Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events.

On August 3, 2005, Competitive Technologies, Inc. ("CTT") announced that it had granted a license to Ortho-Clinical Diagnostics, Inc. under CTT's U.S. Patent Number 4,940,658 and its foreign counterparts for homocysteine assays. Pursuant to the license, Ortho-Clinical will pay CTT an initial, upfront license fee and a per test royalty on sales of homocysteine assay products.

On July 28, 2005, CTT announced that it had granted a license to Beckman Coulter, Inc. under CTT's U.S. Patent Number 4,940,658 and its foreign counterparts for homocysteine assays. Pursuant to the license, Beckman Coulter will pay CTT an initial, upfront license fee and a per test royalty on sales of homocysteine assay products.

On July 26, 2005, CTT announced that an additional patent of CTT's patented melanogenesis-inducing technologies had been licensed to Melanotan Corporation ("MCI"), which sub-licensed the patent to Epitan Limited (ASX:EPT), an Australian company performing clinical trials on the technology. CTT and its clients will receive royalties on any sales of products associated with this additional patent. Separately, in the same release, CTT also announced that MCI had paid an additional dividend of Epitan shares to its shareholders. As a result, CTT received an additional 660,686 shares of Epitan. The shares are subject to the same lock up provision as the shares previously received, whereby CTT cannot sell, dispose or otherwise transfer the shares prior to October 21, 2005. CTT expects that the shares will be valued at approximately \$150,000. After the dividend, CTT will own approximately 1.9 million shares of Epitan.

Copies of the press releases are attached as Exhibits 99.1 - 99.3.

Item 9.01. Financial Statements and Exhibits

(c) Exhibits.

Exhibit No.	Description
