

Edgar Filing: IMA EXPLORATION INC - Form 6-K

IMA EXPLORATION INC
Form 6-K
September 16, 2004

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

For the month of SEPTEMBER, 2004.

Commission File Number: 0-30464

IMA EXPLORATION INC.

(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports
under cover of Form 20-F or Form 40-F: FORM 20-F FORM 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information
contained in this Form, is also thereby furnishing the information to the
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.
YES NO

If "Yes" is marked, indicate below the file number assigned to the registrant in
connection with Rule 12g3-2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the
registrant has duly caused this report to be signed on its behalf of the
undersigned, thereunto duly authorized.

NEWS RELEASE

SEPTEMBER 15, 2004

IMA INTERSECTS BONANZA-GRADE SILVER OVER 35.8 METRES
GRADING 2,850 G/T (83.2 OZ/TON)
INCLUDING 11,995 G/T SILVER OVER 7.1 METRES (350.3 OZ/TON)

IMA EXPLORATION INC. (IMR - TSX.V, IMXPF - OTC-BB) is pleased to announce Phase II drill results from holes 89 to 96 on the Company's 100% owned Navidad Silver-Lead-Copper discovery in Patagonia, Argentina. Highlights include drill hole 90 on the Navidad Hill target that returned 35.8 METRES (M) OF 2,850 GRAMS PER TONNE (83.2 OZ/T) SILVER INCLUDING 7.3M OF 11,995 G/T (350.3 OZ/T) SILVER beginning at 16.5m depth (see attached map).

These latest results, in addition to those from hole 88 (a 470 metre step-out from Navidad Hill, see Sept. 8, 2004 news release), clearly demonstrate the potential for outlining significant additional resources at Navidad Hill and Calcite Hill. Both of these targets are northwest of the Galena Hill deposit, where after Phase I drilling the Company announced a significant deposit that contains an Indicated Resource of 207 million ounces of silver and 1.1 million tonnes lead (see May 25, 2004 release).

Drill hole 90 was drilled at an inclination of -45(Degree) towards the northeast on the western flank of Navidad Hill, approximately 275m northwest of drill holes 1 and 2 and in an area of little or no outcrop. Bonanza-grade mineralization in drill hole 90 contains semi-massive silver-copper-lead sulphides and/or sulphosalts. In several locations native silver occurs as fine veinlets and grains up to 5mm in size (see photo posted at www.imaexploration.com).

Mineralization occurs on the western flank of the Navidad volcanic dome and, as is common in other zones at the project, is strongest at the contact between overlying mudstone and trachyandesitic volcanic rocks. The mineralization is believed to be stratigraphically controlled and to be gently dipping to the southwest. Based on this assumption, the true thickness of this zone is interpreted to be 85-90% of the intersection.

Bonanza-grade mineralization in hole 90 appears to be related to, and in the same stratigraphic position as, that previously reported in hole 73. Upcoming results from the surrounding drill holes (99, 100, 104, 116, etc) should confirm the orientation and extent of this important new zone. Drill hole 89 was drilled in the same area as hole 90 on the flank of Navidad Hill, between holes 90 and 73 but was drilled down a northeast-trending fault and therefore returned only 10.9m of 109 g/t silver. It is expected that tightly spaced, follow-up drilling will be required to fully define this very high-grade zone.

Of the remaining holes (tabulated below), 91 and 92 were drilled on Barite Hill and 93 was a reconnaissance hole drilled between Galena and Barite Hills that, significantly, intersected 9.1m of 1.4% lead. Holes 94, 95, and 96 were drilled on the southwestern edge of the Connector Zone. Drill results for the remaining holes in Phase II, holes 97 to 120, will be released as they become available.

Edgar Filing: IMA EXPLORATION INC - Form 6-K

The Company has included a rigorous quality assurance and quality control program at the Navidad project including blank, duplicate, and standard samples inserted randomly into the sample sequence. A complete description of this procedure is available on the Company's website at www.imaexploration.com. Dr. Paul Lhotka, P.Geol. is the Qualified Person for the Navidad project and has overseen all aspects of the current program.

NEWS RELEASE
IMA EXPLORATION INC.

SEPTEMBER 15, 2004
PAGE 2

IMA Exploration Inc. has over 10 years experience in Argentina and is focused on the exploration and development of its 100% owned Navidad silver discovery and its property portfolio in the region.

Table 1: New Navidad Project drill results

DRILL HOLE	ZONE	FROM (M)	TO (M)	INTERCEPT (M)	(LWA) SILVER g/t	(LWA) COPPER %
NV04-89	Navidad Hill	17.70	28.60	10.90	109	0.13
NV04-90	Navidad Hill	16.50	52.33	35.83	2,850	0.90
incl.		33.00	46.45	13.45	7,321	2.12
and		33.00	40.26	7.26	11,995	2.32
NV04-91	Barite Hill	3.00	16.50	13.50	12	0.00
and		123.50	153.95	30.45	13	0.00
NV04-92	Barite Hill			no significant values		
NV04-93	reconnaissance	93.68	94.81	1.13	42	0.00
and		137.93	147.00	9.07	11	0.05
NV04-94	Connector Zone	103.32	116.39	13.07	43	0.00
NV04-95	Connector Zone	49.08	64.80	15.72	53	0.00
NV04-96	Connector Zone			no significant values		
NV04-83(2)	Navidad Hill	4.50	88.00	83.50	97	0.15
incl.		53.00	61.91	8.91	211	0.25
and		79.50	88.00	8.50	237	0.12

Notes:

- (1) All length weighted average grades (LWA) are calculated with "uncut" values.
- (2) Due to a calculation error, results from NV04-83 were reported incorrectly as 74.61m of 103 g/t silver in the release dated September 8, 2004. The corrected value is reported above.

Edgar Filing: IMA EXPLORATION INC - Form 6-K

ON BEHALF OF THE BOARD
