- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

During our earnings conference call on April 22, 2008, we highlighted the following outlook for the second quarter 2008.

*(Dollar amounts are approximations)*

For the second quarter of the year, we estimate our revenue to be approximately \$266 million to \$268 million. We expect internal growth between 4.5% and 5%, of which about 5% is price and surcharges. Operating income before depreciation and amortization expense is estimated to be between \$80.5 million and \$81.5 million. We estimate average fuel prices to be approximately \$4.25 per gallon which would result in fuel expense being approximately 8.35% of revenue. Depreciation and amortization expense is estimated to be approximately 9% of revenue. Operating income is estimated to be approximately 21.3% of revenue. We expect net interest expense to be approximately \$9 million. Minority interests and other expense are estimated to be approximately 1.7% of revenues. We expect our effective tax rate to be approximately 39% for the second quarter. We expect our fully diluted share count to be approximately 67.7 million shares, excluding the impact of any option or stock repurchase activity during the quarter.

Additionally, due to rising fuel costs, we updated our full year 2008 guidance, last highlighted during our earnings conference call on February 11, 2008, and estimate our operating income before depreciation and amortization expense to be approximately 30% of revenue on a full year revenue outlook that remains between \$1.05 and \$1.06 billion. We expect our effective tax rate to be approximately 35% for the third quarter and approximately 39% for the fourth quarter.

These estimates exclude the impact of any additional acquisitions that may be completed during the remainder of the year.

Operating income before depreciation and amortization is considered a non-GAAP financial measure, and is provided supplementally because it is widely used by investors as a valuation and liquidity measure in the solid waste industry. It should be used in conjunction with GAAP financial measures. Management uses operating income before depreciation and amortization as a principal measure to evaluate and monitor the ongoing financial performance of our operations. Other companies may calculate this measure differently.

*Safe Harbor for Forward-Looking Statements*

*Certain statements contained in this report are forward-looking in nature. These statements can be identified by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," or "anticipates," or the negative or comparable terminology, or by discussions of strategy. Waste Connections' business and operations are subject to a variety of risks and uncertainties and, consequently, actual results may differ materially from those projected by any forward-looking statements. Factors that could cause actual results to differ from those projected include, but are not limited to, the following: (1) Waste Connections may be unable to compete effectively with larger and better capitalized companies and governmental service providers; (2) increases in the price of fuel may adversely affect Waste Connections' business and reduce its operating margins; (3) increases in labor and disposal and related transportation costs could impact Waste Connections' financial results; (4) increases in insurance costs and the amount that Waste Connections self-insures for various risks could reduce its operating margins and reported earnings; (5) Waste Connections depends significantly on the services of the members of its senior, regional and district management team, and the departure of any of those persons could cause its operating results to suffer; (6) Waste Connections' financial results are based upon estimates and assumptions that may differ from actual results; (7) efforts by labor unions could divert management attention and adversely affect operating results; (8) Waste Connections' results are vulnerable to economic conditions and seasonal factors affecting the regions in which it*

*operates; (9) Waste Connections may lose contracts through competitive bidding, early termination or governmental action; (10) Waste Connections may be subject in the normal course of business to judicial and administrative proceedings that could interrupt its operations, require expensive remediation, result in adverse judgments or settlements and create negative publicity; (11) competition for acquisition candidates, consolidation within the waste industry and economic and market conditions may limit Waste Connections' ability to grow through acquisitions; (12) Waste Connections' growth and future financial performance depend significantly on its ability to integrate acquired businesses into its organization and operations; (13) Waste Connections' acquisitions may not be successful, resulting in changes in strategy, operating losses or a loss on sale of the business acquired; (14) because Waste Connections depends on railroads for its intermodal operations, its operating results and financial condition are likely to be adversely affected by any reduction or deterioration in rail service; (15) Waste Connections' decentralized decision-making structure could allow local managers to make decisions that adversely affect Waste Connections' operating results; (16) Waste Connections may incur additional charges related to capitalized expenditures, which would decrease its earnings; (17) each business that Waste Connections acquires or has acquired may have liabilities that Waste Connections fails or is unable to discover, including environmental liabilities; (18) liabilities for environmental damage may adversely affect Waste Connections' business and earnings; and (19) the adoption of new accounting standards or interpretations could adversely affect Waste Connections' financial results. These risks and uncertainties, as well as others, are discussed in greater detail in Waste Connections' filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K. There may be additional risks of which Waste Connections is not presently aware or that it currently believes are immaterial which could have an adverse impact on its business. Waste Connections makes no commitment to revise or update any forward-looking statements in order to reflect events or circumstances that may change.*
