NEWS RELEASE

November 1, 2011

OTC:QB WSHE

For Immediate Release

**E-DEBIT GLOBAL CORPORATION EXPANDS ITS E-DEBIT INTERNATIONAL INC. EMV CHIP  
ENABLED CARD PRODUCTS TO THE  
CARD-NOT- PRESENT INTERNET AND WIRELESS MARKETPLACE.**

**Calgary, Alberta** E-Debit Global Corporation announces the development of E-Debit International Inc.'s Smart Grid secured Card-Not-Present payment process.

**Overview**

With our previously announced EMV SCD Code certifications (the payment and security standard for interoperation used for authenticating credit and debit card payments at chip enabled terminals developed for payment systems by Europay, MasterCard and Visa and introduced by the Interac Network) we are now moving our focus to expanding our business development to the Card-Not-Present wireless and Internet market place utilizing our EMV experience, stated Doug Mac Donald, E-Debit's President and CEO.

Although technically challenging, we are using our successful transition to the EMV standard to establish the E-Debit International Inc. Smart-Grid Card-Not Present payment process. With the number of payment cards in circulation in Canada currently at 112 million, and expansion of the Canadian card marketplace predicted to reach 124.5 million by 2016, (according to "Companiesandmarkets.com" a report and research aggregator).our focus will be to allow fully secured and network accessible payment processing for the Card-Not-Present marketplace.

E-Debit has established an unparalleled end-to-end payment delivery and processing solution built on the foundation of its ATM and POS networks experience. Our footprint

within our ATM and POS and our investments into securing state of the art technological expertise and security will allowed us to utilize our E-Debit economies of scale allowing for cost effective technical development and speed in facilitating the standardization of our payment platforms and consolidation of hardware components and human resources.

We have worked very hard at building a supporting infrastructure to underpin our payment platform development at a significant cost to the Company. I am excited about the potential that is presently in front of us not only in our historic business lines, but in the Card-Not-Present payment processing and prepaid, debit and credit business space originating in North America and expanding worldwide. Our expectations reflect our historic residual revenue experience with the ATM/POS replacement and anticipate similar returns on our efforts of the past several years added Mr. Mac Donald.

### **About E-Debit Global Corporation**

E-Debit Global Corporation (WSHE) is a financial holding company in Canada at the forefront of debit, credit and online computer banking. Currently, the Company has established a strong presence in the privately owned Canadian banking sector including Automated Banking Machines (ABM), Point of Sale Machines (POS), Online Computer Banking (OCB) and E-Commerce Transaction security and payment. E-Debit maintains and services a national ABM network across Canada and is a full participating member of the Canadian INTERAC Banking System.
