NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Unaudited

(1) Basis of Presentation and Informational Disclosures

Northwest Bancshares, Inc. (the Company) or (NWBI), a Maryland corporation headquartered in Warren, Pennsylvania, is a savings and loan holding company regulated by the Board of Governors of the Federal Reserve System. The Company was incorporated to be the successor to Northwest Bancorp, Inc. upon the completion of the mutual-to-stock conversion of Northwest Bancorp, MHC in December 2009. The primary activity of the Company is the ownership of all of the issued and outstanding common stock of Northwest Savings Bank, a Pennsylvania-chartered savings bank (Northwest). Northwest is regulated by the FDIC and the Pennsylvania Department of Banking. At June 30, 2013, Northwest operated 166 community-banking offices throughout Pennsylvania, western New York, eastern Ohio and Maryland.

The accompanying unaudited consolidated financial statements include the accounts of the Company and its subsidiary, Northwest, and Northwest's subsidiaries Northwest Settlement Agency, LLC, Northwest Consumer Discount Company, Northwest Financial Services, Inc., Northwest Advisors, Inc., Northwest Capital Group, Inc., Boetger & Associates, Inc., Allegheny Services, Inc., Great Northwest Corporation, Veracity Benefit Designs, Inc. and The Bert Company. The unaudited consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete annual financial statements. In the opinion of management, all adjustments necessary for the fair presentation of the Company's financial position and results of operations have been included. The consolidated statements have been prepared using the accounting policies described in the financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 updated, as required, for any new pronouncements or changes. The following sections of our **Summary of Significant Accounting Principles** have been updated since the filing of our form 10K and are included herein.

Investment Securities

We classify marketable securities at the time of purchase as held-to-maturity, available-for-sale, or trading securities. Securities for which management has the intent and we have the ability to hold until their maturity are classified as held-to-maturity and are carried at cost, adjusted for amortization of premiums and accretion of discounts on a level yield basis (amortized cost). If it is management's intent at the time of purchase to hold securities for an indefinite period of time and/or to use such securities as part of its asset/liability management strategy, the securities are classified as available-for-sale and are carried at fair value, with unrealized gains and losses reported as accumulated other comprehensive income/ (loss), a separate component of shareholders' equity, net of tax. Securities classified as available-for-sale include securities that may be sold in response to changes in interest rates, resultant prepayment risk, or other market factors. Securities that are bought and held principally for the purpose of selling them in the near term are classified as trading and are reported at fair value, with changes in fair value included in earnings. The cost of securities sold is determined on a specific identification basis. We held no securities classified as trading at or for the years ended December 31, 2012 and 2011.

On at least a quarterly basis, we review our investments that are in an unrealized loss position for other-than-temporary impairment (OTTI). An investment security is deemed impaired if the fair value of the investment is less than its amortized cost. If an investment security is determined to be impaired, we evaluate whether the decline in value is other-than-temporary. We also consider whether or not we expect to receive all of the contractual cash flows from the investment security based on factors that include, but are not limited to: the credit worthiness of the issuer and the historical and projected performance of the underlying collateral. Also, we may evaluate the business and financial outlook of the issuer, as well as broader economic performance indicators. We consider our intent to sell the investment securities and the

Table of Contents

likelihood that we will not have to sell the investment securities before recovery of their cost basis during our evaluation. Declines in fair value of investment securities that are deemed credit related are recognized in earnings while declines in fair value of investment securities deemed noncredit related are recorded in accumulated other comprehensive income, if we do not intend to sell and it is not likely we will be required to sell. If we intend to sell the security or if it is more likely than not that we will be required to sell the security the entire unrealized loss is recorded in earnings.

Federal law requires a member institution of the Federal Home Loan Bank (FHLB) system to hold stock of its district FHLB according to a predetermined formula. This stock is recorded at cost. Quarterly, we evaluate our investment in the FHLB of Pittsburgh for impairment. We evaluate recent and long-term operating performance, liquidity, funding and capital positions, stock repurchase history, dividend history and impact of legislative and regulatory changes. Based on our most recent evaluation, we have determined that no impairment write-downs are currently required.

Loans Receivable

Our loan portfolio segments consist of Personal Banking loans and Business Banking loans. Personal Banking loans include the following classes: residential mortgage loans, home equity loans and other consumer loans. Business Banking loans include the following classes: commercial real estate loans and commercial loans. All classes of loans are carried at their unpaid principal balance net of any deferred origination fees or costs and the allowance for estimated loan losses. Interest income on loans is credited to income as earned. Interest earned on loans for which no payments were received during the month is accrued at month end. Accrued interest on loans more than 90 days delinquent is reversed, and such loans are placed on nonaccrual.

All classes of loans are placed on nonaccrual when principal or interest is 90 days or more delinquent, or when there is reasonable doubt that interest or principal will not be collected in accordance with the contractual terms. Interest receipts on all classes of nonaccrual and impaired loans are recognized as interest revenue when it has been determined that all principal and interest will be collected or are applied to principal when collectability of principal is in doubt. Nonaccrual loans generally are restored to an accrual basis when principal and interest become current and a period of performance has been established in accordance with the contractual terms, typically six months.

A loan (from any class) is considered to be a trouble-debt restructured loan (TDR) when the restructuring constitutes a concession and the borrower is experiencing financial difficulties. TDRs may include certain modifications of terms of loans, receipts of assets from borrowers in partial or full satisfaction of loans, or a combination thereof. TDRs are impaired loans and are measured for impairment until the loan has performed in accordance with its modified terms for a reasonable period of time, generally six consecutive months. A modified loan is determined to be a TDR based on the contractual terms as specified by the original loan agreements of the most recent modification. Once classified a TDR, a loan is only removed from such classification under three circumstances: (1) the loan is paid off, (2) the loan is charged off, or (3) if, at the beginning of the current fiscal year, the loan has performed in accordance with the modified terms for a minimum of six consecutive months and at the time of modification the loan's interest rate represented a then current market interest rate for a loan of similar risk.

For all classes of loans, delinquency is measured based on the number of days since the payment due date. For all classes of loans, past due status is measured using the loan's contractual maturity date.

Table of Contents

Loan fees and certain direct loan origination costs are deferred, and the net deferred fee or cost is then recognized using the level-yield method over the contractual life of the loan as an adjustment to interest income.

The results of operations for the quarter ended and six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013, or any other period.

Stock-Based Compensation

On May 15, 2013, we awarded employees 511,100 stock options and directors 79,200 stock options with an exercise price of \$12.44 and a grant date fair value of \$1.03 per stock option. On May 15, 2013, we also awarded employees 240,700 restricted common shares and directors 29,700 restricted common shares with a grant date fair value of \$12.55. Awarded stock options and common shares vest over a ten-year period with the first vesting occurring on the grant date. Stock-based compensation expense of \$1.5 million and \$1.4 million for the quarter ended June 30, 2013 and 2012, respectively, and \$2.6 million and \$2.4 million for the six months ended June 30, 2013 and 2012, respectively, was recognized in compensation expense relating to our stock benefit plans. At June 30, 2013 there was compensation expense of \$5.6 million to be recognized for awarded but unvested stock options and \$16.2 million for unvested common shares.

Income Taxes- Uncertain Tax Positions

Accounting standards prescribe a comprehensive model for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return. A tax benefit from an uncertain position may be recognized only if it is more likely than not that the position is sustainable, based on its technical merits. The tax benefit of a qualifying position is the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with a taxing authority having full knowledge of all relevant information. As of June 30, 2013 we had no liability for unrecognized tax benefits.

We recognize interest accrued related to: (1) unrecognized tax benefits in federal and state income taxes and (2) refund claims in other operating income. We recognize penalties (if any) in federal and state income taxes. There is no amount accrued for the payment of interest or penalties at June 30, 2013. We are subject to audit by the Internal Revenue Service and any state in which we conduct business for the tax periods ended December 31, 2011, 2010 and 2009.

(2) **Business Segments**

We operate in two reportable business segments: Community Banking and Consumer Finance. The Community Banking segment provides services traditionally offered by full-service community banks, including business and personal deposit accounts and business and personal loans, as well as insurance, brokerage and investment management and trust services. The Consumer Finance segment, which is comprised of Northwest Consumer Discount Company, a subsidiary of Northwest, operates 52 offices in Pennsylvania and offers personal installment loans for a variety of consumer and real estate products. This activity is funded primarily through an intercompany borrowing relationship with Allegheny Services, Inc., a subsidiary of Northwest. Net income is the primary measure used by management to measure segment performance.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

The following tables provide financial information for these reportable segments. The "All Other" column represents the parent company and elimination entries necessary to reconcile to the consolidated amounts presented in the financial statements.

We review our investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which amortized cost has exceeded fair values, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer, and the intent to hold the investments for a period of time sufficient to allow for a recovery in value. Certain investments are evaluated using our best estimate of future cash flows. If the estimate of cash flows indicates that an adverse change has occurred, other-than-temporary impairment would be recognized for the amount of the unrealized loss that was deemed credit related.

The following table shows the fair value of and gross unrealized losses on investment securities, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position at June 30, 2013 (in thousands):

	Less than 12 months		12 months or more		Total	
	Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss
U.S. government and agencies	\$ 280,143	(7,118)			280,143	(7,118)

Corporate issues

At June 30, 2013, we had five investments with a total amortized cost of \$6.3 million and total fair value of \$4.0 million, where the amortized cost exceeded the carrying value for more than 12 months. These investments were three single issuer trust preferred investments and two pooled trust preferred investments. The single issuer trust preferred investments were evaluated for other-than-temporary impairment by determining the strength of the underlying issuer. In all cases, the underlying issuer was well-capitalized for regulatory purposes. None of the issuers have deferred interest payments or announced the intention to defer interest payments. We believe the decline in fair value is related to the spread over three month LIBOR, on which the quarterly interest payments are based, as the spread over LIBOR is significantly lower than current market spreads on similar investments. We concluded the impairment of these three investments was considered noncredit related. In making that determination, we also considered the duration and the severity of the losses and whether we intend to hold these securities until the value is recovered, the securities are redeemed or maturity. The pooled trust preferred investments were evaluated for other-than-temporary impairment by considering the duration and severity of the losses, actual cash flows, projected cash flows, performing collateral, the class of investment owned and the amount of additional defaults the structure could withstand prior to the investment experiencing a disruption in cash flows. Neither of the investments experienced a cash flow disruption or are projecting a cash flow disruption. We concluded, based on all facts evaluated, the impairment of these two investments was noncredit related. Management asserts that we do not have the intent to sell these investments and that it is more likely than not, we will not have to sell the investments before recovery of their cost basis.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The following table provides class, amortized cost, fair value and ratings information for our portfolio of corporate securities that have an unrealized loss at June 30, 2013 (in thousands):

Description	Class	Amortized cost	Total Fair value	Unrealized losses	Moody s/ Fitch ratings
Bank Boston Capital Trust (1)	N/A	\$ 989	786	(203)	Ba2/ BB+
Huntington Capital Trust	N/A	1,428	1,059	(369)	Baa3/ BB
Commercebank Capital Trust	N/A	891	870	(21)	Not rated
Ocean Shore Capital Trust	N/A	869	830	(39)	Not rated
I-PreTSL I	Mezzanine	1,500	591	(909)	Not rated/ CCC
I-PreTSL II	Mezzanine	1,500	768	(732)	Not rated/ B
		\$ 7,177	4,904	(2,273)	

(1) Bank Boston was acquired by Bank of America.

The following table provides collateral information on the pooled trust preferred securities included in the previous table at June 30, 2013 (in thousands):

Description	Total collateral	Current deferrals and defaults	Performing collateral	Additional immediate defaults before causing an interest shortfall
I-PreTSL I	\$ 188,500	32,500	156,000	100,845
I-PreTSL II	325,500	24,500	301,000	165,965

Mortgage-backed securities

Mortgage-backed securities include agency (FNMA, FHLMC, GNMA and SBA) mortgage-backed securities and non-agency collateralized mortgage obligations (CMOs). We review our portfolio of mortgage-backed securities quarterly for impairment. As of June 30, 2013, we believe the impairment within our portfolio of agency mortgage-backed securities is noncredit related. As of June 30, 2013, we had seven non-agency CMOs with a total amortized cost of \$5.3 million and a total fair value of \$5.8 million. Included in this total was one non-agency CMO with an amortized cost of \$718,000 and a fair value of \$694,000, where the amortized cost exceeded the fair value for more than 12 months. During the quarter and six months ended June 30, 2013, we did not recognize other-than-temporary credit related impairment on this security. We determined the impairment was noncredit related by analyzing cash flow estimates, estimated prepayment speeds, loss severity and conditional default rates. We considered the discounted cash flow analysis as our primary evidence when we determined that the impairment on this security was noncredit related.

Table of Contents

The following table shows issuer specific information, amortized cost, fair value, unrealized gain or loss and other-than-temporary impairment recorded in earnings for the portfolio of non-agency CMOs at June 30, 2013 (in thousands):

Description	Amortized cost	Fair value	Unrealized gain/ (loss)	Impairment recorded in current period earnings	Total impairment recorded in prior period earnings
AMAC 2003-6 2A2	\$ 150	154	4		
AMAC 2003-6 2A8	311	319	8		
BOAMS 2005-11 1A8	135	280	145		(146)

CFSB 2003-17 2A2	324	325	1		
WAMU 2003-S2 A4	224	228	4		
WFMBS 2003-B A2	718	694	(24)		
	\$ 5,294	5,815	521		(1,153)

Municipal Securities

We review our portfolio of municipal securities quarterly for impairment. We initially evaluate municipal securities for other-than-temporary impairment by comparing the fair value, provided to us by a third party pricing source using quoted prices for similar assets that are actively traded, to the carrying value. When an investment's fair value is below 80% of the amortized cost we then assess the stated interest rate and compare the stated interest rate to current market interest rates to determine if the decline in fair value is considered to be attributable to interest rates. If the stated interest rate approximates current interest rates for similar securities, we determine if the investment is rated and if so, if the rating has changed in the current period. If the rating has not changed during the current period, we review publicly available information to determine if there has been any negative change in the underlying municipality. As of June 30, 2013, none of the investments in our municipal securities portfolio had an amortized cost that exceeded the fair value for more than twelve months.

Credit related other-than-temporary impairment on all debt securities is recognized in earnings while noncredit related other-than-temporary impairment on available-for-sale debt securities, not expected to be sold, is recognized in other comprehensive income.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The table below shows a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold for the quarter ended (in thousands):

	2013	2012
Beginning balance at April 1, (1)	\$ 9,744	10,560
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized		
Reduction for losses realized during the quarter	(47)	(664)
Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized		
Ending balance at June 30,	\$ 9,697	9,896

(1) The beginning balance represents credit losses included in other-than-temporary impairment charges recognized on debt securities in prior periods.

The table below shows a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold for the six months ended (in thousands):

	2013	2012
Beginning balance at January 1, (1)	\$ 9,811	11,633
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized		
Reduction for losses realized during the year	(114)	(1,975)
Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized		238
Ending balance at June 30,	\$ 9,697	9,896

(1) The beginning balance represents credit losses included in other-than-temporary impairment charges recognized on debt securities in prior periods.

Table of Contents**(4) Loans receivable**

The following table shows a summary of our loans receivable at June 30, 2013 and December 31, 2012 (in thousands):

Table of Contents

Our loan portfolios include certain loans that have been modified in a troubled debt restructuring (TDR), where concessions have been granted to borrowers who have experienced financial difficulties. These concessions typically result from our loss mitigation activities and could include: extending the note's maturity date, permitting interest only payments, reducing the interest rate to a rate lower than current market rates for new debt with similar risk, reducing the principal payment, principal forbearance or other actions. These concessions are applicable to all loan segments and classes. Certain TDRs are classified as nonperforming at the time of restructuring and may be returned to performing status after considering the borrower's sustained repayment performance for a reasonable period of at least six months.

When we modify loans in a TDR, we evaluate any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, the loan's observable market price or the current fair value of the collateral, less selling costs, for collateral dependent loans. If we determine that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through an allowance estimate or a charge-off to the allowance. In periods subsequent to modification, we evaluate all TDRs, including those that have payment defaults, for possible impairment, using ASC 310-10. As a result, loans modified in a TDR may have the financial effect of increasing the specific allowance associated with the loan.

Loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, we evaluate the loan for possible further impairment. The allowance may be increased, adjustments may be made in the allocation of the allowance, partial charge-offs may be taken to further write-down the carrying value of the loan, or the loan may be charged-off completely.

During the six months ended June 30, 2013, four home equity loan TDRs with a combined balance of \$99,000, two residential mortgage loan TDRs with a combined balance of \$172,000, four commercial real estate loan TDRs with a combined balance of \$1.1 million and two commercial loan TDRs with a combined balance of \$17,000 were charged off. Additionally, two home equity loan TDRs with a combined balance of \$7,000, one residential mortgage loan TDR with a balance of \$109,000, five commercial real estate loan TDRs with a combined balance of \$851,000 and ten commercial loan TDRs with a combined balance of \$2.0 million were paid off.

The following table provides a roll forward of troubled debt restructurings for the periods indicated (in thousands):

		For the six months ended		For the year
		2013	June 30, 2012	ended December 31, 2012
Beginning TDR balance:	\$	89,444	69,429	69,429

Credit quality indicators: We categorize loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We analyze loans individually by classifying the loans by credit risk. Credit relationships greater than or equal to \$1.0 million classified as special mention or substandard are reviewed quarterly for further deterioration or improvement to determine if the loan is appropriately classified. We use the following definitions for risk ratings other than pass:

Special mention Loans designated as special mention have specific, well-defined risk issues, which create a high level of uncertainty regarding the long-term viability of the business. Loans in this class are considered to have high-risk characteristics. A special mention loan exhibits material negative financial trends due to company-specific or systemic conditions. If these potential weaknesses are not mitigated, they threaten the borrower's capacity to meet its debt obligations. Special mention loans still demonstrate sufficient financial flexibility to react to and positively address the root cause of the adverse financial trends without significant deviations from their current business strategy. Their potential weaknesses deserve our close attention and warrant enhanced monitoring.

Substandard Loans classified as substandard are inadequately protected by the current net worth and payment capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected.

Doubtful Loans classified as doubtful have all the weaknesses inherent in those classified as substandard. In addition, those weaknesses make collection or liquidation in full highly questionable and improbable. A loan classified as doubtful exhibits discernible loss potential, but a complete loss seems very unlikely. The possibility of a loss on a doubtful loan is high, but because of certain important and reasonably specific pending factors that may strengthen the loan, its classification as an estimated loss is deferred until a more exact status can be determined.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

Loss Loans classified as loss are considered uncollectible and of such value that the continuance as a loan is not warranted. A loss classification does not mean that the loan has no recovery or salvage value; instead, it means that it is not practical or desirable to defer writing off all or a portion of a basically worthless loan even though partial recovery may be affected in the future.

The following table sets forth information about credit quality indicators, which were updated during the quarter ended June 30, 2013 (in thousands):

	Pass	Special mention	Substandard	Doubtful	Loss	Recorded investment in loans receivable
Personal Banking:

For the quarter ended June 30, 2012	279
For the six months ended June 30, 2013	697
For the six months ended June 30, 2012	574
For the year ending December 31, 2013	1,210
For the year ending December 31, 2014	814
For the year ending December 31, 2015	571
For the year ending December 31, 2016	415
For the year ending December 31, 2017	259
For the year ending December 31, 2018	173

Table of Contents

The following table provides information for the changes in the carrying amount of goodwill (in thousands):

		Community Banks	Consumer Finance	Total
Balance at December 31, 2011	\$	170,269	1,613	171,882
Goodwill acquired		2,579		2,579
Impairment losses				
Balance at December 31, 2012		172,848	1,613	174,461
Goodwill acquired		2		2
Impairment losses				
Balance at June 30, 2013	\$	172,850	1,613	174,463

We performed our annual goodwill impairment test as of June 30, 2013 and concluded that goodwill was not impaired. See the Overview of Critical Accounting Policies Involving Estimates section for a description of our testing procedures.

(6) **Guarantees**

We issue standby letters of credit in the normal course of business. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party. We are required to perform under a standby letter of credit when drawn upon by the guaranteed third party in the case of nonperformance by our customer. The credit risk associated with standby letters of credit is essentially the same as that involved in extending loans to customers and is subject to normal loan underwriting procedures. Collateral may be obtained based on management's credit assessment of the customer. At June 30, 2013, the maximum potential amount of future payments we could be required to make under these standby letters of credit was \$43.5 million, of which \$42.9 million is fully collateralized. At June 30, 2013, we had a liability, which represents deferred income, of \$868,000 related to the standby letters of credit. There are no recourse provisions that would enable us to recover any amounts from third parties.

(7) **Earnings Per Share**

Basic earnings per common share (EPS) is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period, without considering any dilutive items. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. All stock options outstanding during the quarter and six months ended June 30, 2013 were included in the computation of diluted earnings per share because the stock options' exercise price was less than the average market price of the common shares of \$12.45 and \$12.51, respectively. Stock options to purchase 3,211,267 shares of common stock with a weighted average exercise price of \$12.28 per share were outstanding during the quarter and six months ended June 30, 2012 but were not included in the computation of diluted earnings per share for these periods because the options' exercise price was greater than the average market price of the common shares of \$11.91 and \$12.27, respectively.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The computation of basic and diluted earnings per share follows (in thousands, except share data and per share amounts):

	Quarter ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Reported net income	\$ 13,478	16,361	28,776	31,542
Weighted average common shares outstanding	90,423,717	94,294,956	90,413,780	94,205,239
Dilutive potential shares due to effect of stock options	493,419	205,921	484,258	377,866
Total weighted average common shares and dilutive potential shares	90,917,136	94,500,877	90,898,038	94,583,105
Basic earnings per share:	\$ 0.15	0.17	0.32	0.33
Diluted earnings per share:	\$ 0.15	0.17	0.32	0.33

(8) **Pension and Other Post-retirement Benefits**

The defined benefit pension plan was amended to lock-in all benefits earned through March 31, 2013 based on the plan formula using years of service and average monthly compensation as of March 31, 2013. The amendments also provide that, for service commencing January 1, 2013, additional benefits will be earned equal to 1% of career average pay for each year that a participant completes at least 1,000 hours of service. Also, effective April 1, 2013, participants who are eligible to receive required minimum distributions due to attaining age 70 ½ will be required to begin payment of benefits even though they may remain employed by us.

The following table sets forth the net periodic costs for the defined benefit pension plans and post-retirement healthcare plans for the periods indicated (in thousands):

Components of net periodic benefit cost

	Quarter ended June 30,		Other post-retirement benefits	
	2013	2012	2013	2012
Service cost	\$ 1,138	1,857		
Interest cost	1,301	1,433	16	16
Expected return on plan assets	(2,138)	(1,948)		
Amortization of prior service cost	(580)	(40)		
Amortization of the net loss	919	690	13	13
Net periodic benefit cost	\$ 640	1,992	29	29

Components of net periodic benefit cost

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

		Six months ended June 30,			
		Pension benefits		Other post-retirement benefits	
		2013	2012	2013	2012
Service cost	\$	2,276	3,715		
Interest cost		2,602	2,865	32	33
Expected return on plan assets		(4,276)	(3,896)		
Amortization of prior service cost		(1,160)	(80)		
Amortization of the net loss		1,838	1,380	26	25
Net periodic benefit cost	\$	1,280	3,984	58	58

Table of Contents

We made no contribution to our pension or other post-retirement benefit plans during the six months ended June 30, 2013. While we are not required to make a minimum contribution, we anticipate making a tax-deductible contribution of approximately \$4.5 million to our defined benefit pension plan for the year ending December 31, 2013.

(9) **Disclosures About Fair Value of Financial Instruments**

Fair value information about financial instruments, whether or not recognized in the consolidated statement of financial condition, is required to be disclosed. These requirements exclude certain financial instruments and all nonfinancial instruments. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

Financial assets and liabilities recognized or disclosed at fair value on a recurring basis and certain financial assets and liabilities on a non-recurring basis are accounted for using a three-level hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. This hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within different levels of the fair value hierarchy, the lowest level input that has a significant impact on fair value measurement is used.

Financial assets and liabilities are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1 Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in actively traded markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.
- Level 2 Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets or liabilities that are actively traded. Level 2 also includes pricing models in which the inputs are corroborated by market data, for example, matrix pricing.
- Level 3 Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include the following:
 - Quotes from brokers or other external sources that are not considered binding;
 - Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price;
 - Quotes and other information from brokers or other external sources where the inputs are not deemed observable.

We are responsible for the valuation process and as part of this process may use data from outside sources in establishing fair value. We perform due diligence to understand the inputs used or how the data was calculated or derived. We also corroborate the reasonableness of

external inputs in the valuation process.

The carrying amounts reported in the consolidated statement of financial condition approximate fair value for the following financial instruments: cash on hand, interest-earning deposits in other institutions, federal funds sold and other short-term investments, accrued interest receivable, accrued interest payable, and marketable securities available-for-sale.

Table of Contents

Marketable Securities

Where available, market values are based on quoted market prices, dealer quotes, and prices obtained from independent pricing services.

Debt securities available for sale - Generally, debt securities are valued using pricing for similar securities, recently executed transactions and other pricing models utilizing observable inputs. The valuation for most debt securities is classified as Level 2. Securities within Level 2 include corporate bonds, municipal bonds, mortgage-backed securities and US government obligations. Certain corporate debt securities do not have an active market and as such the broker pricing received uses alternative methods. The fair value of these corporate debt securities is determined by using a discounted cash flow model using market assumptions, which generally include cash flow, collateral and other market assumptions. As such, these securities are included herein as Level 3 assets.

Equity securities available for sale Level 1 securities include publicly traded securities valued using quoted market prices. We consider the financial condition of the issuer to determine if the securities have indicators of impairment.

Debt securities held to maturity The fair value of debt securities held to maturity is determined in the same manner as debt securities available for sale.

Loans Receivable

Loans with comparable characteristics including collateral and re-pricing structures are segregated for valuation purposes. Each loan pool is separately valued utilizing a discounted cash flow analysis. Projected monthly cash flows are discounted to present value using a market rate for comparable loans, which is not considered an exit price. Characteristics of comparable loans included remaining term, coupon interest, and estimated prepayment speeds. Delinquent loans are separately evaluated given the impact delinquency has on the projected future cash flow of the loan and the approximate discount or market rate.

FHLB Stock

Due to the restrictions placed on the transferability of FHLB stock it is not practical to determine the fair value.

Deposit Liabilities

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

The estimated fair value of deposits with no stated maturity, which includes demand deposits, money market, and other savings accounts, is the amount payable on demand. Although market premiums paid for depository institutions reflect an additional value for these low-cost deposits, adjusting fair value for any value expected to be derived from retaining those deposits for a future period of time or from the benefit that results from the ability to fund interest-earning assets with these deposit liabilities is prohibited. The fair value estimates of deposit liabilities do not include the benefit that results from the low-cost funding provided by these deposits compared to the cost of borrowing funds in the market. Fair values for time deposits are estimated using a discounted cash flow calculation that applies contractual cost currently being offered in the existing portfolio to current market rates being offered locally for deposits of similar remaining maturities. The valuation adjustment for the portfolio consists of the present value of the difference of these two cash flows, discounted at the assumed market rate of the corresponding maturity.

Borrowed Funds

Fixed rate advances are valued by comparing their contractual cost to the prevailing market cost. The carrying amount of repurchase agreements approximates the fair value.

Table of Contents**Junior Subordinated Debentures**

The fair value of junior subordinated debentures is calculated using the discounted cash flows at the prevailing rate of interest.

Cash flow hedges Interest rate swap agreements (swaps)

The fair value of the swaps is the amount we would expect to pay to terminate the agreements and is based upon the present value of the expected future cash flows using the LIBOR swap curve, the basis for the underlying interest rate.

Off-Balance Sheet Financial Instruments

These financial instruments generally are not sold or traded, and estimated fair values are not readily available. However, the fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements. Commitments to extend credit are generally short-term in nature and, if drawn upon, are issued under current market terms. At June 30, 2013 and December 31, 2012, there was no significant unrealized appreciation or depreciation on these financial instruments.

The following table sets forth the carrying amount and estimated fair value of our financial instruments included in the consolidated statement of financial condition at June 30, 2013:

	Carrying amount	Estimated fair value	Level 1	Level 2	Level 3
Financial assets:

Total financial liabilities	\$ 6,741,561	6,871,625	4,043,930	12,932	2,814,763

Fair value estimates are made at a point-in-time, based on relevant market data and information about the instrument. The methods and assumptions detailed above were used in estimating the fair value of financial instruments at both June 30, 2013 and December 31, 2012. There were no transfers of financial instruments between Level 1 and Level 2 during the six months ended June 30, 2013.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The following table represents assets and liabilities measured at fair value on a recurring basis at June 30, 2013 (in thousands):

	Level 1	Level 2	Level 3	Total assets at fair value

Table of Contents

The table below presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the periods indicated (in thousands):

	Quarter ended		Six months ended	
	June 30, 2013	June 30, 2012	June 30, 2013	June 30, 2012
Beginning balance	\$ 11,070	8,290	11,119	9,657
Total net realized investment gains/ (losses) and net change in unrealized appreciation/ (depreciation):				
Included in net income as OTTI				
Included in other comprehensive income	275	6	226	(1,361)
Purchases				
Sales				
Transfers in to Level 3				
Transfers out of Level 3				
Ending balance	\$ 11,345	8,296	11,345	8,296

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as loans measured for impairment and real estate owned. The following table represents the fair value measurement for nonrecurring assets at June 30, 2013 (in thousands):

	Level 1	Level 2	Level 3	Total assets at fair value
Loans measured for impairment	\$		81,467	81,467
Real estate owned			21,269	21,269
Total assets	\$		102,736	102,736

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as loans measured for impairment and real estate owned. The following table represents the fair value measurement for nonrecurring assets at December 31, 2012 (in thousands):

	Level 1	Level 2	Level 3	Total assets at fair value
Loans measured for impairment	\$		84,493	84,493
Real estate owned			26,165	26,165
Total assets	\$		110,658	110,658

Impaired loans A loan is considered to be impaired as described in the Overview of Critical Accounting Policies Involving Estimates, Allowance for Loan Losses section. We classify loans individually evaluated for impairment that require a specific or TDR reserve as nonrecurring Level 3.

Real Estate Owned Real estate owned is comprised of property acquired through foreclosure or voluntarily conveyed by delinquent borrowers. These assets are recorded on the date acquired at the lower of the related loan balance or fair value, less estimated disposition costs, with the fair value being determined by appraisal. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or fair value, less estimated disposition costs. We classify all real estate owned as nonrecurring Level 3.

The table presents additional quantitative information about assets measured at fair value on a recurring and nonrecurring basis and for which we have utilized Level 3 inputs to determine fair value at June 30, 2013 (dollar amounts in thousands):

	Fair value	Valuation techniques	Significant unobservable inputs	Range (weighted average)
Debt securities	\$ 11,345	Discounted cash flow	Discount margin Default rates Prepayment speeds	0.35% to 2.1% (0.67)% 1.00% 1.00% annually
Loans measured for impairment	81,467	Appraisal value (1)	Estimated cost to sell	10%
Real estate owned	21,269	Appraisal value (1)	Estimated cost to sell	10%

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which may include level 3 inputs that are not identifiable, or by using the discounted cash flow method if the loan is not collateral dependent.

The significant unobservable inputs used in the fair value measurement of our debt securities are discount margins, default rates and prepayment speeds. Significant increases in any of those rates would result in a significantly lower fair value measurement.

Table of Contents**(10) Mortgage Loan Servicing**

Mortgage servicing assets are recognized as separate assets when, through loan originations and purchases, the underlying loan is subsequently sold. Upon sale, the mortgage servicing right (MSR) is established, which represents the then-fair value of future net cash flows expected to be realized for performing the servicing activities. The fair value of the MSRs are estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs and other economic factors, which are determined based on current market conditions. In determining the fair value of the MSRs, stochastic modeling is performed using variables such as the forward yield curve, prepayment rates, annual service cost, average life expectancy and option adjusted spreads. MSRs are amortized against mortgage banking income in proportion to, and over the period of, the estimated future net servicing income of the underlying mortgage loans. MSRs are recorded in other assets on the consolidated statements of financial condition.

Capitalized MSRs are evaluated quarterly for impairment based on the estimated fair value of those rights. The MSRs are stratified by certain risk characteristics, primarily loan term and note rate. If impairment exists within a risk stratification tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced or eliminated. We do not directly hedge against realized or potential future impairment losses on our MSRs.

The following table shows changes in MSRs at and for the quarter ended June 30, 2013 (in thousands):

		Servicing rights	Valuation allowance	Net carrying value and fair value
Balance at March 31, 2013	\$	3,082		3,082
Additions/ (reductions)		69		69
Amortization		(481)		(481)
Balance at June 30, 2013	\$	2,670		2,670

The following table shows changes in MSRs at and for the six months ended June 30, 2013 (in thousands):

		Servicing rights	Valuation allowance	Net carrying value and fair value
Balance at December 31, 2012	\$	3,291		3,291
Additions/ (reductions)		451		451
Amortization		(1,072)		(1,072)
Balance at June 30, 2013	\$	2,670		2,670

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The following table shows changes in MSRs at and for the quarter ended June 30, 2012 (in thousands):

		Servicing rights	Valuation allowance	Net carrying value and fair value
Balance at March 31, 2012	\$	3,434		3,434
Additions/ (reductions)		842	(84)	758
Amortization		(773)		(773)
Balance at June 30, 2012	\$	3,503	(84)	3,419

The following table shows changes in MSRs at and for the six months ended June 30, 2013 (in thousands):

		Servicing rights	Valuation allowance	Net carrying value and fair value
Balance at December 31, 2011	\$	3,655		3,655
Additions/ (reductions)		1,342	(84)	1,258
Amortization		(1,494)		(1,494)
Balance at June 30, 2012	\$	3,503	(84)	3,419

The following table presents additional information about the inputs used to determine the fair value of our MSRs at the periods indicated:

	June 30, 2013	June 30, 2012
	(Weighted average)	
Forward yield curve (5 year LIBOR swap)	1.24%	1.03%
Prepayment rates	13.0%	21.9%
Annual service cost per loan	\$ 70	\$ 69
Average life expectancy (months)	74	47
Option adjusted spread (basis points)	800	700

(11) Guaranteed Preferred Beneficial Interests in the Company's Junior Subordinated Deferrable Interest Debentures (Trust Preferred Securities) and Interest Rate Swaps

We have two statutory business trusts: Northwest Bancorp Capital Trust III, a Delaware statutory business trust and Northwest Bancorp Statutory Trust IV, a Connecticut statutory business trust (Trusts). These trusts exist solely to issue preferred securities to third parties for cash, issue common securities to the Company in exchange for capitalization of the Trusts, invest the proceeds from the sale of the trust securities in an equivalent amount of debentures of the Company, and engage in other activities that are incidental to those previously listed.

Table of Contents

Northwest Bancorp Capital Trust III (Trust III) issued 50,000 cumulative trust preferred securities in a private transaction to a pooled investment vehicle on December 5, 2006 (liquidation value of \$1,000 per preferred security or \$50,000,000) with a stated maturity of December 30, 2035. These securities carry a floating interest rate, which is reset quarterly, equal to three-month LIBOR plus 1.38%. Northwest Bancorp Statutory Trust IV (Trust IV) issued 50,000 cumulative trust preferred securities in a private transaction to a pooled investment vehicle on December 15, 2006 (liquidation value of \$1,000 per preferred security or \$50,000,000) with a stated maturity of December 15, 2035. These securities carry a floating interest rate, which is reset quarterly, equal to three-month LIBOR plus 1.38%. The Trusts have invested the proceeds of the offerings in junior subordinated deferrable interest debentures issued by the Company. The structure of these debentures mirrors the structure of the trust-preferred securities. Trust III holds \$51,547,000 of the Company's junior subordinated debentures and Trust IV holds \$51,547,000 of the Company's junior subordinated debentures. These subordinated debentures are the sole assets of the Trusts. Cash distributions on the trust securities are made on a quarterly basis to the extent interest on the debentures is received by the Trusts. We have the right to defer payment of interest on the subordinated debentures at any time, or from time-to-time, for periods not exceeding five years. If interest payments on the subordinated debentures are deferred, the distributions on the trust preferred securities are also deferred. Interest on the subordinated debentures and distributions on the trust securities is cumulative. To date, there have been no interest deferrals. Our obligation constitutes a full, irrevocable, and unconditional guarantee on a subordinated basis of the obligations of the trust under the preferred securities.

We entered into four interest rate swap agreements (swaps), designating the swaps as cash flow hedges. The swaps are intended to protect against the variability of cash flows associated with Trust III and Trust IV. The first two swaps modify the re-pricing characteristics of Trust III, wherein (i) the Company receives interest of three-month LIBOR from a counterparty and pays a fixed rate of 4.20% to the same counterparty calculated on a notional amount of \$25.0 million and (ii) the Company receives interest of three-month LIBOR from a counterparty and pays a fixed rate of 4.61% to the same counterparty calculated on a notional amount of \$25.0 million. The terms of these two swaps are five years and ten years, which expire September 2013 and September 2018, respectively. The second two swaps modify the re-pricing characteristics of Trust IV, wherein (i) the Company receives interest of three-month LIBOR from a counterparty and pays a fixed rate of 3.85% to the same counterparty calculated on a notional amount of \$25.0 million and (ii) the Company receives interest of three-month LIBOR from a counterparty and pays a fixed rate of 4.09% to the same counterparty calculated on a notional amount of \$25.0 million. The terms of these two swaps are seven years and ten years, which expire September 2015 and September 2018, respectively. The swap agreements were entered into with a counterparty that met our credit standards and the agreements contain collateral provisions protecting the at-risk party. We believe that the credit risk inherent in the contracts is not significant. At June 30, 2013, \$9.8 million of cash was pledged as collateral to the counterparty.

At June 30, 2013, the fair value of the swap agreements was \$(9.4) million and was the amount we would have expected to pay if the contracts were terminated. There was no material hedge ineffectiveness for these swaps.

Table of Contents

The following table shows liability derivatives, included in other liabilities, at June 30, 2013 and December 31, 2012 (in thousands):

	June 30, 2012	December 31, 2011
Fair value	\$ 9,385	12,932
Notional amount	100,000	100,000
Collateral posted	9,805	13,505

(12) Legal Proceedings

We establish accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated. As of June 30, 2013 we have accrued \$2.2 million. This amount is based on our analysis of currently available information and is subject to significant judgment and a variety of assumptions and uncertainties. Any such accruals are adjusted thereafter as appropriate to reflect changes in circumstances. Due to the inherent subjectivity of assessments and unpredictability of outcomes of legal proceedings, any amounts accrued may not represent the ultimate loss to us from legal proceedings.

Daly v. Northwest Savings Bank

On July 11, 2011, we were named as a defendant in an alleged class action lawsuit filed in the United States District Court for the Western District of Pennsylvania, captioned as Daly v. Northwest Savings Bank, No. 2:11-cv-00911-DSC. The Complaint challenges the credit disclosures provided to residential mortgage loan applicants and the policies related to the residential mortgage loan application process and the prequalification request process. The Complaint asserts statutory claims under the Fair Credit Reporting Act, 15 U.S.C. 1681g(g), and seeks statutory damages and attorneys' fees. We filed a motion for summary judgment and the plaintiff filed a motion for class certification, which we opposed. By way of Opinion and Order dated March 20, 2013, the Court denied our motion for summary judgment as to plaintiff's individual claims, but also denied plaintiff's motion for class certification. Following plaintiff's filing of a renewed motion for class certification, a settlement conference was held with the trial court in which a resolution to the case was reached. An Order dismissing the plaintiff's Complaint, with prejudice, was signed by the Court on July 19, 2013 and the matter has been formally concluded.

Toth v. Northwest Savings Bank

On May 7, 2012, we were named as a defendant in an alleged class action lawsuit filed in the Court of Common Pleas of Allegheny County, Pennsylvania, captioned as Toth v. Northwest Savings Bank, No. GD-12-8014. The Complaint challenges the manner in which debit card transaction overdraft fees were charged and the policies related to the posting order of debit card transactions. The Complaint asserts various claims under state law and seeks compensatory damages and attorneys' fees. We filed preliminary objections seeking dismissal of the case on June 29, 2012. In response, the plaintiff filed an Amended Complaint on September 6, 2012. On November 5, 2012, we filed preliminary objections to the Amended Complaint. Plaintiff filed her opposition to our preliminary objections on December 6, 2012, and we filed our reply in support of the preliminary objections on January 3, 2013. On June 25, 2013, the Court entered an Opinion and Order sustaining our preliminary objections to several counts of plaintiff's First Amended Complaint, but overruling objections to plaintiff's asserted violation of Pennsylvania's Unfair Trade Practices and Consumer Protection Law (UTPCPL). We have filed an Answer and New Matter to plaintiff's First Amended Complaint and Application to the Court to Amend the June 25, 2013 Opinion and Order to permit immediate appeal of the decision pertaining to plaintiff's UTPCPL claim. We intend to vigorously defend against the plaintiff's claims and to oppose any effort to certify a class in

this case. At this stage of

Table of Contents

the lawsuit, it is not yet possible to estimate potential losses, if any. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of this proceeding will have a material adverse effect on our financial position, or cash flows; although, at the present time, we are not in a position to determine whether such proceeding will have a material adverse effect on our results of operations in any future quarterly reporting period.

American Equity Rentals One, LLC v. Northwest Savings Bank

On August 3, 2012, we were named as a defendant in a lawsuit filed in the Circuit Court for Baltimore County, Maryland, No. 03-C-12-00797807 by American Equity Rentals One, LLC, and others, obligors against whom we obtained confessed judgments, upon the borrowers' default on several related credit facilities. The obligor-plaintiffs allege tort claims against us and one of our loan officers arising out of the lending relationship. The Court has denied a motion to dismiss and we are in the midst of discovery. We intend to vigorously defend against plaintiff's tort claims. At this stage of the lawsuit, it is not yet possible to estimate potential losses, if any. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management, after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of this proceeding will have a material adverse effect on our financial position, or cash flows; although, at the present time, we are not in a position to determine whether such proceeding will have a material adverse effect on our results of operations in any future quarterly reporting period.

USDA v. Kathleen M. Schwab and Brian G. Schwab v. Northwest Savings Bank

On December 19, 2012, The Schwabs filed a Complaint against us in the Court of Common Pleas of Clarion County, Pennsylvania, No. 409-2012 to join us as an additional defendant alleging that if it is determined that the United States Department of Agriculture (USDA) is entitled to relief (the mortgages are reformed and corrected by the Court so as to add Brian G. Schwab's name to the mortgages), then we are solely liable to the USDA or we are jointly liable with the Schwabs, or liable over the Schwabs, with regard to the mortgages held by the USDA. On February 1, 2013, we filed Preliminary Objections to the Complaint joining us on the grounds that the USDA's lawsuit does not involve any claim for money. We await a decision on our Preliminary Objections. At this stage of the lawsuit, it is not yet possible to estimate potential losses, if any. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management, after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of this proceeding will have a material adverse effect on our financial position, or cash flows; although, at the present time, we are not in a position to determine whether such proceeding will have a material adverse effect on our results of operations in any future quarterly reporting period.

Northwest Savings Bank v. Albert S. Marshal and Boca Rio Townhome Association, Inc.

On July 8, 2011, we initiated a mortgage foreclosure lawsuit filed in the Court of Common Pleas, Dauphin County, Pennsylvania, captioned as Northwest Savings Bank v. Albert S. Marshal and Boca Rio Townhome Association, Inc. (Boca Rio), No. 2011 CV 6719 MF. The Complaint seeks to foreclose on two mortgages with respect to the real property located at 920 West Areba Avenue, Hershey, Dauphin County, Pennsylvania 17033 (the Property). Defendant Marshal was the mortgagor of the two mortgages, and Boca Rio is the party to whom the Property was transferred without the mortgages having been paid in full. In response, on August 8, 2011, Defendant Boca Rio filed its Answer with New Matter and Counterclaim. In the Counterclaim, Defendant Boca Rio alleges that we violated the Mortgage Satisfaction Act, 21 P.S. §721-1 et. seq., because we did not satisfy the mortgages that Defendant Boca Rio alleges they paid in full. On August 29, 2011, we filed Preliminary Objections to Defendant Boca Rio's Counterclaim, seeking dismissal of the Counterclaim because Defendant Boca Rio was not a mortgagor under the Mortgage Satisfaction Act and therefore, did not have standing to bring a claim. On September 15, 2011,

Table of Contents

Defendant Boca Rio filed an Answer with New Matter and Amended Counterclaim. On September 30, 2011, we filed Preliminary Objections to Defendant Boca Rio's Amended Counterclaim. On October 11, 2011, Defendant Boca Rio filed its Answer to our Preliminary Objections. The Court denied our Preliminary Objections on March 6, 2012. Once discovery is complete, we intend to file a motion for summary judgment, seeking dismissal of the Counterclaim and intend to continue to vigorously defend against Defendant Boca Rio's claims asserted in the Counterclaim as well as continue to prosecute the mortgage foreclosure action. At this stage of the lawsuit, it is not yet possible to estimate potential losses, if any. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management, after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of this proceeding will have a material adverse effect on our financial position, or cash flows; although, at the present time, we are not in a position to determine whether such proceeding will have a material adverse effect on our results of operations in any future quarterly reporting period.

Table of Contents**(13) Changes in Accumulated Other Comprehensive Income**

The following table shows the changes in accumulated other comprehensive income by component for the periods indicated (in thousands):

	For the quarter ended June 30, 2013			
	Unrealized gains and losses on securities available-for-sale	Change in fair value of interest rate swaps	Change in defined benefit pension plans	Total
Balance as of March 31, 2013	\$ 16,457	(7,725)	(18,707)	(9,975)
Other comprehensive income before reclassification adjustments	(11,399)	1,626		(9,773)
Amounts reclassified from accumulated other comprehensive income (1), (2)	(68)		229	161
Net other comprehensive income	(11,467)	1,626	229	(9,612)
Balance as of June 30, 2013	\$ 4,990	(6,099)	(18,478)	(19,587)

	For the quarter ended June 30, 2012			
	Unrealized gains and losses on securities available-for-sale	Change in fair value of interest rate swaps	Change in defined benefit pension plans	Total
Balance as of March 31, 2012	\$ 15,503	(8,313)	(27,977)	(20,787)
Other comprehensive income before reclassification adjustments	894	(641)		253
Amounts reclassified from accumulated other comprehensive income (3), (4)	(141)		431	290
Net other comprehensive income	753	(641)	431	543
Balance as of June 30, 2012	\$ 16,256	(8,954)	(27,546)	(20,244)

(1) Consists of realized gains on securities (gain on sales of investments, net) of \$112, net of tax (income tax expense) of \$(44).

(2) Consists of amortization of prior service cost (compensation and employee benefits) of \$580 and amortization of net loss (compensation and employee benefits) of \$(932), net of tax (income tax expense) of \$123. See note 8.

(3) Consists of realized gains on securities (gain on sales of investments, net) of \$232, net of tax (income tax expense) of \$91.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

(4) Consists of amortization of prior service cost (compensation and employee benefits) of \$40 and amortization of net loss (compensation and employee benefits) of \$(703), net of tax (income tax expense) of \$232. See note 8.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

The following table shows the changes in accumulated other comprehensive income by component for the periods indicated (in thousands):

	For the six months ended June 30, 2013			
	Unrealized gains and losses on securities available-for-sale	Change in fair value of interest rate swaps	Change in defined benefit pension plans	Total
Balance as of December 31, 2012	\$ 15,853	(8,405)	(18,936)	(11,488)
Other comprehensive income before reclassification adjustments	(10,729)	2,306		(8,423)
Amounts reclassified from accumulated other comprehensive income (1), (2)	(134)		458	324
Net other comprehensive income	(10,863)	2,306	458	(8,099)
Balance as of June 30, 2013	\$ 4,990	(6,099)	(18,478)	(19,587)

	For the six months ended June 30, 2012			
	Unrealized gains and losses on securities available-for-sale	Change in fair value of interest rate swaps	Change in defined benefit pension plans	Total
Balance as of December 31, 2011	\$ 14,046	(8,864)	(28,408)	(23,226)
Other comprehensive income before reclassification adjustments	2,255	(90)		2,165
Amounts reclassified from accumulated other comprehensive income (3), (4)	(45)		862	817
Net other comprehensive income	2,210	(90)	862	2,982
Balance as of June 30, 2012	\$ 16,256	(8,954)	(27,546)	(20,244)

(1) Consists of realized gains on securities (gain on sales of investments, net) of \$221, net of tax (income tax expense) of \$(87).

(2) Consists of amortization of prior service cost (compensation and employee benefits) of \$1,160 and amortization of net loss (compensation and employee benefits) of \$(1,864), net of tax (income tax expense) of \$246. See note 8.

(3) Consists of realized gains on securities (gain on sales of investments, net) of \$312 and other-than-temporary-impairment losses (net impairment losses) of \$(238), net of tax (income tax expense) of \$(29).

(4) Consists of amortization of prior service cost (compensation and employee benefits) of \$80 and amortization of net loss (compensation and employee benefits) of \$(1,405), net of tax (income tax expense) of \$463. See note 8.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS

Forward-Looking Statements:

In addition to historical information, this document may contain certain forward-looking statements, as defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements contained herein are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, as they reflect management's analysis only as of the date of this report. We have no obligation to revise or update these forward-looking statements to reflect events or circumstances that arise after the date of this report.

Important factors that might cause such a difference include, but are not limited to:

- changes in laws or government regulations or accounting policies affecting financial institutions, including the Dodd-Frank Act, the Consumer Financial Protection Bureau, the capital ratios of Basel III as adopted by the federal banking authorities, changes in regulatory fees and FDIC insurance costs;
- general economic conditions, either nationally or in our market areas, that are worse than expected;
- competition among depository and other financial institutions;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- adverse changes in the securities markets;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- changes in consumer spending, borrowing and savings habits;
- our ability to continue to increase and manage our business and personal loans;
- possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;
- the impact of the economy on our loan portfolio (including cash flow and collateral values), investment portfolio, customers and capital market activities;
- the impact of the current governmental effort to restructure the U.S. financial and regulatory system;
- changes in the financial performance and/or condition of our borrowers; and

- the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Overview of Critical Accounting Policies Involving Estimates

Critical accounting policies involve accounting estimates that: a) require assumptions about highly uncertain matters, and b) could vary sufficiently enough to have a material effect on our financial condition and/ or results of operations.

Allowance for Loan Losses - Provisions for estimated loan losses and the amount of the allowance for loan losses are based on losses inherent in the loan portfolio that are both probable and can be reasonably estimated at the date of the financial statements. We believe, to the best of our knowledge, that all known losses as of the statement of condition dates have been recorded.

For all classes of loans, we consider a loan to be impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. In evaluating whether

Table of Contents

a loan is impaired, we consider not only the amount that we expect to collect but also the timing of collection. Generally, if a delay in payment is insignificant (e.g., less than 30 days), a loan is not deemed to be impaired.

When a loan is considered to be impaired, the amount of impairment is measured in one of three ways, the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's market price, or fair value of the collateral, less estimated cost to sell, if the loan is collateral dependent and it is possible we would foreclose on the property. Business Banking loans greater than or equal to \$1.0 million are reviewed to determine if they should be individually evaluated for impairment. Smaller balance, homogeneous loans (e.g., primarily residential mortgage and consumer loans) are evaluated collectively for impairment. Impairment losses are included in the allowance for loan losses. Impaired loans are charged-off or charged down when we believe that the ultimate collectability of a loan is not likely or the collateral value no longer supports the carrying value of the loan.

Interest income on non-performing loans is recognized using the cash basis method. For non-performing loans interest collected is credited to income in the period of recovery or applied to reduce principal if there is sufficient doubt about the collectability of principal.

The allowance for loan losses is shown as a valuation allowance to loans. The accounting policy for the determination of the adequacy of the allowance by portfolio segment requires us to make numerous complex and subjective estimates and assumptions relating to amounts which are inherently uncertain. The allowance for loan losses is maintained to absorb losses inherent in the loan portfolio as of the statement of condition dates. The methodology used to determine the allowance for loan losses is designed to provide procedural discipline in assessing the appropriateness of the allowance for loan losses. Losses are charged against, and recoveries are added to, the allowance for loan losses.

For Business Banking loans the allowance for loan losses consists of:

- An allowance for impaired loans;
- An allowance for homogenous loans based on historical losses; and
- An allowance for homogenous loans based on environmental factors.

The allowance for impaired loans is based on individual analysis of all nonperforming loans greater than or equal to \$1.0 million. The allowance is measured by the difference between the recorded value of impaired loans and their impaired value. The impaired value is either the present value of the expected future cash flows from the borrower, the market value of the loan, or the fair value of the collateral, less estimated cost to sell.

The allowance for homogeneous loans based on historical factors is a rolling three-year average of actual losses incurred, adjusted for a loss realization period (the period of time from the event of loss to loss realization), applied to homogenous pools of loans categorized by similar risk characteristics, not including loans evaluated individually for impairment.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

The allowance for homogeneous loans based on environmental factors augments the historical loss factors for changes in: economic conditions, lending policies and procedures, the nature and volume of the loan portfolio, management, delinquency trends, loan administration, underlying collateral values and concentrations of credit.

Table of Contents

For Personal Banking loans the allowance for loan losses consists of:

- An allowance for loans 90 days or more delinquent;
- An allowance for homogenous loans based on historical losses; and
- An allowance for homogenous loans based on environmental factors.

The allowance for loans 90 days or more delinquent is based on the loss history of loans that have become 90 days or more delinquent. We apply a historical loss factor to homogeneous pools of loans that are 90 days or more delinquent.

The allowance for homogeneous loans based on historical losses is a rolling three-year average of actual losses incurred, adjusted for a loss realization period (the period of time from the event of loss to loss realization), applied to homogenous pools of loans categorized by similar risk characteristics, not including loans that are 90 days or more delinquent.

The allowance for homogeneous loans based on environmental factors augments the historical loss factors for changes in: economic conditions, lending policies and procedures, the nature and volume of the loan portfolio, management, delinquency trends, loan administration, underlying collateral values and concentrations of credit.

We also have an unallocated allowance which is based on our judgment regarding economic conditions, collateral values and industry conditions.

The allocation of the allowance for loan losses is inherently judgmental, and the entire allowance for loan losses is available to absorb loan losses regardless of the nature of the loss.

Personal Banking loans are charged-off or charged down when they become 180 days delinquent, unless the borrower has filed for bankruptcy. Business Banking loans are charged-off or charged down when, in our opinion, they are no longer collectible, or when it has been determined that the collateral value no longer supports the carrying value of the loan, for loans that are collateral dependent.

We have not made any material changes to our methodology for the calculation of the allowance for loan losses during the current year.

Valuation of Investment Securities - Unrealized gains or losses, net of deferred taxes, on available for sale securities are reported on the statement of condition as a component of accumulated other comprehensive income/ (loss) and on the statement of comprehensive income. In

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

general, fair value is based upon quoted market prices of identical assets, when available. Semi-annually (as of May 31 and November 30) we receive quoted market prices from a second independent pricing service. If quoted market prices are not available, fair value is based upon valuation models that use cash flow, security structure and other observable information. Where sufficient data is not available to produce a fair valuation, fair value is based on broker quotes for similar assets. Broker quotes may be adjusted to ensure that financial instruments are recorded at fair value. Adjustments may include unobservable parameters.

On at least a quarterly basis, we review our investments that are in an unrealized loss position for other-than-temporary impairment (OTTI). An investment security is deemed impaired if the fair value of the investment is less than its amortized cost. If an investment security is determined to be impaired, we evaluate whether the decline in value is other-than-temporary. We also consider whether or not we expect to receive all of the contractual cash flows from the investment security based on factors that include, but are not limited to: the credit worthiness of the issuer and the historical and projected performance of the underlying collateral. Also, we may evaluate the business and financial outlook of the issuer, as well as

Table of Contents

broader economic performance indicators. In addition, we consider our intent to sell the investment securities and the likelihood that we will not have to sell the investment securities before recovery of their cost basis. Declines in fair value of investment securities that are deemed credit related are recognized in earnings while declines in fair value of investment securities deemed noncredit related are recorded in accumulated other comprehensive income, if we do not intend to sell and it is not likely we will be required to sell. If we intend to sell the security or if it is more likely than not that we will be required to sell the security, the entire unrealized loss is recorded in earnings.

Goodwill - Goodwill is not subject to amortization but must be evaluated for impairment at least annually and possibly more frequently if certain events or changes in circumstances arise. Under a quantitative approach, impairment testing requires that the fair value of each reporting unit be compared to its carrying amount, including goodwill. Reporting units are identified based upon analyzing each of our individual operating segments. A reporting unit is defined as any distinct, separately identifiable component of an operating segment for which complete, discrete financial information is available that management regularly reviews. Determining the fair value of a reporting unit requires a high degree of subjective management judgment. We have established June 30th of each year as the date for conducting the annual goodwill impairment assessment. As of June 30, 2013, we, through the assistance of an external third party, performed an impairment test on goodwill. We valued each reporting unit by using a weighted average of four valuation methodologies; comparable transaction approach, control premium approach, public market peers approach and discounted cash flow approach. Declines in fair value could result in impairment being identified. As of June 30, 2013, we did not identify any individual reporting unit where the fair value was less than the carrying value. Future changes in the economic environment or the operations of the operating units could cause changes to the variables used, which could give rise to declines in the estimated fair value of the reporting units.

Deferred Income Taxes - We use the asset and liability method of accounting for income taxes. Using this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. Management exercises significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates made in determining our deferred tax assets, which are inherently subjective, are reviewed on an ongoing basis as regulatory and business factors change. A reduction in estimated future taxable income could require us to record a valuation allowance. Changes in levels of valuation allowances could result in increased income tax expense, and could negatively affect earnings.

Other Intangible Assets - Using the purchase method of accounting for acquisitions, we are required to record the assets acquired, including identified intangible assets, and liabilities assumed at their fair values. Through the assistance of an independent third party, we analyze and prepare a core deposit study for all bank acquisitions or another identifiable intangible asset study, such as customer lists, for all non-bank acquisitions. The core deposit study reflects the cumulative present value benefit of acquiring deposits versus an alternative source of funding. The other identifiable intangible asset study reflects the cumulative present value benefit of acquiring the income stream from an existing customer base versus developing new business relationships. Based upon analysis, the amount of the premium related to the core deposits or other identifiable intangibles of the business purchased is calculated along with the estimated life of the intangible. The intangible, which is recorded in other intangible assets, is then amortized to expense on an accelerated basis over an approximate life of seven years. If it is subsequently

Table of Contents

determined that the period of economic benefit has decreased or no longer exists, accelerated amortization or impairment may occur.

Executive Summary and Comparison of Financial Condition

Total assets at June 30, 2013 were \$7.964 billion, an increase of \$21.2 million, or 0.3%, from \$7.943 billion at December 31, 2012. This increase in assets was due to an increase in marketable securities available-for-sale of \$65.9 million, which was partially offset by decreases in total loans receivable of \$11.1 million and marketable securities held-to-maturity of \$21.6 million. The net increase in total assets was funded by increases in deposits and advances from borrowers for taxes and insurance of \$18.5 million and \$9.9 million, respectively.

Total loans receivable decreased by \$11.1 million, or 0.2%, to \$5.691 billion at June 30, 2013, from \$5.702 billion at December 31, 2012. Loan originations during the six months ended June 30, 2013, of \$1.020 billion was offset by loan maturities and principal repayments of \$962.4 million and mortgage loan sales of \$51.7 million. Our business banking loan portfolio increased by \$13.7 million, or 0.7%, to \$1.989 billion at June 30, 2013 from \$1.975 billion at December 31, 2012, as we continue to emphasize retaining and attracting quality business banking relationships. Our personal banking loan portfolio decreased by \$24.8 million, or 0.7%, to \$3.703 billion at June 30, 2013 from \$3.728 billion at December 31, 2012. This decrease is attributed to residential mortgage loan sales of \$51.7 million and sluggish consumer loan demand, partly due to the recent increase in long term interest rates.

Deposit balances continue to increase across all product types with the exception of time deposits. Total deposits increased by \$18.5 million, or 0.3%, to \$5.783 billion at June 30, 2013 from \$5.765 billion at December 31, 2012. Noninterest-bearing demand deposits increased by \$40.7 million, or 5.4%, to \$796.1 million at June 30, 2013 from \$755.4 million at December 31, 2012. Interest-bearing demand deposits increased by \$35.6 million, or 4.2%, to \$887.4 million at June 30, 2013 from \$851.8 million at December 31, 2012. Savings deposits, including insured money fund accounts, increased by \$65.9 million, or 2.9%, to \$2.337 billion at June 30, 2013 from \$2.271 billion at December 31, 2012. Time deposits decreased by \$123.7 million, or 6.6%, to \$1.762 billion at June 30, 2013 from \$1.886 billion at December 31, 2012. We believe this continued movement of funds from time deposits to more liquid types of deposit accounts reflects depositors reluctance to lock-in time deposit rates and their positioning for higher interest rates in the future.

Borrowed funds decreased by \$2.7 million to \$857.3 million at June 30, 2013, from \$860.0 million at December 31, 2012 due to a decrease in repurchase agreements. During the six months ended June 30, 2013 we borrowed \$30.0 million from the FHLB with an average maturity of 8.5 years and an average interest rate of approximately 2.00% in order to secure long-term funding at favorable interest rates. None of our FHLB advances matured during the quarter and the next scheduled maturity is in 2015.

Total shareholders' equity at June 30, 2013 was \$1.128 billion, or \$12.02 per share, unchanged from \$1.128 billion, or \$12.05 per share, at December 31, 2012. This was primarily attributable to net income of \$28.8 million which was offset by cash dividend payments of \$22.0 million and a decrease in other comprehensive income of \$8.1 million.

Financial institutions and their holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by the regulators that, if undertaken, could have a direct material effect on a company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, financial institutions must meet specific capital guidelines that involve quantitative

measures of its assets, liabilities and certain off-

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

Table of Contents

balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments made by the regulators about components, risk-weighting and other factors.

Quantitative measures, established by regulation to ensure capital adequacy, require financial institutions to maintain minimum amounts and ratios (set forth in the table below) of Total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital to total assets (as defined). Capital ratios are presented in the tables below. Dollar amounts in the accompanying tables are in thousands.

	Actual		At June 30, 2013 Minimum capital requirements (1)		Well capitalized requirements (1)	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total capital (to risk weighted assts)						
Northwest Bancshares, Inc.	\$ 1,129,608	22.15%				
Northwest Savings Bank	908,051	17.90%	405,853	8.00%	507,316	10.00%
Tier I capital (to risk weighted assts)						
Northwest Bancshares, Inc.	1,060,400	20.79%				
Northwest Savings Bank	844,028	16.64%	202,927	4.00%	304,390	6.00%
Tier I capital (leverage) (to average assts)						
Northwest Bancshares, Inc.	1,060,400	13.61%				
Northwest Savings Bank	844,028	10.83%	311,688	4.00%	389,610	5.00%
At December 31, 2012						
	Actual		Minimum capital requirements (1)		Well capitalized requirements (1)	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total capital (to risk weighted assts)						
Northwest Bancshares, Inc.	\$ 1,117,979	21.53%				
Northwest Savings Bank	875,676	16.94%	413,424	8.00%	516,780	10.00%
Tier I capital (to risk weighted assts)						
Northwest Bancshares, Inc.	1,050,261	20.22%				
Northwest Savings Bank	810,727	15.69%	206,712	4.00%	310,068	6.00%
Tier I capital (leverage) (to average assts)						
Northwest Bancshares, Inc.	1,050,261	13.43%				
Northwest Savings Bank	810,727	10.41%	311,473	4.00%	389,340	5.00%

(1) The Federal Reserve does not yet have formal capital requirements established for savings and loan holding companies.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-Q

In July 2013, the FDIC and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain available-for-sale securities holdings to be included for purposes of calculating regulatory capital requirements unless a one-time opt-in

Table of Contents

or opt-out is exercised. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a capital conservation buffer consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements.

The final rule becomes effective for Northwest on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective. The final rule also implements consolidated capital requirements for savings and loan holding companies, such as the Company, effective January 1, 2015.

The following table shows the Basel III regulatory capital levels that must be maintained to avoid limitations on capital distributions and discretionary bonus payments for the periods indicated:

	Basel III Regulatory Capital Requirements					
	Current	January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Tier 1 common equity ratio plus capital conservation buffer
