**AbbVie Inc. and Subsidiaries**

**Notes to Condensed Consolidated Financial Statements (unaudited)**

**Note 1**

**Background and Basis of Presentation**

Background

The principal business of AbbVie Inc. (AbbVie or the company) is the discovery, development, manufacture and sale of a broad line of proprietary pharmaceutical products. Substantially all of AbbVie's U.S. sales are to three wholesalers. Outside the United States, products are sold primarily to health care providers or through distributors, depending on the market served.

On January 1, 2013, AbbVie became an independent publicly-traded company as a result of the distribution by Abbott Laboratories (Abbott) of 100 percent of the outstanding common stock of AbbVie to Abbott's shareholders (the separation). AbbVie was incorporated in Delaware on April 10, 2012. Abbott's Board of Directors approved the distribution of its shares of AbbVie on November 28, 2012. AbbVie's Registration Statement on Form 10 was declared effective by the U.S. Securities and Exchange Commission (SEC) on December 7, 2012. On January 1, 2013, Abbott's shareholders of record as of the close of business on December 12, 2012 received one share of AbbVie common stock for every one share of Abbott common stock held as of the record date. AbbVie's common stock began trading regular-way under the ticker symbol ABBV on the New York Stock Exchange on January 2, 2013.

During the first half of 2013, certain separation-related adjustments were recorded in stockholders' equity, principally due to the transfer of certain pension plan liabilities and assets from Abbott to AbbVie upon the legal split of those plans. Refer to Note 9 for further information. Separation-related adjustments to additional paid-in capital principally reflected dividends to AbbVie shareholders that were declared from pre-separation earnings. In addition, because the historical financial statements were derived from Abbott's records, included in the separation-related adjustments were adjustments to foreign currency translation adjustments to reflect the appropriate opening balances related to AbbVie's legal entities at the separation date. Additional separation-related adjustments to stockholders' equity could be recorded in the future as the split of the pension plans and the separation are finalized.

In connection with the separation, AbbVie and Abbott entered into transition services agreements covering certain corporate support and back office services that AbbVie has historically received from Abbott. Such services include information technology, accounts payable, payroll, receivables collection, treasury and other financial functions, as well as order entry, warehousing, engineering support, quality assurance support and other administrative services. These agreements facilitate the separation by allowing AbbVie to operate independently prior to establishing stand-alone back office systems across its organization. Transition services may be provided for up to 24 months, with an option for a one-year extension.

## Edgar Filing: AbbVie Inc. - Form 10-Q

During the three and six months ended June 30, 2013, AbbVie incurred \$67 million and \$100 million of separation-related expenses, including legal, information technology and regulatory fees, which were principally classified in selling, general and administrative expenses (SG&A).

### Basis of Presentation

The unaudited interim condensed consolidated financial statements of AbbVie have been prepared pursuant to the rules and regulations of the SEC. Accordingly, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles (GAAP) in the United States have been omitted. These unaudited interim consolidated financial statements should be read in conjunction with the company's audited combined financial statements and notes included in the company's Annual Report on Form 10-K for the year ended December 31, 2012.

It is management's opinion that these financial statements include all normal and recurring adjustments necessary for a fair presentation of the company's financial position and operating results. Net sales and net earnings for any interim period are not necessarily indicative of future or annual results.

For a certain portion of AbbVie's operations, the legal transfer of AbbVie's assets (net of liabilities) did not occur with the separation of AbbVie on January 1, 2013 due to the time required to transfer marketing authorizations and satisfy other regulatory requirements in certain countries. Under the terms of the separation agreement with Abbott, AbbVie is responsible for the business activities conducted by Abbott on its behalf, and is subject to the risks and entitled to the benefits generated by these operations and assets.

Table of Contents

As a result, the related assets and liabilities and results of operations have been reported in AbbVie's condensed consolidated financial statements as of and for the quarter ended June 30, 2013. Net sales related to these operations for the three and six months ended June 30, 2013 totaled approximately \$243 million and \$443 million, respectively. At June 30, 2013, the assets and liabilities consisted primarily of inventories of \$88 million, trade accounts receivable of \$194 million, other assets of \$101 million, and accounts payable and other accrued liabilities of \$212 million. The majority of these operations are expected to be transferred to AbbVie by the end of 2014.

Prior to the separation on January 1, 2013, the historical financial statements of AbbVie were prepared on a stand-alone basis and were derived from Abbott's consolidated financial statements and accounting records as if the former research-based pharmaceutical business of Abbott had been part of AbbVie for all periods presented. The combined financial statements reflected AbbVie's financial position, results of operations and cash flows as its business was operated as part of Abbott prior to the distribution, in conformity with U.S. GAAP. The historical financial statements also included an allocation of expenses related to certain Abbott corporate functions, including senior management, legal, human resources, finance, information technology and quality assurance. These expenses were allocated to AbbVie based on direct usage or benefit where identifiable, with the remainder allocated on a pro rata basis of revenues, headcount, square footage, number of transactions or other measures. AbbVie considers the expense allocation methodology and results to be reasonable. However, the allocations may not be indicative of the actual expenses that would have been incurred had AbbVie operated as an independent, publicly-traded company for the periods presented. These allocations totaled \$205 million and \$402 million for the three and six months ended June 30, 2012.

Interest expense (income), net	\$75	(\$2)	\$141	(\$3)

### Note 3

#### Earnings Per Share

AbbVie calculates basic earnings per share (EPS) pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends.

Table of Contents

AbbVie's restricted stock units (RSUs) and restricted stock awards (RSAs) participate in dividends on the same basis as common shares and such dividends are nonforfeitable to the holder once declared. As a result, these RSUs and RSAs meet the definition of a participating security.

The dilutive effect of participating securities is calculated using the more dilutive of the treasury stock or the two-class method. For the three and six months ended June 30, 2013, AbbVie has determined the treasury stock method to be more dilutive. As such, the dilutive effect of outstanding stock options, RSUs and RSAs was reflected in the denominator for the calculation of diluted EPS.

For the three and six months ended June 30, 2013, approximately 1 million of common shares issuable under share-based compensation plans were excluded from the computation of earnings per common share assuming dilution because the effect would have been antidilutive.

**Note 4**

**Acquisitions, Collaborations and Other Arrangements**

In the first half of 2013 and 2012, cash outflows related to collaborations, the acquisition of product rights and other arrangements totaled \$134 million and \$780 million, respectively. The company recorded acquired in-process research and development (IPR&D) charges of \$70 and \$110 million for the three months ended June 30, 2013 and 2012, respectively, and \$70 million and \$260 million for the six months ended June 30, 2013 and 2012, respectively. Significant arrangements impacting the first half of 2013 and 2012 included the following.

Alvine Pharmaceuticals, Inc.

In May 2013, AbbVie entered into a global collaboration with Alvine Pharmaceuticals, Inc. (Alvine) to develop ALV003, a novel oral treatment for patients with celiac disease. As part of the agreement, AbbVie made an initial upfront payment of \$70 million, which was expensed to IPR&D in the second quarter of 2013. AbbVie could make additional payments totaling up to \$275 million pursuant to this arrangement.

Galapagos NV

In February 2012, AbbVie recorded a charge to IPR&D of \$150 million as a result of entering into a global collaboration with Galapagos NV to develop and commercialize a next-generation, oral Janus Kinase 1 (JAK1) inhibitor in Phase II development with the potential to treat multiple autoimmune diseases. Additional payments of approximately \$1.3 billion could be required for the achievement of certain development, regulatory and commercial milestones under this agreement.

Action Pharma A/S

## Edgar Filing: AbbVie Inc. - Form 10-Q

In May 2012, AbbVie recorded a charge to IPR&D of \$110 million as a result of the acquisition of ABT-719 (previously referred to as AP214), a drug under development for the prevention of acute kidney injury associated with major cardiac surgery in patients at increased risk.

### Reata Pharmaceuticals, Inc.

In the fourth quarter of 2011, AbbVie entered into a collaboration with Reata for the joint development and commercialization of second-generation oral antioxidant inflammation modulators resulting in a charge to IPR&D of \$400 million, which was paid in the first quarter of 2012.

## **Note 5**

### **Goodwill and Intangible Assets**

The latest impairment assessment of goodwill and intangible assets not subject to amortization was completed in the third quarter of 2012. Future impairment tests for goodwill and indefinite-lived intangible assets will be performed annually in the third quarter, or earlier if indicators of impairment exist. Intangible assets with finite useful lives are amortized on a straight-line basis over their estimated useful lives.

Table of Contents**Goodwill**

(in millions)

Balance at December 31, 2012	\$6,130
Additions	25
Currency translation and other adjustments	(35)
Balance at June 30, 2013	\$6,120

Goodwill additions for the first half of 2013 related to product rights acquired during the second quarter. As of June 30, 2013, there were no accumulated goodwill impairment losses.

**Other Intangible Assets, Net**

The following table summarizes AbbVie's intangible assets.

	June 30, 2013			December 31, 2012		
(in millions)	Gross carrying amount	Accumulated amortization	Net carrying amount	Gross carrying amount	Accumulated amortization	Net carrying amount
Definite-lived intangible assets						
Developed product rights	\$4,681	(\$3,261)	\$1,420	\$4,699	(\$3,031)	\$1,668
License agreements	1,007	(772)	235	969	(734)	235
Total definite-lived intangible assets	5,688	(4,033)	1,655	5,668	(3,765)	1,903
Indefinite-lived research and development	446		446	420		420
Total intangible assets	\$6,134	(\$4,033)	\$2,101	\$6,088	(\$3,765)	\$2,323

The indefinite-lived intangible assets relate to IPR&D acquired in a business combination. Amortization expense was \$136 million and \$176 million for the three months ended June 30, 2013 and 2012, respectively and \$271 million and \$355 million for the six months ended June 30, 2013 and 2012, respectively. Additions for the first half of 2013 related to the acquisition of IPR&D and amortizable intangible assets with an average amortization period of 5 years. There were no impairment charges recorded in the six months ended June 30, 2013 and 2012.

**Note 6****Restructuring Plans**

In the second quarter of 2013, the company approved plans to restructure certain commercial operations in conjunction with the loss and expected loss of exclusivity of certain products. In 2013 and prior years, AbbVie management approved plans to realign its worldwide manufacturing operations and selected domestic and international commercial and research and development operations in order to reduce costs.

## Edgar Filing: AbbVie Inc. - Form 10-Q

Restructuring charges were \$55 million and \$64 million for the three and six months ended June 30, 2013, respectively, and were primarily recorded within SG&A in the condensed consolidated statements of earnings, with the remainder recorded within research and development and cost of products sold. Included in the charges were cash costs of \$51 million and \$60 million for the three and six months ended June 30, 2013, respectively, which mainly related to employee severance and contractual obligations.

For the three and six months ended June 30, 2012, AbbVie incurred restructuring charges of \$13 million and \$30 million, primarily related to accelerated depreciation and product transfer costs.

The following summarizes the cash activity in the restructuring reserves for the six months ended June 30, 2013.

(in millions)	
Accrued balance at December 31, 2012	\$193
2013 restructuring charges	60
Payments and other adjustments	(38)
Accrued balance at June 30, 2013	\$215

Included in payments and other adjustments for the six months ended June 30, 2013 was a \$23 million reversal in the first quarter of a previously recorded restructuring reserve due to the company's re-evaluation of a prior year decision to exit a manufacturing facility.

Table of Contents

**Note 7**

**Financial Instruments and Fair Value Measures**

**Risk Management Policy**

The company is exposed to foreign currency exchange rate and interest rate risks related to its business operations. The company's hedging policy attempts to manage these risks to an acceptable level based on the company's judgment of the appropriate trade-off between risk, opportunity and costs. The company uses derivative instruments to reduce its exposure to foreign currency exchange rates. The company is also exposed to the risk that its earnings and cash flows could be adversely impacted by fluctuations in interest rates. The company periodically enters into interest rate swaps, based on judgment, to manage interest costs in which the company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional amount. Derivative instruments are not used for trading purposes or to manage exposure to changes in interest rates for investment securities, and none of the company's outstanding derivative instruments contain credit risk related contingent features; collateral is generally not required.

**Financial Instruments**

Various AbbVie foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany transactions denominated in a currency other than the functional currency of the local entity. These contracts, with notional amounts totaling \$2.1 billion and \$1.0 billion at June 30, 2013 and December 31, 2012, respectively, are designated as cash flow hedges and are recorded at fair value. Accumulated gains and losses as of June 30, 2013 will be included in cost of products sold at the time the products are sold, generally through the next twelve months.

The company enters into foreign currency forward exchange contracts to manage its exposure to foreign currency denominated trade payables and receivables and intercompany loans. The contracts are marked-to-market, and resulting gains or losses are reflected in income and are generally offset by losses or gains on the foreign currency exposure being managed. At June 30, 2013 and December 31, 2012, AbbVie held notional amounts of \$4.1 billion and \$4.3 billion, respectively, of such foreign currency forward exchange contracts.

AbbVie was a party to interest rate hedge contracts, designated as fair value hedges, totaling \$8.0 billion at June 30, 2013 and December 31, 2012. The effect of the hedge is to change a fixed-rate interest obligation to a floating rate for that portion of the debt. AbbVie recorded the contracts at fair value and adjusted the carrying amount of the fixed-rate debt by an offsetting amount.

The following table summarizes the amounts and location of AbbVie's derivative instruments as of June 30, 2013.

(in millions)	Derivatives in asset position		Derivatives in liability position	
	Fair value	Balance sheet caption	Fair value	Balance sheet caption
	\$	n/a	\$396	Long-term liabilities

# Edgar Filing: AbbVie Inc. - Form 10-Q

Interest rate swaps designated as fair value hedges  
Foreign currency forward exchange contracts

Hedging instruments	10	Prepaid expenses and other	5	Accounts payable and accrued liabilities
Others not designated as hedges	36	Prepaid expenses and other	36	Accounts payable and accrued liabilities
Total	\$46		\$437	

The following table summarizes the amounts and location of AbbVie's derivative instruments as of December 31, 2012.

(in millions)	Derivatives in asset position		Derivatives in liability position	
	Fair value	Balance sheet caption	Fair value	Balance sheet caption
Interest rate swaps designated as fair value hedges	\$	n/a	\$81	Long-term liabilities
Foreign currency forward exchange contracts				
Hedging instruments	1	Prepaid expenses and other	10	Accounts payable and accrued liabilities
Others not designated as hedges	14	Prepaid expenses and other	15	Accounts payable and accrued liabilities
Total	\$15		\$106	

## Table of Contents

While certain derivatives are subject to netting arrangements with the company's counterparties, the company does not offset derivative assets and liabilities within the condensed consolidated balance sheets.

The following table summarizes the activity for derivative instruments and the amounts and location of income (expense) and gain (loss) reclassified into income and for certain other derivative instruments for the three months ended June 30, 2013 and 2012, respectively. The amount of hedge ineffectiveness was not significant for the three months ended June 30, 2013 or 2012.

(in millions)	(Loss) gain recognized in other comprehensive (loss) income		Income (expense) and gain (loss) reclassified into income		Income statement caption
	2013	2012	2013	2012	
Foreign currency forward exchange contracts					
Designated as cash flow hedges	\$	(\$12)	(\$2)	\$7	Cost of products sold
Not designated as hedges	n/a	n/a	31	(11)	Net foreign exchange loss
Interest rate swaps designated as fair value hedges	n/a	n/a	(275)	n/a	Interest expense, net

The loss of \$275 million related to fair value hedges recognized in net interest expense for the three months ended June 30, 2013 was offset by \$275 million in gains on the underlying hedged item, the fixed-rate debt.

The following table summarizes the activity for derivative instruments and the amounts and location of income (expense) and gain (loss) reclassified into income and for certain other derivative instruments for the six months ended June 30, 2013 and 2012, respectively. The amount of hedge ineffectiveness was not significant for the six months ended June 30, 2013 or 2012.

(in millions)	(Loss) gain recognized in other comprehensive (loss) income		Income (expense) and gain (loss) reclassified into income		Income statement caption
	2013	2012	2013	2012	
Foreign currency forward exchange contracts					
Designated as cash flow hedges	\$9	(\$2)	(\$2)	\$9	Cost of products sold
Not designated as hedges	n/a	n/a	40	(21)	Net foreign exchange loss
Interest rate swaps designated as fair value hedges	n/a	n/a	(315)	n/a	Interest expense, net

The loss of \$315 million related to fair value hedges recognized in net interest expense for the first six months of 2013 was offset by \$315 million in gains on the underlying hedged item, the fixed-rate debt.

## Fair Value Measures

The fair value hierarchy under the accounting standard for fair value measurements consists of the following three levels.

## Edgar Filing: AbbVie Inc. - Form 10-Q

- Level 1 Valuations based on unadjusted quoted prices in active markets for identical assets that the company has the ability to access;
- Level 2 Valuations based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuations in which all significant inputs are observable in the market; and
- Level 3 Valuations using significant inputs that are unobservable in the market and include the use of judgment by the company's management about the assumptions market participants would use in pricing the asset or liability.

## Table of Contents

The following table summarizes the bases used to measure certain assets and liabilities that are carried at fair value on a recurring basis in the condensed consolidated balance sheets as of June 30, 2013.

(in millions)	Balance at June 30, 2013	Basis of fair value measurement		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
<b>Assets</b>				
Cash and equivalents	\$5,183	\$462	\$4,721	\$
Certificates of deposit	3,571		3,571	
Equity securities	11	11		
Foreign currency contracts	46		46	
Total assets	\$8,811	\$473	\$8,338	\$
<b>Liabilities</b>				
Interest rate hedges	\$396	\$	\$396	\$
Foreign currency contracts	41		41	
Contingent consideration	153			153
Total liabilities	\$590	\$	\$437	\$153

The following table summarizes the bases used to measure certain assets and liabilities that are carried at fair value on a recurring basis in the combined balance sheet as of December 31, 2012.

(in millions)	Balance at December 31, 2012	Basis of fair value measurement		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
<b>Assets</b>				
Cash and equivalents	\$5,901	\$675	\$5,226	\$
Certificates of deposit	1,775		1,775	
U.S. Treasury securities	300	300		
Equity securities	12	12		
Foreign currency contracts	15		15	
Total assets	\$8,003	\$987	\$7,016	\$
<b>Liabilities</b>				
Interest rate hedges	\$81	\$	\$81	\$
Foreign currency contracts	25		25	
Contingent consideration	251			251
Total liabilities	\$357	\$	\$106	\$251

Available-for-sale equity securities consist of investments for which the fair value is determined by using the published market price per unit multiplied by the number of units held, without consideration of transaction costs. The derivatives entered into by the company are valued using publicized spot and forward prices for foreign currency hedges and publicized swap curves for interest rate hedges. The contingent payments are valued using a discounted cash flow technique that reflects management's expectations about probability and timing of payment.

Gross unrealized holding gains on available-for-sale equity securities totaled \$0.4 million and \$1 million at June 30, 2013 and December 31, 2012, respectively.

## Table of Contents

There have been no transfers of assets or liabilities between the fair value measurement levels. The following table is a reconciliation of the fair value measurements that use significant unobservable inputs (Level 3), which consist of contingent payments related to acquisitions and investments.

(in millions)	
Fair value as of December 31, 2012	\$251
Payments	(131)
Additions	28
Other	
Loss recognized in earnings	5
Fair value as of June 30, 2013	\$153

In connection with the acquisition of Solvay's U.S. pharmaceuticals business in 2010, the achievement of a certain sales milestone resulted in a payment of approximately \$131 million in the first quarter of 2013 for which a liability was previously established. Additions of \$28 million related to the acquisition of product rights during the second quarter.

In addition to the financial instruments that the company is required to recognize at fair value on the condensed consolidated balance sheets, the company has certain financial instruments that are recognized at historical cost or some basis other than fair value. The carrying values and fair values of certain financial instruments as of June 30, 2013 and December 31, 2012 are shown in the table below.

(in millions)	Book values		Approximate fair values	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
<b>Assets</b>				
Investments	\$110	\$107	\$112	\$104
<b>Liabilities</b>				
Short-term borrowings	410	1,020	410	1,020
Current maturities of long-term debt	22	22	22	22
Long-term debt	14,326	14,630	14,246	15,066

The following table summarizes the bases used to measure the approximate fair values of the financial instruments as of June 30, 2013.

(in millions)	Fair value at June 30, 2013	Basis of fair value measurement		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
<b>Assets</b>				
Investments	\$112	\$	\$31	\$81
Total assets	\$112	\$	\$31	\$81
<b>Liabilities</b>				
Short-term borrowings	\$410	\$	\$410	\$
Current maturities of long-term debt and lease obligations	22		22	
Long-term debt and lease obligations	14,246		14,246	
Total liabilities	\$14,678	\$	\$14,678	\$

Table of Contents

The following table summarizes the bases used to measure the approximate fair values of the financial instruments as of December 31, 2012.

(in millions)	Basis of fair value measurement			
	Fair value at December 31, 2012	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
<b>Assets</b>				
Investments	\$104	\$	\$32	\$72
Total assets	\$104	\$	\$32	\$72
<b>Liabilities</b>				
Short-term borrowings	\$1,020	\$	\$1,020	\$
Current maturities of long-term debt and lease obligations	22		22	
Long-term debt and lease obligations	15,066		15,066	
Total liabilities	\$16,108	\$	\$16,108	\$

Investments consist of cost method investments and held-to-maturity debt securities. In determining the fair value of cost method investments, the company takes into consideration recent transactions, as well as the financial information of the investee, which represents a Level 3 basis of fair value measurement. The fair value of held-to-maturity debt securities and long-term debt was estimated based upon the quoted market prices for the same or similar debt instruments. The fair values of short-term and current borrowings approximate the carrying values due to the short maturities of these instruments. There were no material adjustments to fair value during the six months ended June 30, 2013 or 2012. The counterparties to financial instruments consist of select major international financial institutions.

**Concentrations of Risk**

The company invests excess cash in time deposits, money market funds and U.S. Treasury securities and diversifies the concentration of cash among different financial institutions. The company monitors concentrations of credit risk associated with deposits with financial institutions. Credit exposure limits have been established to limit a concentration with any single issuer or institution.

Three U.S. wholesalers accounted for 42 percent and 48 percent of total net accounts receivables as of June 30, 2013 and December 31, 2012, respectively, and substantially all of AbbVie's U.S. sales are to these three wholesalers. In addition, net governmental receivables outstanding in Greece, Portugal, Italy and Spain totaled \$783 million at June 30, 2013 and \$725 million at December 31, 2012.

**Short-Term Borrowings**

During the six months ended June 30, 2013, the company issued and redeemed commercial paper, of which \$400 million was outstanding as of June 30, 2013, with a weighted-average interest rate of 0.3% for the six months ended June 30, 2013. There were no borrowings outstanding under the company's credit facility as of June 30, 2013.

Table of Contents**Note 8****Accumulated Other Comprehensive Loss**

The following table summarizes the changes in balances of each component of accumulated other comprehensive loss, net of tax as of June 30, 2013.

(in millions) (brackets denote losses)	Foreign currency translation adjustments	Pension and post- employment benefits	Unrealized gains (losses) on marketable equity securities	Gains (losses) on hedging activities	Total
Balance as of December 31, 2012	\$181	(\$511)	\$1	(\$21)	(\$350)
Other comprehensive income before reclassifications	(182)		(1)	9	(\$174)
Amounts reclassified from accumulated other comprehensive income		35		2	\$37
Net current-period other comprehensive income	(182)	35	(1)	11	(\$137)
Separation-related adjustments	241	(934)		11	(\$682)
Balance as of June 30, 2013	\$240	(\$1,410)	\$	\$1	(\$1,169)

The table below presents the significant amounts reclassified out of each component of accumulated other comprehensive loss for the three and six months ended June 30, 2013.

Type of reclassification (in millions)	Three months ended June 30, 2013	Six months ended June 30, 2013
Pension and post-employment benefits		
Amortization of actuarial losses and other	\$25	\$53
Less tax expense	(9)	(18)
Total reclassification, net of tax	\$16	\$35

**Note 9****Post-Employment Benefits**

Prior to separation, AbbVie employees participated in certain U.S. and international defined benefit pension and other post-employment plans sponsored by Abbott. These plans included participants of Abbott's other businesses and were accounted for as multi-employer plans in AbbVie's combined financial statements. As a result, no asset or liability was recorded by AbbVie in the historical balance sheets through December 31, 2012 to recognize the funded status of these plans. In connection with the separation of AbbVie from Abbott on January 1, 2013, these plans were separated and AbbVie assumed obligations previously provided by Abbott and a portion of certain plans owned by AbbVie at December 31, 2012 were transferred to Abbott.

# Edgar Filing: AbbVie Inc. - Form 10-Q

The amounts shown in the table below reflect the amount of AbbVie's assumption of the net obligations for pension and other post-employment benefits.

(in millions)	Defined benefit plans	Other post-employment plans
Accumulated benefit obligation	\$2,407	\$270
Deferred losses	(1,392)	(46)
Projected benefit obligations	2,873	270
Fair value of assets	2,252	
Net liability	\$621	\$270

## Table of Contents

### Net Periodic Benefit Cost

The following is a summary of net periodic benefit cost relating to the company's pension and other post-employment benefit (OPEB) plans.

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Defined benefit plans				
Service cost	\$47	\$4	\$94	\$8
Interest cost	48	9	96	17
Expected return on plan assets	(66)	(5)	(132)	(10)
Amortization of actuarial losses and prior service costs	25	1	53	1
Net periodic pension benefit cost	\$54	\$9	\$111	\$16
	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Other post-employment plans				
Service cost	\$6	\$	\$12	\$
Interest cost	6		12	
Expected return on plan assets				
Amortization of actuarial losses and prior service costs				
Net periodic pension benefit cost	\$12	\$	\$24	\$

In the first quarter of 2013, AbbVie made a voluntary contribution of \$145 million to its main domestic defined benefit pension plan.

## Note 10

### Stock-Based Compensation

Stock-based compensation expense was \$46 million and \$35 million for the three months ended June 30, 2013 and 2012, respectively, and \$133 million and \$126 million for the six months ended June 30, 2013 and 2012, respectively. Stock-based compensation expense for the three and six months ended June 30, 2012 was allocated to AbbVie based on the portion of Abbott's incentive stock program in which AbbVie employees participated.

Prior to separation, AbbVie employees participated in Abbott's incentive stock program. Adopted after the separation, the AbbVie Incentive Stock Program provides for the assumption of certain awards granted under Abbott's incentive stock program and authorizes the grant of several different forms of benefits, including nonqualified stock options, RSAs, and RSUs.

## Edgar Filing: AbbVie Inc. - Form 10-Q

In connection with the separation, employee stock options, RSAs and RSUs were adjusted and converted into new equity awards using a formula designed to preserve the intrinsic value and fair value of the awards immediately prior to the separation. Upon the separation on January 1, 2013, holders of Abbott stock options, RSAs and RSUs generally received one AbbVie stock-based award for each Abbott stock-based award outstanding. Converted awards retained the vesting schedule and expiration date of the original awards.

### Stock Options

The expense related to stock options granted during the six months ended June 30, 2013 was based on the assumptions shown in the table below. There were no significant stock options granted in the three months ended June 30, 2013.

Risk-free interest rate	1.1%
Average life of options (years)	6.0
Volatility	32.63%
Dividend yield	4.3%
Fair value per stock option	\$6.87

## Table of Contents

The following table summarizes AbbVie stock option activity for both AbbVie and Abbott employees for the six months ended June 30, 2013.

(options in thousands, aggregate intrinsic value in millions)	Options	Weighted-average exercise price	Weighted-average remaining life (in years)	Aggregate intrinsic value
Outstanding at December 31, 2012		\$		
Options converted on January 1, 2013	47,718	27.00		
Granted	2,960	37.54		
Exercised	(8,703)	27.26		
Lapsed	(189)	27.41		
Outstanding at June 30, 2013	41,786	27.69	3.9	\$578
Exercisable at June 30, 2013	38,179	\$27.28	3.5	\$544

The aggregate intrinsic value in the table above represents the difference between the exercise price and the company's closing stock price on the last day of trading for the period ended June 30, 2013. The total intrinsic value of options exercised in the three and six months ended June 30, 2013 was \$74 million and \$116 million, respectively.

As of June 30, 2013, \$3 million of unrecognized compensation cost related to stock options is expected to be recognized as expense over approximately the next two years.

## RSAs & RSUs

The following table summarizes AbbVie RSA and RSU balances for both AbbVie and Abbott employees for the six months ended June 30, 2013.

(share units in thousands)	Share units	Weighted-average grant date fair value
Outstanding at December 31, 2012		\$
Awards converted on January 1, 2013	15,394	27.55
Granted	6,074	35.83
Vested	(7,359)	27.30
Lapsed	(270)	29.88
Outstanding at June 30, 2013	13,839	\$31.27
Unvested shares at June 30, 2013	13,762	\$31.29

The fair value of restricted stock awards and units is determined based on the quoted price of the company's common stock on the date of the grant. The fair market value of restricted stock awards and units vested in the three and six months ended June 30, 2013 was \$9 million and \$276 million, respectively. As of June 30, 2013, \$183 million of unrecognized compensation cost related to RSAs and RSUs is expected to be recognized as expense over approximately the next two years.

## Note 11

## Income Taxes

In AbbVie's historical financial statements prior to the separation, income tax expense and deferred tax balances were calculated on a separate tax return basis although AbbVie's operations had historically been included in the tax returns filed by the respective Abbott entities of which the AbbVie business was a part. Subsequent to the separation, AbbVie files tax returns on its own behalf and its income tax expense and deferred income tax balances have been recorded in accordance with AbbVie's stand-alone income tax positions. AbbVie and Abbott entered into a tax sharing agreement effective on the date of separation. For tax contingencies prior to the separation, Abbott will indemnify and hold AbbVie harmless if the tax positions are settled for amounts in excess of recorded liabilities, and AbbVie will not benefit if prior tax positions are resolved more favorably than recorded amounts.

The effective income tax rate was 21.9 percent for both the three month and six months ended June 30, 2013 and 9.6 percent and 10.7 percent for the three and six months ended June 30, 2012, respectively. The effective tax rates in each period were less than the statutory federal income tax rate of 35 percent principally due to the benefit of lower statutory tax rates and tax exemptions in certain foreign jurisdictions.

Table of Contents

The increase in the effective tax rates for the three and six months ended June 30, 2013 over the prior year periods was principally due to income tax expense relating to certain 2013 earnings outside the United States that are not deemed indefinitely reinvested. AbbVie will continue to evaluate whether to indefinitely reinvest certain future earnings in foreign jurisdictions as it analyzes its future global liquidity and financial structure.

**Note 12****Litigation**

AbbVie is involved in various claims, legal proceedings and investigations. The recorded accrual balance for litigation at June 30, 2013 was not significant. Within the next year, other legal proceedings may occur that may result in a change in the estimated loss accrued by AbbVie. While it is not feasible to predict the outcome of all other proceedings and exposures with certainty, management believes that their ultimate disposition should not have a material adverse effect on AbbVie's consolidated financial position, cash flows, or results of operations.

The U.S. Department of Justice, through the U.S. Attorney for the Western District of Virginia, and various state Attorneys General investigated AbbVie's sales and marketing activities for Depakote. The government sought to determine whether any of these activities violated civil and/or criminal laws, including the Federal False Claims Act, the Food, Drug and Cosmetic Act, and the Anti-Kickback Statute in connection with Medicare and/or Medicaid reimbursement to third parties. The state Attorneys General offices sought to determine whether any of these activities violated various state laws, including state consumer fraud/protection statutes. AbbVie recorded charges of \$1.5 billion in the third quarter of 2011 and \$100 million in the first quarter of 2012 related to civil and criminal claims arising from this matter. In May 2012, AbbVie reached resolution of all Depakote-related federal claims, Medicaid-related claims with 49 states and the District of Columbia, and consumer protection claims with 45 states and the District of Columbia. In 2012, AbbVie paid approximately \$1.6 billion for the settlement. The payments were material to AbbVie's cash flows in 2012.

**Note 13****Segment Information**

AbbVie operates in one business segment pharmaceutical products. Substantially all of AbbVie's U.S. sales are to three wholesalers. Outside the United States, products are sold primarily to health care providers or through distributors, depending on the market served. Worldwide net sales of key products were as follows.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012

Edgar Filing: AbbVie Inc. - Form 10-Q

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following is a discussion and analysis of the financial condition of AbbVie Inc. (AbbVie or the company) and the results of operations as of and for the three and six months ended June 30, 2013. This commentary should be read in conjunction with the condensed consolidated financial statements and accompanying notes appearing under Item 1. Financial Statements and Supplementary Data.

**EXECUTIVE OVERVIEW**

AbbVie is a global, research-based biopharmaceutical company. AbbVie develops and markets advanced therapies that address some of the world's most complex and serious diseases. AbbVie products are used to treat rheumatoid arthritis, psoriasis, Crohn's disease, HIV, cystic fibrosis complications, low testosterone, thyroid disease, Parkinson's disease, ulcerative colitis, and complications associated with chronic kidney disease, among other indications. AbbVie also has a pipeline of promising new medicines, including more than 20 compounds or indications in Phase II or Phase III development across such important medical specialties as immunology, renal care, hepatitis C virus (HCV), women's health, oncology, and neuroscience, including multiple sclerosis and Alzheimer's disease. AbbVie has approximately 21,500 employees and its products are sold in over 170 countries. AbbVie operates in one business segment—pharmaceutical products.

AbbVie's products include a broad line of adult and pediatric pharmaceuticals manufactured, marketed, and sold worldwide and are generally sold directly to wholesalers, distributors, government agencies, health care facilities, specialty pharmacies, and independent retailers from distribution centers and public warehouses. Outside the United States, sales are made either directly to customers or through distributors, depending on the market served. Certain products are co-marketed or co-promoted with other companies.

**Research and Development**

Research and development (R&D) innovation and scientific productivity continue to be a key strategic priority for AbbVie. AbbVie's long-term success depends to a great extent on its ability to continue to discover and develop innovative pharmaceutical products and acquire or collaborate on compounds currently in development by other biotechnology or pharmaceutical companies. R&D is focused on therapeutic areas that include virology, renal disease, neuroscience, oncology, immunology, and women's health, among others.

AbbVie continues to execute on its long-term strategy of advancing its new product pipeline and maximizing its existing portfolio through new indications and formulations. Significant developments during the first half of 2013 included the following.

- AbbVie continues to dedicate R&D efforts to expanding indications for HUMIRA, including in the fields of rheumatology, ophthalmology and dermatology. Additionally, the company recently secured approval for two new gastroenterology indications in

Japan intestinal Behcet's and ulcerative colitis. HUMIRA's list of uses includes nine approved indications in Europe and seven in the United States.

- The company released positive Phase IIb results from a study examining interferon-free therapies for the treatment of chronic HCV infection. The data showed patients achieved sustained virologic response rates regardless of baseline characteristics that have been associated with a lower response to interferon-based therapies. The company also recently completed enrollment in a comprehensive Phase III program for genotype 1 HCV that involves combinations of ABT-450; a protease inhibitor for HCV infection; ABT-333, a polymerase inhibitor; and ABT-267, a NS5A inhibitor with and without ribavirin.
- AbbVie initiated a Phase III study to assess the effects of the investigational compound atrasentan, when added to standard of care, on progression of kidney disease in patients with stage 2 to 4 chronic kidney disease and type 2 diabetes.
- The company received U.S. Food and Drug Administration (FDA) approval for Creon 36000 lipase-unit capsules for patients with exocrine pancreatic insufficiency. Creon 36000 is the highest dose of pancreatic therapy currently available for patients.

Table of Contents

For a more comprehensive discussion of AbbVie's products and pipeline, refer to the company's Annual Report on Form 10-K for the year ended December 31, 2012.

**Separation from Abbott Laboratories**

On January 1, 2013, AbbVie became an independent publicly-traded company as a result of the distribution by Abbott Laboratories (Abbott) of 100 percent of the outstanding common stock of AbbVie to Abbott's shareholders (the separation). Each Abbott shareholder of record as of the close of business on December 12, 2012 received one share of AbbVie common stock for each Abbott common share held as of the record date. AbbVie was incorporated in Delaware on April 10, 2012 and is comprised of Abbott's former research-based proprietary pharmaceuticals business. AbbVie's Registration Statement on Form 10 was declared effective by the U.S. Securities and Exchange Commission on December 7, 2012. AbbVie's common stock began trading regular-way under the ticker symbol ABBV on the New York Stock Exchange on January 2, 2013. Refer to the Basis of Presentation below for further information.

**Basis of Presentation**

Prior to the separation on January 1, 2013, the historical financial statements were prepared on a stand-alone basis and were derived from Abbott's consolidated financial statements and accounting records as if the former research-based pharmaceutical business of Abbott had been part of AbbVie for all periods presented. The combined financial statements reflected AbbVie's financial position, results of operations and cash flows as its business was operated as part of Abbott prior to the distribution, in conformity with U.S. GAAP. The historical financial statements also included an allocation of expenses related to certain Abbott corporate functions, including senior management, legal, human resources, finance, information technology and quality assurance. These expenses were allocated to AbbVie based on direct usage or benefit where identifiable, with the remainder allocated on a pro rata basis of revenues, headcount, square footage, number of transactions or other measures. AbbVie considers the expense allocation methodology and results to be reasonable. However, the allocations may not be indicative of the actual expenses that would have been incurred had AbbVie operated as an independent, publicly-traded company for the periods presented.

The historical combined financial statements reflected the operating results and financial position of AbbVie as it was operated by Abbott, rather than as an independent company. AbbVie will incur additional ongoing operating expenses to operate as an independent company. These costs will include the cost of various corporate headquarters functions, incremental information technology-related costs, and incremental costs to operate a stand-alone back office infrastructure outside the United States. In order to establish these stand-alone functions, AbbVie will also incur non-recurring expenses and capital expenditures.

It is not practicable to estimate the costs that would have been incurred in each of the periods presented in the historical financial statements for the functions described above. Actual costs that would have been incurred if AbbVie operated as a stand-alone company during these periods would have depended on various factors, including organizational design, outsourcing and other strategic decisions related to corporate functions, information technology, and international back office infrastructure.

**RESULTS OF OPERATIONS**

**Net Sales**

(in millions)	Three months ended June 30,		Percent change		Six months ended June 30,		Percent change	
			At actual	At constant			At actual	At constant
	2013	2012	currency rates 2013	currency rates 2013	2013	2012	currency rates 2013	currency rates 2013
United States	\$2,625	\$2,567	2%	2%	\$4,747	\$4,697	1%	1%
International	2,067	1,926	7%	9%	4,274	3,969	8%	10%
Net sales	\$4,692	\$4,493	4%	5%	\$9,021	\$8,666	4%	5%

Sales growth in the second quarter and first half of 2013 was driven by the continued strength of HUMIRA, both in the United States and internationally. Total company sales growth was also driven by sales of key products including Synthroid, Creon, Zemplar and Duodopa. Sales increased in the second quarter and first half of 2013 despite the loss of exclusivity for TriCor/TRILIPIX and unfavorable foreign exchange rate fluctuations.

# Edgar Filing: AbbVie Inc. - Form 10-Q

## Table of Contents

The following table details the sales of key products.

The comparisons presented at constant currency rates reflect comparative local currency sales at the prior year's foreign exchange rates. This measure provides information on the change in net sales assuming that foreign currency exchange rates had not changed between the prior and the current period. AbbVie believes that the non-GAAP measure of change in net sales at constant currency rates, when used in conjunction with the GAAP measure of change in net sales at actual currency rates, may provide a more complete understanding of the company's operations and can facilitate analysis of the company's results of operations, particularly in evaluating performance from one period to another.

On a constant currency basis, global HUMIRA sales increased 13 percent and 15 percent during the second quarter and first half of 2013, respectively, as a result of continued market expansion and higher market share across various countries, higher pricing in certain geographies and the global launch of the ulcerative colitis indication in 2012. HUMIRA continues to have strong growth in the dermatology and gastroenterology categories. In 2012, HUMIRA received approvals from the European Commission for the treatment of moderately to severely active ulcerative colitis in adult patients who have had an inadequate response to conventional

therapy, the treatment of severe axial spondyloarthritis in adult patients who have no X-ray evidence of structural damage, and the treatment of pediatric patients aged 6 to 17 years with severe active Crohn's disease who failed, are intolerant to, or have contraindications to conventional therapy. HUMIRA is approved for nine indications in the European Union. AbbVie expects to submit the U.S. regulatory application for pediatric Crohn's disease in the coming months. In 2013, the company received approval for two new gastroenterology indications in Japan—intestinal Behçet's and ulcerative colitis. AbbVie is pursuing several new indications to help further differentiate from competitive products and add to the sustainability and future growth of HUMIRA.

Table of Contents

AndroGel sales for the second quarter and first half of 2013 were impacted by rebates implemented in mid-2012 and certain account losses. AndroGel continues to hold the number one market share position in the U.S. testosterone replacement market, with approximately 60 percent of the market share. AndroGel 1% sales are expected to be impacted by generic competition in 2015.

The decline in TriCor, TRILIPX and Niaspan sales for the second quarter and first half of 2013 reflects the continued softness in the overall branded cholesterol market and the introduction of a generic version of TriCor in the U.S. market in November 2012. As a result, demand for TriCor decreased and sales for AbbVie's consolidated lipid franchise, which includes TriCor, TRILIPX and Niaspan, declined 33 percent and 30 percent for the second quarter and first half of 2013, respectively. Generic competition for TRILIPX 45 mg and 135 mg began in July 2013 and is expected to negatively impact sales, with the most pronounced decline in the fourth quarter of 2013. Under an agreement relating to AbbVie's niacin products, Niaspan may become subject to generic competition in September 2013.

U.S. sales of Kaletra declined in the second quarter and first half of 2013 primarily due to lower market share resulting from the impact of competition. On a constant currency basis, Sevoflurane sales decreased 9 percent and 10 percent for the three and six months ended June 30, 2013 due to decreased international demand.

Synthroid sales increased 24 percent and 8 percent in second quarter and first half of 2013, respectively. Synthroid maintains strong brand loyalty and market leadership, despite the entry of generics into the market many years ago.

Sales of Creon continued to grow during the second quarter and first half of 2013. Creon maintains market leadership in the pancreatic enzyme market and continues to capture the vast majority of new prescription starts. In the first quarter of 2013, the U.S. FDA approved a new dosage strength of Creon 36000 lipase-unit capsules for patients with exocrine pancreatic insufficiency. Creon 36000 is the highest dose of pancreatic therapy currently available, which may help to reduce pill burden for some patients. With this approval, Creon is able to offer patients the broadest range of dosage strengths.

**Gross Margin**

	Three months ended June 30,		Percent change	Six months ended June 30,		Percent change
(in millions)	2013	2012	2013	2013	2012	2013
Gross margin	\$3,638	\$3,420	6%	\$6,814	\$6,437	6%
as a % of net sales	78%	76%		76%	74%	

The increase in the gross profit margin in the second quarter and first half of 2013 was primarily due to lower amortization expense for intangible assets and the impact of product mix, partially offset by the effect of unfavorable foreign exchange rates.

**Selling, General and Administrative**

# Edgar Filing: AbbVie Inc. - Form 10-Q

	Three months ended June 30,		Percent change	Six months ended June 30,		Percent change
(in millions)	2013	2012	2013	2013	2012	2013
Selling, general and administrative	\$1,406	\$1,246	13%	\$2,643	\$2,493	6%
as a % of net sales	30%	28%		29%	29%	

Selling, general and administrative (SG&A) expenses for the three and six month periods ended June 30, 2013 increased due primarily to increased selling and marketing support for AbbVie's growth brands, including HUMIRA, and the incremental costs of becoming an independent company.

Table of Contents**Research and Development and Acquired In-Process Research and Development**

	Three months ended June 30,		Percent change	Six months ended June 30,		Percent change
(in millions)	2013	2012	2013	2013	2012	2013
Research and development	\$709	\$642	10%	\$1,343	\$1,284	5%
as a % of net sales	15%	14%		15%	15%	
Acquired in-process research and development	\$70	\$110	(36)%	\$70	\$260	(73)%

The increase in R&D expense reflects added funding to support the company's emerging mid- and late-stage pipeline assets and the continued pursuit of additional HUMIRA indications. R&D expense in the six months ended 2012 included the first quarter \$50 million R&D milestone payment related to a product in development for the treatment of chronic kidney disease.

Acquired in-process research and development (IPR&D) expense for the three and six months ended June 30, 2013 included the second quarter charge of \$70 million as a result of entering into a global collaboration with Alvine Pharmaceuticals. IPR&D expense for the three months ended June 30, 2012 included a charge of \$110 million as a result of the acquisition of ABT-719. IPR&D expense for the six months ended June 30, 2012 also included a charge of \$150 million as a result of entering into a global collaboration to develop and commercialize an oral, next-generation JAK1 inhibitor.

**Interest Expense (Income), Net**

Interest expense (income), net was \$75 million and \$141 million for the three and six months ended June 30, 2013, respectively, and was comprised primarily of interest expense on outstanding debt, partially offset by interest income. In November 2012, AbbVie issued \$14.7 billion of long-term debt and entered into interest rate swaps with various financial institutions, which converted its \$8.0 billion fixed rate interest rate debt to floating interest rate debt. The balance of commercial paper outstanding at June 30, 2013 was \$400 million. AbbVie expects to incur approximately \$300 million of net interest expense in 2013.

**Income Tax Expense**

The effective income tax rate was 21.9 percent for the three months and six months ended June 30, 2013 and 9.6 percent and 10.7 percent for the three and six months ended June 30, 2012, respectively. The effective tax rates in each period were less than the statutory federal income tax rate of 35 percent principally due to the benefit of lower statutory tax rates and tax exemptions in certain foreign jurisdictions. The increase in the effective tax rate in the first quarter of 2013 over the prior year was principally due to income tax expense relating to certain 2013 earnings outside the United States that are not deemed indefinitely reinvested. AbbVie will continue to evaluate whether to indefinitely reinvest certain future earnings in foreign jurisdictions as it analyzes its future global liquidity and financial structure.

## Edgar Filing: AbbVie Inc. - Form 10-Q

AbbVie expects that its effective income tax rate in 2013 will be approximately 22 percent, excluding any discrete items.

### FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

(in millions)	Six months ended June 30,	
	2013	2012
Cash flows provided by/(used in):		
Operating activities	\$3,224	\$3,155
Investing activities	1,720	(406)
Financing activities	(2,082)	(2,702)

Strong cash flows from operating activities were driven by net earnings and focused working capital management. The company made a voluntary contribution to its main domestic defined benefit pension plan of \$145 million in the first half of 2013. In the first half of 2012, AbbVie paid \$400 million to Reata related to a collaboration agreement for the joint development and commercialization of second-generation oral antioxidant inflammation modulators, for which an IPR&D charge was recorded in 2011.

## Table of Contents

The company's cash and equivalents and short-term investments increased from \$7,976 million at December 31, 2012 to \$8,754 million at June 30, 2013. AbbVie did not report cash and equivalents or short-term investments on its balance sheet at June 30, 2012 except for cash and equivalents and short-term investments that were held by entities that transferred to AbbVie. The company's cash and equivalents and short-term investments at December 31, 2012 consisted of contributions from Abbott and the proceeds of the issuance of debt. Refer to the 2012 Annual Report on Form 10-K for further discussion of the issuance of debt by AbbVie in November 2012.

During the six months ended June 30, 2013, the company issued and redeemed commercial paper, of which \$400 million was outstanding as of June 30, 2013. The balance of commercial paper outstanding as of December 31, 2012 was \$1.0 billion. Historically, cash flows from financing activities represented cash transactions with Abbott.

Dividends of \$636 million were paid on February 15, 2013 and \$638 million on May 15, 2013 to stockholders of record on January 15, 2013 and April 15, 2013, respectively, at \$0.40 per share. On June 20, 2013, the board of directors declared a quarterly cash dividend of \$0.40 per share for stockholders of record on July 15, 2013, payable on August 15, 2013. In 2013, AbbVie expects to pay regular cash dividends at an annual rate of \$1.60 per share; however, the timing, declaration, amount and payment of any dividends is within the discretion of its board of directors and will depend upon many factors, including AbbVie's financial condition, earnings, capital requirements of its operating subsidiaries, covenants associated with certain of AbbVie's debt service obligations, legal requirements, regulatory constraints, industry practice, ability to access capital markets, and other factors deemed relevant by its board of directors.

On February 15, 2013, the company announced a \$1.5 billion common stock repurchase program, which was effective immediately. Purchases of AbbVie shares may be made from time to time at management's discretion. The plan has no time limit and can be discontinued at any time.

Substantially all of AbbVie's trade receivables in Greece, Portugal, Italy and Spain are with governmental health systems. Global economic conditions and liquidity issues in these countries have resulted, and may continue to result, in delays in the collection of receivables and credit losses. While the company continues to receive payments on these receivables, these conditions have resulted in an increase in the average length of time it takes to collect accounts receivable outstanding.

Outstanding net governmental receivables in these countries at June 30, 2013 and December 31, 2012 were as follows.

(in millions)	Net receivables		Net receivables over one year past due	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
Greece	\$41	\$52	\$4	\$13
Portugal	85	80	30	23
Italy	308	308	26	40
Spain	349	285	37	2
Total	\$783	\$725	\$97	\$78

AbbVie continues to monitor the creditworthiness of customers located in these and other geographic areas and establishes an allowance against an accounts receivable when it is probable they will not be collected. In addition to closely monitoring economic conditions and budgetary and other fiscal developments in these countries, AbbVie regularly communicates with its customers regarding the status of receivable balances, including their payment plans and obtains positive confirmation of the validity of the receivables. AbbVie also monitors the potential for and periodically has utilized factoring arrangements to mitigate credit risk although the receivables included in such arrangements have historically not been a material amount of total outstanding receivables. If government funding were to become unavailable in these countries or if significant adverse changes in their reimbursement practices were to occur, AbbVie may not be able to collect the entire balance.

## **Credit Facility, Access to Capital and Credit Ratings**

### Credit Facility

AbbVie currently has a \$2.0 billion unsecured five-year revolving credit facility from a syndicate of lenders, entered into in July 2012, which also supports commercial paper borrowings. As of the date of separation, January 1, 2013, Abbott's obligations under this facility were relieved and AbbVie became the sole obligor. The credit facility enables the company to borrow funds at floating interest rates.

## Table of Contents

At June 30, 2013, the company was in compliance with all its credit facility covenants. Commitment fees under the new credit facility are not material. There were no amounts outstanding on the credit facility as of June 30, 2013.

## Access to Capital

The company intends to fund short-term and long-term financial obligations as they mature through cash on hand, future cash flows from operations or by issuing additional debt. The company's ability to generate cash flows from operations, issue debt or enter into financing arrangements on acceptable terms could be adversely affected if there is a material decline in the demand for the company's products or in the solvency of its customers or suppliers, deterioration in the company's key financial ratios or credit ratings or other material unfavorable changes in business conditions. At the current time, the company believes it has sufficient financial flexibility to issue debt, enter into other financing arrangements and attract long-term capital on acceptable terms to support the company's growth objectives.

## Credit Ratings

There were no changes in the company's credit ratings in the first half of 2013. Refer to the 2012 Annual Report on Form 10-K for further discussion of the company's credit ratings.

## **CRITICAL ACCOUNTING POLICIES**

The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenue and expenses. Certain of these policies are considered critical as these most significantly impact the company's financial condition and results of operations and require the most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Actual results may vary from these estimates. A summary of the company's significant accounting policies is included in Note 2 to the company's Annual Report on Form 10-K for the year ended December 31, 2012. There have been no significant changes in the company's application of its critical accounting policies during the first six months of 2013.

## **CERTAIN REGULATORY MATTERS**

AbbVie's markets are highly competitive and subject to substantial government regulation. For example, the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively, health care reform legislation) included an increase in the basic Medicaid rebate and extended the rebate to drugs provided through Medicaid managed care organizations. These Medicare and Medicaid rebate changes, the Medicare Part D coverage gap discount provision, and the annual fee imposed by health care reform legislation on companies that sell branded prescription drugs to specified government programs will continue to have a negative effect on AbbVie's gross profit margin in future years.

AbbVie expects debate to continue over the availability, method of delivery, and payment for health care products and services. It is not possible to predict the extent to which AbbVie or the health care industry in general might be adversely affected by these factors in the future. A more complete discussion of these factors is contained in the Business section in Item 1 and Risk Factors section in Item 1A of the company's Form 10-K.

### **Item 3. Quantitative and Qualitative Disclosures on Market Risk**

The company is exposed to risk that its earnings, cash flows and equity could be adversely impacted by changes in foreign exchange rates and interest rates. Certain derivative instruments are used when available on a cost-effective basis to hedge the company's underlying economic exposures. Refer to Note 7 for further information regarding the company's financial instruments and hedging strategies.

#### **Foreign Currency Risk**

AbbVie's primary net foreign currency translation exposures are the euro, British pound, Japanese yen and Canadian dollar. Various AbbVie foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany transactions denominated in a currency other than the functional currency of the local entity. These contracts are designated as cash flow hedges of the variability of the cash flows due to changes in foreign currency exchange rates and are marked-to-market with the resulting gains or losses reflected in accumulated other comprehensive income (loss). Deferred gains or losses on these contracts are included in cost of products sold at the time the products are sold to a third party, generally within twelve months.

Table of Contents

At June 30, 2013 and December 31, 2012, AbbVie held \$2.1 billion and \$1.0 billion, respectively, in notional amounts of such contracts, which all mature in the following calendar year.

AbbVie enters into foreign currency forward exchange contracts to manage its exposure to foreign currency denominated trade payables and receivables. The contracts, which are not designated as hedges, are marked-to-market, and resulting gains or losses are reflected in income and are generally offset by losses or gains on the foreign currency exposure being managed. At June 30, 2013 and December 31, 2012, AbbVie held notional amounts of \$4.1 billion and \$4.3 billion, respectively, of such foreign currency forward exchange contracts.

The following table reflects the total foreign currency forward contracts outstanding at June 30, 2013 and December 31, 2012.

(in millions) Receive primarily U.S. dollars in exchange for the following currencies:	June 30, 2013			December 31, 2012		
	Contract amount	Weighted average exchange rate	Fair and carrying value receivable / (payable)	Contract amount	Weighted average exchange rate	Fair and carrying value receivable / (payable)
Euro	\$4,785	1.3196	(\$8)	\$3,649	1.315	(\$10)
British pound	92	1.5375		91	1.612	
Japanese yen	320	97.2	4	323	84.4	5
Canadian dollar	141	1.039	1	154	0.992	
All other currencies	856	n/a	8	1,045	n/a	(5)
Total	\$6,194		\$5	\$5,262		(\$10)

The company estimates that a 10 percent appreciation in the underlying currencies being hedged from their levels against the U.S. dollar, with all other variables held constant, would decrease the fair value of foreign exchange forward contracts by \$608 million at June 30, 2013. If realized, this appreciation would negatively affect earnings over the remaining life of the contracts. A 10 percent appreciation is believed to be a reasonably possible near-term change in foreign currencies. Gains and losses on the hedging instruments offset losses and gains on the hedged transactions and reduce the earnings and stockholders' equity volatility relating to foreign exchange.

Currency restrictions enacted in Venezuela require AbbVie to obtain approval from the Venezuelan government to exchange Venezuelan bolivars for U.S. dollars and require such exchange to be made at the official exchange rate established by the government. Effective February 8, 2013, the Venezuelan government devalued the official exchange rate from 4.3 to 6.3, which resulted in a loss of \$11 million in the first half of 2013 recorded in net foreign exchange loss on the condensed consolidated statements of earnings.

**Interest Rate Risk**

Interest rate swaps are used to manage the company's exposure of changes in interest rates on the fair value of fixed-rate debt. The effect of these hedges is to change the fixed interest rate to a variable rate. AbbVie does not use derivative instruments, such as interest rate swaps, to manage its exposure to changes in interest rates for investment securities. At June 30, 2013 and December 31, 2012, AbbVie had interest rate hedge contracts totaling \$8.0 billion. The company estimates that an increase in the interest rates of 100-basis points would decrease the fair value of our interest rate swap contracts by approximately \$449 million at June 30, 2013. If realized, the fair value reduction would affect earnings over the remaining life of the contracts. The company estimates that an increase of 100-basis points in long-term interest rates would decrease the fair value of long-term debt by \$897 million at June 30, 2013. A 100-basis point change is believed to be a reasonably possible near-term change in interest rates.

#### **Market Price Sensitive Investments**

AbbVie holds available-for-sale equity securities from strategic technology acquisitions. The market value of these investments was approximately \$11 million and \$12 million as of June 30, 2013 and December 31, 2012, respectively. AbbVie monitors these investments for other than temporary declines in market value, and charges impairment losses to income when an other than temporary decline in value occurs. A hypothetical 20 percent decrease in the share prices of these investments would have an immaterial decrease to their fair value at June 30, 2013. A 20 percent decrease is believed to be a reasonably possible near-term change in share prices.

Table of Contents

**Non-Publicly Traded Equity Securities**

AbbVie holds equity securities from strategic technology acquisitions that are not traded on public stock exchanges. The carrying value of these investments was approximately \$74 million and \$72 million as of June 30, 2013 and December 31, 2012, respectively. AbbVie monitors these investments for other than temporary declines in market value, and charges impairment losses to income when an other than temporary decline in estimated value occurs.

**Item 4. Controls and Procedures**

**Disclosure Controls and Procedures**

***Evaluation of disclosure controls and procedures.*** The Chief Executive Officer, Richard A. Gonzalez, and the Chief Financial Officer, William J. Chase, evaluated the effectiveness of AbbVie's disclosure controls and procedures as of the end of the period covered by this report, and concluded that AbbVie's disclosure controls and procedures were effective to ensure that information AbbVie is required to disclose in the reports that it files or submits with the Securities and Exchange Commission under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and to ensure that information required to be disclosed by AbbVie in the reports that it files or submits under the Exchange Act is accumulated and communicated to AbbVie's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

**Internal Control Over Financial Reporting**

***Changes in internal control over financial reporting.*** During the quarter ended June 30, 2013, there were no changes in AbbVie's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, AbbVie's internal control over financial reporting.

***Inherent Limitations on Effectiveness of Controls***

AbbVie's management, including its Chief Executive Officer and its Chief Financial Officer, do not expect that AbbVie's disclosure controls or internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls.

The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

## **PART II. OTHER INFORMATION**

### **Item 1. Legal Proceedings**

AbbVie is involved in various claims, legal proceedings, and investigations, including those described below. While it is not feasible to predict the outcome of such pending claims, proceedings and investigations with certainty, management believes that their ultimate disposition should not have a material adverse effect on AbbVie's financial position, cash flows, or results of operations.

In its 2012 Form 10-K and 2013 Form 10-Q for the quarter ended March 31, 2013, AbbVie reported that several lawsuits filed against Unimed Pharmaceuticals, Inc., Solvay Pharmaceuticals, Inc. et al. had been consolidated for pre-trial purposes in the United States District Court for the Northern District of Georgia under Multi District Litigation Rules as In re Androgel Antitrust Litigation, MDL No. 2084.

Table of Contents

In June 2013, the United States Supreme Court reversed the Eleventh Circuit's decision affirming dismissal of the Federal Trade Commission's (FTC) claims and remanded the case brought by the FTC, ruling that the patent litigation settlement agreement with three generic companies should be examined under a rule of reason analysis.

AbbVie is seeking to enforce its patent rights relating to ritonavir tablets (a drug AbbVie sells under the trademark Norvir®). In a case filed in the United States District Court for the District of Delaware in May 2013, AbbVie alleges that Hetero USA Inc.'s and Hetero Labs Limited's proposed generic ritonavir tablets product infringes five AbbVie patents and seeks declaratory and injunctive relief. In addition, the previously-disclosed case filed in the United States District Court for the District of Delaware in which AbbVie alleges that Roxane Laboratories, Inc.'s proposed generic product infringes five AbbVie patents was transferred to the United States District Court for the Southern District of Ohio in June 2013 and consolidated with the related Norvir patent litigation against Roxane in that judicial district in July 2013.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds***(c) Issuer Purchases of Equity Securities*

Period		(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1, 2013	April 30, 2013	428,518 (1)	\$43.69	0	\$1,500,000,000 (2)
May 1, 2013	May 31, 2013	182,267 (1)	\$45.79	0	\$1,500,000,000 (2)
June 1, 2013	June 30, 2013	528,633 (1)	\$43.63	500,000	\$1,478,178,553 (2)
Total		1,139,418 (1)	\$44.00	500,000	\$1,478,178,553 (2)
