PART I

Item 1. Business Overview

CSG Systems International, Inc. (the Company, CSG, or forms of the pronoun we) was formed in October 1994 and acquired all of the outstanding stock of CSG Systems, Inc. (formerly Cable Services Group, Inc.) from First Data Corporation (FDC) in November 1994. CSG Systems, Inc. had been a subsidiary or division of FDC from 1982 until this acquisition.

We are a leading provider of software- and services-based customer interaction management solutions that help our clients build commerce by better engaging and transacting with their customers. Our solutions enable our clients to build new offerings, to engage customers on those offerings, and to deliver them through effective and profitable customer transactions. Our clients maximize the value and minimize the costs associated with their customer interactions by using our solutions to conduct key business processes such as targeting prospective customers, rolling out and offering new products quickly, efficiently managing order processing, streamlining operations, managing field workforces, improving customer satisfaction, integrating actionable customer intelligence, developing marketing strategies, printing and mailing monthly statements, and electronically transacting with customers. Our solutions provide clients with favorable results through improved operating efficiencies, decreased churn rates, accelerated marketing effectiveness, lower overall costs, and increased profitability.

Our proven technology is based on more than 25 years of expertise in serving clients in several complex and highly competitive industries. These clients typically handle a high volume of recurring transactions and complex customer relationships through a growing set of touch points, ranging from call centers, on-line Internet access, emails, text messages, interactive messaging, service technicians, and monthly statements. Our solutions and services are at work behind the scenes of systems that support customer interactions of some of the largest and most innovative service providers in North America. Our heritage is in providing outsourced customer interaction management solutions to the cable and direct broadcast satellite (DBS) companies, which represent approximately 88% and 95%, respectively, of our 2008 and 2007 revenues. Building upon those years of experience, we have broadened and enhanced our solutions to now serve an increasing number of other industries such as financial services, utilities, telecommunications, healthcare, and home security.

Our solutions are delivered and supported by an experienced and dedicated workforce of more than 2,000 employees. Our principal executive offices are located at 9555 Maroon Circle, Englewood, Colorado 80112, and the telephone number at that address is (303) 200-2000. Our common stock is listed on the NASDAQ Stock Market LLC (NASDAQ) under the symbol CSGS. We are a S&P SmallCap 600 company.

General Development of Business

Comcast Business Relationship. In September 1997, we entered into a 15-year exclusive contract (the Master Subscriber Agreement) with Tele-Communications, Inc. (TCI) to consolidate all TCI customers onto our customer care and billing systems. In 1999 and 2000, respectively, AT&T completed its mergers with TCI and MediaOne Group, Inc. (MediaOne), and consolidated the merged operations into AT&T Broadband (AT&T), and we continued to service the merged operations under the terms of the Master Subscriber Agreement. On November 18, 2002, Comcast Corporation (Comcast) completed its merger with AT&T, and assumed the Master Subscriber Agreement. Comcast is our largest client, making up approximately 27% of our total revenues in 2008.

During 2002 and 2003, we were involved in various legal proceedings with Comcast, consisting principally of arbitration proceedings related to the Master Subscriber Agreement. In October 2003, we received an unfavorable ruling in the arbitration proceedings. The Comcast arbitration ruling included an award of \$119.6

Table of Contents

million to be paid by us to Comcast. The award was based on the arbitrator's determination that we had violated the most favored nations (MFN) clause of the Master Subscriber Agreement. In addition, the arbitration ruling also required that we invoice Comcast for lower fees under the MFN clause of the Master Subscriber Agreement beginning in October 2003. This had the effect of reducing quarterly revenues from Comcast by approximately \$13-14 million (\$52-56 million annually), when compared to amounts prior to the arbitration ruling. In March 2004, we signed a new contract with Comcast (the Comcast Contract) with an expiration date of December 31, 2008, which superseded the former Master Subscriber Agreement that was set to expire at the end of 2012. In July 2008, we renewed our contract with Comcast through December 2012. See Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) for additional discussion of our business relationship with Comcast.

Discontinued Operations. In February 2002, we acquired the billing and customer care assets of Lucent Technologies (Lucent). Lucent's billing and customer care business consisted primarily of: (i) software products and related consulting services acquired by Lucent when it purchased Kenan Systems Corporation in February 1999; (ii) BILLDATS Data Manager mediation software; and (iii) elements of Lucent's client support, product support, and sales and marketing organizations (collectively, the Kenan Business). This acquisition allowed us to expand our customer care and billing product and service offerings into international markets. On December 9, 2005, we sold our Global Software Services (GSS) business (GSS Business), which consisted principally of the acquired Kenan Business, to Comverse, Inc., a division of Comverse Technology, Inc. (Comverse). As a result of our sale of the GSS Business, we no longer provide customer care and billing products or services outside of North America. The decision to sell the GSS Business allowed us to intensify our focus on our core competencies in the North American cable and DBS markets utilizing our Advanced Convergent Platform (ACP) product and related services.

In addition to the sale of the GSS Business noted above, we also sold our plaNet Consulting business to a group of private investors led by the plaNet management team on December 30, 2005. As a result of these sales, the results of operations for the GSS and plaNet businesses have been reflected as discontinued operations for all periods presented in the accompanying Consolidated Statements of Income. The remainder of the Business section of this Form 10-K is focused on our continuing operations. See Note 8 to our Consolidated Financial Statements and MD&A for additional discussion of our reporting of discontinued operations.

Industry Overview

Background. We provide customer interaction management solutions to clients in several complex and highly competitive industries. These clients typically handle a high volume of recurring transactions and customer relationships, through a growing set of touch points. Our solutions coordinate and manage many aspects of a service provider's customer interactions, from the initial activation of customer accounts, to the support of various service activities, and through the presentment of monthly customer invoices. While our heritage is in serving the North American cable and DBS communications markets, we have broadened and enhanced our solutions to extend our business to a growing number of other industries such as financial services, utilities, telecommunications, healthcare, and home security.

Market Conditions of Communications Industry. The North American communications industry has experienced significant consolidation and increased competition among service providers, and there is the possibility of further consolidation. Market consolidation results in a fewer number of service providers who have massive scale and can deliver a total communications package. The significant plant upgrades and network rationalizations that have taken place have allowed service providers to focus their attention on new revenue and growth opportunities. In addition, new competitors, new technologies, and unique partnerships are forcing service providers to be more creative in their approaches for rolling out new products and services, and enhancing their customers' experiences. These factors drive the demand for scalable, flexible, and cost efficient customer interaction management solutions, which we believe will provide us with revenue opportunities.

Table of Contents

However, another facet of this market consolidation poses certain risks to our company. The consolidation of service providers decreases the potential number of buyers for our products and services, and carries the inherent risk that the consolidators may choose to move all or a portion of their customers to a competitor's or in-house solution. Should this consolidation result in a concentration of customer accounts being owned by companies with whom we do not have a relationship, or with whom competitors are entrenched, it could negatively affect our ability to maintain or expand our market share, thereby having a material adverse effect to our results of operations. In addition, service providers at times have chosen to use their size and scale to exert more pressure on pricing negotiations.

In addition, it is widely anticipated that traditional wireline and wireless telephone service providers will continue their aggressive pursuit of providing convergent services. These providers have recently entered the residential video market, a market which has historically been dominated by our clients. Should these traditional telephone service providers be successful in their video strategy, it could threaten our clients market share, and thus our revenues as, generally speaking, traditional wireline and wireless telephone providers do not currently use our products and services.

General Market Conditions. In recent months, the U.S. has experienced a significant economic downturn and difficulties within the financial and credit markets, and these adverse economic conditions are predicted to continue into the foreseeable future. The possible adverse impacts to companies during these times include a reduction in revenues, decreasing profits and cash flows, distressed or default debt conditions, and/or difficulties in obtaining necessary operating capital.

Because of the severity and the far-reaching impacts of the situation, all companies could be adversely affected by the current economic conditions to a certain degree, including CSG, our clients, and/or key vendors in our supply chain. Some possible near term negative consequences of the current economic environment to our business include tightening of client spending and/or extended sales cycles which could materially lower our revenues related to our clients' discretionary spending for such things as special project work, marketing activities, new product sales, and software and professional services projects. We believe that our recurring revenue and predictable cash flow business model, our sufficient sources of liquidity, and our stable capital structure lessen the risk of a significant negative impact to our business as a result of the current economic conditions. Additionally, we believe our key clients have business models that have historically performed well, as compared to other industries, in down economic conditions. However, there can be no assurances regarding the performance of our business, and the potential impact to our clients and key vendors, resulting from the current economic conditions.

Business Strategy

Our business strategy is designed to achieve growth of revenues and profitability. The key elements of our business strategy include:

Expand Our Core Customer Information Processing and Output Solutions. Most of our revenues are generated from our core information processing systems, including our print and mail solutions (*Output Solutions*), that serve the cable and DBS communications industry. We provide a fully outsourced processing solution that combines the reliability and high-volume transaction processing capabilities of an enterprise server platform with the flexibility of client/server architecture. As of December 31, 2008, we had approximately 45 million customer accounts on our core information processing systems. In addition, we provide a full suite of *Output Solutions* that include statement design, custom printing, marketing services, electronic bill presentment, and inserting and mailing on a variety of high-speed equipment. We provide our *Output Solutions* primarily to those clients that utilize our outsourced processing solution, but we also provide such services to clients that do not utilize our outsourced processing solution. As of December 31, 2008, our average production volume for our *Output Solutions* was over 65 million customer statements per month, as compared to approximately 60 million customer statements per month as of December 31, 2007.

Table of Contents

Our customer information processing and Output Solutions provide highly predictable, recurring revenues through multi-year contracts with a client base that includes leading cable and DBS providers. We will continue to leverage our investment in and expertise in providing enhanced customer interaction management solutions as we look to increase penetration of our solutions within this current client base. Our customer information processing solutions are currently designed to focus on the North American cable and DBS markets. While our Output Solution clients are primarily those that utilize our customer information processing solutions, we look to continue to expand this solution set to other markets that demand high-quality, recurring monthly Output Solutions, such as financial services, utilities, telecommunications, healthcare, and home security.

Increase the Penetration of Ancillary Products/Services. We provide a complete suite of fully-integrated customer interaction management solutions and services that complement our customer information processing and Output Solutions platforms. While our primary value proposition to our clients is the breadth and depth of this integrated offering, we are evolving many of our product solutions to be more modular-based to allow clients to utilize certain of our products as point, independent solutions.

Our ancillary products and services enable and automate various aspects of a service provider's customer interactions, ranging from call centers, on-line Internet access, emails, text messages, interactive messaging, service technicians, and monthly statements. As our clients' businesses have consolidated and become much more complex with an increasingly diverse portfolio of service offerings, we have seen an increase in demand for our ancillary products and services, as our products are designed to help our clients solve their ever-changing customer interaction business needs as they arise.

Evolve Our Products and Services to Meet the Changing Needs of Our Video Clients. In 1995, we offered our solutions solely to providers of analog cable video. Since then, our solutions have evolved and expanded to accommodate DBS, digital video, high-speed Internet (HSI) and digital voice. Our video clients continue to look to add more services to their product bundle, including advanced IP and wireless services, as well as services to commercial customers. Our continued investment in our solution set is designed to expand our customer interaction management capabilities to enable our clients to grow their product offerings, control costs, and provide better customer service.

Enhance Growth Through Focused Acquisitions. We follow a disciplined approach in acquiring assets and businesses which provide the technology and technical personnel to expedite our product development efforts, provide complementary products and services, increase market share, and/or provide access to new markets and clients.

Expand Business in Additional Industries. As discussed above, the majority of our revenues are derived from the North American cable and DBS markets. However, over the past few years, through acquisitions and organic expansion of our solutions, we have increasingly broadened the markets we serve, with approximately 12% of our 2008 revenues being generated outside our core North American cable and DBS markets. Similar to the cable and DBS markets, numerous other industries, such as financial services, utilities, telecommunications, healthcare, and home security, have specific business needs directed towards improving interactions and transactions with customers. We believe that by continuing to pursue the development of our customer interaction management solutions, we have the opportunity to further expand our solution footprint and increase our addressable markets and revenue opportunities.

Continue Technology Leadership. We believe that our product technology and integrated suite of software solutions gives communications service providers a competitive advantage. Our continuing investment in research and development (R&D) is designed to position us to meet the growing and evolving needs of existing and potential clients. Over the last five years, we have invested approximately \$238 million, or approximately 12% of our total revenues, into R&D.

In summary, our R&D and recent acquisitions discussed below have put us in a better position to assist our clients and enable both of us to grow through maximizing every customer interaction. We have continually

Table of Contents

shown our commitment to deliver solutions and services to our clients with the highest level of performance and functionality, and with our continued investment in R&D and acquisition activities, we believe we will continue to find ways to solve our clients' business challenges and provide them with a competitive advantage. While we continue to strive to provide superior solutions and services to our existing clients, we will continue to focus on growing and diversifying our business and finding new ways to expand our footprint in some of the new vertical markets we have entered with our recent acquisitions.

Description of Business

Key Clients. We work with the leading cable and DBS providers located in the U.S. and Canada. A partial list of those service providers as of December 31, 2008 is included below:

Charter Communications, Inc. (Charter)
Comcast Corporation (Comcast)
Cox Communications

DISH Network Corporation (DISH)
Mediacom Communications
Time Warner, Inc. (Time Warner)

The North American communications industry has experienced significant consolidation over the last few years, resulting in a large percentage of the market being served by a limited number of service providers with greater size and scale. Consistent with this market concentration, a large percentage of our historical revenues have been generated from a limited number of clients, with approximately two-thirds of our 2008 and 2007 revenues being generated from our four largest clients, which include Comcast, DISH, Time Warner, and Charter. Revenues from these clients represented the following percentages of our total revenues for 2008 and 2007:

	2008	2007
Comcast	27%	27%
DISH	18%	20%
Time Warner	14%	13%
Charter	8%	9%

Research and Development. Our clients are facing more competition than ever before from new entrants, and at the same time, are deploying new services at a faster pace than ever before, dramatically increasing the complexity of their business operations. Therefore, we continue to invest heavily in R&D to ensure that we stay ahead of our clients' needs and advance our clients' business as well as our own. We recognize these challenges and believe our value proposition is to provide solutions that help our clients ensure that each interaction they have with their customers is an opportunity to create value and deepen the business relationship. As a result of our R&D efforts, we have not only broadened our footprint within our client base with many new innovative product offerings, but have also found traction in penetrating new markets with portions of our suite of customer interaction management solutions.

Our total R&D expenses were \$67.3 million and \$58.3 million, respectively, for 2008 and 2007, or approximately 14% of total revenues. In the near term, we expect that the percentage of our total revenues to be spent on R&D to be relatively consistent with that of 2008 and 2007, with the level of our R&D spend highly dependent upon the opportunities that we see in our markets.

There are certain inherent risks associated with significant technological innovations. Some of these risks are described in this report in our Risk Factors section below.

Products and Services. Our primary product offerings include our core outsourced information processing product, ACP, and related services and software products, to include our Output Solutions. A background in high-volume transaction processing and statement production, complemented with world-class applications software, allows us to offer one of the most comprehensive, pre-integrated products and services solutions to the

Table of Contents

cable and DBS market. We believe this pre-integrated approach and outsourced delivery model allows our clients to get new product offerings to market quickly and provide high-quality customer service in a cost effective manner.

We license certain software products (e.g., ACSR, Workforce Express, etc.) and provide our professional services principally to our existing base of processing clients to enhance the core functionality of ACP, increase the efficiency and productivity of the clients' operations, and allow clients to effectively roll out new products and services to new and existing markets, such as HSI and telephony services.

Historically, a substantial percentage of our total revenues have been generated from ACP processing, Output Solutions, and related software products. These products and services are expected to provide a substantial percentage of our total revenues in the foreseeable future as well.

During 2004, we completed a significant architectural upgrade to ACP and related services and software products. We continue to evolve ACP, both functionally and architecturally, in response to market demands that our products have certain functional features and capabilities, as well as architectural flexibilities (such as service oriented architecture, or SOA). This product evolution will result in the continued modularization of certain product functionalities that historically have been tightly integrated with the ACP platform, which allows us to respond more quickly to required changes to our products and provide greater interoperability with other computer systems. Although our primary value proposition to our clients will continue to be the breadth and depth of our fully pre-integrated solution, these R&D efforts allow us to separate certain software components so as to allow such components to be marketed on a stand-alone basis where a specific client requirement and/or business need dictates, including the use of certain products across non-CSG customer care and billing systems.

Business Acquisitions. As noted above, our strategy includes acquiring assets and businesses which provide the technology and technical personnel to expedite our product development efforts, provide complementary products and services, increase market share, and/or provide access to new markets and clients. Consistent with this strategy, we have acquired the following businesses over the last three years:

Telution. As part of this product evolution strategy, we acquired Telution, Inc. (Telution) in March of 2006 to further expand these capabilities around our ACP platform. Our recent R&D efforts include the integration of these acquired technologies into our solution set. In particular, the acquired software assets are an integral part of the new functionality that has been added to our ACP platform since the acquisition.

ComTec. In July of 2007, we acquired ComTec, Inc. (ComTec), to expand our Output Solutions footprint and capabilities. With this acquisition, we added enhanced statement production and electronic statement presentation hardware and software technologies, as well as additional plant capacities. These technologies, which include extensive highlight color and cut-sheet printing capabilities, have accelerated our ability to offer enhanced output functionality to existing and prospective customers. In addition, the acquisition increased our presence in our core cable television and DBS markets, while also providing an established customer base in new industry verticals such as financial services, utilities, telecommunications, healthcare, and home security.

Prairie. In August of 2007, we acquired Prairie Voice Services, Inc. This business, which was renamed Prairie Interactive Messaging, Inc. (Prairie), extends our suite of products and solutions that help our clients maximize the value of their interactions with their customers. Prairie provides inbound and outbound automated voice, text/SMS, email, and fax messaging services to manage workforce communications, collections, lead generation, automated order capture, service outage notifications, and other key business functions. We acquired Prairie to extend our customer interaction management capabilities within our core cable television and DBS markets, while also providing an established customer base in new industry verticals such as financial services and telecommunications.

DataProse. In April of 2008, we acquired DataProse, Inc., (DataProse) to further our objective of helping our clients maximize every customer interaction by both strengthening and broadening our portfolio

Table of Contents

of Output Solutions capabilities. DataProse enhances our suite of advanced, turnkey solutions for personalized statement presentment in both paper and electronic formats, and adds extensive expertise in direct mail marketing services, including database management and market segmentation. Additionally, this acquisition has allowed us to diversify our client base into the utilities, financial services, and telecommunications markets, and add clients in the non-profit sectors of healthcare and higher education.

Quaero. On December 31, 2008, we acquired Quaero Corporation, a marketing services provider with expertise in customer strategy, analytics, and marketing performance management. This acquisition broadens our solution suite with powerful customer intelligence capabilities that will further assist our clients in maximizing the value of their customer interactions. We plan to enhance these client relationships by broadening Quaero's strategic marketing offerings with our customer interaction management solutions such as Output Solutions, interactive messaging, and e-communications. In addition, we plan to integrate Quaero's capabilities with our existing customer interaction management solution suite, most notably for our cable and DBS clients. The combined customer intelligence solution will allow our clients to utilize key data from our billing system and other external data feeds to profile and predict customer profitability and behavior. The Quaero acquisition will also continue to extend our reach into new industry verticals and further diversify our revenue base including financial services, pharmaceutical/healthcare, media/publishing, travel/hospitality, consumer, and high tech.

Data Center Processing Facility. We outsource to FDC the data processing and related computer services required for the operation of our processing services. Our ACP proprietary software and other software applications are run in FDC's facility to obtain the necessary enterprise server computer capacity and other computer support services without us having to make the substantial capital and infrastructure investments that would be necessary for us to provide these services internally. Our clients are connected to the FDC facility through a combination of private and commercially-provided networks. Our service agreement with FDC expires June 30, 2010, and is cancelable only for cause, as defined in the agreement. We have a business continuity plan as part of our agreement with FDC should the FDC data processing center suffer an extended business interruption or outage.

In December 2008, we entered into an agreement with Infocrossing LLC (Infocrossing), a Wipro Limited company, to transition these outsourced data center services to Infocrossing. Infocrossing has been in the business of providing end-to-end information technology management solutions for over 25 years and operates world-class data centers throughout the U.S. for multiple computing environments and platforms. As part of the transition, we will setup and replicate the computing environment at the new Infocrossing data center location to protect against disruption. We plan to transition certain systems during 2009, with the final transition of services to Infocrossing from FDC expected to be completed in the first half of 2010, prior to the expiration of the FDC contract.

Client and Product Support. Our clients typically rely on us for ongoing support and training needs related to our products. We have a multi-level support environment for our clients, which includes dedicated account management teams to support the business, operational, and functional requirements of each client. These account teams help clients resolve strategic and business issues and are supported by our Solution Support Center (SSC), which operates 24 hours a day, seven days a week. Clients call an 800 number, and through an automated voice response unit, have their calls directed to the appropriate SSC personnel to answer their questions. We have a full-time training staff and conduct ongoing training sessions both in the field and at our training facilities.

Sales and Marketing. We organize our sales efforts to existing clients primarily within our dedicated account teams, with senior level account managers who are responsible for new revenues and renewal of existing contracts within a client account. The account teams are supported by sales support personnel who are experienced in the various products and services that we provide. In addition, we have dedicated staff engaged in selling our products and services to prospective clients.

Table of Contents

Competition. The market for customer interaction management products and services in the converging communications industry in North America, as well as in other industries we serve, is highly competitive. We compete with both independent outsourced providers and in-house developers of customer management systems. We believe that our most significant competitors in our primary markets are Amdocs Limited, Convergys Corporation, Oracle Corporation, and in-house systems. Some of our actual and potential competitors have substantially greater financial, marketing, and technological resources than us.

We believe service providers in our industry use the following criteria when selecting a vendor to provide customer care and billing products and services: (i) functionality, scalability, flexibility, interoperability, and architecture of the software assets; (ii) the breadth and depth of pre-integrated product solutions; (iii) product quality, client service, and support; (iv) quality of R&D efforts; and (v) price. We believe that our products and services allow us to compete effectively in these areas.

Proprietary Rights and Licenses

We rely on a combination of trade secret and copyright laws, nondisclosure agreements, and other contractual and technical measures to protect our proprietary rights in our products. While we hold a limited number of patents on some of our newer products, we do not rely upon patents as a primary means of protecting our rights in our intellectual property. There can be no assurance that these provisions will be adequate to protect our proprietary rights. Although we believe that our intellectual property rights do not infringe upon the proprietary rights of third parties, there can be no assurance that third parties will not assert infringement claims against us or our clients.

We continually assess whether there is any risk to our intellectual property rights. Should these risks be improperly assessed, or if for any reason should our right to develop, produce, and distribute our products be successfully challenged or be significantly curtailed, it could have a material adverse impact on our financial condition and results of operations.

Employees

As of December 31, 2008, we had a total of 2,066 employees, an increase of 189 or 10%, from December 31, 2007. The increase in employees is a result of the addition of employees from the DataProse and Quaero acquisitions. Our success is dependent upon our ability to attract and retain qualified employees. None of our employees are subject to a collective bargaining agreement. We believe that our relations with our employees are good.

Available Information

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy materials, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act are available free of charge on our website at www.csgsystems.com. Additionally, these reports are available at the SEC's Public Reference Room at 100 F Street, NE., Washington, D.C. 20549 or on the SEC's website at www.sec.gov. Information on the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

Code of Business Conduct and Ethics

A copy of our Code of Business Conduct and Ethics (the "Code of Conduct") is maintained on our website. Any future amendments to the Code of Conduct, or any future waiver of a provision of our Code of Conduct, will be timely posted to our website upon their occurrence. Historically, we have had minimal changes to our Code of Conduct, and have had no waivers of a provision of our Code of Conduct.

Table of Contents

Item 1A. Risk Factors

We or our representatives from time-to-time may make or may have made certain forward-looking statements, whether orally or in writing, including without limitation, any such statements made or to be made in MD&A contained in our various SEC filings or orally in conferences or teleconferences. We wish to ensure that such statements are accompanied by meaningful cautionary statements, so as to ensure, to the fullest extent possible, the protections of the safe harbor established in the Private Securities Litigation Reform Act of 1995.

Accordingly, the forward-looking statements are qualified in their entirety by reference to and are accompanied by the following meaningful cautionary statements identifying certain important risk factors that could cause actual results to differ materially from those in such forward-looking statements. This list of risk factors is likely not exhaustive. We operate in a rapidly changing and evolving market involving the North American communications industry (e.g., bundled multi-channel video, Internet, voice and IP-based services), and new risk factors will likely emerge. Further, as we enter new markets such as healthcare and financial services, we are subject to new regulatory requirements that increase the risk of non-compliance and the potential for economic harm to us and our customers. Management cannot predict all of the important risk factors, nor can it assess the impact, if any, of such risk factors on our business or the extent to which any risk factor, or combination of risk factors, may cause actual results to differ materially from those in any forward-looking statements. Accordingly, there can be no assurance that forward-looking statements will be accurate indicators of future actual results, and it is likely that actual results will differ from results projected in forward-looking statements and that such differences may be material.

We Derive a Significant Portion of Our Revenues From a Limited Number of Clients, and the Loss of the Business of a Significant Client Would Materially Adversely Affect Our Financial Condition and Results of Operations.

The North American communications industry has experienced significant consolidation over the last several years, resulting in a large percentage of the market being served by a limited number of service providers with greater size and scale. Consistent with this market concentration, a large percentage of our revenues are generated from a limited number of clients, with approximately two-thirds of our revenues being generated from our four largest clients, which are (in order of size) Comcast, DISH, Time Warner, and Charter. See the Significant Client Relationships section of MD&A for key renewal dates and a brief summary of our business relationship with these clients.

There are inherent risks whenever a large percentage of total revenues are concentrated with a limited number of clients. One such risk is that, should a significant client: (i) terminate or fail to renew their contracts with us, in whole or in part for any reason; (ii) significantly reduce the number of customer accounts processed on our systems, the price paid for our services, or the scope of services that we provide; or (iii) experience significant financial or operating difficulties, it could have a material adverse effect on our financial condition and results of operations.

Our industry is highly competitive, and the possibility that a major client may move all or a portion of its customers to a competitor has increased. While our clients may incur some costs in switching to our competitors, they may do so for a variety of reasons, including: (i) if we do not maintain favorable relationships; (ii) if we do not provide satisfactory services and products; or (iii) for reasons associated with price.

The Delivery of Our Products and Services is Dependent on a Variety of Computing Environments and Communications Networks, Which May Not Be Available or May Be Subject to Security Attacks.

Our products and services are generally delivered through a variety of computing environments operated by us, which we will collectively refer to herein as Systems. We provide such computing environments through both outsourced arrangements, such as our current data processing arrangement with FDC, as well as internally operating numerous distributed servers in geographically dispersed environments. The end users are connected to our Systems through a variety of public and private communications networks, which we will collectively refer

Table of Contents

to herein as Networks. Our products and services are generally considered to be mission critical customer management systems by our clients. As a result, our clients are highly dependent upon the high availability and uncompromised security of our Networks and Systems to conduct their business operations.

Our Networks and Systems are subject to the risk of an extended interruption or outage due to many factors such as: (i) planned changes to our Systems and Networks for such things as scheduled maintenance and technology upgrades, or migrations to other technologies, service providers, or physical location of hardware; (ii) human and machine error; (iii) acts of nature; and (iv) intentional, unauthorized attacks from computer hackers. As noted above, we will begin to transition the data center services currently provided by FDC to Infocrossing during 2009, and expect to complete the final transition of such services in the first half of 2010. Because of the magnitude of the Systems and Networks that will be impacted by this transition, the above risks of an extended interruption or outage will be significantly heightened during this period.

In addition, we continue to expand our use of the Internet with our product offerings thereby permitting, for example, our clients' customers to use the Internet to review account balances, order services or execute similar account management functions. Allowing access to our Networks and Systems via the Internet has the potential to increase their vulnerability to unauthorized access and corruption, as well as increasing the dependency of our Systems' reliability on the availability and performance of the Internet and end users' infrastructure they obtain through other third party providers.

The method, manner, cause and timing of an extended interruption or outage in our Networks or Systems are impossible to predict. As a result, there can be no assurances that our Networks and Systems will not fail, or that our business continuity plans will adequately mitigate all damages incurred as a consequence. Should our Networks or Systems: (i) experience an extended interruption or outage, (ii) have their security breached, or (iii) have their data lost, corrupted or otherwise compromised, it would impede our ability to meet product and service delivery obligations, and likely have an immediate impact to the business operations of our clients. This would most likely result in an immediate loss to us of revenue or increase in expense, as well as damaging our reputation. Any of these events could have both an immediate, negative impact upon our financial condition and our short-term revenue and profit expectations, as well as our long-term ability to attract and retain new clients.

The Current Macroeconomic Environment Could Adversely Impact Our Business.

In recent months, the U.S. has experienced a significant economic downturn and difficulties within the financial and credit markets, and these adverse economic conditions are predicted to continue into the foreseeable future. The possible adverse impacts to companies during these times include a reduction in revenues, decreasing profits and cash flows, distressed or default debt conditions, and/or difficulties in obtaining necessary operating capital. Because of the severity and the far-reaching impacts of the situation, all companies could be adversely affected by the current economic conditions to a certain degree, including CSG, our clients, and/or key vendors in our supply chain. There can be no assurances regarding the performance of our business, and the potential impact to our clients and key vendors, resulting from the current economic conditions.

A Reduction in Demand for Our Key Customer Care and Billing Products and Services Could Have a Material Adverse Effect on Our Financial Condition and Results of Operations.

Historically, a substantial percentage of our total revenues have been generated from our core outsourced processing product, ACP, and related products and services. These products and services are expected to continue to provide a large percentage of our total revenues in the foreseeable future. Any significant reduction in demand for ACP and related products and services could have a material adverse effect on our financial condition and results of operations.

Table of Contents

We May Not Be Able to Respond to Rapid Technological Changes.

The market for customer interaction management solutions, such as customer care and billing products and services, is characterized by rapid changes in technology and is highly competitive with respect to the need for timely product innovations and new product introductions. As a result, we believe that our future success in sustaining and growing our revenues depends upon the continued market acceptance of our products, especially ACP, and our ability to continuously adapt, modify, maintain, and operate our products to address the increasingly complex and evolving needs of our clients, without sacrificing the reliability or quality of the products. In addition, the market is demanding that our products have greater architectural flexibility and interoperability with other computer systems, and that we are able to meet the demands for technological advancements to our products and services at a greater pace. Attempts to meet these demands subjects our R&D efforts to greater risks.

As a result, substantial R&D will be required to maintain the competitiveness of our products and services in the market. Technical problems may arise in developing, maintaining and operating our products and services as the complexities are increased. Development projects can be lengthy and costly, and may be subject to changing requirements, programming difficulties, a shortage of qualified personnel, and/or unforeseen factors which can result in delays. In addition, we may be responsible for the implementation of new products and/or the migration of clients to new products, and depending upon the specific product, we may also be responsible for operations of the product.

There is an inherent risk in the successful development, implementation, migration, and operations of our products and services as the technological complexities, and the pace at which we must deliver these products and services to market, continue to increase. The risk of making an error that causes significant operational disruption to a client increases proportionately with the frequency and complexity of changes to our products and services. There can be no assurance: (i) of continued market acceptance of our products and services; (ii) that we will be successful in the development of product enhancements or new products that respond to technological advances or changing client needs at the pace the market demands; or (iii) that we will be successful in supporting the implementation, migration and/or operations of product enhancements or new products.

Our Business is Highly Dependent on the North American Cable and DBS Industries.

We have historically generated a significant portion of our revenues by providing products and services to clients in the North American cable and DBS industries. A decrease in the number of customers served by our clients, an adverse change in the economic condition of these industries, and/or changing consumer demand for services could have a material adverse effect on our results of operations. Additionally, a significant portion of our historical growth has come from our support of clients' expansion into new lines of business, such as HSI and VoIP. There can be no assurance that our current and potential clients will be successful in expanding into new segments of the converging North American communications industry. Even if major forays into new markets by our current or potential clients are successful, we may be unable to meet the special billing and customer interaction management needs of those markets.

Our clients operate in a highly competitive environment. It is widely anticipated that traditional wireline and wireless telephone service providers, and others, will continue their aggressive pursuit of providing convergent services, including residential video, a market historically dominated by our clients. Should these alternative service providers be successful in their video strategies, it could threaten our clients' market share, and thus our source of revenues, as generally speaking these companies do not use our core products and services and there can be no assurance that new entrants will become our clients.

Table of Contents

Further Consolidation of the North American Cable and DBS Industries May Have a Material Adverse Effect on Our Results of Operations.

The North American cable and DBS industries may continue to be subject to significant ownership changes. One facet of these changes is that consolidation by and among our core client base, the cable and DBS providers, as well as new entrants such as the traditional wireline and wireless carriers, will decrease the potential number of buyers for our products and services. Should these consolidations result in a concentration of customer accounts being owned by companies with whom we do not have a relationship, or with whom competitors are entrenched, we could be subject to the risk that subscribers will be moved off of our systems and onto a competitor's system, thereby having a material adverse effect on our results of operations. Furthermore, movement of our clients' customers from our systems to a competitor's system as a result of regionalization strategies by our clients could have a material adverse effect on our operations. Finally, as the result of the consolidations, our current and potential clients may choose to use their size and scale to exercise more severe pressure on pricing negotiations.

We Face Significant Competition in Our Industry.

The market for our products and services is highly competitive. We directly compete with both independent providers of products and services and in-house systems developed by existing and potential clients. In addition, some independent providers are entering into strategic alliances with other independent providers, resulting in either new competitors, or competitors with greater resources. Many of our current and potential competitors have significantly greater financial, marketing, technical, and other competitive resources than our company, many with significant and well-established domestic and international operations. There can be no assurance that we will be able to compete successfully with our existing competitors or with new competitors.

Client Bankruptcies Could Adversely Affect Our Business.

In the past, certain of our clients have filed for bankruptcy protection. As a result of the current economic conditions and the additional financial stress this may place on companies, the risk of client bankruptcies is significantly heightened. Companies involved in bankruptcy proceedings pose greater financial risks to us, consisting principally of the following: (i) a financial loss related to possible claims of preferential payments for certain amounts paid to us prior to the bankruptcy filing date, as well as increased collectibility risk for accounts receivable, particularly those accounts receivable that relate to periods prior to the bankruptcy filing date; and/or (ii) the possibility of a contract being unilaterally rejected as part of the bankruptcy proceedings, or a client in bankruptcy may attempt to renegotiate more favorable terms as a result of their deteriorated financial condition, thus, negatively impacting our rights to future revenues subsequent to the bankruptcy filing. We consider these risks in assessing our revenue recognition and the collectibility of accounts receivable related to our clients that have filed for bankruptcy protection, and for those clients that are seriously threatened with a possible bankruptcy filing. We establish accounting reserves for our estimated exposure on these items which can materially impact the results of our operations in the period such reserves are established. There can be no assurance that our accounting reserves related to this exposure will be adequate. Should any of the factors considered in determining the adequacy of the overall reserves change adversely, an adjustment to the accounting reserves may be necessary. Because of the potential significance of this exposure, such an adjustment could be material.

We May Incur Additional Material Restructuring Charges in the Future.

In the past, we have recorded restructuring charges related to involuntary employee terminations, various facility abandonments, and various other restructuring activities. We continually evaluate ways to reduce our operating expenses through new restructuring opportunities, including more effective utilization of our assets, workforce and operating facilities. As a result, there is a risk, which is inherently greater during economic downturns, that we may incur additional material restructuring charges in the future.

Table of Contents

Failure to Attract and Retain Our Key Management and Other Highly Skilled Personnel Could Have a Material Adverse Effect on Our Business.

Our future success depends in large part on the continued service of our key management, sales, product development, and operational personnel. We believe that our future success also depends on our ability to attract and retain highly skilled technical, managerial, operational, and marketing personnel, including, in particular, personnel in the areas of R&D and technical support. Competition for qualified personnel at times can be intense, particularly in the areas of R&D, conversions, software implementations, and technical support. For these reasons, we may not be successful in attracting and retaining the personnel we require, which could have a material adverse effect on our ability to meet our commitments and new product delivery objectives.

We May Not Be Successful in the Integration of Our Acquisitions.

As part of our growth strategy, we seek to acquire assets, technology, and businesses which will provide the technology and technical personnel to expedite our product development efforts, provide complementary products or services, or provide access to new markets and clients.

Acquisitions involve a number of risks and difficulties, including: (i) expansion into new markets and business ventures; (ii) the requirement to understand local business practices; (iii) the diversion of management's attention to the assimilation of acquired operations and personnel; and (iv) potential adverse effects on a company's operating results for various reasons, including, but not limited to, the following items: (a) the inability to achieve financial targets; (b) the inability to achieve certain operating goals and synergies; (c) charges related to purchased in-process R&D projects; (d) costs incurred to exit current or acquired contracts or activities; (e) costs incurred to service any acquisition debt; and (f) the amortization or impairment of intangible assets.

Due to the multiple risks and difficulties associated with any acquisition, there can be no assurance that we will be successful in achieving our expected strategic, operating, and financial goals for any such acquisition.

Failure to Protect Our Proprietary Intellectual Property Rights Could Have a Material Adverse Effect on Our Financial Condition and Results of Operations.

We rely on a combination of trade secret and copyright laws, nondisclosure agreements, and other contractual and technical measures to protect our proprietary rights in our products. We also hold a limited number of patents on some of our newer products, but do not rely upon patents as a primary means of protecting our rights in our intellectual property. There can be no assurance that these provisions will be adequate to protect our proprietary rights. Although we believe that our intellectual property rights do not infringe upon the proprietary rights of third parties, there can be no assurance that third parties will not assert infringement claims against us or our clients.

We continually assess whether there are any risks to our intellectual property rights. Should these risks be improperly assessed or if for any reason should our right to develop, produce and distribute our products be successfully challenged or be significantly curtailed, it could have a material adverse effect on our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

As of December 31, 2008, we were operating from ten leased sites in the U.S., representing approximately 624,000 square feet. This amount excludes approximately 106,000 square feet of leased space that we have abandoned.

Table of Contents

We lease office facilities totaling approximately 100,000 square feet in Englewood, Colorado and surrounding communities. We utilize these office facilities primarily for: (i) corporate headquarters; (ii) sales and marketing activities; (iii) product and operations support; and (iv) R&D activities. The leases for these office facilities expire in the years 2013 through 2015.

We lease office facilities totaling approximately 225,000 square feet in Omaha, Nebraska. We utilize these facilities primarily for (i) client services, training, and product support; (ii) systems and programming activities; (iii) R&D activities; and (iv) general and administrative functions. The leases for these facilities expire in the years 2009 through 2012.

We lease an office facility totaling approximately 25,000 square feet in Chicago, Illinois. We utilize this facility primarily for: (i) R&D activities; (ii) client services; and (iii) professional services staff. The lease for this office facility expires in 2020.

We lease statement production and mailing facilities totaling approximately 274,000 square feet in Omaha, Nebraska, Wakulla County, Florida, Fairfield, New Jersey, Coppell, Texas, and Oxnard, California. The leases for these facilities expire in the years 2011 through 2019.

Additionally, as part of our acquisition of Quaero on December 31, 2008, we assumed operating leases for office facility space of approximately 9,000 square feet in Charlotte, North Carolina and 8,000 square feet in Burlington, Massachusetts. The leases for these facilities expire in the years 2010 and 2013, respectively.

We believe that our facilities are adequate for our current needs and that additional suitable space will be available as required. We also believe that we will be able to either: (i) extend our current leases as they terminate; or (ii) find alternative space without experiencing a significant increase in cost. See Note 10 to our Consolidated Financial Statements for information regarding our obligations under our facility leases.

Item 3. Legal Proceedings

From time-to-time, we are involved in litigation relating to claims arising out of our operations in the normal course of business. In the opinion of our management, we are not presently a party to any material pending or threatened legal proceedings.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Executive Officers of the Registrant

As of December 31, 2008, our executive officers were Peter E. Kalan (Chief Executive Officer and President), Randy R. Wiese (Executive Vice President and Chief Financial Officer), Robert M. (Mike) Scott (Executive Vice President and Chief Operating Officer), and Joseph T. Ruble (Executive Vice President, General Counsel, Corporate Secretary and Chief Administrative Officer). We have employment agreements with each of the executive officers.

Peter E. Kalan

Chief Executive Officer and President

Mr. Kalan, 49, joined CSG in January 1997 and was named Chief Financial Officer in October 2000. In April 2006, he was named Executive Vice President of Business and Corporate Development. In December 2007, Mr. Kalan was named Chief Executive Officer and President, and elected to the Board. Prior to

Table of Contents

joining CSG, he was Chief Financial Officer at Bank One, Chicago, and he also held various other financial management positions with Bank One in Texas and Illinois from 1985 through 1996. Mr. Kalan holds a BA degree in Business Administration from the University of Texas at Arlington.

Randy R. Wiese

Executive Vice President and Chief Financial Officer

Mr. Wiese, 49, joined CSG in 1995 as Controller and later served as Chief Accounting Officer. He was named Executive Vice President and Chief Financial Officer in April 2006. Prior to joining CSG, he was manager of audit and business advisory services and held other accounting-related positions at Arthur Andersen & Co. Mr. Wiese is a member of the AICPA and the Nebraska Society of Certified Public Accountants. He holds a BS degree in Accounting from the University of Nebraska-Omaha.

Robert M. Scott

Executive Vice President and Chief Operating Officer

Mr. Scott, 58, joined CSG in September 1999 as Vice President of the Broadband Services Division and served as Senior Vice President of that division from 2001 to 2004. In December 2004, Mr. Scott was named Executive Vice President, and became the head of the Broadband Services Division in March 2005. In July 2006, he was named Chief Operating Officer. Prior to joining CSG, he served for 21 years in a variety of management positions, both domestically and internationally, with First Data Corporation. Mr. Scott holds a BA degree in Social Studies from Florida Atlantic University.

Joseph T. Ruble

Executive Vice President, General Counsel, Corporate Secretary and Chief Administrative Officer

Mr. Ruble, 48, joined CSG in 1997 as Vice President and General Counsel. In November 2000 he was appointed Senior Vice President of Corporate Development, General Counsel & Corporate Secretary. In February 2007, he was named Executive Vice President. Prior to joining CSG, Mr. Ruble served from 1991 to 1997 as Vice President, General Counsel & Corporate Secretary for Intersolv, Inc., and as counsel to Pansophic Systems, Inc. for its international operations from 1988 to 1991. Prior to that, he represented the software industry in Washington, D.C. on legislative matters. Mr. Ruble holds a JD from Catholic University of America and a BS degree from Ohio University.

Board of Directors of the Registrant

Information related to our Board of Directors is provided below.

Bernard W. Reznicek

Consultant

The Premier Group

Mr. Reznicek, 72, was elected to the Board in January 1997 and presently serves as the Company's non-executive Chairman of the Board. He currently provides consulting services through Premier Enterprises. Mr. Reznicek previously was an Executive with Central States Indemnity Company of Omaha, a Berkshire Hathaway company, from 1997 to 2003. He has 40 years of experience in the electric utility industry, having served as Chairman, President and Chief Executive Officer of Boston Edison Company and President and Chief Executive Officer of Omaha Public Power District. Mr. Reznicek currently is a director of Pulte Homes, Inc. (NYSE) and infoGROUP Inc. (NASDAQ).

Table of Contents

Peter E. Kalan

Chief Executive Officer and President

CSG Systems International, Inc.

Mr. Kalan's biographical information is included in Executive Officers of the Registrant section shown directly above.

Ronald Cooper

Former President and Chief Operating Officer

Adelphia Communications

Mr. Cooper, 51, was elected to the Board in November 2006. He has spent nearly 25 years in the cable and telecommunications industry, most recently at Adelphia Communications where he served as President and Chief Operating Officer from 2003 to 2006. Prior to Adelphia, Mr. Cooper held a series of executive positions at AT&T Broadband, RELERA Data Centers & Solutions, and MediaOne and its predecessor Continental Cablevision, Inc. He has held various board and committee seats with the National Cable Television Association, California Cable & Telecommunications Association, Cable Television Association for Marketing and the New England Cable Television Association. In addition, Mr. Cooper is a trustee at the Denver Art Museum and a director for Colorado Public Radio.

Edward C. Nafus

Former Chief Executive Officer and President

CSG Systems International, Inc.

Mr. Nafus, 68, was elected to the Board in March 2005. Mr. Nafus joined CSG in August 1998 as Executive Vice President and became the President of our Convergent Services and Solutions Division in January 2002. In April 2005, Mr. Nafus assumed the position of Chief Executive Officer and President of CSG and held that position until his retirement in December 2007. Prior to joining CSG, Mr. Nafus held numerous management positions within FDC from 1978 to 1998. From 1992 to 1998, he served as Executive Vice President of FDC; from 1989 to 1992, he served as President of First Data International; and Executive Vice President of First Data Resources from 1984 to 1989. From 1971 to 1978, Mr. Nafus worked in sales management, training and sales for Xerox Corporation. From 1966 to 1971, Mr. Nafus was a pilot and division officer in the United States Navy. Mr. Nafus holds a BS degree from Jamestown College.

Janice I. Obuchowski

President

Freedom Technologies, Inc.

Ms. Obuchowski, 57, was elected to the Board in November 1997. She has been President of Freedom Technologies, Inc., a public policy and corporate strategy consulting firm specializing in telecommunications, since 1992. In 2003, Ms. Obuchowski was appointed by President George W. Bush to serve as Ambassador and Head of the U.S. Delegation to the World Radio Communication Conference. She has served as Assistant Secretary for Communications and Information at the Department of Commerce and as Administrator for the National Telecommunications and Information Administration. Ms. Obuchowski currently is a director of Orbital Sciences Corporation and Stratos Global Corporation.

Donald B. Reed

Former Chief Executive Officer

Cable & Wireless Global

Edgar Filing: CSG SYSTEMS INTERNATIONAL INC - Form 10-K

Mr. Reed, 64, was elected to the Board in May 2005. He currently is retired, having served as Chief Executive Officer of Cable & Wireless Global from May 2000 to January 2003. Cable & Wireless Global, Cable & Wireless plc's wholly owned operations in the United States, United Kingdom, Europe and Japan, is a

Table of Contents

provider of internet protocol (IP) and data services to business customers. From June 1998 until May 2000, Mr. Reed served Cable & Wireless in various other executive positions. Mr. Reed's career includes 30 years at NYNEX Corporation (now part of Verizon), a regional telephone operating company. From 1995 to 1997 Mr. Reed served NYNEX Corporation as President and Group Executive with responsibility for directing the company's regional, national and international government affairs, public policy initiatives, legislative and regulatory matters, and public relations. Mr. Reed currently is a director of Idearc Media (formerly Verizon Yellow Pages) and Aggregate Industries in London, England, a wholly owned subsidiary of Holcim Group located in Switzerland.

Frank V. Sica

Managing Partner

Tailwind Capital

Mr. Sica, 58, has served as a director of the Company since its formation in 1994. He is currently a Managing Partner of Tailwind Capital. From 2004 to 2005, Mr. Sica was a Senior Advisor to Soros Private Funds Management. From 2000 until 2003, he was President of Soros Private Funds Management which oversaw the direct real estate and private equity investment activities of Soros. In 1998, he joined Soros Fund Management where he was a Managing Director responsible for Soros' private equity investments. From 1988 to 1998, Mr. Sica was a Managing Director at Morgan Stanley and its private equity affiliate, Morgan Stanley Capital Partners. Prior to 1988, Mr. Sica was a Managing Director in Morgan Stanley's mergers and acquisitions department. From 1974 to 1977, Mr. Sica was an officer in the U.S. Air Force. Mr. Sica currently is a director of JetBlue Airways, Kohl's Corporation, and NorthStar Realty Finance Corporation.

Donald V. Smith

Senior Managing Director

Houlihan Lokey Howard & Zukin, Inc.

Mr. Smith, 66, was elected to the Board in January 2002. He presently serves as Senior Managing Director of Houlihan Lokey Howard & Zukin, Inc., an international investment banking firm with whom he has been associated since 1988. Mr. Smith is involved as a senior professional in mergers, acquisitions, financial advisory, and financial restructurings for clients of the firm. From 1978 to 1988, he was employed by Morgan Stanley & Co. Incorporated, where he headed the valuation and reorganization services within that firm's corporate finance group. Mr. Smith is director of the Princeton (NJ) Health Care Foundation and of Business Executives for National Security.

James A. Unruh

Managing Principal

Alerion Capital Group

Mr. Unruh, 68, was elected to the Board in June 2005. He became a founding principal of Alerion Capital Group, LLC (a private equity investment company) in 1998 and currently holds such position. Mr. Unruh was an executive with Unisys Corporation from 1987 to 1997 and served as its Chairman and Chief Executive Officer from 1990 to 1997. From 1982 to 1987, Mr. Unruh held various executive positions, including Senior Vice President, Finance, with Burroughs Corporation, a predecessor of Unisys Corporation. Mr. Unruh currently is a director of Prudential Financial, Inc., Tenet Healthcare Corporation, and Qwest Communications International Inc.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is listed on NASDAQ under the symbol CSGS. The following table sets forth, for the fiscal quarters indicated, the high and low sale prices of our common stock as reported by NASDAQ.

	High	Low
2008		
First quarter	\$ 14.78	\$ 10.49
Second quarter	13.80	10.81
Third quarter	20.16	10.88
Fourth quarter	17.83	12.79
	High	Low
2007		
First quarter	\$ 26.97	\$ 24.02
Second quarter	28.22	24.45
Third quarter	27.26	19.64
Fourth quarter	21.97	14.52

On February 27, 2009, the last sale price of our common stock as reported by NASDAQ was \$13.52 per share. On January 31, 2009, the number of holders of record of common stock was 231.

Dividends

We have not declared or paid cash dividends on our common stock since our incorporation. We did, however, complete a two-for-one stock split, effected in the form of a stock dividend, in March 1999. We intend to retain any earnings to finance the growth and development of our business, and at this time, we do not plan to pay cash dividends in the foreseeable future.

Our revolving credit facility contains certain restrictions on the payment of dividends. In addition, the payment of dividends has certain impacts to our Convertible Debt Securities. See Note 6 to our Consolidated Financial Statements for additional discussion of our revolving credit facility and Convertible Debt Securities, and the impact the payment of dividends may have on these items.

Table of Contents**Stock Price Performance**

The following graph compares the cumulative total stockholder return on our common stock, the S&P 500 Index, and our Standard Industrial Classification (SIC) Code Index: Computer Processing and Data Preparation and Processing Services during the indicated five-year period. The graph assumes that \$100 was invested on December 31, 2003, in our common stock and in each of the two indexes and that all dividends, if any, were reinvested.

	12/31/03	12/31/04	12/31/05	12/31/06	12/31/07	12/31/08
CSG Systems International, Inc.	\$ 100.00	\$ 149.72	\$ 178.70	\$ 214.01	\$ 117.85	\$ 139.87
Data Preparation & Processing Services	100.00	109.83	110.38	123.38	123.29	94.44
S&P 500 Index	100.00	110.88	116.33	134.70	142.10	89.53

Table of Contents**Equity Compensation Plan Information**

The following table summarizes certain information about our equity compensation plans as of December 31, 2008:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants, and rights	Weighted-average exercise price of outstanding options, warrants, and rights	Number of securities remaining available for future issuance
Equity compensation plans approved by security holders	278,101	\$ 33.55	9,066,548
Equity compensation plan not approved by security holders	69,790	21.60	1,252
Total	347,891	\$ 31.15	9,067,800

Of the total number of securities remaining available for future issuance, 8,833,352 shares can be used for various types of stock-based awards, as specified in the individual plans, with the remaining 234,448 shares to be used for our employee stock purchase plan. See Note 12 to our Consolidated Financial Statements for additional discussion of our equity compensation plans.

Issuer Repurchases of Equity Securities

The following table presents information with respect to purchases of our common stock made during the three months ended December 31, 2008 by CSG Systems International, Inc. or any affiliated purchaser of CSG Systems International, Inc., as defined in Rule 10b-18(a)(3) under the Exchange Act.

Period	Total Number of Shares Purchased (2)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs (1)
October 1 - October 31	457	\$ 15.12		1,204,096
November 1 - November 30	102,406	15.23	100,500	6,103,596
December 1 - December 31	150,763	16.40	149,500	5,954,096
Total	253,626	\$ 15.93	250,000	

- (1) Effective November 13, 2008, our Board of Directors approved a 5 million share increase in the number of shares we are authorized to repurchase under the Stock Repurchase Program, bringing the total number of authorized shares to 35 million. The Stock Repurchase Program does not have an expiration date.
- (2) The total number of shares purchased that are not part of the Stock Repurchase Program represents shares purchased and cancelled in connection with stock incentive plans.

Table of Contents**Item 6. Selected Financial Data**

The following selected financial data have been derived from our audited financial statements. The selected financial data presented below should be read in conjunction with, and is qualified by reference to, our MD&A and our Consolidated Financial Statements. The information below is not necessarily indicative of the results of future operations.

	Year Ended December 31,				
	2008	2007	2006	2005	2004
	(in thousands, except per share amounts)				
Statements of Income Data (1):					
Revenues:					
Processing and related services	\$ 439,975	\$ 382,070	\$ 351,764	\$ 346,463	\$ 326,556

Table of Contents

- (1) As previously discussed, during 2008 and 2007 we acquired several businesses as part of our growth and diversification strategy which resulted in top line revenue growth for 2008 and 2007 of 12.6% and 9.4%, respectively, of which approximately three-fourths of the 2008 growth rate and one-half of the 2007 growth rate can be attributed to these acquired entities, with the remaining growth in each year attributed to organic growth factors. See Note 3 to our Consolidated Financial Statements for additional discussion regarding these acquisitions.
- (2) In 2005, we sold our GSS and plaNet businesses and recorded a net pretax gain (loss) on the disposal of these businesses of \$(6.0) million and \$10.9 million, respectively, in 2006 and 2005. As a result, the results of operations for the GSS and plaNet businesses have been reflected as discontinued operations for all periods presented in our Consolidated Statements of Income. Additionally, we received approximately \$233 million in net cash proceeds from the sale of these businesses, which is the primary reason for the significant increase in cash, cash equivalents, and short-term investments between 2004 and 2005, and related increase in interest and investment income in 2006 and 2007. See Note 8 to our Consolidated Financial Statements for additional discussion.
- (3) In August 1999, our Board of Directors approved our Stock Repurchase Program which authorized us to purchase shares of our common stock from time-to-time as business conditions warrant. During 2008, 2007, 2006, 2005, and 2004, we repurchased 0.3 million, 13.2 million, 2.5 million, 3.8 million, and 3.0 million shares, respectively for \$4.0 million, \$307.6 million, \$63.3 million, \$73.0 million, and \$52.9 million. The significant stock repurchases made during 2007 was the primary reason for the decrease in our cash balance between 2006 and 2007. As of December 31, 2008, 6.0 million shares of the 35.0 million shares authorized under the Stock Repurchase Program remain available for repurchase. See Note 11 to our Consolidated Financial Statements for additional discussion of the Stock Repurchase Program.
- (4) Over the years, we have made several changes to our business operations and implemented several cost reduction initiatives that resulted in restructuring charges of \$0.1 million, \$0.6 million, \$2.4 million, \$14.5 million, and \$1.3 million, respectively, for 2008, 2007, 2006, 2005, and 2004. The large restructuring expense in 2005 was almost entirely related to the changes we made in our business as a result of the sale of the GSS and plaNet businesses.
- (5) In 2005, certain equity awards held by key members of our management team included a change in control provision that was triggered upon the closing of the sale of the GSS Business. The change in control provision resulted in accelerated vesting as of December 9, 2005 for the equity awards impacted, and thus, stock-based compensation expense of \$4.7 million related to the accelerated vesting of these equity awards was recorded as stock-based compensation expense in the fourth quarter of 2005, of which \$0.9 million was included in discontinued operations, and \$3.8 million was included in continuing operations as part of restructuring charges. Total stock-based compensation expense recognized during 2008, 2007, 2006, 2005, and 2004, was \$11.6 million, \$11.1 million, \$12.2 million, \$20.4 million, and \$14.9 million, respectively. Of these amounts, \$11.6 million, \$11.1 million, \$12.2 million, \$17.0 million, and \$10.6 million, are reflected in continuing operations for 2008, 2007, 2006, 2005, and 2004, respectively, with the remaining amounts reflected in discontinued operations for the respective periods. See Notes 2 and 12 to our Consolidated Financial Statements for additional discussion of these matters.
- (6) In June 2004, we completed an offering of \$230 million of Convertible Debt Securities and used the proceeds, along with available cash, cash equivalents and short-term investments to: (i) repay the outstanding balance of the term credit facility; (ii) repurchase 2.1 million of shares of our common stock; and (iii) pay debt issuance costs of \$7.2 million. As a result, we wrote off unamortized deferred financing costs attributable to the term credit facility of \$6.6 million. During 2008, we repurchased \$29.7 million (par value) of our Convertible Debt Securities for \$22.4 million, and recognized a gain on the repurchase of \$7.0 million, after the write-off of \$0.3 million of deferred financing costs. See Note 6 to our Consolidated Financial Statements for additional discussion of our long-term debt.
- (7) In 2009, we will be adopting FASB Staff Position (FSP) No. APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement) and FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities . Both of these FSP s are required to be applied retrospectively to all comparable periods presented beginning with our Form 10-Q for the quarter ended March 31, 2009. See Note 2 to our Consolidated Financial Statements for additional discussion of these matters.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation Forward-Looking Statements

This report contains a number of forward-looking statements relative to our future plans and our expectations concerning the North American customer care and billing industry, as well as the converging communications industry it serves, and similar matters. These forward-looking statements are based on assumptions about a number of important factors, and involve risks and uncertainties that could cause actual results to differ materially from estimates contained in the forward-looking statements. Some of the risks that are foreseen by management are outlined above within Item 1A., Risk Factors. Item 1A. constitutes an integral part of this report, and readers are strongly encouraged to review this section closely in conjunction with MD&A.

Management Overview

Our Company. We are a leading provider of software- and services-based customer interaction management solutions that help our clients build commerce by better engaging and transacting with their customers. Our solutions enable our clients to build new offerings, to engage customers on those offerings, and to deliver them through effective and profitable customer transactions. Our clients maximize the value and minimize the costs associated with their customer interactions by using our solutions to conduct key business processes such as targeting prospective customers, rolling out and offering new products quickly, efficiently managing order processing, streamlining operations, managing field workforces, improving customer satisfaction, integrating actionable customer intelligence, developing marketing strategies, printing and mailing monthly statements, and electronically transacting with customers. Our solutions provide clients with favorable results through improved operating efficiencies, decreased churn rates, accelerated marketing effectiveness, lower overall costs, and increased profitability.

Our proven technology is based on more than 25 years of expertise in serving clients in several complex and highly competitive industries. These clients typically handle a high volume of recurring transactions and complex customer relationships through a growing set of touch points, ranging from call centers, on-line Internet access, emails, text messages, interactive messaging, service technicians, and monthly statements. Our solutions and services are at work behind the scenes of systems that support customer interactions of some of the largest and most innovative service providers in North America. Our heritage is in providing outsourced customer interaction management solutions to the cable and direct broadcast satellite (DBS) companies, which represent approximately 88% and 95%, respectively, of our 2008 and 2007 revenues. Building upon those years of experience, we have broadened and enhanced our solutions to now serve an increasing number of other industries such as financial services, utilities, telecommunications, healthcare, and home security.

Our solutions are delivered and supported by an experienced and dedicated workforce of more than 2,000 employees. We are a S&P SmallCap 600 company.

The North American communications industry has experienced significant consolidation over the last few years, resulting in a large percentage of the market being served by a fewer number of service providers with greater size and scale. Consistent with this market concentration, a large percentage of our revenues are generated from a limited number of clients, with approximately two-thirds of our 2008 revenues being generated from our four largest clients, which are Comcast, DISH, Time Warner, and Charter.

General Market Conditions. In recent months, the U.S. has experienced a significant economic downturn and difficulties within the financial and credit markets, and these adverse economic conditions are predicted to continue into the foreseeable future. The possible adverse impacts to companies during these times include a reduction in revenues, decreasing profits and cash flows, distressed or default debt conditions, and/or difficulties in obtaining necessary operating capital.

Because of the severity and the far-reaching impacts of the situation, all companies could be adversely affected by the current economic conditions to a certain degree, including CSG, our clients, and/or key vendors

Table of Contents

in our supply chain. Some possible near term negative consequences of the current economic environment to our business include tightening of client spending and/or extended sales cycles which could materially lower our revenues related to our clients' discretionary spending for such things as special project work, marketing activities, new product sales, and software and professional services projects. We believe that our recurring revenue and predictable cash flow business model, our sufficient sources of liquidity, and our stable capital structure lessen the risk of a significant negative impact to our business as a result of the current economic conditions. Additionally, we believe our key clients have business models that have historically performed well, as compared to other industries, in down economic conditions. However, there can be no assurances regarding the performance of our business, and the potential impact to our clients and key vendors, resulting from the current economic conditions.

Results of Operations. A summary of our results of operations and other key performance metrics for 2008 are as follows:

Our consolidated revenues for 2008 were \$472.1 million, an increase of 12.6% when compared to \$419.3 million for 2007. The increase in revenues is reflective of the success we have experienced in our plan to grow top-line revenues and achieve market diversification through both acquisitions and organic growth, as discussed in greater detail below.

Our operating expenses for 2008 were \$382.8 million, an increase of 14.1% when compared to \$335.4 million for 2007, with approximately 80% of this increase related to the year-over-year impact of the ComTec, Prairie, and DataProse businesses (collectively, the Acquired Businesses).

Operating income for 2008 was \$89.3 million (18.9% operating margin percentage), compared to \$83.8 million (20.0% operating margin percentage) for 2007. The decrease in operating income margin between years is due to the dilutive impact of the Acquired Businesses.

Income from continuing operations (net of tax) for 2008 was \$61.4 million, or \$1.84 per diluted share, compared to \$60.2 million, or \$1.50 per diluted share, for 2007. The 2008 amount includes a \$7.0 million gain (pretax impact), or \$0.14 per diluted share, included in other income related to our repurchase of some of our convertible debt securities. Absent the impact of this \$0.14 gain, our 2008 EPS from continuing operations increased 13% when compared to 2007. This 13% growth is primarily due to a decrease in the weighted-average shares outstanding for the year ended December 31, 2008, as a result of our significant share repurchases made under our stock repurchase program during 2007.

Operating income for 2008 includes non-cash charges related to depreciation, amortization, and stock-based compensation expense totaling \$43.5 million (pretax impact), or \$0.86 per diluted share impact, as compared to non-cash charges for 2007 of \$41.8 million (pretax impact), or \$0.68 per diluted share impact.

We continue to generate strong cash flows as a result of our profitable operations and through our effective management of our working capital items. During 2008, we generated \$114.6 million of cash flows from operating activities, relatively consistent to the \$115.4 million of cash flows from operating activities we generated during 2007. Our cash and short-term investments totaled \$141.2 million at December 31, 2008, compared to \$132.8 million as of December 31, 2007.

Other key events related to our operations for 2008 were as follows:

As discussed earlier, as part of our strategy to extend our customer interaction management capabilities and enter new vertical markets, we closed on the DataProse and Quaero acquisitions during 2008.

Edgar Filing: CSG SYSTEMS INTERNATIONAL INC - Form 10-K

The DataProse acquisition closed on April 30, 2008, contributed approximately \$15 million in revenues for 2008, and was slightly dilutive to our 2008 results of operations.

The Quaero acquisition closed on December 31, 2008, and as a result, did not impact our 2008 results of operations.

Table of Contents

See Note 3 to our Consolidated Financial Statements for additional discussion of these acquisitions.

During 2008, we had the following key customer renewals:

In April 2008, we extended our agreement with Mediacom Communications through July 2014.

In July 2008, we entered into a restated and amended Master Subscriber Management System Agreement with Comcast that extends our contractual relationship with Comcast through December 31, 2012. See our Significant Client Relationships Section below for further discussion.

In December 2008, we renewed our print services contract with Cox Communications, our largest print-only client, for an additional three years through December 31, 2011.

In December 2008, we entered into a one-year extension to our current contract with DISH, which extended the term through December 31, 2009. See our Significant Client Relationships Section below for further discussion.

During 2008, we invested \$67.3 million, or approximately 14% of our revenues, in R&D activities.

During 2008, we repurchased \$29.7 million (par value) of our Convertible Debt Securities for \$22.4 million, and recognized a gain on the repurchase of \$7.0 million (pretax impact), after the write-off of a proportional amount of deferred financing costs.

In November 2008, our Board of Directors approved a 5.0 million share increase in the number of shares authorized for repurchase under our Stock Repurchase Program, bringing the remaining number of shares we are authorized to repurchase at December 31, 2008 to approximately 6 million. During 2008, we repurchased a total of 250,000 shares, for a total of \$4.0 million (a weighted-average price of \$15.93 per share) under the program.

Significant Client Relationships

Comcast. Comcast continues to be our largest client. For 2008 and 2007, revenues from Comcast represented approximately 27% of our total revenues.

On July 10, 2008, we entered into a restated and amended Master Subscriber Management System Agreement with Comcast. Our previous contract with Comcast was scheduled to expire December 31, 2008. The new Comcast processing agreement was effective beginning July 1, 2008 and runs through December 31, 2012. The expected scope of the products and services to be utilized under the new Comcast processing agreement is consistent with our previous Comcast contract and provides Comcast the option to expand its utilization of certain of our products and services not fully deployed in all of the Comcast markets we currently serve, or across Comcast's entire enterprise.

The fees generated under the new Comcast processing agreement are based on monthly charges for processing and related services per Comcast customer account, and various other ancillary services based on actual usage. The per unit fees are subject to annual inflationary price escalators. The new Comcast processing agreement includes various volume-based pricing incentives. When compared to the previous contract, there is a price reduction at several of the higher volume tiers, which in effect, reduces the fees we receive for such services at Comcast's current customer account levels.

The new Comcast processing agreement contains certain financial commitments associated with the number of Comcast customer accounts that are to be processed on our systems, with such commitments decreasing over the life of the agreement, beginning in 2009. Additionally, it provides Comcast with the flexibility to either add or remove customer accounts from our systems with sufficient written notification. However,

Edgar Filing: CSG SYSTEMS INTERNATIONAL INC - Form 10-K

if Comcast chooses to process fewer customer accounts on our systems than the committed amounts, the monthly fees to be paid by Comcast will be based on the higher number of committed customer accounts for the applicable billing period.

Table of Contents

Consistent with the structure of the previous Comcast contract, the new Comcast processing agreement contains certain rights and obligations of both parties relating to the following: (i) the termination of the agreement under certain conditions; (ii) various service level commitments; and (iii) remedies and limitation on liabilities associated with specified breaches of contractual obligations.

As of July 1, 2008, the beginning of the new contract term, we had a \$6 million Comcast client contract intangible asset that was previously being amortized as a contra revenue charge through December 31, 2008. As a result of the extension in the life of our contractual arrangement with Comcast, the amortization of the remaining \$6 million has been extended through the end of the new contractual period of December 31, 2012. Beginning July 1, 2008, the amortization of the Comcast client contract intangible asset is \$0.1 million per month, compared to the previous \$1.0 million per month, which resulted in an approximate \$5 million reduction in contra revenue amortization in the second half of 2008, when compared to the first half of 2008. The net impact of this change in contra revenue amortization and the decrease in recurring monthly processing fees that we received from Comcast in 2008 was not significant.

The Comcast processing agreement and related material amendments, with confidential information redacted, are included in the exhibits to our periodic filings with the SEC.

DISH. DISH is our second largest client. For 2008 and 2007, DISH represented approximately 18% and 20%, respectively, of our total revenues.

On December 31, 2008, we entered into the Seventeenth Amendment (the Amendment) to the Master Subscriber Management System Agreement with DISH. The impact of the Amendment is summarized as follows:

The term of the DISH processing agreement was extended for a one-year period beginning on January 1, 2009 and expiring on December 31, 2009. The fees to be paid by DISH during this period are at the rates specified in the DISH processing agreement, which had been scheduled to expire December 31, 2008.

Prior to entering into the Amendment, upon satisfying certain conditions contained in the DISH processing agreement, DISH had an option to extend the term for either one or two years beyond December 31, 2008. As a result of the Amendment, DISH no longer has the unilateral option to extend the agreement beyond December 31, 2009.

All other terms are unchanged as a result of the Amendment.

At this time, we expect our 2009 revenues from DISH to be relatively consistent with those generated from DISH in 2008. A copy of the Amendment, along with the DISH processing agreement and other related material amendments, with confidential information redacted, are included in the exhibits to our periodic filings with the SEC.

Time Warner. Time Warner is our third largest client. For 2008 and 2007, revenues from Time Warner represented approximately 14% and 13%, respectively, of our total revenues. Our processing agreement with Time Warner runs through March 31, 2013. The Time Warner processing agreement contains provisions establishing annual minimum customer account levels that have to be processed on our systems, which we expect Time Warner to exceed based on the number of Time Warner customers currently on our systems. The Time Warner processing agreement and related material amendments are filed as Exhibit 10.24 to this Form 10-K, with confidential information redacted.

Charter. Charter is our fourth largest client. For 2008 and 2007, revenues from Charter represented approximately 8% and 9%, respectively, of our total revenues.

Table of Contents

On February 17, 2009, we entered into a new processing agreement with Charter to expand the use of our solutions supporting Charter's national video, high-speed data, and telephony footprint through December 31, 2014. Our previous contract with Charter went through December 31, 2012. We currently provide customer interaction management solutions to approximately 60% of Charter's residential customers. Under the new processing agreement, Charter plans to convert its remaining residential customers to our solutions, with conversions expected to begin in late 2009. The new processing agreement contains minimum financial commitments over the life of the agreement. At this time, we do not expect the new agreement to have a significant impact on our 2009 results of operations.

On February 12, 2009, Charter publicly announced a restructuring plan that included the following key points:

Charter had reached an agreement-in-principle with an ad hoc committee of certain of its debt holders on the terms of a financial restructuring to reduce Charter's debt by approximately \$8 billion on certain outstanding senior notes.

Under the terms of the agreement, Charter intends to implement its financial restructuring through a Chapter 11 bankruptcy filing to be initiated on or before April 1, 2009.

The purpose of Charter's financial restructuring is to strengthen its balance sheet in order to fully support the company's operations and service its debt. As such, the agreement-in-principle contemplates paying trade creditors in full.

The agreement-in-principle is subject to numerous closing conditions and there is no assurance that the treatment of creditors outlined in Charter's public statements will not change significantly.

As discussed in Section 1A, Risk Factors above, companies involved in bankruptcy proceedings pose greater financial risks to us, consisting principally of the following: (i) a financial loss related to possible claims of preferential payments for certain amounts paid to us prior to the bankruptcy filing date, as well as increased collectibility risk for accounts receivable, particularly those accounts receivable that relate to periods prior to the bankruptcy filing date; and/or (ii) the possibility of a contract being unilaterally rejected or as part of the bankruptcy proceedings, or a client in bankruptcy may attempt to renegotiate more favorable terms as a result of their deteriorated financial condition, thus, negatively impacting our rights to future revenues subsequent to the bankruptcy filing.

As of December 31, 2008, we had approximately \$12 million of accounts receivable due from Charter, none of which had a specific allowance for doubtful accounts receivable amount established against it. The entire amount of this accounts receivable balance was collected in the normal course as of the date of this filing and we believe that Charter's history of timely paying our invoices significantly reduces our preferential payment risk related to our 2008 Consolidated Financial Statements if Charter was indeed to declare bankruptcy as noted in their February 12, 2009 public announcement.

Although we provide customer care and billing services that are generally critical to the ongoing operations of entities such as Charter, for which there generally is no near-term alternative for a substitute vendor because of the complexity of the systems and networks involved in the delivery of our services and the pervasiveness of the use of such systems and networks across Charter's business enterprise, there can be no assurances regarding the expected financial impact to our business if Charter does file for bankruptcy on or before April 1, 2009, as indicated in their public statements.

Significant New Expense Items for 2009

Data Center Transition. We currently utilize FDC to provide the data center computing environment for the delivery of most of our customer care and billing services and related solutions under a contract that runs through June 30, 2010. In December 2008, we entered into an agreement with Infocrossing to transition these outsourced

Table of Contents

data center services from FDC to Infocrossing prior to the expiration of the FDC contract term. Infocrossing has provided end-to-end IT management solutions for over 25 years, and operates data centers throughout the U.S. for multiple computing environments and platforms. The term of the Infocrossing agreement is five years beginning on the date of full conversion.

As a result, we expect to incur transition-related costs and capital expenditures during the time period leading up to the final transition of services from FDC to Infocrossing. These transition costs are one-time in nature and will include such things as labor and consulting costs for the transition team, and capital expenditures and related infrastructure costs to setup and replicate the computing environment at the new Infocrossing data center location to protect against disruption during the transition period. Operating costs related to the transition efforts (Data Center Transition Expenses) will be expensed as incurred.

We estimate that the Data Center Transition Expenses for 2009 will be approximately \$17 million to \$18 million, or approximately \$0.32 to \$0.34 per diluted share negative impact, and are expected to have a negative impact of approximately \$9 million to \$10 million on our 2009 cash flows from operations. These amounts are based on the best available estimates at this time and may fluctuate up or down during the transition.

The Infocrossing agreement, with confidential information redacted, is filed as Exhibit 10.41 to this Form 10-K.

Change in Accounting for Convertible Debt Securities. Effective January 1, 2009, we will change the accounting for our Convertible Debt Securities as a result of a change in an accounting pronouncement (See Note 2 to our Consolidated Financial Statements). Historically, we have recorded the entire par value of our Convertible Debt Securities as long-term debt. The accounting rule change requires us to refer back to the original issue date of June 2004 and record an original issue discount (OID) equal to the amount attributable to the convertible equity feature of the securities. The corresponding value assigned to the OID will be recorded as equity. The OID is then required to be amortized to book interest expense subsequent to the issue date through June 2011, the first put date option of our Convertible Debt Securities.

The overall effective interest rate for 2009 for our Convertible Debt Securities as a result of this new accounting pronouncement will be 8% annually, which consists of the cash coupon rate of 2.5%, plus the impact of the OID amortization using the effective interest rate method of amortization. This will result in additional interest expense of approximately \$9.4 million for 2009, or approximately \$0.18 per diluted share. This additional interest expense is a non-cash expense, and therefore, will not impact our historical or expected future cash flows from operations.

Table of Contents

Relevant balance sheet and income statement information related to the adoption of this new accounting pronouncement, as of December 31, 2008, are provided below (in thousands, except per share amounts). These estimated amounts are still subject to change pending final accounting conclusions related to the adoption of this accounting pronouncement. In addition, the future estimated amounts can change if we repurchase any of our Convertible Debt Securities after December 31, 2008.

Estimated Balance Sheet Information:	December 31, 2009	December 31, 2008	At Issue Date (June 2004)
Convertible Debt Securities outstanding (par value)	\$ 200,300	\$ 200,300	\$ 230,000
OID	(15,100)	(24,500)	(67,600)
Convertible Debt Securities, net of unamortized OID	\$ 185,200	\$ 175,800	\$ 162,400

Estimated Income Statement Information:	Year Ended December 31, 2009	Year Ended December 31, 2008
Coupon interest (2.5%)	\$ 5,000	\$ 5,600
Amortization of OID	9,400	9,800
Total book interest expense on Convertible Debt Securities (effective rate of 8%)	\$ 14,400	\$ 15,400

Per diluted share impact of amortization of OID \$ (0.18) \$ (0.19)
The new accounting rule requires retroactive application of the new treatment. As a result, beginning in the first quarter of 2009, we will provide restated financial statements for all comparable periods presented prior to January 1, 2009.

Accounting for Business Combinations

Effective January 1, 2009, we will adopt SFAS No. 141 (revised 2007), Business Combinations (SFAS 141(R)), which significantly changes the accounting for business combinations. The most notable impacts of this change in accounting relate to the following: (i) acquisition-related costs; and (ii) contingent consideration. Acquisition-related costs will no longer be considered part of the cost of the acquisition, but instead, must be expensed in the period the costs are incurred. Contingent consideration (such as an earn-out) will be recognized at its acquisition-date fair value as part of the cost of the acquisition, and will be remeasured to fair value at each reporting date until the contingency is resolved, with any changes in fair value being reflected in earnings. This accounting change may be relevant to us as we have made five acquisitions in the last three years, and our growth strategy includes the possibility of further acquisitions. The impact of the adoption of SFAS 141(R) on our consolidated financial position and results of operations will largely be dependent on the size and nature of the business combinations, if any, completed after the adoption of this statement.

Stock-Based Compensation Expense

Stock-based compensation expense is included in the following captions in the Consolidated Statements of Income (in thousands):

	2008	2007	2006
Cost of processing and related services	\$ 3,451	\$ 3,277	\$ 4,371
Cost of software, maintenance and services	611	745	713
Research and development	1,664	1,246	1,530
Selling, general and administrative	5,879	5,834	5,600
Total stock-based compensation expense	\$ 11,605	\$ 11,102	\$ 12,214

See Notes 2 and 12 to our Consolidated Financial Statements for additional discussion of our stock-based compensation expense.

Table of Contents

Critical Accounting Policies

The preparation of our financial statements in conformity with accounting principles generally accepted in the U.S. requires us to select appropriate accounting policies, and to make judgments and estimates affecting the application of those accounting policies. In applying our accounting policies, different business conditions or the use of different assumptions may result in materially different amounts reported in our Consolidated Financial Statements.

We have identified the most critical accounting policies that affect our financial condition and the results of our operations. These critical accounting policies were determined by considering our accounting policies that involve the most complex or subjective decisions or assessments. The most critical accounting policies identified relate to: (i) revenue recognition; (ii) allowance for doubtful accounts receivable; (iii) impairment assessments of long-lived assets; (iv) income taxes; and (v) business combinations and asset purchases. These critical accounting policies, as well as our other significant accounting policies, are disclosed in the notes to our Consolidated Financial Statements.

Revenue Recognition. The revenue recognition policies that involve the most complex or subjective decisions or assessments that may have a material impact on our business operations relate to: (i) the application of the guidelines of Emerging Issues Task Force (EITF) Issue No. 00-21, Accounting for Revenue Arrangements with Multiple Deliverables (EITF 00-21) when determining a revenue arrangement s separate units of accounting; and (ii) the accounting for software arrangements.

For those revenue arrangements within the scope of EITF No. 00-21, we are required to evaluate all deliverables in the arrangement to determine whether they represent separate units of accounting. If the deliverables qualify as separate units of accounting, the arrangement consideration is allocated among the separate units of accounting based upon their relative fair values, and applicable revenue recognition criteria are considered for the separate units of accounting. If the deliverables do not qualify as separate units of accounting, the consideration allocable to delivered items is combined with the consideration allocable to the undelivered items, and the appropriate recognition of revenue is then determined for those combined deliverables as a single unit of accounting. For the processing agreements that we have historically evaluated under EITF No. 00-21, we have generally concluded that the deliverables do not qualify as separate units of accounting, and thus have treated the deliverables as a single unit of accounting, with the revenue recognized ratably over the term of the processing agreement. The determination of separate units of accounting, and the determination of objective and reliable evidence of fair value of the undelivered items, if applicable, both require judgments to be made by us.

The accounting for software arrangements, especially when software is sold in a multiple-element arrangement, is complex and requires judgments in the following areas: (i) the identification of the separate elements of the software arrangement; (ii) the determination of whether any undelivered elements are essential to the functionality of the delivered elements; (iii) the assessment of whether our hosted service transactions meet the requirements of EITF Issue No. 00-03, Application of AICPA Statement of Position 97-2 to Arrangements That Include the Right to Use Software Stored on Another Entity s Hardware , to be treated as a separate element to the software arrangement; (iv) the determination of vendor-specific objective evidence of fair value for the various undelivered elements of the software arrangement; and (v) the period of time maintenance services are expected to be performed. The evaluation of these factors, and the ultimate revenue recognition decisions, require significant judgments to be made by us. The judgments made in this area could have a significant effect on revenues recognized in any period by changing the amount and/or the timing of the revenue recognized. In addition, because software licenses typically have little or no direct, incremental costs related to the recognition of the revenue, these judgments could also have a significant effect on our results of operations.

Allowance for Doubtful Accounts Receivable. We maintain an allowance for doubtful accounts receivable based on client-specific allowances, as well as a general allowance. Specific allowances are maintained for clients which are determined to have a high degree of collectibility risk based on such factors, among others, as: (i) the aging of the accounts receivable balance; (ii) the client s past payment experience; (iii) the economic

Table of Contents

condition of the industry in which the client conducts the majority of its business; and (iv) a deterioration in a client's financial condition, evidenced by weak financial condition and/or continued poor operating results, reduced credit ratings, and/or a bankruptcy filing. In addition to the specific allowance, we maintain a general allowance for all our accounts receivable which are not covered by a specific allowance. The general allowance is established based on such factors, among others, as: (i) the total balance of the outstanding accounts receivable, including considerations of the aging categories of those accounts receivable; (ii) past history of uncollectible accounts receivable write-offs; and (iii) the overall creditworthiness of the client base. Our credit risk is heightened due to our concentration of clients within the North American cable television and DBS industries. A considerable amount of judgment is required in assessing the realizability of accounts receivable. Should any of the factors considered in determining the adequacy of the overall allowance change significantly, an adjustment to the allowance for doubtful accounts receivable may be necessary. Because of the overall significance of our gross billed accounts receivable balance (\$123.3 million as of December 31, 2008), such an adjustment could be material.

Impairment Assessments of Goodwill and Other Long-Lived Assets.

Goodwill. Goodwill is required to be tested for impairment on an annual basis. We have elected to do our annual test for possible impairment as of July 31 of each year. In addition to this annual requirement, goodwill is required to be evaluated for possible impairment on a periodic basis (e.g., quarterly) if events occur or circumstances change that could indicate a possible impairment may have occurred. Under the current accounting standard, goodwill is considered impaired if the carrying value of the reporting unit which includes the goodwill is greater than the estimated fair value of the reporting unit. If it is determined that an impairment has occurred, an impairment loss (equal to the excess of the carrying value of the goodwill over its estimated fair value) is recorded.

We utilize discounted cash flow models and relevant market information for comparable companies to determine fair value used in our goodwill impairment valuation. Our estimates of fair value are based upon various key assumptions such as: (i) projected future sales, which include assumptions around market penetration and growth, and the success of any new product and service offerings; (ii) the profitability of future operations; (iii) the appropriate discount rate; and (iv) the identification of comparable companies. These assumptions, by their nature, are subject to significant judgments. Changes to one or more of these assumptions due to such factors as: (i) a significant adverse change in the legal environment or in the business climate; (ii) unanticipated or increased competition; and (iii) loss of key personnel, could materially affect the determination of fair value which could result in a future impairment of goodwill. We have considered the impacts of the recent significant economic downturn and the difficulties within the financial and credit markets when evaluating our goodwill balances as of December 31, 2008.

Other Long-lived Assets. Long-lived assets other than goodwill, which for us relates primarily to property and equipment, software, and client contracts, are required to be evaluated for possible impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. A long-lived asset is impaired if estimated future undiscounted cash flows associated with that asset, without consideration of interest, are insufficient to recover the carrying amount of the long-lived asset. Once deemed impaired, even if by \$1, the long-lived asset is written down to its fair value which could be considerably less than the carrying amount or future undiscounted cash flows. The determination of estimated future cash flows and, if required, the determination of the fair value of a long-lived asset, are by their nature, highly subjective judgments. Changes to one of more of the assumptions utilized in such an analysis could materially affect our impairment conclusions for long-lived assets.

Income Taxes. We are required to estimate our income tax liability in each jurisdiction in which we operate, which is primarily the U.S. (including both Federal and state income taxes). Various judgments are required in evaluating our income tax positions and determining our provisions for income taxes. During the ordinary course of our business, there are certain transactions and calculations for which the ultimate income tax determination

Table of Contents

may be uncertain. In addition, we may be subject to examination of our income tax returns by various tax authorities which could result in adverse outcomes. For these reasons, we establish a liability associated with unrecognized tax benefits based on estimates of whether additional taxes and interest may be due. We adjust this liability based upon changing facts and circumstances, such as the closing of a tax audit, the closing of a tax year upon the expiration of a statute of limitations, or the refinement of an estimate. Should any of the factors considered in determining the adequacy of this liability change significantly, an adjustment to the liability may be necessary. Because of the potential significance of these issues, such an adjustment could be material.

Business Combinations and Asset Purchases. Accounting for business combinations and asset purchases, including the allocation of the purchase price to acquired assets and assumed liabilities based on their estimated fair values, requires us in certain circumstances to estimate fair values for items that have no ready market or for which no independent market exists. Under such circumstances, we use our best judgment to determine a fair value based upon inference to other transactions and other data. As a result, the amounts determined by us for such items as accounts receivable, identifiable intangible assets, goodwill, and deferred revenue are not individually the result of an arm's length transaction, but are the result of management estimates of the fair value and the allocation of the purchase price. Accordingly, revenue recognized by us related to fulfillment of assumed contractual obligations is based on fair value estimates made by us.

For larger and/or more complex acquisitions, the assignment of value to individual intangible assets generally requires the use of a specialist, such as an appraiser or valuation expert. The assumptions we use in the appraisal or valuation process are forward-looking, and thus are subject to significant judgments and interpretations by us. Because individual intangible assets: (i) may be expensed immediately upon acquisition (e.g., purchased in-process R&D assets); (ii) amortized over their estimated useful life (e.g., acquired software); or (iii) not amortized at all (e.g., goodwill), the assigned values could have a material impact on our results of operations in current and future periods.

Detailed Discussion of Results of Operations

Total Revenues. Total revenues for: (i) 2008 increased 12.6% to \$472.1 million, from \$419.3 million for 2007; and (ii) 2007 increased 9.4% to \$419.3 million, from \$383.1 million for 2006. The increases in total revenues are reflective of the success we have experienced in our plan to grow top-line revenues and achieve market diversification through both acquisitions and organic growth, as discussed in further detail below. Approximately three-fourths of the increase in revenues between 2008 and 2007, and one-half of the increase in revenues between 2007 and 2006, related to the year-over-year impact of the additional revenues generated from the Acquired Businesses, with the remaining portion of the increases attributed to organic growth factors. The components of total revenues are discussed in more detail below.

Processing Revenue. Processing revenues for: (i) 2008 increased 15.2% to \$440.0 million, from \$382.1 million for 2007; and (ii) 2007 increased 8.6% to \$382.1 million, from \$351.8 million for 2006.

Approximately two-thirds of the increase in processing revenues between 2008 and 2007 related to the revenues generated from the Acquired Businesses (as all of their revenues fall within this revenue classification). The remaining processing revenue growth can be attributed to organic growth resulting from increased utilization of new and existing products and services by our clients, to include such things as: (i) higher usage of marketing services; and (ii) various ancillary customer care solutions, such as order workflow tools, professional services, system interfaces and reporting tools.

Approximately one-half of the increase in processing revenues between 2007 and 2006 related to the revenues generated from the 2007 acquisitions of the ComTec and Prairie businesses, with the remaining portion attributed to increased utilization of new and existing products and services by our clients, to include such things as: (i) higher usage of marketing services; and (ii) various ancillary customer care solutions.

Table of Contents

Additional information related to processing revenues is as follows:

Amortization of the client contracts intangible asset (reflected as a reduction of processing revenues) for 2008, 2007, and 2006, was \$9.2 million, \$14.4 million, and \$13.4 million, respectively. The decrease in amortization in 2008 was due to the change in the life of the Comcast client contract intangible asset as a result of the extension of the contractual arrangement with Comcast effective July 1, 2008, as discussed above.

Total customer accounts processed on our systems as of December 31, 2008, 2007, and 2006, were 45.3 million, 45.1 million, and 45.4 million, respectively.

Software, Maintenance and Services Revenues. Software, maintenance and services revenues for: (i) 2008 decreased 13.7% to \$32.1 million, from \$37.2 million for 2007; and (ii) 2007 increased 18.7% to \$37.2 million, from \$31.3 million for 2006.

The decrease in software, maintenance and services revenue between 2008 and 2007 was due to lower professional services revenues and lower software-related revenues, as a result of the timing and type of work our professional services team has been engaged in (e.g., longer term implementations which required the fees be deferred upfront and recognized over the life of the service agreement).

The increase in software, maintenance and services revenues between 2007 and 2006 was a result of our increased emphasis on expanding our professional services organization, to include the acquisition of Telution.

Cost of Processing and Related Services (Exclusive of Depreciation). The cost of processing and related services revenues consists principally of the following: (i) data processing and network communications costs; (ii) statement production costs (e.g., labor, paper, envelopes, equipment, equipment maintenance, etc.); (iii) client support organizations (e.g., our client support call center, account management, etc.); (iv) various product support organizations (e.g., product management and delivery, product maintenance, etc.); (v) facilities and infrastructure costs related to the statement production and support organizations; and (vi) amortization of acquired client contracts. The costs related to new product development (including significant enhancements to existing products) are included in R&D expenses.

The cost of processing and related services for: (i) 2008 increased 17.2% to \$226.3 million, from \$193.1 million; and (ii) 2007 increased 11.3% to \$193.1 million, from \$173.5 million for 2006.

Over 85% of the year-over-year increase in cost of processing and related services between years related to the impact of the Acquired Businesses (as all of their cost of revenues fall within this expense classification).

Approximately 60% of the year-over-year increase in cost of processing and related services between 2007 and 2006 related to the impact of the ComTec and Prairie businesses. The remaining year-over-year increase related to: (i) an increase in data processing costs due to greater processing requirements for ACP functionality; and (ii) an increase in variable costs related to the delivery of ancillary products and services (e.g., print costs, etc.), which directly correlate with the increase in revenues related to ancillary products and services.

Total processing and related services cost of revenues as a percentage of our processing and related services revenues for 2008, 2007, and 2006 were 51.4%, 50.5%, and 49.3%, respectively. The sequential increases in processing costs as a percentage of processing and related services revenues between periods was due to the impact of the Acquired Businesses.

Cost of Software, Maintenance and Services (Exclusive of Depreciation). The cost of software, maintenance and services revenues consists principally of the following: (i) client support organizations (e.g., our client support call center, account management, etc.); (ii) various product support organizations (e.g., product

Table of Contents

management and delivery, product maintenance, etc.); (iii) professional services organization; (iv) facilities and infrastructure costs related to these organizations; (v) third-party software costs and/or royalties related to certain software products; and (vi) amortization of acquired software and acquired client contracts. The costs related to new product development (including significant enhancements to existing products) are included in R&D expenses.

The cost of software, maintenance and services for: (i) 2008 decreased 23.0% to \$19.0 million, from \$24.7 million for 2007; and (ii) 2007 increased 17.6% to \$24.7 million, from \$21.0 million for 2006.

The decrease in cost of software, maintenance and services between 2008 and 2007 reflects a reassignment of personnel and related costs that were previously working on software maintenance projects to R&D projects.

The increase in cost of software, maintenance and services between 2007 and 2006 was due to an increase in employee-related costs as a result of an increase in personnel assigned internally to software maintenance projects and our emphasis on expanding our professional services organization. This increase in expense is reflective of the increase in revenues between years.

Total cost of software, maintenance and services as a percentage of our software, maintenance and services revenues for 2008, 2007, and 2006 were 59.2%, 66.3%, and 66.9%, respectively. Variability in quarterly revenues and operating results are inherent characteristics of companies that sell software licenses, and perform professional services. Our quarterly revenues for software licenses and professional services may fluctuate, depending on various factors, including the timing of executed contracts and revenue recognition, and the delivery of contracted services or products. However, the costs associated with software and professional services revenues are not subject to the same degree of variability (i.e., these costs are generally fixed in nature within a relatively short period of time), and thus, fluctuations in our cost of software, maintenance and services as a percentage of our software, maintenance and services revenues will likely occur between periods.

R&D Expense (Exclusive of Depreciation). R&D expense for: (i) 2008 increased 15.3% to \$67.3 million, from \$58.3 million for 2007; and (ii) 2007 increased 26.3% to \$58.3 million, from \$46.2 million for 2006. The increases in R&D expense between years was the result of an increase in personnel and related costs on R&D projects, as more employees were redirected to R&D efforts during 2008 and 2007, reflective of our increased focus on product development and enhancement efforts. We did not capitalize any software development costs in 2008, 2007, or 2006.

During 2008, 2007, and 2006, our R&D efforts were focused on the continued evolution of our products, both functionally and architecturally, in response to market demands that our products have certain functional features and capabilities, as well as architectural flexibilities (such as service oriented architecture, or SOA). This product evolution will result in the modularization of certain product functionality that historically has been tightly integrated within our product suite, which will allow us to respond more quickly to required changes to our products and provide greater interoperability with other computer systems. Although our primary value proposition to our clients will continue to be the breadth and depth of our integrated solutions, these R&D efforts will also allow us to separate certain product components so as to allow such components to be marketed on a stand-alone basis where a specific client requirement and/or business need dictates, including the use of certain products across non-CSG customer care and billing systems.

As a percentage of total revenues, R&D expense for 2008, 2007, and 2006, was 14.3%, 13.9%, and 12.1%, respectively. At this time, we expect our future R&D efforts to continue to focus on similar tasks as noted above. In the near term, we expect that our investment in R&D will be in a range comparable with that of 2008, with the level of our R&D spend highly dependent upon the opportunities that we see in our markets.

Selling, General and Administrative Expense (Exclusive of Depreciation) (SG&A). SG&A expense for: (i) 2008 increased by 17.7% to \$53.9 million, from \$45.7 million for 2007; and (ii) 2007 increased 6.1% to \$45.7

Table of Contents

million, from \$43.1 million for 2006. The increase in SG&A expenses between periods reflects the impact of the sales and marketing costs of the Acquired Businesses. As a percentage of total revenues, SG&A expense for 2008, 2007, and 2006, was 11.4%, 10.9%, and 11.3%, respectively.

Depreciation Expense. Depreciation expense for all property and equipment is reflected separately in the aggregate and is not included in the cost of revenues or the other components of operating expenses. Depreciation expense for 2008, 2007, and 2006, was \$16.2 million, \$12.9 million, and \$10.4 million, respectively. The sequential increases in depreciation expense is reflective of the increased capital expenditures we have made over the past years (mainly related to statement production equipment) and to the acquired property and equipment from our acquisition activities.

Operating Income. Operating income and operating income margin for: (i) 2008 was \$89.3 million, or 18.9% of total revenues, compared to \$83.8 million, or 20.0% of total revenues for 2007; and (i) 2007 was \$83.8 million, or 20.0% of total revenues, compared to \$86.5 million, or 22.6% of total revenues for 2006.

The decrease in operating income margin between 2008 and 2007 was due to the impact of the Acquired Businesses.

The decreases in operating income and the operating income margin between 2007 and 2006 were mainly the result of: (i) an overall increase in R&D expenditures, as discussed above; and (ii) the impact of the ComTec and Prairie acquisitions in 2007. Our operating results include non-cash charges related to depreciation, amortization of intangible assets (primarily shown as a reduction of processing revenues), and stock-based compensation expense. The total amount of these pretax non-cash expenses, and their impact (net of related estimated income tax expense) on net income from continuing operations and diluted earnings per share, for 2008, 2007, and 2006, are as follows (in thousands, except diluted earnings per share):

	2008	2007	2006
Non-cash expenses related to:			
Depreciation	\$ 16,194	\$ 12,900	\$ 10,438
Amortization of intangible assets	15,667	17,789	15,913
Stock-based employee compensation	11,605	11,102	12,214
Total	\$ 43,466	\$ 41,791	\$ 38,565

Impact of non-cash expenses on results of continuing operations (i.e., have reduced operating results):

Net income	\$ 28,446	\$ 26,902	\$ 23,895
Diluted earnings per share	\$ 0.86	\$ 0.68	\$ 0.51

Interest Expense. Our interest expense relates primarily to our Convertible Debt Securities, issued in June 2004, which have a stated coupon rate of 2.5%. See Note 6 to our Consolidated Financial Statements for additional discussion of our Convertible Debt Securities. Additionally, see Note 2 to our Consolidated Financial Statements for discussion of our adoption of FSP APB 14-1, effective January 1, 2009, and the corresponding retrospective impact of such adoption on our interest expense.

Interest and Investment Income, net. Interest and investment income, net, for: (i) 2008 decreased 69.8% to \$5.0 million, from \$16.5 million for 2007; and (ii) 2007 decreased 24.8% to \$16.5 million, from \$22.0 million for 2006. The decrease in interest and investment income, net, between periods is due to: (i) the significant decrease in our cash and short-term investment balances between years as a result of our stock repurchase activity in 2007 and the purchase of the Acquired Businesses; and (ii) a decrease in the overall rate of return realized on investments during 2008 due to a deterioration in the interest rate environment.

Table of Contents

Gain on Repurchase of Convertible Debt Securities. As discussed above, in 2008 we repurchased \$29.7 million of our Convertible Debt Securities for \$22.4 million, which resulted in a gain of \$7.0 million. This represents a weighted-average purchase price of approximately 75% of par value for the bonds we repurchased.

Income Tax Provision. Our effective income tax rates for 2008, 2007, and 2006 were as follows:

2008	2007	2006
35%	36%	38%

Going forward, we would expect our 2009 effective income range to be comparable to 2008.

Liquidity

Cash and Liquidity. As of December 31, 2008, our principal sources of liquidity included cash, cash equivalents, and short-term investments of \$141.2 million, compared to \$132.8 million as of December 31, 2007. We generally invest our excess cash balances in low-risk, short-term investments to limit our exposure to market and credit risks. We have ready access to all of our cash, cash equivalents, and short-term investment balances.

In addition to the above sources of liquidity, we also have a \$100 million senior secured revolving credit facility that is discussed in the [Capital Resources](#) section below.

Cash Flows From Operating Activities. We calculate our cash flows from operating activities in accordance with generally accepted accounting principles, beginning with net income and then adding back the impact of non-cash items (e.g., depreciation, amortization, deferred income taxes, stock-based compensation, etc.), and then factoring in the impact of changes in operating assets and liabilities.

Our primary source of cash is from our operating activities. Our current business model consists of a significant amount of recurring revenue sources related to our long-term processing arrangements (billed monthly), and software maintenance agreements (billed monthly, quarterly, or annually). This recurring revenue base provides us with a reliable and predictable source of cash. In addition, software license fees and professional services revenues provide for material amounts of cash, but the payment streams for these items are not as predictable.

The primary use of our cash is to fund our operating activities. Approximately 50% of our total operating costs relate to labor costs (both employees and contracted labor) for: (i) compensation; (ii) related fringe benefits; and (iii) reimbursements for travel and entertainment expenses. The other primary cash requirements for our operating expenses consist of: (i) postage; (ii) paper, envelopes, and related supplies for our statement processing solutions; (iii) data processing and related services and communication lines for our outsourced processing business; and (iv) rent and related facility costs. These items are purchased under a variety of both short-term and long-term contractual commitments. A summary of our material contractual obligations is provided below.

See [Cash Flows From Investing Activities](#) and [Cash Flows From Financing Activities](#) below for the other primary sources and uses of our cash.

Table of Contents

Our 2007 and 2008 consolidated net cash flows from operating activities, broken out between operations and changes in operating assets and liabilities, for the indicated periods are as follows (in thousands):

	Operations	Changes in Operating Assets and Liabilities	Net Cash Provided by Operating Activities Quarter Totals
Cash Flows from Operating Activities:			
2007:			
March 31	\$ 27,199	\$ 8,464	\$ 35,663
June 30	28,217	(3,719)	24,498
September 30	28,404	7,266	35,670
December 31	30,355	(10,807)	19,548
Year-to-date total	\$ 114,175	\$ 1,204	\$ 115,379
2008:			
March 31	\$ 31,538	\$ (10,686)	\$ 20,852
June 30	28,225	19,052	47,277
September 30	30,440	(2,881)	27,559
December 31	24,558	(5,599)	18,959
Year-to-date total	\$ 114,761	\$ (114)	\$ 114,647

We believe the above table illustrates our ability to consistently generate strong quarterly and annual cash flows, and the importance of managing our working capital items. As the table above illustrates, the operations portion of our cash flows from operating activities remains relatively consistent between periods. The variations in our net cash provided by operating activities are almost entirely related to the changes in our operating assets and liabilities related to our operations (related mostly to normal fluctuations in timing at quarter-end for such things as client payments and changes in accrued expenses), and generally over longer periods of time, do not significantly impact our cash flows from operations.

Significant fluctuations in key operating assets and liabilities between 2008 and 2007 that impacted our cash flows from operating activities are as follows:

Billed Trade Accounts Receivable

Management of our billed accounts receivable is one of the primary factors in maintaining strong quarterly cash flows from operating activities. Our billed trade accounts receivable balance includes billings for several non-revenue items (primarily postage, sales tax, and deferred revenue items). As a result, we evaluate our performance in collecting our accounts receivable through our calculation of days billings outstanding (DBO) rather than a typical days sales outstanding (DSO) calculation. DBO is calculated based on the billings for the period (including non-revenue items) divided by the average monthly net trade accounts receivable balance for the period.

Table of Contents

Our gross and net billed trade accounts receivable and related allowance for doubtful accounts receivable (Allowance) as of the end of the indicated quarterly periods, and the related DBOs for the quarters then ended, are as follows (in thousands, except DBOs):

Quarter Ended	Gross	Allowance	Net Billed	DBOs
2007:				
December 31	\$ 115,619	\$ (1,487)	\$ 114,132	59
2008:				
March 31	126,062	(1,476)	124,586	59
June 30	107,226	(1,557)	105,669	59
September 30	109,490	(1,594)	107,896	55
December 31	123,277	(2,999)	120,278	56

The changes in our gross and net billed trade accounts receivable shown in the table above reflect the normal fluctuations in the timing of client payments made at quarter-end, evidenced by our consistent DBO metric over the past several quarters.

Deferred Income Taxes.

The decrease of \$18.5 million in net deferred income taxes (current and non-current) from \$20.1 million as of December 31, 2007 to \$1.6 million as of December 31, 2008 relates to the: (i) timing differences for depreciable and amortizable assets; (ii) utilization of net operating loss carryforwards; and (iii) increase in deferred income tax liabilities related to our Convertible Debt Securities. See Note 7 to our Consolidated Financial Statements for further details.

Cash Flows From Investing Activities. Our typical investing activities consist of purchases/sales of short-term investments, purchases of property and equipment, and investments in client contracts, which are discussed below. However, as discussed above, during 2008 and 2007, we made the following acquisitions, which are included in our cash flows from investing activities: (i) Quaero in December 2008; (ii) DataProse in April 2008; (iii) Prairie in August 2007; and (iv) ComTec in July 2007.

Purchases/Sales of Short-term Investments.

During 2008, 2007, and 2006, we purchased \$83.1 million, \$209.4 million, and \$283.1 million, respectively, and sold or had mature \$36.2 million, \$379.0 million, and \$156.2 million, respectively, of short-term investments. We continually evaluate the possible uses of our excess cash balances and will likely purchase additional short-term investments in the future.

Property and Equipment/Client Contracts.

Our annual capital expenditures for property and equipment, and investments in client contracts were as follows (in thousands):

	2008	2007	2006
Property and equipment	\$ 21,577	\$ 20,271	\$ 12,651
Client contracts	4,000	7,436	10,658

Our capital outlays related to property and equipment consisted principally of the following: (i) computer hardware and related software; (ii) statement production equipment; and (iii) facilities and internal infrastructure improvements. The increase in capital expenditures during 2008 and 2007 consisted principally of purchases of hardware and software infrastructure items to support many of our new products and services to meet our clients' expanding business needs. While our core ACP processing product utilizes data processing capacity leased from FDC, and therefore, allowing us to avoid the large capital investment

Table of Contents

needed for such equipment, many of our new products and services ancillary to ACP (e.g., certain aspects of our WorkForce Express product, enhanced product catalog functionalities, etc.) are run on open system computer servers (that generally interface with ACP) that we own.

Our investments in client contracts for 2008, 2007, and 2006, relate primarily to: (i) cash incentives provided to clients to convert their customer accounts to, or retain their customer's accounts on, our customer care and billing systems; and (ii) direct and incremental costs incurred for conversion/set-up services related to long-term processing arrangements where we are required to defer conversion/set-up services fees and recognize those fees as the related processing services are performed. For 2008, 2007, and 2006, our: (i) investments in client contracts related to cash incentives were \$2.4 million, \$5.9 million, and \$8.8 million, respectively; and (ii) the deferral of costs related to conversion/set-up services provided under long-term processing contracts were \$1.6 million, \$1.5 million, and \$1.9 million, respectively.

Cash Flows From Financing Activities. We have had limited financing activities over the last several years, and historically, we have not been active in the capital markets. Our financing activities typically consist of various activities with our common stock, which are discussed below. However, during 2008 we repurchased \$29.7 million (par value) of our Convertible Debt Securities for \$22.4 million, and recognized a gain on the repurchase of \$7.0 million (pretax impact), after the write-off of a proportional amount of deferred financing costs.

Issuance of Common Stock.

Proceeds from the issuance of common stock for 2008, 2007, and 2006, were \$1.2 million, \$2.2 million, and \$11.5 million, respectively, and relates primarily to employee stock purchase plan purchases in 2008 and the exercise of stock options in 2007 and 2006.

Repurchase of Common Stock.

As discussed above, during 2008, 2007, and 2006, we repurchased shares of our common stock under the guidelines of our Stock Repurchase Program for \$4.0 million, \$307.6 million, and \$63.3 million, respectively. In addition, outside of our Stock Repurchase Program, during 2008, 2007, and 2006, we repurchased from our employees and then cancelled approximately 136,000 shares, 176,000 shares, and 148,000 shares, of our common stock for \$1.8 million, \$4.0 million, and \$3.7 million, respectively, in connection with minimum tax withholding requirements resulting from the vesting of restricted stock under our stock incentive plans.

Contractual Obligations and Other Commercial Commitments and Contingencies

We have various contractual obligations that are recorded as liabilities in our Consolidated Balance Sheet. Other items, such as certain purchase commitments and other executory contracts are not recognized as liabilities in our Consolidated Balance Sheet, but are required to be disclosed.

The following table summarizes our significant contractual obligations and commercial commitments as of December 31, 2008, and the future periods in which such obligations are expected to be settled in cash (in thousands).

	Total	Less than 1 year	Years 2-3	Years 4-5	More than 5 Years
Long-term debt	\$ 212,820	\$ 5,008	\$ 207,812	\$	\$
Operating leases	47,180	9,982	16,699	10,326	10,173
Purchase obligations	182,702	44,910	55,389	47,247	35,156
Total	\$ 442,702	\$ 59,900	\$ 279,900	\$ 57,573	\$ 45,329

Table of Contents

The contractual obligation amount reflected for our long-term debt is based upon the following assumptions: (i) our Convertible Debt Securities are put back to us by the holders at the first put date of June 15, 2011; (ii) upon settlement of the Convertible Debt Securities, our cash obligation will not exceed the principal amount of the Convertible Debt Securities; and (iii) interest paid through the life of the Convertible Debt Securities at a rate of 2.5% per annum. As discussed in Note 6 to our Consolidated Financial Statements, the Convertible Debt Securities can also be put back to us by the holders for cash on June 15, 2016 and 2021, and mature on June 15, 2024. If the Convertible Debt Securities are not put back to us on June 15, 2011, the contractual obligations and commercial commitments in Year 3 would decrease by approximately \$198 million, and there would be further contractual obligations and commercial commitments related to long-term debt after Year 3 of up to approximately \$263 million.

The operating leases are discussed in Note 10 to our Consolidated Financial Statements. Our purchase obligations consist primarily of our expected minimum base fees under the FDC and Infocrossing service agreements (discussed in Note 10 to our Consolidated Financial Statements), and data communication services. Due to the uncertainty of payment, the above table excludes contingent purchase price payments of up to \$9.5 million related to our recent acquisitions which could be paid out through the end of 2010, contingent upon the achievement of certain predetermined operating criteria.

Of the total contractual obligations and commercial commitments above, approximately \$205 million is reflected on our Consolidated Balance Sheet and approximately \$238 million is not.

Off-Balance Sheet Arrangements

In conjunction with the sale of the GSS business in 2005, we have agreed to indemnify the buyer of the business against certain losses it may incur in connection with the purchased business subsequent to the sale date. See Note 10 to our Consolidated Financial Statements for further discussion of those indemnifications. We have no other material off-balance sheet arrangements as of December 31, 2008.

Capital Resources

The following are the key items to consider in assessing our sources and uses of capital resources:

Current Sources of Capital Resources.

Cash, Cash Equivalents and Short-term Investments. As of December 31, 2008, we had cash, cash equivalents, and short-term investments of \$141.2 million.

Operating Cash Flows. As described in the Liquidity section above, we believe we have the ability to consistently generate strong cash flows to fund our operating activities.

Revolving Credit Facility. We have a \$100 million senior secured revolving credit facility (the 2004 Revolving Credit Facility) with a syndicate of U.S. financial institutions that expires in September 2009. The 2004 Revolving Credit Facility has a \$40 million sub-facility for standby and commercial letters of credit and a \$10 million sub-facility for same day advances. As of the date of this filing, we have made no borrowings under the 2004 Revolving Credit Facility.

Our ability to borrow under the 2004 Revolving Credit Facility is subject to a limitation of total indebtedness based upon the results of consolidated leverage and interest coverage ratio calculations, and a minimum liquidity requirement. As of December 31, 2008, we were in compliance with the financial ratios and other covenants of the 2004 Revolving Credit Facility. As of December 31, 2008, due to an outstanding irrevocable letter of credit of \$0.5 million, we had \$99.5 million of the 2004 Revolving Credit Facility contractually available to us. However, a financial institution that is responsible for funding approximately 15% of the total facility has undergone recent financial challenges, and it is unknown at this time whether those challenges would affect the financial

Table of Contents

institution's ability or willingness to fund the facility. If that financial institution is unable or unwilling to fund its portion of the facility, as of December 31, 2008, we would have only \$84.5 million of the 2004 Revolving Credit Facility available to us.

We pay a quarterly commitment fee on the unused portion of the 2004 Revolving Credit Facility. This rate is dependent on our leverage ratio and ranges from 25 to 50 basis points per annum. As of December 31, 2008, the commitment fee rate was 37.5 basis points per annum. See Note 6 to our Consolidated Financial Statements for a discussion of the interest rate provisions of the 2004 Revolving Credit Facility.

We are currently evaluating our options for a revolving credit facility beyond the September 2009 expiration date of the existing 2004 Revolving Credit Facility.

Uses of Capital Resources. Below are the key items to consider in assessing our uses of capital resources:

Common Stock Repurchases. We have made significant repurchases of our common stock in the past. During 2008, we repurchased 250,000 shares of our common stock for \$4.0 million (weighted-average price of \$15.93 per share). As of December 31, 2008, we have remaining 6.0 million shares authorized for repurchase under our Stock Repurchase Program, but have made no commitments to repurchase those shares in the future.

Acquisitions. We have made five acquisitions in the last three years. Besides the cash paid at the date the acquisition closes, some acquisitions may include the payment of additional cash related to contingent purchase price payments. As discussed in Note 3 to our Consolidated Financial Statements, as of December 31, 2008, we have accrued for contingent purchase price payments of \$3.8 million that will be paid in the first half of 2009. In the future, we could potentially be paying up to \$4.0 million for contingent purchase price payments for Prairie related to 2009, and up to \$9.5 million for contingent purchase price payments for Quero related to 2009 and 2010.

Capital Expenditures. In 2008, we spent \$21.6 million on capital expenditures. At this time, we expect our 2009 capital expenditures to be approximately \$30 million, with approximately \$15 million related to hardware and infrastructure items necessary to setup and replicate the new computing environment at InfoCrossing, as discussed earlier. The remainder of our expected capital expenditures will consist principally of hardware and software infrastructure to support our clients' expanding business needs, and statement production equipment to continue to offer enhanced functionalities to our clients. As of December 31, 2008, we have made no significant capital expenditure commitments.

Investments in Client Contracts. In the past, we have provided incentives to new or existing clients to convert their customer accounts to, or retain their customer's accounts on, our customer care and billing systems. During 2008, we provided client incentives of \$2.4 million. As of December 31, 2008, we did not have any material commitments for investments in client contracts, but as of the date of this filing, we do have material commitments for investments in client contracts which are payable by us only upon the successful conversion of certain additional customers to our processing systems.

Long-Term Debt. Our Convertible Debt Securities are callable by us for cash, on or after June 20, 2011, at a redemption price equal to 100% of the par value of the Convertible Debt Securities, plus accrued interest. The Convertible Debt Securities can be put back to us by the holders for cash at June 15, 2011, 2016 and 2021, or upon a change of control, as defined in the Convertible Debt Securities bond indenture, at a repurchase price equal to 100% of the par value of the Convertible Debt Securities, plus any accrued interest. The Convertible Debt Securities are also convertible under specified conditions. Upon conversion of the Convertible Debt Securities, we will settle our conversion obligation as follows: (i) we will pay cash for 100% of the \$200.3 million par value of the Convertible Debt Securities; and (ii) to the extent our conversion obligation exceeds the par value, we will satisfy the remaining conversion obligation in our common stock, cash or any combination of our common stock and cash. During the next twelve months, there are no call or put options available, and we do not expect the occurrence of any conversion triggers. As a result, in the near-term, we expect our required annual debt service cash outlay related to the Convertible Debt Securities to be limited to the annual interest payments of \$5.0 million.

Table of Contents

As noted above, during the fourth quarter of 2008, we voluntarily repurchased \$29.7 million of our Convertible Debt Securities for \$22.4 million, which resulted in a gain of \$7.0 million. This represents a weighted-average purchase price of approximately 75% of par value for the bonds we repurchased, and represents a pre-tax yield to us of approximately 14%, assuming these bonds were to be retired at the first put or call date in June 2011. We believe our Convertible Debt Securities were trading significantly below their par value because of the instability of the overall financial markets during the fourth quarter of 2008, which resulted in the convertible debt instruments of many companies trading significantly below their historical ranges. The public convertible bond market has stabilized over the last few months, and thus the discount buying opportunities experienced during the earlier part of the fourth quarter of 2008 may not exist in the future. In fact, the market price for our Convertible Debt Securities has returned to a more recent historical range of approximately 85%-90% of par value. We will continue to track and evaluate the trading activity and valuations around our Convertible Debt Securities for possible future buying opportunities.

In summary, we expect to continue to make material investments in client contracts, capital equipment, and R&D. Although we do not have any plans at this time to repurchase significant amounts of our outstanding common stock under our Stock Repurchase Program or our Convertible Debt Securities, we expect to continually evaluate the possibility of debt and equity repurchases in the future. In addition, as part of our growth strategy, we are continually evaluating potential business and/or asset acquisitions, and investments in market share expansion with our existing and potential new clients. We believe that: (i) our current cash and short-term investments balance, together with cash expected to be generated from future operating activities; and (ii) the amount available under the 2004 Revolving Credit Facility (which expires in September 2009) will be sufficient to meet our anticipated cash requirements for at least the next 12 months. We also believe we could obtain additional capital through other debt sources, to include the possibility of replacing the revolving credit facility, that may be available to us if deemed appropriate.

Ratio of Earnings to Fixed Charges

The ratio of earnings to fixed charges is computed by dividing fixed charges into earnings. Earnings is defined as income from continuing operations before income taxes, plus fixed charges. Fixed charges consist of interest expense (including the amortization of deferred financing costs) and the estimated interest component of rental expense. Our consolidated ratio of earnings to fixed charges for 2008, was 9.55:1.00. See Exhibit 12.10 to this document for information regarding the calculation of our ratio of earnings to fixed charges.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and prices. As of December 31, 2008, we are exposed to market risks related to changes in interest rates, and fluctuations and changes in the market value of our cash equivalents and short-term investments. We have not historically entered into derivatives or other financial instruments for trading or speculative purposes.

Market Risk Related to Long-Term Debt. We are exposed to interest rate risk related to long-term debt from two sources: our Convertible Debt Securities and our 2004 Revolving Credit Facility.

The interest rate on the Convertible Debt Securities is fixed, and thus, as it relates to our borrowings under the Convertible Debt Securities, we are not exposed to changes in interest rates. Commencing with the six-month period beginning June 15, 2011, in any six-month interest period where the average trading price of the Convertible Debt Securities immediately preceding that six-month interest period equals 120% or more of the principal amount of the Convertible Debt Securities, we will pay contingent interest equal to 0.25% of that average trading price.

The interest rate for borrowings under the 2004 Revolving Credit Facility, except for same day advances, is chosen at our option, and is based upon a base rate or adjusted LIBOR rate, plus an applicable margin. The base

Table of Contents

rate represents the higher of a floating prime rate and a floating rate equal to 50 basis points in excess of the Federal Funds Effective Rate. The interest rate for same day advances is based upon base rate, plus an applicable margin. The applicable margins are dependent on our leverage ratio, as defined, and range from zero to 100 basis points for base rate loans and 125 to 225 basis points for LIBOR loans. As of December 31, 2008 we had made no borrowings under the 2004 Revolving Credit Facility.

See Note 6 to our Consolidated Financial Statements for additional information related to our long-term debt.

Market Risk Related to Cash Equivalents and Short-term Investments. Our cash and cash equivalents as of December 31, 2008 and 2007 were \$83.9 million and \$123.4 million, respectively. Our cash balances are typically swept into overnight money market accounts on a daily basis, and at times, any excess funds are invested in low-risk, somewhat longer term, cash equivalent instruments and short-term investments. We have minimal market risk for our cash and cash equivalents due to the relatively short maturities of the instruments.

Our short-term investments as of December 31, 2008 and 2007 were \$57.3 million and \$9.4 million, respectively. The day-to-day management of our cash equivalents and short-term investments is performed by two large financial institutions in the U.S., using strict and formal investment guidelines approved by our Board of Directors. Under these guidelines, short-term investments are limited to certain acceptable investments with: (i) a maximum maturity, (ii) a maximum concentration and diversification; and (iii) a minimum acceptable credit quality.

We do not utilize any derivative financial instruments for purposes of managing our market risks related to interest rate risk.

Management's Report on Internal Control Over Financial Reporting

Management of CSG Systems International, Inc. and subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) or 15d-15(f) under the Securities Exchange Act of 1934, as amended. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- (i) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (ii) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (iii) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework.

Based on our assessment and those criteria, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2008.

The Company's independent registered public accounting firm, KPMG LLP, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. That report appears immediately below.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

CSG Systems International, Inc.:

We have audited CSG Systems International, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). CSG Systems International, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, CSG Systems International, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of CSG Systems International, Inc. as of December 31, 2008 and 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008, and our report dated March 3, 2009 expressed an unqualified opinion on those consolidated financial statements.

KPMG LLP

Denver, Colorado

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

CSG Systems International, Inc.:

We have audited the accompanying consolidated balance sheets of CSG Systems International, Inc. (a Delaware corporation) and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of CSG Systems International, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), CSG Systems International, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 3, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. General**

CSG Systems International, Inc. (the Company, CSG, or forms of the pronoun we), a Delaware corporation, was formed in October 1994 and is based in Englewood, Colorado. We are a customer interaction management company that provides outsourced solutions to allow our clients to better attract, manage, retain, and support their customers. Our heritage is providing these solutions to the North American cable and Direct Broadcast satellite (DBS) communications markets, which represents a large percentage of our total revenues. Our solutions also support an increasing number of other industries such as financial services, utilities, telecommunications, healthcare, and home security. Our combination of solutions, services, and expertise ensure that our clients can rapidly launch new product offerings, improve operational efficiencies, and deliver high-quality customer service in a competitive and ever-changing marketplace. We are a S&P SmallCap 600 company.

2. Summary of Significant Accounting Policies

Principles of Consolidation. The accompanying Consolidated Financial Statements include all of our accounts and our subsidiaries' accounts. All material intercompany accounts and transactions have been eliminated.

Use of Estimates in Preparation of Consolidated Financial Statements. The preparation of the accompanying Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States (U.S.) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The more critical estimates and related assumptions that affect our financial condition and results of operations are in the areas of: (i) revenue recognition; (ii) allowance for doubtful accounts receivable; (iii) impairment assessments of goodwill and other long-lived assets; (iv) income taxes; and (v) business combinations and asset purchases.

Revenue Recognition. We use various judgments and estimates in connection with the determination of the amount of revenues to be recognized in each accounting period. Our primary revenue recognition criteria include: (i) persuasive evidence of an arrangement; (ii) delivery; (iii) fixed or determinable fees; and (iv) collectibility of fees. In addition, for multiple-element arrangements that are not subject to a higher level of authoritative literature, we follow the guidelines of the Financial Accounting Standards Board's (FASB) Emerging Issues Task Force (EITF) Issue No. 00-21, Accounting for Revenue Arrangements with Multiple Deliverables (EITF 00-21).

For those revenue arrangements within the scope of EITF No. 00-21, we are required to evaluate all deliverables in the arrangement to determine whether they represent separate units of accounting. If the deliverables qualify as separate units of accounting, the arrangement consideration is allocated among the separate units of accounting based upon their relative fair values, and applicable revenue recognition criteria are considered for the separate units of accounting. If the deliverables do not qualify as separate units of accounting, the consideration allocable to delivered items is combined with the consideration allocable to the undelivered items, and the appropriate recognition of revenue is then determined for those combined deliverables as a single unit of accounting. For the processing agreements that we have historically evaluated under EITF No. 00-21, we have generally concluded that the deliverables do not qualify as separate units of accounting, and thus have treated the deliverables as a single unit of accounting, with the revenue recognized ratably over the term of the processing agreement.

We have historically derived a significant percentage of our total revenues from processing and related services. Processing and related services revenues consist primarily of monthly processing fees generated from our outsourced customer care and billing application, called ACP, and services ancillary to ACP, and generally,

Table of Contents

are not subject to various judgments and estimates in determining the proper revenue recognition. Processing and related services revenues are recognized as the services are performed. Processing fees are typically billed monthly based on the number of client's customers served, ancillary services are typically billed on a per transaction basis, and customized print and mail services and other customer interaction services are billed on a usage basis. Fees received to convert client customers onto our outsourced customer care and billing applications and fees received to set-up/implement new services for existing clients (as well as the costs to perform the conversion or set-up services) are generally deferred and recognized over the term of the client's processing arrangement.

Our historical revenues related to software licenses, maintenance services (also known as post-contract customer support, or PCS) and professional services are substantially less than those generated from processing and related services. Software and maintenance revenues consist of the sale of software licenses (principally one-time perpetual licenses) and related software maintenance services. Professional services revenues consist of a variety of consulting services, such as product installation, business consulting, and training services. A substantial percentage of the total combined revenues from these three sources comes from maintenance services.

Software license fees are recognized using the guidelines of: (i) American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended (SOP 97-2); (ii) SOP 98-9, Software Revenue Recognition, With Respect to Certain Transactions (SOP 98-9); and (iii) AICPA Technical Questions and Answers, Section 5100, Revenue Recognition. For software arrangements that have multiple elements, such as software, maintenance and professional services, we allocate the contract value to the respective elements based on vendor-specific objective evidence (VSOE) of their individual fair values, determined in accordance with SOP 97-2. VSOE of fair value for maintenance services is established by pricing the maintenance services based upon a substantive maintenance renewal rate expressed as a consistent percentage of the stipulated license fees. For those software arrangements that have multiple elements for which we do not have VSOE of fair value on one or more of the delivered elements, we allocate the contract value to the respective elements based upon the residual method in accordance with SOP 98-9. Under the residual method, the undiscounted fair value of the undelivered elements is deferred and subsequently recognized as they are delivered. Our software arrangements generally do not include implementation services that involve significant production, modification or customization of the software being licensed.

For certain software arrangements, we have agreed to host the software on our hardware. In accordance with EITF Issue No. 00-03, Application of AICPA Statement of Position 97-2 to Arrangements That Include the Right to Use Software Stored on Another Entity's Hardware, these hosting services are treated as a separate element of the software arrangement when the client has a contractual right to take possession of the software at any time during the hosting period without incurring a significant penalty and it is feasible for the client to either run the software on its own hardware or contract with another party unrelated to us to host the software.

Maintenance fees are recognized ratably over the service period. Our maintenance services consist primarily of client and product support, technical updates (e.g., bug fixes, etc.), and unspecified upgrades or enhancements. If specified upgrades or enhancements are offered in an arrangement, which is rare, they are accounted for as a separate element in accordance with SOP 97-2.

Revenues from professional services generally consist of software installation projects with a relatively short duration period. These revenues are generally recognized as the installation work is completed.

Deferred Revenue and Unbilled Accounts Receivable. Client payments and billed amounts due from clients in excess of revenue recognized are recorded as deferred revenue. Revenue recognized prior to the scheduled billing date is recorded as unbilled accounts receivable. Deferred revenue as of December 31, 2008 and 2007 relates primarily to our processing and related services, of which a substantial portion relates to fees received to set-up/implement new services for our existing clients' customers which are being recognized over the term of the clients' processing arrangements.

Table of Contents

Postage. We pass through to our clients the cost of postage that is incurred on behalf of those clients, and typically require an advance payment on expected postage costs. These advance payments are included in client deposits in the accompanying Consolidated Balance Sheets, and are classified as current liabilities regardless of the contract period. We net the cost of postage against the postage reimbursements, and include the net amount in processing and related services revenues. We have concluded that net treatment of these revenues is appropriate as we:

(i) generally have little or no credit risk with regard to postage, as we require postage deposits from our clients based on contractual arrangements prior to the mailing of customer statements; (ii) have no discretion over the supplier of postal delivery services; and (iii) are not the primary obligor in the postal delivery service. The cost of postage that has been shown net of the postage reimbursements from our clients for 2008, 2007, and 2006 was \$251.8 million, \$213.7 million, and \$192.4 million, respectively.

Pronouncements Adopted. Effective January 1, 2008 we adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In addition, effective January 1, 2008, we adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115 (SFAS 159), which permits an entity to choose to measure various financial instruments and certain other items at fair value, with changes in fair value recognized in earnings each reporting period. Upon adoption of SFAS 159, we did not elect to measure any additional assets or liabilities at fair value.

Cash and Cash Equivalents. We consider all highly liquid investments with original maturities of three months or less to be cash equivalents. As of December 31, 2008, our cash equivalents consist primarily of commercial paper and institutional money market funds.

Short-term Investments and Other Financial Instruments. Our financial instruments as of December 31, 2008 and 2007 include cash and cash equivalents, short-term investments, accounts receivable, accounts payable, and long-term debt. Because of their short maturities, the carrying amounts of cash equivalents, accounts receivable, and accounts payable approximate their fair value.

Our short-term investments are considered available-for-sale in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities , and thus are reported at fair value in our accompanying Consolidated Balance Sheets, with unrealized gains and losses, net of the related income tax effect, excluded from earnings and reported in a separate component of stockholders' equity. Realized and unrealized gains and losses were not material in any period presented.

Our short-term investments at December 31, 2008 and 2007 consisted of the following (in thousands):

	As of December 31,	
	2008	2007
Commercial paper	\$ 7,794	\$ 9,121
Fixed rate corporate securities	3,000	
Agency discount notes	46,537	
All other		295
Total	\$ 57,331	\$ 9,416

All short-term investments held by us as of December 31, 2008 and 2007 have contractual maturities of less than one year from the time of acquisition. Proceeds from the sale/maturity of short-term investments were \$36.2 million, \$379.0 million, and \$156.2 million, in 2008, 2007, and 2006, respectively.

Table of Contents

SFAS 157 describes a fair value hierarchy based on three levels of inputs, of which Levels 1 and 2 are considered observable and Level 3 is unobservable. In accordance with SFAS 157, the following table represents the fair value hierarchy for our cash equivalents and short-term investments measured at fair value (in thousands):

	Fair Value Measurements as of December 31, 2008		
	Level 1	Level 2	Total
Money market funds	\$ 40,938	\$	\$ 40,938
Commercial paper		31,383	31,383
Fixed rate corporate securities		3,000	3,000
Agency discount notes		53,737	53,737
Total	\$ 40,938	\$ 88,120	\$ 129,058

As of December 31, 2008 and 2007, our long-term debt consists of our Convertible Debt Securities (see Note 6). We have chosen not to measure our Convertible Debt Securities at fair value under SFAS 159, with changes recognized in earnings each reporting period. As of December 31, 2008 and 2007, the fair value of our Convertible Debt Securities, based upon quoted market prices or recent sales activity, was approximately \$173 million and \$201 million, respectively. The fair value of the contingent interest feature of our long-term debt, considered an embedded derivative, as of December 31, 2008 and 2007, was approximately \$61,000 and \$32,000, respectively.

Concentrations of Credit Risk. In the normal course of business, we are exposed to credit risk. The principal concentrations of credit risk relate to cash deposits, cash equivalents, short-term investments, and accounts receivable. We regularly monitor credit risk exposures and take steps to mitigate the likelihood of these exposures resulting in a loss. We hold our cash deposits, cash equivalents, and short-term investments with financial institutions we believe to be of sound financial condition.

We do not require collateral or other security to support accounts receivable. We evaluate the credit worthiness of our clients in conjunction with our revenue recognition processes, as well as through our ongoing collectibility assessment processes for accounts receivable. We maintain an allowance for doubtful accounts receivable based upon factors surrounding the credit risk of specific clients, historical trends, and other information. We use various judgments and estimates in determining the adequacy of the allowance for doubtful accounts receivable. See Note 4 for additional details of our concentration of accounts receivable.

The activity in our allowance for doubtful accounts receivable is as follows (in thousands):

	2008	2007	2006
Balance, beginning of year	\$ 1,487	\$ 1,143	\$ 1,324
Additions to expense	1,527	231	109
Write-offs	(88)	(54)	(381)
Other	73	167	91
Balance, end of year	\$ 2,999	\$ 1,487	\$ 1,143

Property and Equipment. Property and equipment are recorded at cost (or at estimated fair value if acquired in a business combination) and are depreciated over their estimated useful lives ranging from three to ten years. Leasehold improvements are depreciated over the shorter of their economic life or the lease term. Depreciation expense is primarily computed using the straight-line method for financial reporting purposes.

Depreciation

Table of Contents

expense for all property and equipment is reflected in our accompanying Consolidated Statements of Income separately in the aggregate and is not included in the cost of revenues or the other components of operating expenses. Depreciation for income tax purposes is computed using accelerated methods.

Software. We expend substantial amounts on research and development (R&D), particularly for new products and services, or for enhancements of existing products and services. For development of software products that are to be licensed by us, we follow SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed (SFAS 86). SFAS 86 requires that the cost of developing software be expensed prior to establishing technological feasibility, and those costs be capitalized once technological feasibility has been established. Capitalization ceases upon general release of the software. For development of software to be used internally (e.g., processing systems software), we follow SOP 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use (SOP 98-1). SOP 98-1 requires that the cost of developing software for internal use be expensed prior to the application development stage.

During 2008, 2007, and 2006, we expended \$67.3 million, \$58.3 million, and \$46.2 million, respectively, on R&D projects. We did not capitalize any R&D costs under SFAS 86 or SOP 98-1 in 2008, 2007, or 2006 as the costs subject to capitalization during these periods were not material. We did not have any capitalized R&D costs included in our December 31, 2008 or 2007 accompanying Consolidated Balance Sheets.

Realizability of Long-Lived Assets. We evaluate the recoverability of our long-lived assets, other than goodwill, in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets . Long-lived assets are required to be evaluated for possible impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. A long-lived asset is impaired if estimated future undiscounted cash flows associated with that asset are insufficient to recover the carrying amount of the long-lived asset. If deemed impaired, the long-lived asset is written down to its fair value.

Goodwill. We follow the provisions of SFAS No. 142, Goodwill and Other Intangible Assets (SFAS 142) in accounting for acquired goodwill and other intangible assets. Under SFAS 142, goodwill is required to be tested for impairment on an annual basis, and is required to be evaluated for possible impairment on a more periodic basis (e.g., quarterly) if events occur or circumstances change that could indicate a possible impairment may have occurred. Goodwill is considered impaired if the carrying value of the reporting unit which includes the goodwill is greater than the estimated fair value of the reporting unit.

Loss Contingencies. We follow the guidelines of SFAS No. 5, Accounting for Contingencies in determining the appropriate accounting and disclosures for our loss and gain contingencies. We accrue for a loss contingency when: (i) it is probable that an asset has been impaired, or a liability has been incurred; and (ii) the amount of the loss can be reasonably estimated. The determination of accounting for loss contingencies is subject to various judgments and estimates. We do not record the benefit from a gain contingency until the benefit is realized.

Earnings Per Common Share (EPS). EPS has been computed in accordance with SFAS No. 128, Earnings Per Share . Basic EPS is computed by dividing net income (the numerator) by the weighted-average number of common shares outstanding during the period (the denominator). Diluted EPS is consistent with the calculation of basic EPS while considering the effect of potentially dilutive common shares outstanding during the period. Unvested shares of restricted stock are not included in the basic EPS calculation. Basic and diluted EPS are presented on the face of the accompanying Consolidated Statements of Income.

Table of Contents

No reconciliation of the basic and diluted EPS numerators is necessary as net income is used as the numerators for all periods presented. The reconciliation of the EPS denominators is included in the following table (in thousands):

	2008	2007	2006
Basic weighted-average common shares	33,207	39,670	46,464
Dilutive effect of common stock options	32	73	221
Dilutive effect of unvested restricted stock	238	278	371
Dilutive effect of Convertible Debt Securities			46
Diluted weighted-average common shares	33,477	40,021	47,102

Potentially dilutive common shares related to stock options and unvested shares of restricted stock of 0.9 million, 0.4 million, and 0.3 million, respectively, for 2008, 2007, and 2006, were excluded from the computation of diluted EPS as their effect was antidilutive.

We calculate the potential dilutive effect of our Convertible Debt Securities using the treasury stock method. Under the treasury stock method, we experience dilution related to the Convertible Debt Securities only in those quarterly periods in which our average stock price has exceeded the current effective conversion price of \$26.77 per share. As discussed in Note 6, the current effective conversion price of \$26.77 per share may be adjusted in the future for certain events, to include stock dividends, stock splits/reverse splits, the issuance of warrants to purchase our stock at a price below the then-current market price, cash dividends, and certain purchases by us of our common stock pursuant to a self-tender offer or exchange offer.

Refer to the Accounting Pronouncements Issued But Not Yet Effective section below for a discussion of our adoption of FSP EITF 03-6-1, effective January 1, 2009, and the corresponding retrospective impacts of such adoption on our EPS.

Stock-Based Compensation. Effective January 1, 2006, we adopted SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123R) and related amendments and interpretations, using the modified prospective transition method. SFAS 123R establishes standards for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. SFAS 123R requires us to estimate the amount of expected forfeitures in calculating compensation costs for all outstanding awards. SFAS 123R requires the benefit of tax deductions in excess of recognized compensation expense be reported as a financing cash inflow rather than as an operating cash inflow.

Income Taxes. We account for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations.

In July 2006, the FASB issued Financial Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes (FIN 48) which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with SFAS No. 109, Accounting for Income Taxes (SFAS 109). FIN 48

Table of Contents

provides that a tax benefit from an uncertain tax position may be recognized when it is more likely than not that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits. Income tax positions must meet a more-likely-than-not recognition threshold at the effective date to be recognized upon the adoption of FIN 48 and in subsequent periods. This interpretation also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

We adopted the provisions of FIN 48 on January 1, 2007. As a result of the implementation of FIN 48, we recognized reductions in our liability for unrecognized income tax benefits related to our continuing operations of \$0.3 million and related to our discontinued operations of \$1.2 million, both which were accounted for as an increase to our January 1, 2007 accumulated earnings balance.

Comprehensive Income. The components of comprehensive income are reflected in the accompanying Consolidated Statements of Stockholders Equity.

Accounting Pronouncements Issued But Not Yet Effective. SFAS No. 141 (revised 2007) Business Combinations. In December 2007, the FASB issued SFAS 141 (revised 2007), Business Combinations (SFAS 141(R)), which significantly changes the accounting for business combinations. Under SFAS 141(R), an acquiring entity is required to recognize all the assets acquired and liabilities assumed in a transaction at the acquisition-date fair value with limited exceptions. SFAS 141(R) further changes the accounting treatment for certain items, including: (i) acquisition costs will be generally expensed as incurred; (ii) noncontrolling interests (formerly known as minority interests) will be valued at fair value at the acquisition date; (iii) acquired contingent liabilities will be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies; (iv) contingent consideration will be valued at fair value at the acquisition date and remeasured to fair value at each reporting date until the contingency is resolved; (v) in-process research and development (IPR&D) will be recorded at fair value as an indefinite-lived intangible asset at the acquisition date, treated as an indefinite-lived intangible asset until completion or abandonment, and upon completion, the IPR&D asset will be amortized over its useful life; (vi) restructuring costs associated with a business combination will be expensed subsequent to the acquisition date; and (vii) changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally will affect income tax expense. SFAS 141(R) also includes a substantial number of new disclosure requirements.

The provisions of SFAS 141(R) are effective for us for all business combinations for which the acquisition date is on or after January 1, 2009. Since there is no retrospective application of this accounting pronouncement to prior reporting periods, only the accounting for future business combinations, if any, will be impacted.

FASB Staff Position No. APB 14-1 Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement). In May 2008, the FASB issued FASB Staff Position (FSP) APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement) . This FSP clarifies that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement), which would include our Convertible Debt Securities, are not addressed by paragraph 12 of Accounting Principles Board (APB) Opinion No. 14, Accounting for Convertible Debt and Debt Issued
