¹⁴⁴A security Certain conditions for public sale may exist. Unless otherwise noted, these securities are deemed to be liquid. (a)

⁽b) The value of loaned securities and related collateral outstanding at March 31, 2012 were approximately \$28,517,000 and \$29,147,000, respectively. The Portfolio received cash collateral of approximately \$29,059,000 which was subsequently invested in Repurchase Agreements and Morgan Stanley Institutional Liquidity Funds - Money Market Portfolio - Institutional Class as reported in the Portfolio of Investments. As of March 31, 2012, there was uninvested cash of approximately \$88,200 which is not reflected in the Portfolio of Investments. The Portfolio has the right under the lending agreement to recover the securities from the borrower on demand.

- (c) When-issued security.
- (d) Variable/Floating Rate Security Interest rate changes on these instruments are based on changes in a designated base rate. The rates shown are those in effect on March 31, 2012.
- (e) Security has been deemed illiquid at March 31, 2012.
- (f) The Fund invests in the Morgan Stanley Institutional Liquidity Funds Money Market Portfolio Institutional Class (the Liquidity Funds), an open-end management investment company managed by the Adviser. Investment advisory fees paid by the Fund are reduced by an amount equal to the advisory and administrative service fees paid by the Liquidity Funds with respect to assets invested by the Fund in the Liquidity Funds.
- (g) Securities are available for collateral in connection with open foreign currency exchange contracts.
- + At March 31, 2012, the U.S. Federal income tax cost basis of investments was approximately \$294,712,000 and, accordingly, net unrealized appreciation for U.S. Federal income tax purposes was approximately \$25,959,000 of which approximately \$27,095,000 related to appreciated securities and approximately \$1,136,000 related to depreciated securities.

Notes to the Portfolio of Investments • March 31, 2012 (unaudited)

Security Valuation: Bonds and other fixed income securities may be valued according to the broadest and most representative market. In addition, bonds and other fixed income securities may be valued on the basis of prices provided by a pricing service. The prices provided by a pricing service take into account broker dealer market price quotations for institutional size trading in similar groups of securities, security quality, maturity, coupon and other security characteristics as well as any developments related to the specific securities. Securities listed on a foreign exchange are valued at their closing price. Unlisted securities and listed securities not traded on the valuation date for which market quotations are readily available are valued at the mean between the current bid and ask prices. Equity securities listed on a U.S. exchange are valued at the latest quoted sales price on the valuation date. Equity securities listed or traded on NASDAQ, for which market quotations are available, are valued at the NASDAQ Official Closing Price. Short-term debt securities purchased with remaining maturities of 60 days or less are valued at amortized cost, unless the Board of Directors (the Directors) determines such valuation does not reflect the securities fair value, in which case these securities will be valued at their fair value as determined in good faith under procedures adopted by the Directors.

All other securities and investments for which market values are not readily available, including restricted securities, and those securities for which it is inappropriate to determine prices in accordance with the aforementioned procedures, are valued at fair value as determined in good faith under procedures adopted by the Directors, although the actual calculations may be done by others. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer s financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

Most foreign markets close before the New York Stock Exchange (NYSE). Occasionally, developments that could affect the closing prices of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the foreign market on which the securities trade) and the close of business on the NYSE. If these developments are expected to materially affect the value of the securities, the valuations may be adjusted to reflect the estimated fair value as of the close of the NYSE, as determined in good faith under procedures established by the Directors.

Fair Value Measurement: Financial Accounting Standards Board (FASB) Accounting Standards CodificationTM (ASC) 820, Fair Value Measurements and Disclosure (ASC 820), defines fair value as the value that the Fund would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. ASC 820 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in valuing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity s own assumptions about the assumptions market participants would use in valuing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Fund s investments. The inputs are summarized in the three broad levels listed below.

- Level 1 unadjusted quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

• Level 3 significant unobservable inputs including the Fund s own assumptions

in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer s financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each security.

Item 2. Controls and Procedures.

(a) The Fund s principal executive officer and principal financial officer have concluded that the Fund s disclosure contro	ls and procedures are
sufficient to ensure that information required to be disclosed by the Fund in this Form N-Q was recorded, processed, summ	arized and reported
within the time periods specified in the Securities and Exchange Commission s rules and forms, based upon such officers	evaluation of these
controls and procedures as of a date within 90 days of the filing date of the report.	

(b) There were no changes in the Fund s internal control over financial reporting that occurred during the registrant s fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Fund s internal control over financial reporting.

Item 3. Exhibits.

(a) A separate certification for each principal executive officer and principal financial officer of the registrant are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
