Approximate date of commencement of proposed sale to the public: As soon as practicable after this registration statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act of 1933, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act of 1933, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Edgar Filing: United States 12 Month Natural Gas Fund, LP - Form S-1/A

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act of 1933, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.:

Large accelerated filer " Accelerated filer "

Non-accelerated filer x (Do not check if a smaller reporting company) Smaller reporting company "

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount to be Registered(1)	Proposed Maximum Offering Price Per Share(1)	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee(1)
Shares of United States 12 Month Natural Gas Fund, LP	0	N/A	\$1	\$0

(1) As discussed below, pursuant to Rule 415(a)(6) under the Securities Act, this registration Statement carries over 24,650,000 of unsold shares that have been previously registered, with respect to which the registrant applied previously paid filing fees of \$73,098. The filing fee previously paid with respect to such shares being carried forward to this Registration Statement will continue to apply to such unsold shares.

Pursuant to Rule 415(a)(6) under the Securities Act, the securities registered pursuant to this Registration Statement include unsold securities previously registered for sale pursuant to the registrant's registration statement on Form S-1 (File No. 333-185961) initially filed by the registrant on January 10, 2013 (the "Prior Registration Statement"). The Prior Registration Statement registered shares of beneficial interest of the registrant with a maximum aggregate offering price of \$535,909,077.44. Approximately 24,650,000 such shares of beneficial interests registered on the Prior Registration Statement remain unsold. The unsold shares (and associated filing fees paid) are being carried forward to this Registration Statement. Pursuant to Rule 415(a)(6), the offering of unsold shares under the Prior Registration Statement will be deemed terminated as of the date of effectiveness of this Registration Statement.

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Commission, acting pursuant to said Section 8(a), may determine.

PROSPECTUS

United States 12 Month Natural Gas Fund, LP®*

24,650,000 Shares

*Principal U.S. Listing Exchange: NYSE Arca, Inc.

The United States 12 Month Natural Gas Fund, LP (“UNL”) is an exchange traded fund organized as a limited partnership that issues shares that trade on the NYSE Arca stock exchange (“NYSE Arca”). UNL’s investment objective is to track a benchmark of short-term natural gas futures contracts. UNL pays its general partner, United States Commodity Funds LLC (“USCF”), a limited liability company, a management fee and incurs operating costs. USCF and UNL are located at 1999 Harrison Street, Suite 1530, Oakland, CA 94612. The telephone number for both USCF and UNL is 510.522.9600. In order for a hypothetical investment in shares to break even over the next 12 months, assuming a selling price of \$8.74 (the net asset value as of March 31, 2016), the investment would have to generate a 0.858% return or \$0.075, rounded to \$0.08.

UNL is an exchange traded fund. This means that most investors who decide to buy or sell shares of UNL shares place their trade orders through their brokers and may incur customary brokerage commissions and charges. Shares trade on the NYSE Arca under the ticker symbol “UNL” and are bought and sold throughout the trading day at bid and ask prices like other publicly traded securities.

Shares trade on the NYSE Arca after they are initially purchased by “Authorized Participants,” institutional firms that purchase shares in blocks of 50,000 shares called “baskets” through UNL’s marketing agent, ALPS Distributors, Inc. (the “Marketing Agent”). The price of a basket is equal to the net asset value (“NAV”) of 50,000 shares on the day that the order to purchase the basket is accepted by the Marketing Agent. The NAV per share is calculated by taking the current market value of UNL’s total assets (after close of NYSE Arca) subtracting any liabilities and dividing that total by the total number of outstanding shares. The offering of UNL’s shares is a “best efforts” offering, which means that neither the Marketing Agent nor any Authorized Participant is required to purchase a specific number or dollar amount of shares. USCF pays the Marketing Agent a marketing fee consisting of a fixed annual amount plus an incentive fee based on the amount of shares sold. Authorized Participants will not receive from UNL, USCF or any of their affiliates, any fee or other compensation in connection with the sale of shares. Aggregate compensation paid to the Marketing Agent and any affiliate of USCF for distribution-related services in connection with this offering of shares will not exceed ten percent (10%) of the gross proceeds of the offering.

Investors who buy or sell shares during the day from their broker may do so at a premium or discount relative to the market value of the underlying natural gas futures contracts in which UNL invests due to supply and demand forces at work in the secondary trading market for shares that are closely related to, but not identical to, the same forces influencing the prices of natural gas and the natural gas futures contracts that serve as UNL’s investment benchmark. Investing in UNL involves risks similar to those involved with an investment directly in the natural gas market, the correlation risk described above, and other significant risks. See “**Risk Factors Involved with an Investment in UNL**” beginning on page 5.

The offering of UNL’s shares is registered with the Securities and Exchange Commission (“SEC”) in accordance with the Securities Act of 1933 (the “1933 Act”). The offering is intended to be a continuous offering and is not expected to terminate until all of the registered shares have been sold or three years from the date of the original offering, whichever is earlier, unless extended as permitted under the rules under the 1933 Act, although the offering may be temporarily suspended if an when no suitable investments for UNL are available or practicable. UNL is not a mutual fund registered under the Investment Company Act of 1940 (“1940 Act”) and is not subject to regulation under such Act.

NEITHER THE SEC NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES OFFERED IN THIS PROSPECTUS, OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

UNL is a commodity pool and USCF is a commodity pool operator subject to regulation by the Commodity Futures Trading Commission and the National Futures Association under the Commodities Exchange Act.

THE COMMODITY FUTURES TRADING COMMISSION HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS POOL NOR HAS THE COMMISSION PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

The date of this prospectus is , 2016.

COMMODITY FUTURES TRADING COMMISSION

RISK DISCLOSURE STATEMENT

YOU SHOULD CAREFULLY CONSIDER WHETHER YOUR FINANCIAL CONDITION PERMITS YOU TO PARTICIPATE IN A COMMODITY POOL. IN SO DOING, YOU SHOULD BE AWARE THAT COMMODITY INTEREST TRADING CAN QUICKLY LEAD TO LARGE LOSSES AS WELL AS GAINS. SUCH TRADING LOSSES CAN SHARPLY REDUCE THE NET ASSET VALUE OF THE POOL AND CONSEQUENTLY THE VALUE OF YOUR INTEREST IN THE POOL. IN ADDITION, RESTRICTIONS ON REDEMPTIONS MAY AFFECT YOUR ABILITY TO WITHDRAW YOUR PARTICIPATION IN THE POOL.

FURTHER, COMMODITY POOLS MAY BE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT, AND ADVISORY AND BROKERAGE FEES. IT MAY BE NECESSARY FOR THOSE POOLS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH EXPENSE TO BE CHARGED THIS POOL AT PAGE 34 AND A STATEMENT OF THE PERCENTAGE RETURN NECESSARY TO BREAK EVEN, THAT IS, TO RECOVER THE AMOUNT OF YOUR INITIAL INVESTMENT, AT PAGE 34.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER FACTORS NECESSARY TO EVALUATE YOUR PARTICIPATION IN THIS COMMODITY POOL. THEREFORE, BEFORE YOU DECIDE TO PARTICIPATE IN THIS COMMODITY POOL, YOU SHOULD CAREFULLY STUDY THIS DISCLOSURE DOCUMENT, INCLUDING A DESCRIPTION OF THE PRINCIPAL RISK FACTORS OF THIS INVESTMENT, AT PAGE 5.

YOU SHOULD ALSO BE AWARE THAT THIS COMMODITY POOL MAY TRADE FOREIGN FUTURES OR OPTIONS CONTRACTS. TRANSACTIONS ON MARKETS LOCATED OUTSIDE THE UNITED STATES, INCLUDING MARKETS FORMALLY LINKED TO A UNITED STATES MARKET, MAY BE SUBJECT TO REGULATIONS WHICH OFFER DIFFERENT OR DIMINISHED PROTECTION TO THE POOL AND ITS PARTICIPANTS. FURTHER, UNITED STATES REGULATORY AUTHORITIES MAY BE UNABLE TO COMPEL THE ENFORCEMENT OF THE RULES OF REGULATORY AUTHORITIES OR MARKETS IN NON-UNITED STATES JURISDICTIONS WHERE TRANSACTIONS FOR THE POOL MAY BE EFFECTED.

SWAPS TRANSACTIONS, LIKE OTHER FINANCIAL TRANSACTIONS, INVOLVE A VARIETY OF SIGNIFICANT RISKS. THE SPECIFIC RISKS PRESENTED BY A PARTICULAR SWAP TRANSACTION NECESSARILY DEPEND UPON THE TERMS OF THE TRANSACTION AND YOUR CIRCUMSTANCES. IN GENERAL, HOWEVER, ALL SWAPS TRANSACTIONS INVOLVE SOME COMBINATION OF MARKET RISK, CREDIT RISK, COUNTERPARTY CREDIT RISK, FUNDING RISK, LIQUIDITY RISK, AND OPERATIONAL RISK.

HIGHLY CUSTOMIZED SWAPS TRANSACTIONS IN PARTICULAR MAY INCREASE LIQUIDITY RISK, WHICH MAY RESULT IN A SUSPENSION OF REDEMPTIONS. HIGHLY LEVERAGED TRANSACTIONS MAY EXPERIENCE SUBSTANTIAL GAINS OR LOSSES IN VALUE AS A RESULT OF RELATIVELY SMALL CHANGES IN THE VALUE OR LEVEL OF AN UNDERLYING OR RELATED MARKET FACTOR.

IN EVALUATING THE RISKS AND CONTRACTUAL OBLIGATIONS ASSOCIATED WITH A PARTICULAR SWAP TRANSACTION, IT IS IMPORTANT TO CONSIDER THAT A SWAP

TRANSACTION MAY BE MODIFIED OR TERMINATED ONLY BY MUTUAL CONSENT OF THE ORIGINAL PARTIES AND SUBJECT TO AGREEMENT ON INDIVIDUALLY NEGOTIATED TERMS. THEREFORE, IT MAY NOT BE POSSIBLE FOR THE COMMODITY POOL OPERATOR TO MODIFY, TERMINATE, OR OFFSET THE POOL'S OBLIGATIONS OR THE POOL'S EXPOSURE TO THE RISKS ASSOCIATED WITH A TRANSACTION PRIOR TO ITS SCHEDULED TERMINATION DATE.

PROSPECTUS SUMMARY

This is only a summary of the prospectus and, while it contains material information about UNL and its shares, it does not contain or summarize all of the information about UNL and the shares contained in this prospectus that is material and/or which may be important to you. You should read this entire prospectus, including “Risk Factors Involved with an Investment in UNL” beginning on page 5, before making an investment decision about the shares. For a glossary of defined terms, see Appendix A.

United States 12 Month Natural Gas Fund, LP (“UNL”), a Delaware limited partnership, is a commodity pool that continuously issues common shares of beneficial interest that may be purchased and sold on the NYSE Arca stock exchange (“NYSE Arca”). It is managed and controlled by United States Commodity Funds LLC (“USCF”), a Delaware limited liability company. USCF is registered as a commodity pool operator (“CPO”) with the Commodity Futures Trading Commission (“CFTC”) and is a member of the National Futures Association (“NFA”).

UNL’s Investment Objective and Strategy

The investment objective of UNL is for the daily changes in percentage terms of its shares’ per share net asset value (“NAV”) to reflect the daily changes in percentage terms of the price of natural gas delivered at the Henry Hub, Louisiana, as measured by the daily changes in the price of a specified short-term futures contracts on natural gas called the “Benchmark Futures Contracts”, less UNL’s expenses.

What is the “Benchmark Futures Contracts”?

The Benchmark Futures Contracts are the futures contracts on natural gas as traded on the New York Mercantile Exchange (the “NYMEX”) that is the near month contract to expire, and the contracts for the following 11 months, for a total of 12 consecutive months’ contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire and the contracts for the following 11 consecutive months. When calculating the daily movement of the average price of the 12 contracts, each contract month is equally weighted.

UNL seeks to achieve its investment objective by investing primarily in futures contracts for natural gas that are traded on the NYMEX, ICE Futures Exchange (“ICE Futures”), or other U.S. and foreign exchanges (collectively, “Futures Contracts”) and, to a lesser extent, in order to comply with regulatory requirements or in view of market conditions, other natural gas investments such as cash-settled options on Futures Contracts, forward contracts for natural gas, cleared swap contracts, and non-exchange traded (“over-the-counter” or “OTC”) transactions that are based on the price of natural gas, crude oil and other petroleum-based fuels, as well as futures contracts for crude oil, heating oil, gasoline, and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, “Other Natural Gas-Related Investments”). Market conditions that USCF currently anticipates could cause UNL to invest in Other Natural Gas-Related Investments include those allowing UNL to obtain greater liquidity or to execute transactions with more favorable pricing. For convenience and unless otherwise specified, Futures Contracts and Other Natural Gas-Related Investments collectively are referred to as “Natural Gas Interests” in this prospectus.

In addition, USCF believes that market arbitrage opportunities will cause daily changes in UNL’s share price on the NYSE Arca on a percentage basis to closely track daily changes in UNL’s per share NAV on a percentage basis. USCF further believes that the daily changes in prices of the Benchmark Futures Contracts have historically closely tracked the daily changes in the spot price of natural gas. USCF believes that the net effect of these two expected relationships will be that the daily changes in the price of UNL’s shares on the NYSE Arca on a percentage basis will continue to closely track the daily changes in the spot price of natural gas on a percentage basis, less UNL’s expenses.

Specifically, UNL seeks to achieve its investment objective by investing so that the average daily percentage change in UNL's NAV for any period of 30 successive valuation days will be within plus/minus ten percent (10%) of the average daily percentage change in the price of the Benchmark Futures Contracts over the same period.

Investors should be aware that UNL's investment objective is *not* for its NAV or market price of shares to equal, in dollar terms, the spot price of natural gas or any particular futures contract based on natural gas *nor* is UNL's investment objective for the percentage change in its NAV to reflect the percentage change of the price of any particular futures contract as measured over a time period *greater than one day*. This is because natural market forces called contango and backwardation have impacted the total return on an investment in UNL's shares during the past year relative to a hypothetical direct investment in natural gas and, in the future, it is likely that the relationship between the market price of UNL's shares and changes in the spot prices of natural gas will continue to be so impacted by contango and backwardation. (It is important to note that the disclosure above ignores the potential costs associated with physically owning and storing natural gas, which could be substantial.)

Principal Investment Risks of an Investment in UNL

An investment in UNL involves a degree of risk. Some of the risks you may face are summarized below. A more extensive discussion of these risks appears beginning on page 5.

Investment Risk

Investors may choose to use UNL as a means of investing indirectly in natural gas. There are significant risks and hazards inherent in the natural gas industry that may cause the price of natural gas to widely fluctuate.

Correlation Risk

To the extent that investors use UNL as a means of indirectly investing in natural gas, there is the risk that the daily changes in the price of UNL's shares on the NYSE Arca, on a percentage basis, will not closely track the daily changes in the spot price of natural gas, on a percentage basis. This could happen if the price of shares traded on the NYSE Arca does not correlate closely with the value of UNL's NAV; the changes in UNL's NAV do not correlate closely with the changes in the average price of the Benchmark Futures Contracts; or the changes in the average price of the Benchmark Futures Contracts do not closely correlate with the changes in the cash or spot price of natural gas. This is a risk because if these correlations do not exist, then investors may not be able to use UNL as a cost-effective way to indirectly invest in natural gas or as a hedge against the risk of loss in natural gas-related transactions.

USCF believes that holding futures contracts whose expiration dates are spread out over a 12 month period of time will cause the total return of such a portfolio to vary compared to a portfolio that holds only a single month's contract (such as the near month contract). In particular, USCF believes that the total return of a portfolio holding contracts with a range of expiration months will be impacted differently by the price relationship between different contract months of the same commodity future compared to the total return of a portfolio consisting of the near month contract. For example, in cases in which the near month contract's price is higher than the price of contracts that expire later in time (a situation known as "backwardation" in the futures markets), then absent the impact of the overall movement in natural gas prices, the value of the near month contract would tend to rise as it approaches expiration. Conversely, in cases in which the near month contract's price is lower than the price of contracts that expire later in time (a situation known as "contango" in the futures markets), then absent the impact of the overall movement in natural gas prices, the value of the near month contract would tend to decline as it approaches expiration. The total return of a portfolio that owned the near month contract and "rolled" forward each month by selling the near month contract as it approached expiration and purchasing the next month contract to expire would be positively impacted by a backwardation market, and negatively impacted by a contango market. Depending on the exact price relationship of the different month's prices, portfolio expenses, and the overall movement of natural gas prices, the impact of backwardation and contango

could have a major impact on the total return of such a portfolio over time. USCF believes that based on historical evidence, a portfolio that held futures contracts with a range of expiration dates spread out over a 12 month period of time would typically be impacted less by the positive effect of backwardation and the negative effect of contango compared to a portfolio that held contracts of a single near month. As a result, absent the impact of any other factors, a portfolio of 12 different monthly contracts would tend to have a lower return than a near month only portfolio in a backwardation market and a higher total return in a contango market. However, there can be no assurance that such historical relationships would provide the same or similar results in the future.

Tax Risk

UNL is organized and operated as a limited partnership in accordance with the provisions of its limited partnership agreement and applicable state law, and therefore, has a more complex tax treatment than conventional mutual funds.

Over-the-Counter (“OTC”) Contract Risk

UNL may also invests in Other Natural Gas-Related Investments, many of which are negotiated over-the-counter or “OTC” contracts that are not as liquid as Futures Contracts and expose UNL to credit risk that its counterparty may not be able to satisfy its obligations to UNL.

Other Risks

UNL pays fees and expenses that are incurred regardless of whether it is profitable.

Unlike mutual funds, commodity pools or other investment pools that manage their investments in an attempt to realize income and gains and distribute such income and gains to their investors, UNL generally does not distribute cash to limited partners or other shareholders. You should not invest in UNL if you will need cash distributions from UNL to pay taxes on your share of income and gains of UNL, if any, or for any other reason.

You will have no rights to participate in the management of UNL and will have to rely on the duties and judgment of USCF to manage UNL.

UNL is subject to actual and potential inherent conflicts involving USCF, various commodity futures brokers and Authorized Participants. USCF’s officers, directors and employees do not devote their time exclusively to UNL. USCF’s persons are directors, officers or employees of other entities that may compete with UNL for their services, including other commodity pools (funds) that USCF manages (these funds are referred to in this prospectus as the “Related Public Funds” and are identified in the Glossary). USCF could have a conflict between its responsibilities to UNL and to those other entities. As a result of these and other relationships, parties involved with UNL have a financial incentive to act in a manner other than in the best interests of UNL and the shareholders.

UNL's Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of UNL. You should note that you may pay brokerage commissions on purchases and sales of UNL's shares, which are not reflected in the table. Authorized Participants will pay applicable creation and redemption fees. See "Creation and Redemption of Shares-Creation and Redemption Transaction Fee," page 62.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees ⁽¹⁾	0.75 %
Other Expenses ⁽¹⁾	0.71 %
Expense Waiver ⁽²⁾	(0.56)%
Net Expenses Excluding Management Fees	0.15 %
Total Annual Fund Operating Expenses After Fee Waiver	0.90 %

Based on amounts for the year ended December 31, 2015. The individual expense amounts in dollar terms are shown in the table below. As used in this table, (i) Professional Expenses include expenses for legal, audit, tax, accounting and printing; and (ii) Independent Director and Officer Expenses include amounts paid to independent directors and for officers' liability insurance.

Management fees	\$ 118,848
Professional Expenses	\$ 101,338
Brokerage commissions	\$ 6,117
Independent Director and Officer Expenses	\$ 3,140
License fees	\$ 2,377

USCF has voluntarily agreed to pay certain expenses typically borne by UNL, to the extent that such expenses exceed 0.15% of UNL's NAV, on an annualized basis. USCF has no obligation to continue such payment. If this agreement were terminated, the Annual Fund Operating Expenses could increase, which would negatively impact your total return from an investment in UNL.

RISK FACTORS INVOLVED WITH AN INVESTMENT IN UNL

You should consider carefully the risks described below before making an investment decision. You should also refer to the other information included in this prospectus, as well as information found in our periodic reports, which include UNL's financial statements and related notes, that are incorporated by reference. See "Incorporation by Reference of Certain Information", page 66.

UNL's investment objective is for the daily changes in percentage terms of its shares' per share NAV to reflect the daily changes in percentage terms of the spot price of natural gas delivered at the Henry Hub, Louisiana, as measured by the daily changes in the average of the prices of 12 futures contracts on natural gas traded on NYMEX, consisting of the near month contract to expire and the contracts for the following 11 months, for a total of 12 consecutive months' contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire and the contracts for the following 11 consecutive months (the "Benchmark Futures Contracts"), less UNL's expenses. UNL seeks to achieve its investment objective by investing in a combination of Futures Contracts and Other-Natural-Gas Related Investments such that the changes in its NAV will closely track the changes in the price of the NYMEX Futures Contracts for natural gas delivered to Henry Hub Louisiana. UNL's investment strategy is designed to provide investors with a means of investing indirectly in natural gas and to hedge against movements in the spot price of natural gas. An investment in UNL involves investment risk similar to a direct investment in Natural Gas Interests. An investment in UNL involves investment risk similar to a direct investment in Futures Contracts and Other Natural Gas-Related Investments, and correlation risk, or the risk that investors purchasing shares to hedge against movements in the price of natural gas will have an efficient hedge only if the price they pay for their shares closely correlates with the price of natural gas. In addition to investment risk and correlation risk, an investment UNL involves tax risks, OTC and other risks.

Investment Risk

The NAV of UNL's shares relates directly to the value of the Benchmark Futures Contracts and other assets held by UNL and fluctuations in the prices of these assets could materially adversely affect an investment in UNL's shares. Past performance is not necessarily indicative of futures results; all or substantially all of an investment in UNL could be lost.

The net assets of UNL consist primarily of investments in Futures Contracts and, to a lesser extent, in Other Natural Gas-Related Investments. The NAV of UNL's shares relates directly to the value of these assets (less liabilities, including accrued but unpaid expenses), which in turn relates to the price of natural gas in the marketplace. Natural gas prices depend on local, regional and global events or conditions that affect supply and demand for natural gas.

Economic conditions impacting natural gas. The demand for natural gas correlates closely with general economic growth rates. The occurrence of recessions or other periods of low or negative economic growth will typically have a direct adverse impact on natural gas demand and therefore may have an adverse impact on natural gas prices.

Other natural gas demand-related factors. Other factors that may affect the demand for natural gas and therefore its price, include technological improvements in energy efficiency; seasonal weather patterns, which affect the demand for natural gas associated with heating; increased competitiveness of alternative energy sources that have so far generally not been competitive with natural gas without the benefit of government subsidies or mandates; and changes in technology or consumer preferences that alter fuel choices, such as toward alternative fueled vehicles.

Other natural gas supply-related factors. Natural gas prices also vary depending on a number of factors affecting supply. For example, increased supply from the development of new natural gas sources and technologies to enhance recovery from existing sources tends to reduce natural gas prices to the extent such supply increases are not offset by commensurate growth in demand. Similarly, increases in industry refining or manufacturing capacity may impact the

supply of natural gas. Natural gas supply levels can also be affected by factors that reduce available supplies, such as natural disasters, disruptions in competitors' operations, or unexpected unavailability of distribution channels that may disrupt supplies. Technological change can also alter the relative costs for companies in the natural gas industry to find, produce, and transport natural gas, which in turn, may affect the supply of and demand for natural gas.

Other factors impacting the natural gas market. The supply of and demand for natural gas may also be impacted by changes in interest rates, inflation, and other local or regional market conditions, as well as by the development of alternative energy sources.

Price Volatility May Possibly Cause the Total Loss of Your Investment. Futures contracts have a high degree of price variability and are subject to occasional rapid and substantial changes. Consequently, you could lose all or substantially all of your investment.

Correlation Risk

Investors purchasing shares to hedge against movements in the price of natural gas will have an efficient hedge only if the price investors pay for their shares closely correlates with the price of natural gas. Investing in UNL's shares for hedging purposes involves the following risks:

- The market price at which the investor buys or sells shares may be significantly less or more than NAV. Daily percentage changes in NAV may not closely correlate with daily percentage changes in the average of the prices of the Benchmark Futures Contracts.

- Daily percentage changes in the average of the prices of the Benchmark Futures Contracts may not closely correlate with daily percentage changes in the price of natural gas.

The market price at which investors buy or sell shares may be significantly less or more than NAV.

UNL's NAV per share will change throughout the day as fluctuations occur in the market value of UNL's portfolio investments. The public trading price at which an investor buys or sells shares during the day from their broker may be different from the NAV of the shares. Price differences may relate primarily to supply and demand forces at work in the secondary trading market for shares that are closely related to, but not identical to, the same forces influencing the prices of the natural gas and the Benchmark Futures Contracts at any point in time. USCF expects that exploitation of certain arbitrage opportunities by Authorized Participants and their clients and customers will tend to cause the public trading price to track NAV per share closely over time, but there can be no assurance of that.

The NAV of UNL's shares may also be influenced by non-concurrent trading hours between the NYSE Arca and the various futures exchanges on which natural gas is traded. While the shares trade on the NYSE Arca from 9:30 a.m. to 4:00 p.m. Eastern Time, the trading hours for the futures exchanges on which natural gas trades may not necessarily coincide during all of this time. For example, while the shares trade on the NYSE Arca until 4:00 p.m. Eastern Time, liquidity in the natural gas market will be reduced after the close of the NYMEX at 2:30 p.m. Eastern Time. As a result, during periods when the NYSE Arca is open and the futures exchanges on which natural gas is traded are closed, trading spreads and the resulting premium or discount on the shares may widen and, therefore, increase the difference between the price of the shares and the NAV of the shares.

Daily percentage changes in UNL's NAV may not correlate with daily percentage changes in the average of the prices of the Benchmark Futures Contracts.

It is possible that the daily percentage changes in UNL's NAV per share may not closely correlate to daily percentage changes in the average of the prices of the Benchmark Futures Contracts. Non-correlation may be attributable to disruptions in the market for natural gas, the imposition of position or accountability limits by regulators or exchanges, or other extraordinary circumstances. As UNL approaches or reaches position limits with respect to the Benchmark Futures Contracts and other Futures Contracts or in view of market conditions, UNL may begin investing in Other Natural Gas-Related Investments. In addition, UNL is not able to replicate exactly the changes in the price of the Benchmark Futures Contract because the total return generated by UNL is reduced by expenses and transaction costs, including those incurred in connection with UNL's trading activities, and increased by interest income from UNL's holdings of Treasuries (defined below). Tracking the Benchmark Futures Contracts requires trading of UNL's portfolio with a view to tracking the Benchmark Futures Contracts over time and is dependent upon the skills of USCF and its trading principals, among other factors.

Daily percentage changes in the price of the Benchmark Futures Contracts may not correlate with daily percentage changes in the spot price of natural gas.

The correlation between changes in prices of the Benchmark Futures Contracts and the spot price of natural gas may at times be only approximate. The degree of imperfection of correlation depends upon circumstances such as variations in the speculative natural gas market, supply of and demand for Futures Contracts (including the Benchmark Futures Contracts) and Other Natural Gas-Related Investments, and technical influences in natural gas futures trading.

Natural forces in the natural gas futures market known as “backwardation” and “contango” may increase UNL’s tracking error and/or negatively impact total return.

The design of UNL’s Benchmark Futures Contracts is such that every month it begins by using the near month contract to expire and the contracts for the following 11 months until the near month contract is within two weeks of expiration, when, over a one day period, it transitions to the next month contract to expire and the contracts for the following 11 months as its benchmark contracts and keeps those contracts as its benchmark until it becomes the near month contract and close to expiration. In the event of a natural gas futures market where near month contracts trade at a higher price than next month to expire contracts, a situation described as “backwardation” in the futures market, then absent the impact of the overall movement in natural gas prices the value of the benchmark contract would tend to rise as it approaches expiration. Conversely, in the event of a natural gas futures market where near month contracts trade at a lower price than next month contracts, a situation described as “contango” in the futures market, then absent the impact of the overall movement in natural gas prices the value of the Benchmark Futures Contracts would tend to decline as it approaches expiration. When compared to total return of other price indices, such as the spot price of natural gas, the impact of backwardation and contango may cause the total return of UNL’s per share NAV to vary significantly. Moreover, absent the impact of rising or falling natural gas prices, a prolonged period of contango could have a significant negative impact on UNL’s per share NAV and total return and investors could lose part or all of their investment. See “Additional Information About UNL, its Investment Objective and Investments” for a discussion of the potential effects of contango and backwardation.

Accountability levels, position limits, and daily price fluctuation limits set by the exchanges have the potential to cause tracking error, which could cause the price of shares to substantially vary from the average of the prices of the Benchmark Futures Contracts.

Designated contract markets, such as the NYMEX, have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge, which an investment by UNL is not) may hold, own or control. These levels and position limits apply to futures contracts that UNL invests in to meet its investment objective. In addition to accountability levels and position limits, the NYMEX also set daily price fluctuation limits on futures contracts. The daily price fluctuation limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day’s settlement price. Once the daily price fluctuation limit has been reached in a particular futures contract, no trades may be made at a price beyond that limit.

The CFTC has proposed to adopt limits on speculative positions in 28 physical commodity futures and option contracts and swaps that are economically equivalent to such contracts in the agriculture, energy and metals markets and rules addressing the circumstances under which market participants would be required to aggregate their positions with other persons under common ownership or control (the “Position Limit Rules”). The Position Limit Rules, as proposed, would apply to the futures contracts that UNL invests in to meet its investment objective. The Position Limit Rules would, among other things: identify which contracts are subject to speculative position limits; set thresholds that restrict the number of speculative positions that a person may hold in a spot month, individual month, and all months combined; create an exemption for positions that constitute bona fide hedging transactions; impose

responsibilities on DCMs and SEFs to establish position limits or, in some cases, position accountability rules; and apply to both futures and swaps across four relevant venues: OTC, DCMs, SEFs as well as non-U.S. located platforms. The CFTC's first attempt at finalizing the Position Limit Rules, in 2011, was successfully challenged by market participants in 2012 and, since then, the CFTC has re-proposed them and solicited comments from market participants multiple times.

Until such time as the Position Limit Rules are adopted, the regulatory architecture in effect prior to the adoption of the Position Limit Rules will govern transactions in commodities and related derivatives (collectively, "Referenced Contracts"). Under that system, the CFTC enforces federal limits on speculation in agricultural products (*e.g.*, corn, wheat and soy), while futures exchanges enforce position limits and accountability levels for agricultural and certain energy products (*e.g.*, oil and natural gas). As a result, UNL may be limited with respect to the size of its investments in any commodities subject to these limits. Finally, subject to certain narrow exceptions, the Position Limit Rules require the aggregation, for purposes of the position limits, of all positions in the 28 Referenced Contracts held by a single entity and its affiliates, regardless of whether such position existed on U.S. futures exchanges, non-U.S. futures exchanges, in cleared swaps or in OTC swaps. Under the CFTC's existing position limits requirements and the Position Limit Rules, a market participant is generally required to aggregate all positions for which that participant controls the trading decisions with all positions for which that participant has a ten percent or greater ownership interest in an account or position, as well as the positions of two or more persons acting pursuant to an express or implied agreement or understanding. At this time, it is unclear how the Position Limit Rules may affect UNL, but the effect may be substantial and adverse. By way of example, the Position Limit Rules may negatively impact the ability of UNL to meet its investment objectives through limits that may inhibit USCF's ability to sell additional Creation Baskets of UNL.

All of these limits may potentially cause a tracking error between the price of UNL's shares and the average of the prices of the Benchmark Futures Contracts. This may in turn prevent investors from being able to effectively use UNL as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

UNL has not limited the size of its offering and is committed to utilizing substantially all of its proceeds to purchase Futures Contracts and Other-Natural-Gas Related Investments. If UNL encounters accountability levels, position limits, or price fluctuation limits for Futures Contracts on the NYMEX, it may then, if permitted under applicable regulatory requirements, purchase Futures Contracts on other exchanges that trade listed natural gas futures or enter into swaps or other transactions to meet its investment objective. In addition, if UNL exceeds accountability levels on either the NYMEX and is required by such exchanges to reduce its holdings, such reduction could potentially cause a tracking error between the price of UNL's shares and the average of the prices of the Benchmark Futures Contracts.

Tax Risk

An investor's tax liability may exceed the amount of distributions, if any, on its shares.

Cash or property will be distributed at the sole discretion of USCF. USCF has not and does not currently intend to make cash or other distributions with respect to shares. Investors will be required to pay U.S. federal income tax and, in some cases, state, local, or foreign income tax, on their allocable share of UNL's taxable income, without regard to whether they receive distributions or the amount of any distributions. Therefore, the tax liability of an investor with respect to its shares may exceed the amount of cash or value of property (if any) distributed.

An investor's allocable share of taxable income or loss may differ from its economic income or loss on its shares.

Due to the application of the assumptions and conventions applied by UNL in making allocations for tax purposes and other factors, an investor's allocable share of UNL's income, gain, deduction or loss may be different than its economic profit or loss from its shares for a taxable year. This difference could be temporary or permanent and, if permanent, could result in it being taxed on amounts in excess of its economic income.

Items of income, gain, deduction, loss and credit with respect to shares could be reallocated if the U.S. Internal Revenue Service (“IRS”) does not accept the assumptions and conventions applied by UNL in allocating those items, with potential adverse consequences for an investor.

The U.S. tax rules pertaining to partnerships are complex and their application to large, publicly traded partnerships such as UNL is in many respects uncertain. UNL applies certain assumptions and conventions in an attempt to comply with the intent of the applicable rules and to report taxable income, gains, deductions, losses and credits in a manner that properly reflects shareholders’ economic gains and losses. These assumptions and conventions may not fully comply with all aspects of the Internal Revenue Code (the “Code”) and applicable Treasury Regulations, however, and it is possible that the IRS will successfully challenge UNL’s allocation methods and require UNL to reallocate items of income, gain, deduction, loss or credit in a manner that adversely affects investors. If this occurs, investors may be required to file an amended tax return and to pay additional taxes plus deficiency interest. For periods beginning after December 31, 2017, UNL may be liable for any resulting adjustments, which could have a material impact on the value of the shares. Alternatively, UNL may elect to cause any such adjustments to be taken into account by the partners in the year the adjustment is finalized. Because such adjustments are taken into account by the partnership in the year the adjustments are finalized rather than the year subject to IRS review, these adjustments could adversely impact an investor depending on his, her, or its particular circumstances in the review year and the year the adjustment is finalized.

UNL could be treated as a corporation for federal income tax purposes, which may substantially reduce the value of the shares.

UNL has received an opinion of counsel that, under current U.S. federal income tax laws, UNL will be treated as a partnership that is not taxable as a corporation for U.S. federal income tax purposes, provided that (i) at least 90 percent of UNL’s annual gross income consists of “qualifying income” as defined in the Code, (ii) UNL is organized and operated in accordance with its governing agreements and applicable law and (iii) UNL does not elect to be taxed as a corporation for federal income tax purposes. Although USCF anticipates that UNL has satisfied and will continue to satisfy the “qualifying income” requirement for all of its taxable years, that result cannot be assured. UNL has not requested and will not request any ruling from the IRS with respect to its classification as a partnership not taxable as a corporation for federal income tax purposes. If the IRS were to successfully assert that UNL is taxable as a corporation for federal income tax purposes in any taxable year, rather than passing through its income, gains, losses and deductions proportionately to shareholders, UNL would be subject to tax on its net income for the year at corporate tax rates. In addition, although USCF does not currently intend to make distributions with respect to shares, any distributions would be taxable to shareholders as dividend income. Taxation of UNL as a corporation could materially reduce the after-tax return on an investment in shares and could substantially reduce the value of the shares.

UNL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law, and therefore, UNL has a more complex tax treatment than traditional mutual funds.

UNL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law. No U.S. federal income tax is paid by UNL on its income. Instead, UNL will furnish shareholders each year with tax information on IRS Schedule K-1 (Form 1065) and each U.S. shareholder is required to report on its U.S. federal income tax return its allocable share of the income, gain, loss and deduction of UNL.

This must be reported without regard to the amount (if any) of cash or property the shareholder receives as a distribution from UNL during the taxable year. A shareholder, therefore, may be allocated income or gain by UNL but receive no cash distribution with which to pay the tax liability resulting from the allocation, or may receive a distribution that is insufficient to pay such liability.

In addition to federal income taxes, shareholders may be subject to other taxes, such as state and local income taxes, unincorporated business taxes, business franchise taxes and estate, inheritance or intangible taxes that may be imposed by the various jurisdictions in which UNL does business or owns property or where the shareholders reside. Although an analysis of those various taxes is not presented here, each prospective shareholder should consider their potential impact on its investment in UNL. It is each shareholder's responsibility to file the appropriate U.S. federal, state, local and foreign tax returns.

If UNL is required to withhold tax with respect to any Non-U.S. shareholders, the cost of such withholding may be borne by all shareholders.

Under certain circumstances, UNL may be required to pay withholding tax with respect to allocations to Non-U.S. shareholders. Although the LP Agreement provides that any such withholding will be treated as being distributed to the Non-U.S. shareholder, UNL may not be able to cause the economic cost of such withholding to be borne by the Non-U.S. shareholder on whose behalf such amounts were withheld since it does not generally expect to make any distributions. Under such circumstances, the economic cost of the withholding may be borne by all shareholders, not just the shareholders on whose behalf such amounts were withheld. This could have a material impact on the value of the shares.

OTC Contract Risk

Currently, OTC transactions are subject to changing regulation.

A portion of UNL's assets may be used to trade OTC contracts, such as forward contracts or swap or spot contracts. OTC contracts are typically contracts traded on a principal-to-principal, non-cleared basis through dealer markets that are dominated by major money center and investment banks and other institutions. The markets for OTC contracts rely upon the integrity of market participants in lieu of the additional regulation imposed by the CFTC on participants in the futures markets. While certain regulations adopted over the past two years are intended to provide additional protections to participants in the OTC market, the current regulation of the OTC contracts could expose UNL in certain circumstances to significant losses in the event of trading abuses or financial failure by participants. As a result of such regulations, if UNL enters into certain interest rate and credit default swaps, such swaps will be required to be centrally cleared. Determination on other types of swaps are expected in the future, and, when finalized, could require UNL to centrally clear certain OTC instruments presently entered into and settled on a bi-lateral basis.

UNL will be subject to credit risk with respect to counterparties to OTC contracts entered into by UNL or held by special purpose or structured vehicles.

UNL faces the risk of non-performance by the counterparties to the OTC contracts. Unlike in futures contracts, the counterparty to these contracts is generally a single bank or other financial institution, rather than a clearing organization backed by a group of financial institutions. As a result, there will be greater counterparty credit risk in these transactions. A counterparty may not be able to meet its obligations to UNL, in which case UNL could suffer significant losses on these contracts.

If a counterparty becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, UNL may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. UNL may obtain only limited recovery or may obtain no recovery in such circumstances.

Valuing OTC derivatives may be less certain than actively traded financial instruments.

In general, valuing OTC derivatives is less certain than valuing actively traded financial instruments such as exchange traded futures contracts and securities or cleared swaps because the price and terms on which such OTC derivatives are entered into or can be terminated are individually negotiated, and those prices and terms may not reflect the best price or terms available from other sources. In addition, while market makers and dealers generally quote indicative prices or terms for entering into or terminating OTC contracts, they typically are not contractually obligated to do so, particularly if they are not a party to the transaction. As a result, it may be difficult to obtain an independent value for an outstanding OTC derivatives transaction.

Other Risks

Certain of UNL's investments could be illiquid, which could cause large losses to investors at any time or from time to time.

Futures positions cannot always be liquidated at the desired price. It is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A market disruption, such as a foreign government taking political actions that disrupt the market for its currency, its natural gas production or exports, or another major export, can also make it difficult to liquidate a position. Because both Futures Contracts and Other-Natural-Gas Related Investments may be illiquid, UNL's Natural Gas Interests may be more difficult to liquidate at favorable prices in periods of illiquid markets and losses may be incurred during the period in which positions are being liquidated. The large size of the positions that UNL may acquire increases the risk of illiquidity

both by making its positions more difficult to liquidate and by potentially increasing losses while trying to do so.

OTC contracts that are not subject to clearing may be even less marketable than futures contracts because they are not traded on an exchange, do not have uniform terms and conditions, and are entered into based upon the creditworthiness of the parties and the availability of credit support, such as collateral, and in general, they are not transferable without the consent of the counterparty. These conditions make such contracts less liquid than standardized futures contracts traded on a commodities exchange and could adversely impact UNL's ability to realize the full value of such contracts. In addition, even if collateral is used to reduce counterparty credit risk, sudden changes in the value of OTC transactions may leave a party open to financial risk due to a counterparty default since the collateral held may not cover a party's exposure on the transaction in such situations.

UNL is not actively managed and tracks the Benchmark Futures Contracts during periods in which the prices of the Benchmark Futures Contracts are flat or declining as well as when the prices are rising.

UNL is not actively managed by conventional methods. Accordingly, if UNL's investments in Natural Gas Interests are declining in value, UNL will not close out such positions except in connection with paying the proceeds to an Authorized Participant upon the redemption of a basket or closing out futures positions in connection with the monthly change in a Benchmark Futures Contract. USCF will seek to cause the NAV of UNL's shares to track the Benchmark Futures Contracts during periods in which its price is flat or declining as well as when the price is rising.

The NYSE Arca may halt trading in UNL's shares, which would adversely impact an investor's ability to sell shares.

UNL's shares are listed for trading on the NYSE Arca under the market symbol "UNL." Trading in shares may be halted due to market conditions or, in light of NYSE Arca rules and procedures, for reasons that, in the view of the NYSE Arca, make trading in shares inadvisable. In addition, trading is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules that require trading to be halted for a specified period based on a specified market decline. Additionally, there can be no assurance that the requirements necessary to maintain the listing of UNL's shares will continue to be met or will remain unchanged.

The liquidity of the shares may also be affected by the withdrawal from participation of Authorized Participants, which could adversely affect the market price of the shares.

In the event that one or more Authorized Participants which have substantial interests in the shares withdraw from participation, the liquidity of the shares will likely decrease, which could adversely affect the market price of the shares and result in investors incurring a loss on their investment.

Shareholders that are not Authorized Participants may only purchase or sell their shares in secondary trading markets, and the conditions associated with trading in secondary markets may adversely affect investors' investment in the shares.

Only Authorized Participants may create or redeem Redemption Baskets. All other investors that desire to purchase or sell shares must do so through the NYSE Arca or in other markets, if any, in which the shares may be traded. Shares may trade at a premium or discount to NAV per share.

The lack of an active trading market for UNL's shares may result in losses on an investor's investment in UNL at the time the investor sells the shares.

Although UNL's shares are listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the shares will be maintained. If an investor needs to sell shares at a time when no active trading market for them exists, the price the investor receives upon sale of the shares, assuming they were able to be sold, likely would be lower than if an active market existed.

Limited partners may have limited liability in certain circumstances, including potentially having liability for the return of wrongful distributions.

Under Delaware law, a limited partner might be held liable for UNL's obligations as if it were a general partner if the limited partner participates in the control of the partnership's business and the persons who transact business with the partnership think the limited partner is the general partner.

A limited partner will not be liable for assessments in addition to its initial capital investment in any of UNL's shares. However, a limited partner may be required to repay to UNL any amounts wrongfully returned or distributed to it under some circumstances. Under Delaware law, UNL may not make a distribution to limited partners if the distribution causes UNL's liabilities (other than liabilities to partners on account of their partnership interests and nonrecourse liabilities) to exceed the fair value of UNL's assets. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the law will be liable to the limited partnership for the amount of the distribution for three years from the date of the distribution.

The Sixth Amended and Restated Limited Liability Company Agreement of USCF (the “LLC Agreement”) provides limited authority to the Non-Management Directors, and any Director of USCF may be removed by USCF’s parent company, which is a closely-held private company where the majority of shares has historically been voted by one person.

USCF’s Board of Directors currently consists of four Management Directors, each of whom are shareholders of USCF’s parent, Wainwright Holdings, Inc. (“Wainwright”), and three Non-Management Directors, each of whom are considered independent for purposes of applicable NYSE Arca and SEC rules. Under USCF’s LLC Agreement, the Non-Management Directors have only such authority as the Management Directors expressly confer upon them, which means that the Non-Management Directors may have less authority to control the actions of the Management Directors than is typically the case with the independent members of a company’s Board of Directors. In addition, any Director may be removed by written consent of Wainwright, which is the sole member of USCF. Wainwright is a privately held company in which the majority of shares are held by or on behalf of Nicholas D. Gerber and his immediate family members (the “Gerber Family”). Historically, shares of Wainwright have been voted by, and on behalf of, the Gerber Family by Nicholas D. Gerber, and it is anticipated that such trend will continue in the future. Accordingly, although USCF is governed by the USCF Board of Directors, which consists of both Management Directors and Non-Management Directors, pursuant to the LLC Agreement, it is possible for Mr. Gerber to exercise his control of Wainwright to effect the removal of any Director (including the Non-Management Directors which comprise the Audit Committee) and to replace that Director with another Director. Having control in one person could have a negative impact on USCF and UNL, including their regulatory obligations.

There is a risk that UNL will not earn trading gains sufficient to compensate for the fees and expenses that it must pay and as such UNL may not earn any profit.

Based on fees and expenses paid by UNL for the year-ended December 31, 2015 and UNL’s average daily total net assets for 2015, an investor would pay fees and expenses, prior to any expense waiver, of 1.46% of the amount of the investor’s investment.

These fees and expenses must be paid in all cases regardless of whether UNL's activities are profitable. Accordingly, UNL must earn trading gains sufficient to compensate for these fees and expenses before it can earn any profit.

Regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments are impossible to predict but may significantly and adversely affect UNL.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and futures exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits and the suspension of trading. Regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. Considerable regulatory attention has been focused on non-traditional investment pools that are publicly distributed in the United States. In addition, various national governments outside of the United States have expressed concern regarding the disruptive effects of speculative trading in the energy markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on UNL is impossible to predict, but it could be substantial and adverse.

An investment in UNL may provide little or no diversification benefits. Thus, in a declining market, UNL may have no gains to offset losses from other investments, and an investor may suffer losses on an investment in UNL while incurring losses with respect to other asset classes.

Historically, Futures Contracts and Other-Natural-Gas Related Investments have generally been non-correlated to the performance of other asset classes such as stocks and bonds. Non-correlation means that there is a low statistically valid relationship between the performance of futures and other commodity interest transactions, on the one hand, and stocks or bonds, on the other hand.

However, there can be no assurance that such non-correlation will continue during future periods. If, contrary to historic patterns, UNL's performance were to move in the same general direction as the financial markets, investors will obtain little or no diversification benefits from an investment in UNL's shares. In such a case, UNL may have no gains to offset losses from other investments, and investors may suffer losses on their investment in UNL at the same time they incur losses with respect to other investments.

Variables such as drought, floods, weather, embargoes, tariffs and other political events may have a larger impact on natural gas prices and natural gas-linked instruments, including Futures Contracts and Other-Natural-Gas Related Investments, than on traditional securities. These additional variables may create additional investment risks that subject UNL's investments to greater volatility than investments in traditional securities.

Non-correlation should not be confused with negative correlation, where the performance of two asset classes would be opposite of each other. There is no historical evidence that the spot price of natural gas and prices of other financial assets, such as stocks and bonds, are negatively correlated. In the absence of negative correlation, UNL cannot be expected to be automatically profitable during unfavorable periods for the stock market, or vice versa.

UNL is not a registered investment company so shareholders do not have the protections of the 1940 Act.

UNL is not an investment company subject to the 1940 Act. Accordingly, investors do not have the protections afforded by that statute which, for example, requires investment companies to have a majority of disinterested directors and regulates the relationship between the investment company and its investment manager.

Trading in international markets could expose UNL to credit and regulatory risk.

UNL invests primarily in Futures Contracts, a significant portion of which are traded on United States exchanges, including the NYMEX. However, a portion of UNL's trades may take place on markets and exchanges outside the United States. Some non-U.S. markets present risks because they are not subject to the same degree of regulation as their U.S. counterparts. Trading on such non-U.S. markets or exchanges presents risks because they are not subject to the same degree of regulation as their U.S. counterparts, including potentially different or diminished investor protections. In trading contracts denominated in currencies other than U.S. dollars, UNL is subject to the risk of adverse exchange-rate movements between the dollar and the functional currencies of such contracts. Additionally, trading on non-U.S. exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens and exposure to local economic declines and political instability. An adverse development with respect to any of these variables could reduce the profit or increase the loss earned on trades in the affected international markets.

UNL and USCF may have conflicts of interest, which may permit them to favor their own interests to the detriment of shareholders.

UNL is subject to actual and potential inherent conflicts involving USCF, various commodity futures brokers and Authorized Participants. USCF's officers, directors and employees do not devote their time exclusively to UNL. These persons are directors, officers or employees of other entities that may compete with UNL for their services, including the Related Public Funds. They could have a conflict between their responsibilities to UNL and to those other entities. As a result of these and other relationships, parties involved with UNL have a financial incentive to act in a manner other than in the best interests of UNL and the shareholders. USCF has not established any formal procedure to resolve conflicts of interest. Consequently, investors are dependent on the good faith of the respective parties subject to such conflicts of interest to resolve them equitably. Although USCF attempts to monitor these conflicts, it is extremely difficult, if not impossible, for USCF to ensure that these conflicts do not, in fact, result in adverse consequences to the shareholders.

UNL may also be subject to certain conflicts with respect to the futures commission merchant ("FCM"), including, but not limited to, conflicts that result from receiving greater amounts of compensation from other clients, or purchasing opposite or competing positions on behalf of third party accounts traded through the FCM. In addition, USCF's principals, officers, directors or employees may trade futures and related contracts for their own accounts. A conflict of interest may exist if their trades are in the same markets and at the same time as the UNL trades using the clearing broker to be used by UNL. A potential conflict also may occur if USCF's principals, officers, directors or employees trade their accounts more aggressively or take positions in their accounts which are opposite, or ahead of, the positions taken by UNL.

UNL could terminate at any time and cause the liquidation and potential loss of an investor's investment and could upset the overall maturity and timing of an investor's investment portfolio.

UNL may terminate at any time, regardless of whether UNL has incurred losses, subject to the terms of the LP Agreement. In particular, unforeseen circumstances, including the adjudication of incompetence, bankruptcy, dissolution, or removal of USCF as the general partner of UNL could cause UNL to terminate unless a majority interest of the limited partners within 90 days of the event elects to continue the partnership and appoints a successor general partner, or the affirmative vote of a majority in interest of the limited partners subject to certain conditions. However, no level of losses will require USCF to terminate UNL. UNL's termination would cause the liquidation and potential loss of an investor's investment. Termination could also negatively affect the overall maturity and timing of an investor's investment portfolio.

UNL does not expect to make cash distributions.

UNL has not previously made any cash distributions and intends to reinvest any realized gains in additional Natural Gas Interests rather than distributing cash to limited partners. Therefore, unlike mutual funds, commodity pools or other investment pools that actively manage their investments in an attempt to realize income and gains from their investing activities and distribute such income and gains to their investors, UNL generally does not expect to distribute cash to limited partners. An investor should not invest in UNL if the investor will need cash distributions from UNL to pay taxes on its share of income and gains of UNL, if any, or for any other reason. Nonetheless, although UNL does not intend to make cash distributions, the income earned from its investments held directly or posted as margin may reach levels that merit distribution, *e.g.*, at levels where such income is not necessary to support its underlying investments in Natural Gas Interests and investors adversely react to being taxed on such income without receiving distributions that could be used to pay such tax. If this income becomes significant then cash distributions may be made.

An unanticipated number of redemption requests during a short period of time could have an adverse effect on UNL's NAV.

If a substantial number of requests for redemption of Redemption Baskets are received by UNL during a relatively short period of time, UNL may not be able to satisfy the requests from UNL's assets not committed to trading. As a consequence, it could be necessary to liquidate positions in UNL's trading positions before the time that the trading strategies would otherwise dictate liquidation.

Money Market Reform

On July 23, 2014, the SEC adopted final rules to reform money market funds such that institutional prime money market funds will float their net asset value as well as impose rules such that all money market funds' boards of directors will be required to implement rules to discourage and prevent runs by investors through the use of redemption fees and gates. Money market funds have two years from the date of adoption to implement the reform. UNL currently invests in money market funds, as well as Treasuries with a maturity date of two years or less, as an investment for assets not used for margin or collateral in the Futures Contracts. It is unclear at this time what the impact of money market reform would have on UNL's ability to hedge risk, however, the imposition of a floating NAV could cause UNL to limit remaining assets solely to Treasuries.

As the regulatory requirements are constantly evolving it is difficult to predict the effect any regulatory changes may have on UNL.

The failure or bankruptcy of a clearing broker could result in a substantial loss of UNL's assets and could impair UNL in its ability to execute trades.

In the event of the bankruptcy of a clearing member or an Exchange's clearing house, UNL could be exposed to a risk of loss with respect to its assets that are posted as margin. If such a bankruptcy were to occur, UNL would be afforded the protections granted to customers of an FCM, and participants to transactions cleared through a clearing house, under the United States Bankruptcy Code and applicable CFTC regulations. Such provisions generally provide for a pro rata distribution to customers of customer property held by the bankrupt FCM or an Exchange's clearing house if the customer property held by the FCM or the Exchange's clearing house is insufficient to satisfy all customer claims. In any case, there can be no assurance that these protections will be effective in allowing UNL to recover all, or even any, of the amounts it has deposited as margin.

Bankruptcy of a clearing FCM can be caused by, among other things, the default of one of the FCM's customers. In this event the Exchange's clearing house is permitted to use the entire amount of margin posted by UNL (as well as margin posted by other customers of the FCM) to cover the amounts owed by the bankrupt FCM. Consequently, UNL could be unable to recover amounts due to it on its futures positions, including assets posted as margin, and could sustain substantial losses.

On January 13, 2014, new regulations became effective relating to enhanced customer protections, risk management programs, internal monitoring and controls, capital and liquidity standards, customer disclosures and auditing and examination programs for FCMs. There can be no assurance that the implementation of these regulations will prevent losses to, or not materially adversely affect, UNL or its investors.

Notwithstanding that UNL could sustain losses upon the failure or bankruptcy of its FCM, the majority of UNL's assets are held in Treasuries, cash and/or cash equivalents with the Custodian and would not be impacted by the bankruptcy of an FCM.

The failure or bankruptcy of UNL's Custodian could result in a substantial loss of UNL's assets.

The majority of UNL's assets are held in Treasuries, cash and/or cash equivalents with the Custodian. The insolvency of the Custodian could result in a complete loss of UNL's assets held by the Custodian, which, at any given time, would likely comprise a substantial portion of UNL's total assets.

Third parties may infringe upon or otherwise violate intellectual property rights or assert that USCF has infringed or otherwise violated their intellectual property rights, which may result in significant costs and diverted attention.

It is possible that third parties might utilize UNL's intellectual property or technology, including the use of its business methods, trademarks and trading program software, without permission. USCF has a patent for UNL's business method and has registered its trademarks. UNL does not currently have any proprietary software. However, if it obtains proprietary software in the future, any unauthorized use of UNL's proprietary software and other technology could also adversely affect its competitive advantage. UNL may not have adequate resources to implement procedures for monitoring unauthorized uses of its patents, trademarks, proprietary software and other technology. Also, third parties may independently develop business methods, trademarks or proprietary software and other technology similar to that of USCF or claim that USCF has violated their intellectual property rights, including their copyrights, trademark rights, trade names, trade secrets and patent rights. As a result, USCF may have to litigate in the future to protect its trade secrets, determine the validity and scope of other parties' proprietary rights, defend itself against claims that it has infringed or otherwise violated other parties' rights, or defend itself against claims that its rights are invalid. Any litigation of this type, even if USCF is successful and regardless of the merits, may result in significant costs, divert its resources from UNL, or require it to change its proprietary software and other technology or enter into royalty or licensing agreements.

Due to the increased use of technologies, intentional and unintentional cyber-attacks pose operational and information security risks.

With the increased use of technologies such as the Internet and the dependence on computer systems to perform necessary business functions, UNL is susceptible to operational and information security risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites. Cyber security failures or breaches of UNL's clearing broker or third party service providing (including, but not limited to, index providers, the administrator and transfer agent, the custodian), have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability of UNL shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs.

In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. UNL and its shareholders could be negatively impacted as a result. While UNL has established business continuity plans, there are inherent limitations in such plans.

ADDITIONAL INFORMATION ABOUT UNL, ITS INVESTMENT OBJECTIVE AND INVESTMENTS

UNL is a Delaware limited partnership organized on June 27, 2007. It operates pursuant to the terms of the Second Amended and Restated Agreement of Limited Partnership dated as of March 1, 2013, (as amended from time to time, the "LP Agreement"), which grants full management control of UNL to USCF. The Limited Partnership Agreement is posted on UNL's website at www.uscfinvestments.com. UNL maintains its main business office at 1999 Harrison Street, Suite 1530, Oakland, California 94612.

The net assets of UNL consist primarily of investments in Futures Contracts and, to a lesser extent, in order to comply with regulatory requirements or in view of market conditions, Other Natural Gas-Related Investments. Market conditions that USCF currently anticipates could cause UNL to invest in Other Natural Gas-Related Investments include those allowing UNL to obtain greater liquidity or to execute transactions with more favorable pricing.

UNL invests substantially the entire amount of its assets in Futures Contracts while supporting such investments by holding the amounts of its margin, collateral and other requirements relating to these obligations in short-term obligations of the United States of two years or less ("Treasuries"), cash and cash equivalents. The daily holdings of UNL are available on UNL's website at www.uscfinvestments.com.

UNL invests in Natural Gas Interests to the fullest extent possible without being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Natural Gas Interests. In pursuing this objective, the primary focus of USCF is the investment in Futures Contracts and the management of UNL's investments in Treasuries, cash and/or cash equivalents for margining purposes and as collateral.

UNL seeks to invest in a combination of Natural Gas Interests such that the daily changes in its NAV, measured in percentage terms, will closely track the daily changes in the price of the Benchmark Futures Contracts, also measured in percentage terms. As a specific benchmark, USCF endeavors to place UNL's trades in Natural Gas Interests and otherwise manage UNL's investments so that "A" will be within plus/minus ten percent (10%) of "B", where:

-

A is the average daily percentage change in UNL's per share NAV for any period of 30 successive valuation days, *i.e.*, any NYSE Arca trading day as of which UNL calculates its per share NAV; and

B is the average daily percentage change in the average of the prices of the Benchmark Futures Contracts over the same period.

USCF believes that market arbitrage opportunities will cause the daily changes in UNL's share price on the NYSE Arca to closely track daily changes in UNL's per share NAV. USCF further believes that the daily changes in UNL's NAV in percentage terms will closely track the daily changes in percentage terms in the average price of the Benchmark Futures Contracts, less UNL's expenses.

The following two graphs demonstrate the correlation between the changes in the NAV of UNL and the changes in the Benchmark Futures Contracts. The first graph exhibits the daily changes for the last 30 valuation days ended March 31, 2016; the second graph measures monthly changes from March 2011 through March 2016.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

USCF employs a “neutral” investment strategy in order to track changes in the average of the prices of the Benchmark Futures Contracts regardless of whether the price goes up or goes down. UNL’s “neutral” investment strategy is designed to permit investors generally to purchase and sell UNL’s shares for the purpose of investing indirectly in natural gas in a cost-effective manner, and/or to permit participants in the natural gas or other industries to hedge the risk of losses in their natural gas-related transactions. Accordingly, depending on the investment objective of an individual investor, the risks generally associated with investing in natural gas and/or the risks involved in hedging may exist. In addition, an investment in UNL involves the risk that the daily changes in the average of the prices of UNL’s shares, in percentage terms, will not accurately track the daily changes in the average prices of the Benchmark Futures Contracts, in percentage terms, and that daily changes in the Benchmark Futures Contracts, in percentage terms, will not closely correlate with daily changes in the spot prices of natural gas, in percentage terms.

For the three months ended March 31, 2016, the actual total return of UNL as measured by changes in its per share NAV was (10.08)%. This is based on an initial per share NAV of \$9.72 on December 31, 2015 and an ending per share NAV as of March 31, 2016 of \$8.74. During this time period, UNL made no distributions to its shareholders. However, if UNL's daily changes in its per share NAV had instead exactly tracked the changes in the daily total return of the Benchmark Futures Contracts, UNL would have had an estimated per share NAV of \$8.75 as of March 31, 2016, for a total return over the relevant time period of (9.98)%. The difference between the actual per share NAV total return of UNL of (10.08)% and the expected total return based on the Benchmark Futures Contracts of (9.98)% was an error over the time period of (0.10)%, which is to say that UNL's actual total return underperformed the benchmark result by that percentage. UNL incurs expenses primarily composed of the management fee, brokerage commissions for the buying and selling of futures contracts, and other expenses. The impact of these expenses tends to cause daily changes in the per share NAV of UNL to track slightly lower than daily changes in the price of the Benchmark Futures Contract.

Impact of Contango and Backwardation on Total Returns

Contango and backwardation are natural market forces that have impacted the total return on an investment in UNL's shares during the past year relative to a hypothetical direct investment in natural gas. In the future, it is likely that the relationship between the market price of UNL's shares and changes in the spot prices of natural gas will continue to be impacted by contango and backwardation. (It is important to note that this comparison ignores the potential costs associated with physically owning and storing natural gas, which could be substantial.)

Several factors determine the total return from investing in a futures contract position. One factor that impacts the total return that will result from investing in near month futures contracts and "rolling" those contracts forward each month is the price relationship between the current near month contract and the next month contract. For example, if the price of the near month contract is higher than the next month contract (a situation referred to as "backwardation" in the futures market), then absent any other change there is a tendency for the price of a next month contract to rise in value as it becomes the near month contract and approaches expiration. Conversely, if the price of a near month contract is lower than the next month contract (a situation referred to as "contango" in the futures market), then absent any other change there is a tendency for the price of a next month contract to decline in value as it becomes the near month contract and approaches expiration.

As an example, assume that the price of natural gas for immediate delivery (the "spot price"), was \$7 per MMBtu, and the value of a position in the near month futures contract was also \$7. Over time, the price of 10,000 MMBtu of natural gas will fluctuate based on a number of market factors, including demand for natural gas relative to its supply. The value of the near month contract will likewise fluctuate in reaction to a number of market factors. If investors seek to maintain their position in a near month contract and not take delivery of the natural gas, every month they must sell their current near month contract as it approaches expiration and invest in the next month contract.

If the futures market is in backwardation, *e.g.*, when the price of natural gas futures contracts that expire later than the near month contract are lower than the near month contract's price, the investor would be buying a next month contract for a lower price than the current near month contract. Using the \$7 per MMBtu price above to represent the front month price, the price of the next month contract could be \$6.86 per barrel, that is, 2% cheaper than the front month contract. Hypothetically, and assuming no other changes to either prevailing natural gas prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the income earned on cash and/or cash equivalents), the value of the \$6.86 next month contract would rise as it approaches expiration and becomes the new near month contract with a price of \$7. In this example, the value of an investment in the second month contract would tend to rise faster than the spot price of natural gas, or fall slower. As a result, it would be possible in this hypothetical example for the spot price of natural gas to have risen 10% after some period of time, while the value of the investment in the second month futures contract would have risen 12%, assuming backwardation is large enough or enough time has elapsed. Similarly, the spot price of natural gas could have fallen 10% while the value of an investment in the futures contract could have fallen only 8%. Over time, if backwardation remained constant, the difference would continue to increase.

If the futures market is in contango, the investor would be buying a next month contract for a higher price than the current near month contract. Using again the \$7 per MMBtu price above to represent the front month price, the price of the next month contract could be \$7.14 per barrel, that is, 2% more expensive than the front month contract. Hypothetically, and assuming no other changes to either prevailing natural gas prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the income earned on cash and/or cash equivalents), the value of the next month contract would fall as it approaches expiration and becomes the new near month contract with a price of \$7. In this example, it would mean that the value of an investment in the second month would tend to rise slower than the spot price of natural gas, or fall faster. As a result, it would be possible in this hypothetical example for the spot price of natural gas to have risen 10% after some period of time, while the value of the investment in the second month futures contract will have risen only 8%, assuming contango is large enough or enough time has elapsed. Similarly, the spot price of natural gas could have fallen 10% while the value of an investment in the second month futures contract could have fallen 12%. Over time, if contango remained constant, the difference would continue to increase.

The chart below compares the price of the near month contract to the average price of the near 12 month contracts over the last 10 years for natural gas. When the price of the near month contract is higher than the average price of the near 12 month contracts, the market would be described as being in backwardation. When the price of the near month contract is lower than the average price of the near 12 month contracts, the market would be described as being in contango. Although the prices of the near month contract and the average price of the near 12 month contracts do tend to move up or down together, it can be seen that at times the near month prices are clearly higher than the average price of the near 12 month contracts (backwardation), and other times they are below the average price of the near 12 month contracts (contango). In addition, investors can observe that natural gas prices, both front month and second month, often display a seasonal pattern in which the price of natural gas tends to rise in the early winter months and decline in the summer months. This mirrors the physical demand for natural gas, which typically peaks in the winter.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

An alternative way to view backwardation and contango data over time is to subtract the dollar price of the near month natural gas Futures Contract from the dollar price of the near 12 month natural gas Futures Contracts. If the resulting number is a positive number, then the near month price is higher than the average price of the near 12 months and the market could be described as being in backwardation. If the resulting number is a negative number, then the near month price is lower than the average price of the near 12 months and the market could be described as being in contango. The chart below shows the results from subtracting the average dollar price of the near 12 month contracts from the near month price for the 10 year period between March 31, 2006 and March 31, 2016. Investors will note that the natural gas market spent time in both backwardation and contango.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

An investment in a portfolio that involved owning only the near month contract would likely produce a different result than an investment in a portfolio that owned an equal number of each of the near 12 months' worth of contracts. Generally speaking, when the natural gas futures market is in backwardation, the near month only portfolio would tend to have a higher total return than the 12 month contract portfolio. Conversely, if the natural gas futures market was in contango, the portfolio containing 12 months' worth of contracts would tend to outperform the near month only portfolio. The chart below shows the annual results of owning a portfolio consisting of the near month contract and a portfolio containing the near 12 months' worth of contracts. In addition, the chart shows the annual change in the spot price of natural gas. In this example, each month, the near month only portfolio would sell the near month contract at expiration and buy the next month out contract. The portfolio holding an equal number of the near 12 months' worth of contracts would sell the near month contract at expiration and replace it with the contract that becomes the new twelfth month contract.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT UNL WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING.

FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, INVESTORS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS.

As seen in the chart above, there have been periods of both positive and negative annual total returns for both hypothetical portfolios over the last 10 years. In addition, there have been periods during which the near month only approach had higher returns, and periods where the 12 month approach had higher total returns. The above chart does not represent the performance history of UNL or any Related Public Fund.

Historically, the natural gas futures markets have experienced periods of contango and backwardation. Because natural gas demand is seasonal, it is possible for the price of Futures Contracts for delivery within one or two months to rapidly move from backwardation into contango and back again within a relatively short period of time of less than one year. While the investment objective of UNL is not to have the market price of its shares match, dollar for dollar, changes in the spot price of natural gas, both contango and backwardation impacted the total return on an investment in UNL shares during the year ended December 31, 2015 relative to a hypothetical direct investment in natural gas. For example, an investment in UNL shares made on December 31, 2014 and held to December 31, 2015 decreased, based upon the changes in the NAV for UNL shares on those days, by approximately (29.00)%, while the spot price of natural gas for immediate delivery (as represented by the price of the Benchmark Futures Contract) during the same period decreased by approximately (17.39)% (note: this comparison ignores the potential costs associated with physically owning and storing natural gas, which could be substantial). By comparison, an investment made in UNL shares on December 31, 2013 and held to December 31, 2014 decreased, based upon the changes in the NAV for UNL shares on those days, by approximately 25.27%, while the spot price of natural gas for immediate delivery during the same period decreased by approximately 27.01% (note: this comparison ignores the potential costs associated with physically owning and storing natural gas, which could be substantial).

In managing UNL's assets USCF does not use a technical trading system that issues buy and sell orders. USCF employs a quantitative methodology whereby each time a Creation Basket is sold, USCF purchases Natural Gas Interests, such as the Benchmark Futures Contracts, that have an aggregate market value that approximates the amount of Treasuries and/or cash received from the sale of the Creation Basket.

The specific Futures Contracts purchased depend on various factors, including a judgment by USCF as to the appropriate diversification of UNL's investments in futures contracts with respect to the month of expiration, and the prevailing price volatility of particular contracts. While USCF has made significant investments in NYMEX Futures Contracts, for various reasons, including the ability to enter into the precise amount of exposure to the natural gas market, position limits or other regulatory requirements limiting UNL's holdings, and market conditions, it may invest in Futures Contracts traded on other exchanges or invest in Other Natural Gas-Related Investments. To the extent that UNL invests in Other Natural Gas-Related Investments, it would prioritize investments in contracts and instruments that are economically equivalent to the Benchmark Futures Contracts, including cleared swaps that satisfy such criteria, and then, to a lesser extent, it would invest in other types of cleared swaps and other contracts, instruments and non-cleared swaps, such as swaps in the over-the-counter (or commonly referred to as the OTC market). If UNL is required by law or regulation, or by one of its regulators, including a futures exchange, to reduce its position in the Futures Contracts to the applicable position limit or to a specified accountability level or if market conditions dictate it would be more appropriate to invest in Other Natural Gas-Related Investments, a substantial portion of UNL's assets could be invested in accordance with such priority in Other Natural Gas-Related Investments that are intended to replicate the return on the Benchmark Futures Contracts. As UNL's assets reach higher levels, it is more likely to exceed position limits, accountability levels or other regulatory limits and, as a result, it is more likely that it will invest in accordance with such priority in Other Natural Gas-Related Investments at such higher levels. In addition, market conditions that USCF currently anticipates could cause UNL to invest in Other Natural Gas-Related Investments include those allowing UNL to obtain greater liquidity or to execute transactions with more favorable pricing. See "*Risk Factors Involved with an Investment in UNL*" for a discussion of the potential impact of regulation on UNL's ability to invest in OTC transactions and cleared swaps.

USCF may not be able to fully invest UNL's assets in the Benchmark Futures Contracts having an aggregate notional amount exactly equal to UNL's NAV. For example, as standardized contracts, the Futures Contracts are for a specified

amount of a particular commodity, and UNL's NAV and the proceeds from the sale of a Creation Basket are unlikely to be an exact multiple of the amounts of those contracts. As a result, in such circumstances, UNL may be better able to achieve the exact amount of exposure to changes in price of the Benchmark Futures Contracts through the use of Other Natural Gas-Related Investments, such as OTC contracts that have better correlation with changes in price of the Benchmark Futures Contracts.

UNL anticipates that to the extent it invests in Futures Contracts other than contracts on natural gas (such as futures contracts for light, sweet crude oil, diesel-heating oil and other petroleum-based fuels) and Other Natural Gas-Related Investments, it will enter into various non-exchange-traded derivative contracts to hedge the short-term price movements of such Natural Gas Interests against the current Benchmark Futures Contracts.

USCF does not anticipate letting UNL's Futures Contracts expire and taking delivery of the underlying commodity. Instead, USCF closes existing positions, *e.g.*, when it changes the Benchmark Futures Contracts or Other Natural Gas-Related Investments or it otherwise determines it would be appropriate to do so and reinvests the proceeds in new Natural Gas Interests. Positions may also be closed out to meet orders for Redemption Baskets and in such case proceeds for such baskets will not be reinvested.

The Benchmark Futures Contracts are changed from the near month contract to expire and the 11 following months to the next month contract to expire and the 11 following months during one day each month. On that day, USCF anticipates it will "roll" UNL's positions by closing, or selling, its natural gas interests and reinvests the proceeds from closing these positions in new natural gas interests.

The anticipated dates that the monthly four-day roll period will commence are posted on UNL's website at www.uscfinvestments.com, and are subject to change without notice.

By remaining invested as fully as possible in Natural Gas Interests, USCF believes that the daily changes in percentage terms in UNL's per share NAV will continue to closely track the daily changes in percentage terms in the average of the prices of the Benchmark Futures Contracts. USCF believes that certain arbitrage opportunities result in the price of the shares traded on the NYSE Arca closely tracking the per share NAV of UNL. Additionally, Futures Contracts traded on the NYMEX have closely tracked the spot price of natural gas. Based on these expected interrelationships, USCF believes that the daily changes in the price of UNL's shares traded on the NYSE Arca, on a percentage basis, have closely tracked and will continue to closely track on a daily basis, the changes in the spot price of natural gas on a percentage basis.

What are the Trading Policies UNL?

Liquidity

UNL invests only in Futures Contracts and Other Natural Gas-Related Investments that, in the opinion of USCF, are traded in sufficient volume to permit the ready taking and liquidation of positions in these financial interests and Other Natural Gas-Related Investments that, in the opinion of USCF, may be readily liquidated with the original counterparty or through a third party assuming the position of UNL.

Spot Commodities

While the Futures Contracts traded can be physically settled, UNL does not intend to take or make physical delivery. UNL may from time to time trade in Other Natural Gas-Related Investments, including contracts based on the spot price of natural gas.

Leverage

USCF endeavors to have the value of UNL's Treasuries, cash and cash equivalents, whether held by UNL or posted as margin or other collateral, at all times approximate the aggregate market value of its obligations under its Futures Contracts and Other Natural Gas-Related Investments. Commodity pools' trading positions in futures contracts or other related investments are typically required to be secured by the deposit of margin funds that represent only a small percentage of a futures contract's (or other commodity interest's) entire market value. While USCF has not and does not

intend to leverage UNL's assets, it is not prohibited from doing so under the LP Agreement.

Borrowings

Borrowings are not used by UNL, unless UNL is required to borrow money in the event of physical delivery, if UNL trades in cash commodities, or for short-term needs created by unexpected redemptions.

OTC Derivatives (including Spreads and Straddles)

In addition to Futures Contracts, there are also a number of listed options on the Futures Contracts on the principal futures exchanges. These contracts offer investors and hedgers another set of financial vehicles to use in managing exposure to the natural gas market. Consequently, UNL may purchase options on natural gas Futures Contracts on these exchanges in pursuing its investment objective.

In addition to the Futures Contracts and options on the Futures Contracts, there also exists an active non-exchange-traded market in derivatives tied to natural gas. These derivatives transactions (also known as OTC contracts) are usually entered into between two parties in private contracts. Unlike most of the exchange-traded Futures Contracts or exchange-traded options on the Futures Contracts, each party to such contract bears the credit risk of the other party, *i.e.*, the risk that the other party may not be able to perform its obligations under its contract.

To reduce the credit risk that arises in connection with such contracts, UNL will generally enter into an agreement with each counterparty based on the Master Agreement published by the International Swaps and Derivatives Association, Inc. ("ISDA") that provides for the netting of its overall exposure to its counterparty.

USCF assesses or reviews, as appropriate, the creditworthiness of each potential or existing counterparty to an OTC contract pursuant to guidelines approved by USCF's Board.

UNL may enter into certain transactions where an OTC component is exchanged for a corresponding futures contract (an "Exchange for Related Position" or "EFRP" transactions). In the most common type of EFRP transaction entered into by UNL, the OTC component is the purchase or sale of one or more baskets of UNL shares. These EFRP transactions may expose UNL to counterparty risk during the interim period between the execution of the OTC component and the exchange for a corresponding futures contract. Generally, the counterparty risk from the EFRP transaction will exist only on the day of execution.

UNL may employ spreads or straddles in its trading to mitigate the differences in its investment portfolio and its goal of tracking the price of the Benchmark Futures Contract. UNL would use a spread when it chooses to take simultaneous long and short positions in futures written on the same underlying asset, but with different delivery months.

During all of 2015 and through March 31, 2016, UNL limited its derivatives activities to Futures Contracts and EFRP transactions.

UNL did not engage in trading in futures contracts listed on a foreign exchange or forward contracts, including options on such contracts. UNL does not anticipate engaging in trading in futures contracts listed on a foreign exchange, forward contracts or options on such contracts, but it may do so as outlined in UNL's listing exemptive order or as permitted under current regulations.

Pyramiding

UNL has not and will not employ the technique, commonly known as pyramiding, in which the speculator uses unrealized profits on existing positions as variation margin for the purchase or sale of additional positions in the same or another commodity interest.

Prior Performance of UNL**PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

USCF manages UNL which is a commodity pool that issues shares traded on the NYSE Arca. The chart below shows, as of March 31, 2016, the number of Authorized Participants, the total number of baskets created and redeemed since inception and the number of outstanding shares for UNL.

# of Authorized Participants	Baskets Purchased	Baskets Redeemed	Outstanding Shares
9	107	80	1,350,000

Since the commencement of the offering of UNL shares to the public on November 18, 2009 to March 31, 2016, the simple average daily change in the average price of its Benchmark Futures Contracts was (0.090)%, while the simple average daily change in the per share NAV of UNL over the same time period was (0.093)%. The average daily difference was (0.003)% (or (0.3) basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the average price of the Benchmark Futures Contracts, the average error in daily tracking by the per share NAV was (0.676)%, meaning that over this time period UNL's tracking error was within the plus or minus 10% range established as its benchmark tracking goal.

The table below shows the relationship between the trading prices of the shares and the daily NAV of UNL, since inception through March 31, 2016. The first row shows the average amount of the variation between UNL's closing market price and NAV, computed on a daily basis since inception, while the second and third rows depict the maximum daily amount of the end of day premiums and discounts to NAV since inception, on a percentage basis. USCF believes that maximum and minimum end of day premiums and discounts typically occur because trading in the shares continues on the NYSE Arca until 4:00 p.m. New York time while regular trading in the Benchmark Futures Contracts on the NYMEX ceases at 2:30 p.m. New York time and the value of the relevant Benchmark Futures Contracts, for purposes of determining its end of day NAV, can be determined at that time.

UNL

Average Difference	\$0.00

June	(6.11)%	6.11 %	(9.09)%	(1.21)%	4.40 %	
July	(5.28)%	6.62 %	(1.63)%	(10.38)%	(3.12)%	
August	(1.43)%	(9.39)%	2.07 %	3.76 %	(3.95)%	
September	(8.12)%	11.26 %	(2.14)%	(0.82)%	(5.45)%	
October	(1.72)%	1.55 %	(3.13)%	(5.88)%	(9.04)%	
November	(10.27)%	(5.22)%	6.67 %	0.71 %	(5.26)%	
December	(13.92)%	(4.17)%	5.05 %	(19.94)%	0.00 %	
Annual Rate of Return	(39.47)%	(18.76)%	6.33 %	(25.27)%	(29.00)%	(10.08)%**

* The monthly rate of return is calculated by dividing the ending NAV of a given month by the ending NAV of the previous month, subtracting 1 and multiplying this number by 100 to arrive at a percentage increase or decrease.

** Through March 31, 2016.

Draw-down: Losses experienced by the fund over a specified period. Draw-down is measured on the basis of monthly returns only and does not reflect intra-month figures.

Worst Monthly Percentage Draw-down: The largest single month loss sustained during the most recent five calendar years and year-to-date.

Worst Peak-to-Valley Draw-down: The largest percentage decline in the NAV per share over the history of the fund. This need not be a continuous decline, but can be a series of positive and negative returns where the negative returns are larger than the positive returns. Worst Peak-to-Valley Draw-down represents the greatest cumulative percentage decline in month-end per share NAV is not equaled or exceeded by a subsequent month-end per share NAV.

UNL'S OPERATIONS

USCF and its Management and Traders

USCF is a single member limited liability company that was formed in the state of Delaware on May 10, 2005. It maintains its main business office at 1999 Harrison Street, Suite 1530, Oakland, California 94612. USCF is a wholly-owned subsidiary of Wainwright Holdings, Inc., a Delaware corporation ("Wainwright"). The past performance for UNL is located starting on page 27. Mr. Nicholas Gerber (discussed below) controls Wainwright by virtue of his ownership or control of a majority of Wainwright's shares. Wainwright is a holding company that currently holds both USCF, as well as USCF Advisers LLC, an investment adviser registered under the Investment Advisers Act of 1940, as amended. USCF Advisers LLC serves as the investment adviser for the Stock Split Index Fund, a series of the USCF ETF Trust. USCF ETF Trust is registered under the 1940 Act. The Board of Trustees for the USCF ETF Trust consists of different independent trustees than those independent directors who serve on the Board of Directors of USCF. USCF is a member of the NFA and is registered with the CFTC as of December 1, 2005 and as a Swaps Firm on August 8, 2013. USCF also manages the Related Public Funds.

USCF is required to evaluate the credit risk of UNL to the futures commission merchant ("FCM"), oversee the purchase and sale of UNL's shares by certain authorized purchasers ("Authorized Participants"), review daily positions and margin requirements of UNL and manage UNL's investments. USCF also pays the fees of ALPS Distributors, Inc., which serves as the marketing agent for UNL (the "Marketing Agent"), and Brown Brothers Harriman & Co. ("BBH&Co."), which serves as the administrator (the "Administrator") and the custodian (the "Custodian") for UNL. In no event may the aggregate compensation paid for the Marketing Agent and any affiliate of USCF for distribution-related services in connection with the offering of shares exceed ten percent (10%) of the gross proceeds of this offering.

The limited partners take no part in the management or control, and have a minimal voice in UNL's operations or business. Limited partners have no right to elect USCF on an annual or any other continuing basis. If USCF voluntarily withdraws, however, the holders of a majority of UNL's outstanding shares (excluding for purposes of such determination shares owned, if any, by the withdrawing general partner and its affiliates) may elect its successor. USCF may not be removed as general partner except upon approval by the affirmative vote of the holders of at least 66 2/3% of UNL's outstanding shares (excluding shares if any, owned by USCF and its affiliates), subject to the satisfaction of certain conditions set forth in the LP Agreement.

The business and affairs of USCF are managed by a board of directors (the "Board"), which is comprised of four management directors (the "Management Directors"), some of whom are also its executive officers, and three independent directors who meet the independent director requirements established by the NYSE Arca Equities Rules and the Sarbanes-Oxley Act of 2002. The Management Directors have the authority to manage USCF pursuant to the terms of the Sixth Amended and Restated Limited Liability Company Agreement of USCF, dated as of May 15, 2015 (as amended from time to time, the "LLC Agreement"). Through its Management Directors, USCF manages the day-to-day operations of UNL. The Board has an audit committee which is made up of the three independent directors (Gordon L. Ellis, Malcolm R. Fobes III and Peter M. Robinson). The audit committee is governed by an audit committee charter that is posted on UNL's website at www.uscfinvestments.com. The Board has determined that each member of the Audit Committee meets the financial literacy requirements of the NYSE Arca and the audit committee charter. The Board has further determined that each of Messrs. Ellis and Fobes have accounting or related financial management expertise as required by the NYSE Arca, such that each of them is considered and "Audit Committee Finance Expert" as such term is defined in Item 407(d)(5) of Regulation S-K.

UNL has no executive officers. Pursuant to the terms of the LP Agreement, UNL's affairs are managed by USCF.

The following are individual Principals, as that term is defined in CFTC Rule 3.1, for USCF: John P. Love, Stuart P. Crumbaugh, Nicholas D. Gerber, Melinda Gerber, the Nicholas & Melinda Gerber Living Trust, dated November 9, 2005, the Gerber Family Trust FBO Jacob & Vasch, Eliot Gerber, Sheila Gerber, Jennifer Schoenberger and Scott Schoenberger, Andrew Ngim, Robert Nguyen, Peter Robinson, Gordon Ellis, Malcolm Fobes, Ray Allen, Kevin Baum, Carolyn Yu and Wainwright Holdings Inc. The individuals who are Principals due to their positions are John P. Love, Stuart P. Crumbaugh, Nicholas D. Gerber, Melinda Gerber, Andrew Ngim, Robert Nguyen, Peter Robinson, Gordon Ellis, Malcolm Fobes, Ray Allen, Kevin Baum, and Carolyn Yu. In addition, Nicholas D. Gerber, Melinda Gerber, the Nicholas & Melinda Gerber Living Trust, dated November 9, 2005, Gerber Family Trust FBO Jacob & Vasch, Eliot Gerber, Sheila Gerber, Jennifer Schoenberger and Scott Schoenberger are Principals due to their controlling stake in Wainwright. None of the Principals owns or has any other beneficial interest in UNL. Ray Allen and John P. Love make trading and investment decisions for UNL and execute trades on behalf of UNL. In addition, Nicholas D. Gerber, John P. Love, Robert Nguyen, Ray Allen, and Kevin Baum are registered with the CFTC as Associated Persons of USCF and are NFA Associate Members. John P. Love, Robert Nguyen, Ray Allen, and Kevin Baum are also registered with the CFTC as Swaps Associated Persons.

John P. Love, 44, President and Chief Executive Officer of USCF since June 2015. Mr. Love previously served as a Senior Portfolio Manager for the Related Public Funds from March 2010 through June 2015. Prior to that, while still at USCF, he was a Portfolio Manager beginning with the launch of USO in April 2006. Mr. Love was the portfolio manager of USO from April 2006 until March 2010 and the portfolio manager for USL from December 2007 until March 2010. Mr. Love has been the portfolio manager of UNG since April 2007, and the portfolio manager of UGA, UHN, and UNL since March 2010. Additionally, Mr. Love serves as President of USCF Advisers LLC, an investment adviser registered under the Investment Advisers Act of 1940, as amended and has acted as co-portfolio manager of the Stock Split Index Fund, a series of the USCF ETF Trust for the period from September 2014 to December 2015, when he was promoted to the position of President and Chief Executive Officer upon Mr. Gerber's resignation from those positions. Mr. Love has been a principal of USCF listed with the CFTC and NFA since January 17, 2006. Mr. Love has been registered as an associated person of USCF since February 2015 and from December 1, 2005 to April 16, 2009. Mr. Love has also been registered as a branch manager of USCF since March 2016. Additionally, Mr. Love has been approved as an NFA swaps associated person since February 2015. Mr. Love earned a B.A. from the University of Southern California, holds NFA Series 3 and FINRA Series 7 registrations and is a CFA Charterholder.

Nicholas D. Gerber, 53, Chairman of the Board of Directors of USCF since June 2005. Mr. Gerber also served as President and Chief Executive Officer of USCF from June 2005 through June 2015 and Vice President since June 2015. Mr. Gerber co-founded USCF in 2005 and prior to that, he co-founded Ameristock Corporation in March 1995, a California-based investment adviser registered under the Investment Advisers Act of 1940 from March 1995 until January 2013. From January 26, 2015 to the present, Mr. Gerber is also the Chief Executive Officer, President and Secretary of Concierge Technologies, Inc. ("Concierge"), a supplier of mobile video recording devices thru its wholly owned subsidiary Janus Cam. Concierge is not affiliated with USCF and the Related Public Funds, other than through ownership by common control. Concierge is a publicly traded company under the ticker symbol "CNGC." From August 1995 to January 2013, Mr. Gerber served as Portfolio Manager of Ameristock Mutual Fund, Inc. On January 11, 2013, the Ameristock Mutual Fund, Inc. merged with and into the Drexel Hamilton Centre American Equity Fund, a series of Drexel Hamilton Mutual Funds. Drexel Hamilton Mutual Funds is not affiliated with Ameristock Corporation, the Ameristock Mutual Fund, Inc. or USCF. From the period June 2014 to the present, Mr. Gerber also serves as Chairman of the Board of Trustees of USCF ETF Trust, an investment company registered under the Investment Company Act of 1940, as amended, and has previously served as President of USCF Advisers LLC, an investment

adviser registered under the Investment Advisers Act of 1940, as amended. In addition to his role as Chairman of the Board of USCF ETF Trust, he also served as its President and Chief Executive Officer from June 2014 until December 2015. In these roles, Mr. Gerber has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Mr. Gerber has been a principal of USCF listed with the CFTC and NFA since November 2005, an NFA associate member and associated person of USCF since December 2005 and a Branch Manager of USCF since May 2009. Mr. Gerber earned an MBA degree in finance from the University of San Francisco, a B.A. from Skidmore College and holds an NFA Series 3 registration.

Stuart P. Crumbaugh, 52, Chief Financial Officer, Secretary and Treasurer of USCF since May 2015. Mr. Crumbaugh has been a principal of USCF listed with the CFTC and NFA since July 1, 2015. Mr. Crumbaugh joined USCF as the Assistant Chief Financial Officer on April 6, 2015. Prior to joining USCF, Mr. Crumbaugh was the Vice President Finance and Chief Financial Officer of Sikka Software Corporation, a software service healthcare company providing optimization software and data solutions from April 2014 to April 6, 2015. Mr. Crumbaugh served as a consultant providing technical accounting, IPO readiness and M&A consulting services to various early stage companies with the Connor Group, a technical accounting consulting firm, for the periods of January 2014 through March 2014; October 2012 through November 2012; and January 2011 through February 2011. From December 2012 through December 2013, Mr. Crumbaugh was Vice President, Corporate Controller and Treasurer of Auction.com, LLC, a residential and commercial real estate online auction company. From March 2011 through September 2012, Mr. Crumbaugh was Chief Financial Officer IP Infusion Inc., a technology company providing network routing and switching software enabling software-defined networking solutions for major mobile carriers and network infrastructure providers. Mr. Crumbaugh was the Global Vice President of Finance at Virage Logic Corporation, a semi-conductor IP and software company (acquired by Synopsys, Inc., a software company) from January 2010 through December 2010. Mr. Crumbaugh earned a B.A. in Accounting and Business Administration from Michigan State University in 1987 and is a Certified Public Accountant – Michigan (inactive).

Andrew F. Ngim, 55, co-founded USCF in 2005 and has served as a Management Director since May 2005. Mr. Ngim has served as the portfolio manager for USCI, CPER and USAG since January 2013. Mr. Ngim also served as USCF's Treasurer from June 2005 to February 2012. Prior to and concurrent with his services to USCF, from January 1999 to January 2013, Mr. Ngim served as a Managing Director for Ameristock Corporation which he co-founded in March 1995 and was Co-Portfolio Manager of Ameristock Mutual Fund, Inc. from January 2000 to January 2013. From the period September 2014 to the present, Mr. Ngim also serves as portfolio manager of the Stock Split Index Fund, a series of the USCF ETF Trust, as well as a Management Trustee of the USCF ETF Trust from the period of August 2014 to the present. Mr. Ngim has been a principal of USCF listed with the CFTC and NFA since November 2005. Mr. Ngim earned his B.A. from the University of California at Berkeley.

Robert L. Nguyen, 56, Management Director and principal since July 2015. Mr. Nguyen has served on the Board of Wainwright Holdings Inc. since December 2014. Mr. Nguyen co-founded USCF in 2005 and served as a Management Director until March 2012. Mr. Nguyen was an Investment Manager with Ribera Investment Management, a high net worth money management firm, from January 2013 to March 2015. Prior to and concurrent with his services to USCF, from January 2000 to January 2013, Mr. Nguyen served as a Managing Principal for Ameristock Corporation, a California-based investment adviser registered under the Investment Advisers Act of 1940, which he co-founded in March 1995. Mr. Nguyen was a principal of USCF listed with the CFTC and NFA from November 2005 through March 2012 and an associated person of USCF listed with the CFTC and NFA from November 2007 through March 2012. Mr. Nguyen has been a principal of USCF listed with the CFTC and NFA since July 2015 and a swap associated person of USCF listed with the CFTC and NFA since December 2015. Mr. Nguyen earned his B.S. from California State University at Sacramento.

Melinda D. Gerber, 48, Management Director of USCF since June 2015. Ms. Gerber co-founded USCF in 2005. She is a writer and published her book, *How to Create and manage a Mutual Fund or Exchange-Traded Fund: A Professional's Guide* (Wiley, 2008). Ms. Gerber has been a principal of USCF listed with the CFTC and NFA since November 2005. Ms. Gerber co-founded USCF in 2005 and prior to that, she co-founded Ameristock Corporation in March 1995, a California-based investment adviser registered under the Investment Advisers Act of 1940 from March 1995 until January 2013. From March 1995 to January 2013, Ms. Gerber served as Secretary on the Board of Directors for the Ameristock Corporation and Ameristock Mutual Fund. Concurrent to her service as Secretary during the period of September 1994 to June 1999, Ms. Gerber was a project manager and consultant at GAP, Inc. a global apparel retail company. She was recognized by GAP, Inc. as one of the five most innovative individuals in the company. Ms. Gerber earned an MBA from the University of Southern California in 1994 and graduated from the University of California at Santa Barbara in 1990.

Ray W. Allen, 59, Portfolio Manager of USCF since January 2008. Mr. Allen was the portfolio manager of UGA from February 2008 until March 2010, the portfolio manager of UHN from April 2008 until March 2010 and the portfolio manager of UNL since November 2009. Mr. Allen has been the portfolio manager of DNO since September 2009, and the portfolio manager of USO and USL since March 2010 and the manager of BNO since June 2010. Mr. Allen has been a principal of USCF listed with the CFTC and NFA since March 2009 and has been registered as an associated person of USCF since July 2015 and from March 2008 to November 2012. Additionally, Mr. Allen has been approved as an NFA swaps associated person since July 2015. Mr. Allen earned a B.A. in economics from the University of California at Berkeley and holds an NFA Series 3 registration.

Kevin A. Baum, 45, Portfolio Manager of USCF since March 2016. Prior to joining USCF, Mr. Baum temporarily retired from December 2015 to March 2016. Mr. Baum served as the Vice President and Senior Portfolio Manager for Invesco PowerShares Capital Management LLC, an investment manager that manages a family of exchange-traded funds, from October 2014 through December 2015. Mr. Baum was temporarily retired from May 2012 through September 2014. From May 1993 to April 2012, Mr. Baum worked as the Senior Portfolio Manager, Head of Commodities for Oppenheimer Real Asset Management Inc., a global asset manager. Mr. Baum has been a principal and associated person of USCF since March 2016 and became listed as such with the CFTC via the NFA in April

2016. Mr. Baum is a CFA Charterholder, CAIA Charterholder, and earned a B.B.A. in Finance from Texas Tech University.

Carolyn M. Yu, 57, General Counsel and Chief Compliance Officer of USCF since May 2015 and February 2013, respectively, and from August 2011 through April 2015, Ms. Yu served as Assistant General Counsel. Since May 2015, Ms. Yu has served as Chief Legal Officer and Chief Compliance Officer of USCF Advisers LLC and USCF ETF Trust as well as Chief AML Officer of USCF ETF Trust. Prior to May 2015, Ms. Yu was the Assistant Chief Compliance Officer and AML Officer of the USCF ETF Trust. Previously, Ms. Yu served as Branch Chief with the Securities Enforcement Branch for the State of Hawaii, Department of Commerce and Consumer Affairs from February 2008 to August 2011. She has been a principal of USCF listed with the CFTC and NFA since August 2013. Ms. Yu earned her JD from Golden Gate University School of Law and a B.S. in business administration from San Francisco State University.

Gordon L. Ellis, 69, Independent Director of USCF since September 2005. Previously, Mr. Ellis was a founder of International Absorbents, Inc., its Class 1 Director and Chairman since July 1985 and July 1988, respectively, and Chief Executive Officer and President since November 1996. He also served as a director of Absorption Corp., a wholly-owned subsidiary of International Absorbents, Inc., which is a leading developer and producer of environmentally friendly pet care and industrial products from May 2010 until March 2013 when International Absorbents, Inc. and Absorption Corp. were sold to Kinderhook Industries, a private investment banking firm. Concurrent with that, he founded and has served as Chairman from November 2000 to May 2010 of Lupaka Gold Corp., f/k/a Kcrok Enterprises Ltd., a firm that acquires, explores, develops, and evaluates gold mining properties in Peru, South America. Mr. Ellis has his Chartered Directors designation from The Director's College (a joint venture of McMaster University and The Conference Board of Canada). He has been a principal of USCF listed with the CFTC and NFA since November 2005. Mr. Ellis is an engineer and earned an MBA in international finance.

Malcolm R. Fobes III, 51, Independent Director of USCF and Chairman of USCF's audit committee since September 2005. He founded and is the Chairman and Chief Executive Officer of Berkshire Capital Holdings, Inc., a California-based investment adviser registered under the Investment Advisers Act of 1940 that has been sponsoring and providing portfolio management services to mutual funds since June 1997. Mr. Fobes serves as Chairman and President of The Berkshire Funds, a mutual fund investment company registered under the Investment Company Act of 1940. Since 1997, Mr. Fobes has also served as portfolio manager of the Berkshire Focus Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in the electronic technology industry. He was also contributing editor of *Start a Successful Mutual Fund: The Step-by-Step Reference Guide to Make It Happen* (JV Books, 1995). Mr. Fobes has been a principal of USCF listed with the CFTC and NFA since November 2005. He earned a B.S. in finance with a minor in economics from San Jose State University in California.

Peter M. Robinson, 58, Independent Director of USCF since September 2005. Mr. Robinson has been a Research Fellow since 1993 with the Hoover Institution, a public policy think tank located on the campus of Stanford University. He authored three books and has been published in the *New York Times*, *Red Herring*, and *Forbes ASAP* and is the editor of *Can Congress Be Fixed?: Five Essays on Congressional Reform* (Hoover Institution Press, 1995). Mr. Robinson has been a principal of USCF listed with the CFTC and NFA since December 2005. He earned an MBA from the Stanford University Graduate School of Business, graduated from Oxford University in 1982 after studying politics, philosophy, and economics and graduated summa cum laude from Dartmouth College in 1979.

UNL's Service Providers

Custodian, Registrar, Transfer Agent, and Administrator

In its capacity as the Custodian for UNL, BBH&Co holds UNL's Treasuries, cash and/or cash equivalents pursuant to a custodial agreement. In addition, in its capacity as Administrator for UNL, BBH&Co. performs certain administrative and accounting services for UNL and prepares certain SEC, NFA and CFTC reports on behalf of UNL.

Currently, USCF pays BBH & Co. for its services, in the foregoing capacities, a minimum amount of \$75,000 annually for its custody, fund accounting and fund administration services rendered to UNL and each of the Related Public Funds, as well as a \$20,000 annual fee for its transfer agency services. In addition, USCF pays BBH&Co. an asset-based charge of (a) 0.06% for the first \$500 million of UNL and the Related Public Funds' combined net assets, (b) 0.0465% for UNL and the Related Public Funds' combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% once UNL and the Related Public Funds' combined net assets exceed \$1 billion. The annual minimum amount will not apply if the asset-based charge for all accounts in the aggregate exceeds \$75,000. USCF also pays transaction fees ranging from \$7 to \$15 per transaction.

BBH&Co.'s principal business address is 50 Post Office Square, Boston, MA 02110. BBH&Co. is a private bank founded in 1818 and is not a publicly held company nor is it insured by the Federal Deposit Insurance Corporation. BBH&Co. is authorized to conduct a commercial banking business in accordance with the provisions of Article IV of the New York State Banking Law, New York Banking Law §§160 § 181, and is subject to regulation, supervision, and examination by the New York State Department of Financial Services. BBH&Co. is also licensed to conduct a commercial banking business by the Commonwealths of Massachusetts and Pennsylvania and is subject to supervision and examination by the banking supervisors of those states.

Marketing Agent

UNL also employs ALPS Distributors, Inc. ("ALPS Distributors") as the Marketing Agent, which is further discussed under "What is the Plan of Distribution?" USCF pays the Marketing Agent an annual fee. In no event may the aggregate compensation paid to the Marketing Agent and any affiliate of USCF for distribution-related services in connection with the offering of shares exceed ten percent (10%) of the gross proceeds of the offering.

ALPS Distributors' principal business address is 1290 Broadway, Suite 1100, Denver, CO 80203. ALPS Distributors is a broker-dealer registered with the Financial Industry Regulatory Authority ("FINRA") and a member of the Securities Investor Protection Corporation.

Futures Commission Merchant

On October 8, 2013, USCF entered into a Futures and Cleared Derivatives Transactions Customer Account Agreement with RBC Capital Markets, LLC ("RBC Capital") to serve as UNL's FCM. This agreement requires RBC Capital to provide services to UNL, as of October 10, 2013, in connection with the purchase and sale of Futures Contracts and Other Natural Gas-Related Investments that may be purchased or sold by or through RBC Capital for UNL's account. UNL pays RBC Capital commissions for executing and clearing trades on behalf of UNL.

RBC Capital's primary address is 500 West Madison Street, Suite 2500, Chicago, Illinois 60661. RBC Capital is registered in the United States with FINRA as a broker-dealer and with the CFTC as a FCM. RBC Capital is a member of various U.S. futures and securities exchanges.

RBC Capital is a large broker-dealer subject to many different complex legal and regulatory requirements. As a result, certain of RBC Capital's regulators may from time to time conduct investigations, initiate enforcement proceedings and/or enter into settlements with RBC Capital with respect to issues raised in various investigations. RBC Capital complies fully with its regulators in all investigations being conducted and in all settlements it reaches. In addition, RBC Capital is and has been subject to a variety of civil legal claims in various jurisdictions, a variety of settlement agreements and a variety of orders, awards and judgments made against it by courts and tribunals, both in regard to such claims and investigations. RBC Capital complies fully with all settlements it reaches and all orders, awards and judgments made against it.

RBC Capital has been named as a defendant in various legal actions, including arbitrations, class actions and other litigation including those described below, arising in connection with its activities as a broker-dealer. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. RBC Capital is also involved, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding RBC Capital's business, including among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

RBC Capital contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or

indeterminate damages or where investigations and proceedings are in the early stages, RBC Capital cannot predict the loss or range of loss, if any, related to such matters; how or if such matters will be resolved; when they will ultimately be resolved; or what the eventual settlement, fine, penalty or other relief, if any, might be. Subject to the foregoing, RBC Capital believes, based on current knowledge and after consultation with counsel, that the outcome of such pending matters will not have a material adverse effect on the consolidated financial condition of RBC Capital.

On June 18, 2015, in connection with the SEC's Municipalities Continuing Disclosure Cooperation (MCDC) initiative, the SEC commenced and settled an administrative proceeding against RBC Capital for willful violations of Sections 17(a)(2) of the 1933 Act after the firm self-reported instances in which it conducted inadequate due diligence in certain municipal securities offerings and as a result, failed to form a reasonable basis for believing the truthfulness of certain material representations in official statements issued in connection with those offerings. RBC Capital paid a fine of \$500,000.

On July 31, 2015, RBC Capital was added as a new defendant in a pending putative class action initially filed in November 2013 in the United States District Court for the Southern District of New York. The action is brought against multiple foreign exchange dealers and alleges collusive behavior, among other allegations, in foreign exchange trading. The action is in its initial stages as it relates to the new defendants, including RBC Capital.

On September 11, 2015, a class action lawsuit was filed in the Ontario Superior Court of Justice and a motion for authorization of a class action was filed in the Quebec Superior Court, both on behalf of an alleged class of Canadian investors, against Royal Bank of Canada, RBC Capital and a number of other foreign exchange dealers. The Canadian class actions allege that the defendants conspired to manipulate the prices of currency trades and are in their initial stages. Based on the facts currently known, it is not possible to predict the ultimate outcome of the Foreign Exchange Matters or the timing of their ultimate resolution.

On October 14, 2014, the Delaware Court of Chancery (the Court of Chancery) in a class action brought by former shareholders of Rural/Metro Corporation, held RBC Capital liable for aiding and abetting a breach of fiduciary duty by three Rural/Metro directors, but did not make an additional award for attorney's fees. A final judgment was entered on February 19, 2015 in the amount of US\$93 million plus post judgment interest. RBC Capital appealed the Court of Chancery's determination of liability and quantum of damages, and the plaintiffs cross-appealed the ruling on additional attorneys' fees. On November 30, 2015, the Delaware Supreme Court affirmed the Court of Chancery with respect to both the appeal and cross-appeal. RBC Capital is cooperating with an investigation by the U.S. Securities and Exchange Commission relating to this matter.

On March 11, 2013, the New Jersey Bureau of Securities entered a consent order settling an administrative complaint against RBC Capital, which alleged that RBC Capital failed to follow its own procedures with respect to monthly account reviews and failed to maintain copies of the monthly account reviews with respect to certain accounts that James Hankins Jr. maintained at the firm in violation of N.J.S.A. 49:3-58(a)(2)(xi) and 49:3-59(b). Without admitting or denying the findings of fact and conclusions of law, RBC Capital consented to a civil monetary penalty of \$150,000 (of which \$100,000 was suspended as a result of the firm's cooperation) and to pay disgorgement of \$300,000.

On June 12, 2012, the State of Illinois Secretary of State Securities Department consented to entry of a judgment enjoining the firm for violation of the Illinois Securities Law of 1953. RBC Capital undertook to repurchase auction rate securities from certain customers before June 30, 2009. RBC Capital also undertook to use best efforts to provide, by December 31, 2009, liquidity opportunities for customers ineligible for the buyback. RBC Capital undertook to provide periodic reports to regulator. RBC Capital paid a penalty of \$1,400,139.82.

On May 10, 2012, FINRA commenced and settled an administrative proceeding against RBC Capital for violations of FINRA Rules 1122 and 2010 and NASD Rules 2110 and 3010 for failing to establish, maintain and enforce written supervisory procedures reasonably designed to achieve compliance with applicable rules concerning short-term transactions in closed end funds. RBC Capital paid a fine of \$200,000.

On May 2, 2012, the Massachusetts Securities Division entered a consent order settling an administrative complaint against RBC Capital, which alleged that RBC Capital recommended unsuitable products to its brokerage and advisory clients and failed to supervise its registered representatives' sales of inverse and leveraged ETFs in violation of Section 204(a)(2) of the Massachusetts Uniform Securities Act ("MUSA"). Without admitting or denying the allegations

of fact, RBC Capital consented to permanently cease and desist from violations of MUSA, pay restitution of \$2.9 million to the investors who purchased the inverse and leveraged ETFs and pay a civil monetary penalty of \$250,000.

On September 27, 2011, the SEC commenced and settled an administrative proceeding against RBC Capital for willful violations of Sections 17(a)(2) and 17(a)(3) of the 1933 Act for negligently selling the collateralized debt obligations to five Wisconsin school districts despite concerns about the suitability of the product. The firm agreed to pay disgorgement of \$6.6 million, prejudgment interest of \$1.8 million, and a civil monetary penalty of \$22 million.

RBC Capital, RBC Europe, Ltd. and RBC USA Holdco Corporation are defendants in a lawsuit relating to their role in transactions involving investments made by a number of Wisconsin school districts in certain collateralized debt obligations. These transactions were also the subject of a regulatory investigation. In September 2011, we reached a settlement with the Securities and Exchange Commission which was paid to the school districts through a Fair Fund. Based on the facts currently known, it is not possible at this time to predict the ultimate outcome of this proceeding or the timing of its resolution; however, management believes the ultimate resolution of this proceeding will not have a material adverse effect on our consolidated financial position or results of operations.

For more details, please see RBC Capital's Form BD, as filed with the SEC.

RBC Capital will only act as a clearing broker for UNL and as such will be paid commissions for executing and clearing trades on behalf of UNL. RBC Capital will not act in any supervisory capacity with respect to USCF or participate in the management of USCF or UNL.

RBC Capital is not affiliated with UNL or USCF. Therefore, neither USCF nor UNL believe that there are any conflicts of interest with RBC Capital or their trading principals arising from their acting as UNL's FCM.

UNL's Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of UNL. You should note that you may pay brokerage commissions on purchases and sales of UNL's shares, which are not reflected in the table. Authorized Participants will pay applicable creation and redemption fees. See "Creation and Redemption of Shares-Creation and Redemption Transaction Fee," page 62.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees ⁽¹⁾	0.75 %
Other Expenses ⁽¹⁾	0.71 %
Expense Waiver	(0.56)%
Net Expenses Excluding Management Fees	0.15 %
Total Annual Fund Operating Expenses After Fee Waiver	0.90 %

Based on amounts for the year ended December 31, 2015, which is incorporated by reference into this prospectus. See "Incorporation By Reference of Certain Information," page 66. The individual expense amounts in dollar terms (1) are shown in the table below. As used in this table, (i) Professional Expenses include expenses for legal, audit, tax, accounting and printing; and (ii) Independent Director and Officer Expenses include amounts paid to independent directors and for officers' liability insurance.

Management fees	\$118,848
Professional Expenses	\$101,338
Brokerage commissions	\$6,117
Independent Director and Officer Expenses	\$3,140
License fees	\$2,377

(2) USCF has voluntarily agreed to pay certain expenses typically borne by UNL, to the extent that such expenses exceed 0.15% of UNL's NAV, on an annualized basis. USCF has no obligation to continue such payment. If this agreement were terminated, the Annual Fund Operating Expenses could increase, which would negatively impact your total return from an investment in UNL.

Breakeven Analysis

The breakeven analysis below indicates the approximate dollar returns and percentage required for the redemption value of a hypothetical initial investment in a single share to equal the amount invested twelve months after the investment was made. For purposes of this breakeven analysis, we have assumed an initial selling price of \$8.74 per

Edgar Filing: United States 12 Month Natural Gas Fund, LP - Form S-1/A

share which equals the NAV per share on March 31, 2016. In order for a hypothetical investment in shares to break even over the next 12 months, assuming a selling price of \$8.74, the investment would have to generate a 0.858% return or \$0.075, rounded to \$0.08.

This breakeven analysis refers to the redemption of baskets by Authorized Participants and is not related to any gains an individual investor would have to achieve in order to break even. The breakeven analysis is an approximation only.

Assumed initial selling price per share	\$8.74
Management Fee (0.750%) ⁽¹⁾	\$0.066
Creation Basket Fee (0.00%) ⁽²⁾	\$(0.000)
Estimated Brokerage Fee (0.039%) ⁽³⁾	\$0.003
Interest Income (0.041%) ⁽⁴⁾	\$(0.004)
New York Mercantile Exchange Licensing Fee (0.015%) ⁽⁵⁾	\$0.001
Independent Director and Officer Expenses (0.020%) ⁽⁶⁾	\$0.002
Professional Expenses (0.640%) ⁽⁷⁾	\$0.056
Amount of trading income (loss) required for the redemption value at the end of one year to equal the initial selling price of the share	\$0.124
Percentage of initial selling price per share	1.419 %
Reimbursement Credit (0.562)%	\$(0.049)
Amount of trading income (loss) required for the redemption value at the end of one year to equal the initial selling price of the unit (inclusive of credit)	\$0.075
Percentage of initial selling price per unit (inclusive of credit)	0.858 %

UNL is contractually obligated to pay USCF a management fee based on average daily net assets and paid monthly of 0.750% per annum on its average daily net assets. Average daily net assets are calculated daily by taking the (1) average of the total net assets of UNL over the calendar year, i.e., the sum of daily total net assets divided by the number of calendar days in the year. On days when markets are closed, the total net assets are the total net assets from the last day when the market was open. See page 55 for a discussion of net assets of UNL.

(2) Authorized Participants are required to pay a Creation Basket fee of \$350 for each order they place to create one or more baskets. This breakeven analysis assumes a hypothetical investment in a single share, which would equal the \$350 Creation Basket fee divided by the total number of outstanding shares plus the 50,000 shares created by the Creation Basket, so the Creation Basket fee is \$0.000.

(3) This amount is based on the actual brokerage fees for UNL calculated on an annualized basis and includes a per trade commission of \$3.50.

(4) UNL earns interest on funds it deposits with the futures commission merchant and the Custodian and it estimates that the interest rate will be 0.041 % based on the current interest rate on three-month Treasuries as of December 31, 2015. The actual rate may vary.

(5) The NYMEX Licensing Fee is 0.015% of the aggregate net assets of UNL and the Related Public Funds (except for BNO, USCI, CPER and USAG). For more information see “UNL’s Fees and Expenses.”

(6) The foregoing assumes that the assets of UNL are aggregated with those of the Related Public Funds, that the aggregate fees paid to the independent directors as of December 31, 2015 was \$569,303, that the allocable portion of the fees borne by UNL equals \$3,140.44 and assumes average total net assets of \$15,846,366.79 during the calendar year ended December 31, 2015.

(7) UNL estimates that the aggregate cost attributable to Professional Expenses for 2015, which include legal, audit, tax, accounting and printing expenses, is \$101,337.72. The number in the break-even table assumes UNL has \$15,846,366.79 in average total net assets during the calendar year ended December 31, 2015.

Conflicts of Interest

There are present and potential future conflicts of interest in UNL’s structure and operation you should consider before you purchase shares. USCF will use this notice of conflicts as a defense against any claim or other proceeding made. If USCF is not able to resolve these conflicts of interest adequately, it may impact UNL and the Related Public Funds’ ability to achieve their investment objectives.

UNL and USCF may have inherent conflicts to the extent USCF attempts to maintain UNL’s asset size in order to preserve its fee income and this may not always be consistent with UNL’s objective of having the value of its share’s NAV track changes in the average price of the Benchmark Future Contracts.

USCF’s officers, directors and employees, do not devote their time exclusively to UNL. These persons are directors, officers or employees of other entities which may compete with UNL for their services, including the Related Public Funds. They could have a conflict between their responsibilities to UNL and to those other entities.

USCF has adopted policies that prohibit their principals, officers, directors and employees from trading futures and related contracts in which either UNL or any of the Related Public Funds invests. These policies are intended to prevent conflicts of interest occurring where USCF, or their principals, officers, directors or employees could give preferential treatment to their own accounts or trade their own accounts ahead of or against UNL or any of the Related Public Funds.

USCF has sole current authority to manage the investments and operations of UNL, and this may allow it to act in a way that furthers its own interests which may create a conflict with your best interests. Limited partners have limited voting control, which will limit their ability to influence matters such as amendment of the LP Agreement, change in UNL’s basic investment policy, dissolution of UNL, or the sale or distribution of UNL’s assets.

USCF serves as the general partner to UNL and general partner or sponsor to the Related Public Funds, USCF may have a conflict to the extent that its trading decisions for UNL may be influenced by the effect they would have on the other funds it manages. By way of example, if, as a result of reaching position limits imposed by the NYMEX, UNL

purchased gasoline futures contracts, this decision could impact UGA's ability to purchase additional gasoline futures contracts, if the number of contracts held by funds managed by USCF reached the maximum allowed by the NYMEX. Similar situations could adversely affect the ability of any fund to track its benchmark futures contract.

In addition, USCF is required to indemnify the officers and directors of the other funds, if the need for indemnification arises. This potential indemnification will cause USCF's assets to decrease. If USCF's other sources of income are not sufficient to compensate for the indemnification, then USCF may terminate and you could lose your investment.

Whenever a conflict of interest exists or arises between USCF on the one hand, and the partnership or any limited partner, on the other hand, any resolution or course of action by USCF in respect of such conflict of interest shall be permitted and deemed approved by all partners and shall not constitute a breach of the LP Agreement or of any agreement contemplated hereby or of a duty stated or implied by law or equity, if the resolution or course of action is, or by operation of the LP Agreement is deemed to be, fair and reasonable to the partnership. If a dispute arises, under the LP Agreement it will be resolved either through negotiations with USCF or by courts located in the State of Delaware.

Under the LP Agreement, any resolution is deemed to be fair and reasonable to the partnership if the resolution is:

- approved by the audit committee, although no party is obligated to seek approval and USCF may adopt a resolution or course of action that has not received approval;
- on terms no less favorable to the limited partners than those generally being provided to or available from unrelated third parties; or
- fair to the limited partners, taking into account the totality of the relationships of the parties involved including other transactions that may be particularly favorable or advantageous to the limited partners.

The previous risk factors and conflicts of interest are complete as of the date of this prospectus; however, additional risks and conflicts may occur which are not presently foreseen by USCF. You may not construe this prospectus as legal or tax advice. Before making an investment in this fund, you should read this entire prospectus, including the LP Agreement which can be found on UNL's website at www.uscfinvestments.com. You should also consult with your personal legal, tax, and other professional advisors.

Interests of Named Experts and Counsel

USCF has employed Sutherland Asbill & Brennan LLP to prepare this prospectus. Neither the law firm nor any other expert hired by UNL to give advice on the preparation of this offering document has been hired on a contingent fee basis. Nor does any of them have any present or future expectation of interest in USCF, Marketing Agent, Authorized Participants, Custodian, Administrator or other service providers to UNL.

Ownership or Beneficial Interest in UNL

As of the date of this prospectus, no person owned more than five percent (5%) of the shares of UNL. Also, as of the date of this prospectus, USCF and the principals of USCF do not own any of the shares of UNL.

USCF's Responsibilities and Remedies

Pursuant to the DRULPA, parties may contractually modify or even eliminate fiduciary duties in a limited partnership agreement to the limited partnership itself, or to another partner or person otherwise bound by the limited partnership agreement. Parties may not, however, eliminate the implied covenant of good faith and fair dealing. Where parties unambiguously provide for fiduciary duties in a limited partnership agreement, those expressed duties become the standard that courts will use to determine whether such duties were breached. For this reason, UNL's limited partnership agreement does not explicitly provide for any fiduciary duties so that common law fiduciary duty principles will apply to measure USCF's conduct.

A prospective investor should be aware that USCF has a responsibility to limited partners of UNL to exercise good faith and fairness in all dealings. The fiduciary responsibility of a general partner to limited partners is a developing and changing area of the law and limited partners who have questions concerning the duties of USCF should consult with their counsel. In the event that a limited partner of UNL believes that USCF has violated its fiduciary duty to the limited partners, he may seek legal relief individually or on behalf of UNL under applicable laws, including under DRULPA and under commodities laws, to recover damages from or require an accounting by USCF. Limited partners may also have the right, subject to applicable procedural and jurisdictional requirements, to bring class actions in federal court to enforce their rights under the federal securities laws and the rules and regulations promulgated thereunder by the SEC. Limited partners who have suffered losses in connection with the purchase or sale of the shares may be able to recover such losses from USCF where the losses result from a violation by USCF of the federal securities laws. State securities laws may also provide certain remedies to limited partners.

Limited partners should be aware that performance by USCF of its fiduciary duty to is measured by the terms of the LP Agreement as well as applicable law. Limited partners are afforded certain rights to institute reparations proceedings under the CEA for violations of the CEA or of any rule, regulation or order of the CFTC by USCF.

Liability and Indemnification

Under the LP Agreement, neither a general partner nor any employee or other agent of UNL nor any officer, director, stockholder, partner, employee or agent of a general partner (a “Protected Person”) shall be liable to any partner or UNL for any mistake of judgment or for any action or inaction taken, nor for any losses due to any mistake of judgment or to any action or inaction or to the negligence, dishonesty or bad faith of any officer, director, stockholder, partner, employee, agent of UNL or any officer, director, stockholder, partner, employee or agent of such general partner, provided that such officer, director, stockholder, partner, employee, or agent of the partner or officer, director, stockholder, partner, employee or agent of such general partner was selected, engaged or retained by such general partner with reasonable care, except with respect to any matter as to which such general partner shall have been finally adjudicated in any action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Protected Person’s action was in the best interests of UNL and except that no Protected Person shall be relieved of any liability to which such Protected Person would otherwise be subject by reason of willful misfeasance, gross negligence or reckless disregard of the duties involved in the conduct of the Protected Person’s office.

UNL shall, to the fullest extent permitted by law, but only out of UNL assets, indemnify and hold harmless a general partner and each officer, director, stockholder, partner, employee or agent thereof (including persons who serve at UNL’s request as directors, officers or trustees of another organization in which UNL has an interest as a shareholder, creditor or otherwise) and their respective Legal Representatives and successors (hereinafter referred to as a “Covered Person”) against all liabilities and expenses, including but not limited to amounts paid in satisfaction of judgments, in compromise or as fines and penalties, and counsel fees reasonably incurred by any Covered Person in connection with the defense or disposition of any action, suit or other proceedings, whether civil or criminal, before any court or administrative or legislative body, in which such Covered Person may be or may have been involved as a party or otherwise or with which such person may be or may have been threatened, while in office or thereafter, by reason of an alleged act or omission as a general partner or director or officer thereof, or by reason of its being or having been such a general partner, director or officer, except with respect to any matter as to which such Covered Person shall have been finally adjudicated in any such action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Covered Person’s action was in the best interest of UNL, and except that no Covered Person shall be indemnified against any liability to UNL or limited partners to which such Covered Person would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such Covered Person’s office. Expenses, including counsel fees so incurred by any such Covered Person, may be paid from time to time by UNL in advance of the final disposition of any such action, suit or proceeding on the condition that the amounts so paid shall be repaid to UNL if it is ultimately determined that the indemnification of such expenses is not authorized hereunder.

Meetings

Meetings of limited partners may be called by USCF and may be called by it upon the written request of limited partners holding at least 20% of the outstanding shares of UNL. USCF shall deposit written notice to all limited partners of the meeting and the purpose of the meeting, which shall be held on a date not less than 30 nor more than 60 days after the date of mailing of such notice, at a reasonable time and place. USCF may also call a meeting upon not less than 20 and not more than 60 days prior notice.

Each limited partner appoints USCF and each of its authorized officers as its attorney-in-fact with full power and authority in its name, place and stead to execute, swear to, acknowledge, deliver, file and record all ballots, consents, approval waivers, certificates and other instruments necessary or appropriate, in the sole discretion of USCF, to make, evidence, give, confirm or ratify any vote, consent, approval, agreement or other action that is made or given by the partner of UNL. However, when the LP Agreement establishes a percentage of the limited partners required to take any action, USCF may exercise such power of attorney made only after the necessary vote, consent or approval of the limited partners.

Termination Events

UNL will dissolve at any time upon the happening of any of the following events:

- The bankruptcy, dissolution, withdrawal, or removal of USCF, unless a majority in interest of the limited partners within 90 days after such event elects to continue UNL and appoints a successor general partner; or

- The affirmative vote of a majority in interest of the limited partners, provided that prior to or concurrently with such vote, there shall have been established procedures for the assumption of UNL's obligations arising under any agreement to which UNL is a party and which is still in force immediately prior to such vote regarding termination, and there shall have been an irrevocable appointment of an agent who shall be empowered to give and receive notices, reports and payments under such agreements, and hold and exercise such other powers as are necessary to permit all other parties to such agreements to deal with such agent as if the agent were the sole owner of UNL's interest, which procedures are agreed to in writing by each of the other parties to such agreements.

Provisions of Law

According to applicable law, indemnification of USCF is payable only if USCF determined, in good faith, that the act, omission or conduct that gave rise to the claim for indemnification was in the best interest of UNL and the act, omission or activity that was the basis for such loss, liability, damage, cost or expense was not the result of negligence or misconduct and such liability or loss was not the result of negligence or misconduct by USCF, and such indemnification or agreement to hold harmless is recoverable only out of the assets of UNL and not from the members, individually.

Provisions of Federal and State Securities Laws

This offering is made pursuant to federal and state securities laws. The SEC and state securities agencies take the position that indemnification of USCF that arises out of an alleged violation of such laws is prohibited unless certain conditions are met.

Those conditions require that no indemnification of USCF or any underwriter for UNL may be made in respect of any losses, liabilities or expenses arising from or out of an alleged violation of federal or state securities laws unless:

(i) there has been a successful adjudication on the merits of each count involving alleged securities law violations as to the party seeking indemnification and the court approves the indemnification; (ii) such claim has been dismissed with prejudice on the merits by a court of competent jurisdiction as to the party seeking indemnification; or (iii) a court of

competent jurisdiction approves a settlement of the claims against the party seeking indemnification and finds that indemnification of the settlement and related costs should be made, provided that, before seeking such approval, USCF or other indemnitee must apprise the court of the position held by regulatory agencies against such indemnification. These agencies are the SEC and the securities administrator of the State or States in which the plaintiffs claim they were offered or sold membership interests.

Provisions of the 1933 Act and NASAA Guidelines

Insofar as indemnification for liabilities arising under the 1933 Act may be permitted to USCF or its directors, officers, or persons controlling UNL, UNL has been informed that SEC and the various State administrators believe that such indemnification is against public policy as expressed in the 1933 Act and the North American Securities Administrators Association, Inc. (“NASAA”) commodity pool guidelines and is therefore unenforceable.

Books and Records

UNL keeps its books of record and account at its office located at 1999 Harrison Street, Suite 1530 Oakland, California 94612 or at the offices of the Administrator at its office located at 50 Post Office Square, Boston, Massachusetts, 02110, or such office, including of an administrative agent, as it may subsequently designate upon notice. These books and records are open to inspection by any person who establishes to UNL’s satisfaction that such person is a limited partner upon reasonable advance notice at all reasonable times during the usual business hours of UNL.

UNL keeps a copy of UNL’s LP Agreement on file in its office which is available for inspection on reasonable advance notice at all reasonable times during its usual business hours by any limited partner.

Statements, Filings, and Reports

At the end of each fiscal year, UNL will furnish to DTC Participants for distribution to each person who is a shareholder at the end of the fiscal year an annual report containing UNL’s audited financial statements and other information about UNL. USCF is responsible for the registration and qualification of the shares under the federal securities laws and federal commodities laws and any other securities and blue sky laws of the United States or any other jurisdiction as USCF may select. USCF is responsible for preparing all reports required by the SEC, NYSE Arca and the CFTC, but has entered into an agreement with the Administrator to prepare these reports as required by the SEC, CFTC and the NYSE Arca on UNL’s behalf.

The financial statements of UNL will be audited, as required by law and as may be directed by USCF, by an independent registered public accounting firm designated from time to time by USCF. The accountants report will be furnished by UNL to shareholders upon request. UNL will make such elections, file such tax returns, and prepare, disseminate and file such tax reports, as it is advised by its counsel or accountants are from time to time required by any applicable statute, rule or regulation.

Reports to Limited Partners

In addition to periodic reports filed with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, all of which can be accessed on the SEC’s website at www.sec.gov or on UNL’s website at www.uscfinvestments.com, UNL, pursuant to the LP Agreement, will provide the following reports to limited partners in the manner prescribed below:

Annual Reports. Within 90 days after the end of each fiscal year, USCF shall cause to be delivered to each limited partner who was a limited partner at any time during the fiscal year, an annual report containing the following:

- financial statements of the partnership, including, without limitation, a balance sheet as of the end of the partnership's fiscal year and statements of income, partners' equity and changes in financial position, for such fiscal (i) year, which shall be prepared in accordance with accounting principles generally accepted in the United States of America consistently applied and shall be audited by a firm of independent certified public accountants registered with the Public Company Accounting Oversight Board,
- (ii) a general description of the activities of the partnership during the period covered by the report, and a report of any material transactions between the partnership and USCF or any of its affiliates, including fees or
- (iii) compensation paid by the partnership and the services performed by USCF or any such affiliate for such fees or compensation.

Quarterly Reports. Within 45 days after the end of each quarter of each fiscal year, USCF shall cause to be delivered to each limited partner who was a limited partner at any time during the quarter then ended, a quarterly report containing a balance sheet and statement of income for the period covered by the report, each of which may be unaudited but shall be certified by USCF as fairly presenting the financial position and results of operations of the partnership during the period covered by the report. The report shall also contain a description of any material event regarding the business of the partnership during the period covered by the report.

Monthly Reports. Within 30 days after the end of each month, USCF shall cause to be posted on UNL's website and upon request, to be delivered to each limited partner who was a limited partner at any time during the month then ended, a monthly report containing an account statement, which will include a statement of income (loss) and a statement of changes in NAV, for the prescribed period. In addition, the account statement will disclose any material business dealings between the partnership, USCF, commodity trading advisor (if any), FCM, or the principals thereof that previously have not been disclosed in this prospectus or any amendment thereto, other account statements or annual reports.

UNL will provide information to its shareholders to the extent required by applicable SEC, CFTC, and NYSE Arca requirements. An issuer, such as UNL, of exchange-traded securities may not always readily know the identities of the investors who own those securities. UNL will post the same information that would otherwise be provided in UNL's reports to limited partners described above including its monthly account statements, which will include, without limitation, UNL's NAV, on UNL's website www.uscfinvestments.com.

Fiscal Year

The fiscal year of UNL is the calendar year. USCF may select an alternate fiscal year.

Governing Law; Consent To Delaware Jurisdiction

The rights of USCF, UNL, DTC (as registered owner of UNL's global certificate for shares) and the shareholders, are governed by the laws of the State of Delaware. USCF, UNL and DTC and, by accepting shares, each DTC Participant and each shareholder, consent to the jurisdiction of the courts of the State of Delaware and any federal courts located in Delaware. Such consent is not required for any person to assert a claim of Delaware jurisdiction over USCF or UNL.

Legal Matters

Litigation and Claims

Within the past 5 years of the date of this prospectus, there have been no material administrative, civil or criminal actions against USCF, underwriter, or any principal or affiliate of either of them. This includes any actions pending, on appeal, concluded, threatened, or otherwise known to them.

Legal Opinion

Sutherland Asbill & Brennan LLP is counsel to advise UNL and USCF with respect to the shares being offered hereby and has passed upon the validity of the shares being issued hereunder. Sutherland Asbill & Brennan LLP has also provided USCF with its opinion with respect to federal income tax matters addressed herein.

Experts

Spicer Jeffries LLP, an independent registered public accounting firm, has audited the financial statements of UNL as of December 31, 2014 and December 31, 2013, including the schedule of investments as of December 31, 2014 and 2013, and the related statements of operations, changes in partners' capital and cash flows for the years ended December 31, 2014, 2013 and 2012, and the statements of financial condition of USCF as of December 31, 2014 and December 31, 2013, that appear in the annual report on Form 10-K that is incorporated by reference. The financial statements in the Form 10-K were included herein in reliance upon the reports of Spicer Jeffries LLP dated March 26, 2015 and March 25, 2015, respectively, given on its authority of such firm as experts in accounting and auditing.

U.S. Federal Income Tax Considerations

The following discussion summarizes the material U.S. federal income tax consequences of the purchase, ownership and disposition of shares in UNL, and the U.S. federal income tax treatment of UNL, as of the date hereof. This discussion is applicable to a beneficial owner of shares who purchases shares in the offering to which this prospectus relates, including a beneficial owner who purchases shares from an Authorized Participant. Except where noted otherwise, it deals only with shares held as capital assets and does not deal with special situations, such as those of dealers in securities or currencies, financial institutions, tax-exempt entities, insurance companies, persons holding shares as a part of a position in a "straddle" or as part of a "hedging," "conversion" or other integrated transaction for federal income tax purposes, traders in securities or commodities that elect to use a mark-to-market method of accounting, or holders of shares whose "functional currency" is not the U.S. dollar. Furthermore, the discussion below is based upon the provisions of the Code, as amended, and regulations ("Treasury Regulations"), rulings and judicial decisions thereunder as of the date hereof, and such authorities may be repealed, revoked or modified so as to result in U.S. federal income tax consequences different from those discussed below.

Persons considering the purchase, ownership or disposition of shares should consult their own tax advisors concerning the United States federal income tax consequences in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction.

As used herein, a "U.S. shareholder" of a share means a beneficial owner of a share that is a U.S. person. A "U.S. person," for United States federal income tax purposes, is (i) a citizen or resident of the United States, (ii) a corporation or partnership created or organized in or under the laws of the United States or any political subdivision thereof, (iii) an estate the income of which is subject to United States federal income taxation regardless of its source or (iv) a trust (X) that is subject to the supervision of a court within the United States and the control of one or more United States persons as described in section 7701(a)(30) of the Code or (Y) that has a valid election in effect under applicable Treasury Regulations to be treated as a United States person. A "non-U.S. shareholder" is a holder that is not a U.S.

shareholder and a “non-U.S. person” is an individual or entity that is not a U.S. person. If a partnership holds our shares, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our shares, you should consult your own tax advisor regarding the tax consequences.

USCF on behalf of UNL, has received the opinion of Sutherland Asbill & Brennan LLP, counsel to UNL, that the material U.S. federal income tax consequences to UNL and to U.S. shareholders and non-U.S. shareholders will be as described below. In rendering its opinion, Sutherland Asbill & Brennan LLP has relied on the facts described in this prospectus as well as certain factual representations made by UNL and USCF. The opinion of Sutherland Asbill & Brennan LLP is not binding on the IRS, and as a result, the IRS may not agree with the tax positions taken by UNL. If challenged by the IRS, UNL's tax positions might not be sustained by the courts. No ruling has been requested from the IRS with respect to any matter affecting UNL or prospective investors.

EACH PROSPECTIVE INVESTOR IS ADVISED TO CONSULT ITS OWN TAX ADVISOR AS TO HOW U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN UNL APPLY TO YOU AND AS TO HOW THE APPLICABLE STATE, LOCAL OR FOREIGN TAXES APPLY TO YOU.

Tax Status of UNL

UNL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law. Under the Code, an entity classified as a partnership that is deemed to be a "publicly traded partnership" is generally taxable as a corporation for federal income tax purposes. The Code provides an exception to this general rule for a publicly traded partnership whose gross income for each taxable year of its existence consists of at least 90% "qualifying income" ("qualifying income exception"). For this purpose, section 7704 defines "qualifying income" as including, in pertinent part, interest (other than from a financial business), dividends and gains from the sale or disposition of capital assets held for the production of interest or dividends. In addition, in the case of a partnership a principal activity of which is the buying and selling of commodities (other than as inventory) or of futures, forwards and options with respect to commodities, "qualifying income" includes income and gains from such commodities and futures, forwards and options with respect to commodities. UNL and USCF have represented the following to Sutherland Asbill & Brennan LLP:

At least 90% of UNL's gross income for each taxable year will constitute "qualifying income" within the meaning of Code section 7704 (as described above);

- UNL is organized and operated in accordance with its governing agreements and applicable law;
- UNL has not elected, and will not elect, to be classified as a corporation for U.S. federal income tax purposes.

Based in part on these representations, Sutherland Asbill & Brennan LLP is of the opinion that UNL will be classified as a partnership for federal income tax purposes and that it is not taxable as a corporation for such purposes. UNL's taxation as a partnership rather than a corporation will require USCF to conduct UNL's business activities in such a manner that it satisfies the qualifying income exception on a continuing basis. No assurance can be given that UNL's operations for any given year will produce income that satisfies the requirements of the qualifying income exception. Sutherland Asbill & Brennan LLP will not review UNL's ongoing compliance with these requirements and will have no obligation to advise UNL or UNL's shareholders in the event of any subsequent change in the facts, representations or applicable law relied upon in reaching its opinion.

If UNL failed to satisfy the qualifying income exception in any year, other than a failure that is determined by the IRS to be inadvertent and that is cured within a reasonable time after discovery, UNL would be taxable as a corporation for federal income tax purposes and would pay federal income tax on its income at regular corporate rates. In that event, shareholders would not report their share of UNL's income or loss on their returns.

In addition, distributions to shareholders would be treated as dividends to the extent of UNL's current and accumulated earnings and profits. To the extent a distribution exceeded UNL's earnings and profits, the distribution would be treated as a return of capital to the extent of a shareholder's basis in its shares, and thereafter as gain from the sale of shares. Accordingly, if UNL were to be taxable as a corporation, it would likely have a material adverse effect on the economic return from an investment in UNL and on the value of the shares.

The remainder of this summary assumes that UNL is classified as a partnership for federal income tax purposes and that it is not taxable as a corporation.

U.S. Shareholders

Tax Consequences of Ownership of Shares

Taxation of UNL's Income. No U.S. federal income tax is paid by UNL on its income. Instead, UNL files annual information returns, and each U.S. shareholder is required to report on its U.S. federal income tax return its allocable share of the income, gain, loss, deduction and credit of UNL. For example, shareholders must take into account their share of ordinary income realized by UNL from accruals of interest on Treasuries and other investments, and their share of gain from Natural Gas Interests. These items must be reported without regard to the amount (if any) of cash or property the shareholder receives as a distribution from UNL during the taxable year. Consequently, a shareholder may be allocated income or gain by UNL but receive no cash distribution with which to pay its tax liability resulting from the allocation, or may receive a distribution that is insufficient to pay such liability. Because USCF currently does not intend to make distributions, it is likely that in any year UNL realizes net income and/or gain that a U.S. shareholder will be required to pay taxes on its allocable share of such income or gain from sources other than UNL distributions. In addition, individuals with income in excess of \$200,000 (\$250,000 in the case of married individuals filing jointly) and certain estates and trusts are subject to an additional 3.8% tax on their "net investment income," which generally includes net income from interest, dividends, annuities, royalties, and rents, and net capital gains (other than certain amounts earned from trades or businesses). The income subject to the additional 3.8% tax includes any income from businesses involved in the trading of financial instruments or commodities.

Allocations of UNL's Profit and Loss. Under Code section 704, the determination of a partner's distributive share of any item of income, gain, loss, deduction or credit is governed by the applicable organizational document unless the allocation provided by such document lacks "substantial economic effect."

An allocation that lacks substantial economic effect nonetheless will be respected if it is in accordance with the partners' interests in the partnership, determined by taking into account all facts and circumstances relating to the economic arrangements among the partners.

In general, UNL applies a monthly closing-of-the-books convention in determining allocations of economic profit or loss to shareholders. Income, gain, loss and deduction are determined on a monthly "mark-to-market" basis, taking into account our accrued income and deductions and realized and unrealized gains and losses for the month. These items are allocated among the holders of shares in proportion to the number of shares owned by them as of the close of business on the last business day of the prior month. Items of taxable income, deduction, gain, loss and credit recognized by UNL for federal income tax purposes for any taxable year are allocated among holders in a manner that equitably reflects the allocation of economic profit or loss. UNL has made the election permitted by section 754 of the Code, which election is irrevocable without the consent of the Service. The effect of this election is that, in connection with secondary market sales, we adjust the purchaser's proportionate share of the tax basis of our assets to fair market value, as reflected in the price paid for the shares, as if the purchaser had directly acquired an interest in our assets. The section 754 election is intended to eliminate disparities between a partner's basis in its partnership interest and its share of the tax bases of the partnership's assets, so that the partner's allocable share of taxable gain or loss on a disposition of an asset will correspond to its share of the appreciation or depreciation in the value of the asset since it acquired its interest. Depending on the price paid for shares and the tax bases of UNL's assets at the time of the purchase, the effect of the section 754 election on a purchaser of shares may be favorable or unfavorable.

UNL applies certain conventions in determining and allocating items for tax purposes in order to reduce the complexity and costs of administration. USCF believes that application of these conventions is consistent with the intent of the partnership provisions of the Code, and that the resulting allocations will have substantial economic

effect or otherwise are respected as being in accordance with shareholders' interests in UNL for federal income tax purposes. The Code and existing Treasury Regulations do not expressly permit adoption of these conventions although the monthly allocation convention described above is consistent with methods permitted under the applicable Treasury Regulations, as well as the legislative history for the provisions that requires allocations to appropriately reflect changes in ownership interest. It is possible that the IRS could successfully challenge this method and require a shareholder to report a greater or lesser share of items of income, gain, loss, deduction, or credit than if our method were respected. USCF is authorized to revise our allocation method to conform to any method permitted under future Treasury Regulations.

The assumptions and conventions used in making tax allocations may cause a shareholder to be allocated more or less income or loss for federal income tax purposes than its proportionate share of the economic income or loss realized by UNL during the period it held its shares. This “mismatch” between taxable and economic income or loss in some cases may be temporary, reversing itself in a later period when the shares are sold, but could be permanent.

Mark to Market of Certain Exchange-Traded Contracts. For federal income tax purposes, UNL generally is required to use a “mark-to-market” method of accounting under which unrealized gains and losses on instruments constituting “section 1256 contracts” are recognized currently. A section 1256 contract is defined as: (1) a futures contract that is traded on or subject to the rules of a national securities exchange which is registered with the SEC, a domestic board of trade designated as a contract market by the CFTC, or any other board of trade or exchange designated by the Secretary of the Treasury, and with respect to which the amount required to be deposited and the amount that may be withdrawn depends on a system of “marking to market”; (2) a forward contract on exchange-traded foreign currencies, where the contracts are traded in the interbank market; (3) a non-equity option traded on or subject to the rules of a qualified board or exchange; (4) a dealer equity option; or (5) a dealer securities futures contract.

Under these rules, section 1256 contracts held by UNL at the end of each taxable year, including for example Futures Contracts and options on Futures Contracts traded on a U.S. exchange or board of trade or certain foreign exchanges, are treated as if they were sold by UNL for their fair market value on the last business day of the taxable year. A shareholder’s distributive share of UNL’s net gain or loss with respect to each section 1256 contract generally is treated as long-term capital gain or loss to the extent of 60 percent thereof, and as short-term capital gain or loss to the extent of 40 percent thereof, without regard to the actual holding period (“60-40 treatment”).

Many of UNL’s Futures Contracts and some of their other commodity interests will qualify as “section 1256 contracts” under the Code. Gain or loss recognized through disposition, termination or marking-to-market of UNL’s section 1256 contracts will be subject to 60-40 treatment and allocated to shareholders in accordance with the monthly allocation convention. Cleared swaps and other commodity swaps will most likely not qualify as section 1256 contracts. If a commodity swap is not treated as a section 1256 contract, any gain or loss on the swap recognized at the time of disposition or termination will be long-term or short-term capital gain or loss depending on the holding period of the swap.

Limitations on Deductibility of Losses and Certain Expenses. A number of different provisions of the Code may defer or disallow the deduction of losses or expenses allocated to you by UNL, including but not limited to those described below.

A shareholder’s deduction of its allocable share of any loss of UNL is limited to the lesser of (1) the tax basis in its shares or (2) in the case of a shareholder that is an individual or a closely held corporation, the amount which the shareholder is considered to have “at risk” with respect to our activities. In general, the amount at risk will be your invested capital plus your share of any recourse debt of UNL for which you are liable. Losses in excess of the lesser of tax basis or the amount at risk must be deferred until years in which UNL generates additional taxable income against which to offset such carryover losses or until additional capital is placed at risk.

Noncorporate taxpayers are permitted to deduct capital losses only to the extent of their capital gains for the taxable year plus \$3,000 of other income. Unused capital losses can be carried forward and used to offset capital gains in future years. In addition, a noncorporate taxpayer may elect to carry back net losses on section 1256 contracts to each of the three preceding years and use them to offset section 1256 contract gains in those years, subject to certain limitations. Corporate taxpayers generally may deduct capital losses only to the extent of capital gains, subject to special carryback and carryforward rules.

Otherwise deductible expenses incurred by noncorporate taxpayers constituting “miscellaneous itemized deductions,” generally including investment-related expenses (other than interest and certain other specified expenses), are deductible only to the extent they exceed 2 percent of the taxpayer’s adjusted gross income for the year. Although the matter is not free from doubt, we believe management fees we pay to USCF and other expenses we incur will constitute investment-related expenses subject to the miscellaneous itemized deduction limitation, rather than expenses incurred in connection with a trade or business, and will report these expenses consistent with that interpretation. The Code imposes additional limitations on the amount of certain itemized deductions allowable to individuals with adjusted gross income in excess of certain amounts by reducing the otherwise allowable portion of such deductions by an amount equal to the lesser of:

- 3% of the individual’s adjusted gross income in excess of certain threshold amounts; or
- 80% of the amount of certain itemized deductions otherwise allowable for the taxable year.

Noncorporate shareholders generally may deduct “investment interest expense” only to the extent of their “net investment income.” Investment interest expense of a shareholder will generally include any interest accrued by UNL and any interest paid or accrued on direct borrowings by a shareholder to purchase or carry its shares, such as interest with respect to a margin account. Net investment income generally includes gross income from property held for investment (including “portfolio income” under the passive loss rules but not, absent an election, long-term capital gains or certain qualifying dividend income) less deductible expenses other than interest directly connected with the production of investment income.

To the extent that we allocate losses or expenses to you that must be deferred or disallowed as a result of these or other limitations in the Code, you may be taxed on income in excess of your economic income or distributions (if any) on your shares. As one example, you could be allocated and required to pay tax on your share of interest income accrued by UNL for a particular taxable year, and in the same year be allocated a share of a capital loss that you cannot deduct currently because you have insufficient capital gains against which to offset the loss. As another example, you could be allocated and required to pay tax on your share of interest income and capital gain for a year, but be unable to deduct some or all of your share of management fees and/or margin account interest incurred by you with respect to your shares. Shareholders are urged to consult their own professional tax advisors regarding the effect of limitations under the Code on your ability to deduct your allocable share of UNL’s losses and expenses.

Tax Basis of Shares

A shareholder’s tax basis in its shares is important in determining (1) the amount of taxable gain or loss it will realize on the sale or other disposition of its shares, (2) the amount of non-taxable distributions that it may receive from UNL and (3) its ability to utilize its distributive share of any losses of UNL on its tax return. A shareholder’s initial tax basis of its shares will equal its cost for the shares plus its share of UNL’s liabilities (if any) at the time of purchase. In general, a shareholder’s “share” of those liabilities will equal the sum of (i) the entire amount of any otherwise nonrecourse liability of UNL as to which the shareholder or an affiliate is the creditor (a “partner nonrecourse liability”) and (ii) a *pro rata* share of any nonrecourse liabilities of UNL that are not partner nonrecourse liabilities as to any shareholder.

A shareholder's tax basis in its shares generally will be (1) increased by (a) its allocable share of UNL's taxable income and gain and (b) any additional contributions by the shareholder to UNL and (2) decreased (but not below zero) by (a) its allocable share of UNL's tax deductions and losses and (b) any distributions by UNL to the shareholder. For this purpose, an increase in a shareholder's share of UNL's liabilities will be treated as a contribution of cash by the shareholder to UNL and a decrease in that share will be treated as a distribution of cash by UNL to the shareholder. Pursuant to certain IRS rulings, a shareholder will be required to maintain a single, "unified" basis in all shares that it owns. As a result, when a shareholder that acquired its shares at different prices sells less than all of its shares, such shareholder will not be entitled to specify particular shares (*e.g.*, those with a higher basis) as having been sold. Rather, it must determine its gain or loss on the sale by using an "equitable apportionment" method to allocate a portion of its unified basis in its shares to the shares sold.

Treatment of UNL Distributions. If UNL makes non-liquidating distributions to shareholders, such distributions generally will not be taxable to the shareholders for federal income tax purposes except to the extent that the sum of (i) the amount of cash and (ii) the fair market value of marketable securities distributed exceeds the shareholder's adjusted basis of its interest in UNL immediately before the distribution. Any cash distributions in excess of a shareholder's tax basis generally will be treated as gain from the sale or exchange of shares.

Constructive Termination of the Partnership. We will be considered to have been terminated for tax purposes if there is a sale or exchange of 50 percent or more of the total interests in our shares within a 12-month period. A termination would result in the closing of our taxable year for all shareholders. In the case of a shareholder reporting on a taxable year other than a fiscal year ending December 31, the closing of our taxable year may result in more than 12 months of our taxable income or loss being includable in its taxable income for the year of termination. We would be required to make new tax elections after a termination. A termination could result in tax penalties for the shareholders if we were unable to determine that the termination had occurred. Moreover, a termination might either accelerate the application of, or subject us to, any tax legislation enacted before the termination.

Tax Consequences of Disposition of Shares

If a shareholder sells its shares, it will recognize gain or loss equal to the difference between the amount realized and its adjusted tax basis for the shares sold. A shareholder's amount realized will be the sum of the cash or the fair market value of other property received plus its share of any UNL debt outstanding.

Gain or loss recognized by a shareholder on the sale or exchange of shares held for more than one year will generally be taxable as long-term capital gain or loss; otherwise, such gain or loss will generally be taxable as short-term capital gain or loss. A special election is available under the Treasury Regulations that will allow shareholders to identify and use the actual holding periods for the shares sold for purposes of determining whether the gain or loss recognized on a sale of shares will give rise to long-term or short-term capital gain or loss. It is expected that most shareholders will be eligible to elect, and generally will elect, to identify and use the actual holding period for shares sold. If a shareholder fails to make the election or is not able to identify the holding periods of the shares sold, the shareholder may have a split holding period in the shares sold. Under such circumstances, a shareholder will be required to determine its holding period in the shares sold by first determining the portion of its entire interest in UNL that would give rise to long-term capital gain or loss if its entire interest were sold and the portion that would give rise to short-term capital gain or loss if the entire interest were sold. The shareholder would then treat each share sold as giving rise to long-term capital gain or loss and short-term capital gain or loss in the same proportions as if it had sold its entire interest in UNL.

Under Section 751 of the Code, a portion of a shareholder's gain or loss from the sale of shares (regardless of the holding period for such shares), will be separately computed and taxed as ordinary income or loss to the extent attributable to "unrealized receivables" or "inventory" owned by UNL. The term "unrealized receivables" includes, among other things, market discount bonds and short-term debt instruments to the extent such items would give rise to ordinary income if sold by UNL. However, the short term capital gain on section 1256 contracts resulting from 60-40 treatment, described above, should not be subject to this rule.

If some or all of your shares are lent by your broker or other agent to a third party — for example, for use by the third party in covering a short sale — you may be considered as having made a taxable disposition of the loaned shares, in which case —

- you may recognize taxable gain or loss to the same extent as if you had sold the shares for cash; any of UNL's income, gain, loss or deduction allocable to those shares during the period of the loan will not be reportable by you for tax purposes; and
 - any distributions you receive with respect to the shares will be fully taxable, most likely as ordinary income.
- Shareholders desiring to avoid these and other possible consequences of a deemed disposition of their shares should consider modifying any applicable brokerage account agreements to prohibit the lending of their shares.

Other Tax Matters

Information Reporting. We report tax information to the beneficial owners of shares. The IRS has ruled that assignees of partnership interests who have not been admitted to a partnership as partners but who have the capacity to exercise substantial dominion and control over the assigned partnership interests will be considered beneficial owners for federal income tax purposes. On the basis of such ruling, except as otherwise provided herein, we treat the following persons as partners for federal income tax purposes: (1) assignees of shares who are pending admission as limited partners, and (2) shareholders whose shares are held in street name or by another nominee and who have the right to direct the nominee in the exercise of all substantive rights attendant to the ownership of their shares. UNL will furnish shareholders each year with tax information on IRS Schedule K-1 (Form 1065), which will be used by the shareholders in completing their tax returns.

Persons who hold an interest in UNL as a nominee for another person are required to furnish to us the following information: (1) the name, address and taxpayer identification number of the beneficial owner and the nominee; (2) whether the beneficial owner is (a) a person that is not a U.S. person, (b) a foreign government, an international organization or any wholly-owned agency or instrumentality of either of the foregoing, or (c) a tax-exempt entity; (3) the amount and description of shares acquired or transferred for the beneficial owner; and (4) certain information including the dates of acquisitions and transfers, means of acquisitions and transfers, and acquisition cost for purchases, as well as the amount of net proceeds from sales. Brokers and financial institutions are required to furnish additional information, including whether they are U.S. persons and certain information on shares they acquire, hold or transfer for their own account. A penalty of \$100 per failure, up to a maximum of \$1,500,000 per calendar year, is imposed by the Code, as amended for failure to report such information correctly to us. If the failure to furnish such information correctly is determined to be willful, the per failure penalty increases to \$250 or, if greater, 10% of the aggregate amount of items required to be reported, and the \$1,500,000 maximum does not apply. The nominee is required to supply the beneficial owner of the shares with the information furnished to us.

Partnership Audit Procedures. The IRS may audit the federal income tax returns filed by UNL. Under current law, adjustments resulting from any such audit may require each shareholder to adjust a prior year's tax liability and could result in an audit of the shareholder's own return. Any audit of a shareholder's return could result in adjustments of non-partnership items as well as UNL items. Partnerships are generally treated as separate entities for purposes of federal tax audits, judicial review of administrative adjustments by the IRS, and tax settlement proceedings. The tax treatment of partnership items of income, gain, loss and deduction are determined at the partnership level in a unified

partnership proceeding rather than in separate proceedings with the shareholders. The Code provides for one shareholder to be designated as the “tax matters partner” and represent the partnership purposes of these proceedings. The LP Agreement appoints USCF as the tax matters partner of UNL.

For taxable years beginning after December 31, 2017, the Bipartisan Budget Act of 2015 substantially modifies the procedures described in the preceding paragraph. Under these new rules, a partnership, including UNL, could be required to pay U.S. federal income tax on an “imputed understatement” resulting from an adjustment to partnership items attributable to prior years. Alternatively, the partnership may elect to cause such adjustments to be taken into account by the partners in the year the partnership provides notice to the partners of the adjustments. In addition, the new rules generally provide for the appointment of a person as a partnership representative that has sole authority to act on behalf of the partnership with respect to any partnership audit. The LP Agreement will appoint USCF as the partnership representative of UNL.

Tax Shelter Disclosure Rules. In certain circumstances the Code and Treasury Regulations require that the IRS be notified of taxable transactions through a disclosure statement attached to a taxpayer’s United States federal income tax return. In addition, certain “material advisers” must maintain a list of persons participating in such transactions and furnish the list to the IRS upon written request. These disclosure rules may apply to transactions irrespective of whether they are structured to achieve particular tax benefits. They could require disclosure by UNL or shareholders if a shareholder incurs a loss in excess a specified threshold from a sale or redemption of its shares or possibly in other circumstances. While these rules generally do not require disclosure of a loss recognized on the disposition of an asset in which the taxpayer has a “qualifying basis” (generally a basis equal to the amount of cash paid by the taxpayer for such asset), they apply to a loss recognized with respect to interests in a pass-through entity, such as the shares, even if the taxpayer’s basis in such interests is equal to the amount of cash it paid. In addition, under recently enacted legislation, significant penalties may be imposed in connection with a failure to comply with these reporting requirements. *Investors should consult their own tax advisors concerning the application of these reporting requirements to their specific situation.*

Tax-Exempt Organizations. Subject to numerous exceptions, qualified retirement plans and individual retirement accounts, charitable organizations and certain other organizations that otherwise are exempt from federal income tax (collectively “exempt organizations”) nonetheless are subject to the tax on unrelated business taxable income (“UBTI”). Generally, UBTI means the gross income derived by an exempt organization from a trade or business that it regularly carries on, the conduct of which is not substantially related to the exercise or performance of its exempt purpose or function, less allowable deductions directly connected with that trade or business. If UNL were to regularly carry on (directly or indirectly) a trade or business that is unrelated with respect to an exempt organization shareholder, then in computing its UBTI, the shareholder must include its share of (1) UNL’s gross income from the unrelated trade or business, whether or not distributed, and (2) UNL’s allowable deductions directly connected with that gross income.

UBTI generally does not include dividends, interest, or payments with respect to securities loans and gains from the sale of property (other than property held for sale to customers in the ordinary course of a trade or business). Nonetheless, income on, and gain from the disposition of, “debt-financed property” is UBTI. Debt-financed property generally is income-producing property (including securities), the use of which is not substantially related to the exempt organization’s tax-exempt purposes, and with respect to which there is “acquisition indebtedness” at any time during the taxable year (or, if the property was disposed of during the taxable year, the 12-month period ending with the disposition). Acquisition indebtedness includes debt incurred to acquire property, debt incurred before the acquisition of property if the debt would not have been incurred but for the acquisition, and debt incurred subsequent to the acquisition of property if the debt would not have been incurred but for the acquisition and at the time of acquisition the incurrence of debt was foreseeable. The portion of the income from debt-financed property attributable to acquisition indebtedness is equal to the ratio of the average outstanding principal amount of acquisition indebtedness over the average adjusted basis of the property for the year. UNL currently does not anticipate that it will borrow money to acquire investments; however, UNL cannot be certain that it will not borrow for such purpose in the future. In addition, an exempt organization shareholder that incurs acquisition indebtedness to purchase its shares in UNL may have UBTI.

The federal tax rate applicable to an exempt organization shareholder on its UBTI generally will be either the corporate or trust tax rate, depending upon the shareholder's form of organization. UNL may report to each such shareholder information as to the portion, if any, of the shareholder's income and gains from UNL for any year that will be treated as UBTI; the calculation of that amount is complex, and there can be no assurance that UNL's calculation of UBTI will be accepted by the Service. An exempt organization shareholder will be required to make payments of estimated federal income tax with respect to its UBTI.

Regulated Investment Companies. Interests in and income from “qualified publicly traded partnerships” satisfying certain gross income tests are treated as qualifying assets and income, respectively, for purposes of determining eligibility for regulated investment company (“RIC”) status. A RIC may invest up to 25% of its assets in interests in a qualified publicly traded partnership. The determination of whether a publicly traded partnership such as UNL is a qualified publicly traded partnership is made on an annual basis. UNL expects to be a qualified publicly traded partnership in each of its taxable years. However, such qualification is not assured.

Non-U.S. Shareholders

Generally, non-U.S. persons who derive U.S. source income or gain from investing or engaging in a U.S. business are taxable on two categories of income. The first category consists of amounts that are fixed, determinable, annual and periodic income, such as interest, dividends and rent that are not connected with the operation of a U.S. trade or business (“FDAP”). The second category is income that is effectively connected with the conduct of a U.S. trade or business (“ECI”). FDAP income (other than interest that is considered “portfolio interest”) is generally subject to a 30 percent withholding tax, which may be reduced for certain categories of income by a treaty between the U.S. and the recipient’s country of residence. In contrast, ECI is generally subject to U.S. tax on a net basis at graduated rates upon the filing of a U.S. tax return. Where a non-U.S. person has ECI as a result of an investment in a partnership, the ECI is subject to a withholding tax at a rate of 39.6% for individual shareholders and a rate of 35% for corporate shareholders.

Withholding on Allocations and Distributions. The Code provides that a non-U.S. person who is a partner in a partnership that is engaged in a U.S. trade or business during a taxable year will also be considered to be engaged in a U.S. trade or business during that year. Classifying an activity by a partnership as an investment or an operating business is a factual determination. Under certain safe harbors in the Code, an investment fund whose activities consist of trading in stocks, securities, or commodities for its own account generally will not be considered to be engaged in a U.S. trade or business unless it is a dealer in such stocks, securities, or commodities. This safe harbor applies to investments in commodities only if the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind customarily consummated at such place. Although the matter is not free from doubt, UNL believes that the activities directly conducted by UNL will not result in UNL being engaged in a trade or business within in the United States. However, there can be no assurance that the IRS would not successfully assert that UNL’s activities constitute a U.S. trade or business.

In the event that UNL’s activities were considered to constitute a U.S. trade or business, UNL would be required to withhold at the highest rate specified in Code section 1 (currently 39.6%) on allocations of our income to individual non-U.S. Shareholders and the highest rate specified in Code section 11(b) (currently 35%) on allocations of our income to corporate non-U.S. Shareholders, when such income is allocated or distributed. A non-U.S. shareholder with ECI will generally be required to file a U.S. federal income tax return, and the return will provide the non-U.S. shareholder with the mechanism to seek a refund of any withholding in excess of such shareholder’s actual U.S. federal income tax liability. Any amount withheld by UNL on behalf of a non-U.S. shareholder will be treated as a distribution to the non-U.S. shareholder to the extent possible. In some cases, UNL may not be able to match the economic cost of satisfying its withholding obligations to a particular non-U.S. shareholder, which may result in such cost being borne by UNL, generally, and accordingly, by all shareholders.

If UNL is not treated as engaged in a U.S. trade or business, a non-U.S. shareholder may nevertheless be treated as having FDAP income, which would be subject to a 30 percent withholding tax (possibly subject to reduction by treaty), with respect to some or all of its distributions from UNL or its allocable share of UNL income. Amounts withheld on behalf of a non-U.S. shareholder will be treated as being distributed to such shareholder.

To the extent any interest income allocated to a non-U.S. shareholder that otherwise constitutes FDAP is considered “portfolio interest,” neither the allocation of such interest income to the non-U.S. shareholder nor a subsequent distribution of such interest income to the non-U.S. shareholder will be subject to withholding, provided that the non-U.S. shareholder is not otherwise engaged in a trade or business in the U.S. and provides UNL with a timely and properly completed and executed IRS Form W-8BEN, W-8BEN-E, or other applicable form. In general, “portfolio interest” is interest paid on debt obligations issued in registered form, unless the “recipient” owns 10 percent or more of the voting power of the issuer.

Most of UNL’s interest income qualifies as “portfolio interest.” In order for UNL to avoid withholding on any interest income allocable to non-U.S. shareholders that would qualify as “portfolio interest,” it will be necessary for all non-U.S. shareholders to provide UNL with a timely and properly completed and executed Form W-8BEN or W-8BEN-E (or other applicable form). If a non-U.S. shareholder fails to provide a properly completed Form W-8BEN, W-8BEN-E, or other applicable form, USCF may request that the non-U.S. shareholder provide, within 15 days after the request by USCF, a properly completed Form W-8BEN, W-8BEN-E, or other applicable form. If a non-U.S. shareholder fails to comply with this request, the shares owned by such non-U.S. shareholder will be subject to redemption.

Gain from Sale of Shares. Gain from the sale or exchange of the shares may be taxable to a non-U.S. shareholder if the non-U.S. shareholder is a nonresident alien individual who is present in the U.S. for 183 days or more during the taxable year. In such case, the nonresident alien individual will be subject to a 30 percent withholding tax on the amount of such individual’s gain.

Branch Profits Tax on Corporate Non-U.S. Shareholders. In addition to the taxes noted above, any non-U.S. shareholders that are corporations may also be subject to an additional tax, the branch profits tax, at a rate of 30 percent. The branch profits tax is imposed on a non-U.S. corporation’s dividend equivalent amount, which generally consists of the corporation’s after-tax earnings and profits that are effectively connected with the corporation’s U.S. trade or business but are not reinvested in a U.S. business. This tax may be reduced or eliminated by an income tax treaty between the United States and the country in which the non-U.S. shareholder is a “qualified resident.”

Prospective non-U.S. shareholders should consult their tax advisor with regard to these and other issues unique to non-U.S. shareholders.

Backup Withholding

UNL may be required to withhold U.S. federal income tax (“backup withholding”) at a rate of 28% from all taxable distributions payable to: (1) any shareholder who fails to furnish UNL with his, her or its correct taxpayer identification number or a certificate that the shareholder is exempt from backup withholding, and (2) any shareholder with respect to whom the IRS notifies UNL that the shareholder has failed to properly report certain interest and dividend income to the IRS and to respond to notices to that effect. Backup withholding is not an additional tax and may be returned or credited against a taxpayer’s regular federal income tax liability if appropriate information is provided to the IRS.

Foreign Account Tax Compliance Act Provisions

Legislation commonly referred to as the “Foreign Account Tax Compliance Act,” or “FATCA,” generally imposes a 30% withholding tax on payments of certain types of income to foreign financial institutions (“FFIs”) unless such FFIs (1) enter into an agreement with the U.S. Treasury to report certain required information with respect to accounts held by U.S. persons (or held by foreign entities that have U.S. persons as substantial owners) or (2) reside in a jurisdiction that has entered into an intergovernmental agreement (“IGA”) with the United States to collect and share such information and comply with the terms of such IGA and any enabling legislation or regulations. The types of income subject to the tax include U.S.-source interest and dividends, and, after December 31, 2018, the gross proceeds from the sale of any property that could produce U.S.-source interest or dividends. The information required to be reported includes the identity and taxpayer identification number of each account holder that is a U.S. person and transaction activity within the holder’s account. In addition, subject to certain exceptions, this legislation also imposes a 30% withholding tax on payments to foreign entities that are not financial institutions unless the foreign entity certifies that it does not have a greater than 10% U.S. owner or provides the withholding agent with identifying information on each greater than 10% U.S. owner. Depending on the status of a non-U.S. shareholder and the status of the intermediaries through which they hold their shares, Non-U.S. shareholders could be subject to this 30% withholding tax with respect to distributions on their shares and proceeds from the sale of their shares. Under certain circumstances, a non-U.S. shareholder might be eligible for refunds or credits of such taxes.

Other Tax Considerations

In addition to federal income taxes, shareholders may be subject to other taxes, such as state and local income taxes, unincorporated business taxes, business franchise taxes, and estate, inheritance or intangible taxes that may be imposed by the various jurisdictions in which UNL does business or owns property or where the shareholders reside. Although an analysis of those various taxes is not presented here, each prospective shareholder should consider their potential impact on its investment in UNL. It is each shareholder’s responsibility to file the appropriate U.S. federal, state, local, and foreign tax returns. Sutherland Asbill & Brennan LLP has not provided an opinion concerning any aspects of state, local or foreign tax or U.S. federal tax other than those U.S. federal income tax issues discussed herein.

Investment by ERISA Accounts

General

Most employee benefit plans and individual retirement accounts (“IRAs”) are subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) or the Code, or both. This section discusses certain considerations that arise under ERISA and the Code that a fiduciary of: (i) an employee benefit plan as defined in ERISA; (ii) a plan as defined in Section 4975 of the Code; or (iii) any collective investment vehicle, business trust, investment partnership, pooled separate account or other entity the assets of which are treated as comprised (at least in part) of “plan assets” under the ERISA plan asset rules (“plan asset entity”); who has investment discretion should take into

account before deciding to invest the plan's assets in UNL. Employee benefit plans, plans and plan asset entities are collectively referred to below as plans, and fiduciaries with investment discretion are referred to below as plan fiduciaries.

This summary is based on the provisions of ERISA and the Code as of the date hereof. This summary is not intended to be complete, but only to address certain questions under ERISA and the Code likely to be raised by your advisors. The summary does not include state or local law.

Potential plan investors are urged to consult with their own professional advisors concerning the appropriateness of an investment in UNL and the manner in which shares should be purchased.

Special Investment Considerations

Each plan fiduciary must consider the facts and circumstances that are relevant to an investment in UNL, including the role that an investment in UNL would play in the plan's overall investment portfolio. Each plan fiduciary, before deciding to invest in UNL, must be satisfied that the investment is prudent for the plan, that the investments of the plan are diversified so as to minimize the risk of large losses and that an investment in UNL complies with the terms of the plan.

UNL and Plan Assets

A regulation issued under ERISA contains rules for determining when an investment by a plan in an equity interest of a limited partnership will result in the underlying assets of the partnership being deemed plan assets for purposes of ERISA and Section 4975 of the Code. Those rules provide that assets of a limited partnership will not be plan assets of a plan that purchases an equity interest in the partnership if the equity interest purchased is a publicly-offered security. If the underlying assets of a partnership are considered to be assets of any plan for purposes of ERISA or Section 4975 of the Code, the operations of that partnership would be subject to and, in some cases, limited by, the provisions of ERISA and Section 4975 of the Code.

The publicly-offered security exception described above applies if the equity interest is a security that is:

1. freely transferable (determined based on the relevant facts and circumstances);
2. part of a class of securities that is widely held (meaning that the class of securities is owned by 100 or more investors independent of the issuer and of each other); and
either (a) part of a class of securities registered under Section 12(b) or 12(g) of the Exchange Act or (b) sold to the plan as part of a public offering pursuant to an effective registration statement under the Securities Act of 1933 and
3. the class of which such security is a part is registered under the Exchange Act within 120 days (or such later time as may be allowed by the SEC) after the end of the fiscal year of the issuer in which the offering of such security occurred.
