European Marketing for Alvesco about to start

Bad Homburg, December 8, 2004 ALTANA AG (NYSE: AAA, FSE: ALT) has announced that the 90-day-phase of the European Mutual Recognition Procedure (MRP) has been successfully completed for Alvesco® (ciclesonide) for the treatment of persistent asthma. ALTANA Pharma obtained its first European approval for Alvesco® in U.K. in April, which serves as the Reference Member State for the Mutual Recognition Procedure in other European countries.

We are delighted about this important milestone within the European approval process, which will allow us to start the marketing of Alvesco in important European markets at the beginning of 2005. Alvesco will allow us to substantially broaden ALTANA Pharma's innovative profile, commented Dr. Hans-Joachim Lohrisch, Chairman of the Management Board of ALTANA Pharma.

After completion of the mutually agreed summary of product characteristics (SmPC), 20 European countries endorsed the SmPC. To these countries belong the strong asthma-markets Germany and U.K. as well as the Benelux countries, Scandinavia and Eastern Europe. ALTANA Pharma expects to receive national marketing licenses for these markets in the coming months. According to the SmPC Alvesco® will be approved as treatment for persistent asthma of all severity grades in adults at once daily doses of 160 µg or 80 µg. In patients with severe asthma at risk of asthma attacks, who are not well controlled and require a stronger anti-inflammatory treatment, Alvesco® could be used with higher doses as 160 µg. First launches of Alvesco® are expected in some European countries in the first quarter of 2005. In five countries, among them France, Italy and Spain, ALTANA Pharma will start again the MRP as soon as possible. Alvesco® has already been approved in Australia, Mexico and Brazil.

Alvesco® is a new generation inhaled corticosteroid with novel pharmacokinetic properties. Inhaled corticosteroids are considered to be the cornerstone of asthma treatment, and they act by reducing inflammation – the underlying disease process – in the lungs and airways.

Asthma is a chronic lung disease caused by airway inflammation and results in airway constriction in response to certain stimuli. It is characterized by a variety of symptoms including wheezing, coughing and a tightening of the airways, which causes shortness of breath and can be life-threatening. According to the Global Initiative for Asthma (GINA) more than 300 million people worldwide suffer from asthma. The prevalence of asthma is increasing by approximately 50 percent every decade and worldwide deaths from asthma total more than 180,000 annually.

This press release contains forward-looking statements, i.e., current estimates or expectations of future events or future results. The forward-looking statements appearing in this press release include ALTANA's expectation to receive national marketing licenses for Alvesco® in specific European markets in the coming months, to launch Alvesco® in some European countries in the first quarter of 2005 and to start again the MRP in five European countries as soon as possible. These statements are based on beliefs of ALTANA's management as well as assumptions made by and information currently available to ALTANA. Many factors that ALTANA is unable to predict with accuracy could cause ALTANA's actual results, performance or achievements to be materially different from those that may be expressed or implied by such forward-looking statements. These factors include ALTANA's ability to develop and launch new and innovative pharmaceutical products, price regulations for pharmaceuticals and budgeting decisions of local governments and health care providers, the level of ALTANA's investment in pharmaceuticals related R&D, the sales and marketing methods used by ALTANA to distribute its pharmaceuticals and the composition of ALTANA's pharmaceuticals portfolio.

Forward-looking statements speak only as of the date they are made. ALTANA does not intend, and does not assume any obligation, to update forward-looking statements to reflect facts, circumstances or events that have occurred or changed after such statements have been made.
