Yoqneam, Israel, October 25, 2004- MIND C.T.I. LTD. (NASDAQ: MNDO), a leading global provider of real-time mediation, provisioning, rating, billing and customer care solutions for pre-paid and post-paid voice, data and video, today announced results for the third quarter ended September 30, 2004.

Monica Eisinger, President and CEO, commented: "Our conservative approach in building our business continues to prove itself as ideal for the existing environment. We believe that MIND gained market share during the last two years and continues to do so. Our product-based approach and our customer-oriented business model enabled us to grow revenues for the tenth consecutive quarter. At the same time, the lasting challenging global environment created acquisition targets at reasonable valuations and we strive to locate the right addition that will enable us to significantly further enlarge the company.

MIND's know-how in the IP space enables us to successfully deploy "best-in-class" solutions for Service Enabling of IP services in the wireless arena and convergent billing for carriers that provide both traditional and IP services. We expect that our cost structure and our high gross margins will enable us to reach over 20% operating margins in the near future."

New Executive Addition

We are in a continuous process of gradually increasing the company size and continue to add experienced people to further support the growth and strengthen our management team. Our new CTO, Mr. Doron Segal, brings vast experience with design and implementation of complex telco-grade systems. Recently Mr. Segal was AVP at Comverse, with responsibility for technical requirements and system level design for most Comverse products and customer projects. As the company CTO he will be responsible for the system architecture, product design and maintaining MIND's technological leadership.

As of September 30, 2004, we had 243 employees in our offices in Israel, Romania, the United States and China.
