IPG PHOTONICS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except share and per share data)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared by IPG Photonics Corporation, or “IPG”, “we”, “our”, “its” or “the Company”. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). The consolidated financial statements include the Company’s accounts and those of its subsidiaries. All intercompany balances have been eliminated in consolidation. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

In the opinion of the Company’s management, the unaudited financial information for the interim periods presented reflects all adjustments necessary for a fair presentation of the Company’s financial position, results of operations and cash flows. The results reported in these consolidated financial statements are not necessarily indicative of results that may be expected for the entire year.

The Company has evaluated subsequent events through the time of filing this Quarterly Report on Form 10-Q with the SEC.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company's financial statements upon adoption.

3. INVENTORIES

Inventories consist of the following:

	March 31, 2014	December 31, 2013
Components and raw materials	\$48,513	\$54,539
Work-in-process	64,385	64,927
Finished goods	57,658	53,234
Total	\$170,556	\$172,700

The Company recorded inventory provisions totaling \$2,380 and \$1,529 for the three months ended March 31, 2014 and 2013, respectively. These provisions relate to the recoverability of the value of inventories due to technological changes and excess quantities. These provisions are reported as a reduction to components and raw materials and finished goods.

4. ACCRUED EXPENSES AND OTHER LIABILITIES

Accrued expenses and other liabilities consist of the following:

	March 31, 2014	December 31, 2013
Accrued compensation	\$21,815	\$25,727
Customer deposits and deferred revenue	26,961	18,489
Current portion of accrued warranty	7,541	7,724
Other	7,550	7,396
Total	\$63,867	\$59,336

Table of Contents

IPG PHOTONICS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(In thousands, except share and per share data)

5. FINANCING ARRANGEMENTS

The Company's borrowings under existing financing arrangements consist of the following:

	March 31, 2014	December 31, 2013
Revolving line-of-credit facilities:		
European Overdraft Facilities	\$2,300	\$1,038
Euro Line of Credit	—	2,258
Total	\$2,300	\$3,296
Term Debt:		
U.S. long-term note	\$12,333	\$12,666
Less: current portion	(1,333)	(1,333)
Total long-term debt	\$11,000	\$11,333

The U.S. and Euro line of credit are available to certain foreign subsidiaries and allows for borrowings in the local currencies of those subsidiaries.

6. NET INCOME ATTRIBUTABLE TO IPG PHOTONICS CORPORATION PER SHARE

The following table sets forth the computation of diluted net income attributable to IPG Photonics Corporation per share:

	Three Months Ended March 31, 2014	2013
Net income attributable to IPG Photonics Corporation	\$40,531	\$35,127
Weighted average shares	51,970	51,407
Dilutive effect of common stock equivalents	754	943
Diluted weighted average common shares	52,724	52,350
Basic net income attributable to IPG Photonics Corporation per share	\$0.78	\$0.68
Diluted net income attributable to IPG Photonics Corporation per share	\$0.77	\$0.67

The computation of diluted weighted average common shares excludes options to purchase 70,000 and 238,000 shares for the three months ended March 31, 2014 and 2013, respectively, because the effect would be anti-dilutive.

The Company computes net income per share in accordance with ASC 260-Earnings Per Share. Under the provisions of ASC 260, the Company is required to present basic and diluted earnings per share information separately for each class of equity instruments that participate in any income distribution with primary equity instruments. The Company calculates earnings per share in periods where a class of common stock was redeemable for other than fair value through the application of the two-class method.

7. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative Instruments – The Company's primary market exposures are to interest rates and foreign exchange rates. The Company uses certain derivative financial instruments to help manage these exposures. The Company executes these instruments with financial institutions it judges to be credit-worthy. The Company does not hold or issue derivative financial instruments for trading or speculative purposes.

The Company recognizes all derivative financial instruments as either assets or liabilities at fair value in the consolidated balance sheets. The Company has interest rate swaps that are classified as a cash flow hedge of its variable rate debt. The Company has no derivatives that are not accounted for as a hedging instrument.

Cash flow hedge – The Company's cash flow hedge is an interest rate swap under which it pays fixed rates of interest. The fair value amounts in the consolidated balance sheet were:

Table of Contents

IPG PHOTONICS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(In thousands, except share and per share data)

	Notional Amounts ¹		Other Assets		Other Long-Term Liabilities	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Interest rate swap	\$12,333	\$12,666	\$—	\$—	\$361	\$423
Total	\$12,333	\$12,666	\$—	\$—	\$361	\$423

(1) Notional amounts represent the gross contract/notional amount of the derivatives outstanding.

The derivative gains and losses in the consolidated statements of income related to the Company's interest rate swap contracts were as follows:

	Three Months Ended March 31,	
	2014	2013
Effective portion recognized in other comprehensive loss, pretax:		
Interest rate swap	\$138	\$267
Effective portion reclassified from other comprehensive loss to interest expense, pretax:		
Interest rate swap	\$(76)	\$(135)
Ineffective portion recognized in income:		
Interest rate swap	\$—	\$—

8. FAIR VALUE MEASUREMENTS

The Company's financial instruments consist of cash equivalents, accounts receivable, auction rate securities, accounts payable, drawings on revolving lines of credit, long-term debt and certain derivative instruments.

The valuation techniques used to measure fair value are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect internal market assumptions. These two types of inputs create the following fair value hierarchy: Level 1, defined as observable inputs such as quoted prices for identical instruments in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The carrying amounts of cash equivalents, accounts receivable, accounts payable and drawings on revolving lines of credit are considered reasonable estimates of their fair market value, due to the short maturity of these instruments or as a result of the competitive market interest rates, which have been negotiated. If measured at fair value, accounts receivable and accounts payable would be classified as Level 3 and drawings on the revolving lines of credit would be classified as Level 2.

Table of Contents

IPG PHOTONICS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(In thousands, except share and per share data)

The following table presents information about the Company's assets and liabilities measured at fair value:

	Total	Fair Value Measurements at March 31, 2014		
		Level 1	Level 2	Level 3
Assets				
Cash equivalents	\$240,130	\$240,130	\$—	\$—
Auction rate securities	1,122	—	—	1,122
Total assets	\$241,252	\$240,130	\$—	\$1,122
Liabilities				
Contingent purchase consideration	\$366	\$—	\$—	\$366
Interest rate swaps	361	—	361	—
Total liabilities	\$727	\$—	\$361	\$366

	Total	Fair Value Measurements at December 31, 2013		
		Level 1	Level 2	Level 3
Assets				
Cash equivalents	\$240,159	\$240,159	\$—	\$—
Auction rate securities	1,120	—	—	1,120
Total assets	\$241,279	\$240,159	\$—	\$1,120
Liabilities				
Contingent purchase consideration	\$375	\$—	\$—	\$375
Interest rate swaps	423	—	423	—
Total liabilities	\$798	\$—	\$423	\$375

The fair value of the auction rate securities considered prices observed in inactive secondary markets for the securities held by the Company.

The fair value of the accrued contingent consideration incurred was determined using an income approach at the acquisition date and reporting date. That approach is based on significant inputs that are not observable in the market. Key assumptions include assessing the probability of meeting certain milestones required to earn the contingent consideration.

	Three Months Ended March 31,	
	2014	2013
Auction Rate Securities		
Balance, beginning of period	\$1,120	\$1,112

9. GOODWILL AND INTANGIBLES

The carrying amount of goodwill was \$455 at both December 31, 2013 and March 31, 2014.

Intangible assets consisted of the following:

(In thousands)	March 31, 2014				December 31, 2013			
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted-Average Lives	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted-Average Lives
Amortizable intangible assets								
Patents	\$4,643	\$ (4,074)	\$569	6 Years	\$4,667	\$ (4,091)	\$576	6 Years
Customer relationships	4,088	(3,414)	674	5 Years	4,112	(3,324)	788	5 Years
Production know-how	7,065	(2,010)	5,055	8 Years	7,063	(1,747)	5,316	8 Years
Technology, trademark and tradename	4,269	(1,549)	2,720	8 Years	4,271	(1,387)	2,884	8 Years
	\$20,065	\$ (11,047)	\$9,018		\$20,113	\$ (10,549)	\$9,564	

Amortization expense for the three months ended March 31, 2014 and 2013 was \$543 and \$463, respectively. The estimated future amortization expense for intangibles for the remainder of 2014 and subsequent years is as follows:

2014	2015	2016	2017	2018	Thereafter	Total
\$1,604	\$1,549	\$1,454	\$1,454	\$1,389	\$1,568	\$9,018

10. PRODUCT WARRANTIES

The Company typically provides one to three-year parts and service warranties on lasers and amplifiers. Most of the Company's sales offices provide support to customers in their respective geographic areas. Warranty reserves have generally been sufficient to cover product warranty repair and replacement costs. The following table summarizes product warranty activity recorded during the three months ended March 31, 2014 and 2013.

	2014	2013
Balance at January 1	\$14,997	\$10,714
Provision for warranty accrual	2,695	2,035
Warranty claims and other reductions	(1,932)	(1,435)
Foreign currency translation	(107)	(260)
Balance at March 31	\$15,653	\$11,054

Accrued warranty reported in the accompanying consolidated financial statements as of March 31, 2014 and December 31, 2013 consist of \$7,541 and \$7,724 in accrued expenses and other liabilities and \$8,112 and \$7,273 in other long-term liabilities, respectively.

11. INCOME TAXES

A reconciliation of the total amounts of unrecognized tax benefits is as follows:

	2014	2013
Balance at January 1	\$6,501	\$5,392
Reductions of prior period positions	—	(63)
Additions for tax positions in prior period	—	—
Additions for tax positions in current period	—	255
Balance at March 31	\$6,501	\$5,584

Substantially all of the liability for uncertain tax benefits related to various federal, state and foreign income tax matters, would benefit the Company's effective tax rate, if recognized.

(In thousands, except share and per share data)

12. COMMITMENTS AND CONTINGENCIES

From time to time, the Company may be involved in disputes and legal proceedings in the ordinary course of its business. These proceedings may include allegations of infringement of intellectual property, commercial disputes and employment matters. As of March 31, 2014 and through the filing date of these Financial Statements, the Company has no legal proceedings ongoing that management estimates could have a material effect on the Company's Consolidated Financial Statements.

Russia/Ukraine

Recent political unrest in Ukraine has resulted in the United States and the European Union imposing sanctions on Russia and certain businesses and individuals in Russia. The United States also suspended granting of export licenses to Russia. The Company is monitoring these events. The Company has a large manufacturing facility and research and development operations Russia which supplies components to its U.S. and German manufacturing facilities. In addition, it supplies components from its U.S. and German manufacturing facilities to its Russia facility. To date, the Company has not experienced any disruptions to production or deliveries or impact from current sanctions. Should there be disruption of the Company's supplies from or to its Russian operations, or should the United States or the European Union implement different sanctions, the Company's production and/or deliveries as well as results of operations could be materially impacted.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with our consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q. This discussion contains forward looking statements that are based on management's current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements. See "Cautionary Statement Regarding Forward-Looking Statements."

Overview

We develop and manufacture a broad line of high-performance fiber lasers, fiber amplifiers and diode lasers that are used in numerous applications, primarily in materials processing. We sell our products globally to original equipment manufacturers ("OEMs"), system integrators and end users. We market our products internationally primarily through our direct sales force.

We are vertically integrated such that we design and manufacture most of our key components used in our finished products, from semiconductor diodes to optical fiber preforms, finished fiber lasers and amplifiers. We also manufacture certain complementary products used with our lasers, including optical delivery cables, fiber couplers, beam switches, optical heads and chillers. In addition, we offer laser-based systems for certain markets and applications.

Factors and Trends That Affect Our Operations and Financial Results

In reading our financial statements, you should be aware of the following factors and trends that our management believes are important in understanding our financial performance.

Net sales. We derive net sales primarily from the sale of fiber lasers and amplifiers. We also sell diode lasers, communications systems, laser systems and complementary products. We sell our products through our direct sales organization and our network of distributors and sales representatives, as well as system integrators. We sell our products to OEMs that supply materials processing laser systems, communications systems and medical laser systems to end users. We also sell our products to end users that build their own systems which incorporate our products or use our products as an energy or light source. Our scientists and engineers work closely with OEMs, systems integrators and end users to analyze their system requirements and match appropriate fiber laser or amplifier specifications. Our sales cycle varies substantially, ranging from a period of a few weeks to as long as one year or more, but is typically several months.

Sales of our products generally are recognized upon shipment, provided that no obligations remain and collection of the accounts receivable is reasonably assured. Our sales typically are made on a purchase order basis rather than through long-term purchase commitments.

We develop our products to standard specifications and use a common set of components within our product architectures. Our major products are based upon a common technology platform. We continually enhance these and other products by improving their components and developing new components and new product designs.

The average selling prices of our products generally decrease as the products mature. These decreases result from factors such as decreased manufacturing costs and increases in unit volumes, increased competition, the introduction of new products and market share considerations. In the past, we have lowered our selling prices in order to penetrate new markets and applications. Furthermore, we may negotiate discounted selling prices from time to time with certain customers that purchase multiple units.

Gross margin. Our total gross margin in any period can be significantly affected by total net sales in any period, by product mix, that is, the percentage of our revenue in the period that is attributable to higher or lower-power products, and by other factors, some of which are not under our control.

Our product mix affects our margins because the selling price per watt is generally higher for low, mid-power devices, pulsed lasers and certain specialty products than for high-power devices sold in large volumes. The overall cost of high-power lasers may be partially offset by improved absorption of fixed overhead costs associated with sales of larger volumes of higher-power products because they use a greater number of optical components and drive economies of scale in manufacturing. Also, the profit margins on systems can be lower than margins for our laser and amplifier sources, depending on the configuration, volume and competitive forces, among other factors.

A high proportion of our costs is fixed so they are generally difficult or slow to adjust in response to changes in demand. In addition, our fixed costs increase as we expand our capacity. Gross margins generally decline if production volumes are lower as a result of a decrease in sales or a reduction in inventory because the absorption of fixed manufacturing costs will be

Table of Contents

reduced. Gross margins generally improve when the opposite occurs. If both sales and inventory decrease in the same period, the decline in gross margin may be greater if we cannot reduce fixed costs or choose not to reduce fixed costs to match the decrease in the level of production. If we experience a decline in sales that reduces absorption of our fixed costs, or if we have production issues or inventory write-downs, our gross margins will be negatively affected. We also regularly review our inventory for items that are slow-moving, have been rendered obsolete or determined to be excess. Any write-off of such slow-moving, obsolete or excess inventory affects our gross margins. For example, we recorded provisions for inventory totaling \$2.4 million and \$1.5 million for the three months ended March 31, 2014 and 2013, respectively and \$15.1 million, \$8.2 million and \$6.1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Sales and marketing expense. We expect to continue to expand our worldwide direct sales organization, build and expand applications centers, hire additional personnel involved in marketing in our existing and new geographic locations, increase the number of units for demonstration purposes and otherwise increase expenditures on sales and marketing activities in order to support the growth in our net sales. As such, we expect that our sales and marketing expenses will increase in the aggregate.

Research and development expense. We plan to continue to invest in research and development to improve our existing components and products and develop new components, products and systems. The amount of research and development expense we incur may vary from period to period. In general, if net sales continue to increase we expect research and development expense to increase in the aggregate.

General and administrative expense. We expect our general and administrative expenses to increase as we continue to invest in systems and resources to support our worldwide operations. Legal expenses vary from quarter to quarter based primarily upon the level of litigation and transaction activities.

Major customers. While we have historically depended on a few customers for a large percentage of our annual net sales, the composition of this group can change from year to year. Net sales derived from our five largest customers as a percentage of our net sales were 22% for the three months ended March 31, 2014 and 21%, 16% and 17% for the full years 2013, 2012 and 2011, respectively. We seek to add new customers and to expand our relationships with existing customers. We anticipate that the composition of our significant customers will continue to change. If any of our significant customers were to substantially reduce their purchases from us, our results would be adversely affected.

Results of Operations for the three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net sales. Net sales increased by \$28.7 million, or 20.2%, to \$170.6 million for the three months ended March 31, 2014 from \$141.9 million for the three months ended March 31, 2013.

	Three Months Ended March 31,				Change			
	2014		2013					
		% of Total		% of Total				
Materials processing	\$162,724	95.4	% \$133,045	93.8	%	\$29,679	22.3	%
Other applications	7,851	4.6	% 8,807	6.2	%	(956)	(10.9)	)%
Total	\$170,575	100.0	% \$141,852	100.0	%	\$28,723	20.2	%

Sales for materials processing applications increased primarily due to higher sales of high-power and medium-power lasers used in cutting and welding applications offset by declines in sales of pulsed lasers used in marking and engraving applications. We continue to see increased acceptance of the advantages of fiber laser technology. A growing number of OEM customers have developed cutting systems that use our high-power lasers and sales of these systems are increasing by displacing gas lasers in systems sold by our OEM customers. QCW laser sales are also increasing due to continued acceptance and penetration in applications such as fine-welding, cutting, marking/engraving and hole drilling by displacing Nd:YAG lasers. The decrease in sales of pulsed lasers used for marking and engraving applications is due to increased competition and pricing pressure in Asia.

Cost of sales and gross margin. Cost of sales increased by \$15.1 million, or 22.8%, to \$81.3 million for the three months ended March 31, 2014 from \$66.2 million for the three months ended March 31, 2013. Our gross margin

decreased to 52.3% for the three months ended March 31, 2014 from 53.3% for the three months ended March 31, 2013. Gross margin decreased due to increased provisions for excess or obsolete inventory as well as slightly lower absorption of manufacturing overhead costs.

Table of Contents

Sales and marketing expense. Sales and marketing expense increased by \$1.3 million, or 22.1%, to \$7.2 million for the three months ended March 31, 2014 from \$5.9 million for the three months ended March 31, 2013, primarily as a result of increases in personnel, travel, insurance and premises costs. As a percentage of sales, sales and marketing expense increased to 4.2% for the three months ended March 31, 2014 from 4.1% for the three months ended March 31, 2013.

Research and development expense. Research and development expense increased by \$4.0 million, or 45.3%, to \$12.8 million for the three months ended March 31, 2014, compared to \$8.8 million for the three months ended March 31, 2013, primarily as a result of increases in personnel, material used for research and development, outside research contracts, premises costs and depreciation. Much of our research and development is focused on developing new applications for fiber lasers through internal research and partnership with customers and industrial institutes. We are working on the development of new products including products operating at different wavelengths and with high energy, ultra short pulses in order to address opportunities in micro-machining applications as well as semiconductor and other non-metal processing. We are also developing complementary products and accessories such as welding and cutting heads and systems including systems used in macro and micro processing applications. In addition to new products, our research and development focuses on enhancing the performance of our internally manufactured components and refining production processes to improve electrical efficiency and reduce the costs of our products. As a percentage of sales, research and development expense increased to 7.5% for the three months ended March 31, 2014 from 6.2% for the three months ended March 31, 2013.

General and administrative expense. General and administrative expense increased by \$1.1 million, or 9.4%, to \$12.9 million for the three months ended March 31, 2014 from \$11.8 million for the three months ended March 31, 2013, primarily as a result of increased personnel, information system, depreciation costs, bad debt provisions and loss on disposal of equipment. As a percentage of sales, general and administrative expense decreased to 7.6% for the three months ended March 31, 2014 from 8.3% for the three months ended March 31, 2013.

Effect of exchange rates on net sales, gross profit and operating expenses. We estimate that, if exchange rates had been the same as one year ago, net sales for the three months ended March 31, 2014 would have been \$0.6 million lower, gross profit would have been \$0.9 million lower and total operating expenses would have been \$0.6 million higher.

Gain on foreign exchange. We incurred a foreign exchange gain of \$1.4 million for the three months ended March 31, 2014 as compared to \$0.5 million gain for the three months ended March 31, 2013. The change is primarily attributable to the changes of the U.S. Dollar against the Euro, Russian Ruble and Japanese Yen.

Interest expense, net. Interest expense, net remained consistent at \$0.1 million of expense for the three months ended March 31, 2014 and 2013.

Other income, net. Other income, net increased to \$0.3 million of income for the three months ended March 31, 2014 compared to \$0.1 million of income for the three months ended March 31, 2013.

Provision for income taxes. Provision for income taxes was \$17.5 million for the three months ended March 31, 2014 compared to \$14.5 million for the three months ended March 31, 2013, representing effective tax rates of 30.1% and 29.3% for the three months ended March 31, 2014 and 2013, respectively. The increase in the provision for income taxes was primarily the result of increased income before provision for income taxes. The increase in effective rate was due to differences in recognition of research and development tax credits available in the United States. In 2013, the American Taxpayer Relief Act of 2012 (the "Act") was signed into law on January 2, 2013 which retroactively reinstated research and development tax credits for 2012 and authorized them for 2013 as well. Accordingly, all of the 2012 credits were recognized in the first quarter of 2013. This \$0.8 million net benefit reduced our effective tax rate as a discrete item in our tax provision for the first quarter of 2013. The legislation enabling research and development credits expired for 2014 and new legislation has not been enacted. Accordingly, there is no benefit for research and development tax credits recognized for the three months ended March 31, 2014.

Net income attributable to IPG Photonics Corporation. Net income attributable to IPG Photonics Corporation increased by \$5.4 million to \$40.5 million for the three months ended March 31, 2014 compared to \$35.1 million for the three months ended March 31, 2013. Net income attributable to IPG Photonics Corporation as a percentage of our net sales decreased by 1.1 percentage points to 23.7% for the three months ended March 31, 2014 from 24.8% for the

three months ended March 31, 2013 due to the factors described above.

Liquidity and Capital Resources

Our principal sources of liquidity as of March 31, 2014 consisted of cash and cash equivalents of \$480.6 million, unused credit lines and overdraft facilities of \$63.0 million and other working capital (excluding cash and cash equivalents) of \$241.2 million. This compares to cash and cash equivalents of \$448.8 million, unused credit lines and overdraft facilities of

Table of Contents

\$61.8 million and working capital (excluding cash and cash equivalents) of \$237.5 million as of December 31, 2013. Cash and cash equivalents increased by \$31.8 million from December 31, 2013. Cash provided by operating activities in the three months ended March 31, 2014 was \$43.4 million. Cash provided by financing activities in the three months ended March 31, 2014 was \$0.9 million which related to the exercise of stock options and their related tax benefit partially offset by payments on long-term borrowings and net payments of line-of-credit facilities. These sources of cash were partially offset by \$11.5 million of cash used on capital expenditures.

Our long-term debt consists primarily of a \$12.3 million secured variable-rate note, of which \$1.3 million is the current portion. This debt matures in June 2015, at which time the outstanding debt balance would be \$10.7 million. The variable interest rate was fixed by means of interest rate swap instruments.

We believe that our existing cash and marketable securities, our cash flows from operations and our existing lines of credit provides us with the financial flexibility to meet our liquidity and capital needs, as well as to complete acquisitions of complementary businesses and technologies. Our future long-term capital requirements will depend on many factors including our level of sales, the impact of economic environment on our sales levels, the timing and extent of spending to support development efforts, the expansion of the global sales and marketing activities, the timing and introductions of new products, the need to ensure access to adequate manufacturing capacity and the continuing market acceptance of our products. The following table details our line-of-credit facilities as of March 31, 2014:

Description	Available Principal	Interest Rate	Maturity	Security
U.S. Revolving Line of Credit (1)	Up to \$35.0 million	LIBOR plus 1.125% to 1.625%, depending on our performance	June 2015	Unsecured
Euro Credit Facility (Germany)(2)	Euro 20.0 million (\$27.5 million)	Euribor + 1.25% or EONIA 1.75%	June 2014	Unsecured, guaranteed by parent company
Euro Overdraft Facilities(3)	Euro 2.0 million (\$2.8 million)	1.2%-6.5%	October 2014	Common pool of assets of Italian subsidiary

(1) \$14.1 million of this revolving credit facility is available to our foreign subsidiaries in their respective local currencies, including India, China, Japan and South Korea. There were no drawings at March 31, 2014.

(2) \$4.8 million of this credit facility is available to our German subsidiary, \$20.6 million is available to our Russian subsidiary and \$2.1 million is available to our Italian subsidiary. There were no drawings at March 31, 2014.

(3) At March 31, 2014, \$2.3 million of the \$2.8 million was drawn upon with an interest rate of 1.2%.

Our largest committed credit lines are with Bank of America and Deutsche Bank in the amounts of \$35.0 million and \$27.5 million, respectively, and neither of them is syndicated.

We are required to meet certain financial covenants associated with our U.S. revolving line of credit and long-term debt facilities. These covenants, tested quarterly, include a debt service coverage ratio and a funded debt to earnings before interest, taxes, depreciation and amortization ("EBITDA") ratio. The debt service coverage covenant requires that we maintain a trailing twelve month ratio of cash flow to debt service that is greater than 1.5:1. Debt service is defined as required principal and interest payments during the period. Cash flow is defined as EBITDA less unfunded capital expenditures. The funded debt to EBITDA covenant requires that the sum of all indebtedness for borrowed money on a consolidated basis shall be less than two times our trailing twelve months EBITDA. We were in compliance with all such financial covenants as of and for the three months ended March 31, 2014.

The financial covenants in our loan documents may cause us to not take or to delay investments and actions that we might otherwise undertake because of limits on capital expenditures and amounts that we can borrow or lease. In the event that we do not comply with any one of these covenants, we would be in default under the loan agreement or loan agreements, which may result in acceleration of the debt, cross-defaults on other debt or a reduction in available liquidity, any of which could harm our results of operations and financial condition.

Operating activities. Net cash provided by (used in) operating activities increased by \$54.7 million to \$43.4 million for the three months ended March 31, 2014 from \$(11.3) million for the three months ended March 31, 2013, primarily resulting from:

- An increase in inventory of \$3.9 million in the three months ended March 31, 2014 compared to an increase of \$7.0 million in the three months ended March 31, 2013;

- An increase in accounts receivable of \$4.4 million in the three months ended March 31, 2014 compared to an increase of \$8.3 million in the three months ended March 31, 2013;

Table of Contents

• An increase in accrued expenses and other liabilities of \$3.9 million compared to a decrease of \$2.7 million;
 • A decrease in income and other taxes payable of \$0.2 million in the three months ended March 31, 2014 compared to a decrease of \$40.2 million in the three months ended March 31, 2013; and

• An increase in cash provided by net income after adding back non-cash charges of \$53.6 million in the three months ended March 31, 2014 as compared to \$52.4 million in the same period in 2013.

Given our vertical integration, rigorous and time-consuming testing procedures for both internally manufactured and externally purchased components and the lead time required to manufacture components used in our finished products, the rate at which we turn inventory has historically been comparatively low when compared to our cost of sales. Also, our historic growth rates required investment in inventories to support future sales and enable us to quote short delivery times to our customers, providing what we believe is a competitive advantage. Furthermore, if there was a disruption to the manufacturing capacity of any of our key technologies, our inventories of components should enable us to continue to build finished products for a reasonable period of time. We believe that we will continue to maintain a relatively high level of inventory compared to our cost of sales. As a result, we expect to have a significant amount of working capital invested in inventory. A reduction in our level of net sales or the rate of growth of our net sales from their current levels would mean that the rate at which we are able to convert our inventory into cash would decrease.

Investing activities. Net cash used in investing activities was \$11.3 million and \$22.8 million in the three months ended March 31, 2014 and 2013, respectively. The cash used in investing activities in 2014 related to the construction of new buildings in the US, Germany and Russia. The cash used in investing activities in 2013 related to the construction of new buildings in the U.S., Germany and Russia as well as purchases of machinery and equipment and an acquisition during the first quarter of 2013.

We expect to incur approximately \$70 million in capital expenditures, excluding acquisitions in 2014. The timing and extent of any capital expenditures in and between periods can have a significant effect on our cash flow. Many of the capital expenditure projects that we undertake have long lead times and are difficult to cancel or defer to a later period.

Financing activities. Net cash provided by financing activities was \$0.9 million and \$8.0 million in the three months ended March 31, 2014 and 2013, respectively. The cash provided by financing activities in 2014 was primarily related to the exercise of stock options and their related tax benefit partially offset by payments on long-term borrowings and net payments of line-of-credit facilities. The cash provided by financing activities in 2013 was primarily related to the proceeds from line-of-credit facilities.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, and we intend that such forward-looking statements be subject to the safe harbors created thereby. For this purpose, any statements contained in this Quarterly Report on Form 10-Q except for historical information are forward-looking statements. Without limiting the generality of the foregoing, words such as “may,” “will,” “expect,” “believe,” “anticipate,” “intend,” “could,” “estimate,” “continue” or the negative or other variations thereof or comparable terminology are intended to identify forward-looking statements. In addition, any statements that refer to projections of our future financial performance, trends in our businesses, or other characterizations of future events or circumstances are forward-looking statements. The forward-looking statements included herein are based on current expectations of our management based on available information and involve a number of risks and uncertainties, all of which are difficult or impossible to accurately predict and many of which are beyond our control. As such, our actual results may differ significantly from those expressed in any forward-looking statements. Factors that may cause or contribute to such differences include, but are not limited to, those discussed in more detail in Item 1, “Business” and Item 1A, “Risk Factors” of Part I of our Annual Report on Form 10-K for the year ended December 31, 2013. Readers should carefully review these risks, as well as the additional risks described in other documents we file from time to time with the Securities and Exchange Commission. In light of the significant risks and uncertainties inherent in the forward-looking information included herein, the inclusion of such information should not be regarded as a representation by us or any other person that such results will be achieved, and readers are cautioned not to rely on such forward-looking information. We

undertake no obligation to revise the forward-looking statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Recent Accounting Pronouncements

Accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our financial statements upon adoption.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk in the ordinary course of business, which consists primarily of interest rate risk associated with our cash and cash equivalents and our debt and foreign exchange rate risk.

Interest rate risk. Our investments have limited exposure to market risk. To minimize this risk, we maintain a portfolio of cash, cash equivalents and short-term investments, consisting primarily of bank deposits, money market funds and short-term government securities. The interest rates are variable and fluctuate with current market conditions. Because of the short-term nature of these instruments, a sudden change in market interest rates would not be expected to have a material impact on our financial condition or results of operations.

We are also exposed to market risk as a result of increases or decreases in the amount of interest expense we must pay on our bank debt and borrowings on our bank credit facilities. Our interest obligations on our long-term debt are fixed by means of interest rate swap agreements. Although our U.S. revolving line of credit and our Euro credit facility have variable rates, we do not believe that a 10% change in market interest rates would have a material impact on our financial position or results of operations.

Exchange rates. Due to our international operations, a significant portion of our net sales, cost of sales and operating expenses are denominated in currencies other than the U.S. dollar, principally the Euro, the Japanese Yen, the Russian Ruble, and Chinese Yuan. As a result, our international operations give rise to transactional market risk associated with exchange rate movements of the U.S. dollar, the Euro, the Russian Ruble, the Japanese Yen and Chinese Yuan. Gain on foreign exchange transactions totaled \$1.4 million and \$0.5 million for the three months ended March 31, 2014 and March 31, 2013, respectively. Management attempts to hedge these exposures by partially or fully off-setting foreign currency denominated assets and liabilities at our subsidiaries that operate in different functional currencies. Foreign currency derivative instruments can also be used to hedge exposures and reduce the risks of certain foreign currency transactions; however, these instruments provide only limited protection and can carry significant cost. We have no foreign currency hedges as of March 31, 2014. We will continue to analyze our exposure to currency exchange rate fluctuations and may engage in financial hedging techniques in the future to attempt to minimize the effect of these potential fluctuations. Exchange rate fluctuations may adversely affect our financial results in the future.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision of our chief executive officer and our chief financial officer, our management has evaluated the effectiveness of the design and operation of our “disclosure controls and procedures” (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), as of the end of the period covered by this Quarterly Report on Form 10-Q (the “Evaluation Date”). Based upon that evaluation, our chief executive officer and our chief financial officer have concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective.

Changes in Internal Controls

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act) that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II—OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

From time to time, we are party to various legal proceedings and other disputes incidental to our business. There have been no material developments in the first quarter of 2014 with respect to those proceedings previously reported in our Annual Report on Form 10-K for the year ended December 31, 2013.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2013, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results, including the following:

International sanctions regarding unrest in Ukraine could affect our business

Recent political unrest in Ukraine has resulted in the United States and the European Union imposing sanctions on Russia and certain businesses and individuals in Russia. The United States also suspended granting of export licenses to Russia. We have a large manufacturing facility and research and development operations in Russia which supplies components to our U.S. and German manufacturing facilities. In addition, we supply components from our U.S. and German manufacturing facilities to our Russia facility. To date, we have not experienced any disruptions to production or deliveries or impact from the current sanctions. Should there be disruption of our supplies from or to our Russian operations, or should the United States or the European Union implement different sanctions, our production and/or deliveries as well as results of operations could be materially impacted.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Issuer Purchases of Equity Securities**

Date	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
January 1, 2014 — January 31, 2014	—	(1) \$—	\$ —	\$ —
February 1, 2014 — February 28, 2014	—	(1) —	—	—
March 1, 2014 — March 31, 2014	2,639	(1) 71.10	—	—
Total	2,639	\$71.10	\$ —	\$ —

In 2012, our Board of Directors approved “withhold to cover” as a tax payment method for vesting of restricted stock awards for certain employees. Pursuant to the “withhold to cover” method, we withheld from such employees the (1) shares noted in the table above to cover tax withholding related to the vesting of their awards. The average prices listed in the above table are averages of the fair market prices at which we valued shares withheld for purposes of calculating the number of shares to be withheld in 2014.
