UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the year ended December 31, 2016

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 0-32565

RiceBran Technologies

(Exact name of registrant as specified in its Charter)

California 87-0673375
(State of Incorporation) (I.R.S. Employer Identification No.)

6720 N. Scottsdale Road, Suite # 390 Scottsdale, AZ 85253
(Address of Principal Executive Offices) (Zip Code)

Registrant's Telephone Number, Including Area Code: (602) 522-3000

Securities registered under Section 12(b) of the Exchange Act:
NONE

Securities registered under Section 12(g) of the Exchange Act:

Common Stock, no par value

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T

Edgar Filing: RiceBran Technologies - Form 10-K

(§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934, as amended). YES NO

As of June 30, 2016, the aggregate market value of our common stock held by non-affiliates was \$14,618,753.

As of March 17, 2017, there were 10,899,047 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's Definitive Proxy Statement for its annual meeting of shareholders, which Definitive Proxy Statement will be filed with the Commission not later than 120 days after the registrant's fiscal year ended December 31, 2016, are incorporated by reference into Part III of this Annual Report on Form 10-K.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K includes forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but are based on current expectations, estimates and projections about our industry, our beliefs and our assumptions. Words such as “believes,” “anticipates,” “expects,” “estimates,” “intends,” “plans,” “projects,” “will,” “may” and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. These forward-looking statements are not guarantees of future performance and concern matters that could subsequently differ materially from those described in the forward-looking statements. Future events and actual results could differ materially from those discussed in this Annual Report. These risks and uncertainties include those described in “Risk Factors” and elsewhere in this Annual Report. Except as required by law, we undertake no obligation to revise any forward-looking statements in order to reflect events or circumstances that may arise after the date of this Annual Report. We do not endorse any projections regarding future performance that may be made by third parties.

Unless the context requires otherwise, references to “we,” “us,” “our” and the “Company” refer to RiceBran Technologies, and its consolidated subsidiaries.

Index

PART I

ITEM 1. BUSINESS

Overview

Our Company

We are an ingredient company serving food, animal nutrition and specialty markets focused on value-added processing and marketing of healthy, natural and nutrient dense products derived from raw rice bran, an underutilized by-product of the rice milling industry.

We apply our proprietary and patented technologies and intellectual properties to convert raw rice bran into numerous high value products including:

- stabilized rice bran or SRB,
- rice bran oil or RBO,
- defatted rice bran or DRB, and
- derivative products including:
 - o RiBalance, a complete rice bran nutritional package derived from further processing of SRB;
 - o RiSolubles, a highly nutritious, carbohydrate and lipid rich fraction of RiBalance;
 - o RiFiber, a protein and fiber rich insoluble derivative of RiBalance; and
 - o our family of ProRyza products, which includes derivatives composed of protein and protein/fiber blends.

We have two reportable operating segments in 2016: (i) USA, which manufactures and distributes SRB (for food and animal nutrition customers) and derivative products as well as contract manufacturing of functional food products with an emphasis on utilization of our proprietary and patented functional food ingredients; and (ii) Brazil, which extracts crude RBO from raw rice bran and produces DRB as a co-product. RBO is then further processed into degummed, neutralized and/or fully refined rice bran oil for sale internationally and in Brazil. DRB is sold as feed for horses, cows, swine, sheep and poultry and a number of food and animal nutrition products. We incur corporate and other expenses not directly attributable to operating segments. These include costs related to our corporate staff, general and administrative expenses including public company expenses, intellectual property, professional fees, and other expenses. No Corporate allocations, including interest, are made to the operating segments.

Our target markets are organic and natural food, functional food, supplement and animal nutrition manufacturers, wholesalers and retailers, both domestically and internationally.

The combined operations of our USA and Brazil segments encompass our approach to processing raw rice bran into various high quality, value-added constituents and finished products. Over the past decade, we have developed and optimized our proprietary processes to support the production of healthy, natural and non-genetically modified ingredients that are free of all major allergens for use in meats, baked goods, cereals, coatings, health foods, nutritional supplements, nutraceuticals and high-end animal nutrition and animal health products.

We incorporated under the laws of the State of California in 1998. From July 2003 until October 2012, our corporate name was "NutraCea." At that time we changed our name to RiceBran Technologies. As of December 31, 2016, our corporate headquarters are located in Scottsdale, Arizona. We intend to relocate our corporate headquarters to California during 2017. Over the past several years, we have increased our geographic presence and expanded our capabilities:

Edgar Filing: RiceBran Technologies - Form 10-K

2016 – Entered into a strategic supply partnership with the Thailand-based Narula Group of companies to add organic jasmine rice bran and organic red rice bran, as well as other organic products, to our portfolio of products.

2014 – Acquired H&N Distribution Inc., an Irving, Texas based company now operating as Healthy Natural, Inc. (“HN”) which has a formulating, blending and co-packaging facility in Irving, Texas, where we manufacture blended and/or packaged functional food products for the nutrition and functional food markets.

2008 – Through our subsidiary Nutra S.A. LLC (“Nutra SA”), we initially acquired 100% ownership of Industria Riograndens De Oleos Vegetais Ltda. (“Irgovel”), our rice bran oil refining plant in Pelotas, Brazil. In 2011, we sold a minority interest in Nutra SA to AF Bran Holdings-NL LLC and AF Bran Holding LLC (the “Investors”).

Index

USA Segment

The USA segment produces SRB inside three locations: two leased raw rice bran stabilization facilities located within supplier-owned rice mills in Arbuckle and West Sacramento, California; and one owned rice bran stabilization facility in Mermentau, Louisiana. At our Dillon, Montana facility, the USA segment produces our process patented Stage II products including: RiSolubles, a highly nutritious, carbohydrate and lipid rich fraction of SRB; RiFiber, a fiber rich derivative of SRB; RiBalance, a complete rice bran nutritional package derived from further processing SRB, and our ProRyza family of products including, protein- and protein/fiber-based products. “Stage II” refers to the products produced using our patented process technology run at our Dillon, Montana facility. The manufacturing facilities included in our USA segment have proprietary processing equipment and process patented technology for the stabilization and further processing of rice bran into finished products.

At our HN facility in Irving Texas, we formulate, blend and package finished products on a customized basis for our customers. We also lease a facility in West Sacramento, California that houses a laboratory, warehouse and facility for assembling RBT proprietary extruders for stabilizing raw rice bran. In 2016, approximately 84% of USA segment revenue is from sales of food ingredient products and the remainder was from sales of animal nutrition products.

Brazil Segment

The Brazil segment consists of the consolidated operations of Nutra SA, whose only operating subsidiary is Irgovel, located in Pelotas, Brazil. Irgovel manufactures RBO and DRB products for both the food ingredient and animal nutrition markets in Brazil and internationally. In refining RBO to an edible grade, several co-products are obtained. One such product is distilled fatty acids, a valuable raw material for the detergent industry. Irgovel also produces rice lecithin, which has application in food ingredient products, animal nutrition and industrial applications. DRB is sold in bulk in the Brazilian market and internationally as an animal nutrition ingredient, and is sold as a raw material for further processing into food ingredient products. In 2016, approximately 58% of Brazil segment product revenue was from sales of RBO products and the remainder was from sales of DRB products.

Our Irgovel subsidiary is comprised of several facilities on approximately 19 acres in Pelotas, Brazil. These facilities include a plant for extraction of RBO from raw rice bran, RBO refining processes, compounded animal nutrition manufacturing, consumer RBO bottling, distilled fatty acid manufacture, lecithin manufacture, and support systems for the plant, including steam generation, maintenance, administrative offices and a quality assurance laboratory.

Our Products

Consistent with our mission to convert feed to food, our greatest opportunities are in the functional food, nutraceutical and food ingredient markets.

Premium natural, organic and functional ingredient manufacturers are in high demand and we are strategically positioned to take advantage of this growing and sustainable market opportunity as discussed below in “Our Growth Strategy”.

Our ingredient products are primarily sold to consumer nutrition and healthcare companies, nutritional supplement retailers and direct sales companies. In August 2013, we entered into a multi-year agreement to sell certain of our Stage II products to a rapidly growing direct marketing company. Pursuant to that agreement, that company is obligated to purchase a minimum of \$7.7 million in products during the term of the agreement which expired in February 2017. We will seek additional long-term supply agreements with similar companies in the future.

Food and Functional Food Ingredients

Our SRB, DRB, RBO and derivatives are nutritional, functional and beneficial food products that contain a unique combination of oil, protein, carbohydrates, vitamins, minerals, fibers and antioxidants that enhance the nutritional value of popular consumer products. Foods that are ideally suited for the addition of our SRB and DRB to their products include processed meats, cereals, snacks, beverages, baked goods, breading and batters. The inclusion of DRB in breading and batters can result in a reduction in oil uptake, higher moisture retention, improved nutritional profiles, and reduced costs.

In 2008, we received U. S. Department of Agriculture (“USDA”) Food Safety and Inspection Service (“FSIS”) approval to market rice bran as an ingredient to be used as a filler in comminuted meat products, such as meat and poultry sausages that contain binders, nugget-shaped patties, meatballs, meatloaf and meat and poultry patties. Our products replace functional ingredients like soy protein isolate, soy protein concentrate, modified food starch, pea protein and mustard flour at a significantly reduced cost. With strong application benefits such as reduced cost per unit, increased product yield and reduced purge, we believe our SRB has a significant market opportunity in the comminuted meat market both inside and outside of the United States.

Index

Animal Nutrition

Our SRB and DRB products are marketed as feed ingredients in the United States and international animal nutrition markets, and we will continue to pursue high margin sales opportunities in those markets. SRB and DRB are used as equine feed ingredients and have been shown to provide health benefits. Show and performance horses represent the premium end of the equine market and are a key target for our animal nutrition products. In our Brazil segment, we also sell DRB as an ingredient for inclusion in a variety of feed formulations targeted to animal species such as horses, beef cattle, dairy cows, pigs, sheep and poultry.

About Rice Bran

Rice is the staple food for over half of the world's population and is the staple food source for several of the world's most populous countries. Asia accounts for roughly 90% of global rice production and China is the world's number one rice producer. Globally, Brazil and the United States rank 9th and 11th, respectively, in production of rice, with each country producing approximately 2% of the global total.

When harvested from the field, individual rice kernels are stored in common receiving locations such as farm silos for future delivery to grain dryers or area rice mills. At this stage, large quantities of individual rice kernels are collectively called "paddy rice," or "rough" rice. In this form, the rice kernel is fully enveloped by the rice hull, which serves as a protective cover, shielding the inner rice kernel from damage.

After storage and drying, if necessary, paddy rice is cleaned of foreign material (scalping, de-stoning and aspiration) just before it enters the first stage of milling, or paddy husking. In the paddy husker, the hull is removed from rough rice by differential speed rubber rollers. Loosened hulls are carried off by aspiration. After husking, a paddy separator uses a reciprocating motion to separate normal brown rice kernels (caryopsis) from unhusked kernels which are returned to the paddy husker.

In the second stage of milling, the outer brown layers of bran are removed from the inner white starch endosperm by an abrasive or frictional milling process which produces a milled, white rice kernel. After milling, white rice is typically sorted by size to remove broken pieces of rice kernels from whole kernels, as well as color sorting to remove discolored kernels. Additional stages may be required (per customer specifications) to polish the white rice to a smooth surface.

Raw rice bran collected from the milling process is composed of rice germ and several sub-layers (pericarp, testa, nucellus and aleurone) surrounding the white starchy endosperm. Commercial rice bran makes up approximately 10% of rough rice by weight. Rice germ, an especially nutrient rich material, makes up approximately 10% of commercial rice bran by weight.

As brown rice is milled into white rice, the oils present in raw rice bran come into contact with native lipase enzymes that are naturally present in the rice kernel. These lipase enzymes initiate a rapid enzymatic hydrolysis of the oil, converting oils (triglycerides) into monoglycerides, diglycerides and free fatty acids ("FFA"). As the FFA content builds in raw rice bran, the bran becomes unpalatable and off flavors (rancidity) develop. If left unchecked, enzymatic degradation at normal room temperatures can increase the FFA levels to 5-8% within 24 hours and can continue at a rate of approximately 4-5% per day thereafter. Enzymatic degradation is the most serious form of degradation of raw rice bran. Rice bran stabilization is the process of carefully deactivating native enzymes to prevent the increase of FFA otherwise caused by lipase enzyme activity. Proper stabilization is critical in the preservation of the nutritional value of the bran, an important nutrient source that is largely used as animal feed or otherwise wasted.

Historically there have been a number of attempts to develop rice bran stabilization techniques, including the use of chemicals, microwave heating or variations of existing extrusion technology. Many of these approaches have had

limited success in part because they have produced rice bran with limited shelf life or with significant degradation of nutrients.

Our Technologies

Our Proprietary Rice Bran Stabilization Technology

Our stabilization process uses proprietary innovations to create a combination of temperature, pressure and other conditions necessary to thoroughly deactivate enzymes without significantly damaging the structure or nutrient content of raw rice bran. This means that higher value compounds in bran, such as oils, proteins and phytonutrients are left undamaged and are available for utilization. Our process does not use chemicals to stabilize raw rice bran.

6

Index

Our stabilizers are designed to be installed adjacent to, on the premises of or in near proximity to any conventional rice mill so that freshly milled raw rice bran can be quickly delivered to our proprietary stabilizers. Process logic controllers maintain exact process conditions within the prescribed pressure/temperature regime. In case of power failure or interruption of the flow of fresh bran into the system, the electronic control system is designed to purge the equipment of materials in process and resume production only after proper operating conditions are re-established.

SRB leaving our system is then discharged onto cooling units specifically designed to control air pressure and humidity. Cooled SRB can be loaded into bulk hopper trucks for large volume customers or sent by pneumatic conveyor to a bagging unit for packaging into 50 pound bags or 2,000 pound sacks.

Each stabilization module can process approximately 2,000 pounds of bran per hour and has a capacity of over 7,200 tons per year. Stabilization production capacity can be doubled, tripled or further multiplied by installing additional units sharing a common conveyor and stage system, which we believe can handle the output of the world's largest rice mills. We have also developed and tested a smaller production unit, with a maximum production capacity of 840 tons per year, for installation in countries or locations where rice mills are substantially smaller than those in the United States.

Additional patented and proprietary processes involve enzyme treatment of SRB or DRB to produce fractions enriched in one or more macronutrients, including proteins, fibers, lipids and micronutrients such as vitamins, minerals and phytosterols, among others. In these processes SRB or DRB, in an aqueous slurry, is treated with one or more enzymes, centrifugally separated and the fractions dried on drum driers, spray driers or other drying systems.

Our Stabilization Process

Rice bran is free of all major allergens and is a valuable source of protein with a balanced amino acid profile for food ingredient products and is rich in healthy oil, vitamins, antioxidants, dietary fiber and other nutrients. The approximate composition and caloric content of our SRB is as follows:

Fat (oil)	18-23%
Protein	12-16%
Total Dietary Fiber	20-30%
Moisture	4-8%
Ash	6-14%
Calories	3.2 kcal/gram

Rice bran contains approximately 18-23% oil, which has a favorable fatty acid composition and excellent heat stability. Rice bran oil contains essential fatty acids and a broad range of nutraceutical compounds that have been demonstrated to have therapeutic properties.

The process begins when raw rice bran is obtained from a number of rice mills and transported to a facility within which it is first stabilized via extrusion and then solvent-extracted to produce crude RBO and DRB. Crude RBO is subsequently processed in a number of steps designed to sequentially capture constituents of value and to remove and discard impurities. The final outcome of these steps is a highly refined, edible RBO that has superior flavor and functional properties. In addition, the various co-products of crude RBO processing, distilled fatty acids for example, are refined and sold as products in their own right. DRB is finely ground and packaged for use as a versatile food ingredient in many applications. DRB may also be compounded with other ingredients such as vegetable proteins, carbohydrates, vitamin premixes and minerals to produce an array of nutritionally targeted animal feeds for various species. The DRB can also be further processed to extract and concentrate protein and dietary fiber. Our process and related technologies are being continuously improved and optimized as we examine the technical and commercial

feasibility of producing additional products derived from both RBO and DRB.

DRB contains many of the same nutritional and functional benefits as SRB, except that the oil has been removed. This is important for several ingredient applications where SRB's oil content could present food formulation challenges. By removing oil from SRB, nutritionists have greater options to formulate DRB into breakfast bars, low-calorie foods, low-fat baking applications and batter and breading for frying applications. Additionally, DRB is ideally suited for downstream enzymatic processing, transforming DRB into an ideal feedstock for protein and fiber concentrates.

RBO as extracted from stabilized rice bran can be utilized in a variety of edible and industrial oil applications. With proper processing, RBO becomes high quality cooking oil possessing beneficial high temperature frying characteristics. RBO has a unique fatty acid content that imparts improved oxidative stability as compared to other vegetable oils such as soy or cottonseed giving it advantages when used in food applications. The RBO extraction process utilized at our Brazilian facility uses a conventional solvent extraction process to separate oil from raw bran, resulting in crude RBO available for sale to industrial markets or other processors. Additional refining processes done in Brazil can involve degumming, neutralization, bleaching, de-waxing and deodorizing.

Index

Intellectual Property

We hold eight U.S. patents relating to the production or use of rice bran and rice bran derivatives. In addition to the issued U.S. patents, we have been issued fourteen foreign patents covering the subject areas. We intend to apply for additional patents in the future as new products, treatments and uses are developed.

Our stabilization and processing activities are an adaptation and refinement of standard food processing technology applied to rice bran. We have chosen to treat certain of our methods and processes as a trade secret and not to pursue process or process equipment patents on the original processes. However, as we develop improvements we intend to periodically review whether we should seek patent protection for them. We believe that certain unique products, and their biological effects, resulting from our SRB may be patentable in the future. We also hold a number of U.S. registered trademarks and trade names and have applied for additional marks.

From 2011 to March 2013, we engaged in a joint research project with DSM Innovation Center, a subsidiary of Royal DSM N.V., to develop methods for extracting and concentrating high quality vegetable protein from rice bran. Combined spending on research and development related to that project totaled \$3.0 million. In March 2013, we announced the development of an improved fiber protein product and a separate water soluble rice bran protein product which have been commercialized under the ProRyza mark. We will continue to support internal as well as external R&D efforts that improve on existing technologies or lead to the development of new technologies relating to rice bran processing and applications.

Our Growth Strategy

We experienced significant changes in the constitution of our Board of Directors (the “Board”) and senior management team in 2016. During the summer of 2016, the Company was involved in a proxy contest with LF-RB Management (“LF-RB”). LF-RB believed that Board and management changes were necessary to maximize shareholder value, which included the implementation of a turnaround and growth plan. The proxy contest resulted in major changes to the Board, the appointment of Dr. Robert Smith, our COO at the time, as interim CEO, and the hiring of Michael Goose, a new products innovator with significant consumer packaged goods experience, as President of Sales and Marketing. The new management team, working closely with the Board, developed a turnaround and growth plan to improve our financial condition, expand our markets and business, improve our profitability and maximize shareholder value. The following company actions represent a summary of our growth strategy:

1. Establishment of a consolidation plan for the USA Segment that will improve operational efficiencies and result in cost savings: We have developed a focused plan that provides clear market targets for driving revenue growth in food and animal nutrition ingredients and reflecting our focus on driving better returns on capital and for shareholders. The first phase of our strategic initiatives will be the streamlining of our operations through consolidation to better position RiceBran as a reliable world-class supplier of ingredients. We believe we can obtain significant cost reductions and improved efficiencies by consolidating our operations into fewer locations. We are actively engaged in locating a site in California, in the heart of rice growing territory where much of our bran supply is obtained. We are relocating our corporate office to Sacramento on April 1, 2017, and plan to secure and relocate most of our corporate operations in late 2017. Apart from being the heart of the rice growing region of California, the Sacramento Valley offers a number of benefits that will help us become the leader in our field while at the same time being more responsive to our customers and reducing the risk in bran supplies. These benefits include: i) proximity to major rice mills that we are in discussions with to secure additional bran; ii) proximity to our existing base of west-coast customers for both food and animal nutrition ingredients; iii) access to world-class scientists and technologies at University of California-Davis in areas of rice agriculture and processing, food and beverage innovation and animal nutrition. This agricultural and technology hub in the Sacramento Valley generates and supports a strong and well-prepared workforce that will benefit us as we grow our business. As we consolidate much of our management, operations, warehousing and distribution into a centralized location, we will realize

significant cost savings and improved operational efficiencies. These changes will also support our continued commitment to achieving the highest standards of food quality and safety.

We will continue to operate in the mid-south region in Louisiana and further our discussions with mill operators in that region to secure additional supplies of bran. This will help us to achieve continued growth in our animal nutrition business and enable us to prepare for supplying food grade rice bran ingredients from the mid-south to our midwest and east coast customers in the future.

Our plan will require some added investment, but much of this will be mitigated by significant cost reductions that we have already begun to implement, better operating leverage of new operations, improved efficiencies through consolidation of our operations, as well as capital realized from the divestiture of non-core assets and business activities. We may also explore opportunities for key industry participants to become strategic investors in the business. We will take every step possible to maximize company and investor returns by implementing plans that seek strong corporate returns on our investments. In Brazil, we remain committed to our strategy of minimizing the financial impact of our Irgovel operations while exploring strategic alternatives.

Index

Marketing our rice bran ingredients to major food companies that are striving to meet the needs of today's and tomorrow's demanding consumer: The global and domestic markets are strong and rapidly expanding for minimally processed plant-based ingredients that provide dense and balanced nutrition in addition to evidence-based functionalities while also being free of all major allergens and being non-GMO. The regulatory requirements to add front-of-label warnings on food items and increasing demand from consumers for foods that list fewer and less processed ingredients is driving food companies to replace standard food ingredients with cleaner ingredients, such as stabilized rice bran. We anticipate further incorporation of our food ingredients by major consumer packaged goods food companies as more food companies adopt rice bran as a standard clean label food ingredient. This trend is not limited to food ingredients, as we are finding similar transition to clean ingredients among high-end animal nutrition companies.

Our Customers

Both our USA and Brazil segments use internal sales staff, outside independent sales representatives and third party distributors to market our portfolio of products to customers domestically and internationally. In 2016, three customers accounted for 62% of USA segment revenues. In our Brazil segment, three customers accounted for 32% of segment revenues. In 2015, three customers accounted for 63% of USA segment revenues and three customers accounted for 40% of Brazil segment revenues. We continue to focus efforts on diversification of our customer base in an attempt to mitigate the concentration of customers.

Our Strategic Alliances

In February 2016, we entered into an exclusive supply and cooperation agreement with a Thailand-based entity ("Youji") granting us the exclusive worldwide, with certain exclusions, supply and distribution rights for their organic rice bran. In addition, as part of the agreement we have agreed to lease two of our proprietary stabilization extruders to Youji for stabilization purposes at one of their rice mills.

In 2013, we entered into a series of agreements with various affiliates of Wilmar International Limited (collectively "Wilmar"). In connection therewith, we sold a 50% membership interest in RBT PRO, LLC ("RBT PRO") to Wilmar. RBT PRO granted an exclusive, royalty free, perpetual sublicense of the license to use processes for deriving protein from rice bran to Wilmar for use throughout China and to us for use worldwide, excluding China. Any royalty revenue derived from that same license would be revenue of RBT PRO.

We also entered into a cross license agreement with Wilmar, and under the agreements, we obtained the right to purchase 45% of the capital stock of any entity Wilmar establishes to develop new products relating to rice bran or its derivatives, as defined in the agreement, using the intellectual property licensed to Wilmar. If we decline the right to purchase 45% of the capital stock of any such new entity, we have the option to purchase 25% of the entity within two years of the entity's formation. The exercise price for this option will equal 25% of the capital investment made in the entity, plus interest, as defined in the agreement.

Government Regulations

Our operations are subject to federal, foreign, state and local government laws and regulations, including those relating to zoning, workplace safety and accommodations for the disabled and our relationships with our employees are subject to regulations, including minimum wage requirements, anti-discrimination laws, overtime and working conditions and citizenship requirements.

In both our United States and foreign markets, we are affected by extensive laws, governmental regulations, administrative determinations, court decisions and similar constraints. Such laws, regulations and other constraints exist at the federal, state or local levels in the United States, and at all levels of government in foreign jurisdictions,

including regulations pertaining to the formulation, manufacturing, packaging, labeling, distribution, sale and storage of our products. In addition, we are subject to regulations regarding product claims and advertising.

USA Segment

The formulation, manufacturing, packaging, labeling, advertising, distribution and sale of our products are subject to regulation by one or more federal agencies, primarily the Food & Drug Administration (“FDA”), the Federal Trade Commission (“FTC”) and the USDA. Our activities are also regulated by various governmental agencies for the states and localities in which our products are manufactured and sold, as well as by governmental agencies in certain countries outside the United States, such as Brazil (discussed below), in which our products are manufactured and sold. Among other matters, regulation by the FDA and FTC is concerned with product safety and claims made with respect to a product’s ability to provide health-related benefits. Specifically, the FDA, under the Federal Food, Drug and Cosmetic Act (“FDCA”), regulates the formulation, manufacturing, packaging, labeling, distribution and sale of food and food ingredients. The FTC regulates the advertising of these products.

Index

Federal agencies, primarily the FDA and the FTC, have a variety of procedures and enforcement remedies available to them, including initiating investigations, issuing warning letters and cease-and-desist orders, requiring corrective labeling or advertising, requiring consumer redress such as requiring that a company offer to repurchase products previously sold, seeking injunctive relief or product seizures, imposing civil penalties or commencing criminal prosecution. In addition, certain state agencies have similar authority. These federal and state agencies have in the past used these remedies in regulating participants in the food and food ingredient industries, including the imposition of civil penalties.

The FDA Food Safety Modernization Act (“FSMA”), enacted January 4, 2011, amended the FDCA to significantly enhance the FDA’s authority over various aspects of food regulation. The FSMA granted the FDA mandatory recall authority when the FDA determines there is a reasonable probability that a food is adulterated or misbranded and that the use of, or exposure to, the food will cause serious adverse health consequences or death to humans or animals. One of the FSMA’s more significant changes is the requirement of hazard analysis and risk-based preventive controls (“HARPC”) for all food facilities required to register with the FDA.

Any substance that is intentionally added to food is a food additive and is subject to premarket review and approval by the FDA, unless the substance is generally recognized, among qualified experts, as having been adequately shown to be safe under the conditions of its intended use, or unless the use of the substance is otherwise excluded from the definition of a food additive. When an additive is proposed for use in a meat, its safety, technical function and conditions of use must also be evaluated by the USDA. Because the USDA retains jurisdiction over meat products and food ingredients intended for use in meats, the use of our SRB and DRB meat enhancers is regulated by this agency. Both SRB and DRB have USDA approval for use in meat products.

Animal feed ingredients are regulated by the FDA at the federal level and by the individual states. Our SRB is defined for animal use as heat stabilized rice bran for use as a feed ingredient.

Brazil Segment

The Brazilian Ministry of Agriculture, Livestock and Food Supply (“MAPA”), one of the Federal administrative bodies, is the primary regulator of agricultural products in Brazil, and its main activity is the management of public policies to encourage agriculture, the promotion of agribusiness and the regulation and standardization of services related to the sector. Amongst other activities, MAPA is responsible for the regulation and control of pharmaceuticals, biological products and medicated feed additives for animal use. MAPA is organized into departments, each one responsible for different sectors of the nation’s agribusiness. Amongst these departments, the Secretary of Agricultural Defense (“SDA”) is responsible for implementing the actions of the State which aims at the prevention, control and eradication of animal diseases and plant pests. The SDA also contributes to the formulation of the national agricultural policy by planning, regulating, coordinating and supervising the activities of agricultural defense throughout the country, being responsible for the coordination of the Department of Inspection of Livestock Products. In order to fulfill its mission, the SDA provides central management and regulatory bodies as well as projections within the states for the implementation and coordination of those activities for which it is responsible. Furthermore, ANVISA, a regulatory agency which operates in all those sectors related to products and services that affect the health of the population, and with expertise that covers both sanitary regulation and the economic regulation of the market, contributes to the enforcement of most of the regulations regarding processed food products, including vegetable oils, fats and vegetable creams.

Our Competition

There are a number of companies that have invested significant resources to develop technologies for stabilizing and further processing rice bran and who market rice bran products with varying levels of stabilization into multiple markets around the world. We believe that we have best of breed technologies for stabilizing rice bran and, as such,

have developed significant brand recognition in the animal feed and food ingredient product sectors both domestically and internationally. Together with our decades of application technology know-how and patented processing methods, we believe that we have a first-to-market advantage over the competition with respect to our SRB products.

We are aware of several new producers of rice-based animal nutrition and food ingredient products in the United States, Europe and Asia. We believe that our major nutritional supplement competitors include producers of isolated soy protein, wheat bran and oat bran, particularly in the functional food ingredients market segment.

We compete with other companies that offer products incorporating SRB as well as companies that offer other food ingredients and nutritional supplements. We also face competition from companies providing products that use oat bran and wheat bran as nutritional supplements as well as for health and beauty aids. Many consumers may consider such products to be a replacement for the products we manufacture and distribute.

Index

We also compete in the world's edible oil market. Our competition for exports of rice bran oil resides primarily in Southeast Asia. Our branded rice bran oil "Carreteiro" competes with other bottled oils such as soy, palm, canola, peanut and others in the Brazilian retail market. In addition, our exported rice bran oil competes with those same oils from other grains, seeds and plants in markets around the world.

Our Employees

As of December 31, 2016, the USA and Corporate segments had 75 employees located in the United States and the Brazil segment had 152 employees. Our employee count may change periodically. From year to year we experience normal variable labor fluctuation at our production facilities. We believe relations with our employees are good. None of our U.S. based employees are covered by collective bargaining agreements. All of the employees at our Irgovel facility in Brazil are represented by a labor union and are covered by a collective bargaining agreement.

Available Information

We maintain an Internet website at the following address: www.ricebrantech.com. We make available on or through our Internet website certain reports and amendments to those reports that we file with the Securities and Exchange Commission ("SEC") in accordance with the Securities Exchange Act of 1934 ("Exchange Act"). These include our annual reports on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K and the reports of beneficial ownership. We make this information available on our website free of charge as soon as reasonably practicable after we electronically file the information with, or furnish it to, the SEC. The contents of our website are not incorporated by reference in this report on Form 10-K and shall not be deemed "filed" under the Exchange Act.

ITEM 1A. RISK FACTORS

Our operations and financial results are subject to various risks and uncertainties, including those described below, which could adversely affect our business, financial condition, results of operations, cash flows and the trading price of our common stock. Investors or potential investors in our stock should carefully consider the risks described below.

RISK FACTORS

Risks Relating to Our Business

We have not yet achieved annual positive cash flows.

Our net cash used in operating activities was \$3.9 million in 2016 and \$3.8 million in 2015. We may not be able to achieve revenue growth, profitability or positive cash flow, on either a quarterly or annual basis, and that profitability, if achieved, may not be sustained. If we are unable to achieve or sustain profitability, we may not be financially viable in the future and may have to curtail, suspend, or cease operations, restructure existing operations to attempt to ensure future viability, or pursue other alternatives such as re-filing for bankruptcy, pursuing dissolution and liquidation, seeking to merge with another company, selling all or substantially all of our assets or raising additional capital through equity or debt financings. Because of our recurring losses and negative cash flows from operations, the audit report of our independent registered public accountants on our consolidated financial statements contains an explanatory paragraph stating that there is substantial doubt about our ability to continue as a going concern.

We have generated significant losses since our inception in 2000, and losses in the future could cause the trading price of our stock to decline or have a material adverse effect on our financial condition, our ability to pay our debts as they become due and on our cash flows.

Since we began operations in February 2000, we have incurred an accumulated deficit in excess of \$260 million. We may not be able to achieve or maintain profitable operations if achieved. If our losses continue, our liquidity may continue to be severely impaired, our stock price may fall and our shareholders may lose all or a significant portion of their investment. If we are not able to attain profitability in the near future our financial condition could deteriorate further which could have a material adverse impact on our business and prospects and result in a significant or complete loss of shareholder investment. Further, we may be unable to pay our debt obligations as they become due, which include obligations to secured creditors.

Index

We may need to raise additional funds through debt or equity financings in the future to achieve our business objectives and to satisfy our cash obligations, which would dilute the ownership of our existing shareholders and possibly subordinate certain of their rights to the rights of new investors.

We may need to raise additional funds through debt or equity financings in order to complete our ultimate business objectives. We also may choose to raise additional funds in debt or equity financings if they are available to us on reasonable terms to increase our working capital, strengthen our financial position or to make acquisitions. Our board of directors has the ability, without seeking shareholder approval, to issue convertible debt and additional shares of common stock or preferred stock that is convertible into common stock for such consideration as the board of directors may consider sufficient, which may be at a discount to the market price. Any sales of additional equity or convertible debt securities would result in dilution of the equity interests of our existing shareholders, which could be substantial. Additionally, if we issue shares of preferred stock or convertible debt to raise funds, the holders of those securities might be entitled to various preferential rights over the holders of our common stock, including repayment of their investment, and possibly additional amounts, before any payments could be made to holders of our common stock in connection with an acquisition of us. Such preferred shares, if authorized, might be granted rights and preferences that would be senior to, or otherwise adversely affect, the rights and the value of our common stock. Also, new investors may require that we and certain of our shareholders enter into voting arrangements that give them additional voting control or representation on our board of directors.

Any material weaknesses in our internal control over financing reporting in the future could adversely affect investor confidence, impair the value of our common stock and increase our cost of raising capital.

Any future failure to remedy deficiencies in our internal control over financial reporting that may be discovered or our failure to implement new or improved controls, or difficulties encountered in the implementation of such controls, could harm our operating results, cause us to fail to meet our reporting obligations or result in material misstatements in our financial statements. Any such failure could, in turn, affect the future ability of our management to certify that internal control over our financial reporting is effective. Inferior internal control over financial reporting could also subject us to the scrutiny of the SEC and other regulatory bodies which could cause investors to lose confidence in our reported financial information and could subject us to civil or criminal penalties or shareholder litigation, which could have an adverse effect on our results of operations and the trading price of our common stock.

In addition, if we or our independent registered public accounting firm identify deficiencies in our internal control over financial reporting, the disclosure of that fact, even if quickly remedied, could reduce the market's confidence in our financial statements and harm our share price. Furthermore, deficiencies could result in future non-compliance with Section 404 of the Sarbanes-Oxley Act of 2002. Such non-compliance could subject us to a variety of administrative sanctions, including review by the SEC or other regulatory authorities.

There are significant market risks associated with our business.

We have formulated our business plan and strategies based on certain assumptions regarding the size of the rice bran market, our anticipated share of this market, the estimated price and acceptance of our products and other factors. These assumptions are based on our best estimates; however, our assessments may not prove to be correct. Any future success may depend upon factors including changes in the dietary supplement industry, governmental regulation, increased levels of competition, including the entry of additional competitors and increased success by existing competitors, changes in general economic conditions, increases in operating costs including costs of rice bran, production, supplies, personnel, equipment and reduced margins caused by competitive pressures. Many of these factors are beyond our control.

The anticipated benefits of moving our corporate headquarters to California may not be realized, and difficulties in connection with moving corporate headquarters could have an adverse effect on us.

We intend to relocate our corporate headquarters from Scottsdale, Arizona to California sometime during the first half of 2017. We expect that some of our executive officers and other key decision makers will relocate to California. We may face significant challenges in relocating our principal executive office to a different state, including difficulties in retaining and attracting officers, key personnel and other employees and challenges in maintaining corporate headquarters in a state different from where other employees, including other executive officers, corporate support staff and manufacturing facilities, are located. Employees may be uncertain about their future roles within our organization as a result of the relocation. Management may also be required to devote substantial time to relocating our corporate headquarters and related matters, which could otherwise be devoted to focusing on ongoing business operations and other initiatives and opportunities. Any such difficulties could have an adverse effect on our business, results of operations or financial condition.

Index

We may face difficulties integrating businesses we acquire.

As part of our strategy, we may review opportunities to buy other businesses or technologies, such as the acquisition of HN that was completed in 2014, that would complement our current products, expand the breadth of our markets or enhance technical capabilities, or that may otherwise offer growth opportunities. Such acquisitions involve numerous risks, including, but not limited to:

- problems combining the purchased operations, technologies or products;
- unanticipated costs;
- diversion of management's attention from our core business;
- adverse effects on existing business relationships with suppliers and customers;
- risks associated with entering markets in which we have no or limited prior experience; and
- potential loss of key employees of purchased organizations.

We have significant foreign operations and there are inherent risks in operating overseas.

An important component of our business strategy is to build and operate rice bran stabilization and rice bran oil facilities in foreign countries and to market and sell our products internationally. For example, we have an operation in Brazil which manufactures rice bran oil. There are risks in operating facilities in foreign countries because, among other reasons, we may be unable to attract sufficient qualified personnel, intellectual property rights may not be enforced as we expect and legal rights may not be available as contemplated. Should any of these risks occur, our ability to expand our foreign operations may be materially limited and we may be unable to maximize the output from these facilities and our financial results may decrease from our anticipated levels. The inherent risks of international operations could materially adversely affect our business, financial condition and results of operations. The types of risks faced in connection with international operations and sales include, among others:

- cultural differences in the conduct of business;
- fluctuations in foreign exchange rates;
- greater difficulty in accounts receivable collection and longer collection periods;
- challenges in obtaining and maintaining financing;
- impact of recessions in economies outside of the United States;
- reduced or obtainable protection for intellectual property rights in some countries;
- unexpected changes in governmental regulation or taxation;
- tariffs and other trade barriers;
- political conditions in each country;
- management and operation of an enterprise spread over various countries;
- seasonal reductions in business activity in some parts of the world;
- the burden and administrative costs of complying with a wide variety of foreign laws; and
- currency restrictions.

Brazilian economic, political and other conditions, and Brazilian government policies or actions in response to these conditions, may negatively affect our business and results of operations.

The Brazilian economy has historically been characterized by interventions by the Brazilian government and unstable economic cycles. The Brazilian government has often changed monetary, taxation, credit, tariff and other policies to influence the course of Brazil's economy. For example, the government's actions to control inflation have at times involved setting wage and price controls, blocking access to bank accounts, imposing exchange controls and limiting imports into Brazil. In addition, periodically there are disruptions related to national transportation strikes, like those occurring in February 2015, which may limit Irgovel's ability to receive raw rice bran and ship products to customers. We have no control over, and cannot predict, what policies or actions the Brazilian government may take in the future.

Our Brazilian segment's business, results of operations, financial condition and prospects may be adversely affected by, among others, the following factors:

- exchange rate movements;
- exchange control policies;
- expansion or contraction of the Brazilian economy, as measured by rates of growth in GDP;
- inflation;
- tax policies;
- other economic political, diplomatic and social developments in or affecting Brazil;
- interest rates;
- energy shortages;

Index

- liquidity of domestic capital and lending markets;
- changes in environmental regulation; and
- social and political instability.

Irgovel has certain financial and operating performance obligations which if not met may lead to us losing management control over Irgovel.

Under the terms of our agreements with the Investors, Irgovel must meet certain minimum annual processing targets and must achieve EBITDA in the local currency of at least R\$4.0 million. At the end of 2016, Irgovel did not meet this covenant but the Investors waived the requirement. If Irgovel fails to meet these financial requirements, we could lose management control over Irgovel's operations, and management control would transfer to the Investors. Any such change in management control would cause us to no longer consolidate Irgovel's financial results with our financial results. Instead, we would be required to account for Irgovel as an equity investment on our balance sheets which may negatively impact our share price.

Our business could be affected adversely by labor disputes, strikes or work stoppages in Brazil.

All of the employees at our Irgovel facility in Brazil are represented by a labor union and are covered by a collective bargaining agreement. As a result, we are subject to the risk of labor disputes, strikes, work stoppages and other labor-relations matters. Our collective bargaining agreement in Brazil has a one-year term and requires that we provide wage adjustments each year. We may be unable to negotiate new collective bargaining agreements on similar or more favorable terms and may experience work stoppages or other labor problems in the future. We could experience a disruption of our operations or higher ongoing labor costs, which could have a material adverse effect on our operating results and financial condition, potentially resulting in cancelled orders by customers, unanticipated inventory accumulation or shortages and reduced revenues and net income.

Fluctuations in foreign currency exchange could adversely affect our financial results.

We earn revenues, pay expenses, own assets and incur liabilities in countries using currencies other than the U.S. Dollar, including primarily the Brazilian Real. Currently, a significant portion of our revenues and expenses occur in our Brazilian subsidiary, Irgovel. Because our consolidated financial statements are presented in U.S. Dollars, we must translate revenues and expenses, as well as assets and liabilities, into U.S. Dollars at exchange rates in effect historically, during or at the end of each reporting period. Therefore, increases or decreases in the value of the U.S. Dollar against the Brazilian Real and any other currency which affects a material amount of our operations, will affect our revenues, cost of sales, gross profit (loss), operating expenses, or other income and expenses and the value of balance sheet items denominated in foreign currencies. These fluctuations may have a material adverse effect on our financial results. Disruptions in financial markets may result in significant changes in foreign exchange rates in relatively short periods of time which further increases the risk of an adverse currency effect. We do not hedge our currency risk, and do not expect to, as currency hedges are expensive and do not necessarily reduce the risk of currency fluctuations over longer periods of time.

We depend on a limited number of customers and their ability to meet their obligations.

In the USA segment, in 2016, three customers accounted for 62% of segment revenues and the top ten customers accounted for 78% of segment revenues. As of December 31, 2016, the customers with the highest ten balances in the USA segment accounted for 73% of segment accounts receivable.

In the Brazil segment, in 2016, three customers accounted for 32% of segment revenues and the top ten customers accounted for 56% of segment revenues. As of December 31, 2016, the customers with the highest ten balances accounted for 60% of Brazil segment accounts receivable.

We are dependent upon the continued growth, viability and financial stability of our customers. We expect to continue to depend upon a relatively small number of customers for a significant percentage of our revenues. Consolidation among our customers may further reduce the number of customers that generate a significant percentage of our revenues. This results in a concentration of credit risk with respect to our outstanding accounts receivable. We consider the financial strength of the customer, the remoteness of the possible risk that a default event will occur, the potential benefits to our future growth and development, possible actions to reduce the likelihood of a default event and the benefits from the transaction before entering into a large credit limit for a customer. Although we analyze these factors, the ultimate collection of the obligation from the customer may not occur. Although we continue to expand our customer base in an attempt to mitigate the concentration of credit risk, the writing off of an accounts receivable balance could have an adverse effect on our results of operations. Financial instruments that potentially subject us to concentration of credit risk consist primarily of cash and cash equivalents and trade receivables. Historically, we have not experienced any loss of our cash and cash equivalents, but we have experienced losses to our trade receivables. A significant reduction in sales to any of our significant customers could have a material adverse effect on our results of operations.

Index

We may encounter difficulties in maintaining relationships with distributors and customers while enforcing our credit policies.

We define credit risk as the risk of loss from obligors or counterparty default. Our credit risks arise from both distributors and consumers. Many of these risks and uncertainties are beyond our control. Our ability to forecast future trends and spot shifts in consumer patterns or behavior even before they occur are vital for success in today's economy. In managing risk, our objective is to protect our profitability, but also to protect, to the extent we can, our ongoing relationships with our distributors and customers. However, as part of our credit risk policies, we occasionally must, among other things, cancel, reduce credit limits and place cash only requirements for certain questionable accounts. These credit risk policies may negatively impact our relationships with our distributors and customers, which could adversely affect our results of operations.

We rely upon a limited number of product offerings.

The majority of the products that we have sold through December 31, 2016, have been based on SRB produced at our U.S. facilities and RBO extracted at Irgovel. A decline in the market demand for our SRB and RBO products or the products of other companies utilizing our SRB and RBO products would have a significant adverse impact on us.

Our ability to generate sales is dependent upon our ability to continue our ongoing marketing efforts to raise awareness of our products and benefits of rice bran products generally.

We are dependent on our ability to market products to animal food producers, food manufacturers, mass merchandisers, health food retailers and to other companies for use in their products. We must increase the level of awareness of functional foods in general and our products in particular. We will be required to devote substantial management and financial resources to these marketing and advertising efforts and such efforts may not be successful.

Our ability to adapt to sudden increases in demand of our product is limited by an adequate supply of raw rice bran and our ability to find additional facilities for production.

Many of our current products depend on our proprietary technology using raw rice bran, which is a by-product from milling paddy rice to white rice. Our ability to manufacture SRB is currently limited to the production capability of our equipment located at our two suppliers' rice mills in California and our own plant located adjacent to our supplier in Mermentau, Louisiana. At the facilities and our value-added product plants in Dillon, Montana and our facility in Pelotas, Brazil, we currently are capable of producing enough finished products to meet current demand. If demand for our products were to increase dramatically in the future, we would need additional production capacity which may take time and may expose us to additional long term operating costs.

We may not be able to continue to secure adequate sources of raw rice bran to meet our future demand. Since rice bran has a limited shelf life, the supply of rice bran is affected by the amount of rice planted and harvested each year.

Adverse economic or weather conditions may impact our supply of raw rice bran.

If economic or weather conditions, for example the recent drought conditions in California, adversely affect the amount of rice planted or harvested, the cost of rice bran products that we use may increase. We are not always able to immediately pass cost increases to our customers and any increase in the cost of SRB products could have an adverse effect on our results of operations.

We face competition from other companies that produce bran, grains and other alternative ingredients with similar benefits as our rice brans.

Competition in our targeted industries, including nutraceuticals, functional food ingredients, rice bran oils, animal feed supplements and companion pet food ingredients is vigorous, with a large number of businesses engaged in the various industries. Many of our competitors have established reputations for successfully developing and marketing their products, including products that incorporate bran from other cereal grains and other alternative ingredients that are widely recognized as providing similar benefits as rice bran. In addition, many of our competitors have greater financial, managerial and technical resources than we do. If we are not successful in competing in these markets, we may not be able to attain our business objectives.

We must comply with our contractual obligations.

We have numerous ongoing contractual obligations under various purchase, sale, supply, production and other agreements which govern our business operations. We also have contractual obligations which require ongoing payments such as various debt agreements and lease obligations and the agreement of Irgovel to pay tax obligations to the Brazilian government. While we seek to comply at all times with these obligations, we may not be able to comply with the terms of all contracts during all periods of time, especially if there are significant changes in market conditions or our financial condition. If we are unable to comply with our material contractual obligations, there likely would be a material adverse effect on our financial condition and results of operations.

Index

We are affected by extensive laws, governmental regulations, administrative determinations, court decisions and similar constraints both domestically and abroad and our failure to comply with these laws, regulations and constraints could lead to the imposition of significant penalties or claims, which could harm our financial condition and operating results.

In both the U.S. and foreign markets, the formulation, manufacturing, packaging, labeling, distribution, sale and storage of our products are affected by extensive laws, governmental regulations, administrative determinations, court decisions and similar constraints. Such laws, regulations and other constraints may exist at the federal, state or local levels in the United States and at all levels of government in foreign jurisdictions. The dietary supplement and cosmetic industries are subject to considerable government regulation, both as to efficacy as well as labeling and advertising. We are subject to regulation by one or more federal agencies including the U.S. Food and Drug Administration, the U.S. Federal Trade Commission and the U.S. Department of Agriculture, state and local authorities and foreign governmental agencies including the Brazilian National Health Surveillance Agency. In addition, the adoption of new regulations or changes in the interpretations of existing regulations may result in significant compliance costs or discontinuation of product sales and may negatively impact the marketing of our products, resulting in significant loss of sales revenues. Our failure to comply with these current and new regulations could lead to the imposition of significant penalties or claims, limit the production or marketing of any non-compliant products or advertising and could negatively impact our business.

We may be subject to product liability claims and product recalls.

We sell food and nutritional products for animal and human consumption, which involves risks such as product contamination or spoilage, product tampering and other adulteration of food products. We may be subject to liability if the consumption of any of our products causes injury, illness or death. We maintain a product liability policy for \$5.0 million per year in the aggregate. In addition, we may voluntarily recall products in the event of contamination or damage. A significant product liability judgment or a widespread product recall may cause a material adverse effect on our financial condition. Even if a product liability claim is unsuccessful, there may be negative publicity surrounding any assertion that our products caused illness or injury which could adversely affect our reputation with existing and potential customers.

Many of the risks of our business have only limited insurance coverage and many of our business risks are uninsurable.

Our business operations are subject to potential product liability, environmental, fire, employee, manufacturing, shipping and other risks. Although we have insurance to cover some of these risks, the amount of this insurance is limited and includes numerous exceptions and limitations to coverage. In the event we were to suffer a significant uninsured claim, our financial condition would be materially and adversely affected.

Our success depends in part on our ability to obtain, enforce and protect our patents, licenses and other intellectual property rights for our products and technology.

Our success is dependent upon our ability to protect and enforce the patents, trade secrets and trademarks that we have and to develop and obtain new patents and trademarks for future processes, machinery, compounds and products that we develop. The process of seeking patent protection may be long and expensive, and patents might not be issued or not be broad enough in scope. We may not be able to protect our technology adequately, and our competition may be able to develop similar technology that does not infringe or encroach upon any of our rights.

There currently are no claims or lawsuits pending or threatened against us regarding possible infringement claims, but infringement claims by third parties, or claims for indemnification resulting from infringement claims, could be asserted in the future or that such assertions, if proven to be accurate, could have a material adverse effect on our

business, financial condition and results of operations. In the future, litigation may be necessary to enforce our patents, to protect our trade secrets or know-how or to defend against claimed infringement of the rights of others and to determine the scope and validity of the proprietary rights of others. Any litigation could result in substantial cost and diversion of our efforts and other resources, which could have a material adverse effect on our financial condition and results of operations. Adverse determinations in any litigation could result in the loss of our proprietary rights, subjecting us to significant liabilities to third parties, require us to seek licenses from third parties or prevent us from manufacturing or selling our systems, any of which could have a material adverse effect on our financial condition and results of operations. A license under a third party's intellectual property rights might not be available to us on reasonable terms, if at all.

Index

We are dependent on key employees.

Our success depends upon the efforts of our top management team and certain other key employees, including the efforts of our chief executive officer, chief financial officer and president of USA ingredients. Although we have written employment agreements with these employees, such individuals could die, become disabled or resign. In addition, our success is dependent upon our ability to attract and retain key management persons for positions relating to the marketing and distribution of our products. We may not be able to recruit and employ such executives at times and on terms acceptable to us. Also, volatility, lack of positive performance in our stock price and changes in our overall compensation program, including our equity incentive program, may adversely affect our ability to retain such key employees.

Compliance with corporate governance and public disclosure regulations may result in additional expenses.

In order to comply with laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, and other regulations issued by the SEC, such as Dodd-Frank, we may need to invest substantial resources to comply with these evolving standards, and this investment would result in increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities.

Our officers and directors have limited liability and have indemnification rights.

Our articles of incorporation and bylaws provide that we may indemnify our officers and directors against losses sustained or liabilities incurred which arise from any transaction in that officer's or director's respective managerial capacity, unless that officer or director violates a duty of loyalty, did not act in good faith, engaged in intentional misconduct or knowingly violated the law, approved an improper dividend, or derived an improper benefit from the transaction.

Risks Relating to Our Stock

Our stock price is volatile.

The market price of our common stock has fluctuated significantly in the past and may continue to fluctuate significantly in the future. The market price of the common stock may continue to fluctuate in response to a number of factors, including:

- fluctuations in our quarterly or annual operating results;
- developments in our relationships with customers and suppliers;
- our ability to obtain financing;
- announcements of new products or product enhancements by us or our competitors;
- announcements of technological innovations or new systems or enhancements used by us or our competitors;
- the loss of services of one or more of our executive officers or other key employees;
- developments in our or our competitors' intellectual property rights;
- adverse effects to our operating results due to impairment of goodwill;
- failure to meet the expectation of securities analysts' or the public;
- general economic and market conditions;
- our ability to expand our operations, domestically and internationally;
- the amount and timing of expenditures related to any expansion;
- litigation involving us, our industry or both;
- actual or anticipated changes in expectations by investors or analysts regarding our performance; and
- price and volume fluctuations in the overall stock market from time to time.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Our stock price is volatile and we have been the target of shareholder litigation. Any shareholder litigation brought against us in the future could result in substantial costs and divert our management's attention and resources from our business.

We have significant "equity overhang" which could adversely affect the market price of our common stock and impair our ability to raise additional capital through the sale of equity securities.

As of March 17, 2017, we had 10,899,047 shares of common stock outstanding (including 256,839 shares of unvested restricted stock), 23,727,938 shares of our common stock were issuable upon exercise of our outstanding stock options and warrants and 3,897,983 shares of common stock were issuable upon conversion of preferred stock. Additionally, an unknown number of shares of common stock may be issued if the minority owners of Nutra SA exercise their option to exchange units in Nutra SA for shares of our common stock. The possibility that substantial amounts of our common stock may be sold by investors or the perception that such sales could occur, often called "equity overhang," could adversely affect the market price of our common stock and could impair our ability to raise additional capital through the sale of equity securities in the future. The issuance of the additional shares upon an increase in our authorized shares of common stock would significantly increase the amount of our common stock outstanding and the amount of the equity overhang.

Index

The impacts of anti-dilution provisions in certain warrants may dilute current shareholders.

As of March 17, 2017, we had 2,327,919 shares of common stock issuable upon exercise of two outstanding warrants that contain anti-dilution provisions, with a current exercise price of \$0.96 per share. These anti-dilution provisions cause the exercise prices and conversion prices of the warrants to decrease automatically if we issue shares of our common stock or securities convertible into shares of our common stock at prices below the exercise price of these warrants. As of March 17, 2017, we also had 300,000 shares of common stock issuable upon exercise of an outstanding warrant that contains a most favored nations anti-dilution provision, with a current exercise price of \$1.60 per share. The most favored nations anti-dilution provision in this warrant provides that in the event of issuances of stock options and/or convertible instruments with anti-dilution provisions (providing for the adjustment of the exercise price, conversion price or other price or rate at which shares of common stock thereunder may be purchased, acquired or converted, and/or any upward adjustment in the number of shares of common stock issuable) we may be required to lower the exercise price on this warrant and and/or increase the number of shares underlying this warrant. Any adjustments pursuant to the anti-dilution provisions of these three warrants could materially dilute the holders of our common stock.

The authorization and issuance of preferred stock may have an adverse effect on the rights of holders of our common stock.

Our Board, without further action or vote by holders of our common stock, has the right to establish the terms, preference, rights and restrictions and issue shares of preferred stock. The terms of any series of preferred stock could be issued with terms, rights, preferences and restrictions that could adversely affect the rights of holders of our common stock and thereby reduce the value of our common stock. The designation and issuance of preferred stock favorable to current management or shareholders could make it more difficult to gain control of our board of directors or remove our current management and may be used to defeat hostile bids for control which might provide shareholders with premiums for their shares. We have designated and issued five series of preferred stock, no shares of which remain outstanding. In February 2016 and February 2017, respectively, we designated and issued a sixth and seventh series of preferred stock, Series F and Series G, of which 3,000 and 2,000 shares, respectively, remain outstanding. We may issue additional series of preferred stock in the future.

If we fail to comply with the continuing listing standards of The NASDAQ Capital Market, our securities could be delisted.

Our common stock is listed on the NASDAQ Capital Market under the symbol "RIBT", and we also have outstanding warrants listed on the NASDAQ Capital Market under the symbol "RIBTW". For our common stock and warrants to continue to be listed on the NASDAQ Capital Market, we must meet the current NASDAQ Capital Market continued listing requirements. If we were unable to meet these requirements, including, but not limited to, requirements to obtain shareholder approval of a transaction other than a public offering involving the sale or issuance equal to 20% or more of our common stock at a price that is less than the market value of our common stock, our common stock and warrants could be delisted from the NASDAQ Capital Market. If our securities were to be delisted from the NASDAQ Capital Market, our securities could continue to trade on the over-the-counter bulletin board following any delisting from the NASDAQ Capital Market, or on the Pink Sheets, as the case may be. Any such delisting of our securities could have an adverse effect on the market price of, and the efficiency of the trading market for our securities, not only in terms of the number of shares that can be bought and sold at a given price, but also through delays in the timing of transactions and less coverage of us by securities analysts, if any. Also, if in the future we were to determine that we need to seek additional equity capital, it could have an adverse effect on our ability to raise capital in the public or private equity markets.

On August 18, 2016, we received a notification letter from The Nasdaq Stock Market LLC ("Nasdaq") indicating that we have failed to comply with the minimum stockholders' equity requirement of Nasdaq Listing Rule 5550(b)(1).

Nasdaq Listing Rule 5550(b)(1) requires that companies listed on the Nasdaq Capital Market maintain a minimum of \$2.5 million in stockholders' equity for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1) (the "Minimum Stockholders' Equity Requirement"). Our Quarterly Report on Form 10-Q for the quarter ended June 30, 2016 reported stockholders' equity (deficit) of (\$36,000).

We submitted our plan to regain compliance in October 2016. On November 15, 2016, based on information we submitted to Nasdaq, the Staff granted us the maximum allowable 180 day extension to February 14, 2017 to evidence compliance with the Minimum Stockholders' Equity Requirement. On February 16, 2017, we received a determination letter (the "Letter") from the Nasdaq Listing Qualifications Staff (the "Staff") stating that we had not regained compliance with the Minimum Stockholders' Equity Requirement. The Letter also stated our common stock would be delisted from The Nasdaq Capital Market at the opening of business on February 27, 2017 unless we request a hearing before the Nasdaq Hearing Panel (the "Panel").

Index

We requested and have been granted a hearing before the Panel to appeal the Letter on March 30, 2017. At the hearing, we intend to present a plan to regain compliance with the Minimum Stockholders' Equity Requirement and request that the Panel allow us additional time within which to regain compliance. The hearing will stay any delisting action in connection with the notice and allow the continued listing of our common stock on The Nasdaq Capital Market until the Panel renders a decision subsequent to the hearing, and our common stock will continue to trade on The Nasdaq Capital Market under the symbol "RIBT" until such time.

On March 10, 2017, we received a notification letter from Nasdaq indicating that we have failed to comply with the Minimum Bid Price Requirement of Nasdaq List Rule 5550(a)(2). Nasdaq Listing Rule 5550(a)(2) requires that companies listed on the Nasdaq Capital Market maintain a minimum price of \$1.00 for 30 consecutive business days. Nasdaq rules allow for a compliance period of 180 calendar days in which to regain compliance.

There can be no assurance that we will meet the Minimum Stockholders' Equity Requirement or the Minimum Bid Price Requirement during any compliance period or in the future, or otherwise meet Nasdaq compliance standards, or that Nasdaq will grant the Company any relief from delisting as necessary, or that we will be able to ultimately meet applicable Nasdaq requirements for any such relief.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

We maintain various facilities that are used for manufacturing, warehousing, research and development, distribution and administrative functions. These facilities consist of both owned and leased properties. The following table summarizes the properties used to conduct our operations as of March 17, 2017:

Primary Segment	Location	Status	Primary Use
USA	West Sacramento, California	Leased	Warehousing, and administrative
USA	Mermentau, Louisiana	Owned	Manufacturing
USA	Lake Charles, Louisiana	Building – owned Land – leased	Warehouse
USA	Dillon, Montana	Owned	Manufacturing
USA	Irving, Texas	Leased	Manufacturing, warehousing and distribution
Brazil	Pelotas, Brazil	Owned (by Irgovel)	Manufacturing, R&D and administrative
Corporate	Scottsdale, Arizona	Leased	Administrative – corporate offices

Our corporate headquarters is located at 6720 N. Scottsdale Road, Suite 390, Scottsdale, AZ 85253. We lease approximately 9,000 square feet of corporate office space in Scottsdale. We are moving our corporate headquarters to our facility in West Sacramento beginning April 1, 2017, and our lease for administrative offices in Scottsdale terminates March 31, 2017.

We believe that all facilities are in good operating condition, the machinery and equipment are well-maintained, the facilities are suitable for their intended purposes and they have capacities adequate for current operations. The properties are covered by insurance but insurance for the properties located in Louisiana is subject to high deductibles and limitations on damages due to tropical storms.

ITEM 3. LEGAL PROCEEDINGS

For a discussion of legal proceedings, see “Commitments and Contingencies” in Note 15 to the Consolidated Financial Statements in Part II, Item 8 of this report, which is incorporated by reference herein.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIESPrice Range of Common Stock

Our common stock is traded on the NASDAQ Capital Market under the symbol "RIBT." Our CUSIP No. is 762831-10-5. The following table sets forth the range of high and low sales prices for our common stock for the periods indicated below. The quotations below reflect inter-dealer prices, without retail mark-up, markdown or commission, and may not represent actual transactions.

	Low	High
<u>2016</u>		
Fourth Quarter	\$0.74	\$1.43
Third Quarter	1.17	1.77
Second Quarter	1.12	2.19
First Quarter	1.07	2.36
<u>2015</u>		
Fourth Quarter	\$1.70	\$2.40
Third Quarter	2.07	3.44
Second Quarter	3.14	4.25
First Quarter	2.50	4.67

Holdings

As of March 13, 2017, there were approximately 160 holders of record and 7,190 beneficial owners of our common stock.

Dividends

We have never declared or paid any cash dividends on our common stock. We currently anticipate that we will retain all future earnings for the expansion and operation of our business and do not anticipate paying cash dividends in the foreseeable future. We are restricted from paying dividends or making other distributions to shareholders without the approval of our senior lender. Cash provided by operations in our Brazil segment is generally unavailable for distribution to our Corporate and USA segments pursuant to the terms of the limited liability company agreement for Nutra SA, LLC.

Recent Sales of Unregistered Securities

During the quarter ended December 31, 2016, we issued the securities described below without registration under the Securities Act. Unless otherwise indicated below, the securities were issued pursuant to the private placement exemption provided by Section 4(a)(2) of the Securities Act of 1933, as amended. All issuances below were made without any public solicitation, to a limited number of persons and were acquired for investment purposes only.

We issued shares of common stock under an advisory agreement with a vendor as summarized in the table which follows.

Edgar Filing: RiceBran Technologies - Form 10-K

Date of Issuance	Shares of Common Stock	Vesting Period
November 18, 2016	14,492	Immediate

Share Repurchases

We did not repurchase any of our common stock in 2016.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the Consolidated Financial Statements and related notes thereto included in Item 8 of this Annual Report on Form 10-K.

This discussion and analysis may contain “forward-looking statements.” These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may include, without limitation, statements about our market opportunities, strategies, competition, and expected activities and expenditures and at times may be identified by the use of words such as “may,” “could,” “should,” “would,” “project,” “believe,” “anticipate,” “expect,” “plan,” “estimate,” “forecast,” “potential,” “intend,” “continue” and variations of these words and comparable words. Forward-looking statements inherently involve risks and uncertainties. Accordingly, actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the risks described under “Risk Factors” in Item 1A. We undertake no obligation to update any forward-looking statements for revisions or changes after the filing date of this Annual Report on Form 10-K.

Basis of Presentation and Going Concern

We continued to experience losses and negative cash flows from operations throughout 2016 resulting in accumulated deficit of \$260 million which raises substantial doubt about our ability to continue as a going concern within one year from the date of this filing. Despite these historical losses and negative cash flows, management believes it has plans in place that will mitigate these historical conditions. Specifically, we completed an \$8 million debt and equity raise in February 2017, as further described below. Consequently, we believe that the USA segment is adequately funded at this time to allow us to operate and execute on our business strategy for achieving consistent and positive operational cash flows. We continue to believe that we will be able to obtain additional funds to operate our business, should it be necessary; however, there can be no assurances that our efforts will prove successful. The accompanying financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

In May 2015, the USA segment entered into an \$8 million senior secured credit facility agreement with a lender (the “Lender”) consisting of a \$3.5 million revolving loan, not to exceed a borrowing base, as defined in the agreement, and an initial \$2.5 million term loan. As a result of the credit facility transaction, the notes for a majority of the subordinated note holders representing approximately 97% of the principal due were amended, resulting in a \$1.9 million loss on extinguishment. In February 2016, we issued and sold preferred stock and warrants that netted proceeds of \$2.6 million. In March 2016, the restricted cash previously held in a \$1.9 million escrow account associated with the purchase of Irgovel was released to us pursuant to a court order. We repaid \$1.0 million of the term loan with the Lender upon receipt of funds from the escrow account. In addition, we repaid a \$0.3 million short-term note from a related party.

In February 2017, we issued and sold preferred stock and warrants that netted approximately \$1.85 million after deducting fees and expenses related to the offering. Additionally, in February 2017, we entered into a securities purchase agreement whereby we sold and issued original issue discount senior secured debentures that netted approximately \$5.6 million after expenses (together, the “February 2017 Transactions”). Funds received from the February 2017 Transactions were used to repay amounts due to the Lender in full of approximately \$3.8 million, pay down the principal balance and interest due to the subordinated note holders totaling \$0.5 million and for working capital and capital expenditure needs in our USA segment.

The Brazil segment consists of the consolidated operations of Nutra SA, LLC (“Nutra SA”), whose only operating subsidiary is Industria Riograndens De Oleos Vegetais Ltda. (“Irgovel”), located in Pelotas, Brazil. Irgovel completed the final stages of a major capital expansion during the first quarter of 2015. Throughout 2014, significant cash was used during the shutdown period and subsequent restart of the plant. In 2016, 2015 and 2014, we invested \$1.1 million, \$3.6 million and \$10.3 million, respectively, in Nutra SA to fund completion of the capital project and Irgovel working capital needs. Under the terms of the February 2017 Transactions, we are prohibited from contributing additional funding to Irgovel.

Beginning in the second quarter of 2016 and through the fourth quarter of 2016, the Brazil segment experienced severe cash shortages resulting in an increase in accounts payable (principally to raw bran suppliers) and accrued payroll related tax obligations as we delayed non-essential payments. The nonpayment of operating liabilities resulted in suppliers refusing to ship raw bran and other materials necessary to maintain steady operation of the plant. In addition to the working capital issues, the funds necessary to meet scheduled debt payments no longer existed without additional equity funding. As a result, the Brazil segment ceased making all bank debt payments in the second and third quarters of 2016. Discussions have ensued with the related banks with regard to renegotiation of existing debt agreements. However, there is no assurance these discussions will be successful. In the second half of 2016, our minority partner (the “Investors”) contributed \$1.65 million to Irgovel and an additional \$0.4 million in the first quarter of 2017. These equity infusions have allowed Irgovel’s management to negotiate various raw bran supply agreements that will allow Irgovel to obtain rice bran on a consistent basis. As a result, the Irgovel plant was able to return to a more normalized operational level in the middle of the fourth quarter of 2016 and to begin repairing vendor relationships overall. We continue to closely monitor Irgovel’s operations and related funding requirements.

Index
Segments

We have two reportable operating segments in 2016: (i) USA, which manufactures and distributes SRB (for food and animal nutrition customers) and derivative products as well as contract manufacturing of functional food products with an emphasis on utilization of our proprietary and patented functional food ingredients; and (ii) Brazil, which extracts crude RBO from raw rice bran and produces DRB as a co-product. RBO is then further processed into degummed, neutralized and/or fully refined rice bran oil for sale internationally and in Brazil. DRB is sold as feed for horses, cows, swine, sheep and poultry and a number of food ingredient products and animal nutrition products. We incur corporate and other expenses not directly attributable to operating segments. These include costs related to our corporate staff, general and administrative expenses including public company expenses, intellectual property, professional fees and other expenses. No Corporate allocations, including interest, are made to the operating segments.

The combined operations of our USA and Brazil segments encompass our approach to processing raw rice bran into various high quality, value-added constituents and finished products. Over the past decade, we have developed and optimized our proprietary processes to support the production of healthy, natural, hypoallergenic, gluten/soy free and non-genetically modified ingredients for use in meats, baked goods, cereals, coatings, health foods, nutritional supplements, nutraceuticals and high-end animal nutrition and animal health products.

The USA segment produces SRB inside three locations: two leased raw rice bran stabilization facilities located within supplier-owned rice mills in Arbuckle and West Sacramento, California; and one owned rice bran stabilization facility in Mermentau, Louisiana. At our Dillon, Montana facility, the USA segment produces our process patented Stage II products including: RiSolubles, a highly nutritious, carbohydrate and lipid rich fraction of SRB; RiFiber, a fiber rich derivative of SRB; RiBalance, a complete rice bran nutritional package derived from further processing SRB, and our ProRyza family of products including, protein- and protein/fiber-based products. "Stage II" refers to the products produced using our patented process technology run at our Dillon, Montana facility. The manufacturing facilities included in our USA segment have proprietary processing equipment and process patented technology for the stabilization and further processing of rice bran into finished products.

At our HN facility in Irving Texas, we formulate, blend and package finished products on a business-to-business basis for our customers. We also lease a facility in West Sacramento, California that houses a laboratory, warehouse and facility for assembling RBT proprietary extruders for stabilizing raw rice bran. In 2016, approximately 84% of USA segment revenue is from sales of food ingredient products and the remainder was from sales of animal nutrition products.

The Brazil segment consists of the consolidated operations of Nutra SA, whose only operating subsidiary is Irgovel, located in Pelotas, Brazil. Irgovel manufactures RBO and DRB products for both the food ingredient and animal nutrition markets in Brazil and internationally. In refining RBO to an edible grade, several co-products are obtained. One such product is distilled fatty acids, a valuable raw material for the detergent industry. Irgovel also produces rice lecithin, which has application in food ingredient products, animal nutrition and industrial applications. DRB is sold in bulk in the Brazilian market and internationally as an animal nutrition ingredient, and is sold as a raw material for further processing into food ingredient products. In 2016, approximately 58% of Brazil segment product revenue was from sales of RBO products and the remainder was from sales of DRB products.

Our Irgovel subsidiary is comprised of several facilities on approximately 19 acres in Pelotas, Brazil. These facilities include a plant for extraction of RBO from raw rice bran, RBO refining processes, compounded animal nutrition manufacturing, consumer RBO bottling, distilled fatty acid manufacture, lecithin manufacture, and support systems for the plant, including steam generation, maintenance, administrative offices and a quality assurance laboratory.

IndexResults of Operations

The following table sets forth certain financial data as a percentage of net sales for 2016 and 2015.

	2016	2015
Revenues	100.0%	100.0%
Cost of goods sold	79.8 %	79.8 %
Gross profit	20.2 %	20.2 %
Operating expenses:		
Selling, general and administrative	37.6 %	31.5 %
Depreciation and amortization	3.2 %	4.5 %
Goodwill impairment	7.7 %	-
Loss from operations	-28.3 %	-15.8 %
Other expense	-0.1 %	-11.2 %
Loss before income taxes	-28.4 %	-27.0 %
Income tax (expense) benefit	-0.1 %	0.5 %
Net loss	-28.5 %	-26.5 %
Net loss attributable to noncontrolling interest in Nutra SA	6.9 %	5.8 %
Net loss attributable to RiceBran Technologies shareholders	-21.6 %	-20.7 %
Dividends on preferred stock--beneficial conversion feature	-1.4 %	-
Net loss attributable to RiceBran Technologies common shareholders	-23.0 %	-20.7 %

Consolidated net loss attributable to RiceBran Technologies shareholders for 2016 was \$9.1 million, or \$0.97 per share, compared to \$8.3 million, or \$0.90 per share in 2015. Excluding the 2016 beneficial conversion feature and goodwill impairment charges, consolidated net loss attributable to RiceBran Technologies shareholders was \$5.5 million, or \$0.59 per share.

Revenue and Gross Profit

Revenues (in thousands):

	2016	% of Total Revenues	2015	% of Total Revenues	Change	% Change
USA segment	\$32,675	82.9 %	\$23,341	58.5 %	\$9,334	40.0 %
Brazil segment	6,745	17.1 %	16,601	41.6 %	(9,856)	-59.4 %
Intersegment	(15)	0.0 %	(46)	-0.1 %	31	-67.4 %
Total revenues	\$39,405	100.0 %	\$39,896	100.0 %	\$(491)	-1.2 %

Consolidated revenues for 2016 were \$39.4 million compared to \$39.9 million in 2015, a decrease of \$0.5 million, or 1.2%.

USA segment revenues increased \$9.3 million, or 40.0% in 2016 compared to 2015. Food ingredient product revenues increased 40%, year over year. Gains in this category were primarily attributable to increased buying from the existing customer base and specifically the contract manufacturing accounts which grew by 53% during 2016. Animal feed product revenues increased 34% over prior year levels driven by the supply and cooperation agreement entered into with Kentucky Equine Research (KER) at the end of December 2015.

Brazil segment revenues decreased \$9.9 million, or 59.4%, in 2016 compared to 2015. The average Brazilian real to US Dollar exchange rate decreased 5% year over year. On a local currency basis, Brazil segment revenue declined 56% year over year, and raw bran volume processed declined 54% in 2016. The decline in revenue in 2016 was due to the continuing challenge of sourcing raw bran caused by a confluence of three issues: (1) adverse weather conditions reducing the volume of rice during harvest, (2) competition for purchasing raw bran and (3) having sufficient working capital to meet raw bran supplier payment demands. The decrease in access to raw bran caused a decline in production volume, resulting in a decrease in revenues. During the fourth quarter of 2016, Irgovel's management negotiated various raw bran supply agreements that will allow Irgovel to obtain rice bran on a consistent basis with set pricing.

Index

Gross profit (in thousands):

	2016	Gross Profit %	2015	Gross Profit %	Change	Change in Gross Profit %
USA segment	\$9,647	29.5 %	\$7,418	31.8 %	\$2,229	(2.3)
Brazil segment	(1,678)	-24.9 %	652	3.9 %	(2,330)	(28.8)
Total gross profit	\$7,969	20.2 %	\$8,070	20.2 %	\$(101)	(0.0)

Consolidated gross profit decreased \$0.1 million to \$8.0 million in 2016, compared to \$8.1 million in 2015. Gross profit remained consistent between periods at 20.2%.

The USA segment gross profit increased \$2.2 million, to \$9.6 million in 2016, from \$7.4 million in 2015, and gross profit percentage decreased 2.3 percentage points to 29.5% in 2016 from 31.8% in 2015. Revenue increases for ingredient and animal nutrition products drove down fixed per unit costs and raw bran prices have decreased approximately 9% when comparing to the prior year, resulting in improved gross profit performance. However, this improvement was negated by three factors. First, the raw bran supplier for our Mermentau facility was not producing for 13 weeks in 2016, resulting in shipments to our animal feed customers originating from our California facility, which resulted in higher costs. Additionally, our contract manufacturing accounts have incurred price increases from vendors that we have not yet passed on to customers. Finally, inventory reserves were taken for excess inventory levels.

The Brazil segment experienced negative gross profit in 2016, primarily due to the three reasons stated above related to weather, competition for raw bran and insufficient working capital. Beginning in the first quarter of 2016, obtaining adequate amounts of raw bran in order to operate the Irgovel plant at an appropriate level has been a challenge. This caused a 54% decline in raw bran processing volume year over year. The plant operated at approximately 16% of its targeted capacity of 300 metric tons per day during the third quarter of 2016 resulting in very inefficient operations and significant negative gross profit. However, during the fourth quarter, operating efficiency improved to 47% of targeted capacity. We expect to see continued improvement in 2017. For cost reasons, bagged animal feed production was eliminated in the middle of the first quarter in 2016 and all efforts were shifted to selling bulk animal feed which is a simpler operation that requires less personnel. Additionally, because of the significantly reduced supply of raw bran available from rice millers, the cost of raw bran when it is available has increased by 63% during 2016 to historically high prices.

Operating Expenses (in thousands):

	2016			
	Corporate	USA	Brazil	Consolidated
Selling, general and administrative	\$7,078	\$5,532	\$2,198	\$ 14,808
Depreciation and amortization	89	1,122	57	1,268
Goodwill impairment	-	-	3,024	3,024
Total operating expenses	\$7,167	\$6,654	\$5,279	\$ 19,100

	2015			
	Corporate	USA	Brazil	Consolidated
Selling, general and administrative	\$4,892	\$4,288	\$3,387	\$ 12,567
Depreciation and amortization	79	1,569	131	1,779
Total operating expenses	\$4,971	\$5,857	\$3,518	\$ 14,346

Favorable (Unfavorable) Change

Edgar Filing: RiceBran Technologies - Form 10-K

	Corporate	USA	Brazil	Consolidated
Selling, general and administrative	\$(2,186)	\$(1,244)	\$1,189	\$ (2,241)
Depreciation and amortization	(10)	447	74	511
Goodwill impairment	-	-	(3,024)	(3,024)
Total operating expenses	\$(2,196)	\$(797)	\$(1,761)	\$ (4,754)

Consolidated operating expenses were \$19.1 million for 2016, compared to \$14.3 million for 2015, an increase of \$4.8 million. Excluding the goodwill impairment charge of \$3.0 million, consolidated operating expenses increased \$1.7 million, or 12.1%.

Index

Corporate segment selling, general and administrative expenses (SG&A) increased \$2.2 million. This was primarily related to the \$1.1 million of additional 2016 expense incurred as a result of the proxy contest in connection with the 2016 Annual Shareholder Meeting. The expenses incurred included legal fees, investor relations and proxy solicitation consulting fees, incremental electronic filing fees, shareholder mailing costs and the settlement payment made to the dissident group. Additionally, during 2016 we recorded approximately \$0.7 million in severance expense related to the departure of our former chief executive officer.

USA segment SG&A expenses increased \$0.8 million primarily due to a \$0.4 million increase in commissions as a result of the KER agreement entered into in December 2015. Additionally, there were increases in employee-related expenses, travel expenses, and in marketing expenses (advertising and tradeshow related).

Brazil segment SG&A expenses increased \$1.8 million in 2016. Excluding the goodwill impairment charge recorded in 2016, Brazil's SG&A expenses decreased by \$1.3 million. The change was primarily the result of declines in the exchange rate between the Brazilian Real and the US Dollar. The average exchange rate decreased 5% year over year. The impact of the exchange rate on expenses offset the one-time severance expenses of \$0.2 million related to the reduction in production staff associated with the bagged animal feed production eliminated in the middle of the first quarter 2016. Additionally, further reductions in administrative personnel and lower production in 2016 have resulted in additional cost reductions.

On a consolidated basis, depreciation and amortization expense decreased \$0.5 million primarily related to decreases in the USA segment resulting from incremental declines in amortization expense of intangible assets associated with the acquisition of HN in 2014.

Other Income (Expense) (in thousands):

Other income (expense)	\$ 3,454	\$ -	\$ 944	\$ 4,398

Consolidated other expense was \$78,000 in 2016, compared to \$4.5 million in 2015.

Index

The Corporate segment experienced an improvement in other expense, net, of \$3.4 million from the prior year, primarily due to the \$1.6 million gain related to the reversal of the Irgovel purchase litigation contingency in 2016. The gain related to the reversal of the Irgovel purchase litigation is nonrecurring in nature. Additionally, the 2015 period included a one-time loss on extinguishment of debt charge of \$1.9 million. During 2016, interest expense and bank fees increased as we borrowed additional funds on our revolver in order to fund operations and make scheduled debt payments and we incurred additional fees related to amendments of our existing credit facilities.

The Brazil segment other expense, net, decreased \$1.0 million, primarily due to the \$0.5 million change in foreign currency exchange, net, related to fluctuations in the Brazil segment's US Dollar denominated debt. In addition, we experienced a \$0.1 million decrease in interest expense due to a reduction in working capital lines of credit during the period. These lines of credit are secured by accounts receivable, which decreased as a result of the reduction in revenues during the 2016 period.

Liquidity and Capital Resources

We continued to experience losses and negative cash flows from operations which raises substantial doubt about our ability to continue as a going concern. We believe that we will be able to obtain additional funds to operate our business, should it be necessary; however, there can be no assurances that our efforts will prove successful. The accompanying financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

With respect to liquidity and capital resources, we manage the Brazil segment, consisting currently of our plant in Brazil, separately from our U.S. based Corporate and USA segments. Cash on hand at our Brazil segment is generally unavailable for distribution to our Corporate and USA segments pursuant to the terms of the limited liability company agreement for Nutra SA. Cash used in operating activities for 2016 and 2015, is presented below (in thousands).

	2016		
	Corporate and		
	USA	Brazil	Consolidated
Net loss	\$(2,915)	\$(8,335)	\$(11,250)
Adjustments to reconcile net loss to net cash used in operations:

Adjustments to reconcile net loss to net cash used in operations:			
Depreciation and amortization	2,538	1,525	4,063
Change in fair value of derivative warrant liabilities	(1,001)	-	(1,001)
Loss on extinguishment of debt	1,904	-	1,904
Other adjustments, net	1,254	167	1,421

Edgar Filing: RiceBran Technologies - Form 10-K

Changes in operating asset and liabilities:	(1,245)	1,640	395
Net cash used in operating activities	\$(1,937)	\$(1,857)	\$ (3,794)

On a combined basis, the Corporate and USA segments used \$2.6 million of cash in operating activities in 2016 compared to using \$1.9 million of cash in 2015. Excluding the 2016 gain on resolution of Irgovel purchase litigation and the 2015 loss on extinguishment of debt, net loss increased \$1.0 million between periods, primarily as a result of the \$1.1 million related to the proxy contest in connection with the 2016 annual meeting of shareholders, of which \$0.4 million was subsequently reimbursed through our insurance policy and recorded as other income. Additionally, during 2016 we recorded approximately \$0.7 million in severance expense related to the departure of our former chief executive officer.

Total liquidity (cash on hand and revolver availability) in the Corporate and USA segments decreased approximately \$0.9 million during 2016 primarily due to increased borrowings against our revolving credit facility to fund operations and make scheduled debt payments. As of December 31, 2016, total liquidity is approximately \$0.9 million. As a result of the February 2017 transactions, we have repaid Lender in full, including all amounts borrowed on our revolving credit facility.

Index

The Brazil segment used \$1.3 million of cash in operating activities in 2016, compared to using \$1.9 million of cash in 2015. The decrease was primarily the result of an increase in accounts payable (principally raw bran suppliers) and accrued payroll related tax obligations as we delayed non-essential payments during the second and third quarter. Additionally, accounts receivable decreased as we were able to collect on outstanding balances which were not offset by new sales.

In February 2016, we issued and sold preferred stock and warrants that netted proceeds of \$2.6 million. Funds received under the facility with the Lender and from the February offering were used for working capital and capital expenditure needs in both of our operating segments. Additional equity contributions from the USA segment to Nutra SA totaling \$1.1 million and \$3.3 million were made during the first nine months of 2016 and 2015, respectively.

In addition to the Brazil segment working capital issues, the funds necessary to meet scheduled debt payments no longer exist without additional equity funding. As a result, the Brazil segment ceased making all bank debt payments in the second and third quarters of 2016. Discussions have ensued with the related banks with regard to renegotiation of existing debt agreements. However, there is no assurance these discussions will be successful. In the second half of 2016, our minority partner contributed \$1.65 million to Irgovel and an additional \$0.4 million in the first quarter of 2017. With this equity support, Irgovel management has negotiated various raw bran supply agreements that will allow Irgovel to obtain rice bran on a consistent basis with set pricing. We continue to closely monitor Irgovel's operations and related funding requirements.

See Note 20 of our Notes to Consolidated Financial Statements for additional details related to 2017 debt and equity transactions, including the full repayment of amounts owed to our lender, the issuance of new senior secured debentures and the issuance of preferred stock.

Off-Balance Sheet Arrangements

We have not entered into any transactions with unconsolidated entities whereby we have financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose us to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing and liquidity support or market risk or credit support risk to us.

Critical Accounting Estimates

Principles of Consolidation – The consolidated financial statements include the accounts of RiceBran Technologies and all subsidiaries in which we have a controlling interest. All significant inter-company accounts and transactions are eliminated in consolidation. Noncontrolling interests in our subsidiaries are recorded net of tax as net earnings (loss) attributable to noncontrolling interests.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Because of the uncertainty inherent in such estimates, actual results could differ from those estimates.

Inventories - Inventories are stated at the lower of cost or net realizable value, with cost determined by the first-in, first-out method. In the USA segment, we employ a full absorption procedure using standard cost techniques. The standards are customarily reviewed and adjusted annually so that they are materially consistent with actual purchase and production costs. In the Brazil segment, we use actual average purchase and production costs. Provisions for potentially obsolete or slow moving inventory are made based upon our analysis of inventory levels, historical obsolescence and future sales forecasts; while inventory determined to be obsolete is written off immediately.

Property and Equipment – Property and equipment are stated at cost less accumulated depreciation. Depreciation is computed on the straight-line basis over the estimated useful lives of the assets. Expenditures for maintenance and repairs are expensed as incurred while renewals and betterments are capitalized. Gains or losses on the sale of property and equipment are reflected in the consolidated statements of operations.

27

Index

We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss is recognized when the undiscounted future cash flows estimated to be generated by the asset to be held and used are not sufficient to recover the unamortized balance of the asset. An impairment loss is recognized based on the difference between the carrying values and estimated fair value. The estimated fair value is determined based on either the discounted future cash flows or other appropriate fair value methods with the amount of any such deficiency charged to operations in the current year. Estimates of future cash flows are based on many factors, including current operating results, expected market trends and competitive influences. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value, less estimated costs to sell.

Revenue Recognition – We recognize revenue for product sales when title and risk of loss pass to our customers, generally upon shipment for USA segment customers and Brazil segment international customers and upon customer receipt for Brazil segment domestic customers. Each transaction is evaluated to determine if all of the following four criteria are met: (i) persuasive evidence of an arrangement exists; (ii) delivery has occurred; (iii) the selling price is fixed and determinable; and (iv) collectability is reasonably assured. If any of the above criteria cannot be satisfied then such a transaction is not recorded as revenue, or is recorded as deferred revenue and recognized only when the sales cycle is complete and payment is either received or becomes reasonably assured. Changes in judgments and estimates regarding the application of the above mentioned four criteria might result in a change in the timing or amount of revenue recognized by such transactions.

We make provisions for estimated returns, discounts and price adjustments when they are reasonably estimable. Revenues on the statements of operations are net of provisions for estimated returns, routine sales discounts, volume allowances and adjustments. Revenues on the statements of operations are also net of taxes collected from customers and remitted to governmental authorities.

Amounts billed to a customer in a sale transaction related to shipping costs are reported as revenues and the related costs incurred for shipping are included in cost of goods sold.

Share Sequencing – The Investors may elect, until January 1, 2018, to exchange units in Nutra SA for our common stock (the “Exchange Right”). The appraised fair value of the Investors’ interest in Nutra SA and the market price of our stock would be used to determine the amount of ownership interest the Investors would receive. The number of common shares and warrants issuable if the Investors elect the Exchange Right is variable and indeterminate. For accounting purposes, we are not able to conclude that we have sufficient authorized and unissued shares to settle all contracts subject to the generally accepted accounting principle derivative guidance. Our adopted sequencing approach is based on earliest issuance date (the “Share Sequencing”), therefore we are required to record certain warrants issued after the right was granted to the Investors in June 2015 at fair value, as derivative warrant liabilities. For the same reason, the Series F Preferred Stock, which is convertible to shares of our common stock, has been recorded in temporary equity on our consolidated balance sheet.

Derivative Warrant Liabilities – We have certain warrant agreements in effect that contain anti-dilution clauses. Under these clauses, we may be required to lower the exercise price on these warrants and issue additional warrants based on future issuances of our common stock and awards of stock options to employees, additional issuance of warrants and/or other convertible instruments below certain exercise prices. We account for the warrants with these anti-dilution clauses as liability instruments. These warrants are valued using the lattice model in each reporting period and the resultant change in fair value is recorded in the consolidated statements of operations in other income (expense). Additional warrants are recorded as liability instruments due to the Share Sequencing, as disclosed above.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

28

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Audit Committee of the
Board of Directors and Shareholders
Of RiceBran Technologies

We have audited the accompanying consolidated balance sheets of RiceBran Technologies (the “Company”) as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive loss, changes in equity and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of RiceBran Technologies as of December 31, 2016 and 2015, and the consolidated results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern.

As described in Note 1 to the financial statements, the Company has suffered recurring losses from operations resulting in an accumulated deficit of \$260 million at December 31, 2016. This factor among other things, raises substantial doubt about its ability to continue as a going concern. Management’s plans in regard to this matter are also described in Note 1 to the financial statements. The financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

NOTE 1. GOING CONCERN, MANAGEMENT PLANS AND GENERAL BUSINESS

Going Concern and Management's Plans

We continued to experience losses and negative cash flows from operations throughout 2016 resulting in accumulated deficit of \$260 million which raises substantial doubt about our ability to continue as a going concern within one year from the date of this filing. Despite these historical losses and negative cash flows, management believes it has plans in place that will mitigate these historical conditions. Specifically, we completed an \$8 million debt and equity raise in February 2017, as further described below. Consequently, we believe that the USA segment is adequately funded at this time to allow us to operate and execute on our business strategy for achieving consistent and positive operational cash flows. We continue to believe that we will be able to obtain additional funds to operate our business, should it be necessary; however, there can be no assurances that our efforts will prove successful. The accompanying financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

In May 2015, the USA segment entered into an \$8 million senior secured credit facility agreement with a lender (the "Lender") consisting of a \$3.5 million revolving loan, not to exceed a borrowing base, as defined in the agreement, and an initial \$2.5 million term loan. As a result of the credit facility transaction, the notes for a majority of the subordinated note holders representing approximately 97% of the principal due were amended, resulting in a \$1.9 million loss on extinguishment. In February 2016, we issued and sold preferred stock and warrants that netted proceeds of \$2.6 million. In March 2016, the restricted cash previously held in a \$1.9 million escrow account associated with the purchase of Irgovel (see Note 15) was released to us pursuant to a court order. We repaid \$1.0 million of the term loan with the Lender upon receipt of funds from the escrow account. In addition, we repaid a \$0.3 million short-term note from a related party (see Note 17).

In February 2017, we issued and sold preferred stock and warrants that netted approximately \$1.85 million after deducting fees and expenses related to the offering. Additionally, in February 2017, we entered into a securities purchase agreement whereby we sold and issued original issue discount senior secured debentures that netted approximately \$5.6 million after expenses (together, the "February 2017 Transactions," see Note 20 for additional details on these February 2017 Transactions). Funds received from the February 2017 Transactions were used to repay amounts due to the Lender in full of approximately \$3.8 million, pay down the principal balance and interest due to the subordinated note holders totaling \$0.5 million and for working capital and capital expenditure needs in our USA segment.

The Brazil segment consists of the consolidated operations of Nutra SA, LLC ("Nutra SA"), whose only operating subsidiary is Industria Riograndens De Oleos Vegetais Ltda. ("Irgovel"), located in Pelotas, Brazil. Irgovel completed the final stages of a major capital expansion during the first quarter of 2015. Throughout 2014, significant cash was used during the shutdown period and subsequent restart of the plant. In 2016, 2015 and 2014, we invested \$1.1 million, \$3.6 million and \$10.3 million, respectively, in Nutra SA to fund completion of the capital project and Irgovel working capital needs. Under the terms of the February 2017 Transactions, we are prohibited from contributing additional funding to Irgovel.

Beginning in the second quarter of 2016 and through the fourth quarter of 2016, the Brazil segment experienced severe cash shortages resulting in an increase in accounts payable (principally to raw bran suppliers) and accrued payroll related tax obligations as we delayed non-essential payments. The nonpayment of operating liabilities resulted in suppliers refusing to ship raw bran and other materials necessary to maintain steady operation of the plant. In addition to the Brazil segment working capital issues, the funds necessary to meet scheduled debt payments no longer existed without additional equity funding. As a result, the Brazil segment ceased making all bank debt payments in the second and third quarters of 2016. Discussions have ensued with the related banks with regard to renegotiation of existing debt agreements. However, there is no assurance these discussions will be successful. In the second half of 2016, our minority partner (the "Investors") contributed \$1.65 million to Irgovel and an additional \$0.4 million in the

first quarter of 2017. With this equity support, Irgovel management has negotiated various raw bran supply agreements that will allow Irgovel to obtain rice bran on a consistent basis with set pricing. As a result, the Irgovel plant was able to return to a more normalized operational level in the middle of the fourth quarter of 2016 and to begin repairing vendor relationships overall. We continue to closely monitor Irgovel's operations and related funding requirements.

General Business

We are an ingredient company serving food, animal nutrition and specialty markets focused on value-added processing and marketing of healthy, natural and nutrient dense products derived from raw rice bran, an underutilized by-product of the rice milling industry. We apply our proprietary and patented technologies and intellectual properties to convert raw rice bran into numerous high value products including stabilized rice bran ("SRB"), rice bran oil ("RBO"), defatted rice bran ("DRB"), RiBalance, a complete rice bran nutritional package derived from further processing of SRB; RiSolubles, a highly nutritious, carbohydrate and lipid rich fraction of RiBalance; RiFiber, a fiber rich insoluble derivative of RiBalance, and ProRyza, rice bran protein-based products, and a variety of other valuable derivatives extracted from these core products. Our target markets are natural food, functional food, nutraceutical supplement and animal nutrition manufacturers, wholesalers and retailers, both domestically and internationally.

Index

We have two reportable operating segments: (i) USA segment, which manufactures and distributes SRB (for food and animal nutrition customers) in various granulations along with Stage II products and derivatives and (ii) Brazil segment, which extracts crude RBO and DRB from rice bran, which are then further processed into fully refined rice bran oil for sale internationally and in Brazil, compounded animal nutrition products for horses, cows, swine, sheep and poultry and a number of valuable food and animal nutrition products derivatives and co-products. Stage II refers to the proprietary, patented processes run at our Dillon, Montana facility and includes products produced at that facility. In addition we incur corporate and other expenses not directly attributable to reportable operating segments, which include costs related to our corporate staff, general and administrative expenses including public company expenses, intellectual property, professional fees, and other expenses. No corporate allocations, including interest, are made to the reportable operating segments.

The combined operations of our USA and Brazil segments encompass our approach to processing raw rice bran into various high quality, value-added constituents and finished products. Over the past decade, we have developed and optimized our proprietary processes to support the production of healthy, natural, hypoallergenic, gluten free, and non-genetically modified ingredients and supplements for use in meats, baked goods, cereals, coatings, health foods, nutritional supplements, nutraceuticals and high-end animal nutrition and health products.

The USA segment produces SRB inside two supplier rice mills in California and our facility in Mermentau, Louisiana. A facility located in Lake Charles, Louisiana has been idle since May 2009. The USA segment also includes our Dillon, Montana Stage II facility which produces our Stage II products: RiBalance, a complete rice bran nutritional package derived from further processing of SRB; RiSolubles, a highly nutritious, carbohydrate and lipid rich fraction of RiBalance; RiFiber, a fiber rich insoluble derivative of RiBalance, and ProRyza, rice bran protein-based products, and a variety of other valuable derivatives extracted from these core products. The manufacturing facilities included in our USA segment have proprietary processing equipment and process patented technology for the stabilization and further processing of rice bran into finished products. In 2016, approximately 84% of USA segment revenue was from sales of food ingredient products and the remainder was from sales of animal nutrition products.

The Brazil segment consists of the consolidated operations of Nutra SA, whose only operating subsidiary is Irgovel, located in Pelotas, Brazil. Irgovel manufactures RBO and DRB products for both the food ingredient and animal nutrition markets in Brazil and internationally. In refining RBO to an edible grade, several co-products are obtained. One such product is distilled fatty acids, a valuable raw material for the detergent industry. Irgovel also produces rice lecithin, which has application in food ingredient products, animal nutrition and industrial applications. DRB is compounded with a number of other ingredients to produce complex animal nutrition products which are packaged and sold under Irgovel brands in the Brazilian market, sold as a raw material for further processing into food ingredient products or sold in bulk into the animal nutrition markets in Brazil and neighboring countries. In 2016, approximately 58% of Brazil segment product revenue was from sales of RBO products and the remainder was from sales of DRB products.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation – The accompanying consolidated financial statements have been prepared in U.S. Dollars and in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results may differ from those estimates. The accompanying consolidated financial statements include the accounts of RiceBran Technologies and all subsidiaries in which we have a controlling interest. Variable interest in subsidiaries for which we are the primary beneficiary are consolidated. All significant inter-company balances and transactions are eliminated in consolidation. Noncontrolling interests in our subsidiaries are recorded net of tax as net earnings (loss) attributable to noncontrolling

interests.

Use of Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Because of the uncertainty inherent in such estimates, actual results could differ from those estimates.

Reclassifications – Certain reclassifications have been made to amounts reported for the prior year to achieve consistent presentation with the current year.

36

Index

Cash and Cash Equivalents – We consider all highly liquid investments purchased with an original maturity of three months or less at the time of purchase to be cash equivalents. As of December 31, 2016 and 2015, we maintained our cash and cash equivalents with major banks. We maintain cash in bank accounts in amounts which at times may exceed federally insured limits. We have not experienced any losses on such accounts.

Accounts Receivable and Allowance for Doubtful Accounts – Accounts receivable represent amounts receivable on trade accounts. The allowance for doubtful accounts is based on our assessment of the collectability of customer accounts and the aging of accounts receivable. We analyze the aging of customer accounts, customer concentrations, customer credit-worthiness, current economic trends and changes in our customer payment patterns when evaluating the adequacy of the allowance for doubtful accounts. From period to period, differences in judgments or estimates utilized may result in material differences in the amount and timing of the provision for doubtful accounts. We periodically evaluate our credit policy to ensure that the customers are worthy of terms and support our business plans.

Inventories – Inventories are stated at the lower of cost or net realizable value, with cost determined by the first-in, first-out method. In the USA segment, we employ a full absorption procedure using standard cost techniques. The standards are customarily reviewed and adjusted annually so that they are materially consistent with actual purchase and production costs. In the Brazil segment, we use actual average purchase and production costs. Provisions for potentially obsolete or slow moving inventory are made based upon our analysis of inventory levels, historical obsolescence and future sales forecasts; while inventory determined to be obsolete is written off immediately.

Property and Equipment – Property and equipment are stated at cost less accumulated depreciation. Depreciation is computed on the straight-line basis over the estimated useful lives of the assets. Expenditures for maintenance and repairs are expensed as incurred while renewals and betterments are capitalized. Gains or losses on the sale of property and equipment are reflected in the consolidated statements of operations.

We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss is recognized when the undiscounted future cash flows estimated to be generated by the asset to be held and used are not sufficient to recover the unamortized balance of the asset. An impairment loss is recognized based on the difference between the carrying values and estimated fair value. The estimated fair value is determined based on either the discounted future cash flows or other appropriate fair value methods with the amount of any such deficiency charged to operations in the current year. Estimates of future cash flows are based on many factors, including current operating results, expected market trends and competitive influences. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value, less estimated costs to sell.

Goodwill – Goodwill is recorded when the purchase price paid for an acquisition exceeds the estimated fair value of net identified tangible and intangible assets acquired. Goodwill is tested for impairment at the reporting unit level on an annual basis in the fourth quarter and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying value. We may first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform a quantitative two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The quantitative two-step goodwill impairment review process compares the fair value of the reporting unit in which goodwill resides to its carrying value. The Company has two reporting units, which are the same as our operating segments. Multiple valuation techniques can be used to assess the fair value of the reporting unit. All of these techniques include the use of estimates and assumptions that are inherently uncertain. Changes in these estimates and assumptions could materially affect the determination of fair value or goodwill impairment, or both.

Intangible Assets – We amortize intangible assets using the straight-line or accelerated basis over the useful life of the asset from the date of acquisition.

We regularly perform reviews to determine if facts and circumstances exist which indicate that the useful lives of our intangible assets are shorter than originally estimated or the carrying amount of these assets may not be recoverable. An impairment loss is recognized when the undiscounted future cash flows estimated to be generated by the asset to be held and used are not sufficient to recover the unamortized balance of the asset. An impairment loss is recognized based on the difference between the carrying values and estimated fair value. The estimated fair value is determined based on either the discounted future cash flows or other appropriate fair value methods with the amount of any such deficiency charged to operations in the current year. Estimates of future cash flows are based on many factors, including current operating results, expected market trends and competitive influences. We also evaluate the amortization periods assigned to its intangible assets to determine whether events or changes in circumstances warrant revised estimates of useful lives.

Index

Revenue Recognition – We recognize revenue for product sales when title and risk of loss pass to our customers, generally upon shipment for USA segment customers and Brazil segment international customers and upon customer receipt for Brazil segment domestic customers. Each transaction is evaluated to determine if all of the following four criteria are met: (i) persuasive evidence of an arrangement exists; (ii) delivery has occurred; (iii) the selling price is fixed and determinable; and (iv) collectability is reasonably assured. If any of the above criteria cannot be satisfied then such a transaction is not recorded as revenue, or is recorded as deferred revenue and recognized only when the sales cycle is complete and payment is either received or becomes reasonably assured. Changes in judgments and estimates regarding the application of the above mentioned four criteria might result in a change in the timing or amount of revenue recognized by such transactions.

We make provisions for estimated returns, discounts and price adjustments when they are reasonably estimable. Revenues on the statements of operations are net of provisions for estimated returns, routine sales discounts, volume allowances and adjustments. Revenues on the statements of operations are also net of taxes collected from customers and remitted to governmental authorities.

Amounts billed to a customer in a sale transaction related to shipping costs are reported as revenues and the related costs incurred for shipping are included in cost of goods sold.

Selling, General and Administrative Expenses – Selling, general and administrative expenses include salaries and wages, bonuses and incentives, stock-based compensation expense, employee-related expenses, facility-related expenses, marketing and advertising expense, depreciation of non-operating property and equipment, professional fees, amortization of intangible assets, provisions for losses on accounts receivable and other operating expenses.

Research and Development – Research and development expenses include internal and external costs. Internal costs include salaries and employment related expenses. External expenses consist of costs associated with product development. All such costs are charged to expense in the period they are incurred.

Share-Based Compensation – Share-based compensation expense for stock options granted to employees is calculated at the grant date using the Black-Scholes-Merton valuation model based on awards ultimately expected to vest, reduced for estimated forfeitures, and expensed on a straight-line basis over the service period of the grant. Forfeitures are estimated at the time of grant based on our historical forfeiture experience and are revised in subsequent periods if actual forfeitures differ from those estimates. Beginning in 2017, we will recognize forfeitures as they occur rather than recording an estimated amount. This will not materially impact our financial statements. The Black-Scholes-Merton option pricing model requires us to estimate key assumptions such as expected life, volatility, risk-free interest rates and dividend yield to determine the fair value of share-based awards, based on both historical information and management’s judgment regarding market factors and trends. We will use alternative valuation models if grants have characteristics that cannot be reasonably estimated using the Black-Scholes-Merton model.

For restricted stock awards (“RSAs”), share-based compensation is measured based on the fair value of the award on the date of grant and the corresponding expense is recognized over the period during which an employee is required to provide service in exchange for the reward. Compensation expense related to service-based RSAs is recognized on a straight-line basis over the requisite service period for the entire award.

We account for share-based compensation awards granted to non-employees and consultants by determining the fair value of the awards granted at either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measured. Generally we value stock options granted to non-employees and consultants using the Black-Scholes-Merton valuation model and RSAs at fair value. If the fair value of the equity instruments issued is used, it is measured using the stock price and other measurement assumptions as of the earlier of (i) the date at which a commitment for performance by the counterparty to earn the equity instruments is

reached or (ii) the date at which the counterparty's performance is complete. The expense associated with stock awards issued to consultants or other third parties are recognized over the term of service. In the event services are terminated early or we require no specific future performance, the entire amount is expensed. The value is re-measured each reporting period over the requisite service period.

Share Sequencing – The Investors may elect, until January 1, 2018, to exchange units in Nutra SA for our common stock (the “Exchange Right”). The appraised fair value of the Investors’ interest in Nutra SA and the market price of our stock would be used to determine the amount of ownership interest the Investors would receive. The number of common shares and warrants issuable if the Investors elect the Exchange Right is variable and indeterminate. For accounting purposes, we are not able to conclude that we have sufficient authorized and unissued shares to settle all contracts subject to the GAAP derivative guidance. Our adopted sequencing approach is based on earliest issuance date (the “Share Sequencing”), therefore we are required to record certain warrants issued after the right was granted to the Investors in June 2015 at fair value, as derivative warrant liabilities. For the same reason, the Series F Preferred Stock, which is convertible to shares of our common stock, has been recorded in temporary equity on our consolidated balance sheet.

Index

Derivative Warrant Liabilities – We have certain warrant agreements in effect that contain anti-dilution clauses. Under these clauses, we may be required to lower the exercise price on these warrants and issue additional warrants based on future issuances of our common stock and awards of stock options to employees, additional issuance of warrants and/or other convertible instruments below certain exercise prices. We account for the warrants with these anti-dilution clauses as liability instruments. These warrants are valued using the lattice model in each reporting period and the resultant change in fair value is recorded in the consolidated statements of operations in other income (expense). Additional warrants are recorded as liability instruments due to the Share Sequencing, as disclosed above.

Foreign Currencies and Currency Translation – We use the U.S. Dollar as our reporting currency. The functional currency for Irgovel is the Brazilian Real. Assets and liabilities of Irgovel are translated using the exchange rate in effect at the consolidated balance sheet date. Equity accounts are translated at historical rates, except for the change in accumulated deficit during the year, which is the result of the income statement translation process. Irgovel’s revenues and expenses are translated using the average exchange rates in effect during the period. Translation differences are recorded in accumulated other comprehensive income (loss) as foreign currency translation. Gains or losses on transactions denominated in a currency other than Irgovel’s functional currency which arise as a result of changes in foreign exchange rates are recorded as foreign exchange gain or loss in the statements of operations. The Brazilian Real exchange rates to the U.S. Dollar at December 31, 2014, 2015 and 2016 were 0.3758, 0.2523 and 0.3069, respectively.

Income Taxes – We account for income taxes by recording a deferred tax asset or liability for the recognition of future deductible or taxable amounts and operating loss and tax credit carryforwards. Deferred tax expense or benefit is recognized as a result of timing differences between the recognition of assets and liabilities for financial reporting and tax purposes during the year.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards. A valuation allowance is established, when necessary, to reduce that deferred tax asset if it is more likely than not that the related tax benefits will not be realized. The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations in Brazil. Due to the complexity of some of these uncertainties, the ultimate resolution may result in a payment that may be different from current estimates of the tax liabilities. If our estimate of tax liabilities proves to be less than the ultimate assessment, an additional charge to expense would result. If payment of these amounts ultimately proves to be less than the recorded amounts, the reversal of the liabilities may result in income tax benefits being recognized in the period when it is determined that the liabilities are no longer necessary.

Recent Accounting Standards

Recent accounting standards not yet adopted

In May 2014, the Financial Accounting Standards Board (“FASB”) issued guidance on revenue from contracts with customers to clarify the principles for recognizing revenue and develop a common revenue standard for GAAP and International Financial Reporting Standards. Under the new guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services, applying the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. An entity may choose to adopt the new standard either retrospectively or through a cumulative effect adjustment as of the start of the first period for which it applies the new standard. The guidance is effective for our annual and interim periods beginning in 2018, however, early adoption is permitted. We have begun to evaluate the impact that adoption of this guidance will have on our consolidated financial statements

but have not completed the evaluation and implementation process. We have not yet selected a transition method but have determined that we will utilize the deferred effective date of January 1, 2018 to adopt the standard.

In February 2016, the FASB issued guidance which changes the accounting for leases. Under prior GAAP, the recognition, measurement and presentation of expenses and cash flows arising from a lease for us as a lessee depend primarily on the lease's classification as a finance or operating lease. For both types of leases, lessees will recognize a right-of-use asset and a lease liability. For capital or finance leases, lessees will recognize amortization of the right-of-use asset separately from interest expense on the lease liability. The guidance is effective for our annual and interim periods beginning in 2019 and must be adopted on a modified retrospective approach. Early adoption is allowed. We have not yet determined the impact that the new guidance will have on our results of operations, financial position and cash flows and have not yet determined if we will early adopt the standard.

Index

In March 2016, the FASB issued new guidance that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when the awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The guidance also allows us to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made on an employee's behalf for withheld shares should be presented as a financing activity on our cash flows statement, and provides an accounting policy election to account for forfeitures as they occur. The guidance is effective for our annual and interim periods beginning in 2017 with early adoption permitted. We plan to adopt the standard in the first quarter of 2017 and change our accounting policy to recognize forfeitures as they occur. This change will not have a material effect on our results of operations as we currently do not apply an estimated forfeiture rate to restricted stock awards to our officers and directors. Additionally, most of our outstanding stock option awards vest on a monthly basis over the vesting period (generally three or four years). As these awards do not have performance conditions, the expense is recognized each month on a straight-line basis and excludes the effect of the estimated forfeiture rate as there is no risk of expensing awards that would be subsequently forfeited prior to vesting.

In June 2016, the FASB issued a new credit loss standard that replaces the incurred loss impairment methodology in current GAAP. The new impairment model requires immediate recognition of estimated credit losses expected to occur for most financial assets and certain other instruments. It is effective for annual reporting periods beginning after December 15, 2019 and interim periods within those annual periods. Early adoption for fiscal years beginning after December 15, 2018 is permitted. Entities will apply the standard's provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first effective reporting period. We have not yet determined the impact that the new guidance will have on our results of operations, financial position and cash flows and have not yet determined if we will early adopt the standard.

In January 2017, the FASB issued a new goodwill impairment standard that simplifies the goodwill impairment testing methodology. The new standard eliminates Step 2 of the goodwill impairment test, in which an entity determines the fair value at the test date of its assets and liabilities using the procedure that would be required in determining the fair value of assets acquired and liabilities assumed in a business combination. It is effective for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We will early adopt the standard as of January 1, 2017. We do not expect the standard to have a material effect on our results of operations.

Recently adopted accounting standards

In February 2015, the FASB issued guidance which makes targeted amendments to current consolidation guidance. Among other things, the standard changes the manner in which we would assess one of the characteristics of variable interest entities ("VIEs") and introduces a separate analysis specific to limited partnerships and similar entities (such as Nutra SA, LLC) for assessing if the equity holders at risk lack decision making authority. Limited partnerships and similar entities will be a VIE unless the limited partners hold substantive kick-out rights or participating rights. A right to liquidate an entity is akin to a kick-out right. Guidance for limited partnerships under the voting model has been eliminated. A limited partner and similar partners with a controlling financial interest obtained through substantive kick-out rights would consolidate a limited partnership or similar entity. Upon adoption in the first quarter of 2016, there was no impact on our financial position or results of operations. Specifically, under the new guidance, we continue to be the primary beneficiary of Nutra SA, LLC.

In August 2014, the FASB issued guidance which requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued and provides guidance on determining when and how to disclose going concern uncertainties in the financial statements.

Certain disclosures will be required if conditions give rise to substantial doubt about an entity's ability to continue as a going concern. The guidance applies to all entities and is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. We adopted this standard in the fourth quarter of 2016, and it did not have a material effect on our results of operations.

NOTE 3. LOSS PER SHARE ("EPS")

Basic EPS is calculated under the two-class method under which all earnings (distributed and undistributed) are allocated to each class of common stock and participating securities based on their respective rights to receive dividends. Our Series F Convertible Preferred Stock (the "Series F Preferred Stock") is considered a participating security as the security holders may participate in undistributed earnings with holders of common shares. The holders of the Series F Preferred Stock are not obligated to share in net losses of the Company.

Index

Diluted EPS is computed by dividing the net income attributable to RiceBran Technologies shareholders by the weighted average number of shares outstanding during the period increased by the number of additional shares that would have been outstanding if the impact of assumed exercises and conversions is dilutive. The dilutive effect of outstanding stock options, warrants and nonvested shares that vest solely on the basis of a service condition is calculated using the treasury stock method. The dilutive effect of the Series F Preferred Stock is calculated using the if-converted method.

Below are reconciliations of the numerators and denominators in the EPS computations.

	2016	2015
NUMERATOR (in thousands):		
Basic and diluted - net loss attributable to RiceBran Technologies shareholders	\$(8,530)	\$(8,268)
Dividend on preferred stock--beneficial conversion feature	(551)	-
Basic and diluted - net loss attributable to RiceBran Technologies common shareholders	\$(9,081)	\$(8,268)
DENOMINATOR:		
Basic EPS - weighted average number of common shares outstanding	9,338,370	9,187,983
Effect of dilutive securities outstanding	-	-
Diluted EPS - weighted average number of shares outstanding	9,338,370	9,187,983
Number of shares of common stock which could be purchased with weighted average outstanding securities not included in diluted EPS because effect would be antidilutive:		
Stock options	305,355	305,690
Warrants	10,308,778	6,879,792
Nonvested shares of common stock	1,132,724	282,929
Convertible preferred stock	1,708,791	-

The impacts of potentially dilutive securities outstanding at December 31, 2016 and 2015, were not included in the calculation of diluted EPS in 2016 and 2015 because to do so would be anti-dilutive. Those securities listed in the table above which were anti-dilutive in 2016 and 2015, which remain outstanding, could potentially dilute EPS in the future.

NOTE 4. REDEEMABLE NONCONTROLLING INTEREST IN NUTRA SA

We hold a variable interest which relates to our equity interest in Nutra SA (see Note 1). In December 2010, we entered into a membership interest purchase agreement (“MIPA”) with AF Bran Holdings-NL LLC and AF Bran Holdings LLC (the “Investors”). The Investors’ share of Nutra SA’s net income (loss) increases (decreases) redeemable noncontrolling interest. Our variable interest in Nutra SA is our Brazil segment. We are the primary beneficiary of Nutra SA, and as such, Nutra SA’s assets, liabilities and results of operations are included in our consolidated financial statements. The Investors’ interests are reflected in net loss attributable to noncontrolling interest in Nutra SA in the consolidated statements of operations and redeemable noncontrolling interest in Nutra SA in the consolidated balance sheets. Due to the goodwill impairment charge recorded in the second quarter of 2016 combined with continuing operating losses, the carrying amount of the redeemable noncontrolling interest reflects a deficit balance beginning in the second quarter of 2016. This deficit balance is reflected in the total (deficit) equity attributable to RiceBran Technologies shareholders section of our consolidated balance sheet at December 31, 2016. Prior to June 30, 2016, the redeemable noncontrolling interest was reflected in the total temporary equity section of our consolidated balance sheet. A summary of the carrying amounts of Nutra SA balances included in our consolidated balance sheets follows (in thousands).

Index

	December 31,	
	2016	2015
Cash and cash equivalents	\$ 109	\$ 104
Other current assets (restricted \$398 and \$1,003)	1,696	2,760
Property and equipment, net (restricted \$2,481 and \$2,102)	10,889	9,502
Goodwill and intangibles, net	-	2,468
Other noncurrent assets	1,326	43
Total assets	\$ 14,020	\$ 14,877
Current liabilities	\$ 8,031	\$ 4,647
Current portion of long-term debt (nonrecourse)	6,816	2,750
Long-term debt, less current portion (nonrecourse)	-	3,553
Total liabilities	\$ 14,847	\$ 10,950

Nutra SA's debt is secured by its accounts receivable and property and equipment. The non-Brazilian entities in the consolidated group do not guarantee any of Nutra SA's debt.

Cash provided by operations in our Brazil segment is generally unavailable for distribution to our Corporate and USA segments pursuant to the terms of the limited liability company agreement of Nutra SA ("LLC Agreement").

In 2016 and 2015, we invested \$1.1 million and \$3.6 million in Nutra SA. Upon receipt of the escrow funds by us on March 24, 2016 (see Note 9), Nutra SA redeemed a certain number of units held by us equal to \$1.7 million, which resulted in a slight decrease in our membership interest in Nutra SA. Our membership interest subsequently changed due to additional investments by us and by the Investors. In 2016, the Investors contributed \$1.74 million to Nutra SA. Under the terms of the February 2017 Transactions, we are prohibited from contributing additional capital to Irgovel. A summary of changes in redeemable noncontrolling interest and the Investor's interest in Nutra SA follows (in thousands):

	2016	2015
Redeemable noncontrolling interest in Nutra SA, beginning of period	\$ 69	\$ 2,643
Investors' interest in net loss of Nutra SA	(2,720)	(2,308)
Investors' interest in accumulated other comprehensive loss of Nutra SA	232	(839)
Investors' purchase of additional units	1,740	-
Other cash equity adjustment	(20)	-
Accumulated Yield classified as other current liability	-	573
Redeemable noncontrolling interest in Nutra SA, end of period	\$(699)	\$ 69
Investors' average interest in Nutra SA during the period	32.8 %	32.9 %
Investors' interest in Nutra SA at the end of the period	34.9 %	32.0 %

The Investors have drag along rights which provide the Investors the ability to force a sale of Nutra SA assets after January 1, 2018. The right terminates upon the occurrence of certain events (a \$50 million Nutra SA initial public offering or a change of control, as defined in the LLC Agreement). We may elect to exercise a right of first refusal to purchase the Investors' interest instead of proceeding to a sale. We have assessed the likelihood of the Investors exercising these rights as less than probable at December 31, 2016. We will continue to evaluate the probability of the Investors exercising their drag along rights each reporting period. We will begin to accrete the redeemable noncontrolling interest up to fair value if and when it is probable the Investors will exercise these rights.

The Investors may elect, until January 1, 2018, to exercise their Exchange Right. The appraised fair value of the Investors' interest in Nutra SA and the market price of our stock would be used to determine the amount of ownership

interest the Investors would receive. The shares issued to the Investors may not exceed 49% of our outstanding common stock after such issuance; however, if this limitation applies, we would be required to issue to the Investors a warrant to purchase a number of shares of our common stock that, when combined with the shares of common stock issued to the Investors, would equal 49% of our fully diluted shares outstanding after such issuance.

Under the original LLC Agreement, as amended, any units held by the Investors beginning January 1, 2014, accrued a yield at 4% ("Yield"). The LLC Agreement was further amended in August 2015 to eliminate the Yield, which resulted in the reversal of the Yield accrued since January 1, 2014, in the amount of \$0.6 million.

Index

Nutra SA must distribute all distributable cash (as defined in the LLC Agreement) to the members on March 31 of each year as follows: (i) first, to us and the Investors in proportion to our additional capital preference percentages (with respect to us, this means total contributions we make on or after June 3, 2015 as a percentage of the total contributions we make after June 3, 2015 plus the amount contributed by the investors as of April 30, 2015; with respect to the Investors, this means the amount contributed by the investors as of April 30, 2015, as a percentage of the amount contributed by the investors as of April 30, 2015, plus total contributions we make on or after June 3, 2015), (ii) second, to the Investors in an amount equal to 2.0 times the Investors' capital contributions, less the aggregate amount of distributions paid to the Investors, (iii) third, to us in an amount equal to twice the capital contributions made by us, less the aggregate amount of distributions paid to us; and (iv) fourth, to us and the Investors in proportion to our respective membership interests.

Under the LLC Agreement, the business of Nutra SA is to be conducted by the manager, currently our CEO, subject to the oversight of the management committee. The management committee is comprised of three of our representatives and two Investor representatives. Upon an event of default or a qualifying event, we will no longer control the management committee and the management committee will include three Investor representatives and two of our representatives. In addition, following an event of default or a qualifying event, a majority of the members of the management committee may replace the manager of Nutra SA.

As of December 31, 2016, there have been no unwaived events of default. Events of default, as defined in the MIPA and the October 2013 amendment of investment agreements, are failure of Irgovel to meet minimum annual processing targets or to achieve EBITDA on a local currency basis of at least R\$4.0 million annually.

As of December 31, 2016, there have been no qualifying events. The LLC Agreement defines a qualifying event as the bankruptcy of RiceBran Technologies or Nutra SA.

In evaluating whether we are the primary beneficiary of Nutra SA, we considered the matters which could be put to a vote of the members. Until there is an event of default or a qualifying event, the Investors' rights and abilities, individually or in the aggregate, do not allow them to substantively participate in the operations of Nutra SA. The Investors do not currently have the ability to dissolve Nutra SA or otherwise force the sale of all its assets. They do have drag along rights in the future. We will continue to evaluate our ability to control Nutra SA each reporting period.

NOTE 5. INVENTORIES

Inventories are composed of the following (in thousands):

	As of December 31,	
	2016	2015
Finished goods	\$ 1,055	\$ 1,575
Work in process	704	270
Raw materials	1,082	1,259
Packaging supplies	932	753
Total inventories	\$ 3,773	\$ 3,857

NOTE 6. PROPERTY AND EQUIPMENT

Property and equipment consists of the following (in thousands):

	As of December 31,		
	2016	2015	Estimated Useful Lives

Edgar Filing: RiceBran Technologies - Form 10-K

Land	\$ 342	\$ 323	
Furniture and fixtures	545	433	5-10 years
Plant	14,586	13,122	25-30 years, or life of lease
Computer and software	1,715	1,594	3-5 years
Leasehold improvements	689	640	4-7 years or life of lease
Machinery and equipment	20,357	17,782	5-10 years
Subtotal	38,234	33,894	
Less accumulated depreciation	19,301	15,566	
Property and equipment, net	\$ 18,933	\$ 18,328	

Depreciation expense was \$2.0 million and \$2.6 million in 2016 and 2015, respectively. Effective June 30, 2015, as a result of plant operational changes, Irgovel extended the estimated useful lives on its machinery and equipment from an average of 5 years to an average of 10 years. As a result, 2015 depreciation in cost of goods sold was approximately \$0.3 million lower than it would have been prior to the change and loss per share was impacted favorably in 2015 by approximately \$0.04 per share.

IndexNOTE 7. GOODWILL

A summary of goodwill activity follows for 2016 and 2015 (in thousands).

	USA	Brazil	Total
Balance, December 31, 2014	\$790	\$3,641	\$4,431
Effect of change in exchange rate	-	(1,173)	(1,173)
Balance, December 31, 2015	790	2,468	3,258
Goodwill impairment	-	(3,024)	(3,024)
Effect of change in exchange rate	-	556	556
Balance, December 31, 2016	\$790	\$-	\$790

Several economic factors occurred during the second quarter of 2016, specifically related to our Brazil segment, including a decline in raw bran availability and continuing operating losses resulting in a lack of working capital. Due to the lack of working capital, the Brazil segment ceased making all bank debt payments in the second quarter of 2016. These events resulted in the need to perform an interim impairment test of our goodwill as of June 30, 2016, which resulted in an estimated goodwill write-down of \$3.0 million in the second quarter of 2016, which was recorded in our Brazil segment. In the third quarter of 2016, we completed the two-step goodwill impairment assessment to determine if any adjustment to the goodwill impairment charge was required. Based on the assessment, no modification of the initial impairment estimated was required in the third quarter of 2016.

We performed a qualitative test of goodwill for impairment during the fourth quarter of 2016. The results of the impairment test indicated that the fair value of our USA segment related goodwill was in excess of the carrying value, and thus was not impaired.

NOTE 8. INTANGIBLE ASSETS

Intangible assets consist of the following (in thousands):

	USA Segment			Total Intangible Assets
	Patents	Trademarks	Customer Lists	
<u>December 31, 2016</u>				
Cost	\$1,498	\$ 76	\$ 6,524	\$ 8,098
Accumulated amortization	(1,334)	-	(6,522)	(7,856)
Net book value	\$164	\$ 76	\$ 2	\$ 242
<u>December 31, 2015</u>				
Cost	\$1,498	\$ 76	\$ 6,524	\$ 8,098
Accumulated amortization	(1,215)	-	(5,658)	(6,873)
Net book value	\$283	\$ 76	\$ 866	\$ 1,225
	17			
Estimated useful lives	years	3 years	3 - 7 years	

Index

Amortization expense was \$1.0 million and \$1.5 million in 2016 and 2015, respectively. Future amortization expense for the remaining unamortized balance as of December 31, 2016 is estimated as follows (in thousands):

Years Ending December 31,	Amortization Expense
2017	\$ 130
2018	71
2019	30
2020	4
2021	4
Thereafter	3
Total amortization expense	\$ 242

NOTE 9. SEVERANCE ACTIVITIES

On August 27, 2016, W. John Short's employment as our chief executive officer was terminated. On November 18, 2016, the Company and Mr. Short entered into a Mutual Release Agreement (the "Release Agreement"), under which we resolved all matters related to Mr. Short's separation from employment with the Company and Mr. Short's service on our board of directors. The Release Agreement was effective on November 23, 2016. Pursuant to the Release Agreement, Mr. Short resigned from our board of directors, which resignation was effective November 29, 2016.

Pursuant to the Release Agreement, Mr. Short will receive the following payments: (i) an initial payment of \$220,000; (ii) an additional payment of \$225,000, payable on or before January 15, 2017; (iii) fifteen equal monthly installments of \$17,000, with the first installment being paid on or before February 15, 2017; and (iv) \$80,000, which represents the value of Mr. Short's compensation had he continued to serve on our board of directors. Payment of the amounts described in parts (i), (ii) and (iv) of this paragraph were made in accordance with the Release Agreement. Payment of the amounts described in part (iii) of this paragraph will accelerate in the event we complete certain asset sales, other than those made in the ordinary course of business.

In addition to the payments described above, the Release Agreement also provides for (i) a mutual release by Mr. Short and the Company, (ii) payment to Mr. Short's attorneys for legal fees incurred by Mr. Short in connection with matters related to Mr. Short's employment agreement and this Release Agreement, and (iii) full vesting of any unvested restricted stock held by Mr. Short.

During 2016, the USA segment recorded severance expense of approximately \$0.7 million associated with the Release Agreement, of which \$0.3 million had been paid as of December 31, 2016. The remaining outstanding obligations as of December 31, 2016 are expected to be paid during the next 15 months.

IndexNOTE 10. DEBT

The following table summarizes current and long-term portions of debt as of December 31, 2016 and 2015 (in thousands):

	2016	2015
Corporate segment:		
Senior revolving loan	\$1,725	\$1,617
Senior term note, net of debt issuance costs	917	1,407
Subordinated notes, net, maturing in May 2018, principal \$6.3 million	6,310	6,310
Subordinated notes, net, paid in July 2016	-	205

Total debt	\$ 9,071	\$ 6,816	\$15,887

Corporate SegmentSenior Revolving Loan and Term Note

In May 2015, we entered into an \$8 million senior secured credit facility agreement with a lender (the “Lender”) consisting of a \$3.5 million revolving loan, not to exceed a borrowing base, as defined in the agreement, and an initial \$2.5 million term loan, which term loan may be increased at the Lender’s discretion by up to \$2.0 million within 2 years. The funds were used for general corporate purposes and to provide working capital to facilitate future growth. The facility is secured by a senior interest in substantially all of our assets, excluding half of our interest in Nutra SA and RBT PRO, LLC. The credit facility matures on June 1, 2018, with the potential for two one-year maturity extensions. The loan bears interest at a variable interest rate based on LIBOR, with a 0.75% floor and 1.25% cap, plus 10.75% per annum, (11.5% at December 31, 2016) and we will pay certain fees under the agreement. Interest on the

term loan is payable quarterly and principal payments of \$0.1 million are payable quarterly beginning in October 2016 until the \$1.4 million remainder is payable at maturity. We issued a warrant to purchase 300,000 shares of common stock (exercise price of \$5.25, May 2020 expiration) to the Lender (see Note 11 for additional information related to the repricing of this warrant). As of December 31, 2016, the fair value of the warrant is \$0.1 million. As of December 31, 2016, the remaining unamortized discount on the term note is \$0.3 million. As of December 31, 2016, the remaining unamortized debt issuance costs related to the term note were \$0.1 million.

Index

The May 2015 agreement with the Lender included certain financial and non-financial covenants such as a requirement that we maintain \$2.0 million of total liquidity at all times which is defined as \$1.0 million in cash on hand and \$1.0 million of available borrowings. In February 2016, we entered into an agreement with the Lender which modified the financial covenants to require that (a) from February 1, 2016 to July 15, 2016, we maintain cash on hand, including availability under our revolving loan with the Lender, of not less than \$1.5 million provided that at least \$0.8 million of such amount must be in the form of cash on hand, and (b) we maintain an average monthly adjusted EBITDA, as defined by the agreement, calculated over each consecutive three-month period beginning on January 1, February 1, March 1, April 1 and May 1, 2016, of not less than \$0.1 million. The Lender also waived, for the first two quarters of 2016, any non-compliance with the financial covenants in the May 2015 agreement. The amendment with the Lender requires that we repay \$1.0 million of the senior term note which occurred on March 24, 2016. In consideration for the amendments, we paid and expensed \$0.1 million to the Lender in 2016.

In June 2016 and September 2016, we amended our agreements with the Lender to extend the prior modification of the loan agreement to December 31, 2016. The amendments required that we maintain cash on hand, including availability under our revolving loan with the Lender, of not less than approximately \$1.3 million, provided that at least \$0.5 million of such amount must be in the form of cash on hand (see Note 11 for additional information related to the repricing of the warrant associated with these modifications). We also paid an approximately \$0.2 million amendment fee in the third quarter of 2016, which was added to the outstanding loan balance. The Lender also waived, for the first three quarters of 2016, any non-compliance with the financial covenants in the May 2015 agreement. In November 2016, we entered into a limited waiver and amendment agreement with the Lender to waive any specified defaults (as defined in the agreement) and requiring we maintain cash on hand, including availability under our revolving loan with the Lender, of not less than approximately \$1.0 million, provided that at least \$0.3 million of such amount must be in the form of cash on hand. We also paid an approximately \$0.2 million extension fee in the fourth quarter of 2016 related to this agreement, which was added to the outstanding loan balance.

See Note 20 for additional information related to 2017 debt refinancing transactions, including full repayment of amounts owed to the Lender.

Subordinated Notes

In May 2015, the terms of subordinated notes in the principal amount of \$6.3 million were amended to extend the maturity dates from July 2016 to May 2018 and change the interest rate from 5% per year to an annual interest rate of LIBOR (as defined in the amendment) plus 11% (currently 11.75%) (the "Note Amendment"). Interest is payable quarterly. Principal was payable in seven quarterly installments of \$0.3 million beginning in October 2016, with the remainder of principal due in May 2018. The holders of these notes received warrants to acquire 289,670 shares of common stock in the aggregate (exercise price of \$5.25, May 2020 expiration). We accounted for the amendment as an extinguishment and reissuance. We recognized a \$1.9 million loss on extinguishment equal to the total of (i) the difference between the \$5.1 million carrying value of the notes on the date of the transaction and the \$6.3 million face value of the notes and (ii) the \$0.7 million fair value of the warrants at issuance. These notes are secured by a subordinated interest in substantially all of our assets, excluding our interest in Nutra SA and RBT PRO, LLC.

The terms of subordinate notes in the principal amount of \$0.2 million were not modified in May 2015. These notes were paid in full in July 2016.

See Note 20 for additional information related to 2017 debt refinancing transactions, including modification of terms related to the Subordinated Notes and repricing of the related warrants.

Brazil Segment

As of December 31, 2016, Brazil had approximately \$0.5 million (USD) of installment loans in arrears. The banks have not called these loans in default, and management continues to work with the lenders to renegotiate payment terms, however, all Brazil segment debt has been classified as current in the accompanying consolidated balance sheet as of December 31, 2016. All Brazil segment debt is denominated in the Brazilian Real (R\$), except advances on customer export orders which are denominated in U.S. Dollars.

Capital Expansion Loans

In December 2011, Irgovel entered into loan agreements with the Bank of Brazil. As of December 31, 2016, the remaining notes held a principal balance of R\$8.0 million. The annual interest rate on the loans is 6.5%, payable quarterly and the loans mature December 2021. Irgovel must make monthly principal payments under each of the loans. In July 2012, Irgovel entered into an agreement with the bank under which it borrowed R\$1.7 million at an annual interest rate of 5.5%. Interest is payable quarterly on the amounts outstanding and the maturity date of the loans is July 2019. Irgovel must make monthly principal payments under the loans. The capital expansion loans are secured by the related equipment.

Index

Working Capital Lines of Credit

Irgovel has working capital lines of credit secured by accounts receivable. The total amount of borrowing cannot exceed 40%-100% of the collateral, depending on the agreement. The annual interest rates on this debt range from 8.4% to 34.8%, and average 19.9%. Principal maturities of amounts outstanding extend through December 2018.

Advances on Customer Export Orders

Irgovel obtains advances against certain customer export orders from various banks which must be evidenced subsequently by accounts receivable related to the export of its products. The annual interest rate on these advances is 30.7%. These amounts mature in 2017.

Special Tax Programs

Irgovel has an unsecured note payable for Brazilian federal and social security taxes under special government tax programs. Principal and interest payments are due monthly through January 2029. Interest on the notes is payable monthly at the Brazilian SELIC target rate, which was 13.8% at December 31, 2016.

Provisions and Covenants

As of December 31, 2016, we are in compliance with the provisions and financial covenants associated with our debt agreements, as modified and discussed above.

NOTE 11. EQUITY AND SHARE-BASED COMPENSATION

Preferred Stock and Warrant Offering

In February 2016, our board of directors authorized the issuance of 3,000 shares of Series F Preferred Stock. The Series F Preferred Stock is non-voting and may be converted into a total of 2,000,000 shares of our common stock at the holder's election at any time, subject to certain beneficial ownership limitations, at a ratio of 1 preferred share for 666.66666 shares of common stock. The Series F Preferred Stock is only entitled to receive dividends if we declare dividends, in which case the dividend will be paid (i) first an amount equal to \$0.01 per share of preferred stock and (ii) then to and in the same form as dividends paid on shares of our common stock. Otherwise, the Series F Preferred Stock has no liquidation or other preferences over our common stock.

In February 2016, in conjunction with the sale of the Series F Preferred Stock, we also sold warrants to purchase 2,660,000 shares of common stock (exercise price of \$2.00 per share, exercisable beginning in August 2016 and expiring in August 2021). The placement agent for the offering received a cash fee of \$0.2 million. The net proceeds from the offering were \$2.6 million, after deducting placement agent discounts, commissions and other cash offering expenses of \$0.4 million. On the date of issuance, we allocated \$2.5 million of the \$3.0 million gross proceeds to derivative warrant liability, to record the warrants at fair value and recorded the remaining \$0.5 million proceeds as preferred stock. We recorded a dividend on preferred stock for the preferred stock beneficial conversion feature equal to the proceeds allocated to the preferred stock at issuance (\$0.5 million), as the fair value of the common stock underlying the convertible preferred stock at issuance was \$2.7 million. As a result of this offering, the exercise price of certain warrants that contain full ratchet anti-dilution provisions was reduced from \$5.24 per share to \$1.50 per share and the number of shares of common stock underlying these warrants increased from 426,489 shares to 1,489,868 shares.

See Note 20 for additional information related to 2017 equity transactions, including issuance of Series G Preferred Stock and related warrants.

Employee and Director RSA Issuances and Adjustments

In June 2015, we issued 139,047 RSAs to directors and executive officers at a grant date fair value of \$3.38 per share. Approximately 48% of these shares vest in equal annual installments over three years and the remaining shares vested in June 2016.

In August 2014, we issued 281,620 shares of common stock to directors and executive officers at a grant date fair value of \$4.91 per share. Approximately 16% of these shares were immediately vested, 19% of these shares vested in June 2015 and the remaining 65% vest in August 2017.

48

Index

In September 2016, we issued RSAs to directors at a grant date fair value of \$1.46 per share. We issued 174,825 shares which vest on the earlier of June 30, 2017 or one day before the date of the next annual shareholder meeting.

As described in Note 9, in connection with Mr. Short’s Release Agreement, vesting of Mr. Short’s 147,836 unvested RSA awards was accelerated upon his release from the Company, and 36,959 of those shares were withheld to settle withholding tax obligations.

Other Equity Issuances and Adjustments

In January 2016, we entered into a note payable with a director in the principal amount of \$0.3 million and issued the director a warrant to acquire 25,000 share of common stock (exercise price of \$5.25, exercisable immediately and expiring in January 2021). On the date of issuance, we recorded the warrant at fair value as a derivative warrant liability, pursuant to the Share Sequencing, and recorded a corresponding debt discount which amortized to interest expense when we repaid the note and accumulated interest in full in March 2016.

In February 2016, we issued 950,000 shares of common stock to a supplier. The shares are being held in escrow until earned (as defined in our agreement) by the supplier at a fixed price of \$2.80 per share. As of December 31, 2016, 10,753 shares have been released from escrow. Any shares remaining in escrow as of February 8, 2026 are subject to recall by the Company. Any recalled shares will be cancelled.

In June 2016, we entered into an amendment agreement with our Lender to extend the prior modification of the loan agreement. In connection with this amendment, we repriced a previously issued warrant held by the Lender from \$5.25 per share to \$1.85 per share. In September 2016, we entered into an additional amendment agreement with our Lender to extend the prior modification of the loan agreement. In connection with this amendment, we repriced the warrant held by the Lender from \$1.85 per share to \$1.60 per share. Both prior to and subsequent to these modifications, we recorded the warrant at fair value as a derivative warrant liability, pursuant to the Share Sequencing, with changes in fair value recorded in the consolidated statements of operations.

See Note 20 for additional information related to 2017 equity transactions, including repricing of existing warrants held by participants in the 2017 equity and debt transactions in addition to new warrant issuances to participants.

Equity Incentive Plan, RSAs, Stock Options and Warrants

Share-based compensation expenses related to stock option and RSA grants issued to employees and directors are included in selling, general and administrative expenses in the statements of operations, and consisted of the following (in thousands):

	2016	2015
USA	\$975	\$804
Brazil	35	53
Total share-based compensation expense	\$1,010	\$857

As of December 31, 2016, total compensation cost related to nonvested stock options and RSAs not yet recognized is \$691,000, which is expected to be recognized over the next 0.7 years on a weighted-average basis.

Company Plan

Our board of directors adopted our 2014 Equity Incentive Plan in August 2014 (“2014 Plan”), after the plan was approved by shareholders. A total of 1,600,000 shares of common stock were initially reserved for issuance under the plan. Under the terms of the plan, we may grant stock options and shares of common stock to officers, directors,

employees or consultants providing services on such terms as are determined by the board of directors. Our board of directors administers the plan, determines vesting schedules on plan awards and may accelerate the vesting schedules for award recipients. The stock options granted under the plan have terms of up to 10 years. As of December 31, 2016, stock options to purchase 170,811 shares have been granted and remain outstanding, 256,839 RSAs have been issued and remain unvested and 841,159 shares are reserved for future grants under the 2014 Plan.

Index
RSAs

A summary of our RSA activity for 2016 follows.

	Number	Weighted Average Grant Date Fair Value	Fair Value
Nonvested at December 31, 2015	324,229	\$ 4.25	
Granted	201,752	\$ 1.42	
Vested, including shares withheld to cover taxes	(269,142)	\$ 3.86	\$366,567 (a)
Forfeited	-	NA	
Nonvested at December 31, 2016	256,839	\$ 2.44	\$264,544 (b)

The aggregate fair value of vested RSAs represents the total pre-tax fair value, based on the closing stock price on (a) the day of vesting, which would have been received by holders of RSAs had all such holders sold their underlying shares on that date.

The aggregate fair value of the nonvested RSAs represents the total pre-tax fair value, based on our closing stock (b) price of \$1.03 as of December 30, 2016 (the last trading day of the year), which would have been received by holders of RSAs had all such holders sold their underlying shares on that date.

During 2016, the RSAs that vested for employees in the United States were net-share settled such that we withheld shares with value equivalent to the employees' minimum statutory United States tax obligation for the applicable income and other employment taxes and remitted the equivalent cash amount to the appropriate taxing authorities. The total shares withheld during 2016 of 42,662 were based on the value of the RSAs on their vesting dates as determined by our closing stock price on such dates. For 2016, total payments for the employees' tax obligations to the taxing authorities were approximately \$43,000 and are reflected as a financing activity within the accompanying consolidated statement of cash flows. These net-share settlements had the effect of repurchases of our common stock as they reduced the number of shares outstanding as a result of the vesting and did not represent an expense to us.

Stock Options

A summary of stock option activity for 2016 and 2015 follows.

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
Outstanding, December 31, 2014	269,642	\$ 12.12	7.9
Granted	110,993	3.26	
Exercised	-	NA	
Forfeited, expired or cancelled	(22,838)	20.21	
Outstanding, December 31, 2015	357,797	12.12	7.9
Granted	-	NA	
Exercised	-	NA	
Forfeited, expired or cancelled	(186,986)	8.88	

Edgar Filing: RiceBran Technologies - Form 10-K

Outstanding, December 31, 2016	170,811	\$ 8.83	7.2
Exercisable, December 31, 2016	128,332	\$ 10.53	6.8

As of December 31, 2016, our outstanding stock options have no intrinsic value. We did not grant stock options in 2016. The average fair value of stock options granted was \$2.68 per share in 2015. The following are the assumptions used in valuing the 2015 stock option grants:

50

Index

	2015	Weighted Average
Assumed volatility	90.7% - 112.5%	112.0%
Assumed risk free interest rate	0.9% - 1.6%	1.6%
Average expected life of options (in years)	6.2

The following table summarizes information related to outstanding and exercisable warrants as of December 31, 2016:

Range of Exercise Prices	Type of Warrant	Shares Under Warrants	Outstanding and Exercisable	
			Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
\$1.50 to \$1.60	Liability (1)	1,789,868	\$ 1.52	1.3
\$2.00	Liability (2)	2,660,000	2.00	4.6
\$5.25	Equity (3)	2,336,358	5.25	2.4
\$5.27 to \$5.87	Equity	1,984,981	5.48	3.0
\$6.55 to \$16.80	Equity	2,067,771	6.61	2.0
		10,838,978	\$ 4.14	2.8

(1) Includes two warrants for 1,489,868 shares which contain full ratchet anti-dilution provisions and are classified as derivative warrant liabilities in our balance sheets. Under the anti-dilution clauses contained in these warrants, in the event of equity issuances (i.e. issuances of our common stock, certain awards of stock options to employees, and issuances of warrants and/or other convertible instruments) at prices below the exercise prices of these warrants, we may be required to lower the exercise price on these warrants and increase the number of shares underlying these warrants. The remaining warrant for 300,000 shares was issued to the Lender in May 2015 and contains a most favored nations anti-dilution provision. Under that provision, in the event of issuances of stock options and/or convertible instruments with anti-dilution provisions (providing for the adjustment of the exercise price, conversion price or other price or rate at which shares of common stock thereunder may be purchased, acquired or converted, and/or any upward adjustment in the number of shares of common stock issuable) we may be required to lower the exercise price on this warrant and/or increase the number of shares underlying this warrant.

(2) The warrants were issued in February 2016, in conjunction with the sale of the Series F Preferred Stock, and are classified as derivative warrant liabilities in our balance sheets primarily due to the Share Sequencing.

(3) Includes a warrant for 25,000 shares issued in January 2016 classified as a derivative warrant liability in our balance sheets due to the Share Sequencing.

NOTE 12. INCOME TAXES

Deferred tax assets (liabilities) are comprised of the following (in thousands):

	As of December 31,	
	2016	2015
<u>United States</u>		
Net operating loss carryforwards	\$ 5,609	\$ 4,007
Gain on sale of membership interests in Nutra SA	363	366
Stock options and warrants	724	719
Property	753	(174)
Intangible assets	76	(274)
Capitalized expenses	342	462
Debt and deferred financing	178	329
Other	486	345

Edgar Filing: RiceBran Technologies - Form 10-K

Net deferred tax assets	8,531	5,780
Less: Valuation allowance	(8,558)	(5,814)
Deferred tax asset (liability)	(27)	(34)
<u>Brazil</u>		
Property	(841)	(731)
Net operating loss carryforwards	7,040	4,320
Other	551	360
Net deferred tax assets	6,750	3,949
Less: Valuation allowance	(6,750)	(3,949)
Deferred tax asset (liability)	\$ -	\$ -

Index

Deferred taxes arise from temporary differences in the recognition of certain expenses for tax and financial reporting purposes. We have determined it is more likely than not that some portion or all of the deferred tax assets will not be realized. Accordingly we have provided a valuation allowance for deferred tax assets. Our valuation allowance is on U.S. and Brazil deferred tax assets.

The following table summarizes the change in the valuation allowance (in thousands).

	As of December 31,	
	2016	2015
Vaulation allowances at beginning of year	\$ 9,763	\$ 7,763
Net operating loss	2,185	2,331
Brazil increase, net of foreign currency translation effects	2,801	82
Other	559	(413)
Valuation allowances at end of year	\$ 15,308	\$ 9,763

As of December 31, 2016, net operating loss carryforwards for U.S. federal tax purposes totaled \$14.3 million and expire at various dates from 2018 through 2036. Net operating loss carryforwards for state tax purposes totaled \$16.3 million as of December 31, 2016, and expire at various dates from 2017 through 2036. As of December 31, 2016, net operating loss carryforwards for Brazil tax purposes totaled \$20.7 million and do not expire but may be subject to substantial annual limitations (generally 30% of taxable income in any year).

Due to offerings and conversions that occurred in 2013 and 2014, we believe our ability to utilize previously accumulated net operating loss carryforwards are subject to substantial annual limitations due to “change in ownership” provisions of the Internal Revenue Code of 1986, as amended, and similar state regulations. Therefore in 2014, we recorded the impact of the expiration of substantial net operating loss carryforwards prior to utilization. We have not yet completed a formal analysis to determine the exact amount of such limitation, therefore, our estimate of the annual limitation is subject to change.

We are subject to taxation in the U.S. federal jurisdiction and various state and local and non-U.S. jurisdictions. We record liabilities for income tax contingencies based on our best estimate of the underlying exposures. We are open for audit by the IRS for years after 2012 and, generally, by U.S. state tax jurisdictions after 2011. We are open for audit by the Brazilian tax authorities for years after 2011.

Loss before income taxes is comprised of the following (in thousands):

	Years Ended December 31,	
	2016	2015
Foreign	\$ (8,300)	\$ (5,136)
Domestic	(2,924)	(5,616)
Loss before income taxes	\$ (11,224)	\$ (10,752)

Foreign earnings are assumed to be permanently reinvested. U.S. federal income taxes have not been provided on undistributed earnings of our foreign subsidiary.

The income tax expense of \$41,000 in 2016 is all related to current state tax expense. The income tax benefit of \$0.2 million in 2015 is related to U.S. federal and state deferred tax benefit and current state tax expense.

Index

Reconciliations between the amount computed by applying the U.S. federal statutory tax rate (34%) to loss before income taxes, and income tax benefit follows (in thousands):

	Years Ended December 31,	
	2016	2015
Income tax benefit at federal statutory rate	\$ (3,816)	\$ (3,656)
Increase (decrease) resulting from:		
State tax benefit, net of federal tax effect	(132)	(176)
Change in valuation allowance	4,572	3,601
Expiration of U.S. net operating losses	105	101
Reduction in deferred balances for forfeited, expired or cancelled options	168	75
Nontaxable fair value adjustment	(553)	(340)
Nondeductible debt issuance expenses	-	19
Impact of state rate changes	10	16
Nondeductible expenses	(465)	91
Adjustments to U.S. deferred balances	152	93
Income tax benefit	\$ 41	\$ (176)

We recognize interest and penalties related to uncertain tax positions in selling, general and administrative expenses. We have not identified any uncertain tax positions requiring a reserve as of December 31, 2016 or 2015. We may be subject to potential examination by various taxing authorities in the United States and Brazil. These potential examinations may include questioning the timing and amount of deductions, the nexus of income among various tax jurisdictions and compliance with federal and state tax laws. We do not expect that the total amount of unrecognized tax benefits will materially change over the next twelve months.

NOTE 13. CONCENTRATION OF RISK

Financial instruments that potentially subject us to significant concentrations of credit risk consist primarily of trade accounts receivable. We perform ongoing credit evaluations on our customers' financial condition and generally do not require collateral.

Revenues and accounts receivable from certain significant customers are stated below as a percent of consolidated totals for the years ended December 31, 2016 and 2015.

Customer	Segment	% of Consolidated Revenue		% of Consolidated Accounts Receivable			
		2016	2015	2016	2015		
Customer 1	USA	43 %	31 %	14 %	*		
Customer 2	USA	*	*	15 %	*		
Customer 3	Brazil	*	*	*	17 %		
Customer 4	Brazil	13 %	*	28 %	*		
Customer 5	Brazil	11 %	*	*	*		
Others		33 %	69 %	43 %	83 %		
Total		100 %	100 %	100 %	100 %		

* Less than 10%

As of December 31, 2016, 152 of our 227 employees were located in Brazil. All of our employees in Brazil are represented by a labor union and are covered by a collective bargaining agreement.

NOTE 14. FAIR VALUE MEASUREMENT

The fair value of cash and cash equivalents, accounts and other receivables and accounts payable approximates their carrying value due to their shorter maturities. As of December 31, 2016, the fair value of our Corporate segment debt (Level 3 measurement) approximates the \$9.0 million carrying value of that debt, based on current market rates for similar debt with similar maturities. The fair value of our Brazil segment debt (Level 3 measurement) also approximates the \$6.8 million carrying value of that debt based on the current market rates for similar debt with similar maturities.

Fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Certain assets and liabilities are presented in the financial statements at fair value. Assets and liabilities measured at fair value on a recurring basis include derivative warrant and conversion liabilities. Assets and liabilities measured at fair value on a non-recurring basis may include property.

Index

We assess the inputs used to measure fair value using a three-tier hierarchy based on the extent to which inputs used in measuring fair value are observable in the market:

Level 1 – inputs include quoted prices for identical instruments and are the most observable.

Level 2 – inputs include quoted prices for similar assets and observable inputs such as interest rates, currency exchange rates and yield curves.

Level 3 – inputs are not observable in the market and include management’s judgments about the assumptions market participants would use in pricing the asset or liability.

For instruments measured using Level 3 inputs, a reconciliation of the beginning and ending balances is disclosed.

The following tables summarize the fair values by input hierarchy of items measured at fair value on a recurring basis on our consolidated balance sheets (in thousands):

	Level 1	Level 2	Level 3	Total
Total liabilities at fair value, as of December 31, 2016 - derivative warrant liabilities	\$ -	\$ -	\$(1,527)	\$(1,527)
Total liabilities at fair value, as of December 31, 2015 - derivative warrant liabilities	\$ -	\$ -	\$(678)	\$(678)

Warrants accounted for as derivative liabilities are valued using the lattice model each reporting period and the resultant change in fair value is recorded in the statements of operations. The lattice model requires us to assess the probability of future issuance of equity instruments at a price lower than the current exercise price of the warrants. The risk-free interest rate is determined by reference to the treasury yield curve rate of instruments with the same term as the warrant. Additional assumptions that were used to calculate fair value follow.

	December 31, 2016	December 31, 2015
Risk-free interest rate	0.6% - 1.9% (1.6% weighted average)	0.9% - 1.2% (1.1% weighted average)
Expected volatility	64% (64% weighted average)	71% - 89% (78% weighted average)

The following tables summarize the changes in level 3 derivative warrant liabilities measured at fair value on a recurring basis (in thousands):

	Fair Value as of Beginning of Period	Total Realized and Unrealized Gains (Losses) (1)	Issuance of New Instruments	Fair Value, at End of Period
Year Ended December 31, 2016	\$ (678)	\$ 1,625	\$ (2,474)	\$ (1,527)
Year Ended December 31, 2015	\$ (955)	\$ 1,001	\$ (724)	\$ (678)

(1) Included in change in fair value of derivative warrant and conversion liabilities in our consolidated statements of operations.

NOTE 15. COMMITMENTS AND CONTINGENCIES

Employment Contracts and Severance Payments

In the normal course of business, we periodically enter into employment agreements which incorporate indemnification provisions. While the maximum amount to which we may be exposed under such agreements cannot be reasonably estimated, we maintain insurance coverage, which we believe will effectively mitigate our obligations under these indemnification provisions. No amounts have been recorded in our financial statements with respect to any obligations under such agreements.

55

Index

We have employment contracts with certain officers and key management that include provisions for potential severance payments in the event of without-cause terminations or terminations under certain circumstances after a change in control. In addition, vesting of outstanding nonvested equity grants would accelerate following a change in control. See Note 9 for severance information related to our former chief executive officer.

Leases

We lease certain properties under various operating lease arrangements that expire over the next 17 years. These leases generally provide us with the option to renew the lease at the end of the lease term. We incurred rent expense of \$0.6 million in 2016 and \$0.7 million in 2015.

Future minimum payments under these commitments as of December 31, 2016, are as follows (in thousands):

Years Ending December 31,	
2017	\$ 387
2018	259
2019	196
2020	65
2021	65
Thereafter	780
Total minimum lease payments	\$ 1,752

Litigation

In addition to the matters discussed below, from time to time we are involved in litigation incidental to the conduct of our business in the USA and Brazil. These matters may relate to employment and labor claims, patent and intellectual property claims, claims of alleged non-compliance with contract provisions and claims related to alleged violations of laws and regulations. When applicable, we record accruals for contingencies when it is probable that a liability will be incurred and the amount of loss can be reasonably estimated. While the outcome of lawsuits and other proceedings against us cannot be predicted with certainty, in the opinion of management, individually or in the aggregate, no such lawsuits are expected to have a material effect on our financial position or results of operations. Defense costs are expensed as incurred and are included in professional fees.

Irgovel Purchase

On August 28, 2008, former Irgovel stockholder David Resyng filed an indemnification suit against Irgovel, Osmar Brito and the remaining former Irgovel stockholders (“Sellers”), requesting: (i) the freezing of the escrow account maintained in connection with the transfer of Irgovel’s corporate control to us and the presentation of all documentation related to the transaction, and (ii) damages in the amount of the difference between (a) the sum received by David Resyng in connection with the judicial settlement agreement executed in the action for the partial dissolution of the limited liability company filed by David Resyng against Irgovel and the Sellers and (b) the amount received by the Sellers in connection with the sale of Irgovel’s corporate control to us, in addition to moral damages as determined in the court’s discretion. The amount of damage claimed by Mr. Resyng is approximately \$3.0 million.

We believe that the filing of the above lawsuit is a fundamental default of the obligations undertaken by the Sellers under the quotas purchase agreement for the transfer of Irgovel’s corporate control, executed by and among the Sellers and us on January 31, 2008 (“Purchase Agreement”). Consequently, we believe that the responsibility for any indemnity, costs and expenses incurred or that may come to be incurred by Irgovel and/or us in connection with the above lawsuit is the sole responsibility of the Sellers.

On February 6, 2009, the Sellers filed a collection lawsuit against us seeking payment of the second installment of the purchase price under the Purchase Agreement, which the Sellers assert is approximately \$1.0 million. We have withheld payment of the second installment pending resolution of the Resyng lawsuit noted above. RiceBran Technologies, the parent company, has not been served with any formal notices in regard to this matter. To date, only Irgovel has received formal legal notice. In addition, the Purchase Agreement requires that all disputes between us and the Sellers be adjudicated through arbitration. In 2015, a final unappealable arbitration award was granted in our favor.

As part of the Purchase Agreement, \$2.0 million was deposited into an escrow account to cover contingencies with the net remaining funds payable to the Sellers upon resolution of all contingencies. As of December 31, 2015, the balance in the escrow account was \$1.9 million and was included in restricted cash in our consolidated balance sheet. On January 12, 2016, the US District Court for the District of Arizona entered a final judgment in our favor affirming the arbitration award received in Brazil. On March 24, 2016, the \$1.9 million in the escrow account was released to us to fund the award owed to us by the Sellers and, as required under an agreement with the Lender, we repaid \$1.0 million of the term loan with the Lender.

Index

With regard to the request for freezing the escrow funds noted above, the Brazilian court ordered Irgovel not to access those funds under the premise that the Sellers may have a right to those funds as originally contemplated in the Purchase Agreement. A fine of R\$10,000 per day for violating that order was established by the court. From the escrow release date of March 24, 2016 through today, no fine has been imposed. We believe that with the final judgment in our favor, the Sellers no longer have any possible legal claim on the escrow funds and, thus, the court will remove the freeze. We are working with counsel in Brazil to effectuate that outcome.

We believe that there are no significant remaining contingencies. We recognized a gain of \$1.6 million in 2016, equal to the difference between the \$1.9 million escrow liability and the \$0.3 million of resolved pre-acquisition contingencies that had either been paid or specifically identified and accrued.

Irgovel Litigation

Irgovel is defendant in several labor claims, mainly related to overtime, illnesses allegedly contracted at work and work-related injuries and salary related matters for periods prior to the acquisition of Irgovel by RiceBran. The labor suits are mainly in the lower courts, and for the majority of the cases a decision for the dismissal of the claims has been granted. None of these labor claims is individually significant. Management believes it's unlikely there will be a judgment against Irgovel, however, in the event the court does issue a judgment against Irgovel, it could be approximately \$900,000 (USD).

Irgovel accrues for losses on tax and other legal contingencies when it has a present obligation, formalized or not, as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Irgovel is a party to other several pending litigations and administrative proceedings at the Federal, State and Municipal level. The assessment of the likelihood of an unfavorable outcome in these litigations and proceedings includes the analysis of the evidence available, the hierarchy of the applicable laws, available former court decisions, as well as the most recent court decisions and their importance to the Brazilian legal system, as well as the opinions of our external and in-house legal counsels. We record amounts considered sufficient by our management to cover probable losses based on these elements.

Irgovel - Events of Default

As further described in Note 4, Irgovel is required to meet minimum annual processing targets or to achieve EBITDA on a local currency basis of at least R\$4.0 million annually. If not achieved, this would result in an event of default. It is possible that an event of default may be triggered and a waiver of non-compliance may not be obtained from the Investors. At December 31, 2016, Irgovel did not meet this covenant but Investors waived the requirement.

Employment Contracts and Severance Payments

We have employment contracts with certain officers and key management that include provisions for potential severance payments in the event of without-cause terminations or terminations under certain circumstances after a change in control. In addition, vesting of outstanding nonvested equity grants would accelerate following a change in control. See Note 9 for severance information related to our former chief executive officer.

NOTE 16. CHIEF EXECUTIVE OFFICER APPOINTMENT

On August 27, 2016, Robert Smith, PhD, 55, was appointed interim Chief Executive Officer of RiceBran Technologies. Dr. Smith has served as our Chief Operating Officer since June 2016. Dr. Smith served as the Company's senior vice president of operations and R&D from November 2014 to June 2016, as senior vice president of sales and business development from November 2013 to November 2014 and as senior vice president of business development from March 2012 to November 2013. Dr. Smith brings over 20 years' experience managing research and

development and business development in the Ag-biotech industry. He served as director of business development at HerbalScience Group from 2007 to 2010 and worked at Affynis LLC from 2010 to 2012 as a consultant. Dr. Smith has also served as director of research and developments at Global Protein Products Inc. and PhycoGen Inc., and was project leader at Dekalb Genetics, a Monsanto Company. Dr. Smith was a research assistant professor at the Ag-Biotech Center at Rutgers University and did his post-doctoral work in plant molecular biology at the University of Missouri-Columbia. He holds a doctor of philosophy degree in molecular genetics and cell biology from the University of Chicago and a bachelor of arts degree in biology from the University of Chicago.

Index

NOTE 17. RELATED PARTY TRANSACTIONS

Transactions with Baruch Halpern

Entities beneficially owned by Baruch Halpern, a director, invested \$2.6 million in our subordinated notes and related warrants prior to 2014. In connection with the Note Amendment, in 2015, the notes, as previously modified, were amended to extend the maturity dates from July 2016 to May 2018 and change the interest rate from 5% per year to an annual interest rate of a rate determined as a function of LIBOR, consistent with other participating note holders. Entities beneficially owned by Mr. Halpern were also issued warrants to acquire 119,366 shares of common stock in the aggregate (exercise price of \$5.25, May 2020 expiration). We recognized a loss on extinguishment in 2015 related to the amendment of notes beneficially owned by Mr. Halpern. We recognized a loss on extinguishment in 2015 related to this transaction of \$0.7 million. We paid and expensed interest on subordinated notes beneficially owned by Mr. Halpern totaling \$0.3 million in 2016 and \$0.2 million in 2015.

In January 2016, we entered into a note payable with Mr. Halpern in the principal amount of \$0.3 million and issued Mr. Halpern a warrant to acquire 25,000 shares of common stock (exercise price of \$5.25, exercisable immediately and expiring in January 2021). Principal and all interest, accumulating at an 11.75% annual rate, was payable on October 31, 2016. We repaid the note and accumulated interest in full in March 2016.

See Note 20 for additional information related to 2017 equity transactions, including repricing of existing warrants held by subordinated note holders.

Transactions with W. John Short

W. John Short, our former chief executive officer and a former director, invested \$50,000 in our subordinated notes and related warrants prior to 2014. In connection with the Note Amendment, in 2015, the notes, as previously modified, were amended to extend the maturity dates from July 2016 to May 2018 and change the interest rate from 5% per year to an annual interest rate of a rate determined as a function of LIBOR, consistent with other participating note holders. Mr. Short was also issued warrants to acquire 2,446 shares of common stock in the aggregate (exercise price of \$5.25, May 2020 expiration). In 2016 and 2015, we paid and expensed less than \$10,000 of interest on subordinated notes beneficially owned by Mr. Short.

See Note 20 for additional information related to 2017 equity transactions, including repricing of existing warrants held by subordinated note holders.

Transactions with LF-RB Management, LLC

On July 5, 2016, we entered into a Settlement Agreement (“Settlement Agreement”) with (i) LF-RB Management, LLC, Stephen D. Baksa, Richard Bellofatto, Edward M. Giles, Michael Goose, Gary L. Herman, Larry Hopfenspirger and Richard Jacinto II (collectively, the “LF-RB Group”) and (ii) Beth Bronner, Ari Gendason and Brent Rosenthal (the “LF-RB Designees” and together with the LF-RB Group, the “Shareholder Group”). The LF-RB Group beneficially owns approximately 9.0% of our outstanding stock.

Among other things, under the Settlement Agreement we paid the LF-RB Group \$50,000 in cash and issued 100,000 shares of our common stock to designees of the LF-RB Group to partially reimburse the LF-RB Group for out-of-pocket legal fees and other expenses incurred by the LF-RB Group in connection with its solicitation of proxies to elect its designees to the Board at the 2016 Annual Meeting of Shareholders.

NOTE 18. FAILURE TO COMPLY WITH NASDAQ LISTING REQUIREMENTS

On August 18, 2016, we received a notification letter from The Nasdaq Stock Market LLC (“Nasdaq”) indicating that we have failed to comply with the minimum stockholders’ equity requirement of Nasdaq Listing Rule 5550(b)(1). Nasdaq Listing Rule 5550(b)(1) requires that companies listed on the Nasdaq Capital Market maintain a minimum of \$2.5 million in stockholders’ equity for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1) (the “Minimum Stockholders’ Equity Requirement”). Our Quarterly Report on Form 10-Q for the quarter ended June 30, 2016 reported stockholders’ equity (deficit) of (\$36,000).

We submitted our plan to regain compliance in October 2016. On November 15, 2016, based on information we submitted to Nasdaq, the Staff granted us the maximum allowable 180 day extension to February 14, 2017 to evidence compliance with the Minimum Stockholders’ Equity Requirement. On February 16, 2017, we received a determination letter (the “Letter”) from the Nasdaq Listing Qualifications Staff (the “Staff”) stating that we had not regained compliance with the Minimum Stockholders’ Equity Requirement. The Letter also stated our common stock would be delisted from The Nasdaq Capital Market at the opening of business on February 27, 2017 unless we request a hearing before the Nasdaq Hearing Panel (the “Panel”).

Index

We requested and were granted a hearing before the Panel to appeal the Letter on March 30, 2017. At the hearing, we intend to present a plan to regain compliance with the Minimum Stockholders' Equity Requirement and request that the Panel allow us additional time within which to regain compliance. The hearing will stay any delisting action in connection with the notice and allow the continued listing of our common stock on The Nasdaq Capital Market until the Panel renders a decision subsequent to the hearing, and our common stock will continue to trade on The Nasdaq Capital Market under the symbol "RIBT" until such time.

On March 10, 2017, we received a notification letter from Nasdaq indicating that we have failed to comply with the Minimum Bid Price Requirement of Nasdaq List Rule 5550(a)(2). Nasdaq Listing Rule 5550(a)(2) requires that companies listed on the Nasdaq Capital Market maintain a minimum price of \$1.00 for 30 consecutive business days. Nasdaq rules allow for a compliance period of 180 calendar days in which to regain compliance.

There can be no assurance that we will meet the Minimum Stockholders' Equity Requirement or the Minimum Bid Price Requirement during any compliance period or in the future, or otherwise meet Nasdaq compliance standards, or that Nasdaq will grant the Company any relief from delisting as necessary, or that we will be able to ultimately meet applicable Nasdaq requirements for any such relief.

NOTE 19. SEGMENT INFORMATION

We have two reportable operating segments: (i) USA, which manufactures and distributes SRB in various granulations along with Stage II products and derivatives and (ii) Brazil, which extracts crude RBO and DRB from rice bran, which are then further processed into fully refined rice bran oil for sale internationally and in Brazil, compounded animal nutrition products for horses, cows, swine, sheep and poultry and a number of valuable food ingredient and animal nutrition products derivatives and co-products. In addition we incur corporate and other expenses not directly attributable to operating segments, which include costs related to our corporate staff, general and administrative expenses including public company expenses, intellectual property, professional fees and other expenses. No Corporate allocations, including interest, are made to the operating segments.

Index

The tables below present segment information for the years identified and provide a reconciliation of segment information to total consolidated information (in thousands).

	2016			
	Corporate	USA	Brazil	Intersegment Consolidated
Revenues	\$-	\$32,675	\$6,745	\$ (15) \$ 39,405
Cost of goods sold	-	23,028	8,423	(15) 31,436
Gross profit	-	9,647	(1,678)	- 7,969
Depreciation and amortization (in selling, general and administrative)	(89)	(1,122)	(57)	- (1,268)

NOTE 20. SUBSEQUENT EVENTSSpecial Meeting of Shareholders

On February 13, 2017, the Company held a Special Meeting of Shareholders in order to approve an amendment to our articles of incorporation to increase the authorized number of shares of common stock from 25,000,000 to 50,000,000 for general corporate purposes and to approve an amendment to our bylaws to eliminate cumulative voting for directors. Each of these items were approved by our shareholders.

Series G Preferred Stock Financing

On February 9, 2017, we entered into a securities purchase agreement with certain accredited investors, pursuant to which we sold and issued: (i) an aggregate of 2,000 shares of Convertible Series G Preferred Stock (“Series G Preferred Stock”) with a stated value equal to \$1,000 per share and (ii) warrants to purchase an aggregate of 1,423,488 shares of common stock at an exercise price of \$0.96 per share (“Preferred Warrants”) which such Series G Preferred Stock and Preferred Warrants become convertible or exercisable, as applicable, immediately upon the Company’s filing with the State of California of an amendment to its articles of incorporation (the “Amendment”) to increase the number of its authorized shares of common stock to 50,000,000 shares from 25,000,000 shares of common stock (the “Preferred Stock Private Placement”). The closing of the Preferred Stock Private Placement took place on February 13, 2017.

We received aggregate net proceeds, after deducting placement agent fees and other estimated expenses related to the Preferred Stock Private Placement, in the amount of approximately \$1.85 million. We intend to use the net proceeds from this offering for working capital, business development and certain other expenditures.

The Preferred Stock is non-voting and is convertible at the holder's election at any time, at a ratio of 1 preferred share for 948.9915 shares of common stock. The Series G Preferred Stock is only entitled to receive dividends if any are declared by the Company, in which case the dividend will be paid (a) first an amount equal to \$0.01 per share of Series G Preferred Stock (before any distributions or payments to junior securities), and (b) then (on an "as converted to common stock" basis) to and in the same form as dividends actually paid on shares of our common stock. The Series G Preferred Stock has no liquidation or other preferences over our common stock.

Index

Each Preferred Warrant will be exercisable beginning on the Authorized Share Increase Date (the “Initial Exercise Date” or February 15, 2017) at an exercise price of \$0.96 per share, subject to adjustment as provided therein. The Preferred Warrants will be exercisable for five years from the Initial Exercise Date, but not thereafter.

We entered into a Registration Rights Agreement (the “Preferred Registration Rights Agreement”) under which we must register the shares of common stock issuable upon exercising the Preferred Warrants (“Preferred Warrant Shares”), and the shares of common stock issuable upon the conversion of the Preferred Stock (the “Conversion Shares”) on a Registration Statement by April 3, 2017 (the “Preferred Resale Registration Statement”). If the Preferred Resale Registration Statement is not declared effective by May 13, 2017 (or June 13, 2017 if a full SEC review occurs) then we will have to pay certain liquidated damages of 2% multiplied by the aggregate exercise price of the warrants each month, up to an aggregate of 18% of the amount the investor purchased in this offering.

Debt Refinancing and Amendments

Original Issue Discount Senior Secured Debentures Financing

On February 9, 2017, we entered into a securities purchase agreement (the “Debentures Purchase Agreement”) with certain accredited investors named in the signature pages thereto (the “Debenture Purchasers”), pursuant to which we sold and issued: (i) an aggregate principal amount of \$6,600,000 (“Aggregate Principal Amount”) of original issue discount senior secured debentures (“Debentures”) for an aggregate subscription amount of \$6,000,000, and (ii) warrants to purchase an aggregate of 6,875,000 shares of common stock at an exercise price of \$0.96 per share (“Debenture Warrants”) which become exercisable immediately upon the filing of the Amendment with the State of California (the “Debenture Private Placement”). The closing of the Debenture Private Placement took place on February 13, 2017. The Aggregate Principal Amount of the Debentures shall be due and payable on February 13, 2019. The Debentures Purchase Agreement contains customary representations, warranties and agreements by us and customary conditions to closing.

We received aggregate net proceeds, after deducting placement agent fees and other estimated expenses related to the Debenture Private Placement, in the amount of approximately \$5.6 million. We used the net proceeds from this offering to (i) pay off the debt of approximately \$3.8 million held by the Lender, (ii) pay down the principal and interest due on subordinated notes held by certain subordinated creditors totaling \$0.5 million, and (iii) for working capital and general corporate purposes.

The Debentures Purchase Agreement also provides for the repricing of 875,000 existing warrants held by Purchasers which currently have an exercise price of \$5.87, \$5.27 and \$5.25. The Company agreed to: (i) reduce the exercise price to \$0.96, provided that such warrants shall not be exercisable for 6 months and a day from the date such exercise price is reduced, and (ii) amend the termination dates on such existing warrants to be August 10, 2022. The number of existing warrants being repriced is based on each Purchaser’s subscription amount of the Debentures, and shall not exceed 125 Warrant Shares for each \$1,000 of subscription amount of the Debentures by the Purchaser.

In connection with the Debenture Private Placement, the Company and its subsidiaries entered into a Security Agreement with the Debenture Purchasers dated as of February 13, 2017 granting the Debenture Purchasers a security interest in certain collateral of the Company and its subsidiaries (“Security Agreement”) and an Intellectual Property Security Agreement with the Debenture Purchasers dated as of February 13, 2017 granting the Debenture Purchasers a security interest in certain intellectual property collateral of the Company and its subsidiaries (“IP Security Agreement”). In addition, certain subsidiaries of the Company entered into a Subsidiary Guarantee with the Debenture Purchasers dated as of February 13, 2017 guaranteeing the Company’s obligations under the Debentures (“Subsidiary Guarantee”). The Company, the Debenture Purchasers and the Company’s subordinated creditors also entered into a Subordination Agreement in connection with the Debenture Private Placement dated as of February 13, 2017 pursuant to which the subordinated creditors agreed to subordinate their promissory notes and interests in certain collateral to

the Debentures and the security interests of the Debenture Purchasers.

Each Debenture Warrant will be exercisable beginning on the Initial Exercise Date at an exercise price of \$0.96 per share, subject to adjustment as provided therein. The Debenture Warrants will be exercisable for five years from the Initial Exercise Date, but not thereafter.

We entered into a Registration Rights Agreement (the “Debenture Registration Rights Agreement”) under which we must register the Debenture Warrant Shares on a Registration Statement by April 3, 2017 (“Debenture Resale Registration Statement”). If the Debenture Resale Registration Statement is not declared effective by May 13, 2017 (or June 13, 2017 if a full SEC review occurs) then we will have to pay certain liquidated damages of 2% multiplied by the aggregate exercise price of the warrants each month, up to an aggregate of 18% of the amount the investor purchased in this offering.

Index

Amendment to Subordinated Debt Documents

In connection with the Debenture Private Placement, we entered into that certain Amendment Number Two to Loan Documents with certain existing noteholders (“Subordinated Creditors”) dated as of February 8, 2017 (“Amendment to Sub-Debt Documents”). The Amendment to Sub-Debt Documents amends that certain Note and Warrant Purchase Agreement dated January 17, 2012, as amended, pursuant to which the Subordinated Creditors purchased from the Company convertible promissory notes (as amended, the “Notes”). The Amendment to Sub-Debt Documents provides for: (i) a reduction in the interest rate of the Notes to 7% per annum; (ii) an extension of the maturity date of the Notes to May 7, 2019; (iii) the payment of an aggregate amount equal to \$500,000 to the Subordinated Creditors to satisfy the accrued interest owed and to reduce principal amounts outstanding on the Notes; (iv) the issuance of warrants to purchase up to 3,484,675 shares of our common stock with an exercise price equal to \$0.96, and with a term of five years (“Sub-debt Warrants”); and (v) the amendment to 289,669 existing warrants held by the Subordinated Creditors to reduce the exercise price from \$5.25 per share to an exercise price of \$0.96 per share. The Subordinated Creditors further agreed to subordinate repayment of the Notes and their security interests in certain collateral of the Company and certain subsidiaries to the interests of Purchasers in the Debt Private Placement pursuant to a Subordination Agreement dated as of February 13, 2017.

Failure to Comply with NASDAQ listing requirements

On February 16, 2017, we received the Letter from the Nasdaq Staff stating that we had not regained compliance with the Minimum Stockholders’ Equity Requirement. The Letter also stated our common stock would be delisted from The Nasdaq Capital Market at the opening of business on February 27, 2017 unless we request a hearing before the Nasdaq Hearing Panel. We requested and were granted a hearing on March 30, 2017. On March 10, 2017, we received a notification letter from Nasdaq indicating that we have failed to comply with the Minimum Bid Price Requirement of Nasdaq List Rule 5550(a)(2). Nasdaq Listing Rule 5550(a)(2) requires that companies listed on the Nasdaq Capital Market maintain a minimum price of \$1.00 for 30 consecutive business days. Nasdaq rules allow for a compliance period of 180 calendar days in which to regain compliance. See Note 18 for additional information.

Chief Financial Officer Appointment

On March 8, 2017, Brent R. Rystrom, 53, was appointed Chief Financial Officer of the Company. Mr. Rystrom brings over 25 years of business finance experience, including over 20 years of service as a Director of Research and Senior Financial Analyst for several prominent investment banking firms, including Piper Jaffray and Feltl & Company. From 2009 until joining RiceBran Technologies, Mr. Rystrom served as Director of Research for Feltl & Company, a regional investment banking firm headquartered in Minnesota. While at Feltl, he managed the firm’s research, institutional sales, and trading departments while providing research coverage on consumer products, retail and agriculture companies ranging from micro to large capitalization. Over his 11 years of service at Piper Jaffray he was named a Wall Street Journal “Best on the Street” analyst and a “Top 10” Retailing Industry Analyst from Reuter’s. Since 1997, Mr. Rystrom has also successfully acquired and managed a large portfolio of personal agricultural real estate assets, and from 2011 through 2015, he served on the Customer Advisory Board of AgStar, a \$10 billion agricultural bank based in Minnesota. Mr. Rystrom holds a Degree in Business-Finance from St. Thomas University.

In connection with Mr. Rystrom’s appointment, Jerry Dale Belt’s position as our Chief Financial Officer terminated, effective as of March 8, 2017. Mr. Belt will remain with the Company and serve as our Executive Vice President of Special Projects. On March 8, 2017, Mr. Belt also entered into an amendment to his employment agreement that extended his term of employment through December 31, 2017.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of our “disclosure controls and procedures” (as such term is defined in Rule 13a and Rule 15d-15(e)) under the Securities Exchange Act of 1934 (“Exchange Act”) was performed as of December 31, 2016, under the supervision and with the participation of our current management, including our current Chief Executive Officer and Chief Financial Officer. Our disclosure controls and procedures have been designed to ensure that information we are required to disclose in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC’s rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures.

Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2016.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2016, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management Report on Internal Control over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act and for the assessment of the effectiveness of internal control over financial reporting. The Company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The Company’s internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial
- (ii) statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (iii) provide reasonable assurance regarding prevention, or timely detection, of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may

deteriorate.

Under the supervision and with the participation of current management, including our current Chief Executive Officer and Chief Financial Officer, we conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2016. In making this assessment, management used the criteria set forth in the framework established by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") entitled "Internal Control - Integrated Framework (the "2013 Framework")."

Our management concluded that as of December 31, 2016, we maintained effective internal control over financial reporting based on the criteria established in the 2013 Framework, issued by COSO.
