Anglo Swiss Resources, Inc.

Schedule A Financial Information

(expressed in Canadian dollars)

1. Nature of operations and going concern

The Company is in the business of the acquisition, exploration, exploration management and purchase of mineral properties, with the primary aim of developing them to a stage where the Company can exploit them profitably. The Company also has advanced its properties through joint venture partnerships, whereby proven companies manage the property with expertise in developing, designing and operating the extraction of mineral resources. At that stage, the Company's operations would, to some degree, be dependent on the prevailing market prices for any of the minerals produced by such operations. The Company currently does not have any producing properties and its current operations on its various properties are in the exploration stages, working towards establishing economic concentrations of minerals.

Before, during and after the quarter ended June 30, 2004, the Company was engaged in continued exploration of its gold property in British Columbia and simultaneously, a gemstone/graphite property located in south-eastern British Columbia. As a result, the Company's future mineral exploration and mining activities may be affected in varying degrees by prevailing market prices, political instability and government regulations, the success of attracting joint venture partners, all of which are beyond the control of the Company.

At June 30, 2004, the Company had a total working capital deficiency of (\$49,482) and without additional funding, will be unable to meet its obligations as they fall due. In addition, the Company will require additional financing to complete the exploration of its mineral properties. While the Company has been successful in raising the necessary funds to finance its exploration activities to-date, there can be no assurance that it will be able to continue to do so. Accordingly, there is some doubt about the ability of the Company to continue as a going concern.

Although the Company has taken steps to verify the title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, transfers, or native land claims, and title may be affected by undetected defects.

2. Interim un-audited financial statements

These interim financial statements follow the same accounting policies and methods of their application as the most recent annual financial statements and should be read in conjunction with the financial statements for the year ended December 31, 2003.

3. Capital stock

Authorized capital: 500,000,000 common shares without par value

400,000,000 preferred shares without par value

Issued and outstanding, June 30, 2004:	# of Shares	Amount

Feb 12, 2009

Total

6,575,000

During the year ended December 31, 2003, the company granted 1,125,000 stock options to non-employees and the related compensation cost of \$8,055 has been recorded in the statement of loss and deficit for the quarter ended March 31, 2004.

The Company has elected not to follow the fair value-based method of accounting for the stock options granted to employees and directors. Accordingly, no compensation expense was recorded on the grant of stock options to directors and employees as the exercise price is equal to or greater than the market price at the date of the grant. Pro forma earnings information determined under the fair value method of accounting for stock options is as follows:

Net loss for the period

June 30, 2004

Reported

\$ (137,542.00)

Compensation Expense

-

Pro-forma

\$ (137,542.00)

Basic and diluted loss per share

Reported

\$ (0.00)

Pro-forma

\$ (0.00)

The fair value of stock options used to calculate compensation expense is estimated using the Black-Scholes Option Pricing Model with the following assumptions:

Risk-free interest rate

3.98%

Expected dividend yield

-

Expected stock price volatility

108.00%

Expected option life in years

4.00

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessary provide a reliable single measure of the fair value of the Company's stock options.

END Schedule B

Schedule C

FORM 51-102F1

ANGLO SWISS RESOURCES INC.

Interim Management's Discussion and Analysis

Period ended June 30, 2004

DATED August 5, 2004

Forward-Looking Information

This interim management discussion and analysis (Interim MD&A) contains forward-looking statements and information relating to Anglo Swiss Resources Inc. (Anglo Swiss or the Company) that are based on the beliefs of its management as well as assumptions made by and information currently available to Anglo Swiss. When used in this document, the words anticipate , believe , estimate , and expect and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements.

This interim MD&A contains forward-looking statements relating to, among other things, regulatory compliance, the sufficiency of current working capital, the estimated cost and availability of funding for the continued exploration and development of Anglo Swiss exploration properties. Many factors could cause the actual results, performance or achievements of Anglo Swiss to be materially different from any future results, performance or achievements be expressed or implied by such forward-looking statements. Important factors are identified in this interim MD&A.

Overall Performance

Anglo Swiss is a mineral exploration company listed on the TSX Venture Exchange as a Tier 2 company. The Company is also inter-listed in the United States on the OTC Bulletin Board and effective February of 2004 on the Berlin Exchange in Germany.

Anglo Swiss current exploration focus is in south-eastern British Columbia as it controls two properties located between Nelson and Castlegar, the Kenville Mine property, looking for precious and base metals; and the Blu Starr property which hosts a variety of gemstones, including sapphire, gem garnet, iolite and other semi-precious gemstones.

Kenville Mine Property

The Kenville Mine is currently in the first year of a three-year option agreement whereby the optionees can earn a 70% interest to the mineral rights (the Company retains 100% of the surface rights and facilities) of the property by expending \$700,000 in exploration and paying the Company \$100,000 by August 29, 2006. The Company has undertaken the construction of two kilometres of road to gain access to a large anomalous zone to prepare for the upcoming exploration program(s) under the option agreement. The optionees are currently preparing a 43-101 Geological Compliant Report, which will provide an excellent geological profile on existing and potential ore bodies and exploration targets.

Blu Starr Property

The Company has acquired 28 mineral claim units in the Nelson Mining District to add to its current gem property in the Slocan/Nelson Mining Districts known as the Blu Starr Gemstone property. The McAllister and Pipe Groups are contiguous and are located to the southeast of the Blu Starr property.

Anglo Swiss is targeting South-eastern British Columbia for its gem potential as its current discoveries of gemstone (sapphire, iolite, garnet) and a large flake-graphite showing are proof that this area has been long over looked for precious gem deposits. The recent discoveries of emerald, sapphire, opal and the emergence of the diamond industry throughout Canada have greatly advanced investor acceptance of the potential of Canadian gemstones.

The Blu Starr Gemstone property is located in the Slocan Valley, South-eastern British Columbia. The property consists of 6200 hectares (15,312 acres) of mineral tenure rights plus an additional 650 hectares (1606 acres) of placer mineral rights contained in 13 placer claims. Exploration to-date on less than 10% of the claim group has yielded dozens of gem outcrops at surface. The Sapphire Hill Zones 1, 2 and 3 from east to west, occur along a strike length of almost 2 kilometres. The property hosts numerous occurrences of sapphire (15), iolite or gem-cordierite (11), gemstone quality garnet (2), as well as a flake graphite deposit; other minerals include aquamarine (beryl), tourmaline, titanite, moonstone and several varieties of quartz crystals.

Previous exploration has confirmed that the geological setting and potential gem grades (carats per tonne) of the numerous showings are extremely promising. A work program for trenching and drilling of the alluvial gravels has been approved the Ministry of Energy and Mines subject to notification of any land owners who may be in proximity to the work. Work is expected to commence in the third quarter of 2004.

Results of Operations - Six Months

The Company's resource property balance including the fixed assets at the Kenville Mine property, capitalized as assets is \$2,819,562 at June 30, 2004 compared to \$2,808,154 at year-end December 31, 2003. Cash resources at June 30, 2004 were \$268,140 plus accounts receivable of \$22,737 compared to cash resources of \$22,165 at year ended December 31, 2003. (GST receivable for December 31, 2003 was \$5,220 and received in the first quarter 2004). The Company has since collected all outstanding private placement funds of \$518,000.

On June 21, 2004 the Company announced a second private placement of up to 6,00,000 units to raise \$600,000. Each unit will consist of one common share and one common share purchase warrant. Each full warrant plus \$0.15 will purchase an additional common share to expire one year from the closing date, anticipated in August. This financing will enable the Company to continue to meet its working capital commitments and expand exploration for gem stones in south-eastern British Columbia.

While the Company has been successful in raising funds in the past, and sourcing partners to advance its properties, there can be no assurance that it will be able to do so in the future. Accordingly, there is some doubt about the ability of the company to continue as a going concern.

Mineral exploration is a speculative venture. There is no certainty that the money spent on exploration and development on either of its two mineral projects will result in any discoveries of commercial bodies of ore. The long-term profitability of Anglo Swiss operations will in part be related to the success of its exploration programs and its partners, which may be affected by a number of external factors that are beyond the Company's control.

The market price of precious/base metals, gemstones and other minerals is volatile and cannot be controlled. The mineral industry is also intensely competitive in all its phases. Anglo Swiss competes with many other mineral exploration companies who may have greater financial resources and experience.

Summary of Quarterly Results (Un-audited)

The following table sets out selected quarterly financial information of Anglo Swiss. Anglo Swiss interim financial statements are prepared by management, in accordance with Canadian generally accepted accounting principles and expressed in Canadian dollars.

Second Quarter 2004

During the second quarter of 2004, the Company announced a private placement of up to 6,00,000 units to raise \$600,000. Each unit will consist of one common share and one common share purchase warrant. Each full warrant plus \$0.15 will purchase an additional common share to expire one year from the closing date, anticipated in August.

Anglo Swiss sustained a loss of \$77,743 during this quarter, which included \$75,822 in general and administrative expenses. This loss was higher than the \$39,456 for the same period in 2003 as the Company has actively begun to promote its potential to the investment community. The recent funding and the resurgence in the mining sector overall, has presented an opportunity to once again advance the Company's two properties. Accordingly, the investor relations/travel promotion expenditures increased to \$25,610 during this quarter (\$2,047 2003) plus office/miscellaneous expenses were higher (\$15,316 2004, / \$2,899 2003), accounted for the increase.

At June 30, 2004 the Company had a working capital deficiency of (\$49,482) even after the recent financing. A

second financing, if substantially completed, will provide the required capital to discharge the current liabilities due to related parties (\$231,439) and provide a positive working capital into the following fiscal year. The Company is carrying \$72,000 for corporate capital tax, which has been repealed in British Columbia; but will continue to carry this charge for the upcoming year(s). The Company believes this amount will sufficient if an assessment is received in the future.

Liquidity

In management's view given the nature of the Company's activities, which consists of the acquisition, exploration, exploration management and purchase of mineral properties, the most meaningful and material financial information concerning the Company relates to its current liquidity and capital resources. The Company currently does not have any producing properties and its current operations on its various properties are in the exploration stages and have not derived any revenues from the sale of gold, gemstones or any other materials in the last three years. Before, during and after the interim quarter ended June 30, 2004, the Company was engaged in continued exploration of its gold property and simultaneously a precious/semi-precious gemstone property, both located in south-eastern British Columbia. As a result, the Company's future mineral exploration and mining activities may be affected in varying degrees by prevailing market prices, political stability and government regulations, the success of existing partners, all of which are beyond the control of the Company.

The Company's mineral exploration activities have been funded through the sales of common shares, and while the Company has also been successful in attracting partners to continue development and exploration of its properties, there is no assurance that these trends will continue indefinitely. The ongoing general and administrative obligations are dependent on financings as well and the Company expects to continue to utilize this source of funding until it develops cash flow from its operations. There can be no assurance, however, that the Company will be able to obtain the required financing in the future on acceptable terms, or at all. Anglo Swiss' ability to continue as a going concern in the future is dependent upon these factors and overall market conditions, which are beyond the Company's control.

At the end of the second quarter of 2004 Anglo Swiss has \$231,439 accrued to two directors of the Company and a law firm that an officer of the Company is a partner in. The private placement of March 2004 reduced the accounts payable from year-end 2003 of \$193,377 to \$109,585 (\$72,000 - corporate capital tax charge). Related parties were owed \$231,439 at the end of June 30, 2004, \$243,351 at year-end 2003.

Overall, cash at the end of the period for June 30, 2004 improved to \$290,877 with current payables of \$31,525. Comparatively, Anglo Swiss had \$27,385 cash at December 31, 2003 with payable of \$93,748; and at June 30, 2003 had cash of \$11,689 and accounts payable of \$22,595.

Capital Resources

At June 30, 2004 Anglo Swiss had paid up capital of \$11,742,585, representing 50,005,688 common shares without par value, and a deficit of \$8,109,053 resulting in shareholder's equity (or net assets) of \$4,136,423 (2003 - \$3,887,771). Anglo Swiss has a working capital deficiency of \$49,482 at June 30, 2004. The Company had a working capital deficiency of \$280,664 at June 30, 2003.

Additional Disclosure for Ventures Without Significant Revenue

Additional disclosure concerning Anglo Swiss' general and administrative expenses and resource property costs is provided in the Company's Consolidated Statement of Loss and deficit and the Consolidated Schedule of resource Property Costs contained in its Interim Consolidated Financial Statements for June 30, 2004 and is available on the Company's website at www.anglo-swiss.com or on its SEDAR page site accessed through www.sedar.com, in the United States through its EDGAR filings accessed at www.sec.gov.

Contractual Obligations

There are no long or short term contractual obligations as of the date of this report.

Transaction with Related Parties

During the second quarter of 2004 the Company incurred consulting fees of \$15,000 by directors or officers or organizations controlled by such parties. Two officers received \$10,000 during the second quarter of 2004, no remuneration was paid in the second quarter of 2003. The Company paid \$5,875 to a law firm in which an officer is a partner of the firm during the second quarter 2004 and carries a payable of \$102,115 to the same firm.

Changes in Accounting Policies

The Company has since adopted the fair value based method of accounting for stock based compensation for all individuals, effective January 1, 2004. Otherwise, the interim consolidated financial statements for the quarter ended June 30, 2004 followed the same accounting policies and methods of application in the most recent annual financial statements.

Financial and Other Instruments

Anglo Swiss's financial instruments consist of cash and short-term deposits, restricted cash, GST receivable and accounts payable. Unless otherwise noted, it is management's opinion that Anglo Swiss is not exposed to significant interest, currency or credit risks arising from the financial instruments. The fair value of these financial instruments approximates their carrying value due to their short-term maturity or capacity of prompt liquidation.

Approval

The Board of Directors of Anglo Swiss has approved the disclosure contained in this interim MD&A. A copy of this interim MD&A will be provided to anyone who requests it, in writing.

Additional Information

Additional information is available at the Company website at www.anglo-swiss.com or on its SEDAR page site accessed through www.sedar.com, in the United States through its EDGAR filings accessed at www.sec.gov.

BY ORDER OF THE BOARD OF DIRECTORS OF

ANGLO SWISS RESOURCES INC.

LEN DANARD

Len Danard, President & CEO

FORM 52-109FTS

CERTIFICATION OF INTERIM FILINGS DURING TRANSITION PERIOD

I, Len Danard, Chief Executive Officer of Anglo Swiss Resources Inc. certify that:

1.

I have reviewed the interim filings (as this term is defined in Multilateral Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings) of Anglo Swiss Resources Inc., (the issuer) for the interim period ended June 30, 2004;

2.

Based on my knowledge, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings; and

3.

Based on my knowledge, the interim financial statements together with the other financial information included in the interim filings fairly present in all material respects the financial condition, results of operations and cash flows of the issuer, as of the date and for the period(s) represented in the interim filings.

Dated: August 5, 2004.
