NEWS RELEASE

March 3, 2003

IMA COMPLETES DRILL PROGRAM AT  
LAS BAYAS PROJECT

IMA Exploration Inc. announces the completion of drilling on its Las Bayas project in Patagonia, Argentina. 1,953 metres of NQ core were recovered from 19 drill holes targeting six veins on Eagle and Mincor Hills. Preliminary gold and silver results have been received and are being interpreted by IMA geologists; highlights of these results follow.

Eighteen of the 19 drill holes completed intersected the targeted low-sulphidation quartz veins; these intersections ranged in width from 0.4 to 22.1 metres of vein material. This drilling tested approximately 900 metres of the mapped 15,000 metre strike length of veins exposed at Las Bayas Hill. Future work at Las Bayas will be determined after the results have been fully evaluated and is expected to focus on the remainder of the outlying portions of the 28,581 hectare property, including the 10 kilometre long Las Bayas mineralized trend.

DDH	LENGTH (m)	GOLD (g/t)	SILVER (g/t)	GOLD EQUIVALENT (g/t) (Au+Ag/70)
-----	-----	-----	-----	-----
LB03-01	5.1	0.96	36.9	1.48

LB03-05	5.0	0.73	51.5	1.47
including	2.0	1.48	101.9	2.93
LB03-07	0.7	1.02	n/a	n/a

The Company holds over 100,000 hectares of property in the Patagonia region of Argentina and has been active in the region for the past three years. Regional work outside of the Las Bayas gold project consists of an ongoing review of IMA's highly prospective property package, as well as seeking out new

## Edgar Filing: IMA EXPLORATION INC - Form 6-K

exploration opportunities.

The Company's network of contacts in Argentina has been developed over the past 10 years, enabling IMA to quickly identify new opportunities. IMA is active in developing and implementing exploration programs that best facilitate environmental protection and that best respect the history and values of local communities.

ON BEHALF OF THE BOARD

/s/ Gerald G. Carlson

-----  
Dr. Gerald G. Carlson, P.Eng.,  
Chairman
