ASTRAZENECA COMPLETES DIVESTMENT OF RARE DISEASE MEDICINE CAPRELSA

If "Yes" is marked, indicate below the file number assigned to the Registrant in connection with Rule

Edgar Filing: ASTRAZENECA PLC - Form 6-K

AstraZeneca has announced the global completion of the divestment of Caprelsa® (vandetanib), a rare disease medicine, to Genzyme, a Sanofi company.

Genzyme made an upfront payment to AstraZeneca of \$165 million to acquire the global rights to sell and develop Caprelsa, and will make further development and sales milestone payments of up to \$135 million. The transaction does not include the transfer of any AstraZeneca employees or facilities.

The divestment reinforces AstraZeneca's strategic focus on its three main therapy areas. As an asset divestment, the upfront receipt and any subsequent payments for the agreement will be reported in Other Operating Income in the Company's financial statements. The transaction does not impact AstraZeneca's financial guidance for 2015.

About AstraZeneca

AstraZeneca is a global, innovation-driven biopharmaceutical business that focuses on the discovery, development and commercialisation of prescription medicines, primarily for the treatment of cardiovascular, metabolic, respiratory, inflammation, autoimmune, oncology, infection and neuroscience diseases. AstraZeneca operates in over 100 countries and its innovative medicines are used by millions of patients worldwide. For more information please visit: www.astrazeneca.com
