The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Stated Maturity Date and the resulting pre-tax rates of return will depend on the actual Starting Price and Ending Price.

How the Redemption Amount is calculated

The Redemption Amount will be determined as follows:

- If the Ending Price is greater than the Starting Price:

\$1,000 *plus*

- If the Ending Price is less than or equal to the Starting Price, but greater than or equal to the Threshold Price, the Redemption Amount will be equal to \$1,000

- If the Ending Price is less than the Threshold Price, the Redemption Amount will be equal to \$1,000 *minus*

In such a case, you will lose more than 30%, and possibly all, of the Principal Amount of your securities at maturity.

* The graph above sets forth the daily closing prices of the Fund for the period from January 1, 2008 to February 28, 2018. The closing price on February 28, 2018 was \$70.27. The historical performance of the Fund is not an indication of the future performance of the Fund during the term of the securities.
