The Legal Dispute between TSMC and UniRAM

Regarding the legal dispute between TSMC and UniRAM in the U.S. Federal District Court in San Francisco TSMC would like to make clear that the case will have no material impact on the company's finances and operations. Details of the case are as follows:

1. U.S. Federal District Court in San Francisco ruled on September 25, 2007 that TSMC must pay US\$30.5 million in damages to UniRAM for trade secret misappropriation. However, TSMC may file post-trial motions and seek appeal. TSMC will take appropriate legal action to protect its rights and interests.
  2. U.S. Federal District Court in San Francisco issued an order April 17, 2008 granting part of UniRAM's request for a permanent injunction. TSMC is permitted to continue producing and developing embedded DRAM (eDRAM) products for existing eDRAM customers, but must pay a 1% royalty fee to UniRAM for these products over the next five years. TSMC is also restricted from disclosing UniRAM's alleged trade secrets to any third party. In other words, may continue to produce eDRAM products for new customers if TSMC ensures that UniRAM's alleged trade secrets are not disclosed. In addition, the San Francisco Federal District Court is expected to make a final judgment on April 30 regarding the injunction requested by UniRAM.
  3. This case remains in progress, and TSMC will continue to take action to protect its rights and interests. In addition to post-trial motions, we reserve our legal right to file an appeal. TSMC can not comment further on this case at this point.
