EAGLE BANCORP AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The unaudited condensed consolidated interim financial statements for Eagle Bancorp (the “Company”) and its subsidiary American Federal Savings Bank (the “Bank”) reflect all adjustments (consisting only of normal recurring accruals) which, in the opinion of management, are necessary to present fairly the Company’s consolidated statement of financial condition and the consolidated results of operations and cash flows for the unaudited interim periods. The results for interim unaudited periods are not necessarily indicative of trends or results to be expected for the fiscal year ending June 30, 2006. These condensed consolidated interim financial statements and notes should be read in conjunction with the Company’s Annual Report on Form 10-KSB for the year ended June 30, 2005.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the statement of financial condition and revenues and expenses for the period. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for loan losses. In connection with the determination of the allowances for loan losses, management obtains independent appraisals for foreclosed properties.

Basic earnings per share for the three months ended December 31, 2005 is computed using 1,077,640 weighted average shares outstanding. Earnings per share for the six months ended December 31, 2005 is computed using 1,079,122 weighted average shares outstanding. Basic earnings per share for the three months ended December 31, 2004 is computed using 1,145,492 weighted average shares outstanding. Earnings per share for the six months ended December 31, 2004 is computed using 1,158,823 weighted average shares outstanding. Diluted earnings per share is computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations are 1,204,412 for the three months ended December 31, 2005 and 1,203,835 for the six months ended December 31, 2005. Diluted earnings per share for the three months and six months ended December 31, 2004 is computed using 1,199,812 and 1,199,235 weighted average shares outstanding, respectively.

NOTE 6. DIVIDENDS AND STOCK REPURCHASE PROGRAM

This fiscal year Eagle has paid two dividends of \$0.20 per share, on August 26, 2005 and November 18, 2005. A dividend of \$0.20 per share was declared on January 19, 2006, payable February 10, 2006 to stockholders of record on January 27, 2006. Eagle Financial MHC, Eagle's mutual holding company, has waived the receipt of dividends on its 648,493 shares.

At their regular meeting of July 21, 2005, the Company's Board of Directors approved a stock repurchase program for up to 28,750 shares. This represents approximately 6% of the outstanding common stock held by the public. The repurchased shares will be held as treasury stock and will be held for general corporate purposes and/or issuance pursuant to Eagle's benefit plans. As of February 6, 2006 9,900 shares have been purchased under this program.

NOTE 7. MORTGAGE SERVICING RIGHTS

The Bank allocates its total cost in mortgage loans between mortgage servicing rights and loans, based upon their relative fair values, when loans are subsequently sold or securitized, with the servicing rights retained. Fair values are generally obtained from an independent third party. Impairment of mortgage servicing rights is measured based upon the characteristics of the individual loans, including note rate, term, underlying collateral, current market conditions, and estimates of net servicing income. If the carrying value of the mortgage servicing rights exceeds the estimated fair market value, a valuation allowance is established for any decline, which is viewed to be temporary. Charges to the valuation allowance are charged against or credited to mortgage servicing income. Periodic independent valuations of the mortgage servicing rights are performed. As a result of the most recent valuation, no temporary decline in the fair value was determined to have occurred, and no valuation allowance has been established. The following schedules show the activity in the mortgage servicing rights and the valuation allowance.

Note Regarding Forward-Looking Statements

This report contains certain “forward-looking statements.” Eagle Bancorp (“Eagle” or the “Company”) desires to take advantage of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995 and is including this statement for the express purpose of availing itself of the protections of the safe harbor with respect to all such forward-looking statements. These forward-looking statements, which are included in Management’s Discussion and Analysis, describe future plans or strategies and include Eagle’s expectations of future financial results. The words “believe,” “expect,” “anticipate,” “estimate,” “project,” and similar expressions identify forward-looking statements. Eagle’s ability to predict results or the effect of future plans or strategies or qualitative or quantitative changes based on market risk is inherently uncertain. Factors which could affect actual results but are not limited to include (i) change in general market interest rates, (ii) general economic conditions, (iii) local economic conditions, (iv) legislative/regulatory changes, (v) monetary and fiscal policies of the U.S. Treasury and Federal Reserve, (vi) changes in the quality or composition of Eagle’s loan and investment portfolios, (vii) demand for loan products, (viii) deposit flows, (ix) competition, and (x) demand for financial services in Eagle’s markets. These factors should be considered in evaluating the forward-looking statements. You are cautioned not to place undue reliance on these forward-looking statements which speak only as of their dates.

Overview

The Company’s primary activity is ownership of its wholly owned subsidiary, American Federal Savings Bank (the “Bank”). The Bank is a federally chartered savings bank, engaging in typical banking activities: acquiring deposits from local markets and investing in loans and investment securities. The Bank’s primary component of earnings is its net interest margin (also called spread or margin), the difference between interest income and interest expense. The net interest margin is managed by management (through the pricing of its products and by the types of products offered and kept in portfolio), and is affected by moves in interest rates. Noninterest income in the form of fee income and gain on sale of loans adds to the Bank’s income.

The Bank has a strong mortgage lending focus, with the majority of its loans in single-family residential mortgages. This has led to successfully marketing home equity loans to its customers, as well as a wide range of shorter term consumer loans for various personal needs (automobiles, recreational vehicles, etc.). In recent years the Bank has focused on adding commercial loans to its portfolio, both real estate and non-real estate. The purpose of this diversification is to mitigate the Bank’s dependence on the mortgage market, as well as to improve its ability to manage its spread. The Bank’s management recognizes the need for sources of fee income to complement its margin, and the Bank now maintains a significant loan serviced portfolio, which provides a steady source of fee income. The gain on sale of loans also provides significant fee income in periods of high mortgage loan origination volumes. Fee income is also supplemented with fees generated from the Bank’s deposit accounts. The Bank has a high percentage of non-maturity deposits, such as checking accounts and savings accounts, which allows management flexibility in managing its spread. Non-maturity deposits do not automatically reprice as interest rates rise, as do certificates of deposit.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Overview (Continued)

For the past year, management's focus has been on improving the Bank's core earnings. Core earnings can be described as income before taxes, with the exclusion of gain on sale of loans and adjustments to the market value of the Bank's loan serviced portfolio. In the fiscal years ended June 30, 2003 and June 30, 2004, the Bank experienced very strong mortgage loan origination volume due to low interest rates and large refinancing activity. The fiscal year ended June 30, 2005 saw a decline in mortgage loan originations, as mortgage rates rose slightly and refinancing volume declined. The six month period ended December 31, 2005 had increased loan origination volume compared to the same period in the previous fiscal year, however origination volumes are not expected to reach the levels of 2004. Management believes that the Bank will need to focus on increasing net interest margin, other areas of fee income, and control operating expenses to achieve earnings growth going forward. Management's strategy of growing the bank's loan portfolio and deposit base is expected to help achieve these goals: loans typically earn higher rates of return than investments; a larger deposit base will yield higher fee income; increasing the asset base will reduce the relative impact of fixed operating costs.

The level and movement of interest rates impacts the Bank's earnings as well. The yield curve continues to be flat, i.e. short-term interest rates are approximately at the same level as long-term interest rates. This can have a negative impact on the Bank's net interest margin as its deposits are typically priced relative to short-term rates, while the majority of its loan products are priced relative to long-term rates. The Bank has been able to partially offset this effect by reinvesting investment proceeds in the loan portfolio, because as noted earlier, loans typically earn higher rates of return than investments.

Another factor which has impacted recent earnings has been the volatility in the value of the Bank's mortgage servicing rights. The value declined significantly in fiscal year 2003, only to recover almost the entire amount in fiscal year 2004. Fiscal year 2005 saw only a slight change in the value of the mortgage servicing rights, and the first half of the current fiscal year has seen the value increase to the point where no valuation allowance is needed at the present time. If long-term interest rates hold at their current level or even rise during the year, the value of servicing rights should remain relatively stable. A decline in long-term interest rates, however, could lead to a need for a valuation allowance.

Financial Condition

Comparisons of results in this section are between the six months ended December 31, 2005 and June 30, 2005.

Total assets increased by \$6.61 million, or 3.20%, to \$213.02 million at December 31, 2005, from \$206.41 million at June 30, 2005. Total liabilities increased by \$6.46 million to \$190.61 million at December 31, 2005, from \$184.15 million at June 30, 2005. Total equity increased \$147,000 to \$22.41 million at December 31, 2005 from \$22.26 million at June 30, 2005.

Financial Condition (continued)

Loans receivable increased \$15.24 million, or 14.26%, to \$122.08 million at December 31, 2005 from \$106.84 million at June 30, 2005. All loan categories showed an increase, with single family mortgages showing the largest increase of \$10.40 million in the six month period. Total loan originations were \$65.73 million for the six months ended December 31, 2005, with single family mortgages accounting for \$37.00 million of the total. Home equity loan and commercial loan originations totaled \$6.74 million and \$4.65 million, respectively, for the same period. Construction loan originations (including commercial real estate and land development loans) totaled \$8.54 million. Loans held for sale decreased to \$813,000 at December 31, 2005 from \$2.15 million at June 30, 2005. Investment securities available-for-sale (AFS) decreased \$7.26 million, or 9.65%, to \$67.97 million at December 31, 2005 from \$75.23 million at June 30, 2005. The investment category with the largest decrease was collateralized mortgage obligations, which decreased \$5.95 million.

During the period, Eagle formed a special purpose subsidiary, Eagle Bancorp Statutory Trust I (the "Trust"), for the purpose of issuing trust preferred securities in the amount of \$5 million. The Company has issued subordinated debentures to the Trust, and the coupon on the debentures matches the dividend payment on the trust preferred securities. For regulatory purposes, the securities qualify as Tier 1 Capital, while for accounting purposes they are recorded as long term debt. The proceeds of the trust preferred securities and increases in advances from the Federal Home Loan Bank of Seattle (FHLB) funded asset growth. Borrowings from the FHLB increased \$1.81 million, to \$11.70 million from \$9.89 million, while deposits declined slightly. Money market accounts showed the largest increase in deposit accounts, while certificates of deposit showed the largest decrease.

Total equity increased as a result of net income of \$944,000, offset by purchases of treasury stock, an increase in other comprehensive loss of \$409,000 (due to an increase in net unrealized loss on securities available-for-sale) and the payment of two quarterly \$0.20 per share regular cash dividends.

Results of Operations for the Three Months Ended December 31, 2005 and 2004

Net Income. Eagle's net income was \$445,000 and \$571,000 for the three months ended December 31, 2005, and 2004, respectively. The decrease of \$126,000, or 22.07%, was due to a decrease in noninterest income of \$106,000 and an increase in noninterest expense of \$79,000, offset by an increase in net interest income of \$38,000. Eagle's tax provision was \$21,000 lower in the current quarter. Basic earnings per share were \$0.41 for the current period, compared to \$0.50 for the previous year's period.

Net Interest Income. Net interest income increased to \$1.69 million for the quarter ended December 31, 2005, from \$1.65 million for the previous year's quarter. This increase of \$38,000 was the result of an increase in interest and dividend income of \$313,000 partially offset by the increase in interest expense of \$275,000.

Interest and Dividend Income. Total interest and dividend income was \$2.58 million for the quarter ended December 31, 2005, compared to \$2.27 million for the quarter ended December 31, 2004, representing an increase of \$313,000, or 13.79%. Interest and fees on loans increased to \$1.90 million for the three months ended December 31, 2005 from \$1.51 million for the same period ended December 31, 2004. This increase of \$390,000, or 25.83%, was due primarily to the increase in the average balances on loans for the quarter ended December 31, 2005 as the average interest rate earned on loans showed little change from the previous year's quarter. Average balances for loans receivable, net, for the quarter ended December 31, 2005 were \$120.50 million, compared to \$95.86 million for the previous year. This represents an increase of \$24.64 million, or 25.70%. Interest and dividends on investment securities available-for-sale (AFS) decreased to \$640,000 for the quarter ended December 31, 2005 from \$733,000 for the same quarter last year. Average balances on investments decreased to \$70.39 million for the quarter ended December 31, 2005, compared to \$85.91 million for the quarter ended December 31, 2004. The average interest rate earned on investments increased to 3.71% from 3.49%. Interest on deposits with banks increased to \$36,000 from \$9,000, due to increases in average balances and the average interest rate earned. Dividends on FHLB stock have been suspended by the FHLB of Seattle as part of the capital plan adopted by the FHLB.

Interest Expense. Total interest expense increased to \$896,000 for the quarter ended December 31, 2005, from \$621,000 for the quarter ended December 31, 2004, an increase of \$275,000, or 44.28%, due to increases in interest paid on borrowings and deposits. A significant increase in the average balance of borrowings, as well as an increase in the average rate paid, resulted in an increase in interest paid on borrowings to \$179,000 in the current quarter compared to \$33,000 in the previous year's quarter. The Company issued \$5.00 million of trust preferred securities at the end of September 2005, accounting for much of the increase in interest on borrowings. Interest on deposits increased to \$717,000 for the quarter ended December 31, 2005, from \$588,000 for the quarter ended December 31, 2004. This increase of \$129,000, or 21.94%, was the result of an increase in average rates paid on deposit accounts. Money market accounts and certificates of deposit showed increases in average rates paid, while passbook savings and checking accounts remained the same. Average balances in interest-bearing deposit accounts increased slightly to \$161.40 million for the quarter ended December 31, 2005, compared to \$161.26 million for the same quarter in the previous year. The average rate paid on liabilities increased 53 basis points from the quarter ended December 31, 2004 to the quarter ended December 31, 2005.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, available peer group information, and past due loans in portfolio. The Bank's policies require the review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. No provision was made for loan losses for either the quarter ended December 31, 2005 or the quarter ended December 31, 2004.

Provision for Loan Losses (Continued). This is a reflection of the continued strong asset quality of the Bank's loan portfolio. Total classified assets decreased from \$760,000 at June 30, 2005 to \$556,000 at December 31, 2005, and total less than 1% of total loans. The Bank currently has no foreclosed real estate.

Noninterest Income. Total noninterest income decreased to \$517,000 for the quarter ended December 31, 2005, from \$623,000 for the quarter ended December 31, 2004, a decrease of \$106,000 or 17.01%. This was the result of the decline in income from loan servicing fees. Mortgage loan servicing fees decreased due to the higher adjustment to the value of the Bank's mortgage servicing rights in the previous year's quarter. Increased mortgage loan originations compared to the same quarter a year ago contributed to an increase in income from sale of loans of \$17,000. Demand deposit service charges decreased slightly due to decreased income on overdraft charges. The other categories of noninterest income registered small increases.

Noninterest Expense. Noninterest expense increased by \$79,000 or 5.06% to \$1.64 million for the quarter ended December 31, 2005, from \$1.56 million for the quarter ended December 31, 2004. This increase was primarily due to an increase in salaries and benefits of \$99,000, due to merit raises. Legal and accounting expenses increased \$12,000, primarily due to the issuance of the trust preferred securities. Other expense categories showed minor changes.

Income Tax Expense. Eagle's income tax expense was \$125,000 for the quarter ended December 31, 2005, compared to \$146,000 for the quarter ended December 31, 2004. The effective tax rate for the quarter ended December 31, 2005 was 21.93% and was 20.36% for the quarter ended December 31, 2004.

Results of Operations for the Six Months Ended December 31, 2005 and 2004

Net Income. Eagle's net income was \$944,000 and \$928,000 for the six months ended December 31, 2005 and 2004, respectively. The increase of \$16,000, or 1.72%, was the result of increases in net interest income of \$139,000, and noninterest income of \$105,000, partially offset by an increase in noninterest expense of \$171,000. Eagle's tax provision was \$57,000 higher in the current period. Basic earnings per share for the period ended December 31, 2005 were \$0.87 compared to \$0.80 per share for the period ended December 31, 2004.

Net Interest Income. Net interest income increased to \$3.36 million for the six months ended December 31, 2005 from \$3.22 million for the six months ended December 31, 2004. This increase of \$139,000 was the result of an increase in interest and dividend income of \$543,000, partially offset by an increase in interest expense of \$404,000.

Interest and Dividend Income. Total interest and dividend income was \$5.02 million for the six months ended December 31, 2005, compared to \$4.48 million for the same period ended December 31, 2004, representing an increase of \$543,000, or 12.12%. Interest and fees on loans increased to \$3.69 million for 2005 from \$2.97 million for 2004. This increase of \$715,000, or 24.07%, was due to an increase in the average balances of loans receivable to \$117.12 million, compared to \$94.65 million for the previous year. This is an increase of \$22.47 million, or 23.74%.

Interest and Dividend Income (Continued). The average interest rate earned on loans receivable increased by 2 basis points, to 6.30% from 6.28%. Interest and dividends on investment securities available-for-sale (AFS) decreased to \$1.26 million for the six months ended December 31, 2005 from \$1.43 million for the same period ended December 31, 2004. Interest on deposits with banks increased to \$47,000 from \$25,000. As mentioned earlier, dividends on FHLB stock have been suspended by the FHLB of Seattle. It recently announced that it expects to make a small profit for calendar year 2005, with a good chance of making a profit in 2006, and possibly beginning dividend payments within a year.

Interest Expense. Total interest expense increased to \$1.66 million for the six months ended December 31, 2005 from \$1.26 million for the six months ended December 31, 2004, an increase of \$404,000, or 32.06%. Interest on deposits increased to \$1.38 million for the six months ended December 31, 2005 from \$1.16 million for the six months ended December 31, 2004. This increase of \$216,000, or 18.62%, was the result of an increase in average rates paid on deposit accounts despite a small decline in average balances in deposit accounts. Average rates paid on money market accounts and certificates of deposit increased from 2004 to 2005. The average rate paid on all liabilities increased by 40 basis points from the six month period ended December 31, 2004 to the six month period ended December 31, 2005. Average balances in interest-bearing deposits decreased to \$161.01 million for the six month period ended December 31, 2005 compared to \$161.29 million for the same period in the previous year. Interest paid on borrowings increased to \$281,000 for the six months ended December 31, 2005 from \$93,000 for the same period ended December 31, 2004. The increase in borrowing costs was due to increases in the average balances of FHLB advances as well as the trust preferred securities issued in September 2005. The average rate paid on borrowings increased 81 basis points from 2004 to 2005.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, available peer group information, and past due loans in portfolio. The Bank's policies require the review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. No provision was made for loan losses for either of the six month periods ended December 31, 2005 or December 31, 2004. This is a reflection of the continued strong asset quality of the Bank's loan portfolio. Total classified assets decreased to \$556,000 at December 31, 2005 from \$760,000 at June 30, 2005. The Bank currently has no foreclosed property.

Noninterest Income. Total noninterest income increased to \$1.16 million for the six months ended December 31, 2005, from \$1.055 million for the six months ended December 31, 2004, an increase of \$105,000, or 9.95%. Net gain on sale of loans increased to \$301,000 for the six months ended December 31, 2005, compared to \$225,000 for the same period ended December 31, 2004. This increase was due to higher mortgage originations. Mortgage loan servicing fees and demand deposit service charges declined slightly. Other categories of noninterest income showed minor increases.

Noninterest Expense. Noninterest expense increased by \$171,000, or 5.59% to \$3.23 million for the six months ended December 31, 2005, from \$3.06 million for the six months ended December 31, 2004. This increase was primarily due to increases in salaries and benefits of \$122,000 and advertising expenses of \$29,000. The increase in salaries and benefits was primarily due to merit raises. Advertising expenses were higher due to increased promotion of deposit products. Other categories of noninterest expense showed modest changes.

Income Tax Expense. Eagle's income tax expense was \$347,000 for the six months ended December 31, 2005, compared to \$290,000 for the six months ended December 31, 2004. The effective tax rate for the six months ended December 31, 2005 was 26.88% and was 23.81% for the six months ended December 31, 2004.

Liquidity, Interest Rate Sensitivity and Capital Resources

The company's subsidiary, American Federal Savings Bank (the Bank), is required to maintain minimum levels of liquid assets as defined by the Office of Thrift Supervision (OTS) regulations. The OTS has eliminated the statutory requirement based upon a percentage of deposits and short-term borrowings. The OTS states that the liquidity requirement is retained for safety and soundness purposes, and that appropriate levels of liquidity will depend upon the types of activities in which the company engages. For internal reporting purposes, the Bank uses the previous regulatory definitions of liquidity. The Bank's average liquidity ratio was 16.09% and 15.81% for the months ended December 31, 2005 and December 31, 2004, respectively.

The Bank's primary sources of funds are deposits, repayment of loans and mortgage-backed securities, maturities of investments, funds provided from operations, and advances from the Federal Home Loan Bank of Seattle. Scheduled repayments of loans and mortgage-backed securities and maturities of investment securities are generally predictable. However, other sources of funds, such as deposit flows and loan prepayments, can be greatly influenced by the general level of interest rates, economic conditions and competition. The Bank uses liquidity resources principally to fund existing and future loan commitments. It also uses them to fund maturing certificates of deposit, demand deposit withdrawals and to invest in other loans and investments, maintain liquidity, and meet operating expenses.

Liquidity may be adversely affected by unexpected deposit outflows, higher interest rates paid by competitors, and similar matters. Management monitors projected liquidity needs and determines the level desirable, based in part on commitments to make loans and management's assessment of the bank's ability to generate funds.

At September 30, 2005 (the most recent report available), the Bank's measure of sensitivity to interest rate movements, as measured by the OTS, improved slightly from the previous quarter. The Bank's capital ratio as measured by the OTS decreased during the same period. The Bank is well within the guidelines set forth by the Board of Directors for interest rate risk sensitivity.

Impact of Inflation and Changing Prices

Our financial statements and the accompanying notes have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Interest rates have a greater impact on our performance than do the general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Application of Critical Accounting Policies

There are a number of accounting estimates performed by the Company in preparing its financial statements. Some of the estimates are developed internally, while others are obtained from independent third parties. Examples of estimates using external sources are the fair market value of investment securities, fair value of mortgage servicing rights, deferred compensation, and appraised value of foreclosed properties. It is management's assertion that the external sources have access to resources, methodologies, and markets that provide adequate assurances that no material impact would occur due to changes in assumptions. The following accounting estimates are performed internally:

Allowance for Loan and Lease Losses (ALLL) - Management applies its knowledge of current local economic and real estate market conditions, historical experience, loan portfolio composition, and the assessment of delinquent borrowers' situations, to determine the adequacy of its ALLL reserve. These factors are reviewed by the Bank's federal banking regulator and the Company's external auditors on a regular basis. The current level of the ALLL reserve is deemed to be more than adequate given the above factors, with no material impact expected due to a difference in the assumptions.

Deferred Loan Fees - Management applies time study and statistical analysis to determine loan origination costs to be capitalized under FAS 91. The analysis is reviewed by the Company's external auditors for reasonableness. No material impact is expected if different assumptions are used, as many of our loans have a short duration.

Deferred Tax Assets - Management expects to realize the deferred tax assets due to the continued profitability of the Company.

Fair Value of Other Financial Instruments - Management uses an internal model to determine fair value for its loan portfolio and certificates of deposit. The assumptions entail spreads over the Treasury yield curve at appropriate maturity benchmarks. Assumptions incorporating different spreads would naturally deliver varying results, however due to the short-term nature of the loan portfolio and certificates of deposit, changes in the results would be mitigated. Currently, the fair value is only presented as footnote information, and changes due to new assumptions would not, in management's opinion, affect the reader's opinion of the Company's financial condition.

Economic Life of Fixed Assets - Management determines the useful life of its buildings, furniture, and equipment for depreciation purposes. These estimates are reviewed by the Company's external auditors for reasonableness. No material impact is expected if different assumptions were to be used.

ITEM 3. CONTROLS AND PROCEDURES

Based on their evaluation, the company's Chief Executive Officer, Larry A. Dreyer, and Chief Financial Officer, Peter J. Johnson, have concluded the company's disclosure controls and procedures are effective as of December 31, 2005 to ensure that information required to be disclosed in the reports that the company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. During the last fiscal quarter, there have been no significant changes in the company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.
