#### **Chairman's Letter**

#### to Shareholders

#### Dear Shareholders,

Despite headwinds from slow growth, fiscal and political uncertainty in many countries and some fragile economies around the world, domestic and international equity markets increased significantly in 2013. The emerging markets equity sector was an exception. Other sectors, such as real estate, were flat to down a bit and commodities were notably negative in total return performance. The fixed income market also experienced losses in many sectors.

U.S. equities in particular hit numerous all-time highs during the past year, exceeding prior rising market trends. Europe and Asia struggled with political and financial stresses but Europe's improving GDP in the second half provided hope that the region can exit recession. In Japan, the economic policies advocated by Prime Minister Shinzo Abe became a positive influence on the economy as deflationary pressures declined, while the economy in China started to stabilize due to monetary easing and supply side reforms. On the domestic front, the Federal Reserve stimulus continued throughout the year but discussion of reductions in the stimulus program caused historically low rates to rise and added to concern that interest rates could rise quickly in the near future. This provided challenges for fixed income investors.

The Federal Reserve's decision to slow down its bond buying program beginning in January 2014, and the federal budget compromise over government spending into early 2015 were positive signs that the domestic economy is moving forward. We are beginning to experience an economy that can provide encouraging conditions for GDP growth, job growth and low inflation. Additionally, downward trending unemployment and a continuing rebound in the housing market adds to a positive economic scenario going forward.

However, the current year has experienced a tumultuous start. It is in these particularly volatile markets that professional investment management is most important. Investment teams who have experienced challenging markets in the past understand how their asset class can behave in rapidly changing times. Remaining committed to their investment disciplines during these times is a critical component to achieving long-term success. In fact, many strong investment track records are established during challenging periods because experienced investment teams understand that volatile markets place a premium on companies and investment ideas that can weather the short-term volatility. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to communicate with your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

William J. Schneider Chairman of the Nuveen Fund Board March 25, 2014

Nuveen Quality Preferred Income Fund (JTP) Nuveen Quality Preferred Income Fund 2 (JPS) Nuveen Quality Preferred Income Fund 3 (JHP)

The Funds are sub-advised by a team of specialists at Spectrum Asset Management, a wholly owned subsidiary of Principal Global Investors, LLC. Mark Lieb and Phil Jacoby lead the team. Here Mark and Phil talk about their management strategy and the performance of the Funds for the six-month reporting period ended January 31, 2014.

# What key strategies were used to manage the Funds during the six-month reporting period ended January 31, 2014?

The investment objective of each Fund is to seek high current income consistent with capital preservation. Each Fund's secondary objective is to enhance portfolio value. Under normal market conditions, the Funds seek to invest at least 80% of their net assets in preferred securities and up to 20% of their net assets in debt securities, including convertible debt and convertible preferred securities.

Our underlying strategy is to maintain a balance between the individual investor-oriented \$25 par preferred securities often traded on securities exchanges and the institutional investor-oriented \$1,000 par preferred securities traded over-the-counter in the capital markets. Both types of securities offer performance opportunities, which together with the broad diversification benefits of this combined universe, help to produce potentially attractive risk-adjusted rates of return. We keep a risk-averse posture toward security structure and portfolio structure, which is an important core aspect of our efforts to preserve capital and provide attractive income relative to investment grade and senior corporate credit.

During the reporting period, long-term interest rates continued to rise triggered by the Federal Reserve (Fed) suggesting that it may taper its bond purchases. The retail sector represented by the \$25 par market sold off as a result of the fear of rising rates and investors turning to equity securities. As rates rose and equity markets performed well, the first half of the reporting period was one of the worst on record for the \$25 par market.

The capital securities market represented by the \$1000 par market had a different response. Primarily due to some structural differences available in the institutional sector that can lead to a lower effective duration (interest-rate sensitivity) than that of the \$25 par market, the \$1000 par sector outperformed. This spread pattern between the two markets is a prime example of why we seek a blend of the two preferred securities sectors. Over the long run, both the \$25 par sector and the capital securities sector combine to provide diversification benefits, which may potentially improve risk-adjusted returns.

By the second half of the reporting period, the Fed surprised the U.S. Treasury bond market with its decision to not taper its bond purchases and to continue purchasing more long term U.S. Treasuries and mortgage securities. This news ended the price declines for the \$25 par market, creating a recovery through October 2013 and into November 2013. However,

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the

portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors (Moody's) Service, Inc. or Fitch, Inc. (Fitch). Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

#### **Portfolio Managers' Comments** (continued)

the Fed's generous accommodation helped equities set new highs, but the aftermath of the bond market debacle in the third quarter of the 2013 set up the \$25 par preferred market to be harvested for needed tax losses to offset gains taken in equities. Overall, the underperformance of the retail market compared to the outperformance of the institutional market was due primarily to the unsustainable technical pressures that specifically besieged the retail market. The performance difference between the retail and institutional sectors can be explained by technical pressures that impacted the retail market. In particular, the unsustainable tax-loss selling pressures that besieged the \$25 par market primarily in December.

#### How did the Funds perform during the six-month reporting period ended January 31, 2014?

The tables in the Performance Overview and Holding Summaries section of this report provide total return performance for each Fund for the six-month, one-year, five-year and ten-year periods ended January 31, 2014. For the six-month reporting period ended January 31, 2014, all three Funds' common shares at net asset value (NAV) outperformed the Barclays U.S. Aggregate Bond Index, but underperformed the Blended Benchmark.

Two tactics were initiated during the six-month reporting period. We repositioned the Funds into higher coupon paper during August and September 2013, which we believed would foster more income. At the margin, we believed it could also dampen volatility somewhat as fears over higher long-term rates persist. We felt that it was the appropriate time to buy higher coupon longer duration paper. Purchasing AIG 8.175% on the heels of the correction was a tactic that helped to improve the coupon of the Funds by two or more basis points, but at a far cheaper price than during the first half of the year.

During the second half of the reporting period, we purchased more discount \$25 par paper despite it being oversold. Unfortunately, this detracted from performance because the sector came under further pressure by December as result of tax loss selling. The trend began to reverse in January 2014.

For JTP, the better performing issuers were mainly from the banking and financial sectors. Goldman Sachs Capital II, Prudential Financial Inc. and Deutsche Bank AG were the top three performers. Among the names that detracted from performance during the period were Stanley Black & Decker Inc., Public Storage, Inc. and PS Business Parks, Inc. For JPS, Goldman Sachs Capital II, Prudential Financial Inc. and Centaur Funding Corporation were the top three performers. John Hancock, NextEra Energy Inc. and Qwest Corporation were detracted from Fund performance. Lastly, for JHP, Goldman Sachs Capital II was a top performer along with First Union Capital. Detractors also included Stanley Black and Decker, Inc., as well as John Hancock and HSBC Holding PLC.

As we move further into a new year, we believe that the combination of low real GDP growth and low inflation will keep U.S. Treasury 30-Year bond rates contained below 4.5% and the Fed Funds Rate exceptionally low throughout 2014. The evolving trends in the capital securities sector for higher yields in European bank Tier 1 should further support positive total returns and improving current income from the Funds in the longer run as legacy paper is phased out and replaced by higher yielding "Additional Tier 1" securities.

#### **Fund**

#### Leverage

#### IMPACT OF THE FUNDS' LEVERAGE STRATEGY ON PERFORMANCE

One important factor impacting the returns of the Funds relative to their benchmarks was the Funds' use of leverage through the use of bank borrowings. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share NAV and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. The Funds' use of leverage had a positive impact on performance during this reporting period.

The Funds also continued to use swap contracts to partially fix the interest cost of leverage, which as mentioned previously, the Funds use through bank borrowings. The swap contracts impact on the Funds' performance was positive during the period.

As of January 31, 2014, the Funds' percentages of leverage are shown in the accompanying table.

	JTP	JPS	JHP
Effective Leverage*	29.31%	29.19%	29.23%
Regulatory			
Leverage*	29.31%	29.19%	29.23%

<sup>\*</sup> Effective leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Regulatory leverage consists of preferred shares issued or borrowings of a Fund. Both of these are part of a Fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

#### THE FUNDS' REGULATORY LEVERAGE

#### Bank Borrowings

As discussed previously, the Funds employ regulatory leverage through the use of bank borrowings. As of January 31, 2014, the Funds have outstanding bank borrowings as shown in the accompanying table.

	JTP	JPS	JHP
Bank Borrowings	\$234,000,000	\$464,000,000	\$89,000,000
Refer to Notes to Fina	incial Statements, Note 8	Borrowing Arrangement	s for further details.

#### **Common Share**

#### Information

#### **DISTRIBUTION INFORMATION**

The following information regarding the Funds' distributions is current as of January 31, 2014. Each Fund's distribution levels may vary over time based on each Fund's investment activities and portfolio investment value changes.

During the current reporting period, each Fund's monthly distributions to common shareholders were as shown in the accompanying table.

	Per	Common Share Amou	ınts
Ex-Distribution Date	JTP	JPS	JHP
August 2013	\$ 0.0500	\$ 0.0550	\$ 0.0520
September	0.0520	0.0550	0.0520
October	0.0520	0.0550	0.0520
November	0.0520	0.0550	0.0520
December	0.0520	0.0550	0.0520
January 2014	0.0520	0.0550	0.0520
Non-recurring supplemental taxable			
distribution*	0.0387		0.0422
Current Distribution Rate**	8.01%	7.87%	7.78%

<sup>\*</sup> Distribution paid in December 2013.

During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2014, all three Funds had positive UNII balances, based upon our best estimate, for both tax and financial reporting purposes.

#### **COMMON SHARE REPURCHASES**

During November 2013, the Nuveen Funds' Board of Directors/Trustees reauthorized the Funds' open-market share repurchase program, allowing each Fund to repurchase an aggregate of up to approximately 10% of their outstanding common shares.

As of January 31, 2014, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired common shares as shown in the accompanying table.

JTP JPS JHP

<sup>\*\*</sup> Current distribution rate is based on the Fund's current annualized monthly distribution divided by the Fund's current market price. The Fund's monthly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the fiscal year the Fund's cumulative net ordinary income and net realized gains are less than the amount of the Fund's distributions, a return of capital for tax purposes.

Common Shares Cumulatively			
Repurchased and Retired			20,000
Common Shares Authorized for			
Repurchase	6,465,000	12,040,000	2,375,000
	Nuveen Investments		
	8		

During the current reporting period, the Funds repurchased and retired common shares at a weighted average price and a weighted average discount per common share as shown in the accompanying table.

	JTP	JPS		JHP
Common Shares Repurchased and Retired				20,000
Weighted Average Price Per Common Share				
Repurchased and Retired	\$	\$		\$ 7.78
Weighted Average Discount Per Common				
Share Repurchased and Retired		%	%	13.58%
	_			

#### **COMMON SHARE EQUITY SHELF PROGRAMS**

JTP, JPS and JHP each filed registration statements with the SEC authorizing each Fund to issue an additional 6.4 million, 12.0 million and 2.3 million common shares, respectively, through equity shelf programs, which are not yet effective.

Under these equity shelf programs, the Funds, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above each Fund's NAV per common share.

#### OTHER COMMON SHARE INFORMATION

As of January 31, 2014, and during the current reporting period, the Funds' common share prices were trading at premium/(discount) to their common share NAVs as shown in the accompanying table.

		JTP	JPS	JHP
Common Share NAV	\$	8.73	\$ 9.35	\$ 9.09
Common Share Price	\$	7.79	\$ 8.39	\$ 8.02
Premium/(Discount) to NAV		(10.77)%	(10.27)%	(11.77)%
6 -Month Average Premium/(Discount) to NAV		(11.67)%	(11.80)%	(12.11)%
Nuv	een I	nvestments		
		9		

#### Risk

#### **Considerations**

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Shares of closed-end funds are subject to investment risks, including the possible loss of principal invested. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

**Investment, Market and Price Risk.** An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the corporate securities owned by the Funds, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like the Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

**Leverage Risk.** A Fund's use of leverage creates the possibility of higher volatility for a Fund's per share NAV, market price and distributions. Leverage risk can be introduced through regulatory leverage (issuing preferred shares or debt borrowings at the Fund level) or through certain derivative investments held in a Fund's portfolio. Leverage typically magnifies the total return of a Fund's portfolio, whether that return is positive or negative. The use of leverage creates an opportunity for increased common share net income, but there is no assurance that a Fund's leveraging strategy will be successful.

**Tax Risk.** The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

**Issuer Credit Risk.** This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

**Interest Rate Risk.** Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

**Reinvestment Risk.** If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original investment that generated the income.

**Preferred Stock Risk.** Preferred stocks are subordinate to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk.

**Call Risk or Prepayment Risk.** Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

**Non-U.S. Securities Risk.** Investments in non-U.S securities involve special risks not typically associated with domestic investments including currency risk and adverse political, social and economic developments. These risks often are magnified in emerging markets.

**Derivatives Strategy Risk.** Derivative securities, such as calls, puts, warrants, swaps and forwards, carry risks different from, and possibly greater than, the risks associated with the underlying investments.

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this page.

- 1 Excluding investments in derivatives.
- 2 Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (3) For fair value measurement disclosure purposes, \$25 Par (or similar) Retail Preferred and \$1,000 Par (or similar) Institutional Preferred classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.
- (5) A copy of the most recent financial statements for the investment companies in which the Fund invests can be obtained directly from the Securities and Exchange Commission on its website at http://www.sec.gov.
- (6) Perpetual security. Maturity date is not applicable.
- (7) For fair value measurement disclosure purposes, \$1,000 Par (or similar) Institutional Preferred classified as Level 1. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

- (8) Investment, or a portion of investment, is out on loan as described in Note 8 Borrowing Arrangements. The total value of investments out on loan as of the end of the reporting period was \$109,561,100.
- (9) Borrowings as a percentage of Total Investments is 29.5%.
- (10) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings. As of the end of the reporting period, investments with a value of \$480,643,237 have been pledged as collateral for Borrowings.
- (11) Other Assets Less Liabilities includes the Unrealized Appreciation (Depreciation) of derivative instruments as listed within Investments in Derivatives as of the end of the reporting period.
- (12) Effective date represents the date on which both the Fund and Counterparty commence interest payment accruals on each contract.

WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.

N/A Not applicable.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.

- (2) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (3) For fair value measurement disclosure purposes, \$25 Par (or similar) Retail Preferred and \$1,000 Par (or similar) Institutional Preferred classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.
- (5) A copy of the most recent financial statements for the investment companies in which the Fund invests can be obtained directly from the Securities and Exchange Commission on its website at http://www.sec.gov.
- (6) Perpetual security. Maturity date is not applicable.
- (7) For fair value measurement disclosure purposes, \$1,000 Par (or similar) Institutional Preferred classified as Level 1. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (8) Investment, or a portion of investment, is out on loan as described in Note 8 Borrowing Arrangements. The total value of investments out on loan as of the end of the reporting period was \$217,667,100.
- (9) Borrowings as a percentage of Total Investments is 29.3%.
- (10) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings. As of the end of the reporting period, investments with a value of \$937,226,469 have been pledged as collateral for Borrowings.
- (11) Other Assets Less Liabilities includes the Unrealized Appreciation (Depreciation) of derivative instruments as listed within Investments in Derivatives as of the end of the reporting period.
- (12) Effective date represents the date on which both the Fund and Counterparty commence interest payment accruals on each contract.

WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.

N/A Not applicable.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (3) For fair value measurement disclosure purposes, \$25 Par (or similar) Retail Preferred and \$1,000 Par (or similar) Institutional Preferred classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.
- (5) A copy of the most recent financial statements for the investment companies in which the Fund invests can be obtained directly from the Securities and Exchange Commission on its website at http://www.sec.gov.
- (6) Perpetual security. Maturity date is not applicable.
- (7) Investment, or a portion of investment, is out on loan as described in Note 8 Borrowing Arrangements. The total value of investments out on loan as of the end of the reporting period was \$51,064,800.
- (8) Borrowings as a percentage of Total Investments is 29.4%.

- (9) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings. As of the end of the reporting period, investments with a value of \$183,512,980 have been pledged as collateral for Borrowings.
- (10) Other Assets Less Liabilities includes the Unrealized Appreciation (Depreciation) of derivative instruments as listed within Investments in Derivatives as of the end of the reporting period.
- (11) Effective date represents the date on which both the Fund and Counterparty commence interest payment accruals on each contract.

WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.

N/A Not applicable.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

PPLUS PreferredPlus Trust.

(a) Per shar	re N	let Inv		` ,		` '	Loss		` ,	, ,	g the	e average	` ,	ares	method.	

- (b) The amounts shown are based on common share equivalents.
- (c) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(d) After expense reimbursement from the Adviser, where applicable. As of June 30, 2010 and September 30, 2010, the Adviser is no longer reimbursing Quality Preferred Income (JTP) and Quality Preferred Income 2 (JPS), respectively, for any fees or expenses.

(a) Per share	e Net In	vestment I	ncome (L	oss) i	s calcula	ated using	g the a	average	daily sh	are	s method.	

- (b) The amounts shown are based on common share equivalents.
- (c) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(d) After expense reimbursement from the Adviser, where applicable. As of December 31, 2010, the Adviser is no longer reimbursing Quality Preferred Income 3 (JHP), for any fees or expenses.

#### Notes to

#### Financial Statements (Unaudited)

#### 1. General Information and Significant Accounting Policies

#### **General Information**

#### Fund Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") symbols are as follows (each a "Fund" and collectively, the "Funds"):

- Nuveen Quality Preferred Income Fund (JTP) ("Quality Preferred Income (JTP)")
- Nuveen Quality Preferred Income Fund 2 (JPS) ("Quality Preferred Income 2 (JPS)")
- Nuveen Quality Preferred Income Fund 3 (JHP) ("Nuveen Quality Preferred Income 3 (JHP)")

The Funds are registered under the Investment Company Act of 1940, as amended, as diversified, closed-end registered investment companies. Quality Preferred Income (JTP), Quality Preferred Income 2 (JPS) and Quality Preferred Income Fund 3 (JHP) were organized as Massachusetts business trusts on April 24, 2002, June 24, 2002 and October 17, 2002, respectively.

#### Investment Adviser

The Funds' investment adviser is Nuveen Fund Advisors, LLC (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"). The Adviser is responsible for each Fund's overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with Spectrum Asset Management, Inc. ("Spectrum"), under which Spectrum manages the investment portfolios of the Funds. The Adviser is responsible for overseeing the Funds' investments in swap contracts.

#### Investment Objectives

Each Fund's investment objective is high current income consistent with capital preservation. Each Fund's secondary investment objective is to enhance portfolio value. Each Fund invests at least 80% of its net assets in preferred securities; up to 20% of its net assets in debt securities, including convertible debt securities and convertible preferred securities; and 100% of each Fund's total assets in securities that, at the time of investment, are investment grade quality (BBB/Baa or better), which may include up to 10% in securities that are rated investment grade by at least one nationally recognized statistical rating organization.

#### **Significant Accounting Policies**

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

#### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. As of January 31, 2014, the Funds' outstanding when-issued/delayed delivery purchase commitments were as follows:

	Quality	Quality	Quality
	Preferred	Preferred	Preferred
	Income (JTP)	Income 2 (JPS)	Income 3 (JHP)
Outstanding when-issued/delayed	(011)	(6. 5)	(61 )
purchase commitments	\$ 957,693	\$1,907,886	\$760,330

Investment Income

Dividend income is recorded on the ex-dividend date or, for foreign securities, when information is available. Interest income, which reflects the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also reflects paydown gains and losses, if any. Other income is comprised of fees earned in connection with the rehypothecation of pledged collateral as further described in Note 8 Borrowing Agreements.

### Notes to Financial Statements (Unaudited) (continued)

#### Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment or to pursue other claims or legal actions on behalf of Fund shareholders. Should a Fund receive a refund of workout expenditures paid in a prior reporting period, such amounts will be recognized as "Legal fee refund" on the Statement of Operations.

#### Dividends and Distributions to Common Shareholders

Dividends to common shareholders are declared monthly. Net realized capital gains from investment transactions, if any, are declared and distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

#### FundPreferred Shares

The Funds are authorized to issue auction rate preferred ("FundPreferred") shares. During prior fiscal periods, the Funds redeemed all of their outstanding FundPreferred shares, at liquidation value.

#### Common Shares Equity Shelf Programs and Offering Costs

Quality Preferred Income (JTP), Quality Preferred Income 2 (JPS) and Quality Preferred Income 3 (JHP) have each filed registration statements with the Securities and Exchange Commission ("SEC") authorizing the Funds to issue an additional 6.4 million, 12.0 million and 2.3 million common shares, respectively, through equity shelf programs ("Shelf Offering"), which are not yet effective.

Under these Shelf Offerings, the Funds, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above each Fund's net asset value ("NAV") per common share.

Costs incurred by the Funds in connection with their initial Shelf Offering will be recorded as a deferred charge and recognized as a component of "Deferred offering costs" on the Statement of Assets and Liabilities. These deferred charges are recognized over the period such additional shares are sold by reducing the proceeds from the Shelf Offering. These deferred charges are not to exceed the one-year life of the Shelf Offering period and will be recognized as a component of "Proceeds from shelf offering, net of offering costs" on the Statement of Changes in Net Assets. At the end of the one-year life of the Shelf Offering period, any remaining deferred charges will be expensed accordingly and recognized as a component of "Other expenses" on the Statement of Operations. Any additional costs the Funds may incur in connection with their Shelf Offerings are expensed as incurred and will be recognized as a component of "Proceeds from shelf offering, net of offering costs" on the Statement of Changes in Net Assets.

#### Indemnifications

Under the Funds' organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Netting Agreements

In the ordinary course of business, the Funds may enter into transactions subject to enforceable master repurchase agreements, International Swaps and Derivative Association, Inc. ("ISDA") master agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows each Fund to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. Generally, each Fund manages its cash collateral and securities collateral on a counterparty basis. As of January 31, 2014, the Funds were not invested in any portfolio securities or derivatives, other than repurchase agreements and swap contracts further described in Note 3 Portfolio Securities and Investments in Derivatives that are subject to netting agreements.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to common shares from operations during the reporting period. Actual results may differ from those estimates.

#### 2. Investment Valuation and Fair Value Measurements

#### **Investment Valuation**

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1 for fair value measurement purposes. Securities primarily traded on the NASDAQ National Market ("NASDAQ") are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities

traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the quoted bid price and are generally classified as Level 2.

Prices of fixed-income securities and swap contracts are provided by a pricing service approved by the Funds' Board of Trustees. These securities are generally classified as Level 2. The pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Investments in investment companies are valued at their respective NAV on the valuation date and are generally classified as Level 1.

Repurchase agreements are valued at contract amount plus accrued interest, which approximates market value. These securities are generally classified as Level 2.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the NAV of the Funds' shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed and an investor is not able to purchase, redeem or exchange shares. If significant market events occur between the time of determination of the closing price of a foreign security on an exchange and the time that the Funds' NAV is determined, or if under the Funds' procedures, the closing price of a foreign security is not deemed to be reliable, the security would be valued at fair value as determined in accordance with procedures established in good faith by the Funds' Board of Trustees. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's NAV (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or as Level 3 depending on the priority of the significant inputs. Regardless of the method employed to

value a particular security, all valuations are subject to review by the Funds' Board of Trustees or its designee.

#### **Fair Value Measurements**

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

Level 1 Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.

Level 2 Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

# Notes to Financial Statements (Unaudited) (continued)

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

The Nuveen funds' Board of Directors/Trustees is responsible for the valuation process and has delegated the oversight of the daily valuation process to the Adviser's Valuation Committee. The Valuation Committee, pursuant to the valuation policies and procedures adopted by the Board of Directors/Trustees, is responsible for making fair value determinations, evaluating the effectiveness of the funds' pricing policies and reporting to the Board of Directors/Trustees. The Valuation Committee is aided in its efforts by the Adviser's dedicated Securities Valuation Team, which is responsible for administering the daily valuation process and applying fair value methodologies as approved by the Valuation Committee. When determining the reliability of independent pricing services for investments owned by the funds, the Valuation Committee, among other things, conducts due diligence reviews of the pricing services and monitors the quality of security prices received through various testing reports conducted by the Securities Valuation Team.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making a fair value determination, based on the facts and circumstances specific to the portfolio instrument. Fair value determinations generally will be derived as follows, using public or private market information:

<sup>\*\*</sup> Represents net unrealized appreciation (depreciation) as reported in the Fund's Portfolio of Investments.

- (i) If available, fair value determinations shall be derived by extrapolating from recent transactions or quoted prices for identical or comparable securities.
- (ii) If such information is not available, an analytical valuation methodology may be used based on other available information including, but not limited to: analyst appraisals, research reports, corporate action information, issuer financial statements and shelf registration statements. Such analytical valuation methodologies may include, but are not limited to: multiple of earnings, discount from market value of a similar freely-traded security, discounted cash flow analysis, book value or a multiple thereof, risk premium/yield analysis, yield to maturity and/or fundamental investment analysis.

Nuveen Investments

The purchase price of a portfolio instrument will be used to fair value the instrument only if no other valuation methodology is available or deemed appropriate, and it is determined that the purchase price fairly reflects the instrument's current value.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors/Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such testing and fair valuation occurrences are reported to the Board of Directors/Trustees.

#### 3. Portfolio Securities and Investments in Derivatives

#### **Portfolio Securities**

### Foreign Currency Transactions

To the extent that the Funds invest in securities and/or contracts that are denominated in a currency other than U.S. dollars, the Funds will be subject to currency risk, which is the risk that an increase in the U.S. dollar relative to the foreign currency will reduce returns or portfolio value. Generally, when the U.S. dollar rises in value against a foreign currency, the Funds' investments denominated in that currency will lose value because its currency is worth fewer U.S. dollars; the opposite effect occurs if the U.S. dollar falls in relative value. Investments and other assets and liabilities denominated in foreign currencies are converted into U.S. dollars on a spot (i.e. cash) basis at the spot rate prevailing in the foreign currency exchange market at the time of valuation. Purchases and sales of investments and income denominated in foreign currencies are translated into U.S. dollars on the respective dates of such transactions.

Each Fund may invest in non-U.S. securities. As of January 31, 2014, the Funds' investments in non-U.S. securities were as follows:

Quality Preferred Income (JTP)	Value	% of Total Investments
Country:	value	rotal investments
United Kingdom	\$ 99,876,329	12.6%
Netherlands	46,663,785	5.9
France	33,116,720	4.2
Other Countries	123,687,938	15.5
Total Non-U.S. Securities	\$303,344,772	38.2%
Quality Preferred Income		
2 (JPS)		
Country:		
United Kingdom	\$153,019,828	9.7%
Netherlands	103,847,980	6.6
France	76,646,214	4.8
Other Countries	249,394,156	15.7
Total Non-U.S. Securities	\$582,908,178	36.8%
Quality Preferred Income		
3 (JHP)		
Country:		
United Kingdom	\$ 37,267,168	12.3%
France	18,587,361	6.1
Netherlands	16,990,451	5.6

Other Countries	49,499,896	16.4
Total Non-U.S. Securities	\$122 344 876	40.4%

The books and records of the Funds are maintained in U.S. dollars. Foreign currencies, assets and liabilities are translated into U.S. dollars at 4:00 p.m. Eastern time. Investment transactions, income and expenses are translated on the respective dates of such transactions. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date of the transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of a Fund and the amounts actually received.

The realized gains and losses resulting from changes in foreign currency exchange rates and changes in foreign exchange rates associated with other assets and liabilities on investments, forward foreign currency exchange contracts, futures, options purchased, options written and swap contracts, when applicable, are recognized as a component of "Net realized gain (loss) from investments and foreign currency," on the Statement of Operations, when applicable.

### Notes to Financial Statements (Unaudited) (continued)

The unrealized gains and losses resulting from changes in foreign currency exchange rates and changes in foreign exchange rates associated with other assets and liabilities on investments are recognized as a component of "Change in unrealized appreciation (depreciation) of investments and foreign currency," on the Statement of Operations, when applicable. The unrealized gains and losses resulting from changes in foreign exchange rates associated with forward foreign currency exchange contracts, futures, options purchased, options written and swaps are recognized as a component of "Change in net unrealized appreciation (depreciation) of forward foreign currency exchange contracts, futures contracts, options purchased, options written and swaps," respectively, on the Statement of Operations, when applicable.

### Repurchase Agreements

In connection with transactions in repurchase agreements, it is each Fund's policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the counterparty defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

The following table presents the repurchase agreements for the Funds that are subject to netting agreements as of the end of the reporting period, and the collateral delivered related to those repurchase agreements.

Fund	Counterparty	Short- Investments		Colla Pledged Counte	l (From)	Net Exposure
	Fixed Income					
<b>Quality Preferred</b>	Clearing					
Income (JTP)	Corporation	\$ 15,77	70,197	\$(15,77	(0,197)	\$
,	Fixed Income			•	•	
<b>Quality Preferred</b>	Clearing					
Income 2 (JPS)	Corporation	32,58	38,405	(32,58	88,405)	
	Fixed Income			·		
<b>Quality Preferred</b>	Clearing					
Income 3 (JHP)	Corporation	6,17	71,706	(6,17	1,706)	

<sup>\*</sup> As of January 31, 2014, the value of the collateral pledged from the counterparty exceeded the value of the repurchase agreements. Refer to the Fund's Portfolio of Investments for details on the repurchase agreements.

### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### **Investment in Derivatives**

Each Fund is authorized to invest in certain derivative instruments, such as futures, options and swap contracts. Each Fund limits its investments in futures, options on futures and swap contracts to the extent

necessary for the Adviser to claim the exclusion from registration by the Commodity Futures Trading Commission as a commodity pool operator with respect to the Fund. The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes.

### Swap Contracts

Interest rate swap contracts involve each Fund's agreement with the counterparty to pay or receive a fixed rate payment in exchange for the counterparty receiving or paying a variable rate payment that is intended to approximate the Fund's variable rate payment obligation on any variable rate borrowing. Forward interest rate swap transactions involve each Fund's agreement with a counterparty to pay or receive, in the future, a fixed or variable rate payment in exchange for the counterparty paying the Fund a variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The payment obligation is based on the notional amount of the swap contract. Swap contracts do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that each Fund is to receive. Swap contracts are valued daily. Upon entering into an interest rate swap (and beginning on the effective date for a forward interest rate swap), each Fund accrues the fixed rate payment expected to be paid or received and the variable rate payment expected to be received or paid on the swap contracts on a daily basis, and recognizes the daily change in the fair value of the Fund's contractual rights and obligations under the contracts. The net amount recorded for these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on interest rate swaps (,net)" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of swaps." Income

received or paid by each Fund is recognized as a component of "Net realized gain (loss) from swaps" on the Statement of Operations, in addition to the net realized gains or losses recognized upon the termination of a swap contract, and are equal to the difference between the Fund's basis in the swap and the proceeds from (or cost of) the closing transaction. Payments received or made at the beginning of the measurement period are recognized as a component of "Interest rate swap premiums paid and/or received" on the Statement of Assets and Liabilities, when applicable. For tax purposes, periodic payments are treated as ordinary income or expense.

During the six months ended January 31, 2014, each Fund continued to hold interest swap contracts to partially fix the interest cost of leverage, which each Fund employs through the use of bank borrowings.

The average notional amount of interest rate swap contracts outstanding during the six months ended January 31, 2014, was as follows:

	Quality	Quality	Quality
	Preferred	Preferred	Preferred
	Income	Income 2	Income 3
	(JTP)	(JPS)	(JHP)
Average notional amount of interest			
rate swap contracts outstanding*	\$212,611,500	\$423,088,000	\$80,726,000

<sup>\*</sup> The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

The following table presents the fair value of all swap contracts held by the Funds as of January 31, 2014, the location of these instruments on the Statement of Assets and Liabilities and the primary underlying risk exposure.

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

### 4. Fund Shares

### Common Shares

Transactions in common shares were as follows:

	Quality Preferred Income (JTP) Six		Quality Preferred Income 2 (JPS) Six		Quality Preferred Income 3 (JHP)

Sales and maturities	70,885,419	127,196,691	30,880,602

### 6. Income Tax Information

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment company taxable income to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year

ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to recognition of premium amortization, timing differences in the recognition of income and timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as listed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

As of January 31, 2014, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives), as determined on a federal income tax basis, were as follows:

	Quality Preferred Income (JTP)	Quality Preferred Income 2 (JPS)	Quality Preferred Income 3 (JHP)
Cost of investments	\$771,413,894	\$1,535,463,571	\$292,386,248
Gross unrealized:			
Appreciation	\$ 44,881,812	\$ 86,598,059	\$ 18,179,471
Depreciation	(21,810,071)	(39,502,907)	(7,896,861)
Net unrealized			
appreciation			
(depreciation) of			
investments	\$ 23,071,741	\$ 47,095,152	\$ 10,282,610
	Nuveen Inv 57	restments	

### Notes to Financial Statements (Unaudited) (continued)

Permanent differences, primarily due to federal taxes paid, treatment of notional principal contracts, bond premium amortization adjustments and complex securities character adjustments, resulted in reclassifications among the Funds' components of common share net assets as of July 31, 2013, the Funds' last tax year end, as follows:

	Quality Preferred Income (JTP)	Quality Preferred Income 2 (JPS)	Quality Preferred Income 3 (JHP)
Paid-in-surplus	\$ (73,331)	\$	\$(186,578)
Undistributed (Over-distribution of) net investment income	(3,772,645)	(7,056,083)	(85,931)
Accumulated net realized gain			
(loss)	3,845,976	7,056,083	272,509

The tax components of undistributed net ordinary income and net long-term capital gains as of July 31, 2013, the Funds' last tax year end, were as follows:

	Quality	Quality	Quality
	Preferred	Preferred	Preferred
	Income (JTP)	Income 2 (JPS)	Income 3 (JHP)
	(017)	(053)	(UITE)
Undistributed net ordinary income <sup>1</sup>	\$10,919,089	\$8,676,650	\$2,435,736
Undistributed net long-term capital			

Undistributed net long-term capital gains

The tax character of distributions paid during the Funds' last tax year ended July 31, 2013 was designated for purposes of the dividends paid deduction as follows:

	Quality	Quality	Quality
	Preferred	Preferred	Preferred
	Income	Income 2	Income 3
	(JTP)	(JPS)	(JHP)
Distributions from net ordinary			
income <sup>2</sup>	\$38,796,241	\$79,454,609	\$14,807,378

Distributions from net long-term capital gains

As of July 31, 2013, the Funds' last tax year end, the Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as shown in the following table. The losses not subject to expiration retain the character reflected and will be utilized first by a Fund, while the losses subject to expiration are considered short-term.

<sup>&</sup>lt;sup>1</sup> Net ordinary income consists of net taxable income derived from dividends, interest and net short-term capital gains, if any. Undistributed net ordinary income (on a tax basis) has not been reduced for the dividend declared on July 1, 2013, paid on August 1, 2013.

<sup>&</sup>lt;sup>2</sup> Net ordinary income consists of net taxable income derived from dividends, interest and net short-term capital gains, if any.

### 7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. Spectrum is compensated for its services to the Funds from the management fees paid to the Adviser. Spectrum also receives compensation on certain portfolio transactions for providing brokerage services to the Funds. During the six months ended January 31, 2014, Quality Preferred Income (JTP), Quality Preferred Income 2 (JPS) and Quality Preferred Income 3 (JHP) paid Spectrum commissions of \$21,630, \$38,489 and \$8,876, respectively.

Each Fund's management fee consists of two components a fund-level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets*	Fund-Level Fee Rate
For the first \$500 million	.7000%
For the next \$500 million	.6750
For the next \$500 million	.6500
For the next \$500 million	.6250
For managed assets over \$2 billion	.6000

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

### **Complex-Level Managed Asset**

Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

<sup>\*</sup> For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to certain types of leverage. For these purposes, leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the

aggregate daily managed assets of all Nuveen Funds that constitute "eligible assets." Eligible assets do not include assets attributable to investments in other Nuveen Funds and assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011. As of January 31, 2014, the complex-level fee rate for these Funds was .1679%.

The Funds pay no compensation directly to those of its trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen-advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen-advised funds.

### 8. Borrowing Arrangements

### **Borrowings**

Each Fund has entered into a prime brokerage facility ("Borrowings") with BNP Paribas Prime Brokerage, Inc. ("BNP") as a means of leverage. Each Fund's maximum commitment amount under these Borrowings is as follows:

	Quality Preferred Income (JTP)	Quality Preferred Income 2 (JPS)	Quality Preferred Income 3 (JHP)
Maximum commitment			
amount	\$235,000,000	\$467,000,000	\$89,000,000
	Nuv	veen Investments 59	

### Notes to Financial Statements (Unaudited) (continued)

As of January 31, 2014, each Fund's outstanding balance on its Borrowings was as follows:

	Quality	Quality	Quality	
	Preferred	Preferred	Preferred	
	Income	Income 2	Income 3	
	(JTP)	(JPS)	(JHP)	
Outstanding borrowings	\$234,000,000	\$464,000,000	\$89,000,000	

During the six months ended January 31, 2014, the average daily balance outstanding and average annual interest rate on each Fund's Borrowings were as follows:

	Quality Preferred Income (JTP)	Quality Preferred Income 2 (JPS)	Quality Preferred Income 3 (JHP)
Average daily balance outstanding	\$234,000,000	\$464,000,000	\$89,000,000
Average annual interest rate	1.07%	1.07%	1.07%

In order to maintain these Borrowings, the Funds must meet certain collateral, asset coverage and other requirements. Borrowings outstanding are fully secured by securities held in each Fund's portfolio of investments ("Pledged Collateral"). Interest is charged on these Borrowings for each Fund at the 3-Month LIBOR (London Inter-Bank Offered Rate) (during the period August 1, 2013 through December 9, 2013 and 1-month LIBOR thereafter) plus .85% per annum on the amounts borrowed and .50% per annum on the undrawn balance.

Borrowings outstanding are recognized as "Borrowings" on the Statement of Assets and Liabilities. Interest expense incurred on each Fund's borrowed amount and undrawn balance are recognized as a component of "Interest expense on borrowings" on the Statement of Operations.

### Rehypothecation

On December 9, 2013, the Adviser entered into a Rehypothecation Side Letter ("Side Letter") with BNP, allowing BNP to re-register the Pledged Collateral in its own name or in a name other than the Funds' to pledge, repledge, hypothecate, rehyphothecate, sell, lend or otherwise transfer or use the Pledged Collateral (the "Hypothecated Securities") with all rights of ownership as described in the Side Letter. Subject to certain conditions, the total value of the outstanding Hypothecated Securities shall not exceed the lesser of (i) 98% of the outstanding balance on the Borrowings to which the Pledged Collateral relates and (ii) 33 1/3% of the Funds' total assets. The Funds may designate any Pledged Collateral as ineligible for rehypothecation. The Funds may also recall Hypothecated Securities on demand.

The Funds also have the right to apply and set-off an amount equal to one-hundred percent (100%) of the then-current fair market value of such Pledged Collateral against the current Borrowings under the Side Letter in the event that BNP fails to timely return the Pledged Collateral and in certain other circumstances. In such circumstances, however, the Funds may not be able to obtain replacement financing required to purchase replacement securities and, consequently, the Funds' income generating potential may decrease. Even if each Fund is able to obtain replacement financing, it might not be able to purchase replacement securities at favorable prices.

The Funds will receive a fee in connection with the Hypothecated Securities ("Rehypothecation Fees") in addition to any principal, interest, dividends and other distributions paid on the Hypothecated Securities.

As of January 31, 2014, Quality Preferred Income (JTP), Quality Preferred Income 2 (JPS) and Quality Preferred Income 3 (JHP) each had Hypothecated Securities totaling \$109,561,100, \$217,667,100 and \$51,064,800, respectively. During the period from December 9, 2013 through January 31, 2014, Quality Preferred Income (JTP), Quality Preferred Income 2 (JPS) and Quality Preferred Income 3 (JHP) earned Rehypothecation Fees of \$50,700, \$100,533 and \$19,283, respectively, which is recognized as "Other income" on the Statement of Operations.

### **Quarterly Form N-Q Portfolio of Investments Information**

Each Fund is required to file its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. You may obtain this information directly from the SEC. Visit the SEC on-line at http://www.sec.gov or in person at the SEC's Public Reference Room in Washington, D.C. Call the SEC toll-free at (800) SEC -0330 for room hours and operation.

### **Nuveen Funds' Proxy Voting Information**

You may obtain (i) information regarding how each fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, without charge, upon request, by calling Nuveen Investments toll-free at (800) 257-8787 or on Nuveen's website at www.nuveen.com and (ii) a description of the policies and procedures that each fund used to determine how to vote proxies relating to portfolio securities without charge, upon request, by calling Nuveen Investments toll free at (800) 257-8787. You may also obtain this information directly from the SEC. Visit the SEC on-line at http://www.sec.gov.

### **CEO Certification Disclosure**

Each Fund's Chief Executive Officer (CEO) has submitted to the New York Stock Exchange (NYSE) the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

The Fund has filed with the SEC the certification of its CEO and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

#### **Common Share Information**

Each Fund intends to repurchase shares of its own common stock at such times and in such amounts as is deemed advisable. During the period covered by this report, each Fund repurchased shares of its common stock as shown in the accompanying table.

TP JPS JHP Common shares repurchased 20,000

Any future repurchases will be reported to shareholders in the next annual or semi-annual report.

### **FINRA BrokerCheck**

The Financial Industry Regulatory Authority (FINRA) provides information regarding the disciplinary history of FINRA member firms and associated investment professionals. This information as well as an investor brochure describing FINRA BrokerCheck is available to the public by calling the FINRA BrokerCheck Hotline number at (800) 289-9999 or by visiting www.FINRA.org.

### **Glossary of Terms**

### **Used in this Report**

- n Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- n **Barclays U.S. Aggregate Bond Index:** An unmanaged index that includes all investment-grade, publicly issued, fixed-rate, dollar denominated, nonconvertible debt issues and commercial mortgage-backed securities with maturities of at least one year and outstanding par values of \$150 million or more. Index returns assume reinvestment of distributions, but do not include the effects of any applicable sales charges or management fees.
- n Blended Benchmark (Comparative Index): A blended return consisting of: 1) 55% of the Merrill Lynch Fixed Rate Index, an unmanaged index of investment-grade, exchange traded preferred stocks with outstanding market values of at least \$30 million and at least one year to maturity; and 2) 45% of the Barclays Tier 1 Capital Securities USD Index, an unmanaged index that includes securities that can generally be viewed as hybrid fixed-income securities that either receive regulatory capital treatment or a degree of "equity credit" from a rating agency. Index returns do not include the effects of any sales charges or management fees.
- n **Effective Leverage:** Effective leverage is a fund's effective economic leverage, and includes both regulatory leverage (see below) and the leverage effects of certain derivative investments in the fund's portfolio that increase the funds' investment exposure.
- n **Gross Domestic Product (GDP):** The total market value of all final goods and services produced in a country/region in a given year, equal to total consumer, investment and government spending, plus the value of exports, minus the value of imports.
- n **Leverage:** Leverage is created whenever a fund has investment exposure (both reward and/or risk) equivalent to more than 100% of the investment capital.
- n **Net Asset Value (NAV) Per Share:** A fund's Net Assets is equal to its total assets (securities, cash, accrued earnings and receivables) less its total liabilities. NAV per share is equal to the fund's Net Assets divided by its number of shares outstanding.
- n **Regulatory Leverage:** Regulatory leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

### Reinvest Automatically,

### **Easily and Conveniently**

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

#### **Nuveen Closed-End Funds Automatic Reinvestment Plan**

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

### Easy and convenient

To make recordkeeping easy and convenient, each quarter you'll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

### How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the distribution payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### **Flexible**

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to

another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

### Call today to start reinvesting distributions

Not applicable.
ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.
There have been no material changes to the procedures by which shareholders may recommend nominees to the registrant s Board implemented after the registrant last provided disclosure in response to this item.
ITEM 11. CONTROLS AND PROCEDURES.
(a) The registrant s principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (the Exchange Act) (17 CFR 240.13a-15(b) or 240.15d-15(b)).
(b) There were no changes in the registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting.
ITEM 12. EXHIBITS.
File the exhibits listed below as part of this Form.
(a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable to this filing.
(a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT attached hereto.

(a)(3) Any written solicitation to purchase securities under Rule 23c-1 under the 1940 Act (17 CFR 270.23c-1) sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons: Not applicable.

(b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certifications required by Rule 30a-2(b) under the 1940 Act (17 CFR 270.30a-2(b)); Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b)), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed filed for purposes of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.
