We are a contract research organization, or CRO, providing clinical research and development services on a global basis to the pharmaceutical, biotechnology and medical device industries. We believe that we are one of a select group of CROs with the capability and expertise to conduct clinical trials in most major therapeutic areas on a global basis. We have approximately 7,000 employees worldwide, with operations in 71 locations in 38 countries, including the United States and major markets in Europe and Rest of World. For the six months ended June 30, 2009 we derived approximately 49.3%, 42.9% and 7.8% of our net revenue in the United States, Europe and Rest of World, respectively.

Headquartered in Dublin, Ireland, we began operations in 1990 and have expanded our business through internal growth and strategic acquisitions.

An aggregate of 6.0 million ordinary shares have been reserved under the 2003 Plan; and, in no event will the number of ordinary shares that may be issued pursuant to options awarded under the 2003 Plan exceed 10% of the outstanding shares, as defined in the 2003 Plan, at the time of the grant, unless the Board expressly determines otherwise. Further, the maximum number of ordinary shares with respect to which options may be granted under the 2003 Plan during any calendar year to any employee shall be 400,000 ordinary shares. Share option awards are granted with an exercise price equal to the market price of the Company’s shares at date of grant. Share options typically vest over a period of five years from date of grant and expire eight years from date of grant. The maximum contractual term of options outstanding at December 31, 2008, is eight years. No options can be granted after January 17, 2013.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and accompanying notes included elsewhere herein and the Consolidated Financial Statements and related notes thereto included in our Form 20-F for the year ended December 31, 2008. The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States.

Overview

We are a contract research organization ("CRO"), providing outsourced development services on a global basis to the pharmaceutical, biotechnology and medical device industries. We specialize in the strategic development, management and analysis of programs that support Clinical Development - from compound selection to Phase I-IV clinical studies. We have the operational flexibility to provide development services on a stand-alone basis or as part of an integrated "full service" solution. Our primary approach is to use dedicated teams to achieve optimum results, but we can implement a range of resourcing models to suit client requirements.

In a highly fragmented industry, we are one of a small number of companies with the capability and expertise to conduct clinical trials in all major therapeutic areas on a global basis. Currently, we have approximately 7,000 employees, in 71 locations in 38 countries, providing Phase I - IV Clinical Trial Management, Drug Development Support Services, Data Management and Biostatistics, Central Laboratory and Imaging Services.

Revenue consists primarily of fees earned under contracts with third-party clients. In most cases, a portion of the contract fee is paid at the time the study or trial is started, with the balance of the contract fee generally payable in installments over the study or trial duration, based on the achievement of certain performance targets or "milestones". Revenue for contracts is recognized on the basis of the relationship between time incurred and the total estimated duration of the trial or on a fee-for-service basis according to the particular circumstances of the contract. As is customary in the CRO industry, we subcontract with third party investigators in connection with clinical trials. All subcontractor costs and certain other costs where reimbursed by clients, are, in accordance with industry practice, deducted from gross revenue to arrive at net revenue. As these costs vary from contract to contract, we view net revenue as our primary measure of revenue growth.

Direct costs consist primarily of compensation, associated fringe benefits and share based compensation expense for project-related employees and other direct project driven costs. Selling, general and administrative expenses consist of compensation, related fringe benefits and share based compensation expense for selling and administrative employees, professional services, advertising costs and all costs related to facilities and information systems.

As the nature of ICON's business involves the management of projects having a typical duration of one to three years, the commencement or completion of projects in a fiscal year can have a material impact on revenues earned with the relevant clients in such years. In addition, as we typically work with some, but not all, divisions of a client, fluctuations in the number and status of available projects within such divisions can also have a material impact on revenues earned from such clients from year to year.

Although we are domiciled in Ireland, we report our results in U.S. dollars. As a consequence the results of our non-U.S. based operations, when translated into U.S. dollars, could be materially affected by fluctuations in exchange rates between the U.S. dollar and the currencies of those operations.

In addition to translation exposures, we are also subject to transaction exposures because the currency in which contracts are priced can be different from the currencies in which costs relating to those contracts are incurred. We have 20 operations operating in U.S. dollars, 11 trading in Euros, 5 in pounds Sterling, 3 in Indian Rupee, 2 each in Russian Rouble, Swedish Krona, Polish Zloty and Japanese Yen, and 1 each in Danish Krone, Czech Koruna, Lithuanian Litas, Latvian Lats, Ukraine Hryvnia, Hungarian Forint, Israeli New Shekels, Romanian New Leu, Canadian dollar, Mexican Peso, Brazilian Real, Colombian Peso, Argentine Peso, Chilean Peso, Peruvian Nuevo Sol, Chinese Yuan Renminbi, Hong Kong dollar, South Korean Won, Taiwan dollar, Thai Baht, Singapore dollar, Australian dollar, New Zealand dollar and South African Rand. Our operations in the United States are not materially exposed to such currency differences as the majority of our revenues and costs are in U.S. dollars. However, outside the United States the multinational nature of our activities means that contracts are usually priced in a single currency, most often U.S. dollars, Euros or pounds Sterling, while costs arise in a number of currencies, depending, among other things, on which of our offices provide staff for the contract, and the location of investigator sites. Although many such contracts benefit from some degree of natural hedging due to the matching of contract revenues and costs in the same currency, where costs are incurred in currencies other than those in which contracts are priced, fluctuations in the relative value of those currencies could have a material effect on the Company's results of operations. We regularly review our currency exposures and, when appropriate, hedge a portion of these, using forward exchange contracts, where they are not covered by natural hedges. In addition, we usually negotiate currency fluctuation clauses in our contracts which allow for price negotiation if certain exchange rate triggers occur.

As we conduct operations on a global basis, our effective tax rate has depended and will depend on the geographic distribution of our revenue and earnings among locations with varying tax rates. The Company's results of operations therefore may be affected by changes in the tax rates of the various jurisdictions. In particular, as the geographic mix of our results of operations among various tax jurisdictions changes, our effective tax rate may vary significantly from period to period.

Results of Operations

Three Months Ended June 30, 2009 compared with Three Months Ended June 30, 2008

The following table sets forth for the periods indicated certain financial data as a percentage of net revenue and the percentage change in these items compared to the prior comparable period. The trends illustrated in the following table may not be indicative of future results.

	Three Months Ended		2008 to 2009 Percentage Increase/(decrease)
	June 30, 2009 Percentage of Net Revenue	June 30, 2008 Percentage of Net Revenue	
Net revenue	100%	100%	0.8%
Costs and expenses:			
Direct costs	56.9%	56.3%	1.8%
Selling, general and administrative	26.4%	29.4%	(9.8%)
Depreciation and amortization	3.4%	3.0%	13.3%
One-time net charges	4.1%	-	100%
Income from operations	9.3%	11.2%	(16.5%)

Net revenue increased by \$1.7 million, or 0.8%, from \$218.3 million for the three months ended June 30, 2008, to \$220.0 million for the three months ended June 30, 2009. The rate of increase in net revenue growth has slowed in recent quarters due to the economic downturn and its impact on market confidence and the availability of funding for drug development. For the three months ended June 30, 2009, we derived approximately 51.6%, 40.8% and 7.6% of our net revenue in the United States, Europe and Rest of World, respectively.

Direct costs increased by \$2.2 million, or 1.8%, from \$123.0 million for the three months ended June 30, 2008, to \$125.1 million for the three months ended June 30, 2009. This increase was primarily due to increased salary and related costs of \$1.5 million for project related employees, increased laboratory expenses of \$2.0 million and increased study supplies and materials expenses of \$1.6 million. These increases were offset by a reduction in travel costs for project related employees and other direct project related expenses of \$2.1 million and \$0.8 million respectively. Direct costs as a percentage of net revenue increased from 56.3% for the three months ended June 30, 2008, to 56.9% for three months ended June 30, 2009.

Selling, general and administrative expenses decreased by \$6.3 million, or 9.8%, from \$64.3 million for the three months ended June 30, 2008, to \$58.0 million for the three months ended June 30, 2009. The decrease in selling, general and administrative expenses arises primarily from a decrease of \$3.8 million in personnel related costs, comprising salary and travel cost for selling, general and administrative employees and recruitment expenditure. In addition, increased foreign exchange gains on the revaluation of monetary assets and liabilities of \$1.7 million were recorded during the period, together with decreases in advertising expenditure and support and maintenance costs of \$0.5 million and \$0.3 million respectively. As a percentage of net revenue, selling, general and administrative

expenses, decreased from 29.4% in the three months ended June 30, 2008, to 26.4% in the three months ended June 30, 2009.

Total share based compensation expense recognized during the three months ended June 30, 2009 amounted to \$1.7 million compared to \$1.6 million during the three months ended June 30, 2008.

Depreciation and amortization expense increased by \$0.9 million, or 13.3%, from \$6.6 million for the three months ended June 30, 2008, to \$7.5 million for the three months ended June 30, 2009. As a percentage of net revenue, depreciation and amortization increased from 3.0% of net revenues for the three months ended June 30, 2008, to 3.4% for the three months ended June 30, 2009. The increase arises primarily from our continued investment in facilities and equipment to support the Company's growth.

One-time net charges of \$8.9 million have been recognised during the three months ended June 30, 2009. In response to the globalization of clinical studies and its attendant impact on resources in existing and emerging markets, the Company conducted a review of its existing infrastructure to better align its resources with the needs of its clients. This realignment has resulted in resource rationalisations in certain more mature markets and the recognition of a restructuring charge of \$13.4 million in the second quarter of 2009. This was offset by research and development incentives of \$4.5 million received by the Company in certain jurisdictions in which it operates.

As a result of the recognition of these one-time net charges income from operations decreased by \$4.0 million, or 16.5%, from \$24.4 million for the three months ended June 30, 2008, to \$20.4 million for the three months ended June 30, 2009. As a percentage of net revenue, income from operations decreased from 11.2% for the three months ended June 30, 2008, to 9.3% of net revenues for the three months ended June 30, 2009. Excluding the impact of one-time net charges recognized during the period, income from operations as a percentage of net revenue increased from 11.2% for the three months ended June 30, 2008, to 13.3% for the three months ended June 30, 2009.

Net interest expense for the three months ended June 30, 2009, was \$0.9 million, an increase of \$0.4 million on net interest expense of \$0.5 million for the three months ended June 30, 2008. Interest expense for the period decreased by \$0.1 million from \$1.1 million for the three months ended 30 June 2008 to \$1.0 million for the three months ended June 30, 2009. Interest income for the period decreased from \$0.6 million for the three months ended June 30, 2008, to \$0.1 million for the three months ended June 30, 2009.

Provision for income taxes has decreased from \$4.9 million for the three months ended June 30, 2008, to \$1.0 million for the three months ended June 30, 2009. The Company's effective tax rate for the three months ended June 30, 2009, was 5.0% compared with 20.4% for the three months ended June 30, 2008. The decrease in the effective tax rate during the period arose principally from corporation tax refunds arising from research and development tax credits received in certain jurisdictions and the tax effect of restructuring costs recognized.

Liquidity and Capital Resources

The CRO industry generally is not capital intensive. Since our inception, we have financed our operations and growth primarily with cash flows from operations, net proceeds of \$49.1 million raised in our initial public offering in May 1998, net proceeds of \$44.3 million raised in our public offering in August 2003 and net borrowings of \$64.1 million. Our principal operating cash needs are payment of salaries, office rents, travel expenditures and payments to investigators. The aggregate amount of employee compensation, excluding stock compensation expense, paid by us and our subsidiaries for the six months ended June 30, 2009 and June 30, 2008, amounted to \$271.2 million and \$259.9 million respectively. Investing activities primarily reflect capital expenditures for facilities, information systems enhancements, the purchase of short-term investments and acquisitions.

Our clinical research and development contracts are generally fixed price with some variable components and range in duration from a few months to several years. Revenue from contracts is generally recognized as income on the basis of the relationship between time incurred and the total estimated contract duration or on a fee-for-service basis. The cash flow from contracts typically consists of a down payment of between 10% and 20% paid at the time the contract is entered into, with the balance paid in instalments over the contract's duration and in some cases upon the achievement of certain milestones. Accordingly, cash receipts do not necessarily correspond to costs incurred and revenue recognized on contracts.

As of June 30, 2009, our working capital amounted to \$197.5 million, compared to \$186.0 million at December 31, 2008. The most significant influence on our operating cash flow is revenue outstanding, which comprises accounts receivable and unbilled revenue, less payments on account. The dollar values of these amounts and the related days revenue outstanding can vary due to the achievement of contractual milestones and the timing of cash receipts. The number of days revenue outstanding was 49 days at June 30, 2009 and 70 days at December 31, 2008.

Net cash provided by operating activities was \$128.1 million for the six months ended June 30, 2009, compared with cash provided by operating activities of \$28.4 million for the six months ended June 30, 2008. The increase in cash provided from operating activities arises primarily from a reduction in the number of days revenue outstanding.

Net cash used in investing activities was \$91.5 million for the six months ended June 30, 2009, compared to \$48.4 million for the six months ended June 30, 2008. Net cash used in the six months ended June 30, 2009 arises principally from capital expenditure, payments for purchase of subsidiary undertakings, and purchase of short term investments, offset by the sale of short term investments. Capital expenditure for the six months ended June 30, 2009, amounted to \$16.4 million, and comprised mainly of expenditure on global infrastructure and information technology systems to support the Company's growth. Cash paid on acquisitions during the six months ended June 30, 2009, amounted to \$24.1 million, being cash paid for the acquisition of the remaining 30% of the common stock of Beacon of \$17.8 million, \$5.9 million relating to the acquisition of Prevalere Lifesciences and \$0.4 million relating to the acquisition of the assets of the former Qualia Clinical Service. \$16.5 million was realized during the period from the sale of short term investments. An additional \$67.6 million of surplus cash balances were invested in short term investments during the period.

Net cash used in financing activities during the six months ended June 30, 2009, amounted to \$42.7 million compared with cash provided by financing activities of \$14.7 million for the six months ended June 30, 2008. During the six months ended June 30, 2009, the Company repaid borrowings of \$60.7 million. This was offset by \$17.4 million in additional borrowings drawn down during the period.

As a result of these cash flows, cash and cash equivalents decreased by \$5.0 million for the six months ended June 30, 2009, compared to a decrease of \$5.2 million for the six months ended June 30, 2008.

Net cash at June 30, 2009, amounted to \$83.2 million, comprising cash and cash equivalents of \$53.4 million, short term investments of \$93.9 million, less bank credit lines and loan facilities of \$64.1 million.
