 2, Discontinued Operations, for further details.

We operate our business through the following four business segments: (1) Specialty Chemicals; (2) Performance Additives; (3) Titanium Dioxide Pigments and (4) Advanced Ceramics. The following table sets forth net sales of each segment, and the percentage of our net sales for the year ended December 31, 2011, as well as our principal products and our principal end-use markets. For financial information about each segment, see Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information.

Diverse Customer and End-Use Market Base. We operate a diverse portfolio of distinct specialty chemicals and advanced materials businesses. We have more than 60,000 customers worldwide that cover a wide variety of industries and geographic areas. We operate a geographically diverse business, with 55% of our net sales in 2011 generated from shipments to customers in Europe, 23% to North America (predominantly the United States), 14% to Asia and 8% to the rest of the world. No customer accounted for more than 2% of such net sales, and our top ten customers represented only approximately 8% of such net sales. Our largest end-use market represented approximately 17% of such net sales.

The following chart provides a breakdown of our 2011 net sales by end-use markets:

Within these end-use markets, there is further diversification by sector, product and region. For example, within the construction end-use market, our Performance Additives segment companies provide materials for new construction as well as companies that focus on remodeling and renovation. In addition, we serve construction materials clients in both the residential and commercial sectors located in North America, Europe and Asia. Within the life sciences end-use market, we serve a number of sectors, including the medical applications sector through our Advanced Ceramics segment and the pharmaceutical sector through our Specialty Chemicals segment.

Operating Segments

The following describes each of our operating segments, as well as the principal products or principal divisions within each segment.

Specialty Chemicals (37% of 2011 net sales)

Our Specialty Chemicals segment operates under the *Chemetall* brand name and develops and manufactures metal surface treatment products and services, lithium chemicals and fine chemicals for a wide range of industries and end markets. This segment is comprised of two business

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

lines: (1) Surface Treatment, which supplies surface treatment products and solutions for metal processing industries; and (2) Fine Chemicals, which supplies lithium products across the entire value chain from raw materials to specialty lithium compounds and advanced metal-based specialty chemicals to niche markets. Our Specialty Chemicals segment generated net sales of \$1,338.3 million, \$1,163.2 million and \$996.6 million for the years ended December 31, 2011, 2010 and 2009, respectively. See Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, for additional financial information regarding our Specialty Chemicals segment.

Surface Treatment

We believe that our Surface Treatment business line is a leading global supplier of surface treatment products and solutions. Surface Treatment products are used for a variety of applications and serve the automotive, aerospace and general industrial markets,

including steel and metal-working industries. This business line supplies more than 5,000 different products, many of which are based on proprietary formulations and extensive application know-how, to over 50,000 customers and operates in different locations in over 20 countries for production, warehousing or research and development. Surface Treatment operates in the following core end-markets: Automotive Technologies and Components, Cold Forming and Coil, General Industry and Aerospace Technologies.

We develop and supply products and solutions for the chemical pre-treatment of metals and other substrates, some of which are customized for individual customers and applications. Our products and solutions are critical to many areas of the metal processing industry because they protect metals from corrosion, facilitate forming and machining, allow parts to be optimally prepared for the painting process where paint adhesion is critical and ensure good coating adhesion. Other products are used in the cleaning and maintenance of aircraft. As an integrated part of the business, we also offer a full range of customer services, including process control and analysis of chemical baths at clients' facilities.

Surface Treatment competes in markets characterized by significant barriers to entry, proprietary manufacturing technologies and know-how, demanding product-handling requirements, rigorous product quality and performance standards and specifications and longstanding service-intensive customer relationships. In order to remain competitive, we are focused on developing new products, improving process technologies, expanding our customer base, and broadening our technology capabilities in existing and new markets through internal research and development and bolt-on acquisitions. We have recently expanded our production in India and are building a new plant in Michigan in the United States which is expected to be completed in late 2012. These investments will help us meet the increasing demand for our product portfolio and consolidate our plants in the United States. We also are involved with a number of research and development projects with industrial partners and scientific institutes on a regular basis that help us fulfill our needs for more cost efficient and environmentally compatible technologies. As a result, new products and improved technologies were launched in recent years and more are expected in the future.

The core end-markets that Surface Treatment operates in are as follows:

Automotive Technologies and Components. We provide surface treatment products and solutions for automotive OEMs, including an entire range of products and services for use in the paint shop step of car-body and automotive component manufacture. The products and services we provide typically represent a low percentage of total car body production costs, but have high value in terms of corrosion protection and surface quality. Major applications include car-body treatment (zinc-phosphating), paint coagulation and cleaning and pre-treatment of automotive components such as aluminum wheels. Our services typically include intensive process control and chemical management in the customer's production processes. We are in the process of implementing zinc-phosphate replacements globally, and believe that this represents an attractive growth area in this market. We participate with our joint ventures in China and India for the growth of this segment in the emerging markets.

Cold Forming and Coil. We provide products and services used to facilitate the cold forming of tubes, wire drawing and cold extrusion of metal. We provide products and services used in forming, cleaning and the pre-treating of metal sheets used in the production of steel and aluminum coil.

General Industry. General industry includes the largest number of customers among the Surface Treatment businesses. We offer a range of products and services to a broad range of industrial end-markets that have metal surface treatment applications, including cleaning, activation, conversion coating and final rinsing. Our products include cleaners, iron phosphates, coolants, paint strippers and flocculants. We have also expanded our product range in North America and China, with products in the field of metalworking fluids. Over the last few years, we have introduced a new generation of iron-phosphating products in the U.S. market, which we expect will provide growth in the next few years, and began offering silane or oxsilan-based systems. The markets for General Industry include household appliances manufacturing, can producers, heating, ventilation, aluminum finishing and other diverse end-markets. In addition, we produce specialty products, which are similar to metal surface treatment products, but are used on glass substrates for glass manufacturers, including specialty cleaners, polishing products, cutting oils and cooling lubricants.

Aerospace Technologies. We provide products and services for Aerospace OEMs, airlines and maintenance companies. Aerospace Technologies focuses on four major application areas: cleaning; corrosion protection; maintenance chemicals; and sealants. Cleaning products are used for the interior and exterior cleaning of airplanes and range from daily cleaning to complete aircraft overhaul. Corrosion protection products include waxes used to protect airframes. Maintenance chemicals for aircraft engines and turbines include high performance cleaners and products for non-destructive testing of engines, and aircraft sealants provide high technology sealing solutions for airplanes and are expected to contribute to growth in the next few years. In the last few years, we introduced further variances of low-density sealants in the market place.

Competition

We believe we are a leader in the global metal surface treatment market. Our competitors include Henkel AG & Co. KGaA, Nihon

Parkerizing Co., Ltd., PPG Industries, Inc. and Nippon Paint Co., Ltd. Competition in this market is based primarily on customer service, product quality and technological capabilities.

Customers

Surface Treatment serves a large customer base that is dependent on the industry served and its specific customer needs. Surface Treatment's largest customers include Daimler AG, ArcelorMittal, Volkswagen AG, European Aeronautic Defence and Space Company (EADS) N.V and Ford. The composition of the customer base varies widely among product groups and industries served. The Automotive Technologies and Components business division serves approximately 20 customers, primarily global OEMs, and approximately 500 small to large customers in the components markets; the Cold Forming and Coil business division serves approximately 800 mid-size to large customers; the General Industry business division serves approximately 45,000 small to large customers in a broad range of industries worldwide; and the Aerospace Technologies business division serves approximately 4,000 small to large customers worldwide.

Fine Chemicals

Our Fine Chemicals business line consists of our lithium, metal sulfides and special metals product lines. We believe that our Fine Chemicals business line is the leading global producer of lithium products, specialty lithium compounds and chemicals and advanced metal-based specialty chemicals.

Fine Chemicals develops and manufactures a broad range of basic lithium compounds, including lithium carbonate, lithium hydroxide, lithium chloride, and value added lithium specialties and reagents, including butyllithium and lithium aluminum hydride. Lithium is a key component in products and processes used in a variety of applications and industries, which range from lithium batteries, high performance greases, thermoplastic elastomers for car tires, rubber soles and plastic bottles to intermediates in the pharmaceutical industry. In our Fine Chemicals business, we operate our lithium business along the following five business divisions reflecting its core end-markets: (1) Lithium Salts; (2) Special Salts; (3) Butyllithium/Lithium Metal; (4) Battery Products and (5) Lithium Specialties.

In addition to developing and supplying lithium compounds, we provide technical service, including the handling and use of reactive lithium products. We also offer our customers recycling services for lithium containing by-products resulting from synthesis with organolithium products, lithium metal and other reagents. We plan to continue to focus on the development of new products and applications. Currently, we are in the process of developing lithium compounds for several near- to medium-term, new and potentially high growth products for various applications, such as pharmaceuticals and batteries for electric vehicles.

In August 2009, the U.S. Department of Energy awarded \$28.4 million in Recovery and Reinvestment Act funds, subject to certain terms and conditions, to our Fine Chemicals business. We are using the funds to expand and upgrade the production of lithium compounds used in lithium-ion batteries for hybrid and electric vehicles at our Silver Peak, Nevada and Kings Mountain, North Carolina facilities. In addition to the funds from this grant, we expect to invest \$39.6 million in the project by April 2013. In addition, in September 2009, the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety awarded \$5.7 million to our Fine Chemicals business to set up a pilot plant for the recycling of lithium-ion batteries. Including the funds from this grant, the total investment was \$49.7 million.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In February 2012, we announced that we plan to invest \$140 million in a new lithium carbonate production plant in Chile. This new investment, along with the expansion in the United States in North Carolina, is expected to increase total annual production capacity to 50,000 metric tons of lithium carbonate by the end of 2013.

Fine Chemicals also develops and manufactures advanced metal-based specialty chemicals along two business divisions based on its principal product groups: (1) Metal Sulfides, which develops and manufactures natural and synthetic metal sulfides used in brake pads, clutch facings and cutting and grinding wheels and (2) Special Metals, which develops and manufactures cesium products for the chemical and pharmaceutical industries and zirconium, barium and titanium products for various pyrotechnical applications, including airbag igniters. In order to further strengthen our competitive position in the metal-based specialty chemicals market, we are focused on the production of new variations of synthetic metal sulfides and new cesium products in the chemicals industry, the pharmaceuticals industry, the defense industry and for use in catalytic applications. We also continuously monitor our customers' industries for potential new applications for our products. In addition, we expect to expand our business by penetrating growth areas such as India and China.

We expect that demand for synthetic metal sulfides will increase, particularly in Europe, as a result of the continuing substitution for asbestos-based friction linings, the transition from natural sulfides to synthetic sulfides spurred in part by environmental concerns and the transition from drum to disk brakes in Asia and the Americas. We believe further opportunities for growth exist from the use of the

newly developed metal sulfides as solid lubricants or as additives for plastics.

Principal Business Divisions

Lithium

Lithium Salts. We develop and manufacture basic lithium compounds, which serve a wide range of industries and applications, and potash. Our products include: (1) lithium carbonate, which is used as a fluxing agent for enamels, glass and ceramic production to lower process temperature in aluminum electrolysis, and as a cement additive for construction applications; (2) lithium hydroxide, which is principally used in high performance greases for automotive and industrial applications; (3) lithium nitrate, which is principally used in the rubber industry; (4) lithium chloride, which is principally used in gas and air treatment; and (5) potash, which we produce as a by-product at our salar in Chile.

Special Salts. To focus more on the specialties within the salts business, we develop and manufacture products including: (1) lithium phosphate which is used as a catalyst for chemical reactions; (2) lithium bromide, which is traditionally used for air conditioning applications and (3) lithium carbonate pharmaceutical grade, which is used in pharmaceutical applications in the United States and Europe.

Butyllithium/Lithium Metal. Butyllithium is used as a polymerization initiator for synthetic rubber and thermoplastic elastomers and as a reagent for the synthesis of active pharmaceutical ingredients and agrochemicals. Lithium metal is used in organic synthesis processes, primarily in the area of steroid chemistry and vitamins. Generally, these products require a high degree of handling, transport and application know-how and customer service due to their high reactivity. We benefit from being a major supplier with butyllithium manufacturing and handling facilities in the United States, Germany, India and Taiwan.

Battery Products. We develop and manufacture lithium products for electronic applications, mainly for the primary (disposable) and secondary (rechargeable) battery industries. Our major product is battery grade lithium carbonate, which is the main component used in the production of thin, lightweight lithium-ion batteries. Lithium-ion-based batteries are used extensively in consumer electronics, such as mobile phones, camcorders, laptops and power tools. Our other products are battery grade lithium hydroxide, which has become more important for the development of high-performance lithium-ion batteries, and battery grade lithium metal, which is used as anode material for primary batteries. We are currently introducing a new generation of conductive lithium salts to the battery market, which we believe has the potential to drive significant growth in the future. We also expect increased demand for lithium products as a result of increased demand for longer-life lithium-based batteries in electric and hybrid electric automobiles.

Lithium Specialties. We develop and manufacture lithium compounds and other products for life science applications, such as special reagents for the synthesis of drug intermediates as well as for the flavor and fragrances industry. The principal products in this business division are lithium aluminum hydride and lithium amides, for which we believe we hold leading market positions. We also produce various other compounds which include lithium metal, grignard reagents and alkoxides. Our research and development team often works closely with research and development departments of pharmaceutical companies, especially in the European market, in order to develop products and solutions tailored for their needs. In addition, broad variations of our lithium specialties are designed to produce liquid crystals for flat screens.

Metal-based Specialty Chemicals

Metal Sulfides. This business division has two major product lines: friction stabilizers and abrasive additives. Friction stabilizers enhance the power and performance of brake pads and clutch facings and primarily serve the automotive supplier industry while abrasive additives are additive compounds. The demand for metal sulfides is driven primarily by the demand in the automotive supplier industry.

Special Metals. We develop and manufacture a unique range of products based on special metal compounds derived from cesium, zirconium, titanium, barium and rubidium. These products are used in highly specialized, technology-driven end-applications such as X-ray diagnostic systems and airbags, and serve various end-markets, such as chemical, pharmaceutical, metallurgical, automotive, electronics and pyrotechnical industries.

Competition

Lithium. We believe the global lithium market consists of three major producers and a number of other small producers mainly from China. We believe that we are the global market leader in the lithium compounds market. While we offer a diverse range of products from raw materials to specialty lithium compounds, FMC Corporation offers mainly specialty lithium compounds, and Sociedad Quimica y Minera de Chile S.A. (SQM) offers a more limited product line focused on basic lithium compounds. Competition in this

market is based on product quality, reliability of products and customer service.

Metal-based Specialty Chemicals. We believe that in the metal-based specialty chemicals business, Fine Chemicals holds a leading market position in its niche markets. We have a leading position in friction materials and are the only supplier offering a full product range of friction stabilizers and abrasive additives based on metal sulfides. Key competitors include: Dow Corning Corporation, Catalise Industria e Comercio de Metals Ltda and Prince Minerals, Inc. in the Metal Sulfides division and Cabot Corporation and Sigma Aldrich Corporation in the Special Metals division. Competition in the metal-based specialty chemicals markets in which Fine Chemicals competes is based on product quality and product diversity.

Customers

Fine Chemicals serves approximately 1,000 customers worldwide in its lithium business and 700 customers worldwide in its metal-based specialty chemicals products business. Fine Chemicals customers of lithium products include Bayer CropScience (a division of Bayer AG), Kraton Performance Polymers Inc., Energizer Holdings, Inc. and Royal DSM N.V.

Performance Additives (21% of 2011 net sales)

Our Performance Additives segment consists of business lines which develop and manufacture a range of specialty chemicals used in industrial and consumer products and processes to enhance performance or create unique characteristics. This segment manufactures and markets products that are based on a focused research and development effort and a strong technology base. Our Performance Additives segment generated net sales of \$784.4 million, \$726.7 million and \$671.5 million for the years ended December 31, 2011, 2010 and 2009, respectively. See Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, for additional financial information regarding our Performance Additives segment.

Color Pigments and Services

Our Color Pigments and Services business line is a global producer of synthetic iron-oxide and other inorganic pigments in a wide range of yellow, red, orange, ultramarine blue, black, manganese violet or blended shades, and serves the construction, paints and coatings, plastics, and specialty application markets with powder, granular and liquid grades. Color Pigments and Services focuses on developing and manufacturing high value-added inorganic pigments. The business also offers a number of unique pigment dispensing systems. Our Color Pigments and Services business line has been driven by product innovation, our brand names and our customer and technical service, including customer-specific color blending.

In December 2011, we announced that we will build an advanced technology production facility in Augusta, Georgia for the synthesis of iron-oxide pigments. This investment will be approximately \$115 million and is expected to supply the highest quality color pigments to North American customers, to strengthen customer service and to reduce lead time and improve product development potential. This plant is expected to commence operations in the first half of 2013. Following the completion of this plant, we expect to close our St. Louis, Missouri manufacturing facility and part of our Beltsville, Maryland facility.

Principal Products

Construction Color Pigments and Services. We develop and manufacture principally iron-oxide pigments for manufacturers of construction products for use in the coloring of concrete products, including paving stones, bricks, concrete blocks, roofing tiles, stucco and mortar. Color Pigments and Services' major U.S. brand is *Davis Colors* and its other key brands include *Granufin/Granumat*, *Hydrotint*, *Mix-Ready* and *Chameleon*. *Granufin* is a unique, dry, microgranulated pigment that combines the flow characteristics of a liquid with the storage and handling advantages of a powder. The *Granumat* dispensing system offers a variety of configurations and features designed to accommodate the varying requirements and budgets of concrete product manufacturers. *Granufin* pigments and the *Granumat* system improve product handling and color consistency for our customers. Our *Chameleon* system, which works in combination with our liquid pigments, automatically weighs, blends and conveys colors into a ready-mix truck using a standard personal computer and custom-developed Windows-based software.

Paints, Coatings and Colorants. We also develop and manufacture color pigments for the paints, coatings, plastics, paper and rubber end-use markets including our brands *Ferroxide*, *Trans-oxide*, *Solaplex* and *Colourplex*. We produce a wide variety of pigments for these markets that include synthetic iron-oxides, corrosion inhibitor pigments, complex inorganic color pigments and process natural pigments such as burnt umbers and siennas. The largest application for these products is colorant used in architectural, industrial and special purpose paints and coatings. Color, ease of dispersion and chemical stability are the primary characteristics of our products, which can be used in a wide variety of both solvent and water-borne systems. We believe that a number of Color Pigments and Services' products are considered industry standards in the markets in which we compete, such as our Mapico yellow and Copperas red pigments for architectural and industrial applications and our heat-stable tans, which can tolerate applications requiring

high-temperature processing, such as plastic compounding and roofing granules.

Specialties. Our iron-oxide pigments are also used in a wide variety of specialty applications such as toner for large printers and copiers, security inks used to print bank notes, catalysts for styrene production and cosmetics. Each of these markets requires specialized pigments with unique properties which are often as important as the coloring characteristics. For example, printer toners require specific magnetic properties whereas pigments used in cosmetics require color and purity.

Competition

We believe that there are a significant number of producers of iron-oxide pigments across the globe at both the pigment synthesis and finishing levels with whom we compete. We believe these producers include Lanxess AG, Cathay Pigments Group, Interstar Materials Inc. and Shanghai Yipin Pigments Co., Ltd. as well as other producers in Japan and China. Competition in this segment is based on customer service, product attributes, such as product form and quality, and price. Product quality is critical in the higher end of the business on which Color Pigments and Services focuses, as inconsistent product quality can have an adverse impact on the color consistency of the end-product.

Customers

Color Pigments and Services' key customers include Akzo Nobel, Oldcastle (CRH plc), The Sherwin-Williams Company, Evonik Degussa GmbH, and W.R. Grace & Co., each of which has been our customer for at least ten years. Color Pigments and Services' customer base is highly fragmented.

Timber Treatment Chemicals

The Timber Treatment Chemicals business line is a manufacturer of wood protection products primarily in North America and Europe, and we market these products through our joint venture formed in 2007. Wood protection products enhance the performance of wood by increasing its longevity through protection from decay and fungal or insect attack. Our specialty timber chemicals also add water repellency, fire retardancy, mold inhibition and other properties to wood products. Timber Treatment Chemicals' products include wood protection products based on our alkaline copper quaternary, or ACQ technology, which was awarded the Environmental Protection Agency (EPA) Presidential Green Chemistry Challenge Award in 2002; *Ecolife*, our new non-metallic wood preservative technology; and chromated copper arsenate, or CCA. In 2008, we introduced our newest *Ecolife* system which utilizes *Ecovance*, a high-performance non-metallic preservative with enhanced environmental benefits. Introductory commercialization began in 2008, but did not have a material impact in 2011. We expect *Ecolife* to take advantage of market desire for non-metallic wood protection products and the growth potential in the development and commercialization of the next generation of wood protection products. Other products include Clearwood, our wood protection product for wood windows and doors, as well as a range of specialty additives with fire retardant, water repellent or moldicide properties. Applications for our products include wood protection products used for decking, fencing, playground equipment, garden furniture, house construction materials, utility poles, and other wood constructions.

In addition, Timber Treatment Chemicals provides a broad range of technical expertise and services to its customers. In particular, Timber Treatment Chemicals works closely with its customers to assist them in reducing the total cost of their manufacturing process by supplying

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

timber treatment chemicals as well as treatment equipment along with technical support. We believe that Timber Treatment Chemicals is a leading provider in North America, Europe and Japan of new generation alternative timber treatment chemicals, such as ACQ and *Ecolife*, which provide enhanced environmental benefits, as they do not contain chrome or arsenic. Many of our Timber Treatment products are registered pesticides and subject to extensive regulation.

Our Timber Treatment Chemicals business also manufactures inorganic chemicals such as nitrates and chlorides for various industrial applications including chemicals that are added to concrete as curing accelerants and corrosion inhibitors, chemicals that are used for odor control in water treatment, galvanizing fluxes, micronutrients, pesticides and catalysts used in the manufacture of textile resins.

Principal Products

We develop and manufacture a broad range of wood protection products, fire retardant and specialty chemicals for use in residential and industrial wood applications. In addition, we provide treatment equipment, which facilitates the handling and treatment of wood and chemicals, and we provide comprehensive technical support services to our customers. Timber Treatment Chemicals' key brands include *Ecolife*, *Preserve*, *Preserve Plus*, *Ultrawood*, *D-Blaze*, *Clearwood* and *SupaTimber*.

We also develop and manufacture inorganic metallic chemicals for certain specialty markets. These include zinc chloride-based products, other chlorides, and a range of nitrates and other chemicals. Some of these products are manufactured using by-products

from other large chemical companies.

Competition

We believe that our Timber Treatment Chemicals business is one of the leading manufacturers of wood protection products in North America, along with Arch Chemicals, Inc., which was acquired by Lonza Group Ltd. in 2011 and Osmose, Inc. Other competitors, particularly in Europe, are BASF Group, Kurt Obermeier GmbH & Co. KG and Rutgers AG. Competition for wood protection products is mainly based on price, customer support services, innovative technology and product range. In the inorganic chemicals market, we operate in niche areas, and therefore have few competitors overall. Competition in the inorganic chemicals market is mainly based on quality, customer support services and price.

Customers

Timber Treatment Chemicals sells its products primarily to wood processors who pressure-treat wood. Major customers include Allweather Wood, LLC., C.M. Tucker Lumber Companies, LLC., Envirofor Preservers Ltd., Georgia-Pacific Corporation, Jeld-Wen, Inc., Koshii Preserving Co. Ltd., Land and Sea Forest Products of Pennsylvania Corporation, Spartanburg Forest Products, Inc., Sunbelt Forest Products Corporation, and Sundre Forest Products, Ltd. Customers of our inorganic chemicals product line include Evonik Degussa GmbH, Rohm and Haas Company (a subsidiary of The Dow Chemical Company), Nalco An Ecolab Company and W.R. Grace & Co. Most of these companies have been our customers for at least ten years.

Clay-based Additives

Our Clay-based Additives business develops and manufactures a range of specialty rheology modifiers and additives. These products are used in a wide variety of applications to modify viscosity, thickness and flow characteristics, and keep solids in suspension. End products in which these additives are used include industrial and architectural coatings, oilfield drilling fluids, inks, household care products and composites.

Principal Products

Coatings and Inks. We offer a comprehensive line of additives which modify the viscosity, flow and suspension properties of coatings and inks, including *Claytone* for the manufacture of industrial and special purpose coatings, such as bridge, marine and maintenance paints, architectural coatings and associative thickeners; *Optigel* clays for water-based coatings and *Laponite* for the manufacture of automotive coatings. Our *Garamite* additives are used in the manufacture of high solids and low volatile organic content epoxy coatings for industrial applications.

Paper. We serve the paper industry with a product line that includes bentonite retention aids, which are used in the paper-making process to reduce fiber losses and aid in water drainage from the sheet and an additive, which provides fade-resistant color for carbonless copy paper. We also produce a grade of *Laponite* which is used in the production of clear, flexible and moisture-resistant films and coatings with conductive, anti-static and anti-sticking properties, that are used in the manufacture of specialty photographic and anti-static papers, ink jet papers and anti-static packaging. Our *Fulacolor* clay product range is used in the color developing system for carbonless copy paper.

Consumer and Household Care Products. We develop and manufacture a wide range of natural clay-based rheology modifiers, including *Gelwhite* and *Bentolite*, for the consumer and household care markets. In addition, *Laponite* also has functional properties that improve the performance of a wide range of consumer products, such as personal care products, creams, lotions, cosmetics and hard surface household cleaning products for the kitchen and bathroom.

Oilfield. We offer a line of *Claytone* organoclays, which are a type of specially treated clays, for use in diesel and synthetic oilfield drilling fluids, which help to control viscosity and flow properties. These additives also help to suspend the cuttings in the fluid, so that they can be expelled from the well efficiently. We expect growth to be driven by an increase in horizontal/shale drilling.

Composites. We developed and introduced the *Cloisite* range of clays for the manufacture of plastics and composites. While the majority of our customers purchase *Cloisite* for developmental products and applications, a key commercial development was the introduction of a new, high-strength, lightweight plastic by Yamaha for personal watercraft hulls and deck lids utilizing *Cloisite* nanoclay. Our *Nanofil* business brings valuable know-how and intellectual property for flame retardant applications. Our *Garamite* range of clays is used in the manufacture of fiberglass composites.

Water Chemistry. We are a leading manufacturer of polyaluminium chloride, or PAC, and polyaluminium nitrate-based flocculants in Central Europe. Flocculants are added to water to improve its purity before, during and after its use in industrial, commercial and

municipal applications. PAC flocculants are widely used in public, industrial and swimming pool water treatment and as a process agent in the paper industry.

Competition

Clay-based Additives operates in specialty markets, and competes based on its research and development capabilities, its ability to produce innovative high-value product solutions and its sales and technical support. Our direct competitors in these markets include Elementis plc, Laviosa Chimica Mineraria S.p.A., R.T. Vanderbilt Company, Inc., Cytec Industries, Inc., Amcol, and Feralco AB. We also compete with manufacturers who produce non-clay-based alternatives to our end-users.

Customers

We supply major coatings manufacturers such as International Paint Limited (Akzo Nobel N.V.), BASF Group, E.I. duPont de Nemours and Company, PPG Industries Inc., and The Sherwin-Williams Company; paper chemical and paper-making companies such as Mitsubishi Hi Tec Paper Europe GmbH, Sappi Limited, Brenntag AG, LEIPA Georg Leinfelder GmbH and Stora Enso Oyj; ink-makers such as Sun Chemical Corporation and oil drilling and services companies such as M-I SWACO L.L.C.

Titanium Dioxide Pigments (25% of 2011 net sales)

Our Titanium Dioxide Pigments segment operates under the *Sachtleben* brand name and is a leading producer of high quality chemical products with a unique range of small inorganic particles that add significant value to customers' products and reduce the cost of customers' production processes. This segment operates under a venture formed in September 2008 with Kemira Oyj, in which we own 61%. Titanium Dioxide Pigments comprises two business lines: (1) Titanium Dioxide; and (2) Functional Additives. Our Titanium Dioxide Pigments segment generated net sales of \$930.4 million, \$759.2 million and \$666.3 million for the years ended December 31, 2011, 2010 and 2009, respectively. See Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, for additional financial information regarding our Titanium Dioxide Pigments segment and Item 8. Financial Statements and Supplementary Data - Note 4, Variable Interest Entities, for further details.

Titanium Dioxide

Our Titanium Dioxide business line is a leading producer of specialty grade titanium dioxide (TiO₂), serving a wide variety of customers in the synthetic fibers, plastics, paints, packaging inks, coatings, cosmetics, pharmaceuticals and paper industries. TiO₂ is a fine white powder that derives its value from its unparalleled whitening strength and opacifying ability, which is commonly referred to as hiding power. Our Titanium Dioxide business line's principal products include TiO₂ in anatase grade, TiO₂ in rutile grade and titanium specialties. This business line also provides recycling services for sulfuric waste acid.

There are two ways of producing TiO₂: the sulfate process and the chloride process. The chloride process permits production of only rutile TiO₂ and is primarily suited for large volume production of standard TiO₂ grades. We believe most of the globally installed TiO₂ capacity uses the

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

chloride process as opposed to the sulfate process. Unlike the chloride process, the sulfate process is capable of producing both the rutile and anatase grade of TiO₂. We employ the sulfate process for TiO₂ production and thus, the output from most of the globally installed TiO₂ production capacity does not compete with our anatase products.

We believe that we have a competitive advantage in fiber anatase production and special sophisticated anatase applications based on our strong technological capabilities, long-term customer relationships and extensive test runs with regular monitoring of product and process parameters. Although it represents a negligible part of the fiber material cost, TiO₂ application know-how and a longstanding application track record of homogeneous anatase crystals, both of which avoid production interruptions and excessive wear or breakdown of our customers' equipment, are critical to our customers. We intend to focus our rutile business on selected markets and applications and to further develop our titanium specialties business. We expect this segment to benefit from sales of newly introduced nano-particle titanium dioxide pigments that are used to provide ultraviolet light protection for cosmetics, plastics and coatings.

Principal Products

TiO₂ in Anatase Grade. We develop and manufacture high quality anatase TiO₂ pigments. These pigments are sold primarily to the global synthetic fiber industry, as well as paper, food and pharmaceutical industries. We believe our anatase pigment, sold under the brand name *Hombitan*, is a leading global-selling TiO₂ product for applications in the synthetic fiber industry.

TiO₂ in Rutile Grade. We develop and manufacture rutile TiO₂ pigments, which are mainly used in special applications such as selected coatings, paints, packaging inks, plastics and laminated paper production processes. In this product area, we are geographically focused on the European market. Rutile-based TiO₂ pigments generally possess performance characteristics different from anatase-based pigments. Rutile-based pigments significantly improve the weatherability and durability of polymer products by providing protection against yellowing and preventing embrittlement of the material. Our rutile grades are state of the art products and

are used in applications with high technical requirements.

Titanium Specialties. Our titanium specialties products primarily include nano-particles, which are exceptionally fine-particled, transparent and easy-to-use pigment formulations that are used across a large and diverse range of applications in small volumes. For example, the specialty grade TiO₂ products are used as UV-absorbers in sun protection cosmetics. In addition, the new nano-particles form the basis for innovative wood-protection products and innovative color variations by the paints and coatings industry. Other uses include catalysts, gas cleansing, photocatalysts and intermediates for special ceramics.

Competition

Titanium Dioxide Pigments key competitors include: (1) Fuji Titanium Industry Co., Ltd. and Kronos Worldwide, Inc. for anatase-based TiO₂; (2) DuPont Titanium Technologies, Cristal Global, Tronox Incorporated, and Huntsman LLC for rutile-based TiO₂; and (3) Tayca Corporation, Ishihara Corporation and Evonik Degussa for TiO₂ specialties. Competition in the markets in which Titanium Dioxide competes is generally based on technological capabilities, product quality, price in rutile grade and customer service.

Customers

Titanium Dioxide Pigments customers include leading manufacturers of paints, such as Akzo Nobel Coatings, Inc., PPG Industries, Inc., BASF Group and E.I. duPont de Nemours and Company; printing inks such as Sun Chemical Corporation, Flint Group and Siegwark Druckfarben AG; fibers, such as Nan Ya Plastics Corporation and Invista Inc.; plastics, such as Ampacet Corporation and Ineos Group Limited; and paper, such as Munksjo Inc. and Papierfabrik August Koehler AG.

Functional Additives

Our Functional Additives business line is a leading global manufacturer of barium-based and zinc-based inorganic fine white pigments and additives. The main function of these products is to improve brilliance of colors and shine of coatings, improve the mechanical strength of plastic parts and prevent degradation due to exposure to light. Our Functional Additives business line serves diverse end-markets, including the plastics industry, the coatings industry and the pharmaceutical industry.

Principal Products

Barium-based Additives. We produce highly dispersed powders of barium sulfate and are the largest global producer of precipitated synthetic barium sulfates (Blanc Fixe). We provide a unique range of barium-based additives customized for applications in coatings, plastic, colorants, lubricants, PVC stabilizers and thermoplastics, fibers and paper to improve optical, chemical and mechanical properties. We also produce an X-ray-grade barium sulfate used as a contrast agent in medical applications, such as X-rays for the stomach and intestine area.

Zinc-based Additives. We believe we are also a leading producer of pure zinc sulfide pigments, mainly used in glass fiber reinforced plastic parts and coatings and a leading supplier of Lithopone, a white zinc sulfide pigment which is used in plastics and coatings.

Competition

Key competitors for barium-based additives include Solvay S.A., Gruppo Chimico Dalton S.p.A., Sakai Chemical Industry Co., Ltd. and Chinese barium-producers. Key competitors for zinc-based additives include Chinese Lithopone producers. Competition in the functional additives market is primarily based on application know-how, brand recognition, product quality and, to a certain extent, price.

Customers

Functional Additives customers include E.I. duPont de Nemours and Company, Ampacet Corporation, BASF Group, Akzo Nobel Coatings, Inc. and A. Schulman, Inc.

Advanced Ceramics (16% of 2011 net sales)

Our Advanced Ceramics segment operates under the *CeramTec* brand name and is a leading global producer of high-performance advanced ceramics materials and products. Advanced Ceramics serves four principal end-markets: (1) medical; (2) electronics; (3) industrial; and (4) automotive; with strong market positions in various niche markets such as medical products, cutting tools and mechanical applications. Our Advanced Ceramics segment generated net sales of \$585.1 million, \$515.6 million and \$412.2 million

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

for the years ended December 31, 2011, 2010 and 2009, respectively. See Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, for additional financial information regarding our Advanced Ceramics segment.

The global ceramics market comprises products and components based on inorganic, non-metallic, microcrystalline materials that are manufactured at high temperatures. The global ceramics market can be divided into traditional ceramics, such as bricks, tiles and white ware, and high-performance ceramics, which are ceramic materials and products optimized for special purposes. High performance ceramics have superior physical, electrical, chemical or biological properties as compared to traditional ceramics and competing materials, like metals or plastics. High-performance ceramics materials include ceramic powders, ceramic additives, structural ceramics and functional ceramics. Accordingly, they have increasingly replaced plastics and metals as key engineering materials. We compete in the high-performance ceramics segment of the market, offering a wide range of high-performance ceramics products from sealing discs for sanitary fittings to ceramic components for hip joint prostheses. These products serve the market's needs for materials that are light, strong, corrosion-resistant and capable of performing in high-temperature environments.

We believe that we have achieved success in the Advanced Ceramics segment as a result of our focus on selected segments of the high-performance ceramics market and our close customer relationships. Almost all of Advanced Ceramics' products are made to order, taking into account specific customer requirements. In many cases, our engineers work in close cooperation with our customers during the design and development phase of new products to ensure highest quality and customer satisfaction. Through its extensive experience, Advanced Ceramics has gained detailed expertise and know-how in its applications areas.

Principal Products

Medical. We currently serve the medical applications market with two product groups - ceramic components for hip joint prostheses, such as ball heads and inserts and ceramic glove formers for high-quality latex gloves. The ceramic components for hip joint prostheses are mainly supplied to orthopedic implant manufacturers in the United States and Europe. Besides their high wear resistance and good friction behavior, high-performance ceramics are biologically inert, making them one of the few materials that are durable and stable enough to withstand the corrosive effects of bodily fluids. As a result, we expect high-performance ceramics will increasingly become more common for medical applications, such as for repair and replacement of hips, knees and other human body parts.

We believe that ceramic-on-ceramic hip implants benefit from additional substitution effects as young people and more active elderly people are better suited to use ceramic implants given their numerous attractive properties. Currently, the penetration rate for ceramic-on-ceramic hip implants in Europe is significantly higher than in North America because the first Food and Drug Administration (FDA) approval for ceramic-on-ceramic hip joint prostheses systems was granted in 2003. However, given the relative superior performance and positive early acceptance levels in the United States, we expect the market for ceramic-on-ceramic hip joint prostheses systems to continue to grow significantly in future years. We believe we are well positioned to take advantage of the growing market as we are currently the only manufacturer of ceramic-on-ceramic hip implant components used in FDA-approved hip joint prostheses systems in the United States. Given the difficulties and time involved in obtaining an FDA approval, we believe that we will be the sole supplier of ceramic-on-ceramic hip implant components in the intermediate term. We also enjoy strong relationships with the largest U.S. and European orthopedics implant manufacturers.

Electronics. We develop and manufacture substrates, electrical resistor cores and ceramic tapes as carriers for electronic circuits. Substrates are ceramic plates with electrical, thermal and mechanical properties that serve as carriers in electronic applications. These highly specialized products are used in a wide range of industries, such as the automotive, consumer electronics, aeronautics and telecommunications industries. The demand for these products is driven, in large part, by the activity levels of the semiconductor market as well as a positive substitution effect for ceramic applications. We believe that increasing demand for electronic components will continue to offer significant growth opportunities for high-performance ceramics. As a leading supplier of electronic ceramics materials, we believe we are well positioned to take advantage of

these growth opportunities.

Cutting Tools. We develop and manufacture products used in cutting tools, other tools and tooling systems. Ceramic material properties such as high melting points, excellent hardness and good wear resistance make ceramics an excellent high-speed cutting tool material. In addition, the longer life and faster cutting speeds possible with ceramic tools allow customers to save costs by increasing their throughput and reducing the downtimes for replacing their cutting tools. We believe we are a leading supplier of ceramic cutting tools, other tools and tooling systems for high speed processing in the automotive, metalworking and mechanical engineering industries with automotive OEMs and their suppliers being our main customers.

Mechanical Applications and Systems. We also develop and manufacture high performance ceramic components that are used in mechanical applications and systems. Key product groups in mechanical applications include cutting blades, drawing and forming tools, drawing cones and capstans, guide elements, precision parts, pre-forms and friction discs. We primarily supply the general industrial, machinery, metalworking, automotive and textile industries with a large number of products customized to customer

requirements. Mechanical systems include products used in the sanitary fittings (ceramic discs and cartridges for faucets) and automotive supplier industries in areas where fluids are pumped, compressed or stirred, such as bushings, face seal rings, pump components and valve shims and discs.

Other products. We also produce products used for applications in certain niche markets, such as electrical/thermal and ceramic metal connections, pre-forms for the casting process of piston engines, mainly for diesel engines, and wear and corrosion protection in industrial plants and armor components used in vehicle protection.

Competition

Advanced Ceramics' key competitors are Kyocera Corporation, CoorsTek, Inc., The Morgan Crucible Company plc and Ceradyne Inc. However, each of these competitors has either a different geographical focus or product strategy with respect to small niche applications. Competition in the high-performance ceramics market is primarily based on product quality, product specifications and customer service.

Customers

Advanced Ceramics' key customers include Robert Bosch GmbH, Stryker Corporation, EPCOS AG, DePuy Orthopaedics, Inc. Vishay Intertechnology, Inc., Ideal Standard International BVBA and Zimmer, Inc.

Raw Materials

We purchase raw materials and chemical intermediates from a large number of third parties. Major requirements for our key raw materials and energy are typically satisfied pursuant to contractual agreements and/or medium- or long-term relationships with suppliers. We are not generally dependent on any one supplier for a major part of our raw material requirements, but certain important raw materials are obtained from a few major suppliers. In general, where we have limited sources of raw materials, we have developed contingency plans to minimize the effect of any interruption or reduction in supply, such as sourcing from different facilities, multiple suppliers or utilizing alternative formulations.

We have a broad raw material base with the cost of no single raw material representing more than 3% of our cost of products sold in 2011. Raw materials constituted approximately 48% of our 2011 cost of products sold. The table below lists the ten most significant raw materials in 2011 (in terms of dollars) recorded in cost of products sold and the principal products for which the materials were used.

Raw Material	Segment	Products
Tin	Specialty Chemicals	Metal sulfides
Quaternary amines (quat)	Performance Additives	Organoclays, wood protection products
Titanium-bearing slag	Titanium Dioxide Pigments	Titanium dioxide
Ilmenite	Titanium Dioxide Pigments	Titanium dioxide
Copper	Performance Additives	Wood protection products

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Iron-oxide	Performance Additives	Iron-oxide pigments
Zinc/Zinc oxide	Specialty Chemicals, Titanium Dioxide Pigments, Performance Additives	Conversion coating zinc, zinc-based pigments, zinc phosphate, tan iron-oxide
Antimony Sulfide	Specialty Chemicals	Metal sulfides
Phosphoric Acid	Specialty Chemicals	Metal surface treatment
Monoethanolamine	Performance Additives	Wood protection products

In our Specialty Chemicals segment, tin is used in the production of metal sulfides and is purchased from five suppliers under annual supply agreements. In addition, antimony sulfide is used in the production of metal sulfides and is purchased from a number of sources. Prices for our tin and antimony sulfide purchases are tied to market conditions.

In our Clay-based Additives business line of our Performance Additives segment, quaternary amine is sourced under a long-term contract, which expires at the end of 2013 and is subject to monthly adjustment for the price of tallow, the base component of quat. In our Timber Treatment Chemicals business, we predominantly source quat under a contract that expires at the end of 2016.

Titanium-bearing slag and ilmenite are the most important raw materials used in the production of specialty grade titanium dioxide in our Titanium Dioxide business line of our Titanium Dioxide Pigments segment. We purchase titanium-bearing slag primarily from two suppliers on a long-term basis and ilmenite from three suppliers on a long-term basis. Both of our titanium-bearing slag suppliers have limited their capacity due to technical reasons. However, we expect that these suppliers will be able to meet our basic demand for 2012, and we will continue to monitor this situation. We expect prices for both slag and ilmenite to be higher in 2012.

In our Timber Treatment Chemicals business, we purchase copper, a commodity, from several sources. Prices for our copper purchases are tied to market conditions. However, we expect the commercialization of our next generation wood protection products to reduce our use of copper beginning in 2012.

Historically, we have received iron-oxide from multiple sources and have not experienced any significant supply shortages. Iron-oxide is used in our Color Pigments and Services business within our Performance Additives segment and is purchased from suppliers in China as a supplement to our iron-oxide production.

In our Titanium Dioxide Pigments segment, zinc is used to produce zinc-based pigments and is purchased from a number of suppliers under long-term contracts. There are no long-term zinc purchase contracts in our Specialty Chemicals or Performance Additives segments. In our Specialty Chemicals segment, zinc and zinc oxide are purchased from a few suppliers in Europe and the United States, and we have not experienced any supply shortages. Prices for these purchases are tied to market conditions. In our Performance Additives segment, zinc oxide is used in the production of tan iron-oxide and zinc phosphate and is purchased from multiple suppliers.

Phosphoric acid is used in our Specialty Chemicals segment and is purchased from various global sources. This raw material is used for metal surface treatment chemicals in our Surface Treatment business and wood protection in our Timber Treatment Chemicals business. Currently, there are no long-term purchase contracts for this raw material.

We source the monoethanolamine used in our Timber Treatment Chemicals business from one supplier under a contract that expires at the end of 2012. The contract will automatically renew on an annual basis, subject to termination by either party.

In addition, lithium brine is a primary raw material source for all lithium chemicals and is found in only a small number of locations, including most significantly for us, the Atacama Desert in Chile. We have a long-term contract with the Chilean government to mine lithium brine in the Atacama Desert in Chile, which we believe provides us with a secure long-term access to lithium. We also mine lithium brine at our site in Silver Peak, Nevada.

Temporary shortages of raw materials may occasionally occur and cause temporary price increases. In recent years, these shortages have not resulted in unavailability of raw materials. However, the continuing availability and price of raw materials are affected by unscheduled plant interruptions occurring during periods of high demand, domestic and world market and political conditions, as well as the direct or indirect effect of governmental regulations. During periods of high demand, our raw materials are subject to significant price fluctuations, and, such fluctuations may have an adverse impact on the results of operations of our business. The impact of any future raw material shortages on our business as a whole or in specific geographic regions cannot be accurately predicted.

Intellectual Property

Our business is dependent to a large extent on our intellectual property rights, including patents and other intellectual property, trademarks and trade secrets. We believe that our intellectual property rights play an important role in maintaining our competitive position in a number of the markets we serve. We rely on technological know-how and formulation and application expertise in many of our manufacturing processes in order to develop and maintain our market positions. Where appropriate, we protect our new technology, applications and manufacturing processes by seeking patent protection. We have more than 5,000 patents and patent applications in key strategic markets worldwide, reflecting our commitment to invest in technology and covering many aspects of our products and processes for making those products. We also own and register in multiple jurisdictions numerous trade names and trademarks applicable to our business and products which we believe are important to our business. In addition, we have entered into agreements, pursuant to which we license intellectual property from third parties for use in our business and we license certain intellectual property to third parties. For example, we commercialized *Ecolife*, our next generation timber treatment preservative from our Timber Treatment Chemicals business, through our joint venture. We also develop intellectual property with third parties as discussed below in Research and Development.

Research and Development

We are committed to further investing in our businesses through research and development. Our research and development costs were approximately 2% of our net sales in 2011, which include certain expenses related to modifications and improvements in current products. We allocate our research and development resources selectively based on the needs and requirements of each business line to develop innovative products. Research and development costs are charged to expense, as incurred. Such costs were \$59.1 million, \$49.3 million and \$43.9 million for the years ended December 31, 2011, 2010 and 2009, respectively.

The objective of our research and development effort is to develop innovative chemistries and technologies with applications relevant

within targeted key markets. Research and development efforts are generally focused on both process development, which is the stage at which products move from development to manufacturing, and new product development. Each business line, however, also has selected long-term strategic projects with the aim to develop new competencies and technologies. For example, our Fine Chemicals business has set up a pilot plant for the recycling of lithium ion batteries.

Each of our business lines manages its own research and development effort and has separate research and development facilities dedicated to its specific area. However, where technologically feasible, advances and findings are shared between business lines to foster greater cross-fertilization of ideas and applications. In certain cases, we conduct research and development efforts with third parties, including universities, customers and other entities. We endeavor to obtain ownership of or license to, on terms favorable to us, the intellectual property developed with a third party.

Seasonality

There is a seasonal effect on a portion of our net sales due to the end-use of some of our products. Our Color Pigments and Services business line of our Performance Additives segment shows some seasonality related to the construction market which also depends upon weather conditions. As such, the fourth and first quarters have historically been the quarters where we experience the lowest net sales. During these quarters, we typically build inventory for our construction-related businesses, in anticipation of increased sales during the spring and summer months. Thus, these quarters usually have the highest working capital requirements for us. Other than these seasonal trends in certain end-use markets, our overall results of operations tend to show limited seasonal effects.

International Operations

The following table presents net sales based on geographic area (attributed based on seller's location):

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Net sales:			
Germany	\$ 1,900.9	\$ 1,604.2	\$ 1,176.0
United States	731.2	673.0	609.6
Rest of Europe	646.1	571.5	693.8
Rest of World	391.1	342.9	289.7
	\$ 3,669.3	\$ 3,191.6	\$ 2,769.1

Sales and Marketing

We sell our products and services globally primarily by using our direct sales forces, although we also sell through distributors in certain of our business lines, such as Color Pigments and Services and Clay-based Additives of our Performance Additives segment or by using third party sales representatives. Each of our direct sales forces is responsible for marketing only one of our business lines, and is administered pursuant to policies established by the management of that business line. Within each business line, these direct sales forces are organized based on geographic regions, end-use applications or sub-business divisions within the business line. As of February 1, 2012, our in-house sales forces consisted of approximately 1,600 personnel worldwide.

Our direct sales forces interact with our customers to provide both purchasing advice and technical assistance. In general, our sales

forces arrange and coordinate contact between our customers and our research and development or technical personnel to provide quality control and new product solutions. In certain of our businesses, such as the Surface Treatment and Fine Chemicals business lines of our Specialty Chemicals segment, most sales managers have a chemical engineering background with advanced degrees and significant technical experience in applying our products, and they play a critical role in developing client relationships and acquiring new clients. Our close interaction with our customers and tailored solutions have allowed us to develop and maintain strong customer relationships as well as focus our sales efforts on those customers who we believe will provide us with higher profit margins in recognition of our superior products, service and technical support.

Sales in each of our business lines are generally made on a purchase order basis. However, longer-term arrangements have been established with certain key customers.

Our marketing strategy is generally aimed at working directly with customers to gauge the success of our products, evaluating the need for improvements in product and process technology, and identifying opportunities to develop new product solutions for our customers and their end-use markets. We also use media activities, lectures and tradeshow as part of our sales and marketing efforts.

FDA Regulation

Our Advanced Ceramics segment and to a lesser extent, our Specialty Chemicals segment, are subject to regulation by the FDA with respect to certain products we produce, including ceramic ball head and liner components used in hip joint prostheses systems and pharmaceutical intermediates. Foreign, state, local and other authorities also may regulate us and our products. Regulatory agencies have established requirements that apply to the design, manufacture and marketing of pharmaceutical and medical device products. We sell our pharmaceutical intermediates and ceramic-on-ceramic components to other companies that also may be regulated by such authorities.

Premarket Approval. Medical devices also are subject to extensive regulation by the FDA prior to commercial distribution in the United States, including premarket approval (PMA), which is required for devices deemed to pose the greatest risk and certain other devices. Our Advanced Ceramics segment currently supplies ceramic ball head and liner components to manufacturers for incorporation into their total hip prostheses systems, which are subject to the FDA's PMA requirements. In addition, our Advanced Ceramics business or our customers who have obtained PMA approval may be required to obtain FDA approval for changes to the design, manufacturing or labeling of our ceramic ball head and liner components. Also, any other medical devices which our Advanced Ceramics segment seeks to produce in the future, such as knee replacement products, would likely require FDA approval for sales in the United States.

While we are not required to seek FDA approvals for our pharmaceutical intermediates, the customers to whom we supply such products may be subject to FDA approval requirements prior to testing a new drug on humans as well as marketing a new drug for commercial use in the United States. Our customers with FDA approval for a finished drug may also be required to obtain FDA approval of design, manufacturing or labeling changes to the pharmaceutical intermediates used in their finished products.

Compliance Requirements. Once on the market, drug manufacturers and medical device manufacturers are subject to numerous post-market regulations. Finished device manufacturers such as our customers who manufacture hip prostheses systems are subject to the FDA's Quality System Regulation (QSR), which requires quality assurance practices and procedures that address, among other things: management responsibility; audits and training; design controls; purchasing controls; identification and traceability of components; production and process controls; acceptance activities; handling of nonconforming products; the initiation of corrective and preventive actions; labeling and packaging controls; handling, storage and distribution of products and complaint handling and record keeping. The FDA does not directly require component suppliers of finished medical devices to comply with the QSR. However, because our ceramic-on-ceramic ball head and liner

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

components are critical elements of hip joint prostheses systems, our customers may require us to comply with some or all of the QSR. Moreover, the FDA may in the future take the position that the types of components that we supply meet the definition of a finished device and are thus subject to the QSR. Our current contracts with our customers of ceramic-on-ceramic ball head and liner components require us to comply or assist our customers in complying with various FDA regulatory requirements.

The FDA's inspectional authority extends to component suppliers. Pursuant to this authority, the FDA has the ability to conduct and has conducted inspections at our facilities at which we manufacture our ceramic-on-ceramic ball head and liner components.

If we or our customers violate FDA or other governmental regulatory requirements during either the pre- or post-marketing stages, there may be various adverse consequences. For example, in the United States, the FDA has the authority to impose fines, injunctions, and civil penalties; recall or seize products; impose operating or import restrictions, partial suspension or total shutdown of production; delay its approval or refuse to grant approval of new products; or withdraw the submission of the approved product from the market.

Safety, Health and Environmental Matters

See Item 8. Financial Statements and Supplementary Data - Note 19, Commitments and Contingencies, for a discussion of our safety, health and environmental matters.

Employees

As of February 1, 2012, we had approximately 9,700 employees, with 70% located in Europe, 16% in the United States and the remaining 14% located in the rest of the world. Of our employees, approximately one-third are subject to either collective bargaining agreements or other similar arrangements.

We observe local customs, legislation and practice in labor relations and, where applicable, in negotiating collective bargaining agreements. Management believes that its relations with employees and their representatives are good. We have not suffered any material work stoppages or strikes in our worldwide operations in the last five years.

Available Information

Rockwood Holdings, Inc. files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (the SEC). You may read and copy any documents we file at the SEC's public reference room at Room 1580, 100 F Street, N.E., Washington D.C. 20549. Please call the SEC at 1-800-SEC-0330 for information on the public reference room. The SEC maintains a website that contains annual, quarterly and current reports, proxy statements and other information that issuers file electronically with the SEC. The SEC's website is www.sec.gov.

The Company's website is www.rocksp.com. We have made available, free of charge through our website, our annual report on Form 10-K, and will make available our quarterly reports on Form 10-Q and current reports on Form 8-K, as well as any amendments to those reports filed or furnished pursuant to the Securities Exchange Act of 1934 (the Exchange Act) as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. The Company's proxy statement will be available when filed with the SEC.

From time to time, Rockwood may use its Web site as a channel of distribution of material company information. Financial and other material information regarding the Company is routinely posted on and accessible at http://www.rockwoodspecialties.com/rock_english/news/compnews.asp. In addition, you may automatically receive email alerts and other information about Rockwood by enrolling your email by visiting the Rockwood Holdings, Inc. Alert Form section at http://www.rockwoodspecialties.com/rock_english/ir/alertform.asp. The foregoing information regarding our website and its content is for convenience only. The content of our website is not deemed to be incorporated by reference into this report nor should it be deemed to have been filed with the SEC.

Item 1A. Risk Factors.

You should carefully consider these risk factors in evaluating our business. In addition to the following risks, there may also be risks that we do not yet know of or that we currently think are immaterial that may also affect our business. If any of the following risks occur, our business, results of operations, cash flows or financial condition could be adversely affected.

Leverage *Our available cash and access to additional capital may be limited by our leverage.*

We are highly leveraged and have significant debt service obligations. As of December 31, 2011, we had \$1,687.7 million of indebtedness outstanding and total equity of \$1,658.4 million. This level of indebtedness could have important negative consequences, including:

- we may have difficulty obtaining financing in the future for working capital, capital expenditures, acquisitions or other purposes;
- we will need to use a substantial portion of our available cash flow to pay interest and principal on our debt, which will reduce the amount of money available to finance our operations and other business activities;
- some of our debt, including borrowings under the senior secured credit facilities, have variable rates of interest, which will expose us to the risk of increased interest rates;

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

- our debt level increases our vulnerability to general economic downturns and adverse industry conditions;
- our debt level could limit our flexibility in planning for, or reacting to, changes in our business and in our industry in general;
- our substantial amount of debt and the amount we need to pay to service our debt obligations could place us at a competitive disadvantage compared to our competitors that have less debt; and
- our failure to comply with the financial and other restrictive covenants in our debt instruments which, among other things, require us to maintain specified financial ratios and limit our ability to incur debt and sell assets, could result in an event of default that, if not cured or waived, could cause our lenders to terminate commitments under our debt agreements, declare all amounts, including accrued interest, due and payable, and enforce their rights in respect of collateral.

Our cash interest expense for the year ended December 31, 2011 was \$91.8 million. After considering interest rate swaps, we had \$855.0 million (the majority of which was subject to a Libor floor of 1.00%) of variable rate debt outstanding as of December 31, 2011.

On February 22, 2012, we issued a new tranche of term loan A under our indirect, wholly-owned subsidiary, Rockwood Specialties Group, Inc. (Group or Groups) existing senior secured credit facility in the amount of \$350.0 million and expect to use the proceeds and cash on hand to redeem all of our outstanding senior subordinated notes due in 2014 (the 2014 Notes), consisting of 250.1 million (\$324.2 million) in aggregate principal amount of 7.625% euro-denominated notes and \$200.0 million in aggregate principal amount of 7.5% dollar-denominated notes, and pay accrued and unpaid interest and applicable redemption premiums. The new term loan bears interest at Libor plus 2.25% (with a 0.25% reduction for achieving a designated credit rating). See Item 8. Financial Statements and Supplementary Data Note 20, Subsequent Events for further details.

After giving effect to the new term loan A and the expected redemption of the outstanding senior subordinated notes, our variable rate debt outstanding would be \$1,205.0 million (\$845.8 million of which was subject to a Libor floor of 1.00%). A 1% increase in the average interest rate would increase future interest expense by approximately \$12.0 million per year. Our debt service for 2012, which represents expected principal payments of our long-term debt and estimated scheduled cash interest payments, is expected to be \$313.5 million after giving effect to the new term loan A and expected redemption of the 2014 Notes. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Liquidity Contractual Obligations for years beyond 2012.

Additional Borrowings Available Despite our leverage, we and our subsidiaries may be able to incur more indebtedness. This could further exacerbate the risks described above, including our ability to service our indebtedness.

We and our subsidiaries may be able to incur substantial additional indebtedness in the future. Although our senior secured credit facilities and the indenture governing the 2014 Notes contain restrictions on the incurrence of additional indebtedness, such restrictions are subject to a number of qualifications and exceptions, and under certain circumstances indebtedness incurred in compliance with such restrictions could be substantial. The indenture will no longer impose any restrictions once the 2014 Notes are redeemed. For example, under our credit agreement, the term loans under the senior secured credit facilities may be increased by up to \$350.0 million in the aggregate, subject to certain exemptions

and provided that Group procures lender commitments for such increase. As of December 31, 2011, the revolving credit facility under the senior secured credit facilities provided for additional borrowings of up to \$148.6 million, after giving effect to \$31.4 million of letters of credit issued on our behalf. As of December 31, 2011, the Titanium Dioxide Pigments venture facility provided for additional borrowings of up to 12.9 million (\$16.7 million) after giving effect to an outstanding bank guarantee of 17.1 million (\$22.2 million) related to a defined benefit pension obligation for our Finland Plan. In January 2012, this bank guarantee was increased to 25.5 million (\$33.1 million). To the extent new debt is added to our debt levels, the substantial leverage risks described above would increase.

Restrictive Covenants in Our Debt Instruments *Our debt instruments contain a number of restrictive covenants which may limit our ability to finance future operations or capital needs or engage in other business activities that may be in our interest.*

Group's senior secured credit agreement and indenture governing the 2014 Notes and the Titanium Dioxide Pigment's venture facility agreement impose, and the terms of any future indebtedness may impose, operating and other restrictions on us. Such restrictions will affect, and in many respects limit or prohibit, among other things, our ability to take certain actions. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources section for further details. In addition, Group's senior secured credit facilities require us and the Titanium Dioxide Pigment's venture facility requires the venture to achieve certain financial and operating results and maintain compliance with specified financial ratios. Our ability to comply with these ratios may be affected by events beyond our control such as an economic downturn. The restrictions and financial covenants contained in Group's senior secured credit agreement and indenture governing the 2014 Notes and the Titanium Dioxide Pigment's venture facility could adversely affect our ability to finance our operations, acquisitions, investments or strategic plans or other capital needs or to engage in other business activities that would be in our interest.

A breach of any of these covenants or our inability to comply with the required financial ratios could result in a default under the facilities described above. If an event of default occurs under any of these facilities, which includes an event of default under the indenture governing the 2014 Notes, the lenders could elect to:

- declare all borrowings outstanding, together with accrued and unpaid interest, to be immediately due and payable;
- require us to apply all of our available cash to repay the borrowings; or
- prevent us from making any principal, premium or interest payments;

any of which would result in an event of default. The lenders will also have the right in these circumstances to terminate any commitments they have to provide further financing. If we were unable to repay or otherwise refinance these borrowings when due, our lenders could sell the collateral securing the senior secured credit facilities, which constitutes substantially all of our and our subsidiaries' assets.

Economic Uncertainty - Downturns in certain industries and general economic conditions could adversely affect our profitability and liquidity.

In the event another economic downturn or recession or disruption in the capital markets occurs, our results of operations, cash flows and financial position could be materially and adversely affected. Under such circumstances, the demand for our products could decrease, which would adversely affect our results of operations. In addition, our products are used in certain industries, such as the automotive and construction industries. Prolonged downturns or bankruptcies in one or more of these industries could severely reduce demand for our products. For example, sales in our Performance Additives business have been adversely impacted by downward trends in commercial and residential construction, housing starts and trends in residential repair and remodeling. Further, a downturn in the automotive industry, particularly in Europe, may adversely affect the results of operations of our Surface Treatment business in our Specialty Chemicals and Advanced Ceramics segments. Moreover, if the value of one or more of our businesses deteriorates, we may be required to record additional impairment charges that could adversely affect our results of operations. If we are unable to successfully anticipate or respond to changing economic conditions, our results of operations and financial position may be materially and adversely affected.

Further, another economic downturn or recession or market disruption in the capital and credit markets may adversely impact the value of our pension plan assets, our statement of operations, our statement of changes in stockholders' equity and our liquidity. For example, we have several pension plans located in Germany, Finland, the United Kingdom and the United States. Our funding obligations could change significantly based on the investment performance of the pension plan assets and changes in actuarial assumptions for local statutory funding valuations. Any deterioration of the capital markets or returns available in such markets may negatively impact our pension plan assets and increase our funding obligations for one or more of these plans and negatively impact our liquidity. We cannot predict the impact of this or any further market disruption on our pension funding obligations.

Risks Associated with Acquisitions - We may not be able to complete proposed acquisitions nor successfully integrate acquisitions we may undertake in the future.

The process of combining or acquiring businesses with Rockwood involves risks. We may face difficulty integrating the new operations, technologies, products and services of future acquisitions or combinations, and may incur unanticipated expenses related to future acquisitions. The difficulties of combining operations may be magnified by integrating personnel with differing business backgrounds and corporate cultures. Failure to successfully manage and integrate acquisitions with our existing operations could lead to the potential loss of customers of the acquired business, the potential loss of employees who may be vital to the new operations, the potential loss of business opportunities or other adverse consequences that could affect our financial condition and results of operations. Even if integration occurs successfully, failure of any future acquisition or combination to achieve levels of anticipated sales growth, profitability or productivity comparable with those achieved by our existing operations, or otherwise not perform as expected, may adversely impact our financial condition and results of operations. In addition, certain acquisitions may trigger regulations designed to monitor competition and would therefore require regulatory approval. We cannot predict whether such authorities will approve acquisitions we seek to accomplish in the future.

Currency Fluctuations Because a significant portion of our operations is conducted in foreign currencies, fluctuations in currency exchange rates may adversely impact our financial condition and results of operations and may affect the comparability of our results between financial periods.

Our operations are conducted by subsidiaries in many countries. The results of their operations and financial condition are reported in their functional currency, generally their local currency, and are then translated into U.S. dollars at the applicable exchange rates for

inclusion in our consolidated financial statements. The exchange rates between some of these currencies and the dollar in recent years have fluctuated significantly and may continue to do so in the future. A significant portion of our net sales and cost of products sold is denominated in Euros. Approximately 63% of our 2011 net sales were derived from subsidiaries whose local currency is the Euro. This increases the impact of the fluctuation of the Euro against the U.S. dollar.

Furthermore, because a portion of our debt is denominated in Euros, which as of December 31, 2011 equaled 488.2 million (\$632.8 million), we are further subject to fluctuation in the exchange rate between the U.S. dollar and the Euro. For example, the U.S. dollar-Euro rate increased from 1.00 = \$0.939 on December 31, 2000 to 1.00 = \$1.2961 on December 31, 2011.

Being subject to this currency fluctuation may have an adverse effect on the carrying value of our debt. A weakening or strengthening of the Euro against the U.S. dollar by \$0.01 would decrease or increase, respectively, by \$4.9 million the U.S. dollar equivalent of our total Euro-denominated debt of 488.2 million. In addition, because our consolidated financial statements are reported in U.S. dollars, the translation effect of such fluctuations has in the past significantly impacted, and may in the future, significantly impact the carrying value of our debt. We also incur currency transaction risk whenever we enter into either a purchase or sale transaction using a currency other than the local currency of the transacting entity. We may not be able to effectively manage our currency translation and/or transaction risks, and as a result, volatility in currency exchange rates may have a material adverse effect on the carrying value of our debt and results of operations.

Regulation of Our Raw Materials, Products and Facilities *Our business could be adversely affected by regulation to which our raw materials, products and facilities are subject.*

Some of the raw materials we handle, and our products and facilities, are subject to government regulation. These regulations affect the manufacturing processes, handling, uses and applications of our products. In addition, some of our subsidiaries' products contain raw materials, such as arsenic pentoxide, carbon disulfide, lithium carbonate, tetrahydrofuran, copper, chromic acid, silica, zinc chromate and lead that are deemed hazardous materials in certain situations. The use and handling of these materials is regulated and some of these regulations require product registrations, which also are subject to renewal and potential revocation. For example, in February 2002, the EPA announced a voluntary decision by CCA manufacturers, including our subsidiaries, to amend their registrations for CCA to limit use of CCA-treated lumber in most residential settings, effective December 31, 2003. These regulations may affect our ability to market certain chemicals we produce.

There is also a risk that other key raw materials or one or more of our products may be found to have, or be recharacterized as having, a toxicological or health-related impact on the environment or on our customers or employees. If such a discovery or recharacterization occurs, the relevant materials, chemicals or products, including products of our customers incorporating our materials or chemicals, may be recalled or banned or we may incur increased costs in order to comply with new regulatory requirements. Change in regulations, or their interpretation, may also affect the marketability of certain of our products. We cannot predict how these and other findings from regulatory agencies may affect our cash flows or results of operations.

Manufacturing Hazards *Hazards associated with chemical manufacturing could adversely affect our results of operations.*

Due to the nature of our business, we are exposed to the hazards associated with chemical manufacturing and the related storage and transportation of raw materials, products and wastes in our manufacturing facilities or our distribution centers, such as fires, explosions and accidents. These hazards could lead to an interruption or suspension of operations and have an adverse effect on the productivity and profitability of a particular manufacturing facility or on our company as a whole. Other hazards include piping and storage tank leaks and ruptures, mechanical failure, employee exposure to hazardous substances, chemical spills and other discharges or releases of toxic or hazardous

substances or gases, inclement weather and natural disasters. These hazards may cause personal injury and loss of life, damage to property and contamination of the environment, which could lead to government fines or work stoppage injunctions and lawsuits by injured persons.

Raw Materials *Fluctuations in costs of our raw materials or our access to supplies of our raw materials could adversely affect our results of operations.*

Although no single raw material represented more than 3% of our cost of products sold in 2011, raw material costs generally account for a high percentage of our total costs of products sold. In 2011, raw materials constituted approximately 48% of our cost of products sold. We generally purchase raw materials based on supply agreements linked to market prices and therefore our results of operations are subject to short-term fluctuations in raw materials prices. These fluctuations limit our ability to accurately forecast future raw material costs and hence our profitability.

Many of the raw materials we use are commodities, and the price of each can fluctuate widely for a variety of reasons, including changes in availability, major capacity additions or reductions or significant facility operating problems. Historically, there have been

some price increases we have not been able to pass through to our customers. This trend may continue in the future. In addition, titanium-bearing slag used in our Titanium Dioxide Pigments segment is one of our largest raw materials (in terms of dollars) and is sourced primarily from two suppliers. If one of our suppliers is unable to meet its obligations under our present supply agreement or we are unable to enter into new supply arrangements on competitive terms when our existing short-term supply arrangements expire, we may be forced to pay higher prices to obtain these necessary raw materials. In addition, a significant portion of our lithium compounds are processed at a single location of a supplier. Any disruption at this facility could adversely affect our ability to meet market demand for these products, our relationships with our customers and our results of operations. Furthermore, certain of our raw materials, such as cesium and lithium salts, are sourced from countries where political, economic and social conditions may be subject to instability. In addition, one of our raw materials, lithium brine, requires a period of gestation before it can be used to produce lithium compounds. In the event there is an increase in market demand for lithium products, or of unfavorable weather conditions at the lithium ponds, as we experienced in early 2006, we may not be able to respond to such market demand on a timely basis. Any interruption of supply or any price increase of raw materials could result in our inability to meet demand for our products, loss of customer goodwill and higher costs of producing our products.

Energy Costs Fluctuations in energy costs could have an adverse effect on our results of operations.

Energy purchases in 2011 constituted approximately 8% of Rockwood's cost of products sold. Fluctuations in the price of energy limit our ability to accurately forecast future energy costs and consequently our profitability. For example, natural gas prices were volatile and increased in 2011 in Europe. Rising energy costs may increase our raw material costs and negatively impact our customers and the demand for our products. These risks will be heightened if our customers or production facilities are in locations experiencing severe energy shortages. For example, our lithium facility in Chile has experienced a shortage of natural gas in the past due to the Argentine government's decision to ration its supply of natural gas to Chile. If energy prices fluctuate significantly, or we experience severe energy shortages, our business, in particular, our Titanium Dioxide segment where energy costs are more significant, or results of operations may be adversely affected.

Environmental, Health and Safety Regulations Compliance with extensive environmental, health and safety laws could require material expenditures or changes in our operations.

Our operations are subject to extensive environmental, health and safety laws and regulations at national, international and local levels in numerous jurisdictions. In addition, our production facilities and a number of our distribution centers require operating permits that are subject to renewal. The nature of the chemicals industry exposes us to risks of liability under these laws and regulations due to the production, storage, transportation, disposal and sale of chemicals and materials that can cause contamination or personal injury if released into the environment. In 2011, our capital expenditures for safety, health and environmental matters (SHE) were \$23.3 million, excluding costs to maintain and repair pollution control equipment. For 2012, we estimate capital expenditures for compliance with SHE laws to be at similar levels.

Compliance with environmental laws generally increases the costs of manufacturing, the cost of registration/approval requirements, the costs of transportation and storage of raw materials and finished products, as well as the costs of the storage and disposal of wastes, and could have a material adverse effect on our results of operations. We may incur substantial costs, including fines, damages, criminal or civil sanctions and remediation costs, or experience interruptions in our operations, for violations arising under these laws or permit requirements. Furthermore, environmental laws are subject to change and have tended to become stricter over time. Such changes in environmental laws or their interpretation, or the enactment of new environmental laws, could result in materially increased capital expenditures and compliance costs. For example, proposed regulation related to greenhouse gases and carbon dioxide emissions, such as the cap and trade requirements, and potential revisions to the Toxic Control Substances Act, could materially and adversely impact our results of operations.

In addition, the discovery of contamination arising from historical industrial operations at some of our former and present properties has exposed us, and in the future may continue to expose us, to cleanup obligations and other damages. For example, soil and groundwater contamination is

known to exist at several of our facilities. At December 31, 2011, we had approximately \$49.8 million in reserves for estimated environmental liabilities (including reclamation obligations) and estimated the potential range of exposure for such liabilities to be between \$49.8 million and \$78.9 million.

Environmental Indemnities We may be subject to environmental indemnity claims relating to properties we have divested.

The discovery of contamination arising from properties that we have divested may expose us to indemnity obligations under the sale agreements with the buyers of such properties or cleanup obligations and other damages under applicable environmental laws. For example, we agreed to indemnify the buyers of our former Electronics business and our plastic compounding business for certain environmental liabilities, respectively, related to such businesses. We may not have adequate insurance coverage or cash flows to make such indemnity payments. Such payments may be costly and may adversely affect our financial condition and results of operations.

Product Liability Due to the nature of our business and products, we may be liable for damages arising out of product liability claims.

The sale of our products involves the risk of product liability claims. For example, some of the chemicals or substances that are used in our businesses, such as arsenic pentoxide, have been alleged to represent potentially significant health and safety concerns. Our subsidiary in our Timber Treatment Chemicals business line has been named as a defendant in personal injury suits in several jurisdictions with retailers and treaters named as other defendants. These suits allege, among other things, product liability claims in connection with the use of timber products treated with CCA, which utilizes arsenic pentoxide as a raw material. For example, a subsidiary in our Advanced Ceramics segment has been named as a defendant in several product liability lawsuits in Europe, which allege various claims against our subsidiary that manufactures ceramic components used in the production of artificial hip joints and our customer has been named in a lawsuit in the United States relating to a broken artificial hip joint.

Also, because many of our products are integrated into our customers' products, we may be requested to participate in or share in the costs of a product recall conducted by a customer. For example, some of our businesses, including those within our Specialty Chemicals and Advanced Ceramics segments, supply products to customers in the automotive industry. In the event one of these customers conducts a product recall that it believes is related to one of our products, we may be asked to participate in or fund in whole or in part such a recall.

Our customers often require our subsidiaries to represent that our products conform to certain product specifications provided by our customers. Any failure to comply with such specifications could result in claims or legal action against our subsidiaries.

We are unable to estimate our exposure, if any, to the above-mentioned lawsuits at this time. We may be subject to future claims with regard to these suits or others like them and we may not be able to avoid significant product liability exposure. A successful product liability claim or series of claims against us for which we are not otherwise indemnified or insured could materially increase our operating costs or prevent such operating subsidiary from satisfying its financial obligations. For example, for policies renewed on or after November 2002, our insurers excluded CCA from our insurance coverage under our general liability policies. We may not have sufficient cash flow from operations or assets to pay a judgment resulting from a product liability claim or product recall, if any, for which there is no or inadequate insurance coverage. Any such judgment or product recall could materially increase our operating costs or prevent such operating subsidiary from satisfying its financial obligations.

Product Liability Due to the nature of our business and products, we may be liable for damages arising out of certain indemnity claims.

We may be subject to indemnity claims for product liability lawsuits relating to products we have sold. For example, our Timber Treatment Chemicals business has entered into indemnity agreements with various customers who purchased CCA-based wood protection products. Pursuant to those agreements, one of our subsidiaries agreed to defend and hold harmless those customers for certain causes of action, based on domestic mammalian, and in some cases, human toxicity, caused by our CCA-based wood protection products, subject to certain conditions. Our Timber Treatment Chemicals business has received and may in the future receive claims for indemnity from customers in connection with litigation relating to CCA-based wood protection products and may be required to pay indemnity claims under such agreements to one or more of its customers. Customers of our Advanced Ceramics segment have requested indemnification in certain legal actions related to ceramic components we have supplied to them for use in their hip prosthesis systems. If our subsidiaries are required to pay one or more indemnity claims, insurance may not cover such claims and, if not, our subsidiaries may not have sufficient free cash flow to pay such claims. We are unable to estimate our exposure, if any, to these claims and lawsuits at this time.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In addition, our Specialty Chemicals segment's subsidiary that formerly manufactured sealants for insulating glass has been named as a defendant in several lawsuits relating to alleged negligent manufacturing of those products. Pursuant to the sale and purchase agreement with respect to the divested glass business, this subsidiary may be required to pay indemnity claims, mainly re-glazing costs. Our insurance may not cover such claims and, in such a case, our subsidiary may not have sufficient cash flow to pay these claims. One or more of these claims could adversely affect our financial condition or results of operations.

FDA Regulation *Some of our manufacturing processes and facilities, pharmaceutical customers and medical device customers are subject to regulation by the FDA or similar foreign agencies. These requirements could adversely affect our results of operations.*

Regulatory requirements of the FDA are complex. Any failure to comply with them could subject us and/or our customers to fines, injunctions, civil penalties, lawsuits, recall or seizure of products, total or partial suspension of production, denial of government approvals, withdrawal of marketing approvals and criminal prosecution. Any of these actions could adversely impact our net sales,

undermine goodwill established with our customers, damage commercial prospects for our products and materially adversely affect our results of operations.

The manufacture and supply of ceramic ball head and liner components for hip joint prostheses systems by our Advanced Ceramics segment may be subject to the FDA's Quality System Regulation, which imposes current Good Manufacturing Practice requirements on the manufacture of medical devices. Certain lithium compounds manufactured by our Fine Chemicals business line of our Specialty Chemicals segment are also subject to FDA regulation.

In addition, medical device customers of our Advanced Ceramics segment to whom we supply our ceramic ball head and liner components are subject to FDA regulation, including premarket approval of their products and post market compliance requirements. The FDA may take three years or longer to grant premarket approval of our customers' new products, if at all. Further, our competitors may seek pre-market approval for products that compete with our ceramic hip components. At any time, our customers' total hip prostheses systems may be withdrawn from the market either voluntarily by our customers or as a result of the FDA's or a foreign equivalent's withdrawal of marketing approval or removal of such products for a number of reasons including safety, current Good Manufacturing Practice or Quality System Regulation problems with our products or our customers' final products. For example, a customer in our Advanced Ceramics segment initiated a voluntary recall in January 2008 of its hip implant system. Any such regulatory action could significantly limit our net sales generated by our Advanced Ceramics segment and may have a material adverse effect on our financial condition and results of operations.

Competition *Our industry is highly competitive. The end-use markets in which we compete are also highly competitive. This competition may adversely affect our results of operations.*

We face significant competition from major international producers as well as smaller regional competitors. Our most significant competitors include major chemicals and materials manufacturers and diversified companies, a number of which have revenues and capital resources exceeding ours. In addition, there is increasing competition from market participants in China.

Within the end-use markets in which we compete, competition between products is intense. Substitute products also exist for many of our products. Therefore, we face substantial risk that certain events, such as new product development by our competitors, changing customer needs, production advances for competing products, price changes in raw materials and products, our failure to secure patents or the expiration of patents, could result in declining demand for our products as our customers switch to substitute products or undertake manufacturing of such products on their own. If we are unable to develop, produce or market our products to effectively compete against our competitors, our results of operations may materially suffer.

We believe that our customers are increasingly looking for strong, long-term relationships with a few key suppliers that help them improve product performance, reduce costs, or support new product development. To satisfy these growing customer requirements, our competitors have been consolidating within product lines through mergers and acquisitions. We may also need to invest and spend more on research and development and marketing costs to strengthen existing customer relationships, as well as attract new customers. As a result, our debt level could limit our flexibility to react to these industry trends and our ability to remain competitive.

Product Innovation *If we are not able to continue our technological innovation and successful commercial introduction of new products, our profitability could be adversely affected.*

Our industries and the end-use markets into which we sell our products experience periodic technological change and product improvement. Manufacturers periodically introduce new generations of products or require new technological capacity to develop customized products. Our future growth will depend on our ability to gauge the direction of the commercial and technological progress in all key end-use markets and upon our ability to fund and successfully develop, manufacture and market products in such changing end-use markets. We will have to continue to identify, develop, market and in certain cases, secure regulatory approval for innovative products on a timely basis to replace or enhance existing products in order to maintain our profit margins and our competitive position. We may not be successful in developing new products and/or technology, either alone or with third parties, or licensing intellectual property rights from third parties on a commercially competitive basis. Our new products may not be accepted by our customers or may fail to receive regulatory approval. If we fail to keep pace with the evolving technological innovations in our end-use markets on a competitive basis, our business, financial condition and results of operations could be adversely affected.

Dependence on Intellectual Property *If our intellectual property were copied by competitors, or if they were to develop similar intellectual property independently, our results of operations could be negatively affected.*

Our success depends to a significant degree upon our ability to protect and preserve our intellectual property rights, which rights we own or use pursuant to licenses granted to us by third parties. The confidentiality and patent assignment agreements we enter into with most of our key employees and third parties to protect the confidentiality, ownership and use of intellectual property may be breached,

may not be enforceable, or may provide for joint ownership or ownership by a third party. In addition, we may not have adequate remedies for a breach by the other party, which could adversely affect our intellectual property rights. The use of our intellectual property rights or intellectual property similar to ours by others or our failure to protect such rights could reduce or eliminate any competitive advantage we have developed, adversely affecting our net sales. If we must sue to protect, defend or enforce our intellectual property rights, any suits or proceedings could result in significant costs and diversion of company resources and management attention, and we may not prevail in such action. We are periodically involved in actions related to misappropriation of our intellectual property by former employees. In addition, when our patents expire, competitors or new market entrants may manufacture products substantially similar to our products previously protected by a patent.

We conduct research and development activities with third parties and license certain intellectual property rights from third parties and we plan to continue to do so in the future. For example, in our Timber Treatment Chemicals business, we commercialized *Ecolife*, our next generation timber treatment preservative from our Timber Treatment Chemicals business, through our joint venture with Rohm and Haas Company (a subsidiary of The Dow Chemical Company). We endeavor to license or otherwise obtain intellectual property rights on terms favorable to us. However, we may not be able to license or otherwise obtain intellectual property rights on such terms or at all. Our inability to license or otherwise obtain such intellectual property rights could have a material adverse effect on our ability to create a competitive advantage and create innovative solutions for our customers, which will adversely affect our net sales and our relationships with our customers.

The steps we take to protect our intellectual property may not provide us with any competitive advantage and may be challenged by third parties. We have been subject to oppositions of our patents and trademarks by third parties before regulatory bodies in certain jurisdictions. Our failure to defend these patents or registered trademarks may limit our ability to protect the intellectual property rights that these applications were intended to cover. In addition, a failure to obtain and defend our trademark registrations may impede our marketing and branding efforts and competitive position. A failure to protect our intellectual property rights could have a material adverse effect on demand for our products and our net sales.

Risk of Intellectual Property Litigation *Our products or processes may infringe the intellectual property rights of others, which may cause us to pay unexpected litigation costs or damages or prevent us from selling our products.*

Although it is our intention to avoid infringing or otherwise violating the intellectual property rights of others, our processes and products may infringe or otherwise violate the intellectual property rights of others. We may be subject to legal proceedings and claims, including claims of alleged infringement by us or our licensees of the patents, trademarks and other intellectual property rights of third parties. Intellectual property litigation is expensive and time-consuming, regardless of the merits of any claim, and could divert our management's attention from operating our businesses. If we were to discover or be notified that our processes or products potentially infringe or otherwise violate the intellectual property rights of others, we may need to obtain licenses from these parties or substantially re-engineer our products and processes in order to avoid infringement. We might not be able to obtain the necessary licenses on acceptable terms, or at all, or be able to re-engineer our products successfully. Moreover, if we are sued for infringement and lose the suit, we could be required to pay substantial damages and/or be enjoined from using or selling the infringing products or technology. Any of the foregoing could cause us to incur significant costs and prevent us from selling our products.

International Operations *As a global business, we are exposed to local business risks in different countries which could have a material adverse effect on our financial condition or results of operations and the value of our common stock.*

We have significant operations in many countries, including manufacturing facilities, research and development facilities, sales personnel and customer support operations. Currently, we operate, or others operate on our behalf, facilities in countries such as Brazil, Chile, China, Czech Republic, India, Malaysia, Mexico, Poland, Singapore, South Africa, South Korea, Taiwan and Turkey. Of our total net sales in 2011 of \$3,669.3 million, approximately 77% were generated by shipments to customers in countries outside North America. Our operations are affected

directly and indirectly by global regulatory, economic and political conditions, including:

- new and different legal and regulatory requirements in local jurisdictions;
- managing and obtaining support and distribution for local operations;
- increased costs of, and availability of, transportation or shipping;
- credit risk and financial conditions of local customers and distributors;
- potential difficulties in protecting intellectual property;

- risk of nationalization of private enterprises by foreign governments;
- potential imposition of restrictions on investments;
- potentially adverse tax consequences, including imposition or increase in withholding and other taxes on remittances, repatriation or other payments by subsidiaries;
- capital controls; and
- local political, economic and social conditions, including the possibility of hyperinflationary conditions and political instability in certain countries.

In addition, our facilities may be targets of terrorist activities that could result in full or partial disruption of the activities of such facilities. We may not succeed in developing and implementing policies and strategies to counter the foregoing factors effectively in each location where we do business. Our failure to do so could limit our ability to sell products, compete or receive payments for products sold in such locations.

Furthermore, our subsidiaries are subject to rules and regulations related to anti-bribery prohibitions and export controls and economic embargoes, violations of which may carry substantial penalties. For example, export control and economic embargo regulations limit the ability of our subsidiaries to market, sell, distribute or otherwise transfer their products or technology to prohibited countries or persons. Failure to comply with these regulations could subject our subsidiaries to fines, enforcement actions and/or have an adverse effect on our reputation and the value of our common stock. In addition, we are subject to the Dodd-Frank Wall Street Reform and Consumer Protection Act and the Health Care and Education Reconciliation Act of 2010 and the cost of compliance may adversely impact our results of operations.

Retention of Key Personnel *If we lose certain key personnel or are unable to hire additional qualified personnel, we may not be able to execute our business strategy.*

Our success depends, in part, upon the continued services of our highly skilled personnel involved in management, research, production, sales and distribution, and, in particular, upon the efforts and abilities of our executive officers and key employees. Although we believe that we are adequately staffed in key positions and that we will be successful in retaining key personnel, we may not be able to retain such personnel on acceptable terms or at all. Furthermore, if we lose the service of any executive officers or key employees, we may not be able to execute our business strategy. We do not have key-person life insurance covering any of our employees.

Relations with Employees *We are subject to stringent labor and employment laws in certain jurisdictions in which we operate, and our relationship with our employees could deteriorate, which could adversely impact our operations.*

A majority of our full-time employees are employed outside the United States, particularly in Germany where many of our businesses are located. In certain jurisdictions where we operate, particularly in Germany, labor and employment laws are relatively stringent and, in many cases, grant significant job protection to certain employees, including rights on termination of employment. In addition, in certain countries where we operate, including Germany, our employees are members of unions or are represented by a works council as required by law. We are often required to consult and seek the consent or advice of these unions and/or respective works councils. These regulations and laws coupled with the requirement to consult with the relevant unions or works councils could significantly limit our flexibility in managing costs and responding to market changes.

Furthermore, with respect to our employees that are subject to collective bargaining arrangements or similar arrangements (approximately one-third of our full-time employees as of February 1, 2012), we may not be able to negotiate labor agreements on satisfactory terms and actions by our employees may disrupt our business. If these workers were to engage in a strike, work stoppage, sabotage or other slowdown, we could experience a significant disruption of our operations and/or higher ongoing labor costs. In addition, if our other employees were to become unionized, we could experience a significant disruption of our operations and/or higher ongoing labor costs.

Tax Liabilities *If GEA Group Aktiengesellschaft (formerly known as mg technologies ag) or Degussa UK Holdings, Ltd. fail to satisfy their contractual obligations, we may be subject to increased tax exposure resulting from pre-acquisition periods.*

Under the terms of certain purchase agreements, third party sellers have agreed to substantially indemnify us for tax liabilities pertaining to the pre-acquisition periods. To the extent such companies fail to indemnify or satisfy their obligations, or if any amount

is not covered by the terms of the indemnity, earnings could be negatively impacted in future periods through increased tax expense.

Net Loss *We have experienced losses in the past and may experience losses in the future and cannot be certain that our net operating loss carryforwards will continue to be available to offset our tax liability.*

We have incurred net losses in the past and we may incur net losses in the future. As of December 31, 2011, we had deferred tax assets of \$162.0 million related to worldwide net operating and capital loss carryforwards. Additionally, at December 31, 2011, we had a total valuation allowance of \$181.8 million related to net operating loss deferred tax assets and deferred tax assets related to cumulative temporary differences. If our operating performance deteriorates in the future in certain tax jurisdictions, we may be unable to realize these net operating loss carryforwards and we may be required to record an additional valuation allowance.

Anticipated Capital Expenditures *Our required capital expenditures may exceed our estimates.*

Our capital expenditures for the year ended December 31, 2011 were \$279.7 million, which consisted of expenditures to maintain and improve existing equipment and substantial investments in new equipment. Capital expenditures for 2012 are expected to be above 2011 levels. Future capital expenditures may be significantly higher, depending on the investment requirements of each of our business lines, and may also vary substantially if we are required to undertake actions to compete with new technologies in our industry. We may not have the capital necessary to undertake these capital investments. If we are unable to do so, we may not be able to effectively compete in some of our markets.

Information Security *The security of our information technology systems could be compromised, which could adversely affect our ability to operate.*

We depend on information technology to enable us to operate efficiently and interface with customers, as well as maintain financial accuracy and efficiency. Our information technology capabilities are delivered through a combination of internal and outsourced service providers. If we do not allocate and effectively manage the resources necessary to build and sustain the proper technology infrastructure, we could be subject to transaction errors, processing inefficiencies, the loss of customers, business disruptions, or the loss of or damage to our intellectual property through security breach. As with all large systems, our information systems could be penetrated by outside parties intent on extracting information, corrupting information, or disrupting business processes. Our systems have in the past been and likely will in the future be subject to hacking attempts. Unauthorized access could disrupt our business operations and could result in the loss of assets and have a material adverse effect on our business, financial condition, or results of operations.

Our business involves the use, storage, and transmission of information about our employees, vendors, and customers. The protection of such information, as well as our information, is critical to us. The regulatory environment surrounding information security and privacy is increasingly demanding, with the frequent imposition of new and constantly changing requirements. Our subsidiaries also, from time to time, export sensitive customer data and technical information to recipients outside the U.S. Breaches of our security measures or the accidental loss, inadvertent disclosure, or unapproved dissemination of proprietary information or sensitive or confidential data about us or our customers, including the potential loss or disclosure of such information or data as a result of fraud or other forms of deception, could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information, could result in litigation and potential liability for us, damage our reputation, or otherwise harm our business, financial condition or results of operations.

Control A conflict may arise between our interests and those of KKR.

Affiliates of KKR own approximately 10.3% of our common stock as of December 31, 2011 on an undiluted basis. Although affiliates of KKR no longer hold a majority of our outstanding common stock, they continue to have a significant impact on the vote in any election of directors. In addition, representatives of KKR occupy two of the seven seats on our board of directors. As a result, even though representatives of KKR do not occupy a majority of the seats on our board of directors, affiliates of KKR have substantial influence over our decisions to enter into any corporate transaction and whether any transaction that requires the approval of the stockholders is approved. Additionally, KKR is in the business of making investments in companies and may from time to time acquire and hold interests in businesses that compete directly or indirectly with us. They may also pursue acquisition opportunities that may be complementary to our business, and as a result, those acquisition opportunities may not be available to us.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

We have global operations, serving customers worldwide. To service our customers efficiently, we maintain 81 manufacturing facilities in 23 countries around the world with a strategy of global, regional and local manufacturing to optimize our service offering and minimize production cost to our customers. We believe these facilities are suitable and adequate for their intended use. The table below presents summary information with respect to these facilities:

Segment	Country	Locations	Leased/Owned	Major Applications/Industry
Specialty Chemicals				
Surface Treatment	Australia	Bayswater North	Owned	General Industry, Aerospace, and other pre-treatment technologies
	Brazil	Jundiai/São Paulo	Owned	Automotive and other pre-treatment technologies
	China	Changchun (JV)	Leased	Automotive and other pre-treatment technologies
		Chongqing (JV)	Leased	Automotive and other pre-treatment technologies
		Shanghai (JV)	Leased	Automotive and other pre-treatment technologies
		Nanjing (JV)	Leased	Automotive, cold forming and other pre-treatment technologies
	France	Sens	Owned	Automotive and other pre-treatment technologies
		Soissons	Owned	Aerospace
	Germany	Mönchengladbach	Owned	General industry
		Langelsheim (1)	Owned	Automotive technologies, other pre-treatment technologies and aerospace (sealants)
	India	Chennai (JV)	Leased	Automotive and other pre-treatment technologies
		Pune (JV)	Owned	Automotive and other pre-treatment technologies
	Italy	Giussano	Owned	Automotive and other pre-treatment technologies
		Roveredo in Piano	Leased	General industry
	Mexico	El Marqués, Querétaro	Leased	Automotive technologies, other pre-treatment technologies and aerospace
	New Zealand	Auckland	Leased	General Industry, Aerospace, and other pre-treatment technologies
	Singapore	Singapore	Leased	Aerospace and other pre-treatment technologies
	South Africa	Boksburg	Owned	Automotive and other pre-treatment technologies
	Spain	Canovelles	Owned	Automotive and other pre-treatment technologies
	Turkey	Cayırova-Kocaeli	Owned	Automotive and other pre-treatment technologies
		Jackson, MI	Owned	General industry
		La Mirada, CA	Leased	Pre-treatment technologies and aerospace
		Romulus, MI	Owned	Automotive technologies, other pre-treatment technologies and aerospace
Fine Chemicals	Austria	Arnoldstein	Leased	Metal sulfides
	Chile	La Negra	Owned	Lithium-carbonate and lithium chloride

		Salar de Atacama	Owned	Lithium brine and Potash
	Germany	Langelsheim (1)	Owned	Butyllithium, lithium-chloride, specialty products, lithium metal, lithium-hydrides, cesium, and special metals
	Taiwan	Taichung	Owned	Butyllithium
	India	Gujarat	Leased	Butyllithium
	United States	Kings Mountain, NC	Owned	Metal and battery
		New Johnsonville, TN	Owned	Butyllithium and specialty products
		Pasadena, TX	Owned	Butyllithium
		Silver Peak, NV	Owned	Lithium-carbonate and lithium hydroxide
Performance Additives				
Color Pigments and Services	China	Shenzhen	Owned	Coatings and construction
		Taicang	Owned	Coatings and specialties
	France	Comines	Owned	Coatings
	Germany	Hainhausen	Owned	Construction and coatings
		Walluf	Owned	Construction and coatings
	Italy	Turin	Owned	Coatings, specialties and construction
	United Kingdom	Birtley	Owned	Driers
		Kidsgrove	Owned	Coatings and specialties
		Sudbury	Owned	Coatings and specialties
	United States	Beltsville, MD	Owned	Coatings, specialties and construction
		Cartersville, GA	Owned	Construction
		East St. Louis, IL	Owned	Specialties
		Easton, PA	Owned	Coatings, specialties and construction
		Harleyville, SC	Owned	Construction
		King of Prussia, PA	Owned	Construction
		Los Angeles, CA	Owned	Coatings, specialties and construction
		St. Louis, MO	Owned	Coatings, specialties and construction
Timber Treatment Chemicals	United Kingdom	Barrow-in-Furness	Leased	Wood protection products and treatment
	United States	Freeport, TX	Owned	Construction and other industrial markets
		Harrisburg, NC	Owned	Wood protection products and treatment
		Valdosta, GA	Owned	Wood protection products and treatment
Clay-based Additives	Germany	Duisburg (2)	Owned	Flocculants
		Ibbenbueren	Leased	Flocculants
		Moosburg	Leased	Paints and inks
		Schwarzheide	Leased	Flocculants
	United Kingdom	Widnes, Cheshire	Owned	Paper-making, consumer and household care and coatings and paper
	United States	Gonzales, TX	Owned	Paints, inks, oilfields and paper-making
		Louisville, KY	Owned	Paints and inks
Titanium Dioxide Pigments				
Titanium Dioxide	Finland	Pori	Owned	Plastics, paints, packaging inks, coatings and paper
	Germany	Duisburg (2) (3)	Owned	Fibers, plastics, paints, coatings and paper
Functional Additives	Germany	Duisburg (2) (3)	Owned	Coatings, plastics, fibers, paper, pharmaceuticals, PVC stabilizers and glass fiber reinforced plastics
Advanced Ceramics				
	Brazil	Nova Odessa	Leased	Automotive

- (1) This facility is shared by both business divisions of the Specialty Chemicals segment.
- (2) This facility is shared by both the Performance Additives segment and the Titanium Dioxide Pigments segment.
- (3) This facility is shared by the two business divisions of the Titanium Dioxide Pigments segment.

Item 3. Legal Proceedings.

We are involved in legal proceedings from time to time in the ordinary course of our business, including with respect to product liability, intellectual property and environmental matters. In addition, we may be required to make indemnity payments in connection with certain product liability and environmental claims. See Item 1, Business, and Item 1A, Risk Factors, Environmental Indemnities. We may be subject to environmental indemnity claims relating to properties we have divested ; Product Liability. Due to the nature of our business and products, we may be liable for damages arising out of product liability claims ; and Product Liability. Due to the nature of our business and products, we may be liable for damages arising out of certain indemnity claims. However, we do not believe that there is any other individual, governmental, legal proceeding or arbitration that is likely to have a material adverse effect on our financial condition, results of operations or cash flows. We cannot predict the outcome of any litigation or the potential for future litigation. See also Item 8. Financial Statements and Supplementary Data - Note 19, Commitments and Contingencies.

Lanxess Matter

On January 18, 2010, Lanxess Deutschland GmbH filed suit in the District Court of Satakunta, Finland against Sachtleben Pigments Oy (Sachtleben), a subsidiary of the Company's Titanium Dioxide Pigments venture, claiming breach of contract in connection with Sachtleben's termination of a supply agreement with plaintiff. In late September 2011, the Court held a hearing on the merits of the case and rendered a judgment in October 2011 against Sachtleben in the amount of 3.2 million (€3.2 million) plus accrued interest and legal fees. The Company appealed the Court's ruling and the parties entered into a settlement agreement on February 21, 2012. The settlement amount is not materially different than the judgment amount that has been accrued as of December 31, 2011 in the Company's financial statements.

Migratory Bird Matter

In August 2011, the U.S. Department of Justice Environment and Natural Resources Division (DOJ), along with the U.S. Fish and Wildlife Service (FWS) and the Nevada Department of Wildlife (NDOW) commenced an investigation relating to alleged migratory bird deaths at our subsidiary's Silver Peak, Nevada site in violation of the Migratory Bird Treaty Act of 1918. The Company's subsidiary is working with the DOJ, FWS and NDOW to address any migratory bird issues. To date, no proceedings have been initiated and no fines have been levied. The Company does not expect the resolution of this matter to have a material impact on its financial condition, results of operations or cash flows.

Inspector General Subpoena

In February 2010, a subsidiary of the Company received a subpoena from the Inspector General of the Department of Defense (DOD) seeking information related to a product in the Timber Treatment Chemicals business in the Performance Additives segment. This subsidiary has and will continue to comply with the requests of the DOD to provide the relevant information. The Company cannot predict the likelihood of further legal action or estimate the loss or possible range of loss, if any, in connection with this matter.

Item 4. Mine Safety Disclosures

The information concerning mine safety violations or other regulatory matters required by Section 1503 (a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.104) is included in Exhibit 95.1 of this annual report.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

The Company's common stock is traded on the New York Stock Exchange under the ticker symbol ROC. As of February 17, 2012, there were approximately 49 holders of record of the Company's common stock.

The following table summarizes the Company's quarterly common stock information:

2011	High	Low
First	\$ 49.83	\$ 38.01
Second	57.29	45.78
Third	62.03	33.69
Fourth	49.82	30.43

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

2010		High		Low
First	\$	26.95	\$	20.20
Second		31.30		21.88
Third		32.66		21.59
Fourth		42.24		31.55

Rockwood's operations are conducted through its subsidiaries and its ability to make payments on any obligations it may have is dependent on the earnings and the distribution of funds from its subsidiaries. As a result, we are dependent upon cash dividends and distributions and other transfers from our subsidiaries to make dividend payments on our common stock. The amounts available to us to pay cash dividends are restricted by our subsidiaries' debt agreements. Under Group's senior secured credit facilities and indenture governing the 2014 Notes, Group is permitted to pay dividends or other distributions to us subject to certain limitations and exceptions. Under our senior secured credit agreement, our ability to pay dividends is limited to \$600 million, plus additional amounts subject to satisfying certain leverage ratios. Any decision to declare and pay dividends in the future will be made at the discretion of our board of directors and will depend on, among other things, our results of operations, cash requirements, financial condition, contractual restrictions and other factors that our board of directors may deem relevant. See further discussion in liquidity section of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations. For the years ended December 31, 2011, 2010 and 2009, the Company did not pay any cash dividends.

There were no repurchases of any of the Company's common stock by or on behalf of the Company during the fourth quarter of 2011 and no sales of unregistered equity securities by the Company during the fiscal year ended December 31, 2011.

Stock Performance Graph

The following graph compares the performance through December 31, 2011 of a hypothetical \$100 investment made on December 31, 2006 in (a) our common stock, (b) the S&P 500 Index ® and (c) the S&P Supercomposite Specialty Chemicals Index (S15SPCH).

Item 6. Selected Financial Data.

The following selected consolidated financial data of the Company's five most recent years ended December 31, 2011 should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8, Financial Statements and Supplementary Data. The Statement of Operations data set forth below with respect to the three years in the period ended December 31, 2011 and the Balance Sheet data as of December 31, 2011 and 2010, are derived from the Company's audited financial statements included elsewhere in this document. The Statement of Operations data for the years ended December 31, 2008 and 2007 and the Balance Sheet data as of December 31, 2009, 2008 and 2007 are derived from audited consolidated financial statements not included herein. All periods presented have been reclassified to account for the sale of the Groupe Novasep segment and the Electronics business in 2007, the sale of the pool and spa chemicals business in 2008 and the sale of the plastic compounding business in January 2011 as discontinued operations.

Total long-term debt, including current portion	1,687.7	2,161.0	2,528.3	2,811.2	2,581.4
Total equity	1,658.4	1,341.3	1,140.8	1,138.9	1,746.9

(1) Net of government grants of \$16.0 million and \$3.2 million for the years ended December 31, 2011 and 2010, respectively.

(2) Consolidated EBITDA as adjusted (Adjusted EBITDA) is used in our debt agreements to determine compliance with financial covenants and our ability to engage in certain activities, such as incurring additional debt and making certain payments. In addition to covenant compliance, our management also uses Adjusted EBITDA to assess our operating performance and to calculate performance-based cash bonuses and determine whether certain performance-based stock options vest, as both such bonuses and options are tied to Adjusted EBITDA targets. Adjusted EBITDA contains other charges and gains, for which we believe adjustment is permitted under our senior secured credit agreement, as described under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Which Affect Our Results of Operations Other Charges and Credits and Note Regarding Non-GAAP Financial Measures.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The following table sets forth a reconciliation of net income (loss) attributable to Rockwood Holdings, Inc. to Adjusted EBITDA for the periods indicated:

(\$ in millions)	Year ended December 31,				
	2011	2010	2009	2008	2007
Net income (loss) attributable to Rockwood Holdings, Inc.	\$ 411.3	\$ 239.4	\$ 21.1	\$ (588.4)	\$ 317.1
Net income (loss) attributable to noncontrolling interest	40.6	9.1	(3.8)	(83.6)	8.0
Net income (loss)	451.9	248.5	17.3	(672.0)	325.1
Income tax provision (benefit)	124.4	(24.6)	9.7	(31.0)	54.8
(Income) loss from discontinued operations, net of tax	(0.9)	(19.4)	(16.8)	75.9	(37.9)
Gain on sale of discontinued operations, net of tax	(119.3)			(42.9)	(210.4)
Income (loss) from continuing operations before taxes	456.1	204.5	10.2	(670.0)	131.6
Interest expense, net	96.1	151.1	178.1	225.1	207.8
Depreciation and amortization	267.2	255.9	274.2	249.6	202.2
Goodwill impairment charges				717.5	
Restructuring and other severance costs	14.5	5.0	20.3	34.1	12.0
Systems/organization establishment expenses	6.5	2.1	6.3	12.5	3.6
Acquisition and disposal costs	0.4	1.3	3.0	1.7	1.8
Inventory write-up charges				6.9	5.7
Loss (gain) on early extinguishment/modification of debt	16.6	1.6	26.6	(4.0)	18.6
Asset write-downs and other	1.6	11.5	2.6	(1.9)	(4.7)
Acquired in-process research and development				2.9	
Foreign exchange (gain) loss on financing activities, net	(1.3)	1.0	(16.0)	32.3	(7.8)
Other (a)	5.1	0.4	4.6	1.9	0.9
Total Adjusted EBITDA from continuing operations	\$ 862.8	\$ 634.4	\$ 509.9	\$ 608.6	\$ 571.7

(a) In 2011, we recorded expenses of \$5.1 million primarily related to fees incurred in connection with exploring strategic options. In 2009, the Company recorded expenses of \$4.6 million primarily related to an increase in reserves covering legacy obligations assumed in connection with the KKR acquisition in 2000 and the acquisition of the Dynamit Nobel businesses in 2004. In 2008, the company recorded expenses of \$1.9 million which includes fees incurred in connection with the secondary offering of the Company's common stock in June 2008.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

We are a global developer, manufacturer and marketer of technologically advanced, high value-added specialty chemicals and advanced materials. We serve more than 60,000 customers across a wide variety of industries and geographic areas. We operate through four business segments: (1) Specialty Chemicals; (2) Performance Additives; (3) Titanium Dioxide Pigments; and (4) Advanced Ceramics.

We are focused on growth, productivity, cost reduction, margin expansion, divestment of non-core businesses, debt reduction and bolt-on acquisitions. In connection with this focus, among other things:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

- In January 2011, we completed the sale of our plastic compounding business;
- In February 2011, we refinanced \$850.0 million and repaid \$408.7 million of our senior secured term loans;
- On February 22, 2012, we issued a new tranche of term loan A under our existing senior secured credit facility in the amount of \$350.0 million and expect to use the proceeds and cash on hand to redeem all of our outstanding 2014 Notes and to pay accrued and unpaid interest and applicable redemption premiums. See further discussion below in [Liquidity and Capital Resources](#) section and in Item 8. Financial Statements and Supplementary Data - Note 20, [Subsequent Events](#).
- Improved our Adjusted EBITDA from continuing operations margin to 23.5% for the year ended December 31, 2011 from 19.9% for the same period in the prior year.

The following table is a summary of our financial highlights:

(\$ in millions, except per share amounts)	Year ended December 31,	
	2011	2010
Net sales	\$ 3,669.3	\$ 3,191.6
Adjusted EBITDA from continuing operations	862.8	634.4
Diluted earnings per share from continuing operations attributable to Rockwood Holdings, Inc.	3.64	2.82

Results

Total net sales were up primarily due to:

- Increased selling prices in all businesses, particularly in Titanium Dioxide Pigments.
- The impact of favorable currency changes.

Diluted earnings per share and Adjusted EBITDA increased from the prior year due to selling price increases, partially offset by higher raw material costs.

This discussion contains forward-looking statements that involve numerous risks and uncertainties. Our actual results could differ materially from those discussed in the forward-looking statements as a result of these risks and uncertainties, including those set forth under Item 1, Business Forward-Looking Statements and Item 1A, Risk Factors. You should read the following discussion and analysis together with Item 6, Selected Financial Data, our consolidated financial statements and the notes to those statements that appear elsewhere in this Annual Report. Amounts may not recalculate due to rounding differences.

Factors Which Affect Our Results of Operations

Our Markets

Because the businesses in our segments generally serve many unrelated end-use markets, we discuss the principal market conditions on a segment basis rather than a consolidated basis. The principal market conditions in our segments and regions in which we operate that impacted our results of operations during the periods presented include the following:

Specialty Chemicals

- Demand for Surface Treatment products in our Specialty Chemicals segment generally follows the activity levels of metal processing manufacturers, including the automotive supply, steel and aerospace industries. In 2010, net sales were up from higher volumes in all markets. In 2011, net sales were up from higher volumes in all markets, particularly automotive and general industrial, as well as increased selling prices. We expect net sales growth in 2012 primarily from higher selling prices, as well as higher volumes, across most markets.

- Demand for our lithium carbonate products in the Fine Chemicals business line of our Specialty Chemicals segment is generally driven by demand in industrial applications, the aluminum business, the battery industry, glass ceramics, cement and the general demand in China. Sales of lithium products specifically used in life science applications depend on the trends in drug development and growth in pharmaceuticals and agrochemicals markets, as well as generic competition. Results in 2010 were higher primarily from increased volumes of lithium products and metal sulfide applications, partially offset by lower selling prices of potash and lithium carbonate. In 2011, net sales were up primarily from increased selling prices and increased volumes of lithium products. We expect net sales growth in 2012 driven by higher selling prices, particularly potash, as well as increased volumes of lithium products for the battery industry.

Performance Additives

- Generally, a trend towards the increased use of colored concrete products in the construction market has historically had a positive effect on our Color Pigments and Services business line. However, a general slowdown in the construction market has negatively impacted construction sales. North American construction volumes were lower in 2010 and continued to be lower in 2011. European construction volumes in 2010 were comparable to the same periods in the prior year, but were up slightly in 2011. Construction sales are expected to be up slightly in 2012 across all regions on higher volumes. Volumes of coatings and

specialties products were up in 2010, but were down in 2011. Coatings and specialties sales are expected to be up in 2012 on increased volumes.

- Demand for our wood protection products, in particular alkaline copper quaternary, or ACQ, is generally driven by both repair and remodeling, as well as new construction. The market position of ACQ was negatively impacted in 2010 by a general slowdown in the construction market. In 2011, net sales were up from higher selling prices, as well as higher volumes. We expect net sales growth in 2012 primarily from higher selling prices and the impact of Ecolife applications.

- In the Clay-based Additives business, higher volumes in most markets, particularly oilfield, had a favorable impact on results in 2010. In 2011, higher volumes, as well as higher selling prices, continued in most markets, particularly oilfield. We expect net sales growth to continue in 2012 primarily from higher selling prices across most markets, as well as continued higher volumes, particularly in oilfield applications.

Titanium Dioxide Pigments

- Demand for our titanium dioxide products in anatase grade is driven mainly by demand in the synthetic fiber industry, while demand for titanium dioxide products in rutile grade and our functional additives business are driven by demand in the coatings, printing inks, construction, cosmetics, pharmaceutical, food, paper and plastics industries. Market conditions, including pricing pressure and industry overcapacity, have negatively impacted this segment in the past. However, this trend has changed as prices are increasing as a result of current undercapacity in this industry. In 2010, higher volumes, as well as selling price increases, had a favorable impact on results. In 2011, higher selling prices, as well as a favorable product mix, were partially offset by lower volumes. We expect sales to continue to be higher in 2012 primarily from higher selling prices to offset raw material price increases, particularly for slag and ilmenite, as well as higher sales volumes primarily in the specialties markets.

- Our functional additives sales were up in 2010 and 2011 as higher selling prices had a favorable impact on results. We expect net sales of functional additives applications to be higher in 2012 from higher selling prices to offset raw material cost increases.

Advanced Ceramics

- Demand for our ceramic components for medical devices is mainly tied to the aging population in Europe and the United States. Sales of our medical device applications increased in 2010 and 2011 on higher volumes. We expect this growth to continue in 2012 primarily in ceramic hip applications.

- Sales of most product applications, including cutting tools, mechanical applications and electronic applications were up in 2010 and 2011 on higher volumes. We expect sales for cutting tools and mechanical applications to be higher in 2012 on higher volumes. We expect a slow down in demand for ceramics for electronic applications for 2012.

Global Exposure

We operate a geographically diverse business, with 55% of our net sales in 2011 generated from shipments to customers in Europe, 23% to North America (predominantly the United States), 14% to Asia and 8% to the rest of the world. For a geographic description of the origin of our net sales and location of our long-lived assets, see Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information.

We have sold to customers in more than 60 countries during this period. Currently, we serve our diverse and extensive customer base with 81 manufacturing facilities in 23 countries. Consequently, we are exposed to global economic and political changes, particularly currency fluctuations that could impact our profitability and demand for our products.

Our sales and production costs are mainly denominated in U.S. dollars or Euros. Our results of operations and financial condition have been historically impacted by the fluctuation of the Euro against our reporting currency, the U.S. dollar. For the year ended December 31, 2011, the average exchange rate of the Euro against the U.S. dollar was higher compared to 2010. As a result, our net sales, gross profit and operating income were favorably impacted. Historically, however, our operating margins have not been significantly impacted by currency fluctuations because, in general, sales and costs of products sold are generated or incurred in the same currency, subject to certain exceptions.

The foreign currency effect is the translation impact of the change in the average rate of exchange of another currency to the U.S.

dollar for the applicable period as compared to the preceding period. The impact relates primarily to the conversion of the Euro to the U.S. dollar. Unless otherwise noted, all balance sheet items as of December 31, 2011 which are denominated in Euros are converted at the December 31, 2011 exchange rate of 1.00 = \$1.2961.

Raw Materials

Raw materials constituted approximately 48% of our 2011 cost of products sold. We have a broad raw material base, with the cost of no single raw material representing more than 3% of our cost of products sold in 2011. Nonetheless, the significant price fluctuations our raw materials have experienced in the past during periods of high demand have had an adverse impact on our results of operations. In 2011, higher raw material costs in a number of businesses of \$106.7 million had an unfavorable impact on our results of operations. For example, in 2011, we experienced higher prices for tin used in the Metal Sulfides business of our Specialty Chemicals segment, slag and ilmenite used in our Titanium Dioxide Pigments segment and copper used in the Timber Treatment Chemicals business. We cannot accurately predict the impact of any future price increases for raw materials or any raw material shortages on our business as a whole or in specific geographic regions. In addition, we may not be able to pass on raw material price increases to our customers. See details of our ten most significant raw materials (in terms of dollars) in Item 1, Business Raw Materials.

Energy Costs

In 2011, energy purchases represented approximately 8% of our cost of products sold. However, within certain business lines, such as our Titanium Dioxide Pigments segment and the Color Pigments and Services and Clay-based Additives businesses of our Performance Additives segment, energy costs are more significant. Energy costs were up in 2011. Natural gas prices in Europe, where our Titanium Dioxide Pigments segment is located, were up in 2011. The cost of products sold for certain of our businesses, including Color Pigments and Services and Clay-based Additives, increases when the price of natural gas in North America rises. Natural gas prices in North America were down in 2011.

Income Taxes

As of December 31, 2011, we had U.S. federal and foreign corporate tax loss carryforwards (excluding state and local amounts) of approximately \$447.6 million, of which \$14.3 million expire through 2016, \$345.9 million expire through 2031 and \$87.4 million which have no current expiration date. Additionally, the Company has \$15.0 million of federal capital loss carryforwards which expire through 2016. With respect to state and local tax loss carryforwards, the Company has \$7.2 million that expire through 2021, \$64.7 million that expire through 2026 and \$209.0 million expiring in years through 2032. The state capital loss carryforwards of \$73.6 million expire through 2016.

As a result of a tax election made at the end of 2011 related to a non-U.S. subsidiary, we recognized a taxable capital loss of \$251.9 million and an increase to our deferred tax assets of \$17.8 million related to the difference between the tax and book basis of the entity's assets. The effect of both the capital loss and the deferred tax asset recognition is offset by an increase in the valuation allowance.

The worldwide valuation allowance increased by \$100.7 million to \$181.8 million at December 31, 2011 to reserve for an increase in deferred tax assets which resulted from net operating losses and capital losses that more likely than not, will not be realized.

Other Charges and Credits

During the periods presented, we incurred certain other charges that included systems/organization establishment expenses, restructuring and other severance costs, foreign exchange gains and losses, asset write-downs and other and a loss on early extinguishment/modification of debt. See Items excluded from Adjusted EBITDA section in Note 3, Segment Information, for a discussion of other charges and credits recorded in the years ended December 31, 2011, 2010 and 2009.

Note Regarding Non-GAAP Financial Measures

A non-GAAP financial measure is generally defined by the SEC as one that purports to measure historical or future financial performance, financial position or cash flows but excludes or includes amounts that would not be so adjusted in the most comparable U.S. GAAP measure. From time to time in this management's discussion and analysis, we disclose non-GAAP financial measures, primarily Adjusted EBITDA, as defined below.

Definition of Adjusted EBITDA

The presentation of consolidated Adjusted EBITDA contained in this report is calculated using the definition set forth in the senior secured credit agreement as a basis and reflects management's interpretations thereof. Adjusted EBITDA, which is referred to under

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

the senior secured credit agreement as Consolidated EBITDA, is defined in the senior secured credit agreement as consolidated earnings (which, as defined in the senior secured credit agreement, equals income (loss) before the deduction of income taxes of Rockwood Specialties Group, Inc. and the Restricted Subsidiaries (as such term is defined in the senior secured credit agreement), excluding extraordinary items) plus:

- interest expense;
- depreciation expense;
- amortization expense, including amortization of deferred financing fees;
- extraordinary losses and non-recurring charges;
- non-cash charges;
- losses on asset sales;
- restructuring charges or reserves (including severance, relocation costs and one-time compensation charges and costs relating to the closure of facilities);
- expenses paid by us or any of our subsidiaries in connection with the Dynamit Nobel Acquisition, the senior secured credit agreement, the granting of liens under the security documents (as such term is defined in the senior secured credit agreement), the indenture governing the 2014 Notes and the offering of the 2014 Notes and any other related transactions;
- any expenses or charges incurred in connection with any issuance of debt or equity securities;
- any fees and expenses related to permitted acquisitions;
- any deduction for noncontrolling interest expense; and
- items arising in connection with CCA litigation related to our Timber Treatment Chemicals business of our Performance Additives segment;

less:

- extraordinary gains and non-recurring gains;
- non-cash gains; and
- gains on asset sales,

in all cases, subject to certain exclusions.

For presentation purposes within this report, we use the computation set forth in our senior secured credit agreement as a basis which reflects management's interpretations thereof. Management has determined that stock-based compensation costs, which are non-cash charges, will not be an adjustment in calculating Adjusted EBITDA as these costs will be an ongoing recurring cost to the Company. These costs are recorded in selling, general and administrative expenses in the Consolidated Statements of Operations. Specifically, the calculation of Adjusted EBITDA according to the indenture underlying our 2014 Notes and the facility agreement governing our Titanium Dioxide Pigments venture excludes certain adjustments prescribed within the senior secured credit agreement. Given that borrowings under the senior secured credit agreement are secured by most of our assets and given that the calculation does not materially differ from the calculation of Adjusted EBITDA for performance measurement purposes, we believe this is the most appropriate computation of Adjusted EBITDA to present.

Management's Uses

We use Adjusted EBITDA on a consolidated basis to assess our operating performance. We believe this financial measure on a consolidated basis is helpful in highlighting trends in our overall business because the items excluded in calculating Adjusted EBITDA have been deemed by management to have little or no bearing on our day-to-day operating performance. It is also the most significant criterion in our calculation of performance-based cash bonuses and our determination of whether certain performance-based stock options and restricted stock units vest, all of which are tied to Adjusted EBITDA targets.

We also use Adjusted EBITDA on a consolidated basis as a liquidity measure. We believe this financial measure on a consolidated basis is important in analyzing our liquidity because our senior secured credit agreement and indenture governing the 2014 Notes contain financial covenants that are determined based on Adjusted EBITDA. These covenants are material terms of these agreements, because they govern substantially all of our long-term debt, which in turn represents a substantial portion of our capitalization. Non-compliance with these financial covenants under our senior secured credit facilities—our maximum total leverage ratio and our minimum interest coverage ratio, in particular—could result in the lenders requiring us to immediately repay all amounts borrowed. Any such acceleration could also lead to the noteholders accelerating the maturity of the 2014 Notes. In addition, if we cannot satisfy these financial covenants in the indenture governing the 2014 Notes, we cannot engage in certain activities, such as incurring additional indebtedness or making certain payments. Consequently, Adjusted EBITDA is critical to our assessment of our liquidity. As discussed above, we issued a new tranche of term loan A under our existing senior secured credit facility in the amount of \$350.0

million on February 22, 2012 and expect to use the proceeds and cash on hand to redeem all of our 2014 Notes and to pay accrued and unpaid interest and applicable redemption premiums. See further discussion below in [Liquidity and Capital Resources](#) section and in Item 8. Financial Statements and Supplementary Data - Note 20, [Subsequent Events](#) .

We also use Adjusted EBITDA on a segment basis as the primary measure used by our chief operating decision maker, our Chief Executive Officer, to evaluate the ongoing performance of our business segments and reporting units. On a segment basis, we define Adjusted EBITDA as operating income excluding depreciation and amortization, certain non-cash gains and charges, certain other special gains and charges determined by our senior management to be non-recurring gains and charges and certain items deemed by our senior management to have little or no bearing on the day-to-day operating performance of our business segments and reporting units. The adjustments made to operating income directly correlate with the adjustments to net income in calculating Adjusted EBITDA on a consolidated basis pursuant to the senior secured credit agreement, which reflects management's interpretations thereof.

Limitations

Adjusted EBITDA has limitations as an analytical tool, and should not be viewed in isolation and is not a substitute for U.S. GAAP measures of earnings and cash flows. Material limitations associated with making the adjustments to our earnings and cash flows to calculate Adjusted EBITDA, and using this non-GAAP financial measure as compared to the most directly comparable U.S. GAAP financial measures, include:

- the cash portion of interest expense, net, income tax provision (benefit), and restructuring as well as non-recurring charges related to securities issuance, acquisition activities, and systems/organization establishment, generally represent charges (gains) which may significantly affect funds available to use in our operating, investing and financing activities;
- non-operating foreign exchange gains (losses), although not immediately affecting cash used in investing activities, may affect the amount of funds needed to service our debt if those currency impacts remain in place as we meet our future principal repayment obligations; and
- depreciation, amortization, non-cash (gains) charges and impairment charges, though not directly affecting our current cash position, represent the wear and tear and/or reduction in value of the plant, equipment and intangible assets which permit us to manufacture and/or market our products; these items may be indicative of future needs for capital expenditures, for development or acquisition of intangible assets or relevant trends causing asset value changes.

An investor or potential investor may find any one or all of these items important in evaluating our performance, results of operations, financial position and liquidity. Management compensates for the limitations of using non-GAAP financial measures by using them only to supplement our U.S. GAAP results to provide a more complete understanding of the factors and trends affecting our business. Adjusted EBITDA is not an alternative to net income (loss) or income (loss) from continuing operations before taxes or operating income or cash flows from operating activities as calculated and presented in accordance with U.S. GAAP. You should not rely on Adjusted EBITDA as a substitute for any such U.S. GAAP financial measures. We strongly urge you to review the reconciliations of Adjusted EBITDA to U.S. GAAP financial measures and other financial information, in each case included elsewhere in this Annual Report. We also strongly urge you not to rely on any single financial measure to evaluate our business. Our measure of Adjusted EBITDA may not be comparable to those of other companies.

Results of Operations

Our net sales consist of sales of our products, net of sales discounts, product returns and allowances. In addition, net sales include shipping and handling costs billed to customers. Sales are primarily made on a purchase order basis.

Our cost of products sold consists of variable and fixed components. Our variable costs are proportional to volume and consist principally of raw materials, packaging and related supplies, certain energy costs, and certain distribution costs including inbound, outbound, and internal shipping and transfer costs. Our fixed costs are not significantly impacted by production volume and consist principally of certain fixed manufacturing costs and other distribution network costs, including warehousing. Fixed manufacturing costs comprise headcount-related costs and overhead, including depreciation, periodic maintenance costs, purchasing and receiving costs, inspection costs and certain energy costs.

Our selling, general and administrative expenses include research and development costs, sales and marketing, divisional management expenses and corporate services including cash management, legal, benefit plan administration and other administrative and professional services.

Actual Results of Operations

The following table presents the major components of our operations on an actual basis and Adjusted EBITDA (the reconciliation to net income (loss) is set forth in Reconciliation of Net Income (Loss) Attributable to Rockwood Holdings, Inc. to Adjusted EBITDA for the years ended December 31, 2011, 2010 and 2009), including as a percentage of net sales, for the periods presented. See Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information, for segment information and a reconciliation to income (loss) from continuing operations before taxes to Adjusted EBITDA on a segment basis.

Total Adjusted EBITDA from continuing operations	\$ 862.8	\$ 634.4	\$ 509.9

Year ended December 31, 2011 compared to year ended December 31, 2010

Overview

Net sales increased \$477.7 million, or 15.0%, over the prior year primarily due to increased selling prices of \$303.3 million, the favorable impact of currency changes of \$136.2 million, as well as higher volumes of \$35.1 million. See further discussion by segment below.

Operating income increased \$209.6 million, or 58.6%, over the prior year primarily due to increased selling prices of \$303.3 million, the gross margin impact of higher sales volumes of \$34.3 million, as well as the favorable impact of currency changes of \$25.0 million. This was partially offset by higher raw material prices of \$106.7 million, higher production costs of \$20.6 million, higher energy costs of \$19.1 million and higher restructuring and severance costs of \$9.5 million.

Adjusted EBITDA increased \$228.4 million, or 36.0% over the prior year primarily due to increased selling prices of \$303.3 million, the gross margin impact of higher sales volumes of \$34.3 million, as well as the favorable impact of currency changes of \$34.2 million. This was partially offset by higher raw material prices of \$106.7 million, higher production costs of \$20.6 million and higher energy costs of \$19.1 million.

Net income from continuing operations increased \$102.6 million to \$331.7 million for the year ended December 31, 2011 compared with the same period in the prior year primarily due to the reasons noted above and lower net interest expense of \$55.0 million. This was partially offset by a charge of \$16.6 million recorded in the year ended December 31, 2011 related to the refinancing and repayment of our senior secured term loans in February 2011.

Income from discontinued operations, net of tax, of \$0.9 million for the year ended December 31, 2011 primarily relates to the reversal of certain reserves in connection with the sale of the Electronics business in December 2007. Income from discontinued operations, net of tax, of \$19.4 million for the year ended December 31, 2010, relates to the plastic compounding business that was sold on January 7, 2011.

The gain on sale of discontinued operations, net of tax, of \$119.3 million recorded in the year ended December 31, 2011 is primarily related to the sale of the plastic compounding business in January 2011.

Net income attributable to noncontrolling interest of \$40.6 million was recorded for the year ended December 31, 2011 compared to \$9.1 million for the year ended December 31, 2010. The change from the prior year was primarily related to higher earnings in the Titanium Dioxide Pigments venture.

Net income attributable to Rockwood Holdings, Inc. increased \$171.9 million to \$411.3 million for the year ended December 31, 2011 compared with the same period in the prior year due to the reasons noted above.

Net sales

Specialty Chemicals. Net sales increased \$175.1 million, or 15.1%, over the prior year primarily due to higher volumes of \$66.5 million, increased selling prices of \$64.1 million, as well as the favorable impact of currency changes of \$44.5 million. In the Fine Chemicals business, net sales were up primarily on increased selling prices of \$39.3 million and higher volumes of \$33.4 million, particularly in lithium applications. Net sales in the Surface Treatment business were up on increased volumes of \$33.1 million in most markets, particularly in automotive and general industrial, as well as increased selling prices of \$24.8 million.

Performance Additives. Net sales increased \$57.7 million, or 7.9%, over the prior year primarily due to increased selling prices of \$44.2 million, as well as the favorable impact from currency changes of \$17.1 million. Higher volumes of \$20.1 million in our Clay-based Additives business, particularly in oilfield applications, were offset by lower volumes of \$20.3 million in our Color Pigments and Services business, particularly in construction and coatings applications.

Titanium Dioxide Pigments. Net sales increased \$171.2 million, or 22.6%, over the prior year primarily from higher selling prices of \$194.5 million and the favorable impact of currency changes of \$47.3 million. This was partially offset by lower volumes of \$79.6 million.

Advanced Ceramics. Net sales increased \$69.5 million, or 13.5%, over the prior year primarily from higher volumes of \$44.6 million in most product applications, particularly medical applications, and the favorable impact of currency changes of \$25.6 million.

Gross profit

Gross profit increased \$247.5 million, or 23.8%, over the prior year primarily due to higher selling prices of \$303.3 million, the favorable impact of currency changes of \$47.4 million and the impact of the higher volumes of \$34.3 million. This was partially offset by higher raw material prices of \$106.7 million and higher energy costs of \$19.1 million. Gross profit as a percentage of net sales were 35.1% and 32.6% for the years ended December 31, 2011 and 2010, respectively.

Selling, general and administrative expenses

Selling, general and administrative expenses (SG&A) as a percentage of net sales were 19.2% and 20.9% for the years ended December 31, 2011 and 2010, respectively. SG&A expenses increased \$38.3 million, or 5.7%, over the prior year primarily due to the impact of the higher net sales noted above and the impact of currency changes of \$22.4 million.

Restructuring and other severance costs

We recorded restructuring and other severance costs of \$14.5 million and \$5.0 million for the year ended December 31, 2011 and 2010, respectively. See Item 8. Financial Statements and Supplementary Data - Note 17, Restructuring And Other Severance Costs, for further details.

Asset write-downs and other

Asset write-downs and other were \$1.6 million and \$11.5 million for the years ended December 31, 2011 and 2010, respectively. The asset write-downs and other of \$1.6 million recorded for the year ended December 31, 2011 primarily relate to fixed asset write-downs in our Color Pigments and Services and Advanced Ceramics businesses. The asset write-downs and other of \$11.5 million recorded for the year ended December 31, 2010 primarily relate to the write-down of a receivable of \$4.7 million related to a pension indemnification in conjunction with the acquisition of the Dynamit Nobel businesses in 2004, fixed asset write-downs of \$2.1 million in our Color Pigments and Services business and the write-down of an acquisition related receivable of \$1.6 million in our Specialty Chemicals segment.

Operating income

Specialty Chemicals. Operating income increased \$42.5 million, or 19.6%, over the prior year primarily due to higher selling prices of \$64.1 million, the gross margin impact of higher sales volumes of \$45.1 million, as well as the favorable impact of currency changes of \$7.5 million. This increase was partially offset by higher raw material costs of \$43.1 million, higher production costs of \$9.4 million, higher restructuring and other severance costs of \$9.2 million and higher selling general and administrative costs of \$7.4 million.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Performance Additives. Operating income increased \$21.4 million, or 35.5%, over the prior year due to increased selling prices of \$44.2 million, decreased asset write-downs and other of \$3.3 million and the favorable impact of currency changes of \$2.3 million. This increase was partially offset by higher raw material costs of \$28.2 million, particularly for quaternary amine in our Clay-based Additives business and copper in our Timber Treatment Chemicals business.

Titanium Dioxide Pigments. Operating income increased \$116.7 million to \$176.3 million for the year ended December 31, 2011 compared with the same period in the prior year primarily due to higher selling prices of \$194.5 million and the favorable impact of currency changes of \$9.5 million. This was partially offset by the gross margin impact of lower volumes of \$39.3 million, higher raw material prices of \$33.8 million, particularly for slag and ilmenite, higher energy costs of \$14.5 million, higher systems/organization expenses of \$4.5 million and professional fees incurred in connection with exploring strategic options of \$4.3 million in 2011.

Advanced Ceramics. Operating income increased \$27.2 million, or 26.8%, over the prior year primarily from the gross margin impact of higher volumes of \$27.9 million in most product applications and the favorable impact of currency changes of \$6.3 million. This was partially offset by higher depreciation and amortization costs of \$4.1 million and increased selling, general and administrative expenses of \$3.6 million.

Other income (expenses)

Interest expense, net. Interest expense, net decreased \$55.0 million, or 36.4%, compared to the prior year. The years ended December 31, 2011 and 2010 included non-cash gains of \$0.5 million and \$13.4 million, respectively, representing the movement in the mark-to-market valuation of our interest rate hedging instruments. Excluding the impact of these gains, interest expense, net decreased \$67.9 million, or 41.3%, primarily due to debt repayments of \$27.0 million, lower interest rates of \$17.7 million related to our

senior secured credit facility and the termination of interest rate swaps of \$12.0 million.

Loss on early extinguishment/modification of debt. In connection with the refinancing and repayment of our senior secured term loans in February 2011, we recorded a charge of \$16.6 million in the year ended December 31, 2011 comprised of related fees of \$13.5 million and the write-off of deferred financing costs of \$3.1 million. For the year ended December 31, 2010, we recorded a charge of \$1.6 million related to the write-off of deferred financing costs associated with the voluntary prepayment of \$200.2 million of our senior secured term loans in July 2010.

Foreign exchange, net. For the year ended December 31, 2011 and 2010, foreign exchange gains (losses) of \$1.3 million and \$(1.0) million, respectively, were reported in connection with non-operating Euro-denominated transactions.

Provision for income taxes

We recorded an income tax provision of \$124.4 million on income from continuing operations before taxes of \$456.1 million in the year ended December 31, 2011. The income tax provision in 2011 was favorably impacted by a beneficial foreign earnings mix of \$25.0 million and certain domestic income that was not tax effected of \$4.0 million as a result of our valuation allowance policy. We recorded an income tax benefit of \$24.6 million for the year ended December 31, 2010 on income from continuing operations before taxes of \$204.5 million. The 2010 income tax benefit was favorably impacted by the reversal of valuation allowances of \$76.5 million related to net operating losses that were expected to be utilized as a result of the sale of the plastic compounding business in January 2011. The tax benefit was negatively impacted by additional valuation allowances of \$18.5 million mainly attributable to our domestic business and was positively impacted by an allocation of tax benefits to continuing operations of \$7.7 million, as well as a geographic earnings mix benefit of \$30.3 million.

Income from continuing operations

Income from continuing operations for the year ended December 31, 2011 was \$331.7 million as compared to income from continuing operations of \$229.1 million for the year ended December 31, 2010 for the reasons described above.

Income from discontinued operations, net of tax

Income from discontinued operations, net of tax, of \$0.9 million for the year ended December 31, 2011 primarily relates to the reversal of certain reserves in connection with the sale of the Electronics business in December 2007. Income from discontinued operations, net of tax, of \$19.4 million for the year ended December 31, 2010 relates to the plastic compounding business that was sold on January 7, 2011.

Gain on sale of discontinued operations, net of tax

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The gain on sale of discontinued operations, net of tax, of \$119.3 million recorded in the year ended December, 2011 is primarily related to the sale of the plastic compounding business in January 2011.

Net (income) attributable to noncontrolling interest

Net income attributable to noncontrolling interest of \$40.6 million was recorded for the year ended December 31, 2011 compared to \$9.1 million for the year ended December 31, 2010. The change from the prior year was primarily related to higher earnings in the Titanium Dioxide Pigments venture in 2011.

Net income attributable to Rockwood Holdings, Inc.

Net income attributable to Rockwood Holdings, Inc. for the year ended December 31, 2011 was \$411.3 million as compared to net income attributable to Rockwood Holdings, Inc. of \$239.4 million, respectively, for the reasons described above.

Adjusted EBITDA

Specialty Chemicals. Adjusted EBITDA increased \$53.4 million, or 18.1%, over the prior year primarily due to higher selling prices of \$64.1 million, the gross margin impact of higher volumes of \$45.1 million as well as the favorable impact of currency changes of \$9.5 million. This increase was partially offset by increased higher raw material costs of \$43.1 million, higher production costs of \$9.4 million and higher selling, general and administrative costs of \$7.4 million.

Performance Additives. Adjusted EBITDA increased \$20.2 million, or 16.3% over the prior year due to increased selling prices of

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

\$44.2 million and the favorable impact of currency changes of \$3.6 million. This increase was partially offset by higher raw material costs of \$28.2 million, particularly for quaternary amine in our Clay-based Additives business and copper in our Timber Treatment Chemicals business.

Titanium Dioxide Pigments. Adjusted EBITDA increased \$128.1 million, or 98.9% over the prior year primarily due to higher selling prices of \$194.5 million and the favorable impact of currency changes of \$12.8 million. This was partially offset by the gross margin impact of lower sales volumes of \$39.3 million, higher raw material prices of \$33.8 million and higher energy costs of \$14.5 million.

Advanced Ceramics. Adjusted EBITDA increased \$30.5 million, or 19.9% over the prior year primarily from the gross impact of higher volumes of \$27.9 million in most product applications and the favorable impact of currency changes of \$8.7 million. This was partially offset by increased selling, general and administrative expenses of \$3.6 million.

Corporate and other. Adjusted EBITDA loss increased \$3.8 million, or 5.6% over the prior year due to higher miscellaneous central costs.

Year ended December 31, 2010 compared to year ended December 31, 2009

Overview

Net sales increased \$422.5 million, or 15.3%, over the prior year primarily due to higher volumes of \$467.2 million and increased selling prices of \$17.8 million, partially offset by the negative impact of currency changes of \$82.6 million. See further discussion by segment below.

Operating income increased \$159.4 million, or 80.4%, over the prior year primarily due to the gross margin impact of higher sales volumes of \$265.0 million and increased selling prices of \$17.8 million. This was partially offset by increased variable compensation-related costs of \$81.3 million, higher production costs of \$41.4 million, higher raw material prices of \$15.9 million and the negative impact of currency changes of \$10.3 million.

Adjusted EBITDA increased \$124.5 million, or 24.4% over the prior year primarily due to the gross margin impact of higher sales volumes of \$265.0 million and increased selling prices of \$17.8 million. This was partially offset by increased variable compensation-related costs of \$81.3 million, higher production costs of \$41.4 million, higher raw material prices of \$15.9 million, as well as the negative impact of currency changes of \$18.5 million.

Net income from continuing operations increased \$228.6 million to \$229.1 million for the year ended December 31, 2010 compared with the same period in the prior year primarily due to the reasons noted above, the reversal of valuation allowances of \$76.5 million in 2010 related to net operating losses that were utilized as a result of the sale of the plastic compounding business in January 2011, a loss on early extinguishment of debt of \$26.6 million recorded in 2009 and lower net interest expense of \$27.0 million. This was partially offset by decreased foreign exchange gains on financing activities of \$17.0 million.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Income from discontinued operations, net of tax, increased \$2.6 million, or 15.5%, over the prior year primarily due to higher sales volumes of the plastic compounding business that was sold in January 2011.

Net income attributable to noncontrolling interest of \$9.1 million for the year ended December 31, 2010 was primarily related to the noncontrolling party's interest in the earnings in the Titanium Dioxide Pigments venture. Net loss attributable to noncontrolling interest of \$3.8 million for the year ended December 31, 2009 was primarily due to losses recorded in our Titanium Dioxide Pigments venture.

Net income attributable to Rockwood Holdings, Inc. increased \$218.3 million to \$239.4 million for the year ended December 31, 2010 from \$21.1 million in the same period in the prior year due to the reasons noted above.

Net sales

Specialty Chemicals. Net sales increased \$166.6 million, or 16.7%, over the prior year primarily due to higher sales volumes of \$204.9 million, partially offset by lower selling prices of \$27.6 million and the negative impact of currency changes of \$10.7 million. In the Fine Chemicals business, net sales increased primarily from higher volumes of lithium products of \$76.7 million, as well as higher volumes of metal sulfide applications of \$18.6 million. These increases were partially offset by lower selling prices of potash and lithium carbonate of \$40.0 million. Net sales in the Surface Treatment business were higher on increased volumes of \$99.0 million in all markets, particularly in automotive, general industrial and coil/cold forming applications.

Performance Additives. Net sales increased \$55.2 million, or 8.2%, over the prior year primarily due to higher volumes of \$40.2 million in our Clay-based Additives business, particularly in oilfield and other applications, as well as higher selling prices of \$5.0 million, and higher volumes and selling prices of coatings applications of \$9.3 million and \$7.7 million, respectively, in our Color Pigments and Services business. This was partially offset by the negative impact of currency changes of \$9.1 million and lower construction volumes of \$5.5 million in the United States in our Color Pigments and Services business.

Titanium Dioxide Pigments. Net sales increased \$92.9 million, or 13.9%, over the prior year from higher volumes of \$84.0 million in all applications, as well as higher selling prices of \$37.8 million and a favorable product mix of \$10.1 million. This was partially offset by the negative impact of currency changes of \$40.4 million.

Advanced Ceramics. Net sales increased \$103.4 million, or 25.1%, over the prior year primarily from higher volumes of \$129.0 million in all applications, primarily medical, electronics and multi-functional applications. This was partially offset by the negative impact of currency changes of \$20.9 million and lower selling prices of \$5.6 million.

Gross profit

Gross profit increased \$223.7 million, or 27.3%, over the prior year primarily due to the impact of the higher sales volumes of \$265.0 million and increased selling prices of \$17.8 million, partially offset by higher production costs of \$41.4 million, the negative impact of currency changes of \$24.3 million and higher raw material costs of \$15.9 million. Gross profit as a percentage of net sales were 32.6% and 29.5% for the year ended December 31, 2010 and 2009, respectively.

Selling, general and administrative expenses

Selling, general and administrative expenses (SG&A) as a percentage of net sales were 20.9% and 21.6% for the year ended December 31, 2010 and 2009, respectively. SG&A expenses increased \$70.7 million, or 11.8%, over the prior year primarily due to the impact of the higher net sales noted above and higher variable compensation costs of \$81.3 million, partially offset by the impact of currency changes of \$14.0 million.

Restructuring and other severance costs

We recorded restructuring and other severance costs of \$5.0 million and \$20.3 million for the years ended December 31, 2010 and 2009, respectively, throughout the Company. See Item 8. Financial Statements and Supplementary Data - Note 17, Restructuring And Other Severance Costs, for further details.

Asset write-downs and other

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Asset write-downs and other were \$11.5 million for the year ended December 31, 2010 and were primarily related to the write-down of a receivable of \$4.7 million related to a pension indemnification in conjunction with the acquisition of the Dynamit Nobel businesses in 2004, fixed asset write-downs of \$2.1 million in our Color Pigments and Services business and the write-down of an acquisition-related receivable of \$1.6 million in our Specialty Chemicals segment. Asset write-downs and other were \$2.6 million for the year ended December 31, 2009 and were primarily related to the write-down of a receivable related to the pension indemnification in conjunction with the acquisition of the Dynamit Nobel businesses.

Operating income

Specialty Chemicals. Operating income increased \$54.7 million, or 33.8%, over the prior year primarily due to the gross margin impact of higher net sales volumes of \$119.5 million, lower raw material costs of \$12.7 million in our Surface Treatment business, particularly for phosphoric acid, and lower restructuring and other severance costs of \$3.8 million. This increase was partially offset by lower selling prices of potash and lithium carbonate of \$40.0 million and higher selling, general and administrative costs of \$38.1 million, primarily variable compensation costs.

Performance Additives. Operating income increased \$40.9 million to \$60.2 million for the year ended December 31, 2010 compared with the same period in the prior year primarily due to the gross margin impact of higher net sales volumes of \$25.6 million, higher selling prices of \$13.1 million, lower depreciation and amortization costs of \$5.9 million and lower restructuring and other severance costs of \$4.6 million. This increase was partially offset by higher raw material costs of \$10.0 million, particularly for copper in our Timber Treatment Chemicals business.

Titanium Dioxide Pigments. Operating income increased \$43.2 million to \$59.6 million for the year ended December 31, 2010 compared with the same period in the prior year primarily due to the gross margin impact of higher net sales volumes of \$41.8 million,

higher selling prices of \$37.8 million, lower depreciation and amortization costs of \$8.1 million and lower systems/organization establishment expenses of \$2.6 million. This was partially offset by higher production costs of \$35.6 million and higher selling, general and administrative expenses of \$16.2 million, primarily variable compensation costs.

Advanced Ceramics. Operating income increased \$53.4 million to \$101.4 million for the year ended December 31, 2010 compared with the same period in the prior year primarily due to the gross margin impact of higher sales volumes of \$78.2 million, decreased restructuring and other severance costs of \$5.9 million and lower depreciation and amortization costs of \$2.4 million. This increase was partially offset by higher selling, general and administrative costs of \$16.7 million, higher production costs of \$7.7 million and the negative impact of currency changes of \$4.7 million.

Corporate and other. Operating loss increased \$32.8 million, or 69.5% over the prior year primarily due to higher miscellaneous central costs.

Other income (expenses)

Interest expense, net. Interest expense, net decreased \$27.0 million, or 15.2%, over the prior year. The year ended December 31, 2010 and 2009 included non-cash gains of \$13.4 million and \$3.9 million, respectively, representing the movement in the mark-to-market valuation of our interest rate hedging instruments. Excluding the impact of these gains, interest expense, net decreased \$17.5 million, or 9.6% primarily due to the termination of interest rate swaps of \$18.9 million, debt repayments of \$12.4 million and the impact of currency changes of \$3.5 million. This was partially offset by higher interest rates of \$19.8 million primarily related to the amendment of our senior secured credit facility in June 2009.

Loss on early extinguishment/modification of debt. For the year ended December 31, 2010, we recorded a charge of \$1.6 million related to the write-off of deferred financing costs associated with the voluntary prepayment of \$200.2 million of our senior secured term loans in July 2010. For the year ended December 31, 2009, we recorded a charge of \$26.6 million primarily related to the write-off of deferred financing costs of \$20.9 million and lender fees related to the early extinguishment of debt of \$12.0 million, partially offset by a discount of \$6.3 million related to the repurchase of \$153.2 million in aggregate principal amount of the 2014 Notes.

Foreign exchange, net. For the year ended December 31, 2010, foreign exchange losses of \$1.0 million were reported primarily related to Euro-denominated debt and intercompany loans. For the year ended December 31, 2009, foreign exchange gains of \$16.0 million were reported primarily due to the impact of the stronger pound sterling, as well as a stronger Euro, as of December 31, 2009 versus December 31, 2008, in connection with non-operating Euro and Pound Sterling denominated transactions.

Provision for income taxes

We recorded an income tax benefit of \$24.6 million for the year ended December 31, 2010 on income from continuing operations of \$204.5 million. The 2010 income tax benefit was favorably impacted by the reversal of valuation allowances of \$76.5 million related to net operating losses that were expected to be utilized as a result of the sale of the plastic compounding business in January 2011. The tax benefit was negatively impacted by additional valuation allowances of \$18.5 million mainly attributable to our domestic business and was positively impacted by an allocation of tax benefits to continuing operations of \$7.7 million, as well as, a geographic earnings mix benefit of \$30.3 million.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

We recorded an income tax provision of \$9.7 million for the year ended December 31, 2009 on income from continuing operations of \$10.2 million. The 2009 income tax provision was negatively impacted by a valuation allowance of \$39.1 million mainly attributable to our domestic business and was positively impacted by a non-recurring tax benefit related to foreign currency changes of \$14.8 million, an allocation of tax benefits to continuing operations of \$7.9 million and a geographic earnings mix benefit of \$11.6 million.

Income from continuing operations

Income from continuing operations for the year ended December 31, 2010 was \$229.1 million as compared to income from continuing operations of \$0.5 million for the year ended December 31, 2009 for the reasons described above.

Income from discontinued operations, net of tax

Income from discontinued operations, net of tax, increased \$2.6 million, or 15.5%, over the prior year primarily due to higher sales volumes of the plastic compounding business that was sold in January 2011.

Net income (loss) attributable to noncontrolling interest

Net income attributable to noncontrolling interest of \$9.1 million for the year ended December 31, 2010 was primarily related to higher earnings in the Titanium Dioxide Pigments venture. Net loss attributable to noncontrolling interest of \$3.8 million for the year ended December 31, 2009 was due to losses recorded in our Titanium Dioxide Pigments and Viance ventures.

Net income attributable to Rockwood Holdings, Inc.

Net income attributable to Rockwood Holdings, Inc. for the year ended December 31, 2010 was \$239.4 million as compared to net income attributable to Rockwood Holdings, Inc. of \$21.1 million for the year ended December 31, 2009 for the reasons described above.

Adjusted EBITDA

Specialty Chemicals. Adjusted EBITDA increased \$50.0 million, or 20.4%, over the prior year primarily due to the gross margin impact of higher net sales volumes of \$119.5 million and lower raw material costs of \$12.7 million in our Surface Treatment business, particularly for phosphoric acid. This increase was partially offset by lower selling prices of potash and lithium carbonate of \$40.0 million, higher selling, general and administrative costs of \$38.1 million, primarily variable compensation costs, as well as the negative impact of currency changes of \$3.0 million.

Performance Additives. Adjusted EBITDA increased \$28.7 million, or 30.2% over the prior year primarily due to the gross margin impact of higher net sales volumes of \$25.6 million and higher selling prices of \$13.1 million. This increase was partially offset by higher raw material costs of \$10.0 million, particularly for copper in our Timber Treatment Chemicals business, and the negative impact of currency changes of \$2.0 million.

Titanium Dioxide Pigments. Adjusted EBITDA increased \$32.2 million, or 33.1% over the prior year primarily due to the gross margin impact of higher net sales volumes of \$41.8 million and higher selling prices of \$37.8 million. This was partially offset by higher production costs of \$35.6 million and higher selling, general and administrative expenses, primarily variable compensation costs of \$16.2 million.

Advanced Ceramics. Adjusted EBITDA increased \$45.5 million, or 42.2% over the prior year primarily due to the gross margin impact of higher net sales volumes of \$78.2 million. This increase was partially offset by higher selling, general and administrative costs of \$16.7 million, higher production costs of \$7.7 million and the negative impact of currency changes of \$6.6 million.

Corporate and other. Adjusted EBITDA loss increased \$31.9 million, or 88.9% over the prior year primarily due to higher variable compensation costs.

Reconciliation of Net Income Attributable to Rockwood Holdings, Inc. to Adjusted EBITDA

Because we view Adjusted EBITDA on a consolidated basis as an operating performance measure, we use net income as the most comparable U.S. GAAP measure on a consolidated basis. The following table, which sets forth the applicable components of Adjusted EBITDA, presents a reconciliation of net income attributable to Rockwood Holdings, Inc. to Adjusted EBITDA on a consolidated basis:

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Net income attributable to Rockwood Holdings, Inc.	\$ 411.3	\$ 239.4	\$ 21.1
Net income (loss) attributable to noncontrolling interest	40.6	9.1	(3.8)
Net income	451.9	248.5	17.3
Income tax provision (benefit)	124.4	(24.6)	9.7
Income from discontinued operations, net of tax	(0.9)	(19.4)	(16.8)
Gain on sale of discontinued operations, net of tax	(119.3)		
Income from continuing operations before taxes	456.1	204.5	10.2
Interest expense, net (a)	96.1	151.1	178.1
Depreciation and amortization	267.2	255.9	274.2
Restructuring and other severance costs	14.5	5.0	20.3
Systems/organization establishment expenses	6.5	2.1	6.3
Acquisition and disposal costs	0.4	1.3	3.0
Loss on early extinguishment/modification of debt	16.6	1.6	26.6
Asset write-downs and other	1.6	11.5	2.6
Foreign exchange (gain) loss on financing activities, net	(1.3)	1.0	(16.0)
Other	5.1	0.4	4.6
Total Adjusted EBITDA from continuing operations	\$ 862.8	\$ 634.4	\$ 509.9

(a) Includes gains of \$0.5 million, \$13.4 million and \$3.9 million for the years ended December 31, 2011, 2010 and 2009, respectively, representing the movement in the mark-to-market valuation of the Company's interest rate and cross-currency swaps.

Liquidity and Capital Resources**Cash Flows**

Operating Activities. Net cash provided by operating activities was \$449.0 million, \$482.4 million and \$369.6 million in 2011, 2010 and 2009, respectively. Net cash from operating activities decreased in 2011 primarily due to working capital changes, partially offset by higher net income. Net cash from operating activities increased in 2010 primarily due to higher net income, partially offset by a lower source of operating cash from working capital changes.

Investing Activities. Net cash provided by (used in) investing activities was \$21.2 million, \$(181.3) million and \$(204.3) million in 2011, 2010 and 2009, respectively. Net cash in 2011 was primarily related to net proceeds received of \$300.6 million in 2011 related to the sale of our plastic compounding business, partially offset by capital expenditures, net of government grants received, of \$279.7 million. Net cash used in investing activities in 2010 and 2009 primarily related to capital expenditures. Net cash used in investing activities in 2009 included \$32.9 million related to the settlement of a cross-currency swap in November 2009, as well as a \$16.0 million contractual advance to the Titanium

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Dioxide Pigments noncontrolling shareholder in connection with the purchase of steam and electricity.

Financing Activities. Net cash used in financing activities was \$482.6 million, \$259.5 million and \$320.9 million in 2011, 2010 and 2009, respectively, and included scheduled payments for long-term debt. In 2011, we voluntarily prepaid \$408.9 million of our senior secured term loans, paid related fees of \$13.4 million in connection with the refinancing of our senior secured credit facility in February 2011 and made distributions to noncontrolling shareholders of \$19.4 million. In 2010, net cash used in financing activities included the voluntary prepayment of \$200.2 million of our senior secured term loans and a cash inflow of \$26.3 million related to the exercise of employee stock options. In 2009, we used \$146.8 million of cash to prepay, at a discount, \$153.2 million in aggregate principal amount of our Euro-denominated 2014 Notes, \$102.3 million to prepay our senior secured term loans and \$26.9 million related to the amendment of the senior secured credit facility in June 2009.

Liquidity

Our primary source of liquidity has been and will continue to be cash generated from the operations of our subsidiaries. Our primary liquidity requirements are working capital, debt service, capital expenditures and acquisitions. In addition, we completed the sale of our plastic compounding business in January 2011 for net proceeds of \$300.6 million (see Item 8. Financial Statements and Supplementary Data - Note 2, Discontinued Operations, for further details) and repaid \$408.9 million of senior secured term loans in connection with the refinancing of our senior secured term loans in February 2011. Our debt service requirements in future years are significant. In 2012 and future periods, we believe that based on current conditions in our industry and markets, our cash reserves, cash flows from operations and borrowings available under our revolving credit facility will be adequate sources of liquidity. However, an economic downturn or recession may have a material adverse impact on our results of operations, cash flows from operations and our liquidity. See Item 1, Business, and Item 1A, Risk Factors.

In addition, our liquidity may be negatively impacted due to funding obligations related to certain pension plans. We have several pension plans located in Germany, Finland, the United Kingdom and the United States. We have entered into long-term funding arrangements related to the Dynamit Nobel Pensionskasse multiemployer pension plan located in Germany and our defined benefit pension plans located in the U.K (see Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans, for further details). Our funding obligations could change significantly based on the investment performance of the pension plan assets and changes in actuarial assumptions for local statutory funding valuations.

The Company's overall unfunded position in its defined benefit plans as of December 31, 2011 is \$464.8 million and the funded status of our plans is 35%. However, 76% of the Company's unfunded position is concentrated in plans mostly in Germany, where funding is neither legally required nor customary. When only the plans that have funding requirements are considered, the unfunded portion is \$113.4 million and the funded status is 67%. The funding of the Company's pension plans was in compliance with local requirements as of December 31, 2011. Almost all of the Company's pension obligations are long-term in nature. The Company's annual cash outflows to meet funding requirements and benefit obligations historically have not significantly exceeded our pension expense. Such cash outflows were less than pension expense in 2011 and 2010.

As of December 31, 2011, we had actual total indebtedness of \$1,687.7 million. The availability under the revolving credit facility is \$180.0 million as of December 31, 2011, subject to outstanding letters of credit of \$31.4 million that reduced our availability under such revolving credit facility. The \$30.0 million (\$38.9 million) revolving credit facility under the Titanium Dioxide Pigments venture facility provided for additional borrowings of up to \$12.9 million (\$16.7 million) as of December 31, 2011 after an outstanding bank guarantee of \$17.1 million (\$22.2 million) related to a defined benefit pension obligation for the Finnish Plan. In January 2012, this bank guarantee was increased to \$25.5 million (\$33.1 million).

As of December 31, 2011, we had cash and cash equivalents of \$321.5 million. Among other things, we may use available cash to invest in our business, reduce our term debt, repurchase our 2014 Notes at any time, subject to certain limitations contained in our senior secured credit facility, or fund bolt-on acquisitions. As noted above, we issued a new tranche of term loan A under our existing senior secured credit facility in the amount of \$350.0 million and expect to use the proceeds along with cash on hand to redeem all of our outstanding 2014 Notes and to pay accrued and unpaid interest and applicable redemption premiums.

As of December 31, 2011, the amounts of cash and cash equivalents held by our foreign subsidiaries were \$257.7 million out of the total consolidated cash and cash equivalents of \$321.5 million. We believe that the amount of funds held by our foreign subsidiaries as of such date not readily convertible into Euros or U.S. dollars was \$2.9 million. Based on our domestic cash flows from operations and our other sources of liquidity, including the availability under our revolving credit facility of \$180.0 million as of December 31, 2011, subject to outstanding letters of credit of \$31.4 million, we believe we have sufficient access to funds for our expected future domestic liquidity needs. Our intent is to

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

permanently invest foreign funds outside the U.S. and our current plans do not demonstrate a need to repatriate them to fund our operations in the U.S. Further, if the cash and cash equivalents held by our foreign subsidiaries were needed for our operations in the U.S., we do not believe we would be required to accrue and pay taxes in the U.S. to repatriate these funds as sufficient funds could be repatriated by recalling certain intercompany loans we have with our foreign subsidiaries.

Our long-term debt at December 31, 2011 and 2010 is primarily comprised of our senior secured credit facility, which we refinanced in February 2011 and 2012, our 2014 Notes and our Titanium Dioxide Pigments venture term loans. See Item 8. Financial Statements and Supplementary Data - Note 10, Long-Term Debt, for a detailed discussion of these borrowings.

Senior secured credit facilities. On February 10, 2011, we completed a refinancing in support of our long-term debt reduction strategy and entered into a new senior secured credit agreement comprised of an \$850.0 million term loan, maturing on February 10, 2018, and a \$180.0 million revolving credit facility, maturing on February 10, 2016, and repaid \$408.9 million of existing term loans. At December 31, 2011, the senior secured term loan amounted to \$845.8 million. In addition, on February 22, 2012, we issued a new tranche of term loan A under our existing senior secured credit facility in the amount of \$350.0 million maturing in February 2017 and expect to use the proceeds along with cash

on hand to redeem all of our outstanding 2014 Notes and pay accrued and unpaid interest and applicable redemption premiums. After giving effect to the new term loan A, the term loan under the senior secured credit facility may be increased by up to an additional \$350.0 million in the aggregate, subject to certain exemptions and provided that Group procures lender commitments for such increase. See Item 8. Financial Statements and Supplementary Data - Note 20, Subsequent Events for further details.

The senior secured credit agreement also contains the following financial covenants that are determined based on our Adjusted EBITDA (including certain adjustments for, among other items, acquisitions and related synergies), which reflects management's interpretations thereof:

- a leverage ratio: for the twelve-month period ended December 31, 2011, net senior secured debt (senior secured debt plus capital lease obligations, minus cash up to a maximum of \$200.0 million) to Adjusted EBITDA must be less than 2.75 to 1; for such period, our ratio equaled 1.12 to 1; and
- an interest coverage ratio: for the twelve-month period ended December 31, 2011, Adjusted EBITDA to cash interest expense (interest expense, net excluding deferred debt issuance cost amortization and the movements in the mark-to market value of our interest rate derivatives) must be at least 2.50 to 1; for such period, our ratio equaled 9.51 to 1.

These covenants are material terms of the senior secured credit agreement. Non-compliance with these covenants or other covenants could result in a default under the senior secured credit agreement and the lenders could elect to declare all amounts borrowed immediately due and payable. Any such acceleration would also result in a default under the indenture governing the 2014 Notes, which could lead to the note holders electing to declare the principal, premium, if any, and accrued and unpaid interest on the then outstanding notes immediately due and payable. The senior secured credit agreement contains a cross default provision for indebtedness in excess of \$30.0 million; therefore, a default under the indenture governing the 2014 Notes, the Titanium Dioxide Pigments term loans or other applicable indebtedness may cause the lenders to declare the principal and accrued and unpaid interest on the then outstanding senior secured credit facilities immediately due and payable.

In addition to the financial covenants described above, the Company's senior secured credit facilities contain various affirmative and restrictive covenants. The restrictive covenants limit our ability to, among other things, incur indebtedness and other liabilities; create liens; merge or consolidate; dispose of assets; make investments; pay dividends and make payments to shareholders; make payments on certain indebtedness or to amend documents related to certain indebtedness and to enter into sale-leaseback transactions.

See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations - Definitions of Adjusted EBITDA, for a discussion of the definition of Adjusted EBITDA used in calculating our financial covenants.

We were in compliance with the above covenants as of December 31, 2011.

2014 Notes. As noted above, we issued a new tranche of term loan A in February 2012 under our existing senior secured credit facility in the amount of \$350.0 million and expects to use the proceeds along with cash on hand to redeem all of our outstanding 2014 notes and to pay accrued and unpaid interest and applicable redemption premiums. These notes consist of 250.1 million (\$324.2 million) in aggregate principal amount of 7.625% euro-denominated notes and \$200 million in aggregate principal amount of 7.5% dollar-denominated notes. See Item 8. Financial Statements and Supplementary Data - Note 20, Subsequent Events, for further details.

The 2014 Notes contain various affirmative and restrictive covenants. The restrictive covenants limit our ability, and the ability of our restricted subsidiaries, to, among other things, incur or guarantee additional indebtedness (as described below), pay dividends or make other equity distributions or repurchase capital stock, make investments or other restricted payments, create liens, transfer or sell assets, restrict dividends or other payments to us, engage in transactions with affiliates, and merge or consolidate with other companies or sell substantially all of our assets.

The indenture governing the 2014 Notes prohibits us from incurring additional debt, subject to certain permitted incurrences, unless the fixed charge coverage ratio, which is the ratio of Adjusted EBITDA (as defined therein excluding certain adjustments permitted under the senior secured credit agreement) to fixed charges (as defined therein), for the most recently ended four fiscal quarters is at least 2.00 to 1. In addition, the indenture prohibits us from making restricted payments (such as dividends or other equity distributions, repurchases of capital stock or restricted investments), subject to certain permitted payments, unless, among other things, the fixed charge coverage ratio for the most recently ended four fiscal quarters is at least 2.00 to 1. For the four-fiscal quarter period ended December 31, 2011, the fixed charge coverage ratio equaled 9.51 to 1. This covenant is a material term of the indenture governing the 2014 Notes.

Because the indenture governing the 2014 Notes defines an event of default to include, among other things, a default under any other debt obligation in excess of \$35.0 million that could cause the acceleration of such obligation, any acceleration under the senior secured credit agreement or other debt agreement would also result in a default under the indenture governing these notes, which could lead to the note holders electing to declare the principal, premium, if any, and accrued and unpaid interest on the then

outstanding notes immediately due and payable.

Titanium Dioxide Pigments venture term loans, revolving credit facility and other debt. The loans are secured by the assets of the venture. In the event that either Kemira's or Rockwood's ownership interest changes, any lender may cancel its commitment and demand repayment of its respective portion of the loans, including accrued and unpaid interest. The facility agreement contains customary events of default, subject to remedy periods, thresholds and exceptions. Upon the occurrence of an event of default under the facility agreement, the lenders can terminate the commitments and declare all amounts, including accrued and unpaid interest, to be due and payable. Both the term loan and revolving credit facility mature in June 2013. We may refinance all or a portion of the term loans of our Titanium Dioxide Pigments business or increase the borrowings under such term loans and make a distribution to the venture partners and/or use a portion for expansion projects or other corporate purposes.

The facility agreement contains affirmative and restrictive covenants, subject to certain thresholds and exceptions. The restrictive covenants limit the venture's ability to undertake certain actions, including but not limited to acquiring or disposing of assets, creating liens on assets, entering into a merger or corporate restructuring, and incurring additional indebtedness. These covenants are calculated in accordance with International Financial Reporting Standards and are based solely on the results of the venture's European operations. In addition, the facility agreement requires the venture to meet certain financial covenants, including:

- A leverage coverage ratio: for the twelve-month period ended December 31, 2011, net debt to EBITDA, subject to certain adjustments (which is substantially similar to the definition of Adjusted EBITDA in our senior secured credit agreement), must be less than 3.00 to 1; for such period, our ratio equaled 0.99 to 1;
- An interest coverage ratio: for the twelve-month period ended December 31, 2011, EBITDA, subject to certain adjustments, to cash interest expense (net of interest income), must be greater than 4.00 to 1; for such period, our ratio equaled 24.99 to 1; and
- Cash flow coverage ratio: for the twelve-month period ended December 31, 2011, cash generated for financing activities (EBITDA, subject to certain adjustments, less working capital changes, capital expenditures and interest) to debt service (interest expense and amortization of debt) must be greater than 1.10; for such period, our ratio equaled 3.28 to 1.

We were in compliance with the above covenants as of December 31, 2011.

Given our use of Adjusted EBITDA (see Note Regarding Non-GAAP Financial Measures for the definition of Adjusted EBITDA and management's uses of Adjusted EBITDA) as a liquidity measure, the following table presents a reconciliation of net cash provided by operating activities from continuing operations to Adjusted EBITDA:

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Net cash provided by operating activities from continuing operations	\$ 450.8	\$ 478.0	\$ 363.6

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Changes in assets and liabilities, net of the effect of foreign currency translation and acquisitions	191.4	(48.5)	(90.6)
Current portion of income tax provision	98.1	36.3	29.8
Interest expense, net, excluding amortization of deferred financing costs and unrealized losses/gains on derivatives	91.8	158.6	174.1
Restructuring and other severance costs	14.5	5.0	20.3
Systems/organization establishment expenses	6.5	2.1	6.3
Acquisition and disposal costs	0.4	1.3	3.0
Bad debt provision	0.2	1.2	(1.2)
Other	9.1	0.4	4.6
Total Adjusted EBITDA from continuing operations	\$ 862.8	\$ 634.4	\$ 509.9

Contractual Obligations

The following table details Rockwood's fixed contractual cash obligations as of December 31, 2011:

(\$ in millions)	Total	Less than 1 year	2-3 Years	4-5 Years	After 5 years
Debt, including current portion (a)	\$ 1,962.7	\$ 313.5	\$ 387.6	\$ 180.5	\$ 1,081.1
Operating leases	62.3	18.3	22.7	12.0	9.3
Purchase obligations (b)	1,065.5	472.4	498.0	64.0	31.1
Total (c) (d)	\$ 3,090.5	\$ 804.2	\$ 908.3	\$ 256.5	\$ 1,121.5

(a) After giving effect to the issuance of the new tranche of term loan A under our existing senior secured credit facility in the amount of \$350.0 million on February 22, 2012 and the expected use of proceeds and cash on hand to redeem all of our outstanding 2014 Notes and the payment of accrued and unpaid interest and applicable redemption premiums, amounts represent the expected principal payments of our long-term debt, including capital leases, and do not include any fair value adjustments or bond premiums or discounts. These amounts also include estimated scheduled cash interest payments for all years totaling \$275.1 million. A portion of the debt balance outstanding as of December 31, 2011 contained a variable interest rate component. Therefore, interest was calculated on this portion based upon the average of the rates in effect as of December 31, 2011. See Item 8. Financial Statements and Supplementary Data - Note 10, Long-Term Debt.

(b) Purchase obligations consist of agreements to purchase goods or services that are enforceable and legally binding and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.

(c) Statutory minimum funding requirements for 2011 for defined benefit pension plans are not included as such amounts have not been determined. For 2012, the Company expects to make contributions of approximately \$7.5 million to pension trusts and \$18.1 million directly to plan participants as benefit payments. Future contributions, including additional payments that may be required as a result of investment performance of pension assets, are not included, as they are not fixed either as to timing or amount. See Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans, for further details.

(d) Obligations relating to eventual settlement of derivative contracts are not included as the timing and amounts are not fixed. These contracts are marked-to-market with the related liabilities or assets depending on the mark-to-market position. At December 31, 2011, the mark-to-market position of obligations relating to derivative contracts was a liability and were recorded in Accrued expenses and other current liabilities and Other Liabilities in the Consolidated Balance Sheet.

Liabilities for unrecognized tax benefits in the amount of \$30.1 million as of December 31, 2011 are excluded from the Contractual Obligations table as we are unable to make a reasonably reliable estimate of the period of cash settlement with the respective taxing authorities. Liabilities for these unrecognized tax benefits are classified as non-current income tax liabilities (other liabilities) unless expected to be paid within one year.

Capital Expenditures

Rockwood's capital expenditures for 2011 consisted primarily of replacements of worn, obsolete or damaged equipment as well as investments in new equipment. For the year ended December 31, 2011, capital expenditures, net of government grants received, were \$279.7 million. Capital expenditures for 2012 are expected to be above 2011 levels. For the years ended December 31, 2010 and 2009, our capital expenditures amounted to \$180.3 million and \$151.5 million, respectively. Capital expenditures were higher in 2011 primarily due to the expansion of production in our Specialty Chemicals segment in connection with the production of lithium compounds. Future capital expenditures are expected to be higher than prior periods due to ongoing expansion of our lithium capacity, particularly in the United States and Chile, as well as increased capital expenditures in our Color Pigments and Services business in the United States.

We may incur future costs for capital improvements and general compliance under Safety, Health and Environmental (SHE) laws. For the year ended December 31, 2011, our capital expenditures for SHE matters totaled \$23.3 million, excluding costs to maintain and repair pollution control equipment. For 2012, we estimate capital expenditures for compliance with SHE laws to be at similar levels; however, because capital expenditures for these matters are subject to changes in and new SHE laws, we cannot provide assurance that our recent expenditures will be indicative of future amounts required to comply with any such law. See Item 8.

Financial Statements and Supplementary Data - Note 19, Commitments and Contingencies, Regulatory Developments for further discussion.

Foreign currency related transactions

As of December 31, 2011, 488.2 million (\$632.8 million) of the debt outstanding is denominated in Euros. See Item 7A, Quantitative and Qualitative Disclosures about Market Risk.

Off-Balance Sheet Arrangements

In the normal course of business, the Company incurs obligations which include guarantees related to contract completion, regulatory compliance and product performance. Under certain circumstances, these obligations are supported through the issuance of letters of credit and other bank guarantees. As of December 31, 2011, the Company had approximately \$38.8 million of letters of credit and other bank guarantees, of which \$38.1 million will expire in 2012 through 2016. The remaining guarantees have no specified expiration date. This amount includes outstanding letters of credit of \$31.4 million that reduced our availability under our senior secured credit facility. In the opinion of management, such obligations will not significantly affect the Company's financial position, results of operations or cash flows, as the Company anticipates fulfilling its performance obligations.

Commitments and Contingencies

See Item 8. Financial Statements and Supplementary Data - Note 19, Commitments and Contingencies, for a discussion of the Company's Commitments and Contingencies.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities. We evaluate our estimates on an ongoing basis, based on historical experience and various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

See Item 8. Financial Statements and Supplementary Data - Note 1, Basis of Presentation and Significant Accounting Policies, for a summary of our significant accounting policies. Our critical accounting policies are those that are both important to our financial condition and results of operation and require the most difficult, subjective or complex judgments on the part of management in their application, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. These critical accounting policies are as follows:

Revenue Recognition. We recognize revenue when the earnings process is complete. Product sales are recognized when products are shipped to the customer in accordance with the terms of the contract of sale, title and risk of loss have been transferred and collectibility is reasonably assured. We believe that we have adequate credit granting procedures in place and that they are operating effectively so that collectibility is reasonably assured. We have a low incidence of uncollectible accounts. Additionally, credit insurance is purchased at times by certain of our businesses, particularly in Europe, to protect against collection risk. Accruals are made for sales returns based on our experience and for other allowances based on the terms of allowance programs put in place. Although we believe that sufficient experience and history exists to make reasonable estimates as to such accruals and allowances, actual results can differ depending on market conditions.

Impairment

Goodwill

The recoverability of goodwill is reviewed on an annual basis during the fourth quarter. Additionally, the recoverability of goodwill is reviewed when events or changes in circumstances occur indicating that the carrying value of the assets may not be recoverable. We have determined that our reporting units for our goodwill impairment review are our operating segments or components of an operating segment that constitute a business for which discrete financial information is available and for which segment management regularly reviews the operating results. Based on this analysis, we have identified three reporting units within our reportable segments that qualify for such review. See **Impairment Accounting** section of Note 1, **Basis of Presentation and Significant Accounting Policies**, for the process used to test goodwill for impairment.

Goodwill impairment analyses are based on inherent assumptions and estimates about future cash flows and appropriate benchmark peer companies or groups. Subsequent changes in these assumptions could result in future impairment. Although we consistently use the same methods in developing the assumptions and estimates underlying the fair value calculations, such estimates are uncertain by nature and can vary from actual results. For example, if the Company had applied a 10% reduction in the peer multiples of its reporting units in 2011, 2010 and 2009, no potential goodwill impairment would exist at any of our reporting units.

Long-Lived Tangible and Other Intangible Assets

The recoverability of long-lived tangible and other intangible assets is reviewed when events or changes in circumstances occur indicating that the carrying value of the assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets or asset group to the future undiscounted net cash flows expected to be generated by the asset or asset group. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

In the fourth quarter of 2010 and in 2011, we performed a recoverability test of certain intangible assets in our Viance timber treatment chemicals venture and concluded that there was no impairment of those assets. We will continue to monitor the recoverability of these assets if events or circumstances indicate that the carrying value of such assets may not be recoverable.

Business Combinations. We account for business combinations using the purchase method of accounting. Under the purchase method of accounting, we are required to allocate the purchase price to the estimated fair value of assets acquired and liabilities assumed. Examples of material estimates from our previous acquisitions are:

- The fair values of work-in-process and finished goods inventories are estimated based on selling price less selling profit. The calculation of selling profit requires a judgment on the relative margins derived from manufacturing vs. marketing efforts.
- The fair value of property, plant and equipment can be estimated by a variety of methods taking into account market values, replacement cost, and remaining useful life. Although market value and replacement cost is sometimes readily obtainable, often this requires judgment, as does determining the estimated remaining useful life. When we believe that property, plant and equipment acquired will be material to our overall balance sheet, or that fair value might represent a significant difference from the historical cost (net of accumulated depreciation) of such assets, we have engaged an independent appraiser to assist us on such estimates, as we have done in our recent acquisitions. However, it is not uncommon for appraisers to differ on the valuation of items (such as manufacturing equipment) where a ready secondary market does not exist.
- The fair value of identifiable intangible assets such as patents and other intellectual property, customer lists, and trademarks, can be estimated by discounted cash flow and return on royalties. The process utilized to identify intangible assets is consistent with the requirements of the accounting guidance on business combinations. When considered material, we have engaged an independent appraiser to assist us in the identification of intangible assets acquired, valuation of such assets and determination of the estimated useful life. An independent appraiser, with management's oversight and input, is required to make judgments and estimates that could cause such appraisals to differ from those of other appraisal experts.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

- In order to determine the fair value of intangible assets and other long term assets, a discount rate and royalty rate are determined in conjunction with our independent appraiser. The royalty rate is based on professional judgment taking into consideration the type of product, market and perceived strength. The discount rate and royalty rate have a material impact on the determination of the fair value.
- Purchase accounting often involves the same critical estimates that are required in our ordinary course of business including estimates of deferred tax assets or liabilities, pension liabilities, restructuring liabilities and legal and environmental reserves.

Goodwill is an intangible asset that represents the excess of the purchase price over the fair value of identifiable assets acquired and liabilities assumed. While goodwill itself does not represent an estimate, we must assign goodwill to one or more reporting units. Allocation of goodwill to reporting units requires judgments about the relative fair values of reporting units including the fair value of their identifiable assets and estimates as to the present value of future cash flows expected from the reporting units as adjusted by weighted average and/or risk-adjusted costs of capital. Goodwill is assessed for impairment at least annually.

Some of our business combinations have complex terms that may result in conflicting claims between buyers and sellers concerning the purchase price itself. Management is required to assess the probability and amount (or range of amounts) of such claims, and, where possible, determine the most likely amount due.

Contingencies

Legal Matters

We are involved in various legal proceedings, including commercial, product liability, intellectual property and environmental matters, of a nature that can be expected in our business. It is our policy to accrue for amounts related to these matters if it is probable that a liability has been incurred and an amount can be reasonably estimated. The probability that a contingent liability has been incurred is regularly assessed by our legal staff, based on periodic reviews of available facts and circumstances for our legal matters, with senior operating and finance management both at the business accountable for the potential liability and at our corporate offices. This is supplemented where applicable by consultation with outside counsel. We do not believe it is informative to quantify past experience at assessing probability or estimating exposure since material matters of this nature at Rockwood often represent unique situations with little applicability to the assessment of probability or estimation of potential liability regarding other legal matters. It is our policy to disclose such matters when there is at least a reasonable possibility that a material loss has been or will be incurred.

Environmental Matters

We accrue costs of a non-capital nature related to environmental clean-up when those costs are believed to be probable and can be reasonably estimated. Expenditures that extend the life of the related property or mitigate or prevent future environmental contamination are capitalized, and expenditures related to existing conditions resulting from past or present operations and from which no current or future benefit is discernible are immediately expensed. The quantification of environmental exposures requires an assessment of many factors, including changing laws and regulations, advancements in environmental technologies, the quality of information available related to specific sites, the assessment stage of each site investigation and the length of time involved in remediation or settlement. As such, it can be extremely difficult to accurately estimate such costs. We do not include anticipated recoveries from insurance carriers or other third parties in our accruals for environmental liabilities.

We have estimated and established financial reserves relating to anticipated environmental cleanup obligations, site reclamation and remediation and closure costs. On a consolidated basis, we have accrued approximately \$49.8 million for known environmental liabilities as of December 31, 2011. Given that these obligations may be paid/relieved over extended time periods (30 years in some cases), charges or credits to operations may be required as information is gathered and estimates refined.

We have evaluated our total environmental exposure based on currently available data and believe that such environmental matters will not have a material adverse impact on our financial position or results of operations. If matters previously identified by management are resolved in a manner different from original estimates, there is the potential for a material adverse effect on operating results or cash flows in any one accounting period. See Item 8. Financial Statements and Supplementary Data - Note 19, Commitments and Contingencies.

Income Taxes. Valuation Allowance - We record valuation allowances to reduce our deferred tax assets to the amount that is more likely than not to be realized based on available evidence weighted toward evidence that is objectively verifiable. If we were to determine that we would be able to realize deferred tax assets in the future in excess of our net recorded amount, an adjustment to the net deferred tax asset would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our recorded net deferred tax assets in the future, an adjustment to the deferred tax asset would decrease income in the period such determination was made.

The worldwide valuation allowance increased by \$100.7 million to \$181.8 million at December 31, 2011 to reserve for an increase in deferred tax assets which resulted from net operating losses and capital losses that more likely than not, will not be realized.

We have net operating loss carryforwards in the U.S. and China for which we have reserved. The valuation allowance also includes certain states in the U.S. as we have concluded realizability of these net operating loss and capital loss carryforwards is not more likely than not. We have not recorded valuation allowances on a significant portion of our German net operating loss carryforwards as we have considered positive evidence such as forecasted future taxable income based on historical taxable income adjusted for charges which are not indicative of future operations and as the carryforward period of the net operating losses is indefinite.

We consider future taxable income and other available evidence when assessing the need for a valuation allowance. Various assumptions and strategies (including elections for tax purposes) are implicit in estimates of forecasted future taxable income.

As of December 31, 2011, we had three years of net cumulative losses in the U.S. For any specific jurisdiction where a history of three years of cumulative losses has occurred or where there has been a substantial change in the business (e.g., a major acquisition or divestiture), the Company's policy is to determine the need for a valuation allowance on deferred tax assets, if any, by calculating an

average steady-state normalized taxable income amount over the last three years, adjusted for acquisitions or divestitures if necessary. The steady-state calculation includes management assumptions that relate to the appropriateness of certain items, such as, including permanent cost savings and excluding one-time items.

In accordance with this policy, we calculated the average annual income before taxes in the U.S. on a steady-state normalized basis. We continue to experience a pro-forma pre-tax loss on a three year cumulative basis. Based on this evidence, we conclude that the negative factors outweigh the positive factors as of December 31, 2011, the most persuasive factor being the objectively verifiable cumulative three year loss. As such, we recorded in our financial statements as of December 31, 2011 a valuation allowance of \$152.2 million against the federal net deferred tax assets, excluding deferred tax liabilities related to long lived assets. However, if at any point in 2012 or beyond we are able to demonstrate sufficient positive evidence that our U.S. deferred tax assets will be realized we will reverse all, or a portion of, the valuation allowance at that time. We expect that sufficient positive evidence will most likely occur in the form of future domestic taxable income.

The Company follows a standard that clarified the accounting for uncertainty in income taxes recognized in an entity's financial statements and that prescribed a recognition threshold and measurement attribute for financial statement disclosure of tax positions taken or expected to be taken on a tax return. The impact of an uncertain income tax position on the income tax return must be recognized as the largest amount that is more-likely-than-not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained.

The Company is subject to taxation in the U.S., various states, and foreign jurisdictions. As part of the adoption of this standard, we evaluated all tax positions taken including the existing tax liabilities recorded in accordance with the accounting guidance for contingencies, and evaluated whether such tax positions would more-likely-than-not be sustained upon examination, based on the technical merits of the position. If the position met the more-likely-than-not threshold test, we estimated the amount of the benefit that would be more than 50% likely to be sustained upon ultimate settlement. The estimate includes management's judgment of the amounts and probabilities of outcomes that could be realized upon ultimate settlement, taking into account all facts, circumstances, and information available at the reporting date.

Although we have a full valuation allowance on the U.S. net deferred tax assets and certain U.S. states, we have evaluated the U.S. positions as well as foreign positions. Based on our year-end analysis, we have recorded unrecognized tax benefits of \$30.1 million on a gross basis. The ultimate settlement of this liability is subject to tax audits or the expiration of the statute of limitations. As such, actual results will differ from our estimates.

In accordance with our policy, we have offset the gross liability in respect of our uncertain tax positions against deferred taxes where settlement of such liability would reduce tax loss carry forwards. We have recorded unrecognized tax benefits, net of deferred tax assets, of \$15.5 million as of December 31, 2011.

To the extent that the provision for income taxes increases/decreases by 1% of income before taxes, consolidated net income would have declined/improved by \$4.6 million in 2011.

Stock-Based Compensation. We have a stock-based compensation plan which includes stock options, restricted stock and other stock-based awards. See Item 8. Financial Statements and Supplementary Data - Note 1, Basis of Presentation and Significant Accounting Policies, and Note 13, Stock-Based Compensation, for a complete discussion of our stock-based compensation programs. In accordance with the accounting guidance on stock compensation, we record stock-compensation expense associated with our equity awards. The accounting for stock compensation is a critical accounting estimate, which requires judgments and assumptions that have an impact on our financial statements.

The fair value of our stock options granted in 2009 were estimated on the date of grant using the Black-Scholes option pricing model, which included assumptions of expected term, expected volatility and risk-free rates. Changes in these assumptions can affect the fair value estimate. The fair value of our performance restricted stock units granted in 2009 were estimated on the date of grant based on the closing market price of our stock. These performance-based equity awards require management to make assumptions regarding the likelihood of achieving company-performance goals, which in turn impacts our compensation expense. The fair value of restricted stock units granted in 2011 and 2010 was estimated on the date of grant using a Monte Carlo simulation model as the equity awards were tied to market conditions. The model utilizes multiple input variables that determine the probability of satisfying each market condition stipulated in the grant and calculates the fair value for the long-term performance awards. The recognition of expense is only recorded for awards that will eventually vest. This requires pre-vesting forfeitures to be estimated at the time of grant and modified, if necessary, if actual forfeitures differ from estimated forfeitures. Our forfeiture rates are based upon historical share-based equity award cancellations.

We do not believe there is a reasonable likelihood there will be a material change in the future estimates or assumptions we use to

determine stock-based compensation expense. However, if actual results are not consistent with our estimates and assumptions, we may be exposed to changes in stock-based compensation expense. A 10% change in our stock-based compensation expense would have affected net income attributable to Rockwood Holdings, Inc. by approximately \$1.3 million for the year ended December 31, 2011.

Retirement Benefits. In connection with prior year acquisitions, particularly the KKR and Dynamit Nobel acquisition, Rockwood assumed responsibility for the pension and postretirement benefits for substantially all of the employees of the businesses acquired that were active as of the date of the acquisition. For the KKR acquisition, obligations related to retired and terminated vested employees as of such date remained the responsibility of the seller, and accordingly, these obligations are not reflected in our consolidated financial statements. Defined benefit costs and liabilities and postretirement benefit costs and liabilities have been determined in accordance with the accounting guidance for retirement benefits. Postemployment benefit costs and liabilities have been determined in accordance with the accounting guidance for nonretirement postemployment benefits.

The measurement of our pension obligations, costs and liabilities is dependent on a variety of actuarial assumptions. These assumptions include estimates of the present value of projected future pension payments to all plan participants, with consideration to the likelihood of potential future events such as salary increases (due to marketplace conditions and/or inflation) and demographic experience (such as retirement and mortality rates). These assumptions may have an effect on the amount and timing of future contributions or benefit payments. For funded plans, the plan trustee obtains an independent valuation of the fair value of pension plan assets and prepares estimates of expected returns based on target asset allocations multiplied by current marketplace rates of return for comparable assets. We base the discount rate assumption on investment yields available at year-end on AA-rated corporate long-term bonds. The effects of actual results differing from our assumptions are accumulated and amortized over future periods and therefore are likely to affect our recognized expense in those periods. We cannot predict these bond yields or investment returns and therefore cannot reasonably estimate whether adjustments to our stockholders' equity for minimum pension liability in subsequent years will be significant.

Estimated sensitivity of our pension funded status and stockholders' equity and annual pension expense to a 0.25% increase/decrease in the discount rate assumption is shown below as of and for the year ended December 31, 2011. The estimates were based on inquiries of all plan actuaries. The December 31, 2011 funded status and stockholders' equity are affected by assumptions as of December 31, 2011 while 2011 annual pension expense is affected by December 31, 2010 assumptions:

(\$ in millions)	As of December 31, 2011			
	U.S. Plans Funded Status	Non-U.S. Plans Funded Status	Equity	2011 Pension Expense
Impact of a Change in Discount Rate				
+25 basis points	\$ 1.4	\$ 22.2	\$ (23.6)	\$ (1.0)
-25 basis points	(1.5)	(23.4)	24.9	1.0

As shown above, changes in the discount rate can have a significant effect on the funded status of our pension plans and stockholders' equity. As noted above, the funded status and stockholders' equity of our funded plans might also be significantly affected by assumptions concerning expected return of plan assets. However, given that most of our pension obligations do not require funding, such sensitivity would be significantly less.

Recent Accounting Pronouncements

See Recently Issued Accounting Standards section in Item 8. Financial Statements and Supplementary Data - Note 1, Basis of Presentation and Significant Accounting Policies, for a discussion of the impact related to recent accounting pronouncements.

Quarterly Financial Information (Unaudited)

(a) In the first quarter of 2011, we recorded a gain on sale of discontinued operations of \$114.5 million, net of tax, related to the sale of the plastic compounding business in January 2011.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In addition, in the first quarter of 2011, we recorded a loss on early extinguishment/modification of debt of \$16.2 million comprised of related fees of \$13.1 million and the write-off of deferred financing costs of \$3.1 million in connection with the refinancing and repayment of our senior secured term loans. Additional fees of \$0.3 million and \$0.1 million were recorded in

the second and third quarters of 2011, respectively, related to this transaction.

(b) In the second quarter of 2011, a gain of \$4.9 million, net of tax, was recorded. Included in this amount is a tax benefit of \$4.0 million associated with a re-filing of the Company's Alternative Minimum Tax (AMT) position made in connection with the sale of the plastic compounding business.

(c) In the third quarter of 2010, we recorded a loss on early extinguishment/modification of debt of \$1.6 million related to the write-off of deferred financing costs associated with the voluntary prepayment of \$200.2 million of senior secured term loans in July 2010.

(d) In the fourth quarter of 2010, we recorded a tax benefit in continuing operations of \$76.5 million for the reversal of domestic valuation allowances related to net operating losses that will be utilized as a result of the sale of the plastic compounding business. In addition, asset write-downs of \$9.2 million were recorded in the fourth quarter of 2010.

The basic and diluted earnings (loss) per common share amounts are calculated independently for each of the quarters presented. The sum of the quarters may not equal the full year amounts.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risk from changes in interest rates, foreign currency exchange rates and commodity prices. We manage our exposure to these market risks through regular operating and financing activities and through the use of derivatives. When used, derivatives are employed as risk management tools and not for trading purposes. In addition, all of our financial instruments, including derivatives, are subject to counterparty risk which we consider as part of the overall fair value requirements.

Interest Rate Risk

Although we are not required under the terms of any of our long-term debt facilities to hedge, or otherwise protect against interest rate fluctuations in our variable-rate debt, we have entered into interest rate swaps to manage our exposure to changes in interest rates related to certain variable-rate debt. As of December 31, 2011, these contracts cover notional amounts of \$195.0 million (at an interest rate of 1.40%) and were originally entered into to effectively convert all of the obligations under the Titanium Dioxide Pigments term loan facility to fixed rate obligations. These contracts will mature in June 2013. As of December 31, 2010, these contracts covered notional amounts of \$488.8 million (at interest rates ranging from 1.40% to 4.416%) and were originally entered into to effectively convert a portion of the senior secured credit obligations and all of the obligations under the Titanium Dioxide Pigments term loan facility to fixed rate obligations. The Company has not applied hedge accounting for these interest rate swaps and has recorded the mark-to-market of these derivatives as a component of interest expense in its consolidated statements of operations. The Company may in the future consider adjusting the amounts covered by these derivative contracts to better suit its capital structure. The Company may allow all or a portion of these swaps to lapse, enter into replacement swaps or settle these swaps prior to expiration. After entering into interest rates swaps, the Company had \$855.0 million (the majority of which was subject to a Libor floor of 1.00%) and \$908.9 million of variable rate debt outstanding as of December 31, 2011 and 2010, respectively. See Item 8. Financial Statements and Supplementary Data - Note 5, Financial Instruments and Fair Value Measurements, for further details regarding

these interest rate swaps.

In February 2011, in connection with the refinancing of the senior secured credit facility, an interest rate swap with a notional amount of 262.9 million (\$354.6 million based on the exchange rate in effect on the date of the payment) was terminated resulting in a payment of 10.8 million (\$14.6 million based on the exchange rate in effect on the date of the payment).

Foreign Currency Risk

We conduct operations in many countries around the world. Our results of operations are subject to both currency transaction risk and currency translation risk. We operate a geographically diverse business, with 55% of our net sales in 2011 generated from customers in Europe, 23% in North America (predominantly in the United States), 14% in Asia and 8% from the rest of the world based upon customer ship to locations. For a geographic description of the origin of our net sales and location of our long-lived assets, see Item 8. Financial Statements and Supplementary Data - Note 3, Segment Information. Although we sell and manufacture our products in many countries, our sales and production costs are mainly denominated in U.S. dollars and Euros. Our results of operations and financial condition are therefore impacted by the fluctuation of the Euro against our reporting currency, the U.S. dollar. Approximately 63% of our 2011 net sales were derived from subsidiaries whose local currency is the Euro. This increases the impact of the fluctuation of the Euro against the U.S. dollar.

We incur currency transaction risk whenever we enter into either a purchase or sale transaction using a currency other than the

functional currency of the transacting entity. Gains and losses on currency transactions are included in operating income and do impact our operating margins. With respect to currency translation risk, our financial condition and results of operations are measured and recorded in the relevant functional currency and then translated into U.S. dollars for inclusion in our consolidated financial statements. Gains and losses on currency translations are recorded in our consolidated financial statements as a component of other comprehensive income (loss) and do not impact our operating margins. Exchange rates between these currencies and U.S. dollars in recent years have fluctuated significantly and may do so in the future.

To manage our exposure to changes in foreign currency exchange rates, we have entered into certain foreign currency forward contracts from time to time. See Item 8. Financial Statements and Supplementary Data - Note 5, Financial Instruments and Fair Value Measurements, for further details regarding these forward contracts.

Our financial results are subject to the effect of currency fluctuations on the translation of our Euro-denominated debt. As of December 31, 2011 and 2010, our total Euro-denominated debt equaled 488.2 million (\$632.8 million) and 786.8 million (\$1,053.0 million), respectively. A weakening or strengthening of the Euro against the U.S. dollar by \$0.01 would decrease or increase the U.S. dollar equivalent of our total Euro-denominated debt by \$4.9 million as of December 31, 2011. Gains and losses on the translation of debt denominated in a currency other than the functional currency of the borrower are included as a separate component of other expenses, net in our statement of operations and accumulated other comprehensive income in the Consolidated Balance Sheet.

We designated a portion of our Euro-denominated debt that is recorded on our U.S. books as a net investment hedge of our Euro-denominated investments (Euro debt of 14.1 million at December 31, 2011; \$18.3 million). As a result, any foreign currency gains and losses resulting from the Euro-denominated debt discussed above is accounted for as a component of accumulated other comprehensive income.

Commodity Price Risk

We are subject to commodity price risk for certain of our raw materials, such as copper and zinc. We have not hedged this commodity price exposure to date.

Credit Risk

We monitor our investments with counterparties with the objective of minimizing concentration of credit risk. Our investment policy places limits on the amount and time to maturity of investments with any individual counterparty. The policy also requires that investments are made only with highly rated corporate and financial institutions.

The use of derivative instruments exposes us to credit risk. When the fair value of a derivative instrument is positive, we are exposed to credit risk if the counterparty fails to perform. When the fair value of a derivative instrument is negative, the counterparty is exposed to credit risk if we fail to perform our obligation. We are not required to post collateral when a derivative contract is in a liability position, and we do not require counterparties to post collateral for derivatives in an asset position to us. We seek to minimize the credit risk in derivative instruments by entering into transactions with reputable financial institutions. For additional information, see Item 8. Financial Statements and Supplementary Data - Note 5, Financial Instruments and Fair Value Measurements .

Item 8. Financial Statements and Supplementary Data.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Rockwood Holdings, Inc.
Princeton, New Jersey

We have audited the accompanying consolidated balance sheets of Rockwood Holdings, Inc. and Subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Rockwood Holdings, Inc. and Subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 23, 2012 expressed an unqualified opinion on the Company's internal control over financial reporting.

ROCKWOOD HOLDINGS, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation The consolidated financial statements, prepared in conformity with United States generally accepted accounting principles (U.S. GAAP), include the accounts of Rockwood Holdings, Inc. and Subsidiaries, which may be referred to as Rockwood or the Company . Rockwood is a global developer, manufacturer and marketer of high value-added specialty chemicals and advanced materials used for industrial and commercial purposes.

The Company's noncontrolling interest represents the total of the noncontrolling party's interest in certain investments (principally the Titanium Dioxide Pigments venture and the Viance, LLC timber treatment joint venture) that are consolidated but less than 100% owned.

All intercompany balances and transactions have been eliminated. Material subsequent events are evaluated through the report issuance date and disclosed where applicable.

The Company's consolidated financial statements have been reclassified to reflect discontinued operations for all periods presented as a result of the sale of the plastic compounding business in January 2011. See Note 2, Discontinued Operations, for further details. In addition, certain prior year amounts in Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans and Note 11, Income Taxes have been reclassified to conform to current year presentation.

Unless otherwise noted, all balance sheet items as of December 31, 2011 which are denominated in Euros are converted at the December 31, 2011 exchange rate of 1.00 = \$1.2961.

Use of Estimates The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and revenue and expenses during the periods reported. These estimates include, among other things, assessing the collectability of accounts receivable, the use and recoverability of inventory, the valuation of deferred tax assets, the measurement of the accrual for uncertain tax benefits, impairment of goodwill as well as property, plant and equipment and other intangible assets, the accrual of environmental and legal reserves and the useful lives of tangible and intangible assets, among others. Actual results could differ from those estimates. Such estimates also include the fair value of assets acquired and liabilities assumed as a result of allocations of the purchase price of business combinations consummated.

Major Customers and Concentration of Credit The Company has a number of major end-user, retail and original equipment manufacturer customers, with the largest concentration in Europe and the United States. No single customer accounted for more than 2% of net sales during any of the periods presented. The Company does not believe a material part of its business is dependent upon any single customer, the loss of which would have a material long-term impact on the business of the Company. However, the loss of one or more of the Company's largest

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

customers would most likely have a negative short-term impact on the Company's results of operations. Financial instruments which potentially subject the Company to concentrations of credit risk consist primarily of accounts receivable and derivative contracts.

Accounts Receivable The allowance for doubtful accounts is estimated at each reporting date based on factors such as receivable age, customer liquidity status and previous write-off history. The Company performs ongoing credit evaluations of customers and generally does not require collateral. Credit insurance is maintained by certain of the Company's businesses. An allowance is maintained for aggregate expected credit losses. Write-offs are charged to the allowance when taken, net of recoveries. Allowance for doubtful account activity is as follows:

(\$ in millions)	Year Ended December 31,					
	2011		2010		2009	
Balance, January 1	\$	9.4	\$	12.3	\$	9.6
Additions, net of recoveries		(0.2)		0.1		2.9
Write-offs		(0.9)		(2.2)		(1.7)
Other		(0.4)		(0.8)		1.5
Balance, December 31	\$	7.9	\$	9.4	\$	12.3

Revenue Recognition The Company recognizes revenue when the earnings process is complete. Product sales are recognized when products are shipped to the customer in accordance with the terms of the contract of sale, title and risk of loss have been transferred, collectibility is reasonably assured, and pricing is fixed or determinable. Accruals are made for sales returns and other allowances based on the Company's experience. The Company records shipping and handling costs in cost of products sold and records shipping and handling costs billed to customers in net sales. Revenue under service agreements, which was less than 1% of consolidated net sales in 2011, 2010 and 2009, is realized when the service is performed. Liabilities for product warranties are less than 1% of consolidated net sales as of December 31, 2011 and 2010.

Foreign Currency Translation The functional currency of each of the Company's foreign subsidiaries is primarily the respective local currency. Balance sheet accounts of the foreign operations are translated into U.S. dollars at period-end exchange rates and income and expense accounts are translated at average exchange rates during the period. Translation gains and losses related to net assets located outside the U.S. are shown as a component of accumulated other comprehensive income. Gains and losses resulting from foreign currency transactions (transactions denominated in a currency other than the entity's functional currency), including intercompany financing arrangements for which settlement is planned or anticipated, are included in determining net income for the period in which exchange rates change. Gains or losses on certain intercompany loans that are of a long-term investment nature for which settlement is not planned or anticipated in the foreseeable future are reported and accumulated in the same manner as translation adjustments. These loans are all related to intercompany debt arrangements. As of December 31, 2011, intercompany debt arrangements deemed to be of a long-term investment nature for which settlement is not planned or anticipated in the foreseeable future equaled \$581.0 million (\$753.0 million). In addition, gains or losses on Euro-denominated debt that is designated as a net investment hedge of the Company's Euro-denominated investments are reported and accumulated in the same manner as translation adjustments.

Advertising The Company expenses advertising costs within selling, general and administrative expenses as incurred. Advertising costs are less than 1% of consolidated net sales in 2011, 2010 and 2009.

Research and Development Research and development costs are charged to expense within selling, general and administrative expenses, as incurred. Such costs were \$59.1 million, \$49.3 million and \$43.9 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Cash and Cash Equivalents All highly liquid instruments and money market funds with an original maturity of three months or less are considered to be cash equivalents. The carrying amount approximates fair value because of the short maturities of these instruments.

Inventories Inventories are stated at the lower of cost or market. Cost is determined primarily on average cost or the first-in, first-out method. Inventory quantities on hand are reviewed regularly, and where necessary, provisions for excess and obsolete inventory are recorded based primarily on either the Company's estimated forecast of product demand and production requirements or historical usage. See Item 8. Financial Statements and Supplementary Data - Note 6, Inventories.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Property, Plant and Equipment Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the various asset classes. Estimated lives generally range from 20-30 years for buildings and improvements (including land improvements), 7-12 years for machinery and equipment, 3-5 years for furniture and fixtures and 14-50 years for mining rights. See Item 8. Financial Statements and Supplementary Data - Note 7, Property, Plant and Equipment.

The estimated useful lives of leasehold improvements are the lesser of the estimated life of the improvement or the term of the lease.

Major renewals and improvements are capitalized and minor replacements, maintenance and repairs are charged to current operations as incurred. Upon retirement or disposal of assets, the cost and related accumulated depreciation are removed from the balance sheet and any gain or loss is reflected in the statement of operations.

The Company classifies depreciation and amortization in its Consolidated Statements of Operations consistent with the utilization of the underlying assets as follows:

(\$ in millions)	Year Ended December 31,		
	2011	2010	2009
Cost of products sold	\$ 174.0	\$ 166.7	\$ 178.8
Selling, general and administrative expenses			
(a)	93.2	89.2	95.4
Total depreciation and amortization	\$ 267.2	\$ 255.9	\$ 274.2

(a) Primarily consists of amortization costs.

Goodwill Goodwill represents the cost in excess of fair value of net assets acquired for transactions accounted for using the purchase method of accounting. See Item 8. Financial Statements and Supplementary Data - Note 8, Goodwill, for details of goodwill activity by segment.

Other Intangible Assets Other intangible assets primarily consists of patents and other intellectual property, trade names and trademarks, and customer relationships. Patents and other intellectual property are recorded at their estimated fair values at the time of acquisition and are being amortized over their estimated remaining useful lives, ranging from 4-20 years. Trade names and trademarks are being amortized from 18-25 years, customer relationships are being amortized over periods ranging from 7-15 years and supply agreements are being amortized over periods ranging from 10-15 years. See Item 8. Financial Statements and Supplementary Data - Note 9, Other Intangible Assets, Net.

Impairment Accounting The recoverability of goodwill is reviewed on an annual basis during the fourth quarter. Additionally, the recoverability of goodwill, long-lived tangible, and other intangible assets is reviewed when events or changes in circumstances occur indicating that the carrying value of the assets may not be recoverable. The Company determined that its reporting units for its goodwill impairment review are its operating segments or components of an operating segment that constitute a business for which discrete financial information is available and for which segment management regularly reviews the operating results. Based on this analysis, the Company has identified three reporting units within its reportable segments that qualify for such review.

In accordance with the accounting guidance for determining a goodwill impairment, there is a two-step method. In the first step, the Company determines the fair value of each reporting unit and compares that fair value to the carrying value of such reporting unit. This begins with estimating the fair value of each reporting unit, which is derived from peer multiples. Specifically, the estimate of the fair value of such reporting unit is based on an industry metric that is the ratio of enterprise value (EV which is commonly defined as market capitalization, plus long-term debt, less cash) to Adjusted EBITDA of the relevant benchmark peer companies and groups; this is the peer multiple approach. The Company uses EV multiples for the last twelve months Adjusted EBITDA and for the next fiscal year's Adjusted EBITDA. The peer companies are typically based upon the competitors disclosed in Item 1, Business for each of the reporting units. The Company then multiplies this ratio by the Adjusted EBITDA for the recently completed year and the budgeted Adjusted EBITDA for the upcoming year of such reporting unit and compares it to the carrying value of such reporting unit. If the product of such peer multiple and reporting unit's Adjusted EBITDA is less than such carrying value, it may be an indication of an impairment. If the initial review does not result in clear evidence that no impairment indicators exist, a review based on expected future cash flows is performed; this is the discounted cash flow approach. For the discounted cash flow approach, the Company makes certain assumptions about, among other things, estimates of future cash flows, including growth rates, price increases, capital expenditures, the benefits of recent acquisitions and expected synergies, and an appropriate discount rate. If the results of the peer multiple approach and the discounted cash flow approach differ materially, the relevant facts and circumstances are reviewed and a qualitative assessment is made to determine the proper weighting. If the results of the first step indicate the carrying amount of a reporting unit is higher than its fair value, the second step must be performed. Specifically, the Company determines the implied fair value of goodwill in the same manner as if it had acquired those reporting units. In the second step, the potential impairment is computed by comparing the implied fair

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

value of the reporting unit's goodwill with the carrying amount of goodwill. If the carrying amount of the reporting unit's goodwill is greater than the implied fair value of its goodwill, an impairment loss must be recognized for the excess. If necessary, the Company may consult with valuation specialists to assist with its goodwill impairment review.

These calculations are based on inherent assumptions and estimates about future cash flows and appropriate benchmark peer companies or groups. Subsequent changes in these assumptions could result in future impairment. Although the Company consistently uses the same methods in developing the assumptions and estimates underlying the fair value calculations, such estimates are uncertain by nature and can vary from actual results.

The recoverability of other intangible assets is reviewed when events or changes in circumstances occur indicating that the carrying

value of the assets may not be recoverable. In the fourth quarter of 2010 and in 2011, the Company performed a recoverability test of certain intangible assets in our Viance timber treatment chemicals venture and concluded that there was no impairment of those assets. The Company will continue to monitor the recoverability of these assets if events or circumstances indicate that the carrying value of such assets may not be recoverable.

Financial Instruments Management believes the carrying amount of financial instruments, including accounts receivable, accounts payable and debt, approximates fair value, except as described in Note 5, Financial Instruments and Fair Value Measurements.

Derivatives All derivatives are recognized as either assets or liabilities at fair value. Changes in the fair value of derivatives not designated as hedging instruments are recognized in earnings while changes in the fair value of derivatives that are designated as hedging instruments are recognized as a component of comprehensive income. The Company uses derivative instruments to manage its exposure to market risks associated with fluctuations in interest rates and foreign currency exchange rates. See Item 8. Financial Statements and Supplementary Data - Note 5, Financial Instruments and Fair Value Measurements and Note 18, Accumulated Other Comprehensive Income, for the impact of the Company's net investment and cash flow hedges. The Company does not enter into derivative contracts for trading purposes nor does it use leveraged or complex instruments.

Pension, Postemployment and Postretirement Costs Defined benefit costs and liabilities and postretirement benefit costs and liabilities have been determined in accordance with accounting standards for retirement benefits. Postemployment benefit costs and liabilities have been determined in accordance with accounting standards for nonretirement postemployment benefits. See Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans, for further details.

Related Party Transactions In the ordinary course of business, Rockwood has engaged in transactions with certain related parties including Kohlberg Kravis Roberts & Co. L.P. (KKR). For example, the Company paid fees of \$2.0 million to KKR related to the refinancing of the Company's senior secured term loans in February 2011.

As part of the Titanium Dioxide Pigments venture with Kemira that was completed in September 2008, the venture has a long-term agreement expiring in August 2018 to purchase steam and electricity (energy) from Kemira. The venture purchased \$40.0 million, \$36.8 million and \$31.2 million, respectively, of energy from Kemira during 2011, 2010 and 2009. As of December 31, 2011 and 2010, \$5.6 million and \$4.1 million, respectively, was due to Kemira, for energy purchases. In 2009, the venture also made a contractual advance of \$16.0 million in connection with this agreement. Minimum annual payments under the energy agreement are approximately \$15.6 million per year. In connection with this arrangement, the venture has approximately \$27.8 million of a non-interest bearing note receivable from Kemira that is due in August 2028. The carrying value of the note receivable was \$5.8 million at December 31, 2011. Interest is imputed at an effective rate of 8.96%. The fair value of the note receivable is approximately \$9.7 million at December 31, 2011.

As part of the Titanium Dioxide Pigments venture with Kemira, the venture has a supply agreement for the sale of certain raw materials to Kemira that are manufactured by the venture. The term of this contract expires in December 2015. Transactions between the Titanium Dioxide Pigments venture and Kemira consisted of sales to Kemira of \$3.4 million, \$2.1 million and \$2.8 million in 2011, 2010 and 2009, respectively, and amounts due from Kemira of \$0.6 million and \$0.4 million at December 31, 2011 and 2010, respectively. In addition, there were sales from the Titanium Dioxide Pigments venture to companies owned by Kemira of \$2.2 million and \$11.1 million during 2010 and 2009, respectively, of which \$0.1 million was due to the venture at December 31, 2010.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

As part of the Viance, LLC joint venture, the Company's Chemical Specialties, Inc. (CSI) subsidiary within the Timber Treatment Chemicals business and The Dow Chemical Company (Dow) entered into certain related party transactions. Viance, LLC does not own manufacturing facilities, and as a result, relies on the members of the joint venture to provide substantially all product and distribution requirements. In addition, the members sell products to Viance, LLC. Transactions between Viance, LLC and Dow amounted to: purchases from Dow of \$1.3 million, \$4.1 million and \$5.0 million in 2011, 2010 and 2009, respectively, and sales to Dow of \$0.4 million, \$0.4 million and \$0.3 million in 2011, 2010 and 2009, respectively. Amounts due to Dow totaled \$0.1 million and \$2.3 million at December 31, 2011 and 2010, respectively.

Income Taxes Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts and the corresponding tax carrying amounts of assets and liabilities. Deferred tax assets are also recognized for tax loss and tax credit carryforwards. A valuation allowance is recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized based on available evidence weighted toward evidence that is objectively

verifiable. Deferred taxes are not provided on the undistributed earnings of subsidiaries as such amounts are considered to be permanently invested.

The impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than-not to not be sustained upon audit by the relevant authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained.

The Company records liabilities for uncertain tax benefits net of deferred tax assets associated with tax loss carryforwards for liabilities arising in the same year as the asset and for liabilities arising in different years from the asset, provided that the related tax loss can be carried back or forward to offset the liability.

Where the Company has a loss from continuing operations and income in other categories, the Company allocates a tax benefit to continuing operations and a tax provision to those other categories. Where there is income in other categories on a net basis, the Company's policy is to allocate the tax provision only to categories with income and on a pro-rata basis.

Future realization of the tax benefit of an existing deductible temporary difference or carryforward ultimately depends on the existence of sufficient taxable income of the appropriate character (for example, ordinary income or capital gain) within the carryforward period available under the tax law. The Company's policy is to consider the following sources of taxable income, which may be available under the tax law to realize a tax benefit for deductible temporary differences and carryforwards:

- Future reversals of existing taxable temporary differences.
- Future taxable income exclusive of reversing temporary differences and carryforwards.
- Taxable income in prior carry back year(s) if carry back is permitted under the tax law.
- Tax planning strategies that would, if necessary, be implemented to:
 - (1) Accelerate taxable amounts to utilize expiring carryforwards.
 - (2) Change the character of taxable or deductible amounts from ordinary income or loss to capital gain or loss.

- (3) Switch from tax-exempt to taxable investments.

Evidence available about each of those possible sources of taxable income will vary between tax jurisdictions and, possibly, from year to year. To the extent evidence about one or more sources of taxable income is sufficient to support a conclusion that a valuation allowance is not necessary, the Company's policy is that other sources need not be considered. Consideration of each source is required, however, to determine the amount of the valuation allowance that may be required to be recognized for deferred tax assets.

For any specific jurisdiction where a history of three years of cumulative losses has occurred or where there has been a substantial change in the business (e.g., a major acquisition or divestiture); the Company does not rely on projections of future taxable income as described above. Instead, the Company determines its need for a valuation allowance on deferred tax assets, if any, by determining an average steady-state normalized taxable income amount over the last three years, adjusted for acquisitions or divestitures if necessary. The Company will also consider the following positive evidence in the above scenarios, if present:

- Existing contracts or firm sales backlog that will produce more than enough taxable income to realize the deferred tax asset based on existing sales prices and cost structures.
- An excess of appreciated asset value over the tax basis of the entity's net assets in an amount sufficient to realize the deferred tax asset.

Comprehensive Income Comprehensive income includes net income and the other comprehensive income components which include unrealized gains and losses from foreign currency translation and from certain intercompany transactions that are of a long-term investment nature, pension-related adjustments that are recorded directly into a separate section of stockholders' equity in the balance sheets and net investment and cash flow hedges. Foreign currency translation amounts are not adjusted for income taxes since they relate to indefinite life investments in non-U.S. subsidiaries and certain intercompany debt. See Item 8. Financial Statements and Supplementary Data - Note 18, Accumulated Other Comprehensive Income.

Accounting for Environmental Liabilities In the ordinary course of business, Rockwood is subject to extensive and changing federal, state, local and foreign environmental laws and regulations, and has made provisions for the estimated financial impact of environmental cleanup and site reclamation costs. Rockwood's policy has been to accrue costs of a non-capital nature related to environmental clean-up when those costs are believed to be probable and can be reasonably estimated. If the aggregate amount of the obligation and the amount and timing of the cash payments for a site are fixed or reliably determinable, the liability is discounted. Expenditures that extend the life of the related property or mitigate or prevent future environmental contamination are capitalized and expenditures related to existing conditions resulting from past or present operations and from which no current or future benefit is discernible are immediately expensed. The quantification of environmental exposures requires an assessment of many factors, including changing laws and regulations, advancements in environmental technologies, the quality of information available related to specific sites, the assessment stage of each site investigation and the length of time involved in remediation or settlement. In some matters, Rockwood may share costs with other parties. Rockwood does not include anticipated recoveries from insurance carriers or other third parties in its accruals for environmental liabilities.

Stock-Based Compensation Under the 2008 Amended and Restated Stock Purchase and Option Plan of Rockwood Holdings, Inc. and Subsidiaries (the Plan) the Company granted stock options, restricted stock and other stock-based awards to the Company's employees and directors and allowed employees and directors to purchase shares of its common stock. However, the Company no longer issues equity awards under this Plan. In April 2009, the Company adopted the 2009 Stock Incentive Plan (the New Plan; together with the Plan, the Plans), which has 11,000,000 authorized shares. All equity awards granted after this date are being awarded under the New Plan.

The Company awarded restricted stock units in 2011, 2010 and 2009, and stock options in 2009 to certain employees of Rockwood Corporate Headquarters and its business units. See Item 8. Financial Statements and Supplementary Data - Note 13, Stock-Based Compensation, for further details. The restricted stock units contain a provision in which the units shall immediately vest and become converted into the right to receive a cash payment upon a change in control as defined in the equity agreement. As the provisions for redemption are outside the control of the Company, the fair value of these units as of December 31, 2011 and 2010 has been recorded as mezzanine equity (outside of permanent equity) in the Consolidated Balance Sheets.

Recently Issued Accounting Standards:

In May 2011, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) that substantially converged the requirements for fair value measurement and disclosure between the FASB and the International Accounting Standards Board (IASB). This ASU is largely consistent with existing fair value measurement principles under U.S. GAAP. This ASU is effective for the Company in its first quarter beginning January 1, 2012 and is not expected to have a material impact on the Company's financial statements.

In June 2011, the FASB issued an ASU that addressed the presentation of comprehensive income in the financial statements. This accounting update allows an entity the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This ASU is effective for the Company in its first quarter beginning January 1, 2012 and is not expected to have a material impact on the Company's financial statements other than modifying the presentation of comprehensive income.

In September 2011, the FASB issued an ASU that requires additional disclosures about an employer's participation in a multiemployer pension plan. Previously, disclosures were limited to the historical contributions made to the multiemployer pension plans. The Company began providing the required additional disclosures for its multiemployer pension plans in this Form 10-K (See Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans, for further details).

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In September 2011, the FASB issued an ASU that allows an entity to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under this new ASU, if a Company chooses the qualitative method, an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. This ASU is effective for annual and interim impairment tests performed for fiscal years beginning after December 15, 2011. The Company does not expect this ASU to have a material impact on its financial statements.

2. DISCONTINUED OPERATIONS:

On January 7, 2011, the Company completed the sale of its plastic compounding business. As of December 31, 2010, this business met the criteria for being reported as a discontinued operation. The plastic compounding business, which manufactured specialty plastic compounds for the wire and cable industry, medical applications and other uses, comprised substantially all of the assets of the Company's former Specialty Compounds segment. The Company's financial statements have been reclassified to reflect the plastic

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

compounding business as discontinued operations for all periods presented.

The sale of the plastic compounding business includes the net gain on the sale of the plastic compounding business of \$119.3 million (net of taxes of \$78.2 million, a portion of which was offset through the utilization of net operating losses of \$76.5 million) for the year ended December 31, 2011. The valuation allowance related to these net operating losses was reversed in the fourth quarter of 2010 as a benefit to income taxes in continuing operations.

Income from discontinued operations, net of tax, of \$0.9 million for the year ended December 31, 2011 includes \$0.7 million related to the reversal of certain reserves in connection with the sale of the Electronics business in December 2007.

Operating results of the discontinued operations of the plastic compounding business for the years ended December 31, 2010 and 2009 are as follows:

(\$ in millions)	Year Ended December 31,	
	2010	2009
Net sales	\$ 231.3	\$ 193.8
Cost of products sold	187.2	156.7
Gross profit	44.1	37.1
Selling, general and administrative expenses	16.7	15.6
Income before taxes	27.4	21.5
Income tax provision	8.8	7.5
Net income	\$ 18.6	\$ 14.0

For the year ended December 31, 2010, income from discontinued operations, net of tax, also included \$0.8 million that was related to the favorable resolution of a claim against the Company's former Groupe Novasep business sold in January 2007. For the year ended December 31, 2009, income from discontinued operations, net of tax, also included \$2.8 million that was primarily related to the favorable resolution of a claim against the Company's former Groupe Novasep business and the reversal of certain reserves no longer deemed necessary in connection with the sale of the Electronics business in December 2007.

The carrying value of the assets and liabilities of the plastic compounding business included as discontinued operations in the Consolidated Balance Sheets as of December 31, 2010 are as follows:

(\$ in millions)	
ASSETS	
Cash and cash equivalents	\$ 16.6
Accounts receivable, net	32.9
Inventories	18.0
Property, plant and equipment, net	63.0
Other intangible assets, net	16.2
Other assets	7.4
Total assets	\$ 154.1
LIABILITIES	
Accounts payable and other current liabilities	\$ 27.6

3. SEGMENT INFORMATION:

The Company is a global developer, manufacturer and marketer of high value-added specialty chemicals and advanced materials. The Company currently operates in various business lines within its four reportable segments according to the nature and economic characteristics of its products and services consisting of: (1) Specialty Chemicals, which includes lithium compounds and chemicals, and surface treatment chemicals, (2) Performance Additives, which includes color pigments and services, timber treatment chemicals and clay-based additives, (3) Titanium Dioxide Pigments, which consists of titanium dioxide pigments, and zinc- and barium-based compounds and (4) Advanced Ceramics, which includes ceramic-on-ceramic ball head and liner components used in hip-joint prostheses systems, ceramic cutting tools and a range of other ceramic components.

The basis for determining an enterprise's reportable segments is the manner in which financial information is used internally by the

enterprise's chief operating decision maker, the Company's Chief Executive Officer.

Items that cannot be readily attributed to individual segments have been classified as Corporate and other. Corporate and other operating loss primarily represents payroll, professional fees and other operating expenses of centralized functions such as treasury, tax, legal, internal audit and consolidation accounting as well as the cost of operating the Company's central offices (including some costs maintained based on legal or tax considerations). The primary components of Corporate and other, in addition to operating expenses, are interest expense on external debt (including the amortization of deferred financing costs), foreign exchange losses or gains, and mark-to-market gains or losses on derivatives. The Corporate and other classification also includes the results of operations, assets (primarily real estate) and liabilities (including pension and environmental) of legacy businesses formerly belonging to the Dynamit Nobel businesses that were acquired in 2004, the wafer reclaim business and the rubber/thermoplastics compounding business.

Summarized financial information for each of the reportable segments is provided in the following tables:

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Net Sales:			
Specialty Chemicals	\$ 1,338.3	\$ 1,163.2	\$ 996.6
Performance Additives	784.4	726.7	671.5
Titanium Dioxide Pigments	930.4	759.2	666.3
Advanced Ceramics	585.1	515.6	412.2
Corporate and other	31.1	26.9	22.5
Total	\$ 3,669.3	\$ 3,191.6	\$ 2,769.1

The Company uses Adjusted EBITDA on a segment basis to assess the ongoing performance of the Company's business segments and reporting units. Because the Company views Adjusted EBITDA on a segment basis as an operating performance measure, the Company uses income (loss) from continuing operations before taxes as the most comparable U.S. GAAP measure. The summary of segment information below includes Adjusted EBITDA, a financial measure used by the Company's chief decision maker and senior management to evaluate the operating performance of each segment.

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Adjusted EBITDA from continuing operations:			
Specialty Chemicals	\$ 349.1	\$ 295.7	\$ 245.7
Performance Additives	144.0	123.8	95.1
Titanium Dioxide Pigments	257.6	129.5	97.3
Advanced Ceramics	183.7	153.2	107.7
Corporate and other	(71.6)	(67.8)	(35.9)
Total	\$ 862.8	\$ 634.4	\$ 509.9

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Capital Expenditures:			
Specialty Chemicals	\$ 109.4	\$ 45.5	\$ 46.2
Performance Additives	44.9	27.8	26.2
Titanium Dioxide Pigments	75.3	60.4	40.6
Advanced Ceramics	46.1	40.7	32.8

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Corporate and other		4.0		5.9		5.7
Total (a)	\$	279.7	\$	180.3	\$	151.5

(a) Net of government grants of \$16.0 million and \$3.2 million received in the Specialty Chemicals segment for the years ended December 31, 2011 and 2010, respectively.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	Identifiable Assets as of December 31,		
	2011	2010	2009
Specialty Chemicals	\$ 2,234.5	\$ 2,107.7	\$ 2,100.4
Performance Additives	745.7	759.4	773.1
Titanium Dioxide Pigments	929.6	897.4	945.4
Advanced Ceramics	810.9	828.8	867.8
Corporate and other (a)	346.9	397.2	284.5
Eliminations (b)	(480.0)	(420.3)	(329.8)
Total (c)	\$ 4,587.6	\$ 4,570.2	\$ 4,641.4

(a) Corporate and other identifiable assets primarily represent deferred financing costs that have been capitalized in connection with corporate external debt financing, deferred income tax assets and cash balances maintained in accordance with centralized cash management techniques.

(b) Amounts contained in the Eliminations column represent the individual subsidiaries' retained interest in their cumulative net cash balance (deposits less withdrawals) included in the corporate centralized cash system and within the identifiable assets of the respective segment. These amounts are eliminated as the corporate centralized cash system is included in the Corporate and other segment's identifiable assets.

(c) This amount does not include \$154.1 million and \$146.4 million of identifiable assets as of December 31, 2010 and 2009, respectively, from the plastic compounding business sold in January 2011.

The following table represents summarized geographic information with net sales based on seller's location:

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Net sales:			
Germany	\$ 1,900.9	\$ 1,604.2	\$ 1,176.0
United States	731.2	673.0	609.6
Rest of Europe	646.1	571.5	693.8
Rest of World	391.1	342.9	289.7
	\$ 3,669.3	\$ 3,191.6	\$ 2,769.1

The following table presents the net book value of the Company's long-lived assets located in the regions indicated:

(\$ in millions)	As of December 31,		
	2011	2010	2009
Long-lived assets:			
Germany	\$ 750.0	\$ 747.9	\$ 782.2
Rest of Europe	383.5	368.7	395.1
United States	259.7	230.4	244.2
Rest of World	225.3	219.9	214.1
	\$ 1,618.5	\$ 1,566.9	\$ 1,635.6

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

On a segment basis, the Company defines Adjusted EBITDA as operating income excluding depreciation and amortization, certain non-cash gains and charges, certain other special gains and charges deemed by senior management to be non-recurring gains and charges and certain items deemed by senior management to have little or no bearing on the day-to-day operating performance of its business segments and reporting units. The adjustments made to operating income directly correlate with the adjustments to net income in calculating Adjusted EBITDA on a consolidated basis pursuant to the senior secured credit agreement, which reflects management's interpretations thereof. The indenture governing the 2014 Notes and the facility agreement related to the Titanium Dioxide Pigments venture excludes certain adjustments permitted under the senior credit agreement. Senior management uses Adjusted EBITDA on a segment basis as the primary measure to evaluate the ongoing performance of the Company's business segments and reporting units. Because the Company views Adjusted EBITDA on a segment basis as an operating performance measure, the Company uses income (loss) from continuing operations before taxes as the most comparable U.S. GAAP measure.

Major components within the reconciliation of income (loss) from continuing operations before taxes to Adjusted EBITDA are described more fully in the table below:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	Specialty Chemicals	Performance Additives	Titanium Dioxide Pigments	Advanced Ceramics	Corporate and other	Consolidated

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Total Adjusted EBITDA from
continuing operations

- (a) Includes gains of \$0.5 million, \$13.4 million and \$3.9 million for the years ended December 31, 2011, 2010 and 2009, respectively, representing the movement in the mark-to-market valuation of the Company's interest rate and cross-currency swaps.
- (b) See Item 8. Financial Statements and Supplementary Data - Note 17, Restructuring And Other Severance Costs, for further details.
- (c) Primarily relates to settlement costs associated with the termination of a supply agreement related to the formation of the Company's titanium dioxide pigments venture.
- (d) Represents fees of \$13.5 million and the write-off of deferred financing costs of \$3.1 million in connection with the refinancing of the senior secured credit facility and the repayment of the senior secured term loans in February 2011.
- (e) Primarily relates to professional fees incurred in connection with exploring strategic options.
- (f) Primarily relates to costs incurred in conjunction with the integration of businesses acquired.
- (g) Represents the write-off of deferred financing costs associated with the voluntary prepayment of \$200.2 million of senior secured term loans in July 2010.
- (h) Primarily relates to the write-down of a receivable of \$4.7 million related to a pension indemnification in conjunction with the acquisition of the Dynamit Nobel businesses in 2004, fixed asset write-downs of \$2.1 million in the Performance Additives segment and the write-off of an acquisition-related receivable of \$1.6 million in our Specialty Chemicals segment.
- (i) The Company recorded income of \$0.7 million primarily related to a gain recorded on the sale of an investment previously

accounted for under the equity method in the Specialty Chemicals segment and the reversal of a reserve covering legacy obligations assumed in connection with the acquisition of the Dynamit Nobel businesses in 2004.

(j) Represents the write-off of deferred financing costs of \$20.9 million and lender fees related to the early extinguishment of debt of \$12.0 million, partially offset by a discount of \$6.3 million related to the repurchase of \$153.2 million in aggregate principal amount of the 2014 Notes.

(k) Primarily relates to an increase in reserves covering legacy obligations assumed in connection with the KKR Acquisition in 2000 and the acquisition of the Dynamit Nobel businesses in 2004.

4. VARIABLE INTEREST ENTITIES:

Viance LLC Joint Venture

Viance is a joint venture between the Timber Treatment Chemicals business of the Performance Additives segment and Dow that provides an extensive range of advanced wood treatment technologies and services to the global wood treatment industry. The Company has concluded that Rockwood is the primary beneficiary of Viance and as such has consolidated the joint venture. This conclusion was made as Rockwood has the obligation to absorb losses of Viance that could potentially be significant to Viance and/or the right to receive benefits from Viance that could potentially be significant to Viance. In addition, CSI has the power to direct the activities of Viance that most significantly impact Viance's performance, as Viance does not own manufacturing facilities. As a result, Viance primarily relies on CSI to provide product and distribution requirements through a supply agreement.

At December 31, 2011 and 2010, no consolidated assets of the Company were pledged as collateral for any obligations of Viance and the general creditors of Viance had no recourse against the Company. Viance's assets can only be used to settle direct obligations of Viance.

The carrying values of the assets and liabilities of the Viance joint venture included in the Consolidated Balance Sheets are as follows:

	December 31,	
	2011	2010
Cash and cash equivalents	\$ 2.9	\$ 6.6
Other current assets	10.8	17.7
Total current assets	13.7	24.3
Other intangible assets, net	65.1	71.6
Other assets	3.1	3.6
Total assets	\$ 81.9	\$ 99.5
Total liabilities	\$ 4.8	\$ 11.2

Titanium Dioxide Pigments Venture

In September 2008, the Company completed the formation of a Titanium Dioxide Pigments venture with Kemira Oyj (Kemira) that focuses on specialty titanium dioxide pigments. The venture includes the combination of the Company's titanium dioxide pigments and functional additives businesses, including its production facility in Duisburg, Germany, and Kemira's titanium dioxide business, including Kemira's titanium dioxide plant in Pori, Finland. The Company has not identified significant variable interests in this venture and accordingly has concluded that this venture does not meet the definition of a variable interest entity (VIE). The Company owns 61% of the venture and consolidates it based on the voting interest model given its majority ownership and ability to control decision making. Kemira only has certain protective rights to limit Rockwood's control.

In conjunction with this venture, there is a power plant that is legally owned and operated by a Finnish power cooperative (PVO). Kemira is a cooperative participant and has an indirect interest in the power plant via ownership of a special share class. The venture utilizes the majority of power supplied. This power plant was determined to be a VIE as the equity holders of the power plant as a group (including Kemira) lack the ability to influence decision making since PVO effectively controls the power plant. It was determined that Rockwood and Kemira jointly form the primary beneficiary of the power plant. The venture has a long-term agreement expiring in August 2018 to purchase steam and electricity (energy) from Kemira. Due to the terms of this agreement under which Kemira has the risks and benefits of the majority of the expected life of the power plant, the Company concluded that Kemira is the party most closely associated with the venture and therefore is the primary beneficiary within the related party group.

Accordingly, the Company does not consolidate the power plant. Apart from routine payables to Kemira or the PVO in connection with this agreement, no results or balances of the power plant are reflected in the Company's financial statements. See "Related Party Transactions" section of Note 1, "Basis of Presentation and Significant Accounting Policies," for more details regarding the energy agreement.

Other

Rockwood has several unconsolidated ventures, primarily within the Specialty Chemicals segment. Two of these ventures do not fit the criteria for classification as a VIE as they are financially self-sustaining, 50/50 ventures both as to control and economics. Other ventures manufacture and market products in China and an additional venture is a service provider at a key manufacturing facility. As the parties share risks and benefits disproportionate to their voting interests, the Company has concluded that these ventures are VIEs. However, the Company has also concluded that it should not consolidate these VIEs as it is not the primary beneficiary. The Company does not have the power and/or ability to direct the activities most affecting venture performance due to governance structure and significant expertise provided and/or functions performed by its venture partners. As of December 31, 2011 and 2010, Rockwood's aggregate net investment in these ventures was \$18.6 million and \$14.1 million, respectively. These investments are classified as "Other assets" in the Consolidated Balance Sheet and represents Rockwood's approximate exposure to losses on these investments. Rockwood does not guarantee debt for or have other financial support obligations to these ventures.

5. FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS:

Financial instruments include cash and cash equivalents, accounts receivable, accounts payable, debt instruments and derivatives. Due to their short term maturity, the carrying amount of receivables and payables approximate carrying value. Cash equivalents primarily consist of highly liquid investments with original maturities of three months or less at the time of purchase and are recorded at cost, which approximates fair value. The Company has exposure to market risk from changes in interest rates and foreign currency exchange rates. As a result, certain derivative financial instruments may be used when available on a cost-effective basis to hedge the underlying economic exposure. Certain of these instruments qualify as cash flow and net investment hedges upon meeting the requisite criteria, including effectiveness of offsetting hedged exposures. Changes in the fair value of derivatives that do not qualify for hedge accounting are recognized in earnings as they occur. Derivative financial instruments are not used for trading purposes.

All financial instruments including, derivatives, are subject to counterparty credit risk which is considered as part of the overall fair value measurement. Counterparty credit risk is mitigated by entering into derivative contracts with only major financial institutions of investment grade quality and by limiting the amount of exposure to each financial institution. The Company has considered credit adjustments in its determination of the fair value of its derivative assets and liabilities as of December 31, 2011 and 2010 based on market participant assumptions. In addition, based on the credit evaluation of each counter-party institution as of December 31, 2011 and 2010, the Company believes the carrying values to be fully realizable. No counterparty has experienced a significant downgrade in 2011 and the condensed consolidated financial statements would not be materially impacted if any counterparties failed to perform according to the terms of its agreement. Under the terms of the agreements, posting of collateral is not required by any party whether derivatives are in an asset or liability position.

Interest Rate Swaps Not Designated as Hedging Instruments

Although the Company is not required under the terms of any of its long-term debt facilities to hedge, or otherwise protect against interest rate fluctuations in its variable-rate debt, the Company has entered into interest rate swaps to manage its exposure to changes in interest rates related to certain variable-rate debt. As of December 31, 2011, these contracts cover notional amounts of \$195.0 million (at interest rates of 1.40%) and

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

were originally entered into to effectively convert all of the obligations under the Titanium Dioxide Pigments term loan facility to fixed rate obligations. These contracts will mature in June 2013. As of December 31, 2010, these contracts covered notional amounts of 488.8 million (at interest rates ranging from 1.40% to 4.416%) and were originally entered into to effectively convert a portion of the senior secured credit obligations and all of the obligations under the Titanium Dioxide Pigments term loan facility to fixed rate obligations.

The Company has not applied hedge accounting for these interest rate swaps and has recorded the mark-to-market of these derivatives as a component of interest expense in its consolidated statements of operations. The Company may in the future consider adjusting the amounts covered by these derivative contracts to better suit its capital structure. The Company may allow all or a portion of these swaps to lapse, enter into replacement swaps or settle these swaps prior to expiration. After entering into interest rate swaps, the Company had \$855.0 million (the majority of which was subject to a Libor floor of 1.00%) and \$908.9 million of variable-rate debt outstanding as of December 31, 2011 and 2010, respectively.

In February 2011, in connection with the refinancing of the senior secured credit facility, an interest rate swap with a notional amount of 262.9 million (\$354.6 million based on the exchange rate in effect on the date of the payment) was terminated resulting in a

payment of 10.8 million (\$14.6 million based on the exchange rate in effect on the date of the payment).

Cash Flow Hedges

In October 2010 and January 2011, the Company entered into foreign currency forward contracts to manage its exposure to fluctuations in currency rates on cash flows on certain forecasted sales denominated in currencies other than the functional currency of legal entities in its Specialty Chemicals segment and Titanium Dioxide Pigments segment. These foreign currency forward contracts hedged the exposure to movements in foreign exchange rates for forecasted transactions that expired in December 2011. As a result, there were no notional amounts outstanding for foreign currency forward contracts as of December 31, 2011. As of December 31, 2010, the Company had notional amounts outstanding for foreign currency forward contracts of \$12.5 million for its Specialty Chemicals segment. The instruments were designated as foreign exchange cash flow hedges and were effective at generating offsetting changes in the cash flows of the hedged item or transaction.

Net Investment Hedges

The Company designated a portion of its Euro-denominated debt that is recorded on its U.S. books as a net investment hedge of its Euro-denominated investments (Euro debt of 14.1 million at December 31, 2011; \$18.3 million). As a result, any foreign currency gains and losses resulting from the Euro-denominated debt discussed above are accounted for as a component of accumulated other comprehensive income.

The following table provides the fair value and balance sheet location of the Company's derivative instruments as of December 31, 2011 and 2010:

(\$ in millions)	Balance Sheet Location	Liability Derivatives Fair Value as of December 31,	
		2011	2010
Derivatives Designated as Hedging Instruments:			
Foreign exchange contracts	Accrued expenses and other current liabilities	\$	\$ 0.5

The Company follows a fair value measurement hierarchy to measure assets and liabilities. As of December 31, 2011 and 2010, the assets and liabilities measured at fair value on a recurring basis are derivatives, cash equivalents and government debt securities. In addition, the Company measures its pension plan assets at fair value (see Item 8. Financial Statements and Supplementary Data - Note 14, Employee Benefit Plans for further details). The Company's financial assets and liabilities are measured using inputs from the three levels of the fair value hierarchy as follows:

Level 1 Inputs are unadjusted quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. The fair values of money market funds are based on unadjusted quoted market prices from various financial information service providers and securities exchanges.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Level 2 Inputs are directly or indirectly observable, which include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means. The fair values of derivatives are based on quoted market prices from various banks for similar instruments. The valuation of these instruments reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including forward curves.

Level 3 Inputs are unobservable inputs that are used to measure fair value to the extent observable inputs are not available. The Company does not have any financial assets or liabilities that are classified as Level 3 inputs as of December 31, 2011 or 2010.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In accordance with the fair value hierarchy, the following table provides the fair value of the Company's financial assets and liabilities that are required to be measured at fair value as of December 31, 2011 and 2010:

(\$ in millions)	Fair Value Measurements					
	As of December 31, 2011			As of December 31, 2010

Liabilities						
Interest rate swaps	\$ 2.2	\$	\$ 2.2	\$ 19.5	\$	\$ 19.5
Foreign exchange contracts	\$	\$	\$	0.5	\$	0.5
Total liabilities at fair value	\$ 2.2	\$	\$ 2.2	\$ 20.0	\$	\$ 20.0

Debt

The Company estimates the fair value of its debt under the senior secured credit facilities and Titanium Dioxide Pigments venture facility agreement, based on current interest rates and terms, approximates carrying value. Based on quoted market values at December 31, 2011 and 2010, the Company estimates the fair value of its 2014 Notes approximated \$531.5 million and \$547.6 million, respectively. As of December 31, 2011 and 2010, the principal carrying amount of the 2014 Notes was \$524.1 million and \$534.7 million, respectively.

6. INVENTORIES:

Inventories are comprised of the following:

(\$ in millions)	December 31,	
	2011	2010
Raw materials	\$ 222.9	\$ 181.6
Work-in-process	88.9	79.9
Finished goods	355.3	272.6
Packaging materials	7.2	7.7
Total	\$ 674.3	\$ 541.8

7. PROPERTY, PLANT AND EQUIPMENT:

Property, plant and equipment, net is comprised of the following:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	December 31,			
		2011		2010
Land	\$	142.4	\$	151.7
Buildings and improvements, including land improvements		615.4		590.8
Machinery and equipment		1,618.1		1,480.9
Furniture and fixtures		132.3		120.6
Mining rights		86.3		86.3
Construction-in-progress		149.0		108.6
Property, plant and equipment, at cost		2,743.5		2,538.9
Less accumulated depreciation and amortization		(1,125.0)		(972.0)
Property, plant and equipment, net	\$	1,618.5	\$	1,566.9

Depreciation expense was \$189.9 million, \$179.1 million and \$194.0 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In addition, property, plant and equipment at December 31, 2011 and 2010 includes items recorded under capital leases as follows:

(\$ in millions)	December 31,	
	2011	2010
Buildings and improvements, including land improvements	\$ 47.0	\$ 48.5
Machinery and equipment	2.8	2.9
Furniture and fixtures	6.2	5.9
	56.0	57.3
Accumulated depreciation	(17.4)	(15.5)
Total	\$ 38.6	\$ 41.8

At December 31, 2011, minimum payments due under capital leases are as follows:

(\$ in millions)	
Years ended December 31:	
2012	\$ 5.2
2013	4.8
2014	4.7
2015	4.3
2016	4.3
Thereafter	23.4
	46.7
Less: Amount representing interest	11.3
	\$ 35.4

8. GOODWILL:

Below are goodwill balances and activity by segment:

(\$ in millions)	Specialty Chemicals		Advanced Ceramics		Total
Balance, December 31, 2009	\$	661.7	\$	277.5	\$ 939.2
Foreign exchange		(43.2)		(18.9)	(62.1)
Balance, December 31, 2010		618.5		258.6	877.1
Foreign exchange		(18.3)		(9.2)	(27.5)
Balance, December 31, 2011	\$	600.2	\$	249.4	\$ 849.6

The gross amount of goodwill as of December 31, 2011, 2010 and 2009 was \$1,567.1 million, \$1,594.6 million and \$1,656.7 million, respectively. The Company has accumulated impairment charges of \$717.5 million as of December 31, 2011, 2010 and 2009 which relates to the goodwill impairment charge recorded in the fourth quarter of 2008 in the Performance Additives and Titanium Dioxide Pigments segments.

9. OTHER INTANGIBLE ASSETS, NET:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	As of December 31, 2011			As of December 31, 2010		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Patents and other intellectual property	\$ 363.7	\$ (178.0)	\$ 185.7	\$ 369.5	\$ (154.2)	\$ 215.3
Trade names and trademarks	127.7	(42.2)	85.5	131.4	(37.2)	94.2

Amortization of other intangible assets was \$77.3 million, \$76.8 million and \$80.2 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Estimated amortization expense for each of the five succeeding fiscal years is as follows:

(\$ in millions) Year ending	Amortization Expense
2012	\$ 72.2
2013	69.4
2014	62.7
2015	54.9
2016	51.9

10. LONG-TERM DEBT:

Long-term debt and loans payable are summarized as follows:

(\$ and in millions)	December 31,	
	2011	2010
Senior secured credit facilities - term loans	\$ 845.8	\$ 1,260.0
2014 Notes (250.1 and \$200.0)	524.1	534.7
Titanium Dioxide Pigments venture term loans (195.0 and 220.0, respectively)	252.7	294.4
Capitalized lease obligations	35.4	39.4
Other loans	29.7	32.5
	1,687.7	2,161.0
Less current maturities (a)	(250.5)	(465.7)
	\$ 1,437.2	\$ 1,695.3

(a) Includes \$187.2 million of debt with an original maturity date of 2014 expected to be repaid in connection with the issuance of a new tranche of term loan A under its existing credit facility.

Maturities of long-term debt, including the impact of the February 2012 refinancing discussed below, are as follows:

(\$ in millions)	
2012	\$ 250.5
2013	256.5
2014	47.3
2015	47.0
2016	47.2
Thereafter	1,039.2
	\$ 1,687.7

Senior Secured Credit Facilities

On February 10, 2011, the Company completed a refinancing of its senior secured credit facility and entered into a new senior secured credit agreement comprised of an \$850.0 million term loan and a \$180.0 million revolving credit facility, and repaid \$408.9 million of existing term loans. In addition, on February 22, 2012, the Company issued a new tranche of term loan A under its existing senior secured credit facility in the amount of \$350.0 million and expects to use the proceeds along with cash on hand to redeem all of its outstanding senior subordinated notes (2014 Notes) and to pay accrued and unpaid interest and applicable redemption premiums. See Item 8. Financial Statements and Supplementary Data - Note 20, Subsequent Events, for further details.

a) Structure

As of December 31, 2011, the senior secured credit agreement consists of a term loan in an aggregate principal amount of \$845.8 million, maturing on February 10, 2018 and a revolving credit facility in an aggregate principal amount of \$180.0 million, made available in U.S. dollars, Euros and/or pounds sterling, maturing on February 10, 2016.

b) Availability

Under the senior secured credit agreement, the Company may, under certain circumstances and subject to receipt of additional commitments from existing lenders or other eligible institutions, request that the term loan be increased by up to \$350.0 million, and additional amounts, subject to a senior secured leverage ratio. As of December 31, 2011, the Company had no outstanding borrowings under this revolving credit facility, and had \$31.4 million of letters of credit issued on its behalf.

Amounts borrowed under the term loan that are repaid or prepaid may not be reborrowed.

c) Interest and Fees

The term loan bears interest at Libor (subject to a Libor floor of 1.00%) plus 2.75% (with a 0.25% reduction for achieving a designated leverage ratio). Borrowings from the revolving credit facility bear interest at Libor (subject to a Libor floor of 1.00%) plus 2.75%.

The Company may elect interest periods of one, two, three or six months (nine or twelve months to the extent available from all lenders under the revolving credit facility) for Libor borrowings. Interest is payable at the end of each interest period and, in any event, at least every three months. The senior secured credit facility requires payment of customary commitment, letter of credit and other fees.

d) Guarantees; Security

Obligations under the senior secured credit facilities are guaranteed by Rockwood Specialties International, Inc. and each of Rockwood Specialties Group Inc. s (Group) existing and subsequently acquired or organized direct or indirect domestic subsidiaries, subject to certain exceptions, and are secured by first-priority security interests in: substantially all the tangible and intangible assets of Group and its direct or indirect domestic subsidiaries, subject to exceptions; all the capital stock of or other equity interest in Group and each of its direct or indirect domestic subsidiaries; a maximum of 65% of the capital stock of or other equity interests in each direct foreign subsidiary of either Group or of any domestic subsidiary of Group.

e) Amortization and Prepayments

The term loan is payable in February and August of each year at an amount equal to 0.50% of the original principal amount outstanding, with the remainder due at the final maturity date.

The Company is required to make the following mandatory prepayments of the term loan under the senior secured credit facility, in each case subject to certain exceptions, with:

- 100% of the net cash proceeds of all sales of assets or other dispositions by the Company or any of its restricted subsidiaries under the senior secured credit facilities of assets other than net cash proceeds (a) from the sale or other disposition of assets in the ordinary course of business, (b) of certain disposals permitted under the senior secured credit agreement (including the proceeds of sales or transfers of accounts receivable (including pursuant to a securitization) in the amount of up to \$200.0 million at any time) or (c) that are reinvested in the Company and its restricted subsidiaries within twelve months of the sale or other disposition (subject to extension in certain circumstances).
- 100% of the net cash proceeds of issuances of certain debt obligations.
- 50% of excess cash flows, as defined, in respect of any fiscal year at the end of which the senior secured debt to consolidated EBITDA ratio is equal to or greater than 1.50 to 1, reduced by any amounts reinvested during the first six months of the following year and voluntary prepayments and 25% and 0% of excess cash flow, in respect of any fiscal year at the end of which such ratio is greater than 1.25 to 1 but less than 1.50 to 1 and less than or equal to 1.25 to 1, respectively.

f) Financial Covenants

The senior secured credit agreement contains the following financial covenants:

- a consolidated net senior secured debt to consolidated Adjusted EBITDA test;
- a consolidated Adjusted EBITDA to consolidated cash interest expense test; and
- limitations on capital expenditures.

For purposes of calculating compliance with the financial covenants as of any date, foreign currency denominated indebtedness is to be converted to U.S. dollars based on average exchange rates for the twelve-month period ending on such date. In addition to the financial covenants described above, the Company's senior secured credit agreement contains various affirmative and restrictive covenants. The restrictive covenants limit the Company's ability to, among other things, incur indebtedness and other liabilities; create liens; merge or consolidate; dispose of assets; make investments; pay dividends and make payments to shareholders; make payments on certain indebtedness or to amend documents related to certain indebtedness and to enter into sale leaseback transactions. The senior secured debt to consolidated Adjusted EBITDA ratio covenant cannot exceed 2.75 to 1 on the last day of any fiscal quarter and the interest coverage ratio covenant cannot be less than 2.50 to 1 on the last day of any fiscal quarter.

2014 Notes In November 2004, the Company issued 375.0 million aggregate principal amount of 7.625% senior subordinated notes and \$200.0 million aggregate principal amount of 7.500% senior subordinated notes, both due in 2014. As of December 31, 2011, the 2014 Notes had an aggregate principal amount of 250.1 million (\$324.2 million) in the case of the Euro notes and \$200.0 million in the case of the U.S. Dollar notes. The 2014 Notes are *pari passu* to future senior subordinated indebtedness and junior to all of Group's existing and future senior indebtedness. The 2014 Notes are guaranteed on a senior subordinated unsecured basis by certain of the Company's domestic subsidiaries. As noted above, the Company issued a new tranche of term loan A under its existing senior secured credit facility in the amount of \$350.0 million and intends to use the proceeds along with cash on hand to redeem all of its outstanding senior subordinated notes, accrued and unpaid interest and applicable redemption premiums. See Item 8. Financial Statements and Supplementary Data - Note 20, Subsequent Events, for further details.

Titanium Dioxide Pigments venture term loans and revolving credit facility As of December 31, 2011, the Titanium Dioxide Pigments venture had 195.0 million (\$252.7 million) outstanding under the term loans of its facility agreement. The facility also provides for a revolving credit facility of 30.0 million (\$38.9 million). This facility provided for additional borrowings of up to 12.9 million (\$16.7 million) as of December 31, 2011 after an outstanding bank guarantee of 17.1 million (\$22.2 million) related to a defined benefit pension obligation. In January 2012, this bank guarantee was increased to 25.5 million (\$33.1 million). Both the term loan and revolving credit facility mature in June 2013.

As of December 31, 2011, the interest rate on the term loan and revolving credit facility is Euribor (or Libor if the currency is in USD) plus 1.00%, subject to an adjustment determined by reference to a leverage ratio test. The term loan is payable in installments over a five-year period from the date of the facility agreement, with payments that commenced twelve months from such date and the remainder due at the final maturity date. The term loan and revolving credit facility may be repaid in advance without penalty.

The facility agreement contains affirmative and restrictive covenants, subject to certain thresholds and exceptions. The restrictive covenants limit the venture's ability to undertake certain actions, including but not limited to acquiring or disposing of assets, creating liens on assets, entering into a merger or corporate restructuring, and incurring additional indebtedness. These covenants are calculated in accordance with International Financial Reporting Standards and are based solely on the results of the venture's European operations.

The facility agreement requires the venture to meet certain financial covenants, including:

- a net debt to EBITDA (which is substantially similar to the definition of Adjusted EBITDA in the Company's senior secured credit agreement) test;
- an EBITDA to cash interest expense test; and
- a cash generated for financing activities to debt service test.

The Company was in compliance with the above covenants as of December 31, 2011.

The loans are secured by the assets of the venture. In the event that either Kemira's or Rockwood's ownership interest changes, any lender may cancel its commitment and demand repayment of its respective portion of the loans, including accrued and unpaid interest. The facility agreement contains customary events of default, subject to remedy periods, thresholds and exceptions. Upon the

occurrence of an event of default under the facility agreement, the lenders can terminate the commitments and declare all amounts, including accrued and unpaid interest, to be due and payable.

Other loans The Company has Euro-denominated loan facilities that provide aggregate outstanding borrowings of approximately 6.2 million (\$8.1 million) as of December 31, 2011. These loans mature between 2012 and 2024 and bear annual interest rates ranging up to 5.22%. In addition, the Company has loan facilities denominated in Chinese Renminbi providing for borrowings of an aggregate U.S. dollar equivalent amount of \$9.2 million as of December 31, 2011. These loans mature in 2012 and bear annual interest rates of 4.78%. The loan facilities described above contain customary events of default and some of them are secured by mortgages or accounts receivable. The Titanium Dioxide Pigments venture has other debt of 9.6 million (\$12.4 million), primarily due to a defined benefit plan, at interest rates ranging from 3.60% to 5.00%.

As of December 31, 2011, the weighted average interest rate for the Company was 4.8%, excluding deferred financing costs and the mark-to-market valuation of its interest rate swaps.

11. INCOME TAXES:

Income (loss) from continuing operations before income taxes is as follows:

(\$ in millions)	Year Ended December 31,		
	2011	2010	2009
United States	\$ 38.8	\$ (19.0)	\$ (80.3)
Foreign	417.3	223.5	90.5
	\$ 456.1	\$ 204.5	\$ 10.2

The provision (benefit) for taxes on income (loss) consisted of the following:

(\$ in millions)	Year Ended December 31,		
	2011	2010	2009
Current income tax expense:			
Federal	\$ 0.3	\$ (3.8)	\$ 0.1
State	0.5	(0.8)	0.3
Foreign	97.3	41.2	29.7
	98.1	36.6	30.1

State		(0.3)	(0.3)
		(7.6)	(6.8)

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Allocation from other comprehensive income:					
Federal				(0.4)	(1.4)
Total provision (benefit) for taxes	\$	124.4	\$	(24.6)	\$ 9.7

Changes in tax rates impact the tax provision (benefit) in the year a rate change is enacted.

The income tax provision from continuing operations reflects an allocation of a tax benefit of \$8.0 million and \$8.2 million for the years ended December 31, 2010 and 2009, respectively, from discontinued operations and other comprehensive income (OCI) in accordance with the Company s policy disclosed in Note 1, Basis of Presentation and Significant Accounting Policies.

Deferred income taxes are provided for the effects of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes. The deferred tax assets and liabilities are determined by applying the enacted tax rate in the year in which the temporary difference is expected to reverse.

The tax effects of the major items recorded as deferred tax assets and liabilities are as follows:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	December 31,	
	2011	2010

Reconciliations of the U.S. statutory income tax rate to the effective tax rate are as follows:

	Year Ended December 31,		
	2011	2010	2009
Federal statutory rate	35.0%	35.0%	35.0%
State taxes, net of federal effect		(1.4)	1.4
Foreign/U.S. tax differential	(5.5)	(14.8)	(114.5)
Goodwill	(0.8)	(1.4)	3.3
Capital loss	(19.3)		
Basis difference	(3.9)		
Increase (decrease) in valuation allowance	22.2	(26.4)	383.9
Debt instruments		4.0	(145.1)
Allocation from discontinued operations/OCI		(3.8)	(77.6)
Noncontrolling interest	0.3	1.1	3.7
Foreign tax rate increases	0.3	0.2	1.2
Other	(1.0)	(4.5)	3.8
Effective tax rate	27.3%	(12.0)%	95.1%

In 2011, the effective tax rate was positively impacted by domestic income which was not tax effected as a result of the Company's valuation allowance policy and beneficial geographic earnings mix. The effective tax rate was also impacted as a result of a tax election, made at the end of 2011 related to a non-U.S. subsidiary where the Company recognized a taxable capital loss of \$251.9 million and an increase to its deferred tax assets of \$17.8 million related to the difference between the tax and book basis of the entity's assets. The effect of both the capital loss and the deferred tax asset recognition was offset by an increase in the valuation allowance.

In 2010, the effective tax rate was positively impacted by the reversal of \$76.5 million of valuation allowances related to net operating losses that were expected to be utilized as a result of the sale of the plastic compounding business in January 2011. A portion of this reversal is

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

reflected in state taxes in the above table. Excluding this benefit, the effective tax rate would have been 25.4%. The effective tax rate was negatively impacted by domestic tax losses which are not tax effected as a result of a valuation allowance and was positively impacted by an allocation of tax benefits to continuing operations, as well as a geographic earnings mix.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

In 2009, the effective tax rate was negatively impacted by domestic tax losses which are not tax effected as a result of a full valuation allowance and was positively impacted by a nonrecurring tax benefit in respect of debt related foreign currency changes, an allocation of tax benefits to continuing operations and geographic earnings mix.

The Company's U.S. operations are included in a consolidated federal income tax return.

As of December 31, 2011, the Company has U.S. federal and foreign corporate tax loss carryforwards (excluding state and local amounts) of approximately \$447.6 million, of which \$14.3 million expire through 2016, \$345.9 million expire through 2031 and \$87.4 million which have no current expiration date. Additionally, the Company has \$15.0 million of federal capital loss carryforwards which expire through 2016. With respect to state and local tax loss carryforwards, the Company has approximately \$7.2 million that expire through 2021, \$64.7 million that expire through 2026, and \$209.0 million expiring in years through 2032. The state capital loss carryforwards of \$73.6 million expire through 2016.

The worldwide valuation allowance increased by \$100.7 million to \$181.8 million at December 31, 2011 to reserve for an increase in deferred tax assets which resulted from net operating losses and capital losses that more likely than not, will not be realized.

The valuation allowance as of December 31, 2010 and 2009 is attributable to deferred tax assets related to certain items, such as tax loss carryforwards in the United States, including certain states, China and other foreign countries for which it is more likely than not that the related tax benefits will not be realized.

A table reflecting the activity in the valuation allowance is as follows:

(\$ in millions)	Year Ended December 31,		
	2011	2010	2009
Balance, January 1	\$ 81.1	\$ 140.5	\$ 92.7
Increase (decrease) as reflected in income tax expense	97.7	(59.6)	34.0
Other	3.0	0.2	13.8
Balance, December 31	\$ 181.8	\$ 81.1	\$ 140.5

At December 31, 2011, the Company had undistributed foreign earnings of \$843.2 million which the Company intends to be permanently reinvested. The Company has determined that it is not practicable to compute a deferred tax liability for foreign withholding taxes or U.S. income taxes on these earnings. In accordance with the indefinite reversal criteria, the foreign currency gains recorded in other comprehensive income related to intercompany debt and foreign currency translation have not been tax effected.

The Company records liabilities for potential assessments in various tax jurisdictions. The liabilities relate to tax return positions which, although supportable by the Company, may be challenged by the tax authorities. The Company adjusts these liabilities as a result of changes in tax legislation, interpretations of laws by Courts, rulings by tax authorities, changes in estimates and the closing of the statute of limitations. The Company's effective tax rate in any given year includes the impact of any changes to these liabilities. Favorable resolution of an issue would generally be recognized as a reduction to the Company's annual tax rate.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The Company has classified uncertain tax positions as non-current income tax liabilities (other liabilities) unless expected to be paid within one year. As of December 31, 2011, the total amount of unrecognized tax benefits was \$30.1 million. A reconciliation of the beginning and ending balances of the total amounts of unrecognized tax benefits, which excludes interest and penalties, is as follows:

(\$ in millions)	2011		2010		2009	
Unrecognized tax benefits at January 1	\$	25.5	\$	39.1	\$	40.9
Increases in tax positions for prior years		1.6		1.4		0.9
Decreases in tax positions for prior years		(0.1)		(1.9)		(1.7)
Increases in tax positions for the current year		6.3		1.3		0.8
Decreases due to settlements with taxing authorities		(1.2)		(9.8)		(0.5)
Lapse in statute of limitations		(1.7)		(3.0)		(1.9)
Foreign exchange		(0.3)		(1.6)		0.6
Unrecognized tax benefits at December 31	\$	30.1	\$	25.5	\$	39.1

The Company recognizes interest and penalties related to unrecognized tax benefits in its income tax provision. The Company

reversed interest and penalties of \$0.5 million in 2011 and accrued interest and penalties of \$1.1 million and \$0.9 million in 2010 and 2009, respectively. The Company had liabilities accrued of \$8.0 million, \$8.6 million and \$7.9 million for interest and penalties as of December 31, 2011, 2010 and 2009, respectively.

In accordance with the Company's policy, where tax losses can be carried back or forward to offset liabilities for uncertain tax benefits, deferred tax assets associated with such tax losses are netted against liabilities for such uncertain tax benefits. This policy results in a \$14.6 million and \$11.4 million reduction in both liabilities and deferred tax assets for 2011 and 2010, respectively. The Company has recorded unrecognized tax benefits, net of deferred tax assets, of \$15.5 million and \$14.1 million as of December 31, 2011 and 2010, respectively.

Included in the balance of unrecognized tax benefits as of December 31, 2011, 2010, and 2009, are \$15.5 million, \$14.1 million and \$19.8 million, respectively, of tax benefits that, if recognized, would affect the effective tax rate. Also included in the balance of unrecognized tax benefits as of December 31, 2011, 2010, and 2009, are \$14.6 million, \$11.4 million and \$19.3 million respectively, of tax benefits that, if recognized, would result in adjustments to deferred taxes.

The Company is currently under audit in certain jurisdictions and during the next twelve months, it is reasonably possible that resolution of these audits could result in a benefit of up to \$2.1 million or a cost of up to \$4.0 million. Audit outcomes and the timing of audit settlements are subject to significant uncertainty.

The Company is subject to taxation in the U.S., various states, and foreign jurisdictions. The Company's tax filings in its major jurisdictions are open to investigation by tax authorities; in the U.S. from 2007, in the U.K. from 2010 and in Germany from 2005.

12. OPERATING LEASE OBLIGATIONS:

The following is a schedule of minimum future rentals under the terms of noncancelable operating leases as of December 31, 2011:

(\$ in millions)		
Years ended December 31:		
2012	\$	18.3
2013		13.2
2014		9.5
2015		6.8
2016		5.2
Thereafter		9.3
Total	\$	62.3

Rent expense under all operating leases was \$29.0 million, \$28.4 million and \$27.9 million for the years ended December 31, 2011, 2010 and 2009, respectively. Rent escalations and other lease concessions are reflected on a straight-line basis over the minimum lease term. Minimum future rentals include the effect of any index or rate that was applicable at lease inception.

13. STOCK-BASED COMPENSATION:

The aggregate compensation cost for stock options, restricted stock units and Board of Director stock grants, as discussed below, caused income from continuing operations before taxes to decrease by \$12.6 million, \$13.9 million and \$4.7 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Restricted Stock Restricted stock of the Company can be granted with or without payment of consideration with restrictions on the recipient's right to transfer or sell the stock.

Performance-based restricted stock units. Prior to 2010, the Company granted performance-based restricted stock unit awards to its management and key employees. Certain employees had company-wide performance targets, for which vesting was based on the achievement of specified Adjusted EBITDA and earnings per share levels, while others had divisional performance targets for which vesting was based on a particular division's achievement of Adjusted EBITDA performance. The Company granted a target amount of performance restricted stock units, whereby if the specified performance target was met, shares of the Company's common stock would be awarded upon vesting of these units. However, these awards provided the employee with the possibility of earning from 0% to 200% of the targeted amounts granted based upon performance.

In December 2009, the Company approved 233,657 performance restricted stock units to be awarded to management and key employees which will vest on December 31, 2012 as long as the employee continues to be employed by the Company on this date and upon the achievement of certain performance targets approved by the Compensation Committee. The number of shares of the Company's common stock ultimately awarded upon vesting is determined based on the achievement of specified performance criteria over the period January 1, 2010 through December 31, 2010. However, the Company did not recognize any compensation cost in 2009 for this issuance because the performance targets that formed the basis for vesting of these restricted stock units were not approved until January 2010. For this December 2009 grant, the applicable performance targets were achieved, and as a result, 447,728 shares will vest as long as the employees continue to be employed by the Company on December 31, 2012.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Time-based restricted stock units. Prior to 2010, the Company granted time-based restricted stock unit awards to its management and key employees. In December 2009, the Company granted 127,375 time restricted stock units to management and key employees, which will vest on December 31, 2012 as long as the employee continues to be employed by the Company on such date.

Market-based restricted stock units. In December 2011 and 2010, the Company approved 257,440 and 263,055, respectively, of market-based restricted stock unit awards to its management and key employees which will vest on January 1, 2015 and 2014, respectively, as long as the employee continues to be employed by the Company on this date and upon the achievement of certain performance targets approved by the Compensation Committee. For the December 2011 awards, a portion of the share units vest based on the percentage change in the price of the Company's common stock over the award period January 1, 2012 to December 31, 2014. The remaining portion vest based upon the Company's total shareholder return as compared to the total shareholder return for the DOW Jones U.S. Chemical Index for the period January 1, 2012 to December 31, 2014. For the December 2010 awards, a portion of the share units vest based on the percentage change in the price of the Company's common stock over the award period January 1, 2011 to December 31, 2013. The remaining portion vest based upon the Company's total shareholder return as compared to the total shareholder return for the DOW Jones U.S. Chemical Index for the period January 1, 2011 to December 31, 2013. The Company specified a target amount of market-based restricted stock units, whereby if the specified performance target is met, shares of the Company's common stock would be awarded upon vesting of these units. However, these awards provide the employee with the possibility of earning from 0% to 150% of the targeted amounts granted based upon performance.

The Company did not recognize any compensation cost in 2011 for the awards issued in December 2011 because the performance targets that will form the basis for vesting of these restricted stock units were not available as of December 31, 2011. These performance targets were set and granted in January 2012. The fair value of these market-based restricted stock units was estimated on the date of grant using a Monte Carlo simulation model as they are tied to market conditions. The model utilizes multiple input variables that determine the probability of satisfying each market condition stipulated in the grant and calculates the fair value for the awards. The fair value of market-based restricted stock units awarded in the years ended December 31, 2011 and 2010 used the assumptions noted in the following table:

	Year ended December 31,	
	2011	2010
Expected volatility	67%	81%
Risk-free rate	0.4%	1.1%
Expected dividends	N/A	N/A

The compensation cost related to restricted stock units of the Company caused income from continuing operations before taxes to decrease by \$9.5 million and \$8.7 million for the years ended December 31, 2011 and 2010, respectively. The total tax benefit recognized related to restricted stock was \$1.0 million and \$1.1 million for the years ended December 31, 2011 and 2010. With regard to our performance-based restricted stock units, the Company reversed previously recorded expense in 2009 related to performance targets that were no longer probable of being achieved. As a result, the net effect of compensation cost related to restricted stock units caused income from continuing operations to increase by \$0.6 million for the year ended December 31, 2009. A tax expense of \$0.1 million was recorded for the year ended December 31, 2009. The weighted average grant date fair value of the restricted shares granted in 2011, 2010 and 2009 were \$37.46, \$38.02 and \$10.40, respectively, per stock unit. As of December 31, 2011, there was \$22.0 million of unrecognized compensation cost related to restricted stock units, which is expected to be recognized over a weighted-average period of approximately 2.4 years. The total tax benefit realized from restricted stock units vesting was \$1.7 million for the year ended December 31, 2011.

A summary of the status of the Company's nonvested restricted stock units granted pursuant to the Plan at December 31, 2011 and 2010 and changes during the year ended December 31, 2011 is presented below:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

	Shares (000)		Weighted Average Fair Value
Nonvested at December 31, 2010	1,275	\$	24.09
Granted	478		37.46
Vested	(558)		11.11
Cancelled	(117)		30.69
Nonvested at December 31, 2011	1,078	\$	36.02

Board of Directors Stock Grant The Company granted 10,608 shares of its common stock to its directors during the year ended December 31, 2011. Compensation cost related to the directors' stock grant caused income from continuing operations before taxes and net income to decrease by \$0.5 million for each of the years ended December 31, 2011, 2010 and 2009.

Stock Options Stock options granted to employees under the Plan shall have an exercise price at least equal to the fair market value of the Company's common stock on the date of grant. The Company did not grant any stock options to directors or employees in 2011 and 2010.

Time-Based Stock Options. Time options granted in 2004 or prior years have a life of ten years from the date of grant and are fully vested. Time options granted after 2004 typically have a life of seven years and vest in three equal annual installments on each of the first three anniversaries of December 31 of the year granted. The Company did not grant any stock options in 2011 and 2010. The compensation expense recorded in 2011 primarily relates to stock options granted in 2009 and 2008.

The compensation cost related to stock options of the Company caused income from continuing operations before taxes to decrease by \$2.6 million, \$4.7 million and \$4.8 million in the years ended December 31, 2011, 2010 and 2009, respectively. The total tax benefit recognized related to stock options was \$0.2 million, \$0.3 million and \$0.5 million in the years ended December 31, 2011, 2010 and 2009, respectively.

As of December 31, 2011, there was \$0.4 million of unrecognized compensation cost related to nonvested stock options, which is expected to be recognized over a weighted-average period of approximately 1.0 year.

The weighted-average fair value of options granted during the years ended December 31, 2009 was \$13.13. The fair value of stock options granted in the years ended December 31, 2009 are estimated on the date of grant using the Black-Scholes option pricing model that used the assumptions noted in the following table:

	Year ended December 31, 2009
Expected term (in years)	4.5
Expected volatility	68%
Risk-free rate	2.3%
Expected dividends	N/A

The expected term represents the period of time that options granted are expected to be outstanding based on the simplified method for determining the expected term of an employee share option. The Company did not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term. As a result, the Company's expected term was based on the simplified method. The expected volatility for awards granted in December 2009 is based on historical share prices of the Company since it became a public company. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant. The Company did not consider dividends in its calculation of fair value on the date of grant as the Company did not expect to pay dividends.

In addition, the recognition of expense only occurs for awards that are expected to eventually vest. This requires pre-vesting forfeitures to be estimated at the time of grant and modified, if necessary, if actual forfeitures differ from estimated forfeitures. The Company's forfeiture rates are based upon historical share-based equity award cancellations.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The total intrinsic value of stock options exercised during the years ended December 31, 2011, 2010 and 2009 was \$32.5 million, \$25.2 million and \$0.4 million, respectively. Cash received from option exercises during 2011, 2010 and 2009 was \$14.4 million, \$26.9 million and \$1.0 million, respectively. The total tax benefit realized from options exercised was \$2.3 million and \$1.8 million for the years ended December 31, 2011 and 2010, respectively. The total fair value of shares vested during the years ended December 31, 2011, 2010 and 2009 was \$2.8 million, \$4.2 million and \$7.0 million, respectively.

During 2011, the Company accelerated the vesting of 59,547 share options held by employees of the former plastic compounding business sold in January 2011. As a result of the modifications, the Company recognized additional expense of \$2.1 million, included in income from discontinued operations, for the year ended December 31, 2011.

A summary of the status of the Company's options granted pursuant to the Plan at December 31, 2011 and 2010 and changes during the year ended December 31, 2011 is presented below:

	Shares ('000)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (\$ in millions)
Outstanding at December 31, 2010	3,607	\$ 18.43		
Exercised	(1,085)	17.32		
Forfeited	(15)	14.61		
Outstanding at December 31, 2011	2,507	\$ 18.94	3.3	\$ 51.2
Options vested at December 31, 2011 and expected to vest in the future (a)	2,501	\$ 18.94	3.3	\$ 51.1
Options exercisable at December 31, 2011	2,376	\$ 18.84	3.3	\$ 48.8

(a) The number of options expected to vest takes into account an estimate of expected forfeitures.

14. EMPLOYEE BENEFIT PLANS:

The Company maintains various defined benefit pension plans, which cover certain employees in the U.S., U.K., Germany, Finland and other countries. In Germany, plan obligations include the provision of postretirement benefits covering private health insurance premiums. Two U.S. subsidiaries provide certain retirees with healthcare and life insurance.

Funding requirements and investment policies for the Company's various defined benefit plans are governed by local statutes and fiduciary standards outlined below.

The following tables summarize the benefit obligations, plan assets and the funded status of the pension plans, along with the amounts recognized in the Consolidated Balance Sheets and the weighted average assumptions used.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
	2011	2010	2011	2010
<i>Change in benefit obligation:</i>				
Benefit obligation at beginning of year	\$ 35.6	\$ 32.2	\$ 640.5	\$ 657.7
Service cost	0.2	0.2	8.7	7.5
Interest cost	1.8	1.9	31.8	31.6
Actuarial loss	6.6	2.5	41.9	13.2
Benefits paid	(1.0)	(1.2)	(34.5)	(32.0)
Foreign exchange gain			(20.2)	(38.2)
Other			0.5	0.7
Benefit obligation at end of year	\$ 43.2	\$ 35.6	\$ 668.7	\$ 640.5
<i>Change in fair value of plan assets:</i>				
Fair value of plan assets at beginning of year	\$ 26.0	\$ 23.4	\$ 233.8	\$ 237.9
Actual return on assets	0.6	2.6	0.4	17.1
Employer contributions	1.5	1.2	6.4	4.8
Benefits paid from fund	(1.0)	(1.2)	(16.5)	(14.3)
Foreign exchange loss			(4.2)	(12.4)
Other			0.1	0.7
Fair value of plan assets at end of year	\$ 27.1	\$ 26.0	\$ 220.0	\$ 233.8
Funded status (a)	\$ (16.1)	\$ (9.6)	\$ (448.7)	\$ (406.7)
<i>Amounts recognized in the consolidated balance sheets:</i>				
Current liabilities	\$	\$	\$ (13.2)	\$ (12.9)
Noncurrent liabilities (b)	(16.1)	(9.6)	(435.5)	(393.8)
Net amount recognized	\$ (16.1)	\$ (9.6)	\$ (448.7)	\$ (406.7)
<i>Amounts recognized in accumulated other comprehensive income:</i>				
Net actuarial losses	\$ 17.6	\$ 10.2	\$ 104.9	\$ 53.0
Prior service cost			5.4	6.2
Accumulated other comprehensive loss	\$ 17.6	\$ 10.2	\$ 110.3	\$ 59.2
Accumulated benefit obligation	\$ 43.2	\$ 35.6	\$ 637.2	\$ 608.3
<i>Weighted-average assumptions used to determine benefit obligations at December 31:</i>				
Discount rate	4.18%	5.29%	4.50%	4.92%
Rate of compensation increase	N/A	N/A	3.05%	3.06%

(a) The Company's overall unfunded position in its defined benefit plans as of December 31, 2011 is \$464.8 million and the funded status of our plans is 35%. However, 76% of the Company's unfunded position is concentrated in plans mostly in Germany, where funding is neither legally required nor customary. When only the plans that have funding requirements are considered, the unfunded portion is \$113.4 million and the funded status is 67%. The funding of the Company's pension plans was in compliance with local requirements as of December 31, 2011.

(b) Balances include \$8.0 million and \$10.1 million as of December 31, 2011 and 2010, respectively, related to certain German defined benefit obligations which are reported as Other Liabilities in the Consolidated Balance Sheets. Balances do not include \$7.0 million and \$6.8 million as of December 31, 2011 and 2010, respectively, representing certain individually immaterial pension and postretirement medical benefit plans which are reported within Pension and Related Liabilities in the Consolidated Balance Sheets.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

(\$ in millions)	U.S. Plans			Non-U.S. Plans		
	2011	2010	2009	2011	2010	2009
<i>Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:</i>						
Discount rate	5.29%	5.89%	6.18%	4.92%	5.29%	6.02%
Expected return on plan assets (a)	7.99%	8.23%	8.28%	5.71%	5.49%	6.17%
Rate of compensation increase	N/A	N/A	N/A	3.06%	3.08%	3.13%
<i>Components of net pension benefit costs:</i>						
Service cost	\$ 0.2	\$ 0.2	\$ 0.2	\$ 8.7	\$ 7.5	\$ 8.3
Interest cost	1.8	1.9	1.8	31.8	31.6	33.4
Expected return on assets	(2.0)	(1.9)	(1.6)	(14.8)	(12.9)	(13.7)
Net amortization of actuarial losses	0.7	0.5	0.7		0.9	0.1
Amortization of prior service cost				1.0	0.6	
Other					0.4	1.2
Net periodic pension cost	0.7	0.7	1.1	26.7	28.1	29.3
Settlement/curtailment						(0.4)
Total pension cost	\$ 0.7	\$ 0.7	\$ 1.1	\$ 26.7	\$ 28.1	\$ 28.9

(a) The long-term rate of return on assets listed above is the average of expected returns developed for each plan weighted by each plan's assets, as of January 1 of the year measured. Rates of return have been estimated based on various asset-appropriate price and yield indices, adjusted for projected inflation and long-term dividend growth.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

(\$ in millions)	U.S. Plans		Non-U.S. Plans	
2012	\$	1.5	\$	32.4
2013		1.6		33.6
2014		1.9		35.9
2015		2.0		37.2
2016		2.1		38.3
Years 2017 - 2021		12.1		195.2
<i>Expected employer contributions to plan assets:</i>				
2012	\$	2.0	\$	5.4

Recognition of actuarial losses In 2012, the Company expects to recognize \$7.0 million of previously unrecognized actuarial losses.

Other postretirement benefits The Company had liabilities of \$5.1 million and \$4.3 million as of December 31, 2011 and 2010, respectively, related to other postretirement benefit plans reported as Pension and Related Liabilities in the Consolidated Balance Sheets. Related plan expenses were \$0.2 million, \$0.2 million and \$0.3 million in 2011, 2010 and 2009, respectively.

Plans with accumulated benefit obligations in excess of plan assets The Company's defined benefit plans all had accumulated benefit obligations in excess of plan assets.

Plans with projected benefit obligations in excess of plan assets The Company's defined benefit plans all had projected benefit obligations in excess of plan assets.

Contributions During the year ended December 31, 2011, the Company made contributions of approximately \$8.0 million to its defined benefit pension trusts and an additional \$18.1 million in benefit payments directly to plan participants. For 2012, the Company expects to make payments of approximately \$7.5 million as contributions to pension trusts plus benefit payments directly to plan participants of approximately \$18.1 million.

Investment policies and strategies The Company's plans have varying statutory and plan governance requirements. For example, U.K. plan investments are limited to listed securities not affiliated with the Company or the investment advisor and equities are divided between domestic and foreign equity. U.S. plan investments are generally limited to mutual funds. Although the Company has representatives of local management involved in the governance of all plans, some plans or statutes also have representation by workers, employee unions, and/or corporate-level executives.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Plans in Finland, the U.K. and the U.S. represent approximately 90% of total plan assets. In these countries, the general investment objectives are to maximize the expected return on the plans' assets without unduly prejudicing the security of the members' accrued benefits and with sufficient liquidity to meet current plan cash flow requirements. As each plan is locally governed, asset allocations may vary between plans. Most plans do not have fixed targets but vary their investment allocations based on plan trustees' consultation with professional investment advisors as to whether these allocations remain appropriate in light of relative investment performance and risk and/or actuarial changes related to plan participants. The following table presents the weighted-average of the plans' targeted investment allocations in 2011 as well as the actual weighted-average investment allocations as of December 31, 2011 and 2010:

	Target	U.S. Plans		Target	Non-U.S. Plans		
		2011	2010		2011	2010	
	%	1%		%	3%	8%	9%
Cash and cash equivalents							
Equity securities	61	56	57	36	40	36	
Fixed income	39	42	42	50	39	47	
Insurance contracts, real estate and other		1	1	11	13	8	

The following table presents the Company's plan assets using the fair value hierarchy as of December 31, 2011 and 2010. See Item 8. Financial Statements and Supplementary Data - Note 5, "Financial Instruments and Fair Value Measurements," for descriptions of the Company's fair value hierarchy levels. The Company does not have any employee benefit plan assets that are classified as Level 3 inputs as of December 31, 2011 or 2010.

(in millions)	As of December 31, 2011			As of December 31, 2010		
	Total	Level 1	Level 2	Total	Level 1	Level 2
Cash and cash equivalents	\$ 19.7	\$ 3.7	\$ 16.0	\$ 21.8	\$ 2.6	\$ 19.2
Equity securities:						
Domestic large-cap growth (a) (b)	5.3		5.3	8.3		8.3
International large-cap growth (a)	4.6	0.3	4.3	5.7	0.3	5.4
Other equity funds	77.5	2.6	74.9	84.4	2.8	81.6
Fixed income securities:						
Domestic government bonds (a) (b)	8.1	0.8	7.3	9.1		9.1
International government bonds (a)	8.6		8.6	5.2		5.2
Corporate bonds (a)	65.8	2.2	63.6	84.3	1.8	82.5
Plan sponsor	9.9		9.9	10.3		10.3
Other bond funds	17.7	3.9	13.8	11.8	3.8	8.0
Other investments:						
Insurance contracts	17.1		17.1	13.3		13.3
Real estate investment funds	9.6		9.6			
Other	3.2	0.1	3.1	5.6	0.1	5.5
Total	\$ 247.1	\$ 13.6	\$ 233.5	\$ 259.8	\$ 11.4	\$ 248.4

(a) Represents a direct investment or mutual pooled fund.

(b) Domestic refers to investments in the plan's home country. Most plan assets are located in Finland, the U.K., the U.S. or Germany.

Level 1

Direct investments in publicly traded equity and debt securities are valued at quoted market prices. Similarly, mutual funds are public investment vehicles valued at quoted market prices, which represent the net asset value (NAV) of the shares held.

Level 2

Most of the Company's Level 2 investments are funds valued at NAV provided by investment managers. Investments that do not meet the criteria for Level 1, but are redeemable at NAV within 90 days of the measurement date are classified as Level 2. Investments with longer time horizons for redemption are evaluated individually based on specific facts and circumstances with the rebuttable presumption that such investments should be classified as Level 3.

Direct investments in corporate and government bonds that are not actively traded are based on institutional bid evaluations using proprietary models. Commingled and proprietary funds are valued at unit or net asset values provided by investment managers, which are based on the fair value of the underlying investments utilizing public information, independent external valuation from third-party services, third-party advisors, or standard bond or other investment valuation models. Insurance contracts are valued as reported by the

issuer, typically either using cash surrender value - the amount a plan would receive if a contract was cashed out at year end - or based on the present value of the expected future cash flows. Participations in real estate funds are valued at net asset value as determined by the fund manager using directly and indirectly observable inputs including comparable asset values and lease-rental cash flows. The plan sponsor loan is valued at its principal amount, consistent with its valuation in Rockwood's consolidated financial statements.

Other Retirement Benefit Plans

Savings Plans The Company sponsors various defined contribution plans for certain employees. Contributions under the plans are based on specified percentages of employee compensation. In aggregate, the Company's contributions to these plans were \$13.1 million, \$12.7 million and \$6.5 million in 2011, 2010 and 2009, respectively.

Multiemployer Plans The Company participates in four multiemployer plans. Two of these plans are located in Germany and two of the plans are in the U.S. The risks of participating in these multiemployer plans are different from single-employer plans in the following aspects:

- Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.
- If a participating employer stops contributing to the plan, the unfunded obligation of the plan may be borne by remaining participating employers.
- If the Company chooses to stop participating in its U.S. multiemployer plans, the Company may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

The Company's contribution to these plans is outlined in the table below. Comparability was influenced by increases in German employment during these years as well as shorter work weeks during 2009 due to the effects of the financial crisis.

Pension Fund	Company Contributions (\$ in millions)		
	2011	2010	2009
Pensionskasse Dynamit Nobel Versicherungsverein auf Gegenseitigkeit, Troisdorf (DN Pensionskasse)	\$ 7.7	\$ 6.2	\$ 5.9
Other Plans	0.5	0.3	0.2
Total	\$ 8.2	\$ 6.5	\$ 6.1

Unless otherwise noted, the following multiemployer plan disclosures relate only to the DN Pensionskasse located in Germany, as this is the only individually significant plan in which the Company participates. Rockwood's contributions to the DN Pensionskasse represented more than 90% of the Company's total multiemployer contributions (see table above) and represented approximately half of the total contributions received by the DN Pensionskasse in the years ended December 31, 2011, 2010 and 2009.

The DN Pensionskasse plan provides monthly payments in the case of disability, death or retirement. Additional information of the DN Pensionskasse is available in the public domain. Some participants in the plan are subject to collective bargaining arrangements, which have no fixed expiration date. The contribution and benefit levels are neither negotiated nor significantly influenced by these collective bargaining arrangements nor are benefit levels generally subject to reduction.

The DN Pensionskasse rules require that contributions are set by its Board to comply with the applicable German insurance law. This law requires that such plans be fully funded at all times. The DN Pensionskasse was in fact fully funded as of December 31, 2010, the date the most recent information is publicly available. This funding level would correspond to the highest funding zone status (at least 80% funded) under U.S. pension regulation.

The DN Pensionskasse plan is subject to a financial improvement plan (FIP) which expires in 2014, although no surcharge has been imposed. The FIP calls for increased capital reserves to avoid future underfunding risk as noted above, there is no current funding shortfall. The majority of the Company's contributions are tied to employees' contributions, which are generally calculated as a percentage of base compensation, up to a certain statutory ceiling. Until 2014 (end of the FIP), the Company will pay at least three times the employees' contributions for longer-term employees. However, for employees starting after December 1, 2007, the Company's contributions equal the employee contributions.

Since the plan liabilities need to be fully funded at all times according to local funding requirements, it is unlikely that the DN Pensionskasse plan will fail to fulfill its obligations, however, in such an event, the Company is liable for the benefits of its employees who participate in the plan.

15. EARNINGS PER SHARE:

Basic and diluted earnings per common share (EPS) were computed using the following share data:

(\$ in millions, except per share amounts; shares in thousands)	Year ended December 31,		
	2011	2010	2009
EPS Numerator:			
Amounts attributable to Rockwood Holdings, Inc.:			
Income from continuing operations	\$ 291.1	\$ 220.0	\$ 4.3
Income from discontinued operations	0.9	19.4	16.8
Gain on sale of discontinued operations, net of tax	119.3		
Net income	\$ 411.3	\$ 239.4	\$ 21.1
EPS Denominator:			
Basic weighted average number of common shares outstanding	76,555	74,985	74,096
Effect of dilutive stock options and other incentives	3,310	3,108	755
Diluted weighted average number of common shares outstanding and common stock equivalents	79,865	78,093	74,851
Basic earnings per common share attributable to Rockwood Holdings, Inc.:			
Earnings from continuing operations	\$ 3.80	\$ 2.93	\$ 0.06
Earnings from discontinued operations, net of tax	1.57	0.26	0.22
Basic earnings per common share	\$ 5.37	\$ 3.19	\$ 0.28
Diluted earnings per common share attributable to Rockwood Holdings, Inc.:			
Earnings from continuing operations	\$ 3.64	\$ 2.82	\$ 0.06
Earnings from discontinued operations, net of tax	1.51	0.25	0.22
Diluted earnings per common share	\$ 5.15	\$ 3.07	\$ 0.28

Stock options under employee compensation plans representing common stock of 1,265,435 shares and 1,069,304 shares were outstanding as of December 31, 2010 and 2009, respectively, but were not included in the computation of diluted earnings per common share because their inclusion would have had an anti-dilutive effect.

16. WARRANTS:

In connection with the issuance of the redeemable convertible preferred stock in connection with the July 2003 refinancing, the Company issued warrants to an affiliate of KKR, exercisable at any time at a \$14.61 per share exercise price, to purchase 958,315 additional shares of common stock of the Company. The warrants expire July 23, 2013. The Company has attributed a portion of the proceeds from issuance of the redeemable convertible preferred stock to the fair value of the warrants. The warrants were valued at \$6.1 million and were recorded as a component of stockholders' equity.

17. RESTRUCTURING AND OTHER SEVERANCE COSTS:

The Company records restructuring liabilities that represent charges incurred in connection with consolidations and cessations of certain of its operations, including operations from acquisitions, as well as headcount reduction programs. These charges consist primarily of severance and facility/entity closure costs. Severance charges are based on various factors including the employee's length of service, contract provisions, salary levels and local governmental legislation. At the time a related charge is recorded, the Company calculates its best estimate based upon detailed analysis. Although significant changes are not expected, actual costs may differ from these estimates.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The following table provides the restructuring and other severance costs for the years ended December 31, 2011, 2010 and 2009:

(\$ in millions)	Year ended December 31,		
	2011	2010	2009
Severance/Relocation	\$ 7.3	\$ 2.3	\$ 2.6
Facility/entity closure and other	3.8	1.3	3.9
Restructuring charge	11.1	3.6	6.5
Other severance costs	3.4	1.4	13.8
Total	\$ 14.5	\$ 5.0	\$ 20.3

For the year ended December 31, 2011, the restructuring charges primarily relate to severance and facility/entity closure costs in connection with organizational changes in the Specialty Chemicals and Performance Additives segments.

All restructuring actions still in progress as of December 31, 2011 are expected to be substantially complete within the next twelve months, except for the future manufacturing consolidations of the North American Surface Treatment and Color Pigments businesses. However, payouts of certain liabilities resulting from these and previous actions will take place over several years. Selected information for outstanding liabilities from recent restructuring actions is as follows:

(\$ in millions)	Severance/ Relocation	Facility Closure and Other	Total
Liability balance, December 31, 2009	\$ 4.2	\$ 3.3	\$ 7.5
Restructuring charge in 2010	2.3	1.3	3.6
Utilized	(2.8)	(2.2)	(5.0)
Foreign exchange and other	(1.0)	(0.3)	(1.3)
Liability balance, December 31, 2010	\$ 2.7	\$ 2.1	\$ 4.8
Restructuring charge in 2011 (a)	7.9	3.8	11.7
Utilized	(4.7)	(3.3)	(8.0)
Foreign exchange and other	(0.1)	(0.2)	(0.3)
Liability balance, December 31, 2011	\$ 5.8	\$ 2.4	\$ 8.2

(a) Includes \$0.6 million of charges recorded in income from discontinued operations, net of tax.

Restructuring reserves by segment are as follows:

(\$ in millions)	December 31,	
	2011	2010
Specialty Chemicals	\$ 5.2	\$ 2.2
Performance Additives	0.8	0.2
Advanced Ceramics	0.2	0.5
Corporate and other	2.0	1.9
Total	\$ 8.2	\$ 4.8

18. ACCUMULATED OTHER COMPREHENSIVE INCOME:

Changes in accumulated other comprehensive income (loss) are as follows:

(\$ in millions)	Pension related adjustments, net of tax (a)	Foreign currency translation (b)	Intercompany foreign currency loans (b)	Net investment hedge, net of tax (c)	Cash flow hedges, net of tax (d)	Total accumulated other comprehensive income (loss)
Balance at						
December 31, 2008	\$ (15.4)	\$ 196.6	\$ 166.8	\$ (144.2)	\$ 0.2	\$ 204.0
Period change	(24.4)	47.6	15.6	(37.9)	(0.4)	0.5
Balance at						
December 31, 2009	(39.8)	244.2	182.4	(182.1)	(0.2)	204.5
Period change	(3.7)	(15.9)	(54.2)	2.4	(0.4)	(71.8)
Balance at						
December 31, 2010	(43.5)	228.3	128.2	(179.7)	(0.6)	132.7
Period change	(39.2)	(49.2)	(24.7)	(9.9)	0.4	(122.6)
Balance at						
December 31, 2011	\$ (82.7)	\$ 179.1	\$ 103.5	\$ (189.6)	\$ (0.2)	\$ 10.1

(a) The tax effect on the pension related adjustments is a benefit of \$12.0 million, \$1.0 million and \$11.4 million for 2011, 2010 and 2009, respectively.

(b) The foreign currency translation and intercompany loan adjustments are not adjusted for income taxes in accordance with the indefinite reversal criteria.

(c) The tax effect on the net investment hedge is an expense of \$0.4 million for 2010. There was no tax effect recorded in 2011 and 2009.

(d) The tax effect on the cash flow hedges is an (expense) benefit of \$(0.1) million, \$0.1 million and \$0.1 million for 2011, 2010 and 2009, respectively.

Gains and losses on intercompany foreign currency loans that are of a long-term investment nature for which settlement is not planned or anticipated in the foreseeable future are reported as a component of accumulated other comprehensive income.

19. COMMITMENTS AND CONTINGENCIES:

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

Legal Proceedings The Company is involved in various legal proceedings, including commercial, intellectual property, product liability, regulatory and environmental matters of a nature considered normal for its business. The Company accrues for amounts related to these matters if it is probable that a liability has been incurred and an amount can be reasonably estimated. The Company discloses such matters when there is at least a reasonable possibility that a material loss may have been incurred. However, the Company cannot predict the outcome of any litigation or the potential for future litigation.

Lanxess Matter

On January 18, 2010, Lanxess Deutschland GmbH filed suit in the District Court of Satakunta, Finland against Sachtleben Pigments Oy (Sachtleben), a subsidiary of the Company s Titanium Dioxide Pigments venture, claiming breach of contract in connection with Sachtleben s termination of a supply agreement with plaintiff. In late September 2011, the Court held a hearing on the merits of the case and rendered a judgment in October 2011 against Sachtleben in the amount of 3.2 million (\$4.1 million) plus accrued interest and legal fees. The Company appealed the Court s ruling and the parties entered into a settlement agreement on February 21, 2012. The settlement amount is not materially different than the judgment amount that has been accrued as of December 31, 2011 in the Company s financial statements.

Former Glass Sealants Business

A subsidiary in the Specialty Chemicals segment formerly manufactured sealants for insulating glass. This subsidiary has been named as a defendant in several lawsuits relating to alleged defective sealants that were raised prior to and after the sale of this business in 2003. This subsidiary may be required to pay damage claims asserted by the various plaintiffs. Although the Company expects its subsidiary to have coverage under its product liability insurance policies should damages ultimately be awarded or agreed to, in such an event, its insurance may not cover such claims and, if not, its subsidiary may not have sufficient cash flow to pay these claims. The Company estimates that the possible range of loss from these claims as of December 31, 2011 is from 1.0 million (\$1.3 million) to 4.0 million (\$5.2 million). The Company does not believe that resolution of these matters will have a material effect on its financial condition, results of operations or cash flows.

Migratory Bird Matter

In August 2011, the U.S. Department of Justice Environment and Natural Resources Division (DOJ), along with the U.S. Fish and Wildlife Service (FWS) and the Nevada Department of Wildlife (NDOW) commenced an investigation relating to alleged migratory bird deaths at the Company s subsidiary in Silver Peak, Nevada in violation of the Migratory Bird Treaty Act of 1918. The Company s subsidiary is working with the DOJ, FWS and NDOW to address any migratory bird issues. To date, no proceedings have been initiated and no fines have been levied. The Company does not expect the resolution of this matter to have a material impact on its financial condition, results of operations or cash flows.

Real Estate Transfer Tax Matter

In December 2009, the Company received a tax assessment from German tax authorities, claiming that the Company s acquisition of Dynamit Nobel in 2004 triggered a real estate transfer tax obligation in the amount of 4.2 million (\$5.4 million). The Company appealed the assessment to the German tax authorities on the grounds that it had already paid the relevant real estate transfer tax and that the further assessment would constitute duplicate taxation of the real estate transfers. However, in October 2011, the German tax authorities affirmed their position with regard to the assessment. Consequently, the Company appealed this assessment with the fiscal court and intends to vigorously defend its position in this matter. The Company estimates that the possible range of loss from these claims as of December 31, 2011 is from 0.0 million to 4.2 million (\$5.4 million). The Company does not expect this matter to have a material impact on its financial condition, results of operations or cash flows.

Inspector General Subpoena

In February 2010, a subsidiary of the Company received a subpoena from the Inspector General of the Department of Defense (DOD) seeking information related to a product in the Timber Treatment Chemicals business in the Performance Additives segment. This subsidiary has and will continue to comply with the requests of the DOD to provide the relevant information. The Company cannot predict the likelihood of further legal action or estimate the loss or possible range of loss, if any, in connection with this matter.

Other Matters

Although the Company expects to continue to pay legal fees in connection with the above matters and other legal actions such as chromated copper arsenate and other product liability matters, based on currently available facts, the Company does not believe that any other individual action will have a material effect on its financial condition, results of operations or cash flows.

Reserves in connection with product liability matters do not individually exceed \$1.9 million and in the aggregate \$4.1 million as of December 31, 2011. The Company's reserve estimates are based on available facts, including damage claims and input from its internal and external legal counsel, past experience, and, in some instances where defense costs are being paid by its insurer, known insurance recoveries. The Company is unable to estimate the amount or range of any potential incremental charges should facts and circumstances change and may in the future revise its estimates based on new information becoming available. Further, the Company cannot predict the outcome of any litigation or the potential for future litigation.

Indemnity Matters The Company is indemnified by third parties in connection with certain matters related to acquired businesses. Although the Company has no reason to believe that the financial condition of those parties who may have indemnification obligations to the Company is other than sound, in the event the Company seeks indemnity under any of these agreements or through other means, there can be no assurance that any party who may have obligations to indemnify the Company will adhere to their obligations and the Company may have to resort to legal action to enforce its rights under the indemnities. In cases where the Company's indemnification claims to such third parties are uncontested, the Company expects to realize recoveries within the short term.

The Company may be subject to indemnity claims relating to properties or businesses it divested. For example, the Company has agreed to indemnify the buyer of its former plastic compounding business for certain known and unknown environmental actions which may arise in the future that relate to the period prior to the closing.

Rockwood's pension liability includes defined benefit obligations to employees of a previously divested company which cannot legally be transferred to the owners under local law. The owner of the business had agreed to indemnify the Company for these obligations, however, such company has filed for bankruptcy. Accordingly, as of December 31, 2011, the Company has recorded a reserve of 4.9 million (\$6.4 million) against our related receivable of 5.4 million (\$7.0 million) due from the current owner. The Company cannot predict the ultimate outcome of this matter.

In the opinion of management, and based upon information currently available, the ultimate resolution of any indemnification obligations owed to the Company or by the Company is not expected to have a material effect on the Company's financial condition, results of operations or cash

flows.

Safety, Health and Environmental Matters

General

The Company is subject to extensive environmental, health and safety laws in the United States, the European Union (EU) and elsewhere at the international, national, state, and local levels. Many of these laws impose requirements relating to clean up of contamination, and impose liability in the event of damage to human beings, natural resources or property, and provide for substantial fines, injunctions and potential criminal sanctions for violations. Other laws or contractual agreements require post-closure reclamation of landfills, surface mining sites and manufacturing facilities for damage resulting from normal operation of these locations. The products, including the raw materials handled, are also subject to rigorous industrial hygiene regulations and investigation. The nature of the Company's operations exposes it to risks of liability for breaches of these laws and regulations as a result of the production, storage, transportation and sale of materials that can cause contamination or personal injury when released into the environment. Environmental laws are subject to change and have tended to become stricter over time. Such changes in environmental laws, or the enactment of new environmental laws, could result in materially increased capital, operating and compliance costs.

Safety, Health and Environmental Management Systems

The Company is committed to achieving and maintaining compliance with all applicable safety, health and environmental (SHE) legal requirements. The Company's subsidiaries have developed policies and management systems that are intended to identify the SHE legal requirements applicable to their operations, enhance compliance with such requirements, ensure the safety of the Company's employees, contractors, community neighbors and customers and minimize the production and emission of wastes and other pollutants. Although SHE legal requirements are constantly changing, these SHE management systems are designed to assist the

Company in meeting its compliance goals and minimizing overall risk.

SHE Capital Expenditures

The Company will incur future costs for capital improvements and general compliance under SHE laws. For the year ended December 31, 2011, the capital expenditures for SHE matters totaled \$23.3 million, excluding costs to maintain and repair pollution control equipment. For 2012, the Company estimates capital expenditures for compliance with SHE laws to be at similar levels; however, because capital expenditures for these matters are subject to changes in existing and new SHE laws, the Company cannot provide assurance that its recent expenditures will be indicative of future amounts required to comply with these laws.

Regulatory Developments

Greenhouse gases have increasingly become the subject of international, national, state and local attention. On September 22, 2009, the Environmental Protection Agency (EPA) passed its final greenhouse gas monitoring and reporting rule that required certain facilities in the U.S. to record their greenhouse gases beginning January 1, 2010 and begin reporting these measurements on September 30, 2011. Currently, no facilities are required to report under this program. The Company does not believe, based upon currently available information, that this rule will have a material impact on its financial condition, results of operations or cash flows. However, further legislation of greenhouse gases and carbon dioxide has been proposed in the U.S. and other jurisdictions. Certain European facilities are subject to different carbon emission trading schemes imposed by local governments, e.g. U.K. and Germany. Any such laws may directly and indirectly have a material impact on its financial condition, results of operations and cash flows in any quarterly or annual reporting period, such as through higher costs for energy and certain raw materials and additional capital expenditures to comply with such laws.

The Company is also subject to the Homeland Security Agency's regulations, which address chemical plant safety, the Kyoto Protocol, which relates to the emission of greenhouse gases and the European Union Integrated Pollution Prevention and Control Directive, which relates to environmental permitting programs for individual facilities. In addition, legislation was recently introduced in Congress seeking to reform the Toxic Control Substances Act, which among other things, would require manufacturers to develop and submit additional safety data for each chemical it produces, similar to REACH. The Company does not believe, based upon currently available information, that these regulations will have a material impact on its financial condition, results of operations or cash flows.

Environmental Liabilities

Environmental laws have a significant effect on the nature and scope of any clean-up of contamination at current and former operating facilities, the costs of transportation and storage of chemicals and finished products and the costs of the storage and disposal of wastes.

In addition, Superfund statutes in the United States as well as statutes in other jurisdictions impose strict, joint and several liability for clean-up costs on the entities that generated waste and/or arranged for its disposal at contaminated third party sites, as well as the past and present owners and operators of contaminated sites. All responsible parties may be required to bear some or all clean-up costs regardless of fault, legality of the original disposal or ownership of the disposal site.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The following table provides a list of the Company's present and former facilities with environmental contamination or reclamation obligations for which the Company has reserved for at December 31, 2011:

Country	Location	(a)	(b)	(c)	(d)	(e)
Brazil	Diadema			X		
Chile	Salar de Atacama				X	
China	Shenzhen			X		
Finland	Kipsikorpi				X	
	Pori				X	
France	Sens	X				
Germany	Duisburg	X			X	
	Empelde	X				X
	Hainhausen	X				
	Liebenau			X		
	Schwarzheide				X	
	Marktredwitz		X			
	Plochingen		X			
	Stadeln	X	X			
	Troisdorf	X	X	X		
Italy	Turin	X

	Pineville, NC					X
	Silver Peak, NV	X			X	
	Sunbright, VA	X				X
	Valdosta, GA	X				

(a) The Company is currently operating groundwater monitoring and/or remediation systems at these locations.

(b) The Company is currently operating groundwater monitoring and/or remediation systems at these locations for which prior owners or insurers have assumed responsibility.

(c) The Company is currently conducting investigations into additional possible soil and/or groundwater contamination at these locations.

(d) The Company has land restoration obligations relating to landfill activities or surface mining at these locations.

- (e) The Company is responsible for liabilities related to environmental matters at these closed facilities.

The Company is also responsible for environmental matters at some of its former off-site disposal locations owned by third parties. These sites are considered Superfund sites as defined by the EPA or state regulatory authority. The Company is a potentially responsible party or *de minimis* participant at the following Superfund locations: Augusta, GA, Niagara Falls, NY and South Gate, CA and has reserves for these matters totaling \$0.1 million as of December 31, 2011.

Although the Company cannot provide assurances in this regard, the Company does not believe that these issues will have a material effect on its business or financial condition, but may have a material effect on the results of operations or cash flows in any given quarterly or annual reporting period. Nonetheless, the discovery of contamination arising from present or historical industrial

operations at some of the Company's or its predecessor's former and present properties and/or at sites where the Company and its predecessor disposed wastes could expose the Company to cleanup obligations and other damages in the future.

Environmental Reserves

The Company has established financial reserves relating to anticipated environmental cleanup obligations, site reclamation and remediation and closure costs, which are reviewed at least quarterly based on currently available information. Liabilities are recorded when potential liabilities are either known or believed to be probable and can be reasonably estimated. In the event that the Company establishes a financial reserve in connection with site remediation costs, the Company records a reserve for the estimated cost of the remediation, even though the costs of the remediation will likely be spread out over many years. The Company does not include unasserted claims in its reserves.

The Company's liability estimates are based upon available facts, existing technology, indemnities from third parties, past experience and, in some instances, insurance recoveries where the remediation costs are being paid by its insurers, and are generated by several means, including State-mandated schedules, environmental consultants and internal experts, depending on the circumstances. On a consolidated basis, the Company has accrued \$49.8 million for environmental liabilities as of both December 31, 2011 and 2010, most of which were classified as other non-current liabilities in the Consolidated Balance Sheets.

Included in the environmental liabilities are reclamation obligations (see table below). These obligations primarily relate to post-closure reclamation of landfills in the Titanium Dioxide Pigments segment and surface mining and manufacturing sites within the Fine Chemicals business in the Specialty Chemicals segment. The following table represents the change in the Company's reclamation obligations for the years ended December 31, 2011 and 2010:

(\$ in millions)	Year ended December 31,			
		2011		2010
Liability balance, January 1	\$	21.7	\$	24.1
Additions		4.6		2.6
Accretion		0.5		0.7
Utilization		(3.4)		(3.6)
Revisions to estimates		(0.1)		(0.8)
Foreign exchange		(0.1)		(1.3)
Liability balance, December 31	\$	23.2	\$	21.7

The remaining environmental liabilities (\$26.6 million and \$28.1 million as of December 31, 2011 and 2010 respectively), represent remediation obligations. Of these accruals, \$14.6 million and \$14.9 million as of December 31, 2011 and 2010, respectively, represent liabilities discounted using discount rates ranging from 4.3% to 7.0%, with the undiscounted amount of these reserves being \$20.9 million and \$21.1 million, respectively.

The Company's remediation liabilities are payable over periods of up to 30 years. At a number of the sites described above, the extent of contamination has not yet been fully investigated or the final scope of remediation is not yet determinable and could potentially affect the range. The Company estimates that the potential range for such environmental matters as of December 31, 2011 is from \$49.8 million to \$78.9 million. For the year ended December 31, 2011, the Company recorded charges of \$6.7 million (\$4.6 million of which were capitalized) to increase its environmental liabilities and made payments of \$4.9 million for reclamation and remediation costs, which reduced its environmental liabilities. For the year ended December 31, 2011, the recurring cost of managing hazardous substances for ongoing operations is \$55.2 million.

The Company believes these accruals are adequate based on currently available information. The Company may incur losses in excess of the amounts accrued; however, based on currently available information, it does not believe the additional amount of potential losses would have a material effect on its business or financial condition, but may have a material effect on the results of operations or cash flows in any given quarterly or annual reporting period. The Company does not believe that any known individual environmental matter would have a material effect on its financial condition, results of operations or cash flows. The Company is unable to estimate the amount or range of any potential incremental charges should facts and circumstances change and may in the future revise its estimates based on new information becoming available.

In the event that manufacturing operations are discontinued at any of the Company's facilities with known contamination, regulatory authorities may impose more stringent requirements on the Company including soil remediation. The Company does not contemplate any such action occurring in the foreseeable future, as these facilities' remaining lives are not known. Given the indeterminate useful life of these facilities and the corresponding indeterminate settlement date of any soil remediation obligations, the Company does not

have sufficient information to estimate a range of potential settlement dates for its obligations. Consequently, the Company cannot employ a present value technique to estimate fair value and, accordingly, has not accrued for any environmental-related costs to remediate soil at these facilities.

Commitments

As of December 31, 2011, the Company has unconditional purchase obligations of \$1,065.5 million primarily consisting of take-or-pay contracts to purchase goods and energy that are enforceable and legally binding and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. These purchase obligations are expected to be incurred as follows: \$472.4 million in less than one year, \$498.0 million in two-three years, \$64.0 million in four-five years and \$31.1 million after five years.

20. SUBSEQUENT EVENTS:

On February 22, 2012, the Company issued a new tranche of term loan A under its existing senior secured credit facility in the amount of \$350.0 million and expects to use the proceeds and cash on hand to redeem all of its outstanding 2014 Notes, consisting of 250.1 million (\$324.2 million) in aggregate principal amount of 7.625% euro-denominated notes and \$200.0 million in aggregate principal amount of 7.5% dollar-denominated notes, and to pay accrued and unpaid interest and applicable redemption premiums.

As a result of this refinancing, the senior secured credit facility has changed as follows:

a) Structure

The senior secured credit agreement will also consist of a term loan A in an aggregate principal amount of \$350.0 million maturing in February 2017.

b) Interest and Fees

The new term loan bears interest at Libor plus 2.25% (with a 0.25% reduction for achieving a designated credit rating).

c) Amortization and Prepayments

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

The new term loan is payable in February and August of each year at an amount equal to 7.50% in year 1 and 10% in each of years 2 to 4, with the remainder due at the final maturity date.

All other material terms and conditions of the senior secured credit facility otherwise remain the same.

In the first quarter of 2012, we expect to incur a loss of \$9.6 million related to the redemption of these 2014 Notes.

Item 9. Change in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

Our disclosure controls and procedures are designed to ensure that (a) information required to be disclosed in our reports under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2011 and concluded that, as of December 31, 2011, our disclosure controls and procedures are effective to accomplish their objectives at the reasonable assurance level.

There were no changes in our internal control over financial reporting during the fourth quarter of 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Rockwood Holdings, Inc. and Subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our consolidated financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements in our consolidated financial statements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on this assessment and those criteria, management believes that, as of December 31, 2011, the Company's internal control over financial reporting is effective.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2011 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, who expressed an unqualified opinion as stated in their report included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Rockwood Holdings, Inc.
Princeton, New Jersey

We have audited the internal control over financial reporting of Rockwood Holdings, Inc. and Subsidiaries (the Company) as of December 31, 2011, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2011 of the Company and our report, dated February 23, 2012, expressed an unqualified opinion on those financial statements and financial statement schedule.

Notes to Condensed Financial Statements

The accompanying condensed financial statements of Rockwood Holdings, Inc. (the Registrant) should be read in conjunction with the consolidated financial statements and notes thereto of Rockwood Holdings, Inc. and Subsidiaries included elsewhere in this filing.

1. BASIS OF PRESENTATION

Pursuant to rules and regulations of the Securities and Exchange Commission, the unconsolidated condensed financial statements of Rockwood Holdings, Inc. (the Company) do not reflect all of the information and notes normally included with financial statements prepared in accordance with generally accepted accounting principles. Therefore, these financial statements should be read in conjunction with the consolidated financial statements and related notes thereto included in this filing.

Accounting for subsidiaries The Company has accounted for its subsidiaries under the equity method in the unconsolidated condensed financial statements.

2. STOCK-BASED COMPENSATION

The Company has in place the 2009 Stock Incentive Plan. See Item 8. Financial Statements and Supplementary Data - Note 13, Stock-Based Compensation to the consolidated financial statements.

3. DIVIDEND RESTRICTIONS

Under the terms of the senior secured credit facilities of Rockwood Holdings, Inc. and subsidiaries, certain subsidiaries may not, subject to certain limitations and exceptions, (i) declare or pay any dividends, other than dividends payable solely in its equity interests; (ii) redeem or otherwise acquire or retire for value any of its or its parent companies' equity interests; (iii) make any principal payment on or otherwise acquire or retire for value any subordinated indebtedness; or (iv) make any loan or capital contribution to, or purchase any securities or assets of, any person. So long as no default exists, the Company's subsidiaries may make certain otherwise restricted payments, such as (i) redeeming capital stock with the proceeds from concurrent equity contributions; (ii) repurchasing shares of their capital stock pursuant to employee stock plans or shareholder agreements; (iii) paying dividends to any parent company; (iv) paying taxes; (v) making certain permitted investments; or (vi) redeeming or refinancing certain other debt obligations; however, some of these permitted payments are subject to certain limitations and others may only be made subject to compliance with certain financial covenants, such as Senior Secured Debt to Consolidated EBITDA ratio (as defined).

Generally, under the terms of the 2014 Notes, the Company's subsidiaries may not (i) declare or pay any dividend on their equity interests other than dividends payable solely in equity interests or in options, warrants, or other rights to purchase such equity interests; (ii) redeem or otherwise acquire or retire for value any of the Company's subsidiaries or the Company's equity interests; (iii) make any principal payment on or otherwise acquire or retire for value any subordinated indebtedness; or (iv) make any loan or capital contribution to, or purchase any securities or assets of,

Edgar Filing: Rockwood Holdings, Inc. - Form 10-K

any person. These restrictions do not apply if, at the time of taking any of these actions, (a) no Default or Event of Default exists under the Company's debt obligations, (b) immediately after taking such action, the Company could incur additional indebtedness without violating the Company's debt covenants, and (c) the total amount of payments made pursuant to the above actions does not exceed the sum of (1) 50% of net income, (2) the proceeds of any capital contributions or equity offerings, and (3) the fair market value of any unrestricted subsidiary redesignated as a restricted subsidiary. Numerous exceptions to these general prohibitions exist that permit the Company's subsidiaries to make certain restricted payments without compliance with (a), (b) and (c).
