EXPLANATORY NOTE:

In this Annual Report on Form 10-K, Sturm, Ruger & Company, Inc. (the “Company”) makes forward-looking statements and projections concerning future expectations. Such statements are based on current expectations and are subject to certain qualifying risks and uncertainties, such as market demand, sales levels of firearms, anticipated castings sales and earnings, the need for external financing for operations or capital expenditures, the results of pending litigation against the Company, the impact of future firearms control and environmental legislation, and accounting estimates, any one or more of which could cause actual results to differ materially from those projected. Words such as “expect,” “believe,” “anticipate,” “intend,” “estimate,” “will,” “should,” “could” and other words and terms of similar meaning, typically identify such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to publish revised forward-looking statements to reflect events or circumstances after the date such forward-looking statements are made or to reflect the occurrence of subsequent unanticipated events.

PART I

ITEM 1—BUSINESS

Company Overview

Sturm, Ruger & Company, Inc. (the “Company”) is principally engaged in the design, manufacture, and sale of firearms to domestic customers. Approximately 99% of the Company’s total sales for the year ended December 31, 2012 were from the firearms segment, and approximately 1% was from investment castings. Export sales represent approximately 3% of firearms sales. The Company’s design and manufacturing operations are located in the United States and almost all product content is domestic.

The Company has been in business since 1949 and was incorporated in its present form under the laws of Delaware in 1969. The Company offers products in three industry product categories – rifles, pistols, and revolvers. The Company’s firearms are sold through independent wholesale distributors, principally to the commercial sporting market.

The Company manufactures and sells investment castings made from steel alloys for both outside customers and internal use in the firearms segment. Investment castings sold to outside customers, either directly to or through manufacturers’ representatives, represented approximately 1% of the Company’s total sales for the year ended December 31, 2012.

For the years ended December 31, 2012, 2011, and 2010, net sales attributable to the Company's firearms operations were approximately \$484.9 million, \$324.2 million and \$251.7 million or approximately 99%, 99%, and 99%, respectively, of total net sales. The balance of the Company's net sales for the aforementioned periods was attributable to its investment castings operations.

Firearms Products

The Company presently manufactures firearm products, under the “Ruger” name and trademark, in the following industry categories:

Rifles

- Single-shot
- Autoloading
- Bolt-action
- Modern sporting

Revolvers

- Single-action
- Double-action

Pistols

- Rimfire autoloading
- Centerfire autoloading

Most firearms are available in several models based upon caliber, finish, barrel length, and other features.

Rifles

A rifle is a long gun with spiral grooves cut into the interior of the barrel to give the bullet a stabilizing spin after it leaves the barrel. Sales of rifles by the Company accounted for approximately \$143.9 million, \$83.4 million, and \$63.5 million of revenues for the years 2012, 2011, and 2010, respectively.

Pistols

A pistol is a handgun in which the ammunition chamber is an integral part of the barrel and which typically is fed ammunition from a magazine contained in the grip. Sales of pistols by the Company accounted for approximately \$216.5 million, \$150.0 million, and \$108.1 million of revenues for the years 2012, 2011, and 2010, respectively.

Revolvers

A revolver is a handgun that has a cylinder that holds the ammunition in a series of chambers which are successively aligned with the barrel of the gun during each firing cycle. There are two general types of revolvers, single-action and double-action. To fire a single-action revolver, the hammer is pulled back to cock the gun and align the cylinder before the trigger is pulled. To fire a double-action revolver, a single trigger pull advances the cylinder and cocks and releases the hammer. Sales of revolvers by the Company accounted for approximately \$92.7 million, \$69.9 million, and \$67.1 million of revenues for the years 2012, 2011, and 2010, respectively.

Accessories

The Company also manufactures and sells accessories and replacement parts for its firearms. These sales accounted for approximately \$31.8 million, \$20.2 million, and \$11.5 million of revenues for the years 2012, 2011, and 2010, respectively.

Investment Casting Products

Net sales attributable to the Company's investment casting operations (excluding intercompany transactions) accounted for approximately \$6.9 million, \$4.6 million, and \$3.5 million, or approximately 1% of revenues for 2012, 2011, and 2010, respectively.

Manufacturing

Firearms

The Company produces one model of pistol and all of its rifles and revolvers at the Newport, New Hampshire facility. All other pistols are produced at the Prescott, Arizona facility.

Many of the basic metal component parts of the firearms manufactured by the Company are produced by the Company's castings facility through a process known as precision investment casting. See "Manufacturing-Investment Castings" for a description of the investment casting process. The Company initiated the use of this process in the production of component parts for firearms in 1953. The Company believes that the investment casting process provides greater design flexibility and results in component parts which are generally close to their ultimate shape and, therefore, require less machining than processes requiring machining a solid billet of metal to obtain a part. Through the use of investment castings, the Company endeavors to produce durable and less costly component parts for its firearms.

All assembly, inspection, and testing of firearms manufactured by the Company are performed at the Company's manufacturing facilities. Every firearm, including every chamber of every revolver manufactured by the Company, is test-fired prior to shipment.

Investment Castings

To produce a product by the investment casting method, a wax model of the part is created and coated (“invested”) with several layers of ceramic material. The shell is then heated to melt the interior wax, which is poured off, leaving a hollow mold. To cast the desired part, molten metal is poured into the mold and allowed to cool and solidify. The mold is then broken off to reveal a near net shape cast metal part.

Marketing and Distribution

Firearms

The Company's firearms are primarily marketed through a network of federally licensed, independent wholesale distributors who purchase the products directly from the Company. They resell to federally licensed, independent retail firearms dealers who in turn resell to legally authorized end users. All retail purchasers are subject to a point-of-sale background check by law enforcement. These end users include sportsmen, hunters, people interested in self-defense, law enforcement and other governmental organizations, and gun collectors. Each distributor carries the entire line of firearms manufactured by the Company for the commercial market. Currently, 14 distributors service the domestic commercial market, with an additional 20 distributors servicing the domestic law enforcement market and two distributors servicing the Canadian market.

In 2012, the Company's largest customers and the percent of total sales they represented were as follows: Davidson's-17%; Jerry's/Ellett Brothers-14%; Lipsey's-13%; and Sports South-12%. In 2011, the Company's largest customers and the percent of total sales they represented were as follows: Jerry's/Ellett Brothers-15%; Davidson's-14%; Sports South-12%; and Lipsey's-12%. In 2010, the Company's largest customers and the percent of total sales they represented were as follows: Jerry's/Ellett Brothers-16%; Davidson's-12%; Lipsey's-11%; and Sports South-11%.

The Company employs nine employees and one independent contractor who service these distributors and call on retailers and law enforcement agencies. Because the ultimate demand for the Company's firearms comes from end users rather than from the independent wholesale distributors, the Company believes that the loss of any distributor would not have a material, long-term adverse effect on the Company, but may have a material adverse effect on the Company's financial results for a particular period. The Company considers its relationships with its distributors to be satisfactory.

The Company also exports its firearms through a network of selected commercial distributors and directly to certain foreign customers, consisting primarily of law enforcement agencies and foreign governments. Foreign sales were less than 6% of the Company's consolidated net sales for each of the past three fiscal years.

The Company does not consider its overall firearms business to be predictably seasonal; however, orders of many models of firearms from the distributors tend to be stronger in the first quarter of the year and weaker in the third quarter of the year. This is due in part to the timing of the distributor show season, which occurs during the first quarter.

Investment Castings

The investment castings segment provides castings for the Company's firearms segment. In addition, the investment castings segment produces various products for a number of customers in a variety of industries, including approximately 20 firearms and firearms component manufacturers.

Competition

Firearms

Competition in the firearms industry is intense and comes from both foreign and domestic manufacturers. While some of these competitors concentrate on a single industry product category such as rifles or pistols, several competitors manufacture products in all four industry categories (rifles, shotguns, pistols, and revolvers). Some of these competitors are subsidiaries of larger corporations than the Company with substantially greater financial resources than the Company, which could affect the Company's ability to compete. The principal methods of competition in the industry are product innovation, quality, availability, and price. The Company believes that it can compete effectively with all of its present competitors.

Investment Castings

There are a large number of investment castings manufacturers, both domestic and foreign, with which the Company competes. Competition varies based on the type of investment castings products and the end use of the product (commercial, sporting goods, or military). Companies offering alternative methods of manufacturing such as metal injection molding (MIM), wire electric discharge machining (EDM) and advancements in computer numeric controlled (CNC) machining also compete with the Company's investment castings segment. Many of these competitors are larger corporations than the Company with substantially greater financial resources than the Company, which could affect the Company's ability to compete with these competitors. The principal methods of competition in the industry are quality, price, and production lead time.

Employees

As of February 1, 2013, the Company employed approximately 1,460 full-time employees of which approximately 38% had at least ten years of service with the Company. The Company uses temporary employees to supplement its workforce. As of February 1, 2013, there were approximately 580 temporary employees.

None of the Company's employees are subject to a collective bargaining agreement.

Research and Development

In 2012, 2011, and 2010, the Company spent approximately \$5.9 million, \$4.0 million, and \$3.2 million, respectively, on research activities relating to the development of new products and the improvement of existing products. As of February 1, 2013, the Company had approximately 89 employees whose primary responsibilities were research and development activities.

Patents and Trademarks

The Company owns various United States and foreign patents and trademarks which have been secured over a period of years and which expire at various times. It is the policy of the Company to apply for patents and trademarks whenever new products or processes deemed commercially valuable are developed or marketed by the Company. However, none of these patents and trademarks are considered to be fundamental to any important product or manufacturing process of the Company and, although the Company deems its patents and trademarks to be of value, it does not consider its business materially dependent on patent or trademark protection.

Environmental Matters

The Company is committed to achieving high standards of environmental quality and product safety, and strives to provide a safe and healthy workplace for its employees and others in the communities in which it operates. The Company has programs in place that monitor compliance with various environmental regulations. However, in the normal course of its manufacturing operations the Company is subject to governmental proceedings and orders pertaining to waste disposal, air emissions, and water discharges into the environment. These regulations are integrated into the Company's manufacturing, assembly, and testing processes. The Company believes that it is generally in compliance with applicable environmental regulations and that the outcome of any environmental proceedings and orders will not have a material adverse effect on the financial position of the Company, but could have a material adverse effect on the financial results for a particular period.

Executive Officers of the Company

Set forth below are the names, ages, and positions of the executive officers of the Company. Officers serve at the discretion of the Board of Directors of the Company.

Name	Age	Position With Company
Michael O. Fifer	55	President and Chief Executive Officer
Thomas A. Dineen	44	Vice President, Treasurer and Chief Financial Officer
Christopher J. Killoy	54	Vice President of Sales and Marketing
Mark T. Lang	56	Group Vice President

Thomas P. Sullivan	52	Vice President of Newport Operations
Kevin B. Reid, Sr.	52	Vice President and General Counsel
Steven M. Maynard	58	Vice President of Lean Business Development
Leslie M. Gasper	59	Corporate Secretary

Michael O. Fifer joined the Company as Chief Executive Officer on September 25, 2006, and was named to the Board of Directors on October 19, 2006. Mr. Fifer was named President on April 23, 2008.

Thomas A. Dineen became Vice President on May 24, 2006. Previously he served as Treasurer and Chief Financial Officer since May 6, 2003 and had been Assistant Controller since 2001. Prior to that, Mr. Dineen had served as Manager, Corporate Accounting since 1997.

Christopher J. Killoy rejoined the Company as Vice President of Sales and Marketing on November 27, 2006. Mr. Killoy originally joined the Company in 2003 as Executive Director of Sales and Marketing, and subsequently served as Vice President of Sales and Marketing from November 1, 2004 to January 25, 2005.

Mark T. Lang joined the Company as Group Vice President on February 18, 2008. Mr. Lang is responsible for management of the Prescott Firearms Division and the Company's acquisition efforts. Prior to joining the Company, Mr. Lang was President of the Custom Products Business at Mueller Industries, Inc. Prior to joining Mueller, Mr. Lang was the Vice President of Operations for the Automotive Division of Thomas and Betts, Inc.

Thomas P. Sullivan joined the Company as Vice President of Newport Operations for the Newport, New Hampshire Firearms and Pine Tree Castings divisions on August 14, 2006.

Kevin B. Reid, Sr. became Vice President and General Counsel on April 23, 2008. Previously he served as the Company's Director of Marketing from June 4, 2007. Mr. Reid joined the Company in July 2001 as an Assistant General Counsel.

Steven M. Maynard joined the Company as Vice President of Lean Business Development on April 24, 2007. Prior to joining the Company, Mr. Maynard served as Vice President of Engineering and CIO at the Wiremold Company.

Leslie M. Gasper has been Secretary of the Company since 1994. Prior to that, Ms. Gasper was the Administrator of the Company's pension plans.

Where You Can Find More Information

Edgar Filing: STURM RUGER & CO INC - Form 10-K

The Company is subject to the informational requirements of the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), and accordingly files its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Definitive Proxy Statements, Current Reports on Form 8-K, and other information with the Securities and Exchange Commission (the "SEC"). The public may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549. Please call the SEC at (800) SEC-0330 for further information on the Public Reference Room. As an electronic filer, the Company's public filings are maintained on the SEC's Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The address of that website is <http://www.sec.gov>.

The Company files its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Definitive Proxy Statements, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act accessible free of charge through the Company's Internet site after the Company has electronically filed such material with, or furnished it to, the SEC. The address of that website is <http://www.ruger.com>. However, such reports may not be accessible through the Company's website as promptly as they are accessible on the SEC's website.

Additionally, the Company's corporate governance materials, including its Corporate Governance Guidelines, the charters of the Audit, Compensation, and Nominating and Corporate Governance committees, and the Code of Business Conduct and Ethics may also be found under the "Stockholder Relations" section of the Company's Internet site at <http://www.ruger.com>. A copy of the foregoing corporate governance materials is available upon written request to the Corporate Secretary at Sturm, Ruger & Company, Inc., Lacey Place, Southport, Connecticut 06890.

ITEM 1A—RISK FACTORS

The Company's operations could be affected by various risks, many of which are beyond its control. Based on current information, the Company believes that the following identifies the most significant risk factors that could adversely affect its business. Past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods.

In evaluating the Company's business, the following risk factors, as well as other information in this report, should be carefully considered.

Changes in government policies and firearms legislation could adversely affect the Company's financial results.

The sale, purchase, ownership, and use of firearms are subject to thousands of federal, state and local governmental regulations. The basic federal laws are the National Firearms Act, the Federal Firearms Act, and the Gun Control Act of 1968. These laws generally prohibit the private ownership of fully automatic weapons and place certain restrictions on the interstate sale of firearms unless certain licenses are obtained. The Company does not manufacture fully automatic weapons and holds all necessary licenses under these federal laws. Several states currently have laws in effect similar to the aforementioned legislation.

Until November 30, 1998, the "Brady Law" mandated a nationwide five-day waiting period and background check prior to the purchase of a handgun. As of November 30, 1998, the National Instant Check System, which applies to both handguns and long guns, replaced the five-day waiting period. The Company believes that the "Brady Law" and the National Instant Check System have not had a significant effect on the Company's sales of firearms, nor does it

anticipate any significant impact on sales in the future. On September 13, 1994, the “Violent Crime Control and Law Enforcement Act” banned so-called “assault weapons.” All the Company’s then-manufactured commercially-sold long guns were exempted by name as “legitimate sporting firearms.” This ban expired by operation of law on September 13, 2004. The Company remains strongly opposed to laws which would restrict the rights of law-abiding citizens to lawfully acquire firearms.

Currently, federal and several states’ legislatures are considering additional legislation relating to the regulation of firearms. These proposed bills are extremely varied, but many seek either to restrict or ban the sale and, in some cases, the ownership of various types of firearms. There also are several legislative proposals to limit magazine capacity.

The Company believes that the lawful private ownership of firearms is guaranteed by the Second Amendment to the United States Constitution and that the widespread private ownership of firearms in the United States will continue. However, there can be no assurance that the regulation of firearms will not become more restrictive in the future and that any such restriction would not have a material adverse effect on the business of the Company.

The Company's results of operations could be further adversely affected if legislation with diverse requirements is enacted.

With literally thousands of laws being proposed at the federal, state and local levels, if even a small percentage of these laws are enacted and they are incongruent, the Company could find it difficult, expensive or even practically impossible to comply with them, impeding new product development and distribution of existing products.

The Company's results of operations could be adversely affected by litigation.

The Company faces risks arising from various asserted and unasserted litigation matters. These matters include, but are not limited to, assertions of allegedly defective product design or manufacture, alleged failure to warn, purported class actions against firearms manufacturers, generally seeking relief such as medical expense reimbursement, property damages, and punitive damages arising from accidents involving firearms or the criminal misuse of firearms, and those lawsuits filed on behalf of municipalities alleging harm to the general public. Various factors or developments can lead to changes in current estimates of liabilities such as final adverse judgment, significant settlement or changes in applicable law. A future adverse outcome in any one or more of these matters could have a material adverse effect on the Company's financial results. See Note 16 to the financial statements which are included in this Annual Report on Form 10-K.

The Company's results of operations could be adversely affected by a decrease in demand for our products.

If demand for our products decreases significantly, we would be unable to efficiently utilize our capacity, and our profitability would suffer. Decreased demand could result from a macroeconomic downturn, such as sequestration, or could be specific to the firearms industry. If the decrease in demand occurs abruptly, the adverse impact would be even greater.

The Company must comply with various laws and regulations pertaining to workplace safety and environment, environmental matters, and firearms manufacture.

In the normal course of its manufacturing operations, the Company is subject to numerous federal, state and local laws and governmental regulations and related state laws, and governmental proceedings and orders. These laws and regulations pertain to workplace safety and environment, firearms serial number tracking and control, waste disposal, air emissions and water discharges into the environment. Noncompliance with any one or more of these laws and regulations could have a material adverse impact on the Company.

Business disruptions at one of the Company's manufacturing facilities could adversely affect the Company's financial results.

The Newport, New Hampshire and Prescott, Arizona facilities are critical to the Company's success. These facilities house the Company's principal production, research, development, engineering, design, and shipping operations. Any event that causes a disruption of the operation of either of these facilities for even a relatively short period of time could have a material adverse effect on the Company's ability to produce and ship products and to provide service to its customers.

Price increases for raw materials could adversely affect the Company's financial results.

Third parties supply the Company with various raw materials for its firearms and castings, such as fabricated steel components, walnut, birch, beech, maple and laminated lumber for rifle stocks, wax, ceramic material, metal alloys, various synthetic products and other component parts. There is a limited supply of these materials in the marketplace at any given time, which can cause the purchase prices to vary based upon numerous market factors. The Company believes that it has adequate quantities of raw materials in inventory or on order to provide ample time to locate and obtain additional items at then-current market cost without interruption of its manufacturing operations. However, if market conditions result in a significant prolonged inflation of certain prices or if adequate quantities of raw materials can not be obtained, the Company's manufacturing processes could be interrupted and the Company's financial condition or results of operations could be materially adversely affected.

The transition to a new enterprise resource planning ("ERP") system could cause disruption to the Company's operations.

The Company is transitioning to a new ERP system and has converted all of its manufacturing facilities and its support functions during the past two years. If the ERP system does not perform as expected, it could impede the Company's ability to manufacture products, order materials, generate management reports, invoice customers, and comply with laws and regulations. Any of these types of disruptions could have a material adverse effect on the financial position and the financial results of the Company.

Retention of key management is critical to the success of the Company.

We rely on the management and leadership skills of our senior management team. Our senior executives are not bound by employment agreements. The loss of the services of one or more of our senior executives or other key personnel could have a significant adverse impact on our business.

The healthcare legislation passed in 2010 could have a material adverse impact on the Company.

Certain provisions of the recently passed federal healthcare legislation, in particular the "unlimited lifetime benefit" which eliminated the practice of capping the amount of medical benefits available to an individual, could have a material adverse effect on the Company's financial position. The Company self insures the cost of the medical benefits for its employees up to an annual and lifetime maximum per individual. It supplements this self-insurance with "stop loss" insurance for costs incurred above these maximum thresholds. In the past, the medical benefit costs for several Company employees each year have exceeded this maximum, in some cases significantly. It is the Company's expectation that if it is forced to provide an "unlimited lifetime benefit" its medical costs would likely increase significantly, which would have a material adverse effect on its financial condition.

Keeping Pace with Retail Demand

There has been a substantial increase in demand for our products in recent years. If the Company continues to grow at a significant rate, additional manufacturing space will be required. If we are unable to keep pace with the increasing demand for our products, our revenues could be impaired, market acceptance of our products could be adversely affected and our customers might instead purchase our competitors' products.

ITEM 1B—UNRESOLVED STAFF COMMENTS

None.

ITEM 2—PROPERTIES

The Company's manufacturing operations are carried out at two facilities. The following table sets forth certain information regarding each of these facilities:

	Approximate Aggregate Usable Square Feet	Status	Segment
Newport, New Hampshire	350,000	Owned	Firearms/Castings
Prescott, Arizona	230,000	Leased	Firearms

Each facility contains enclosed ranges for testing firearms and also contains modern tool room facilities. The lease of the Prescott facility provides for rental payments, which are approximately equivalent to estimated rates for real property taxes.

The Company has three other facilities that were not used in its manufacturing operations in 2012:

	Approximate Aggregate Usable Square Feet	Status	Segment
Southport, Connecticut (Lacey Place property)	25,000	Owned	Corporate
Newport, New Hampshire (Dorr Woolen Building)	45,000	Owned	Firearms
Enfield, Connecticut	10,000	Leased	Firearms

There are no mortgages or any other major encumbrance on any of the real estate owned by the Company.

The Company's principal executive offices are located in Southport, Connecticut. If the Company continues to grow at a significant rate, additional manufacturing space will be required.

ITEM 3—LEGAL PROCEEDINGS

The nature of the legal proceedings against the Company is discussed at Note 16 to the financial statements, which are included in this Annual Report on Form 10-K.

The Company has reported all cases instituted against it through September 29, 2012, and the results of those cases, where terminated, to the SEC on its previous Quarterly Reports on Form 10-Q and Annual Reports on 10-K, to which reference is hereby made.

During the three months ending December 31, 2012, no cases were formally instituted against the Company.

During the three months ending December 31, 2012, the previously reported case of Howard Cook, Jr. vs. Sturm, Ruger & Co, et al., was dismissed, with prejudice.

ITEM 4—MINE SAFETY DISCLOSURES – NOT APPLICABLE

PART II

ITEM 5 MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is traded on the New York Stock Exchange under the symbol "RGR." At February 1, 2013, the Company had 1,773 stockholders of record.

The following table sets forth, for the periods indicated, the high and low sales prices for the Company's common stock as reported on the New York Stock Exchange and dividends paid on the Company's common stock.

High	Low	Dividends Per Share
------	-----	------------------------

Edgar Filing: STURM RUGER & CO INC - Form 10-K

2011:

First Quarter	\$23.23	\$14.65	\$ 0.050
Second Quarter	24.05	18.65	0.097
Third Quarter	36.85	21.91	0.142
Fourth Quarter	34.95	23.86	0.141

2012:

First Quarter	\$50.72	\$33.13	\$ 0.212
Second Quarter	58.42	34.22	0.324
Third Quarter	52.03	39.13	0.377
Fourth Quarter	60.11	40.00	4.882

Issuer Repurchase of Equity Securities

In 2012, the Company did not repurchase any shares of its common stock.

In 2011, the Company repurchased 133,400 shares of its common stock, representing 0.7% of the then outstanding shares, in the open market at an average price of \$14.94 per share.

In 2010, the Company repurchased 412,000 shares of its common stock, representing 2.1% of the then outstanding shares, in the open market at an average price of \$13.83 per share.

Comparison of Five-Year Cumulative Total Return*

Sturm, Ruger & Co., Inc., Standard & Poor's 500, Value Line Recreation Index, and Smith & Wesson Holding Corporation

(Performance Results Through 12/31/12)

Assumes \$100 invested at the close of trading 12/07 in Sturm, Ruger & Co., Inc. common stock, Standard & Poor's 500, Value Line Recreation Index, and Smith & Wesson Holding Corporation.

*Cumulative total return assumes reinvestment of dividends.

**ITEM 7 ^{MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS}
OF OPERATIONS**

Company Overview

Sturm, Ruger & Company, Inc. (the "Company") is principally engaged in the design, manufacture, and sale of firearms to domestic customers. Approximately 99% of the Company's total sales for 2012 were firearms sales, and 1% was investment castings sales. Export sales represent approximately 3% of total sales. The Company's design and manufacturing operations are located in the United States and almost all product content is domestic. The Company's firearms are sold through a select number of independent wholesale distributors, principally to the commercial sporting market.

The Company also manufactures investment castings made from steel alloys for internal use in its firearms and for sale to unaffiliated, third-party customers.

Orders of many models of firearms from the independent distributors tend to be stronger in the first quarter of the year and weaker in the third quarter of the year. This is due in part to the timing of the distributor show season, which occurs during the first quarter.

Results of Operations - 2012

Product Demand

Demand for the Company's products remained very strong throughout 2012. We believe this strong demand for our products was due to:

- the Company's continued practice of introducing innovative and exciting new products,
- new shooters joining the ranks of gun owners,
- the current political environment that favorably impacted the entire firearms industry, and
- increased manufacturing capacity and greater product availability for certain products in strong demand.

New product introductions in 2012 included the 10/22 TakeDown rifle, the Ruger American Rifle, the SR22 pistol, the 22/45 Lite pistol, and the Single-Nine revolver. New products represented \$182.0 million or 38% of firearm sales

in 2012, compared to \$98.6 million or 30% of firearms sales in 2011.

The estimated sell-through of the Company's products from the independent distributors to retailers increased 63% in 2012 from the comparable prior year periods. For the same periods, the National Instant Criminal Background Check System ("NICS") background checks (as adjusted by the National Shooting Sports Foundation) increased 28%.

Estimated sell-through from distributors to retailers and total NICS background checks follow:

	2012	2011	2010
Estimated Units Sold from Distributors to Retailers (1)	1,772,800	1,085,200	901,500
Total Adjusted NICS Background Checks (2)	13,780,000	10,791,000	9,436,000

The estimates for each period were calculated by taking the beginning inventory at the distributors, plus shipments (1) from the Company to distributors during the period, less the ending inventory at distributors. These estimates are only a proxy for actual market demand as they:

- Rely on data provided by independent distributors that are not verified by the Company,
- Do not consider potential timing issues within the distribution channel, including goods-in-transit, and
- Do not consider fluctuations in inventory at retail.

While NICS background checks are not a precise measure of retail activity, they are commonly used as a proxy for retail demand. NICS background checks are performed when the ownership of most firearms, either new or used, is transferred by a Federal Firearms Licensee. NICS background checks are also performed for permit applications, permit renewals, and other administrative reasons.

The adjusted NICS data presented above was derived by the National Shooting Sports Foundation (“NSSF”) by subtracting out NICS checks that are not directly related to the sale of a firearm, including checks used for concealed carry (“CCW”) permit application checks as well as checks on active CCW permit databases. While not a direct correlation to firearms sales, the NSSF-adjusted NICS data provides a more accurate picture of current market conditions than raw NICS data.

Orders Received and Ending Backlog

(in millions except average sales price, net of Federal Excise Tax):

	2012	2011	2010
Orders Received	\$796.7	\$385.9	\$229.4
Average Sales Price of Orders Received	\$277	\$278	\$272

Ending Backlog	\$427.1	\$98.2	\$34.9
Average Sales Price of Ending Backlog	\$283	\$291	\$326

The increase in orders received and the increase in the ending backlog in 2012 are due primarily to strong demand for new products and certain mature products.

Production

Total unit production in 2012 increased 52% from 2011. This increase in unit production resulted from investment in incremental capacity for new product introductions and from the utilization of lean methodologies for continuous improvement in our operations. Our increase in production was facilitated by \$27.3 million of capital expenditures during 2012. These capital expenditures exceeded depreciation by approximately \$13.0 million during 2012, which represented an approximate 7% increase to our capital equipment base.

Annual Summary Unit Data

Firearms unit data for orders, production, shipments and backorders follows:

	2012	2011	2010
Units Ordered	2,879,200	1,388,100	842,700
Units Produced	1,697,800	1,114,700	906,200
Units Shipped	1,696,400	1,123,100	903,200
Average Sales Price	\$286	\$289	\$279
Units on Backorder	1,507,200	337,400	106,800

Inventories

The Company's finished goods inventory decreased 600 units during 2012 and remains below optimal levels to support rapid fulfillment of distributor demand. The Company has a goal of replenishing its finished goods inventory in future periods to levels that will better serve its customers. This replenishment could increase the FIFO value of finished goods inventory by as much as \$15 million from the current level upon the attainment of the desired levels of finished goods inventory.

Distributor inventories of the Company's products decreased 76,400 units during 2012 and are significantly below the optimal level to support rapid fulfillment of retailer demand.

Inventory data follows:

	December 31,		
	2012	2011	2010
Units – Company Inventory	15,600	16,200	23,600
Units – Distributor Inventory (3)	59,200	135,600	97,700
Total inventory (4)	74,800	151,800	121,300

Distributor ending inventory as provided by the independent distributors of the Company’s products. These (3) numbers do not include goods-in-transit inventory that has been shipped from the Company but not yet received by the distributors.

(4) This total does not include inventory at retailers. The Company does not have access to data on retailer inventories.

Year ended December 31, 2012, as compared to year ended December 31, 2011:

Net Sales

Consolidated net sales were \$491.8 million in 2012. This represents an increase of \$163.0 million or 49.6% from 2011 consolidated net sales of \$328.8 million.

Firearms segment net sales were \$484.9 million in 2012. This represents an increase of \$160.7 million or 49.7% from 2011 firearm net sales of \$324.2 million. Firearms unit shipments increased 51.0% in 2012.

Casting segment net sales were \$6.9 million in 2012. This represents an increase of \$2.3 million or 50.0% from 2011 casting sales of \$4.6 million.

Cost of Products Sold and Gross Profit

Consolidated cost of products sold was \$312.9 million in 2012. This represents an increase of \$95.8 million or 44.1% from 2011 consolidated cost of products sold of \$217.1 million.

The gross margin was 36.4% in 2012. This represents an increase from the 2011 gross margin of 34.0% as illustrated below:

(in thousands) Year Ended December 31,	2012		2011	
Net sales	\$491,824	100.0 %	\$328,816	100.0 %
Cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, and product liability	310,674	63.2 %	214,524	65.2 %
LIFO expense	1,159	0.3 %	122	0 %
Overhead rate adjustments to inventory	665	0.1 %	700	0.3 %
Labor rate adjustments to inventory	196	0 %	95	0 %
Product liability	177	0 %	1,617	0.5 %
Total cost of products sold	312,871	63.6 %	217,058	66.0 %
Gross profit	\$178,953	36.4 %	\$111,758	34.0 %

Cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, and product liability- In 2012, cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, and product liability decreased as a percentage of sales by 2.0% compared to 2011. The main contributors to this decrease include the introduction of several new products which increased overall volume thereby favorably leveraging manufacturing overhead and improved productivity from continued emphasis on lean manufacturing techniques, which was partially offset by increased direct material cost.

LIFO- Gross inventories increased by \$6.8 million and \$0.2 million in 2012 and 2011, respectively. In 2012, the Company recognized LIFO expense of \$1.2 million which increased cost of products sold. In 2011, the Company recognized a LIFO expense of \$0.1 million which increased cost of products sold.

Overhead Rate Change- The net impact on inventory in 2012 from the change in the overhead rates used to absorb overhead expenses into inventory was a decrease of \$0.7 million, reflecting increased overhead efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold in 2012. In 2011, the change in inventory value resulting from the change in the overhead rate used to absorb overhead expenses into inventory was a decrease of \$0.7 million, reflecting increased overhead efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold.

Labor Rate Adjustments- In 2012, the change in inventory value resulting from the change in the labor rates used to absorb labor expenses into inventory was a decrease of \$0.2 million, reflecting increased labor efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold. The net impact in 2010 from the change in the labor rates used to absorb labor expenses into inventory was a decrease to inventory of \$0.1 million, reflecting increased labor efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold.

Product Liability- This expense includes the cost of outside legal fees, insurance, and other expenses incurred in the management and defense of product liability matters. These costs totaled \$0.2 million and \$1.6 million in 2012 and 2011, respectively. See Note 16 to the notes to the financial statements "Contingent Liabilities" for further discussion of the Company's product liability.

Gross Profit- Gross profit was \$179.0 million or 36.4% of sales in 2012. This is an increase of \$67.2 million from 2011 gross profit of \$111.8 million or 34.0% of sales in 2011.

Selling, General and Administrative

Selling, general and administrative expenses were \$67.5 million in 2012, an increase of \$17.8 million from 2011, and a decrease from 15.1% of sales in 2011 to 13.7% of sales in 2012. The increase in selling, general and administrative expenses is attributable to the following:

- increased promotional and advertising expenses,
- increased equity and performance-based compensation expense,
- increased expenses related to the implementation of a new information technology infrastructure, and
- increased freight expense due to increased sales volume.

Other Operating Expenses (Income), net

Other operating expenses (income), net consist of the following (in thousands):

	2012	2011
Gain on sale of operating assets	\$(27)	\$(83)

Frozen defined-benefit pension plan (income) expense	320	(236)
Total other operating (income) expenses, net	\$293	\$(319)

Operating Income

Operating income was \$111.1 million or 22.6% of sales in 2012. This is an increase of \$48.7 million from 2011 operating income of \$62.4 million or 19.0% of sales.

Royalty Income

Royalty income was \$0.8 million in 2012. This represents a decrease of \$0.1 million from 2011 royalty income of \$0.9 million. The decrease is primarily attributable to decreased income from licensing agreements.

Interest Income

Interest income was negligible in 2012 and 2011.

Interest Expense

Interest expense was negligible in 2012 and 2011.

Other Income, Net

Other income, net was \$1.0 million in 2012, a decrease of \$0.1 million from \$1.1 million in 2011. This income is attributable primarily to the sale of by-products of our manufacturing processes and the gain on sale of non-operating real estate offset by the write-down of a cost basis investment.

Income Taxes and Net Income

The effective income tax rate was 37.0% in 2012 and 2011.

As a result of the foregoing factors, consolidated net income was \$70.6 million in 2012. This represents an increase of \$30.6 million from 2011 consolidated net income of \$40.0 million.

Quarterly Data

To supplement the summary annual unit data and discussion above, the same data for the last eight quarters follows:

	2012 Q4	Q3	Q2	Q1
Units Ordered	1,069,200	318,300	291,500	1,200,100
Units Produced	463,500	436,800	418,500	379,000
Units Shipped	467,300	425,500	421,100	382,500
Estimated Units Sold from Distributors to Retailers	504,700	396,900	410,300	460,800
Total Adjusted NICS Background Checks	4,882,000	2,904,000	2,619,000	3,376,000
Average Sales Price	\$295	\$273	\$280	\$290

Units Produced	302,000	289,700	281,200	241,800
Units Shipped	315,100	276,500	279,600	251,800
Estimated Units Sold from Distributors to Retailers	291,800	244,700	264,400	284,300
Total Adjusted NICS Background Checks	3,457,000	2,374,000	2,220,000	2,739,000
Average Sales Price	\$289	\$286	\$281	\$296
Units on Backorder	337,400	204,500	315,500	332,700
Units – Company Inventory	16,200	28,800	15,500	13,700

Units – Distributor Inventory (5)	135,600	112,300	80,500	65,300
-----------------------------------	---------	---------	--------	--------

(5) Distributor ending inventory as provided by the independent distributors of the Company's products.

(in millions except average sales price, net of Federal Excise Tax)

	2012			
	Q4	Q3	Q2	Q1
Orders Received	\$310.4	\$92.9	\$84.6	\$308.7
Average Sales Price of Orders Received	\$290	\$292	\$290	\$257
Ending Backlog	\$427.1	\$249.7	\$273.2	\$304.4
Average Sales Price of Ending Backlog	\$283	\$275	\$269	\$264

	2011			
	Q4	Q3	Q2	Q1
Orders Received	\$120.3	\$49.6	\$81.4	\$134.7
Average Sales Price of Orders Received	\$266	\$294	\$309	\$268
Ending Backlog	\$98.2	\$69.8	\$97.4	\$92.9
Average Sales Price of Ending Backlog	\$291	\$341	\$309	\$279

Fourth Quarter Gross Profit Analysis

The gross margin for the fourth quarter of 2012 and 2011 was 34.9% and 32.4%, respectively. Details of the gross margin are illustrated below:

(in thousands)	2012		2011	
Three Months Ended December 31,				
Net sales	\$141,767	100.0%	\$93,241	100.0%
Cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, and product liability	92,478	65.2 %	62,532	67.1 %
LIFO expense	200	0.1 %	374	0.4 %
Overhead rate adjustments to inventory	(339)	(0.2)%	(141)	(0.1)%
Labor rate adjustments to inventory	16	0 %	(189)	(0.2)%
Product liability	(49)	0 %	493	0.4 %
Total cost of products sold	92,306	65.1 %	63,069	67.6 %
Gross profit	\$49,461	34.9 %	\$30,172	32.4 %

Note: For a discussion of the captions in the above table, please see the “Cost of Products Sold and Gross Profit” discussion above.

Results of Operations - 2011

Year ended December 31, 2011, as compared to year ended December 31, 2010:

Annual Summary Unit Data

Firearms unit data for orders, production, shipments and ending inventory, and castings setups (a measure of foundry production) are as follows:

	2011	2010	2009
Units Ordered	1,388,100	842,700	958,700
Units Produced	1,114,700	906,200	934,300
Units Shipped	1,123,100	903,200	925,800
Average Sales Price	\$289	\$279	\$288
Units on Backorder	337,400	106,800	181,000
Units – Company Inventory	16,200	23,600	20,100
Units – Distributor Inventory (1)	135,600	97,700	96,200
Castings Setups	198,000	155,100	202,800

Orders Received and Ending Backlog

(in millions except average sales price, net of Federal Excise Tax):

	2011	2010
Orders Received	\$385.9	\$229.4

Edgar Filing: STURM RUGER & CO INC - Form 10-K

Average Sales Price of Orders Received (2)	\$278	\$272
Ending Backlog (2)	\$98.2	\$34.9
Average Sales Price of Ending Backlog (2)	\$291	\$326

(1) Distributor ending inventory as provided by the independent distributors of the Company's products.

(2) Average sales price for orders received and ending backlog is net of Federal Excise Tax of 10% for handguns and 11% for long guns.

Product Demand

The estimated sell-through of the Company’s products from distributors to retailers in 2011 increased 20% from 2010. During this period, National Instant Criminal Background Check System (“NICS”) background checks (as adjusted by the National Shooting Sports Foundation) increased 14%.

We believe the year-over-year increase in estimated sell-through from distributors to retailers from 2010 is due to the following:

- The strong demand for the new products launched in 2011, including the new LC9 pistol, the SR1911 pistol, the SR40c pistol, the Gunsite Scout rifle, the Single-Ten revolver, and the SP-101 double-action revolver chambered in .22LR. New product introductions remain a strong driver of demand and represented \$98.6 million or 30% of sales in 2011. The Ruger American Rifle and the SR22 pistol were introduced during the latter part of the fourth quarter and did not have a significant impact in 2011 sales,
- Strong demand for certain mature products, and
- Increased manufacturing capacity and greater product availability for certain products in strong demand.

Estimated sell-through from distributors to retailers and total NICS background checks follow:

	2011	2010	2009
Estimated Units Sold from Distributors to Retailers (1)	1,085,200	901,500	887,400
Total Adjusted NICS Background Checks (thousands) (2)	10,800	9,400	9,500

The estimates for each period were calculated by taking the beginning inventory at the distributors, plus shipments (1) from the Company to distributors during the period, less the ending inventory at distributors. These estimates are only a proxy for actual market demand as they:

- Rely on data provided by independent distributors that are not verified by the Company,
- Do not consider potential timing issues within the distribution channel, including goods-in-transit, and
- Do not consider fluctuations in inventory at retail.

(2) While NICS background checks are not a precise measure of retail activity, they are commonly used as a proxy for retail demand. NICS background checks are performed when the ownership of most firearms, either new or used, is transferred by a Federal Firearms Licensee. NICS background checks are also performed for permit applications,

permit renewals, and other administrative reasons.

The adjusted NICS data presented above was derived by the National Shooting Sports Foundation (“NSSF”) by subtracting out NICS checks that are not directly related to the sale of a firearm, including checks used for concealed carry (“CCW”) permit application checks as well as checks on active CCW permit databases. While not a direct correlation to firearms sales, the NSSF-adjusted NICS data provides a more accurate picture of current market conditions than raw NICS data.

The Company launched the SR9c compact pistol, the LCR357 revolver, and the SR40 striker-fired pistol in 2010. New product introductions, including the aforementioned products, represented \$62.3 million or 24.8% of sales in 2010.

The increase in orders received and the increase in the ending backlog in 2011 are due primarily to strong demand for new products, including the Ruger American Rifle and the SR22 pistol which were introduced in the latter part of the fourth quarter of 2011, and certain mature products.

The average sales price of orders received and ending backlog in 2010 decreased from 2009 due to significant orders in 2009 for certain higher-priced rifles, including the SR-556.

Production

Total unit production in 2011 increased 23% from 2010. The increased production was due in part to the Company's previously disclosed strategy of changing production rates less frequently in 2011 in a more deliberate effort to "level load" production throughout the year.

The intention of this planned change in production volumes was to build finished goods inventory during the period when we expect lesser demand (typically the third quarter and the first half of the fourth quarter) so that we have more finished goods inventory available to ship during the period when we expect greater demand (typically the end of the fourth quarter and the first quarter). The annual output of our manufacturing plants in 2011 did increase under this plan which, in turn, allowed us to better capitalize on sales opportunities, particularly during the fourth quarter.

The Company continues to further implement lean manufacturing principles across its facilities. This ongoing process began in 2006, and includes the following current initiatives:

- transitioning from batch production to single-piece flow manufacturing,
- refining existing cells and, where practical, consolidating smaller cells into value-stream super cells,
- developing pull systems and managing vendors,
- increasing capacity for the products with the greatest unmet demand, and
- re-engineering mature product designs for improved manufacturability.

Inventories

The Company's finished goods inventory decreased 7,400 units during 2011 and were significantly below what the Company believes to be optimal levels to support rapid fulfillment of distributor demand.

Quarterly Summary Unit Data

To supplement the summary annual unit data and discussion above, the same data for the last eight quarters follows:

Edgar Filing: STURM RUGER & CO INC - Form 10-K

	2011			
	Q4	Q3	Q2	Q1
Units Ordered	452,300	168,700	263,500	503,500
Units Produced	302,000	289,700	281,200	241,800
Units Shipped	315,100	276,500	279,600	251,800

⁽⁴⁾ Average sales price for orders received and ending backlog is net of Federal Excise Tax of 10% for handguns and 11% for long guns.

Net Sales

Consolidated net sales were \$328.8 million in 2011. This represents an increase of \$73.6 million or 28.8% from 2010 consolidated net sales of \$255.2 million.

Firearms segment net sales were \$324.2 million in 2011. This represents an increase of \$72.5 million or 28.8% from 2010 firearm net sales of \$251.7 million. Firearms unit shipments increased 24.4% in 2011.

Casting segment net sales were \$4.6 million in 2011. This represents an increase of \$1.1 million or 30.9% from 2010 casting sales of \$3.5 million.

Cost of Products Sold and Gross Profit

Consolidated cost of products sold was \$217.1 million in 2011. This represents an increase of \$45.8 million or 26.8% from 2010 consolidated cost of products sold of \$171.2 million.

The gross margin was 34.0% in 2011. This represents an increase from the 2010 gross margin of 32.9% as illustrated below:

(in thousands) Year Ended December 31,	2011		2010	
Net sales	\$328,816	100.0%	\$255,206	100.0%
Cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, product liability and product recall	214,506	65.2 %	173,198	67.8 %
LIFO expense (income)	122	0 %	(1,039)	(0.4)%
Overhead rate adjustments to inventory	700	0.3 %	(618)	(0.2)%
Labor rate adjustments to inventory	95	0 %	(364)	(0.1)%
Product liability	1,617	0.5 %	9	0 %
Product recalls	18	0 %	38	0 %
Total cost of products sold	217,058	66.0 %	171,224	67.1 %
Gross profit	\$111,758	34.0 %	\$83,982	32.9 %

Cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, product liability, and product recall- In 2011, cost of products sold, before LIFO, overhead and labor rate adjustments to inventory, product liability, and product recall decreased as a percentage of sales by 2.6% compared to 2010. The main contributors to this decrease include the increased overall volume which favorably leveraged manufacturing overhead and improved productivity from continued emphasis on lean manufacturing techniques, partially offset by a modest increase in input costs.

LIFO- Gross inventories increased by \$0.2 million in 2011 and decreased by \$2.2 million in 2010. In 2011, the Company recognized LIFO expense of \$0.1 million which increased cost of products sold. In 2010, the Company recognized a LIFO credit of \$1.0 million which decreased cost of products sold.

Overhead Rate Change- The net impact on inventory in 2011 from the change in the overhead rates used to absorb overhead expenses into inventory was a decrease of \$0.7 million, reflecting increased overhead efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold in 2011. In 2010, the change in inventory value resulting from the change in the overhead rate used to absorb overhead expenses into inventory was an increase of \$1.1 million, reflecting decreased overhead efficiency. This increase in inventory value resulted in a

corresponding decrease to cost of products sold.

Labor Rate Adjustments- In 2011, the change in inventory value resulting from the change in the labor rates used to absorb labor expenses into inventory was a decrease of \$0.6 million, reflecting increased labor efficiency. This decrease in inventory value resulted in a corresponding increase to cost of products sold. The net impact in 2010 from the change in the labor rates used to absorb labor expenses into inventory was an increase to inventory of \$0.4 million, reflecting decreased labor efficiency. This increase in inventory value resulted in a corresponding decrease to cost of sales.

Product Liability- This expense includes the cost of outside legal fees, insurance, and other expenses incurred in the management and defense of product liability matters. These costs totaled \$1.6 million in 2011. The negligible expense in 2010 reflects favorable experience in product liability matters that were resolved during 2010. See Note 16 to the notes to the financial statements “Contingent Liabilities” for further discussion of the Company’s product liability.

Product Recalls- In 2008, the Company received a small number of reports from the field that its SR9 pistols, and later, its LCP pistols, could discharge if dropped onto a hard surface. The Company began recalling SR9 pistols in April 2008 and LCP pistols in October 2008 to offer free safety retrofits. The cost of these safety retrofit programs was negligible in 2011 and 2010.

Gross Profit- Gross profit was \$111.8 million or 34.0% of sales in 2011. This is an increase of \$27.8 million from 2010 gross profit of \$84.0 million or 32.9% of sales.

Selling, General and Administrative

Selling, general and administrative expenses were \$49.7 million in 2011, an increase of \$9.5 million from 2010, and a decrease from 15.7% of sales in 2010 to 15.1% of sales in 2011. The increase in selling, general and administrative expenses is attributable to the following:

· increased promotional and advertising expenses, including the Million Gun Challenge to benefit the National Rifle Association,

- increased expenses related to the implementation of a new information technology infrastructure,
- increased equity-based and incentive compensation, and
- increased freight expense due to increased sales volume.

Other Operating (Income) Expenses, net

Other operating (income) expenses, net consist of the following (in thousands):

	2011	2010
Loss (gain) on sale of operating assets	\$(83)	\$22
Frozen defined-benefit pension plan expense	(236)	398
Total other operating (income) expenses, net	\$(319)	\$420

Operating Income

Operating income was \$62.4 million or 19% of sales in 2011. This is an increase of \$19.0 million from 2010 operating income of \$43.4 million or 17.0% of sales.

Royalty Income

Royalty income was \$0.9 million in 2011. This represents an increase of \$0.5 million from 2010 royalty income of \$0.4 million. The increase is primarily attributable to increased income from licensing agreements.

Interest Income

Interest income was negligible in 2011 and 2010.

Interest Expense

Interest expense was negligible in 2011 and 2010.

Other Income, Net

Other income, net was \$0.3 million in 2011, a decrease of \$0.1 million from a \$0.4 million in 2010. This income is attributable primarily to the sale of by-products of our manufacturing processes.

Income Taxes and Net Income

The effective income tax rate in 2011 was 37.0%, compared to 36.0% in 2010. The increase in the income tax rate reflects an increase in permanent differences.

As a result of the foregoing factors, consolidated net income was \$40.0 million in 2011. This represents an increase of \$11.7 million from 2010 consolidated net income of \$28.3 million.

Financial Condition

Liquidity

At December 31, 2012, the Company had cash and cash equivalents of \$31.0 million. Our pre-LIFO working capital of \$75.5 million, less the LIFO reserve of \$38.1 million, resulted in working capital of \$37.4 million and a current ratio of 1.6 to 1.

On December 21, 2012, the Company paid a special dividend of \$4.50 per share to shareholders of record on December 7, 2012. This dividend totaled \$86.7 million.

The Company would like to replenish its finished goods inventory to levels that will better serve its customers. This replenishment, which could take more than one year to accomplish, could increase the FIFO value of finished goods inventory by as much as \$15 million from the current levels upon the attainment of the desired levels of finished goods inventory.

Operations

Cash provided by operating activities was \$87.2 million, \$57.4 million, and \$32.5 million in 2012, 2011, and 2010, respectively. The increase in cash provided in 2012 compared to 2011 is attributable to increased profitability in 2012. The increase in cash provided in 2011 compared to 2010 is attributable to increased profitability in 2011 and increased accounts payable and accrued liabilities in 2011, due in part to greater accruals for sales promotions and excise tax payments.

Third parties supply the Company with various raw materials for its firearms and castings, such as fabricated steel components, walnut, birch, beech, maple and laminated lumber for rifle stocks, wax, ceramic material, metal alloys, various synthetic products and other component parts. There is a limited supply of these materials in the marketplace at any given time, which can cause the purchase prices to vary based upon numerous market factors. The Company believes that it has adequate quantities of raw materials in inventory or on order to provide sufficient time to locate and obtain additional items at then-current market cost without interruption of its manufacturing operations. However, if market conditions result in a significant prolonged inflation of certain prices or if adequate quantities of raw materials can not be obtained, the Company's manufacturing processes could be interrupted and the Company's financial condition or results of operations could be materially adversely affected.

Investing and Financing

Capital expenditures were \$27.3 million, \$22.1 million, and \$19.4 million in 2012, 2011, and 2010, respectively. In 2013, the Company expects to spend \$30 million on capital expenditures to purchase tooling and fixtures for new product introductions, to increase production capacity, and to upgrade and modernize manufacturing equipment. The Company finances, and intends to continue to finance, all of these activities with funds provided by operations and current cash and short-term investments.

During the past several years, the Board of Directors authorized the Company to repurchase shares of its common stock. In 2011, the Company repurchased approximately 133,400 shares of its common stock representing 0.7% of the then outstanding shares, in the open market at an average price of \$14.94 per share. In 2010, the Company repurchased approximately 412,000 shares of its common stock representing 2.1% of the then outstanding shares, in the open market at an average price of \$13.83 per share. All of these purchases were made with cash held by the Company and no debt was incurred. In 2012, no shares were repurchased.

At December 31, 2012, \$8.0 million remained authorized for share repurchases.

Including the \$4.50 per share special dividend paid on December 21, 2012, the Company paid dividends totaling \$111.5 million, \$8.2 million and \$6.3 million in 2012, 2011 and 2010, respectively.

On February 11, 2013, the Company's Board of Directors authorized a dividend of 40.4¢ per share to shareholders of record on March 8, 2013. The payment of future dividends depends on many factors, including internal estimates of future performance, then-current cash and short-term investments, and the Company's need for funds.

During the second quarter of 2011, the Company made a \$1.0 million minority investment in a pepper spray company for which it received a 12% interest. In the second quarter of 2012, the Company made a subsequent investment of \$0.3 million in the same company and now has a 19% interest. At December 31, 2012, the Company recognized an impairment loss of \$1.1 million in this investment.

In the second quarter of 2012, the Company made a \$1.3 million investment in a crossbow company for which it received a 29% interest.

The Company has migrated its retirement benefits from defined-benefit pension plans to defined-contribution retirement plans, utilizing its current 401(k) plan.

The Company amended its hourly and salaried defined-benefit pension plans so that employees no longer accrued benefits under them effective December 31, 2007. This action “froze” the benefits for all employees and prevented future hires from joining the plans. Currently, the Company provides supplemental discretionary contributions to substantially all employees’ individual 401(k) accounts.

Minimum contributions of \$2.6 million were required for the defined-benefit plans for 2012. The Company contributed \$3 million and \$2 million in 2012 and 2011, respectively.

In future years, the Company will likely be required to make cash contributions to the two defined-benefit pension plans. The annual contributions will be based on the amount of the unfunded plan liabilities derived from the frozen benefits and will not include liabilities for any future accrued benefits for any new or existing participants. The total amount of these future cash contributions will depend on the investment returns generated by the plans’ assets and the then-applicable discount rates used to calculate the plans’ liabilities.

The Company plans to contribute approximately \$3 million in 2013, but will increase the amount of the contribution if required to do so.

Based on its unencumbered assets, the Company believes it has the ability to raise cash through issuance of short-term or long-term debt. The Company’s unsecured \$25 million credit facility remained unused at December 31, 2012 and the Company has no debt. In February 2013, the Company amended its credit facility to raise the availability to \$40 million and extend the expiration date to June 15, 2014.

Contractual Obligations

The table below summarizes the Company's significant contractual obligations at December 31, 2012, and the effect such obligations are expected to have on the Company's liquidity and cash flows in future periods. This table excludes amounts already recorded on the Company's balance sheet as current liabilities at December 31, 2012.

"Purchase Obligations" as used in the below table includes all agreements to purchase goods or services that are enforceable and legally binding on the Company and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Certain of the Company's purchase orders or contracts for the purchase of raw materials and other goods and services that may not necessarily be enforceable or legally binding on the Company, are also included in "Purchase Obligations" in the table. Certain of the Company's purchase orders or contracts therefore included in the table may represent authorizations to purchase rather than legally binding agreements. The Company expects to fund all of these commitments with cash flows from operations and current cash.

Payment due by period (in thousands)

Contractual Obligations	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-Term Debt Obligations	-	-	-	-	-
Capital Lease Obligations	-	-	-	-	-
Operating Lease Obligations	-	-	-	-	-
Purchase Obligations	\$24,960	\$24,960	-	-	-
Other Long-Term Liabilities Reflected on the Registrant's Balance Sheet under GAAP	-	-	-	-	-
Total	\$24,960	\$24,960	-	-	-

The expected timing of payment of the obligations discussed above is estimated based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services or changes to agreed-upon amounts for some obligations.

Firearms Legislation and Litigation

See Item 1A - Risk Factors and Note 16 to the financial statements for discussion of firearms legislation and litigation.

Other Operational Matters

In the normal course of its manufacturing operations, the Company is subject to occasional governmental proceedings and orders pertaining to workplace safety, firearms serial number tracking and control, waste disposal, air emissions and water discharges into the environment. The Company believes that it is generally in compliance with applicable BATFE, environmental, and safety regulations and the outcome of any proceedings or orders will not have a material adverse effect on the financial position or results of operations of the Company.

The Company self-insures a significant amount of its product liability, workers' compensation, medical, and other insurance. It also carries significant deductible amounts on various insurance policies.

The Company is transitioning to a new enterprise resource planning system and has converted all of its manufacturing facilities and its support functions during the past two years. The remaining manufacturing facilities were converted in 2012.

The valuation of the future defined-benefit pension obligations at December 31, 2012 and 2011 indicated that these plans were underfunded by \$19.6 million and \$19.1 million, respectively, and resulted in a cumulative other comprehensive loss of \$29.6 million and \$27.5 million on the Company's balance sheet at December 31, 2012 and 2011, respectively.

The Company expects to realize its deferred tax assets through tax deductions against future taxable income.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities as of the balance sheet date and net sales and expenses recognized and incurred during the reporting period then ended. The Company bases estimates on prior experience, facts and circumstances, and other assumptions, including those reviewed with actuarial consultants and independent counsel, when applicable, that are believed to be reasonable. However, actual results may differ from these estimates.

The Company believes the determination of its product liability accrual is a critical accounting policy. The Company's management reviews every lawsuit and claim and is in contact with independent and corporate counsel on an ongoing basis. The provision for product liability claims is based upon many factors, which vary for each case. These factors include the type of claim, nature and extent of injuries, historical settlement ranges, jurisdiction where filed, and advice of counsel. An accrual is established for each lawsuit and claim, when appropriate, based on the nature of each such lawsuit or claim.

Amounts are charged to product liability expense in the period in which the Company becomes aware that a claim or, in some instances a threat of claim, has been made when potential losses or costs of defense are probable and can be reasonably estimated. Such amounts are determined based on the Company's experience in defending similar claims. Occasionally, charges are made for claims made in prior periods because the cumulative actual costs incurred for that claim, or reasonably expected to be incurred in the future, exceed amounts already provided. Likewise, credits may be taken if cumulative actual costs incurred for that claim, or reasonably expected to be incurred in the future, are less than amounts previously provided.

While it is not possible to forecast the outcome of litigation or the timing of costs, in the opinion of management, after consultation with independent and corporate counsel, there is a remote likelihood that litigation, including punitive damage claims, will have a material adverse effect on the financial position of the Company, but may have a material impact on the Company's financial results for a particular period.

The Company believes the valuation of its inventory and the related excess and obsolescence reserve is also a critical accounting policy. Inventories are carried at the lower of cost, principally determined by the last-in, first-out (LIFO) method, or market. An actual valuation of inventory under the LIFO method is made at the end of each year based on the inventory levels and prevailing inventory costs existing at that time.

The Company determines its excess and obsolescence reserve by projecting the year in which inventory will be consumed into a finished product. Given ever-changing market conditions, customer preferences and the anticipated introduction of new products, it does not seem prudent nor supportable to carry inventory at full cost beyond that needed during the next 36 months.

Forward-Looking Statements and Projections

The Company may, from time to time, make forward-looking statements and projections concerning future expectations. Such statements are based on current expectations and are subject to certain qualifying risks and uncertainties, such as market demand, sales levels of firearms, anticipated castings sales and earnings, the need for external financing for operations or capital expenditures, the results of pending litigation against the Company, the impact of future firearms control and environmental legislation and accounting estimates, any one or more of which could cause actual results to differ materially from those projected. Words such as “expect,” “believe,” “anticipate,” “intend,” “estimate,” “will,” “should,” “could” and other words and terms of similar meaning, typically identify such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to publish revised forward-looking statements to reflect events or circumstances after the date such forward-looking statements are made or to reflect the occurrence of subsequent unanticipated events.

ITEM 7A—QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to changing interest rates on its investments, which consist primarily of United States Treasury instruments with short-term (less than one year) maturities and cash. The interest rate market risk implicit in the Company's investments at any given time is low, as the investments mature within short periods and the Company does not have significant exposure to changing interest rates on invested cash.

The Company has not undertaken any actions to cover interest rate market risk and is not a party to any interest rate market risk management activities.

A hypothetical 100 basis point change in market interest rates over the next year would not materially impact the Company's earnings or cash flows. A hypothetical 100 basis point change in market interest rates would not have a material effect on the fair value of the Company's investments.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders

Sturm, Ruger & Company, Inc.

We have audited Sturm, Ruger & Company, Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Sturm, Ruger & Company, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Sturm, Ruger & Company, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the balance sheets of Sturm, Ruger & Company, Inc. as of December 31, 2012 and 2011, and the related statements of income and comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012, and our report dated February 27, 2013 expressed an unqualified opinion.

/s/McGladrey LLP

Stamford, Connecticut

February 27, 2013

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders

Sturm, Ruger & Company, Inc.

We have audited the accompanying balance sheets of Sturm, Ruger & Company, Inc. as of December 31, 2012 and 2011, and the related statements of income and comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the financial statement schedule of Sturm, Ruger & Company, Inc. listed in Item 15(a). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Sturm, Ruger & Company, Inc. as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Sturm, Ruger & Company, Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2013 expressed an unqualified opinion on the effectiveness of Sturm, Ruger & Company, Inc.'s internal control over financial reporting.

Notes to Financial Statements

(Dollars in thousands, except per share)

1. Summary of Significant Accounting Policies

Organization

Sturm, Ruger & Company, Inc. (the “Company”) is principally engaged in the design, manufacture, and sale of firearms to domestic customers. Approximately 99% of the Company’s total sales for the year ended December 31, 2012 were from the firearms segment and export sales represented approximately 3% of firearms sales. The Company’s design and manufacturing operations are located in the United States and almost all product content is domestic. The Company’s firearms are sold through a select number of independent wholesale distributors principally to the commercial sporting market.

The Company also manufactures and sells investment castings made from steel alloys for both outside customers and internal use in the firearms segment. Investment castings sold to outside customers, either directly to or through manufacturers’ representatives, were approximately 1% of the Company’s total sales for the year ended December 31, 2012.

Preparation of Financial Statements

The Company follows United States generally accepted accounting principles (“GAAP”). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

The significant accounting policies described below, together with the notes that follow, are an integral part of the Financial Statements.

Revenue Recognition

Substantially all product sales are sold FOB (free on board) shipping point. Revenue is recognized when product is shipped and the customer takes ownership and assumes the risk of loss. Accruals are made for sales discounts and incentives based on the Company's experience. The Company accounts for cash sales discounts as a reduction in sales and sales incentives as a charge to selling expense. Amounts billed to customers for shipping and handling fees are included in net sales and costs incurred by the Company for the delivery of goods are classified as selling expenses. Federal excise taxes are excluded from net sales.

Cash and Cash Equivalents

The Company considers interest-bearing deposits with financial institutions with remaining maturities of three months or less at the time of acquisition to be cash equivalents.

Accounts Receivable

The Company establishes an allowance for doubtful accounts based on the credit worthiness of its customers and historical experience. While the Company uses the best information available to make its evaluation, future adjustments to the allowance for doubtful accounts may be necessary if there are significant changes in economic and industry conditions or any other factors considered in the Company's evaluation. Bad debt expense has been immaterial during each of the last three years.

Inventories

Substantially all of the Company's inventories are valued at the lower of cost, principally determined by the last-in, first-out (LIFO) method, or market. Elements of cost in inventories include raw materials, direct labor and manufacturing overhead.

Property, Plant, and Equipment

Property, plant, and equipment are carried at cost. Depreciation is computed over useful lives using the straight-line and declining balance methods predominately over 15 years for buildings, 10 years for machinery and equipment and 3 years for tools and dies. When assets are retired, sold or otherwise disposed of, their gross carrying values and related accumulated depreciation are removed from the accounts and a gain or loss on such disposals is recognized when appropriate.

Maintenance and repairs are charged to operations; replacements and improvements are capitalized.

Long-lived Assets

The Company evaluates the carrying value of long-lived assets to be held and used when events or changes in circumstances indicate the carrying value may not be recoverable. In performing this review, the carrying value of the assets is compared to the projected undiscounted cash flows to be generated from the assets. If the sum of the undiscounted expected future cash flows is less than the carrying value of the assets, the assets are considered to be impaired. Impairment losses are measured as the amount by which the carrying value of the assets exceeds their fair value. The Company bases fair value of the assets on quoted market prices if available or, if not available, quoted

market prices of similar assets. Where quoted market prices are not available, the Company estimates fair value using the estimated future cash flows generated by the assets discounted at a rate commensurate with the risks associated with the recovery of the assets.

Equity Method Investments

Investee companies that are not consolidated, but over which the Company exercises significant influence, are accounted for under the equity method of accounting. Under the equity method of accounting, an investee company's accounts are not reflected within the Company's Balance Sheets and Statements of Income; however, the Company's share of the earnings or losses of the investee company is reflected in "Other operating (income) expenses, net" in the Statements of Income. The Company's carrying value in an investee company is reflected in "Other assets" in the Company's Balance Sheets.

Cost Method Investments

Investee companies not accounted for under the consolidation or the equity method of accounting are accounted for under the cost method of accounting. Under this method, the Company's share of the earnings or losses of such Investee companies is not included in the Balance Sheet or Statement of Income. However, impairment charges are recognized in the Statement of Income.

Income Taxes

Income taxes are accounted for using the asset and liability method. Under this method, deferred income taxes are recognized for the tax consequences of "temporary differences" by applying enacted statutory rates applicable to future years to temporary differences between the financial statement carrying amounts and the tax basis of the Company's assets and liabilities.

Product Liability

The Company provides for product liability claims including estimated legal costs to be incurred defending such claims. The provision for product liability claims is charged to cost of products sold.

Advertising Costs

The Company expenses advertising costs as incurred. Advertising expenses for 2012, 2011, and 2010, were \$3.4 million, \$2.9 million, and \$2.3 million, respectively.

Shipping Costs

Costs incurred related to the shipment of products are included in selling expense. Such costs totaled \$5.6 million, \$3.5 million, and \$3.0 million in 2012, 2011, and 2010, respectively.

Research and Development

In 2012, 2011, and 2010, the Company spent approximately \$5.9 million, \$4.0 million, and \$3.2 million, respectively, on research activities relating to the development of new products and the improvement of existing products. Research and development costs are expensed as incurred.

Earnings per Share

Basic earnings per share is based upon the weighted-average number of shares of common stock outstanding during the year. Diluted earnings per share reflect the impact of options, restricted stock units, and deferred stock outstanding using the treasury stock method.

2. Trade Receivables, Net

Trade receivables consist of the following:

December 31,	2012	2011
Trade receivables	\$44,143	\$43,217
Allowance for doubtful accounts	(300)	(185)
Allowance for discounts	(825)	(807)
	\$43,018	\$42,225

In 2012, the largest individual trade receivable balances accounted for 17%, 14%, 11%, and 10% of total trade receivables, respectively.

In 2011, the largest individual trade receivable balances accounted for 19%, 15%, 14%, and 12% of total trade receivables, respectively.

3. Inventories

Inventories consist of the following:

December 31,	2012	2011
Finished goods	\$3,615	\$4,071
Materials and products in process	50,483	43,622
	54,098	47,693
Adjustment of inventories to a LIFO basis	(38,089)	(37,476)

\$16,009 \$10,217

4. Property, Plant and Equipment

Property, plant and equipment consist of the following:

December 31,	2012	2011
Land and improvements	\$ 1,308	\$ 1,266
Buildings and improvements	29,539	27,961
Machinery and equipment	133,635	111,558
Dies and tools	31,231	28,357
	\$ 195,713	\$ 169,142

5. Other Assets

Other assets consist of the following:

December 31,	2012	2011
Patents, at cost	\$ 5,021	\$ 4,900
Accumulated amortization	(2,826)	(2,583)
Deposits on capital items	3,934	1,618
Software development costs, at cost	2,057	2,057
Accumulated amortization	(498)	(146)
Investment in equity securities, carried at cost	125	969
Investment in equity securities, equity method	1,206	-
Other	549	474
	\$ 9,568	\$ 7,289

The capitalized cost of patents is amortized using the straight-line method over their useful lives. The cost of patent amortization was \$0.2 million in each 2012, 2011, and 2010. The estimated annual patent amortization cost for each of the next five years is \$0.2 million. Costs incurred to maintain existing patents are charged to expense in the year incurred.

Software development costs were incurred to develop and implement an integrated ERP system prior to the time the system became operational. These costs are being amortized using the straight line method over a period of sixty months. Costs incurred subsequent to the system becoming operational are being expensed. The cost of software development cost amortization was \$0.4 million and \$0.1 million in 2012 and 2011, respectively. There was no amortization for software development costs in 2010.

The investment in equity securities carried at cost was evaluated for impairment as of December 31, 2012 and it was determined that the investment has been impaired and that the impairment is other than temporary. As a result, the Company recognized an impairment loss of \$1.1 million in 2012.

The investment in equity securities accounted for on the equity method of accounting consists of a 29% interest in a crossbow manufacturer. The Company recognized an immaterial loss related to this investment in 2012 and did not receive any dividends from this investment in 2012.

6. Trade Accounts Payable and Accrued Expenses

Trade accounts payable and accrued expenses consist of the following:

December 31,	2012	2011
Trade accounts payable	\$ 13,387	\$ 12,263
Accrued expenses	25,113	16,329
	\$ 38,500	\$ 28,592

7. Line of Credit

In December 2007, the Company established an unsecured \$25 million revolving line of credit with a bank. This facility is renewable annually. The credit facility remained unused throughout 2011 and 2012. Borrowings under this facility would bear interest at LIBOR (0.843% at December 31, 2012) plus 200 basis points and the Company is charged three-eighths of a percent (0.375%) per year on the unused portion. At December 31, 2012 and 2011, the Company was in compliance with the terms and covenants of the credit facility.

In February 2013, the Company amended its credit facility to increase the availability to \$40 million and extend the expiration date from June 15, 2013 to June 15, 2014.

8. Employee Benefit Plans

The Company has migrated its retirement benefits from defined-benefit pension plans to defined-contribution retirement plans, utilizing its current 401(k) plan. The Company sponsored two qualified defined-benefit pension plans that covered substantially all employees. A third defined-benefit pension plan is non-qualified and covered certain executive officers of the Company. The Company also sponsors a defined-contribution 401(k) plan that covers substantially all employees.

Defined-Benefit Plans

In 2007, the Company amended its hourly and salaried defined-benefit pension plans so that employees no longer accrued benefits under them after December 31, 2007. This action “froze” the benefits for all employees and prevented future hires from joining the plans, effective December 31, 2007. Currently, the Company provides supplemental discretionary contributions to substantially all employees’ individual 401(k) accounts.

Minimum contributions of \$2.6 million were required for the defined-benefit plans for 2012. The Company contributed \$3 million and \$2 million in 2012 and 2011, respectively.

In future years, the Company may again be required to make cash contributions to the two defined-benefit pension plans. The annual contributions will be based on the amount of the unfunded plan liabilities derived from the frozen benefits and will not include liabilities for any future accrued benefits for any new or existing participants. The total amount of these future cash contributions will depend on the investment returns generated by the plans’ assets and the then-applicable discount rates used to calculate the plans’ liabilities.

The Company plans to contribute approximately \$3 million in 2013, but will increase the amount of the contribution if required to do so. The intent of these contributions is to reduce the amount of time that the Company will be required to continue to operate the frozen plans. The ongoing cost of running the plans (even if frozen) is approximately \$0.4 million per year, which includes PBGC premiums, actuary and audit fees, and other expenses.

The measurement dates of the assets and liabilities of all plans presented for 2012 and 2011 were December 31, 2012 and December 31, 2011, respectively.

Summarized information on the Company's defined-benefit pension plans is as follows:

Obligations and Funded Status at December 31,	2012	2011
Change in Benefit Obligation		
Benefit obligation at beginning of year	\$77,230	\$68,793
Service cost	-	-
Interest cost	3,574	3,545

Weighted Average Assumptions as of December 31,	2012	2011
Discount rate	4.00%	4.75%
Rate of compensation increases	N/A	N/A

Information for Pension Plans with an Accumulated Benefit	2012	2011
Obligation in excess of plan assets		
Projected benefit obligation	\$85,516	\$77,230
Accumulated benefit obligation	\$85,516	\$77,230
Fair value of plan assets	\$65,890	\$58,148

Pension Weighted Average Asset Allocations as of December 31,	2012	2011
Debt securities	25 %	27 %
Equity securities	69 %	67 %
Real estate	5 %	5 %
Money market funds	1 %	1 %
	100 %	100 %

The estimated future benefit payments for the defined-benefit plans for each of the next five years and the total amount for years six through ten, are as follows: 2013-\$3.4 million, 2014-\$3.6 million, 2015-\$3.8 million, 2016-\$4.0 million, 2017-\$4.1 million and for the five year period ending 2021-\$22.7 million.

The Company determines the expected return on plan assets based on the target asset allocations. In addition, the historical returns of the plan assets are also considered in arriving at the expected rate of return.

The Company recorded an additional minimum pension liability adjustment, net of tax, which decreased comprehensive income by \$2.1 million and \$7.9 million in 2012 and 2011 and increased comprehensive income by \$0.7 million in 2010, respectively.

Plan Assets

The current investment objective is to produce income and long-term appreciation through a target asset allocation of 35% debt securities and other fixed income investments including cash and short-term instruments, and 65% equity investments, to provide for the current and future benefit payments of the plans. The pension plans are not invested in the common stock of the Company.

The Company adopted the provisions of the Financial Accounting Standard Board's Accounting Standards Codification 820.10 ("ASC 820.10") which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The Company has determined that all financial assets of both its defined-benefit pension plans are level 2 in the fair value hierarchy established by ASC 820.10. The valuation of level 2 assets are based on inputs, other than quoted prices in active markets, that are either directly or indirectly observable for the assets.

The disclosures focus on the inputs used to measure fair value. The following is a description of the valuation methodologies used to measure the plans' assets at fair value:

Pooled separate accounts: Valued at the net asset value ("NAV") of units held by the plans at year end, which is determined by aggregating the quoted market values of the underlying assets.

Money market funds: Valued at the NAV of shares held by the plans at year end, which is generally intended to equal one dollar per share.

The following table sets forth the defined-benefit plans' assets at fair value:

December 31,	2012	2011
Pooled separate accounts:		
Equity securities:		
U.S. small cap equity funds	\$7,637	\$6,742
U.S. mid-cap equity funds	18,626	16,037
U.S. large-cap equity funds	5,848	5,236
International equity funds	13,083	11,229
Domestic real estate funds	3,640	3,136

Fixed income securities:

Corporate bond funds	16,510	15,459
Money market fund	546	309
	\$65,890	\$58,148

Defined-Contribution Plans

Prior to 2007, the Company also sponsored two qualified defined-contribution plans that covered substantially all of its hourly and salaried employees. Effective January 1, 2007, the qualified defined-contribution plans were merged into a single 401(k) plan. Under the terms of the 401(k) plan, the Company matches a certain portion of employee contributions. Expenses related to matching employee contributions to the 401(k) plan were \$2.3 million, \$2.0 million, and \$1.8 million in 2012, 2011, and 2010, respectively.

Additionally, in 2012, 2011, and 2010 the Company provided supplemental discretionary contributions to the individual 401(k) accounts of substantially all employees. Each employee received a supplemental contribution to their account based on a uniform percentage of qualifying compensation established annually. The cost of these supplemental contributions totaled \$3.3 million, \$2.1 million, and \$1.8 million in 2012, 2011, and 2010, respectively.

Non-Qualified Plan

The Company also sponsors a non-qualified defined-contribution plan, the Supplemental Executive Retirement Plan, which covered certain of its salaried employees. Only one participant, who is retired, remains in this plan.

9. Other Operating Expenses (Income), net

Other operating expenses (income), net consist of the following:

Year ended December 31,	2012	2011	2010
(Gain) loss on sale of operating assets	\$(27)	\$(83)	\$22
Frozen defined-benefit pension plan expense (income)	320	(236)	398
Total other operating expenses (income), net	\$293	\$(319)	\$420

10. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal and state income tax examinations by tax authorities for years before 2008.

The federal and state income tax provision consisted of the following:

Year ended December 31,	2012		2011		2010	
	Current	Deferred	Current	Deferred	Current	Deferred
Federal	\$34,941	\$ (327)	\$11,371	\$ 7,948	\$11,675	\$ 1,112
State	6,635	231	3,926	256	2,814	293
	\$41,576	\$ (96)	\$15,297	\$ 8,204	\$14,489	\$ 1,405

The effective income tax rate varied from the statutory federal income tax rate as follows:

Year ended December 31,	2012	2011	2010
Statutory federal income tax rate	35.0%	35.0%	35.0%
State income taxes, net of federal tax benefit	4.0	4.3	4.6
Domestic production activities deduction	(3.0)	(1.8)	(2.7)
Other items	1.0	(0.5)	(0.9)
Effective income tax rate	37.0%	37.0%	36.0%

Significant components of the Company's deferred tax assets and liabilities are as follows:

December 31,	2012	2011
Deferred tax assets:		
Product liability	\$391	\$646
Employee compensation and benefits	3,343	3,374
Allowances for doubtful accounts and discounts	1,123	1,625
Inventories	688	533
Additional minimum pension liability	17,396	16,176
Stock-based compensation	2,116	1,089
Other	859	259
Total deferred tax assets	25,916	23,702
Deferred tax liabilities:		
Pension plans	10,205	9,217
Depreciation	8,069	8,401
Other	354	276
Total deferred tax liabilities	18,628	17,894
Net deferred tax assets	\$7,288	\$5,808

Changes in deferred tax assets relating to the additional minimum pension liability are not charged to expense and are therefore not included in the deferred tax provision; instead they are charged to other comprehensive income.

The Company made income tax payments of approximately \$33.0 million, \$16.4 million, and \$14.6 million, during 2012, 2011, and 2010, respectively. The Company expects to realize its deferred tax assets through tax deductions against future taxable income or carry back against taxes previously paid.

The Company does not believe it has included any "uncertain tax positions" in its federal income tax return or any of the state income tax returns it is currently filing. The Company has made an evaluation of the potential impact of additional state taxes being assessed by jurisdictions in which the Company does not currently consider itself liable. The Company does not anticipate that such additional taxes, if any, would result in a material change to its financial position.

11. Earnings Per Share

Set forth below is a reconciliation of the numerator and denominator for basic and diluted earnings per share calculations for the periods indicated:

Year ended December 31,	2012	2011	2010
Numerator:			
Net income	\$ 70,629	\$ 40,015	\$ 28,255
Denominator:			
Weighted average number of common shares outstanding – Basic	19,160,849	18,919,489	19,032,557
Dilutive effect of options and restricted stock units outstanding under the Company's employee compensation plans	474,392	232,909	266,636
Weighted average number of common shares outstanding – Diluted	19,635,241	19,152,398	19,299,193

The dilutive effect of outstanding options and restricted stock units is calculated using the treasury stock method. The weighted average number of common shares outstanding decreased from the previous year in 2011 and 2010 as a result of the Company's stock repurchase plans, which were authorized by the Board of Directors in 2008 and 2010. See Note 12 for further information.

There are no anti-dilutive stock options in 2012, 2011, and 2010 because the closing price of the Company's stock on December 31, 2012, 2011, and 2010 exceeded the strike price of all outstanding options on that date.

12. Stock Repurchases

In the third quarter of 2010 and the first quarter of 2011 the Company repurchased shares of its common stock. Details of these purchases are as follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Program
8/3/10-8/31/10	339,000	\$ 14.08	339,000	

Edgar Filing: STURM RUGER & CO INC - Form 10-K

9/1/10-9/22/10	73,000	\$ 12.92	73,000	
1/4/11-1/29/11	133,400	\$ 14.94	133,400	
Total	545,400	\$ 14.15	545,400	\$ 8,000,000

All of these purchases were made with cash held by the Company and no debt was incurred.

At December 31, 2012, \$8.0 million remained authorized for share repurchases.

13. Compensation Plans

On December 18, 2000, the Company adopted, and in May 2001 the shareholders approved, the 2001 Stock Option Plan for Non-Employee Directors (the “2001 Plan”) under which non-employee directors were granted options to purchase shares of the Company’s authorized but unissued stock. The Company reserved 200,000 shares for issuance under the 2001 Plan. In April 2007, all reserved shares for which a stock option had not been granted under the 2001 Plan were deregistered. No further stock options or stock will be granted under the 2001 Plan.

In April 2007, the Company adopted and the shareholders approved the 2007 Stock Incentive Plan (the “2007 SIP”) under which employees, independent contractors, and non-employee directors may be granted stock options, restricted stock, deferred stock awards, restricted stock units (“RSU’s”), and stock appreciation rights, any of which may or may not require the achievement of performance objectives. Vesting requirements are determined by the Compensation Committee of the Board of Directors. The Company reserved 2,550,000 shares for issuance under the 2007 SIP. At December 31, 2012, an aggregate of 830,000 shares remain available for grant under the Plan.

Compensation expense related to stock options is recognized based on the grant-date fair value of the awards estimated using the Black-Scholes option pricing model. Compensation expense related to deferred stock, restricted stock, and restricted stock units is recognized based on the grant-date fair value of the Company’s common stock. The total stock-based compensation cost included in the Statements of Income was \$4.7 million, \$3.0 million, and \$2.6 million in 2012, 2011, and 2010, respectively.

Stock Options

For purposes of determining the fair value of stock option awards granted, the Company used the Black-Scholes option pricing model and the assumptions set forth in the table below.

	2012		2010	
Dividend yield	2.9	%	0.0	%
Expected volatility	44.2	%	40.0	%
Risk free rate of return	4.0	%	4.0	%
Expected lives	2.9 years		6.7 years	

The estimated fair value of options granted is subject to the assumptions made and if the assumptions changed, the estimated fair value amounts could be significantly different.

The following table summarizes the stock option activity of the Plans:

	Shares	Weighted Average Exercise Price	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Life (Years)
Outstanding at December 31, 2009	1,498,150	\$ 9.00	\$ 4.13	7.1
Granted	40,000	9.70	4.80	9.0
Exercised	(366,000)	8.11	3.15	4.5
Canceled	-	-	-	-
Outstanding at December 31, 2010	1,172,150	9.30	4.46	6.7
Granted	-	-	-	-
Exercised	(843,450)	9.58	4.48	5.0
Canceled	-	-	-	-
Outstanding at December 31, 2011	328,700	8.58	4.42	6.2
Granted	9,830	8.59	32.57	5.6
Exercised	(217,820)	7.92	4.40	4.8
Canceled	(250)	8.69	4.57	6.3
Outstanding at December 31, 2012	120,460	8.58	6.76	5.7
Exercisable Options Outstanding at December 31, 2012	52,583	8.65	6.97	5.4
Non-Vested Options Outstanding at December 31, 2012	67,877	\$ 9.22	\$ 6.81	5.6

At December 31, 2012, the aggregate intrinsic value of all options, including exercisable options, was \$4.4 million.

At December 31, 2012, there was \$0.2 million of unrecognized compensation cost related to stock options that is expected to be recognized over a weighted-average period of 1.2 years.

Deferred Stock

Deferred stock awards vest based on the passage of time or the Company's attainment of performance objectives. Upon vesting, these awards convert one-for-one to common stock.

In 2012, 4,542 deferred stock awards were issued to non-employee directors that will vest in April 2013 and 6,102 deferred stock awards were issued to non-employee directors that will vest in April 2015.

In 2011, 9,487 deferred stock awards were issued to non-employee directors that vested in April 2012 and 12,744 deferred stock awards were issued to non-employee directors that will vest in April 2014.

In 2010, 12,902 deferred stock awards were issued to non-employee directors that vested in April 2011 and 17,331 deferred stock awards were issued to non-employee directors that will vest in April 2013.

Compensation expense related to these awards is amortized ratably over the vesting period. Compensation expense related to these awards was \$0.5 million, \$0.5 million and \$0.3 million in 2012, 2011, and 2010, respectively.

Restricted Stock Units

Beginning in the second quarter of 2009, the Company began granting restricted stock units in lieu of incentive stock options to senior employees. These RSU's have a vesting "double trigger." The vesting of these RSU's is dependent on the achievement of corporate objectives established by the Compensation Committee of the Board of Directors and the passage of time.

During 2012, 139,000 restricted stock units were issued. Compensation costs related to these restricted stock units was \$6.2 million, of which \$1.2 million was recognized in 2012. The remaining costs will be recognized ratably over the remaining period required before the units to vest, which ranges from two to four years.

During 2011, 524,000 restricted stock units were issued. Compensation costs related to these restricted stock units was \$10.7 million, of which \$2.5 million and \$1.8 million was recognized in 2012 and 2011, respectively. The remaining costs will be recognized ratably over the remaining period required before the units to vest, which ranges from one to three years.

During 2010, 76,000 restricted stock units were issued. Compensation costs related to these restricted stock units was \$1.1 million, all of which was recognized in 2010 because the performance objectives were attained and the awards became fully vested.

14. Operating Segment Information

The Company has two reportable operating segments: firearms and investment castings. The firearms segment manufactures and sells rifles, pistols, and revolvers principally to a number of federally-licensed, independent wholesale distributors primarily located in the United States. The investment castings segment manufactures and sells steel investment castings.

Corporate segment income relates to interest income on short-term investments, the sale of non-operating assets, and other non-operating activities. Corporate segment assets consist of cash and short-term investments and other non-operating assets.

The Company evaluates performance and allocates resources, in part, based on profit and loss before taxes. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies (see Note 1). Intersegment sales are recorded at the Company's cost plus a fixed profit percentage.

Year ended December 31,	2012	2011	2010
Net Sales			
Firearms	\$484,933	\$324,200	\$251,680
Castings			
Unaffiliated	6,891	4,616	3,526
Intersegment	26,462	18,122	14,677
	33,353	22,738	18,203
Eliminations	(26,462)	(18,122)	(14,677)
	\$491,824	\$328,816	\$255,206
Income (Loss) Before Income Taxes			
Firearms	\$113,660	\$66,484	\$48,160
Castings	(1,858)	(2,254)	(1,637)
Corporate	307	(714)	(2,374)
	\$112,109	\$63,516	\$44,149
Identifiable Assets			
Firearms	\$120,879	\$103,545	\$82,179
Castings	6,467	5,290	4,683
Corporate	47,140	97,675	70,899
	\$174,486	\$206,510	\$157,761
Depreciation			
Firearms	\$13,413	\$11,373	\$8,502
Castings	823	775	705
	\$14,236	\$12,148	\$9,207
Capital Expenditures			
Firearms	\$26,773	\$20,719	\$18,904
Castings	509	1,416	505
	\$27,282	\$22,135	\$19,409

In 2012, the Company's largest customers and the percent of total sales they represented were as follows: Davidson's-17%; Jerry's/Ellett Brothers-14%; Lipsey's-13%; and Sports South-12%

In 2011, the Company's largest customers and the percent of total sales they represented were as follows: Jerry's/Ellett Brothers-15%; Davidson's-14%; Sports South-12%; and Lipsey's-12%.

In 2010, the Company's largest customers and the percent of total sales they represented were as follows: Jerry's/Ellett Brothers-16%; Davidson's-12%; Lipsey's-11%; and Sports South-11%.

The Company's assets are located entirely in the United States and domestic sales represent greater than 94% of total sales in 2012, 2011, and 2010.

15. Quarterly Results of Operations (Unaudited)

The following is a tabulation of the unaudited quarterly results of operations for the two years ended December 31, 2012:

	Three Months Ended			
	3/31/12	6/30/12	9/29/12	12/31/12
Net Sales	\$112,337	\$119,569	\$118,152	\$141,766
Gross profit	41,793	45,134	42,565	49,461
Net income	15,480	18,014	17,349	19,786
Basic earnings per share	0.81	0.94	0.91	1.03
Diluted earnings per share	\$0.79	\$0.91	\$0.88	\$1.00

	Three Months Ended			
	4/02/11	7/02/11	10/01/11	12/31/11
Net Sales	\$75,441	\$79,622	\$80,512	\$93,241
Gross profit	23,995	28,465	29,127	30,172
Net income	7,947	10,813	10,737	10,518
Basic earnings per share	0.42	0.57	0.57	0.55
Diluted earnings per share	\$0.42	\$0.56	\$0.56	\$0.54

16. Contingent Liabilities

As of December 31, 2012, the Company was a defendant in approximately two (2) lawsuits and was aware of certain other such claims. Lawsuits in which the Company is involved generally fall into one of three categories: traditional product litigation, municipal litigation, and commercial litigation, discussed in turn below.

Traditional Product Liability Litigation

One of the two lawsuits mentioned above involves claims for damages related to allegedly defective product design and/or manufacture and/or inadequate warnings. The lawsuit stems from a specific incident of personal injury and is based on traditional product liability theories such as strict liability, negligence and/or breach of warranty. The Company management believes that the allegations in this case are unfounded, and that the incident was caused by the negligence and/or misuse of the firearm by third parties or the claimant, and that there should be no recovery against the Company.

Municipal Litigation

Municipal litigation generally includes those cases brought by cities or other governmental entities and individuals against firearms manufacturers, distributors and retailers seeking to recover damages allegedly arising out of the misuse of firearms by third-parties in the commission of homicides, suicides and other shootings involving juveniles and adults.

The only remaining lawsuit of this type was filed by the City of Gary in Indiana State Court over ten years ago. The complaint seeks damages, among other things, for the costs of medical care, police and emergency services, public health services, and other services as well as punitive damages. In addition, nuisance abatement and/or injunctive relief is sought to change the design, manufacture, marketing, and distribution practices of the various defendants. The suit alleges, among other claims, negligence in the design of products, public nuisance, negligent distribution and marketing, negligence per se and deceptive advertising. The case does not allege a specific injury to a specific individual as a result of the misuse or use of any of the Company's products.

After a long procedural history, the case was scheduled for trial on June 15, 2009. The case was not tried on that date and no subsequent scheduling order was entered. There has been no activity since that time.

Commercial Litigation

From time to time, the Company may be involved in commercial disputes that result in litigation. These disputes run the gamut and may involve intellectual property, real property, supply or distribution agreements, contract disputes, or other, general commercial matters. As of December 31, 2012, the Company was not involved in any such lawsuits.

Summary of Claimed Damages and Explanation of Product Liability Accruals

Punitive damages, as well as compensatory damages, are demanded in certain of the lawsuits and claims. Aggregate claimed amounts presently exceed product liability accruals and applicable insurance coverage. For claims made after July 10, 2000, coverage is provided on an annual basis for losses exceeding \$5 million per claim, or an aggregate maximum loss of \$10 million annually, except for certain new claims which might be brought by governments or municipalities after July 10, 2000, which are excluded from coverage.

The Company management monitors the status of known claims and the product liability accrual, which includes amounts for asserted and unasserted claims. While it is not possible to forecast the outcome of litigation or the timing of costs, in the opinion of management, after consultation with special and corporate counsel, there is a remote likelihood that litigation, including punitive damage claims, will have a material adverse effect on the financial position of the Company, but may have a material impact on the Company's financial results for a particular period.

Product liability claim payments are made when appropriate if, as, and when claimants and the Company reach agreement upon an amount to finally resolve all claims. Legal costs are paid as the lawsuits and claims develop, the timing of which may vary greatly from case to case. A time schedule cannot be determined in advance with any

reliability concerning when payments will be made in any given case.

Provision is made for product liability claims based upon many factors related to the severity of the alleged injury and potential liability exposure, based upon prior claim experience. Because our experience in defending these lawsuits and claims is that unfavorable outcomes are typically not probable or estimable, only in rare cases is an accrual established for such costs. In most cases, an accrual is established only for estimated legal defense costs. Product liability accruals are periodically reviewed to reflect then-current estimates of possible liabilities and expenses incurred to date and reasonably anticipated in the future. Threatened product liability claims are reflected in our product liability accrual on the same basis as actual claims; *i.e.*, an accrual is made for reasonably anticipated possible liability and claims-handling expenses on an ongoing basis.

A range of reasonably possible loss relating to unfavorable outcomes cannot be made. However, in product liability cases in which a dollar amount of damages is claimed, the amount of damages claimed, which totaled \$0.0 million and \$5.4 million at December 31, 2012 and 2011, respectively, are set forth as an indication of possible maximum liability that the Company might be required to incur in these cases (regardless of the likelihood or reasonable probability of any or all of this amount being awarded to claimants) as a result of adverse judgments that are sustained on appeal.

As of December 31, 2012 and 2011, the Company was a defendant in 2 and 3 lawsuits, respectively, involving its products and is aware of other such claims. During 2012 and 2011, respectively, 2 and 1 claims were filed against the Company, 3 and 0 claims were dismissed, and no claims were settled in either year.

The Company's product liability expense was \$0.2 million in 2012 and \$1.6 million in 2011. This expense includes the cost of outside legal fees, insurance, and other expenses incurred in the management and defense of product liability matters.

A roll-forward of the product liability reserve and detail of product liability expense for the three years ended December 31, 2012 follows:

Balance Sheet Roll-forward for Product Liability Reserve

	Balance Beginning of Year (a)	Accrued Legal Expense (Income) (b)	Cash Payments		Balance End of Year (a)
			Legal Settlements (c)	(d)	
2010	2,082	(834)	(64)	(162)	1,022
2011	1,022	755	(31)	-	1,746
2012	1,746	(633)	(52)	(4)	1,057

Income Statement Detail for Product Liability Expense

	Accrued Legal Expense (b)	Insurance Premium Expense (e)	Total Product Liability Expense
2010	(834)	843	9
2011	755	862	1,617
2012	(633)	810	177

Notes

(a) The beginning and ending liability balances represent accrued legal fees only. Settlements and administrative costs are expensed as incurred. Only in rare instances is an accrual established for settlements.

(b)

Edgar Filing: STURM RUGER & CO INC - Form 10-K

The expense accrued in the liability is for legal fees only. In 2010 and 2012, the costs incurred related to cases that were settled or dismissed were less than the amounts accrued for these cases in prior years.

(c) Legal fees represent payments to outside counsel related to product liability matters.

(d) Settlements represent payments made to plaintiffs or allegedly injured parties in exchange for a full and complete release of liability.

(e) Insurance expense represents the cost of insurance premiums.

There were no insurance recoveries during any of the above years.

17. Financial Instruments

The Company does not hold or issue financial instruments for trading or hedging purposes, nor does it hold interest rate, leveraged, or other types of derivative financial instruments. Fair values of accounts receivable, accounts payable, accrued expenses and income taxes payable reflected in the December 31, 2012 and 2011 balance sheets approximate carrying values at those dates.

18. Subsequent Events

On February 11, 2013, the Company's Board of Directors authorized a dividend of 40.4¢ per share to shareholders of record on March 8, 2013.

The Company's management has evaluated transactions occurring subsequent to December 31, 2012 and determined that there were no events or transactions during that period that would have a material impact on the Company's results of operations or financial position.

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A—CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company conducted an evaluation, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of December 31, 2012. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that as of December 31, 2012, the Company's disclosure controls and procedures over financial reporting were effective.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company conducted an evaluation, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of its internal control over financial reporting as of December 31, 2012. This evaluation was performed based on the criteria established in "Internal Control — Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Management has concluded that the Company maintained effective internal control over financial reporting as of December 31, 2012, based on criteria established in “Internal Control — Integrated Framework” issued by the COSO.

The effectiveness of the Company’s internal control over financial reporting as of December 31, 2012 has been audited by McGladrey LLP, an independent registered public accounting firm, as stated in their report which is included in this Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

New York Stock Exchange Certification

Pursuant to Section 303A.12(a) of the New York Stock Exchange Listed Company Manual, the Company submitted an unqualified certification of our Chief Executive Officer to the New York Stock Exchange on May 15, 2007. The Company has also filed, as exhibits to this Annual Report on Form 10-K, the Chief Executive Officer and Chief Financial Officer Certifications required under the Sarbanes-Oxley Act of 2002.

ITEM 9B—OTHER INFORMATION

None.

PART III

ITEM 10—DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information concerning the Company's directors, including the Company's separately designated standing audit committee, and on the Company's code of business conduct and ethics required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

Information concerning the Company's executive officers required by this Item is set forth in Item 1 of this Annual Report on Form 10-K under the caption "Executive Officers of the Company."

Information concerning beneficial ownership reporting compliance required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

ITEM 11—EXECUTIVE COMPENSATION

Information concerning director and executive compensation required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

ITEM 12 SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information concerning the security ownership of certain beneficial owners and management and related stockholder matters required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

ITEM 13—CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information concerning certain relationships and related transactions required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

ITEM 14—PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information concerning the Company's principal accountant fees and services and the pre-approval policies and procedures of the audit committee of the board of directors required by this Item is incorporated by reference from the Company's Proxy Statement relating to the 2013 Annual Meeting of Stockholders scheduled to be held April 30, 2013.

PART IV
