Table of Contents

Table of Contents

We are very pleased to report that Komatsu Ltd. has set new record-high six-month sales and profit with the results for the interim period ended September 30, 2004. This is also the third consecutive improvement in both six-month sales and profit. While our mainstay business of construction and mining equipment made an impressive gain in earnings, our industrial machinery, vehicles and others as well as electronics businesses also increased earnings steadily. As a result, all our business segments recorded growth in both sales and profit.

Interim Results

Consolidated net sales for the interim period under review expanded 20.5% over the corresponding interim period a year ago, to ¥683.9 billion (US\$6,218 million, at US\$1=¥110). In the construction and mining equipment business, we accelerated sales by capitalizing on buoyant demand in the world's largest market of North America and our stronghold markets of Southeast Asia, the Middle East and CIS (Commonwealth of Independent States: former Soviet Republics). In the industrial machinery, vehicles and others business, Komatsu Forklift Co., Ltd., Komatsu Zenoah Co., Komatsu Industries Corporation, Komatsu Machinery Corporation and other subsidiaries advanced interim sales by stepping up sales of products with original features, coupled with growth in market demand in Japan and overseas. In the electronics business, we focused our efforts to improve product competitiveness, and reflecting good conditions of the semiconductor market, Komatsu Electronic Metals Co., Ltd. led and increased interim sales of our electronics business.

Operating profit* climbed 63.5% to ¥46.1 billion (US\$420 million) for the interim period. This substantial growth reflects an increase in sales, centering on the construction and mining equipment business, coupled with an effective market introduction of new products by each business. It is also attributable to our Groupwide efforts since 2001 to build up a high-profit business structure by promoting the Reform of Business Structure project.

* Operating profit on a consolidated basis is the sum of segment profit. In conformity with generally accepted accounting principles of Japan, it is obtained by deducting cost of sales and SG&A expenses from sales.

Table of Contents

Board of Directors

Back row, from left: Yasuo Suzuki, Kazuhiro Aoyagi, Hajime Sasaki, Toshio Morikawa, Kunihiko Komiyama, Masahiro Yoneyama

Front row, from left: Satoru Anzaki, Toshitaka Hagiwara, Masahiro Sakane, Kunio Noji

Pre-tax income slightly more than doubled to ¥48.2 billion (US\$438 million) and net income for the interim period roughly tripled to ¥26.0 billion (US\$237 million), reflecting non-operating profit from the sale of land of the former Kawasaki Plant in addition to the outstanding improvement of operating profit.

On a nonconsolidated basis, supported largely by a sizable advance of export sales during the period under review, sales advanced 28.9% over the corresponding interim period a year ago, to ¥246.0 billion (US\$2,236 million), ordinary profit, up 80.0% to ¥17.9 billion (US\$163 million) and net income for the interim period, showing an increase of 60.3% to ¥8.4 billion (US\$77 million). With these improvements, we recorded growth in both sales and profit for two consecutive interim periods.

Interim Dividends

Komatsu maintains the basic policy of redistributing profits by taking payout ratios into account and linking returns more directly with business results, while ensuring sufficient internal reserves for reinvestment. Based on this policy, at the Board meeting held on November 4, we made a resolution to increase the interim dividends per share for the interim period by ¥2 over the corresponding period a year ago, to ¥5.

Table of Contents**Outlook**

Under the mid-range management plan *Move The World, KOMATSU 5-800* with the target fiscal year ending March 31, 2006, we are placing our utmost efforts to build up a high-profit structure by promoting the following five management tasks: 1) To accelerate the implementation of the Growth Strategy for the Construction and Mining Equipment business; 2) To build up the *Spirit of Manufacturers* strength and technological competitiveness; 3) To facilitate selective focus on the criteria of technological advantage and profitability; 4) To reinforce our competitive foundation including financial position; and 5) To further strengthen corporate governance.

Management Goals of *Move The World,*
KOMATSU 5-800

	<u>Fiscal 2006</u>
Consolidated sales	1,250 billion yen
Operating profit	80 billion yen
Return on assets (ROA)	5.0%
Net D/E ratio	1 or under

Foreign exchange preconditions: 1USD=¥110 1EUR=¥125

The market for construction and mining equipment is expanding more than anticipated. To achieve the goals of our mid-range management plan one year in advance, we are proactively and decisively taking on the challenge of an even better performance in each business with which we engage.

With respect to construction and mining equipment, we are reinforcing our business in *Greater Asia*, in a broader sense of the term, which includes the Middle East and CIS in addition to Japan, China and other Asian countries. We believe this region could grow into the central market for construction and mining equipment in the future, and thus we are strengthening our product competitiveness and customer support capabilities to make our Number One position stronger.

Although the Chinese market for construction and mining equipment is shrinking quite substantially due to the effects of the Chinese government's credit squeeze and other measures, we expect it will grow into a prominent market over the long term. We are continuing our efforts to build on our business foundation particularly by expanding our product line-up, strengthening our distributors and training more personnel.

Concerning our production, we will work to enhance our capability with additional investments at plants in Japan and abroad and through the standardization of the production load among plants. We are also going to make additional investments for key components which are the source of our product competitiveness and are mainly produced in Japan, such as engines, hydraulic equipment and final gears.

Table of Contents

Since last year we have been launching DANTOTSU (unique and unrivaled) products which feature outstanding advantages and substantial reduction in production costs. In 2005, we will further broaden our line-up of these products. These products will be powered by our own diesel engines which meet Tier III emission controls for construction and mining equipment, as these requirements will become effective starting with North America and Europe in 2006.

Also in the industrial machinery, vehicles and others business which includes forklift trucks, machine tools, sheet-metal machines and forging presses and agricultural and forestry machines, we are striving to offer products, services and systems which precisely capture the needs of customers by drawing on our technological and manufacturing strengths. We are also going to take aggressive initiatives to drive sales and service operations in China and other overseas markets in order to further improve our performance.

In the electronics business, we will work to expand our production capacity, while focusing on product development and quality improvement of the next-generation, mainstay 300mm silicon wafers. We will also continue our efforts to reduce costs steadily and improve performance.

We are going to further strengthen our corporate governance to maximize the corporate value of Komatsu and make Komatsu a company that will enjoy a greater trust of shareholders and all other stakeholders. While promoting thorough observance of corporate ethics among all employees, ensuring the soundness of management and improving management efficiency in the entire Komatsu Group, we are also going to seriously engage in environmental conservation and safety management.

Moreover, we are going to enhance the reliability of management by strengthening our internal control system which also covers other Komatsu Group companies. We will also promote thorough compliance by ensuring that top management officers and all employees of the Komatsu Group abide by not only laws and regulations but also Komatsu's Code of Worldwide Business Conduct.

On behalf of the members of the Board, we would like to extend our sincere appreciation to our valued shareholders, customers, and employees around the world for their support.

December 2004

Toshitaka Hagiwara
Chairman of the Board

Masahiro Sakane
President and CEO

Table of Contents

Construction and Mining Equipment

Consolidated net sales of construction and mining equipment for the period under review expanded 24.1% over the previous interim period a year ago, to ¥507.4 billion (US\$4,613 million). Supported by accelerated overseas sales of ¥379.1 billion (US\$3,447 million) for the interim period, up 30.9%, Komatsu has set the new record-high 6-month sales.

Japan

While private-sector construction investments in Japan showed signs of recovery, construction investments as a whole remained sluggish during the period under review. However, thriving overseas demand for used Japanese equipment advanced their exports, which resulted in growing demand for renewals of equipment in Japan centering on hydraulic excavators, and increased demand for new equipment for the interim period over the corresponding period a year ago.

Komatsu worked to not only expand sales of new equipment but also reduce production costs and improve sales prices in response to sharply higher prices for steel and other raw materials. With respect to the rental and used equipment-coordinated business, Komatsu promoted IT-based standardization of management and business operations of affiliated companies to strengthen the rental business and improve earnings. At the same time, Komatsu also worked to expand its used equipment business mainly through Komatsu Used Equipment Corp. Reflecting these efforts above, sales in Japan increased over the previous interim period.

The Americas

Against the backdrop of expanded demand for mining equipment in the region and construction equipment in North America, Komatsu accelerated sales in the Americas.

In North America, Komatsu America Corp. engaged in aggressive sales activities for utility equipment such as mini excavators and skid steer loaders in addition to hydraulic excavators and articulated dump trucks. Komatsu, under the leadership of Komatsu America Corp., stepped up sales of mining equipment, centering on off-highway dump trucks. Also in the mining equipment business, Komatsu has been developing technologies for an autonomous hauling system and will begin field tests of the new system soon. As such a system is expected to reduce manpower for mining operations and enjoy demand in the areas where drivers are difficult to secure, Komatsu is working to commercialize it in the near future.

In Central and South Americas, sales of mining equipment, in particular, were strong. Komatsu positioned Komatsu Latin-America Corp. to be in charge of sales and service operations in these regions, and reinforced its sales and service capabilities.

PC300LC hydraulic excavator and HM300 articulated dump truck in operation

Table of Contents

Europe and CIS**

In Europe where demand for construction equipment remained strong, Komatsu introduced over 20 new models including hydraulic excavators made by Komatsu UK Ltd., wheel loaders by Komatsu Hanomag GmbH, and telescopic handlers and mini excavators by Komatsu Utility Europe S.p.A. during the interim period. Komatsu Europe International N.V. led aggressive sales of these new products and Komatsu Forest AB made full-scale entry to the forestry equipment market. As a result, sales in Europe expanded substantially over the previous interim period.

Interim sales in the CIS were also boosted over the previous interim period a year ago. Komatsu began shipments of over 200 units of equipment such as pipelayers and hydraulic excavators to build and repair natural gas pipelines in Turkmenistan during the interim period, while capturing expanded demand for mining equipment in Russia and Central Asian countries. As this business with the government of Turkmenistan is based on a long-term supply agreement which extends to 2010, Komatsu should continue to receive large lot orders. Komatsu has already opened a local office and is planning to open a training center. In addition, Komatsu improved its customer support capabilities for mining equipment, while reinforcing distributors in response to expanding demand for construction equipment for use in large metropolitan cities such as Moscow.

** Starting in the interim period under review, Komatsu changed the title of this section from Europe to Europe and CIS.

China

The construction equipment market in China, which had previously sustained double-digit growth rates against the thriving economy, slowed sharply in May and thereafter, adversely affected by the Chinese government's credit squeeze measures and consolidation of industrial parks. As a result, Komatsu's interim sales in China declined considerably from the corresponding interim period a year ago.

As prompt countermeasures for this market change, Komatsu worked to adjust its inventories to an appropriate level by controlling production of local plants while facilitating fixed cost reduction. Komatsu also conducted all-inclusive management of credits to secure profits.

Komatsu anticipates China will grow into a huge market in the future. While striving to sustain sales prices and conditions from a long-range perspective, Komatsu is strengthening its business foundation through reinforcement of distributors, personnel development and product line-ups.

Asia & Oceania and the Middle East & Africa

In addition to expanded demand for mining equipment in Asia and Oceania, demand for construction equipment, particularly medium-size hydraulic excavators, advanced substantially in Southeast Asia during the period under review. By teaming up sales and service personnel, Komatsu conducted aggressive sales activities targeting mining customers, and accelerated sales during the period. In Southeast Asia, Komatsu doubled interim sales from the corresponding period last year. In Indonesia, Komatsu won large-lot orders for mining equipment centering on large dump trucks for use in coal mines during the period.

In the Middle East, demand for construction equipment expanded substantially in oil producing countries against the backdrop of growing crude prices, and increased steadily in Turkey, whose economy has recovered. Komatsu further reinforced local sales and service capabilities including additional manpower, and boosted sales over the previous interim period. In Africa, Komatsu increased sales of mining equipment in particular.

Table of Contents

Industrial Machinery, Vehicles and Others

Consolidated net sales of industrial machinery, vehicles and other operations improved 6.8% over the previous interim period last year, to ¥123.2 billion (US\$1,120 million).

Komatsu Forklift Co., Ltd. capitalized on expanded demand in Japan and abroad and continued to improve both sales and profits, following the corresponding interim period a year ago. In Japan, Komatsu Forklift carried out aggressive sales and service activities particularly for the well-received LEO-NXT series engine-driven forklift trucks, and worked to increase sales prices. With respect to overseas sales, the company's U.S. subsidiary sustained strong sales, while export sales from Japan to the Middle East and Russia advanced during the interim period. In China, the company established Komatsu Forklift Manufacturing (China) Co., Ltd. to produce small-class engine-driven forklift trucks, anticipating further growth of the market.

Komatsu Industries Corporation improved both sales and profits for the period from the corresponding period last year, reflecting recovered private-sector investments. Sales of products with unique features were especially strong, such as the Hybrid AC Servo Press series and twister fine plasma cutting machines. Revenues from services also improved.

Komatsu Industries at the Japan International Machine 2004

Komatsu Machinery Corporation, which had improved its business results markedly for the last 6-month period, continued to further build on its earnings for the period under review. Supported by robust capital outlays by automobile manufacturers, interim sales of machine tools, such as crankshaft and camshaft millers, excelled. Sales of LCD (liquid crystal display) manufacturing-related equipment also accelerated.

Komatsu Zenoah Co. continued to improve sales of agricultural and forestry equipment in Japan and overseas for the interim period and renewed the record-high interim sales of these products. This improvement was contributed by excellent sales of the G3200EZ chainsaw with a unique mechanism for easy tightening of the saw and brush-cutters with new models in Japan as well as new blowers and other products overseas.

Komatsu Zenoah's blowers in use at a baseball park

Table of Contents

Electronics

Consolidated sales from the electronics business for the interim period under review expanded 23.0% over the corresponding interim period a year ago, to ¥53.2 billion (US\$484 million).

Komatsu Electronic Metals Co., Ltd. kept each plant running at a high level of production against the backdrop of robust demand for silicon wafers during the period. The company made its mainstay 200mm and discrete silicon wafers more competitive, meeting customers' super-high quality requirements, introduced the wafers on the market, and focused efforts on sales activities. With respect to the next-generation 300mm wafers, the company expanded its production capacity ahead of the initial plan in light of rapid growth in demand, and set up a monthly production capability of 45,000 pieces in July this year. Furthermore, the company has already initiated preparatory work for monthly production of 75,000 pieces in the first half period of next fiscal year. Formosa Komatsu Silicon Corporation, a subsidiary of the company in Taiwan, carried out customer-specific production and sales activities in Taiwan and other regions and expanded sales of high value-added products including annealed wafers. As a result, consolidated results of Komatsu Electronic Metals made an impressive gain from the previous interim period.

Advanced Silicon Materials LLC (ASiMI) accelerated interim sales over the corresponding period a year ago, supported by buoyant demand for monosilane gas and polycrystalline silicon. ASiMI also registered profits for the interim period, thanks to improved balance sheets reflecting impairment losses on fixed assets recorded for the last six-month period and earlier.

Komatsu Electronics, Inc. boosted sales of semiconductor manufacturing-related equipment for the interim period, as semiconductor manufacturers sustained aggressive investments in facilities. Sales of thermoelectric modules for use in fiber optic communication networks also increased from the corresponding interim period a year ago. As a result, the company improved interim results substantially from the corresponding period last year.

Table of Contents

Komatsu at the MINExpo 2004

MINExpo International 2004, the world's largest tradeshow for mining-related equipment, was held in Las Vegas, U.S.A. in September. Reflecting the buoyant demand for equipment around the world, Komatsu's booth attracted many customers and other visitors. At this tradeshow, Komatsu entered into the Preferred Supplier Contract with Rio Tinto, a world-leading company of the mining industry. Under this contract, Komatsu is going to preferentially supply large dump trucks and other equipment to Rio Tinto's mines around the world for the next five years.

Komatsu Wins A Large-Lot Order for Mining Equipment

Komatsu has received a large-lot order for some 600 units of large dump trucks, hydraulic excavators, bulldozers and other mining equipment from a leading Indonesian coal mining company. By capitalizing on its advantages as a full-line manufacturer and reinforcing its customer support capabilities as priority initiatives, Komatsu is working to accelerate sales.

Komatsu Industries Develops the World's Largest Class Modular Servo Press

Komatsu Industries Corporation, a wholly owned subsidiary, has developed a new modular Servo press line with the world's largest class capacity of 4,200 tons. Consisting of AC Servo press modules, this modular press line features superior productivity and formability. Komatsu Industries is preparing for mass production of AC Servo press modules by anticipating future growth in demand from automobile manufacturers.

Collaboration Agreement Signed with Yokohama National University

In October 2004, Komatsu signed a collaboration agreement with Yokohama National University (President: Dr. Yoshihiro Iida, left in the photo), which covers a comprehensive range of subjects including research and development, joint research and advisory activities. Komatsu is

also looking into the possibility of collaboration with social science faculties such as business administration.

Table of Contents

Awarded by the Security Analysts Association of Japan

In October, Komatsu received the Award for Excellence in Corporate Disclosure for 2004 from the Security Analysts Association of Japan, and was ranked as the best disclosure company in the machinery sector. Following 2001, it is the fifth time for Komatsu to receive this award for its continued efforts in information disclosure on a regular basis.

Environmental & Social Report 2004 Issued

In August, Komatsu issued the Environmental & Social Report. In addition to environmental conservation efforts, this new Report, replacing the previous Environmental Report, contains new information concerning a variety of its efforts to enhance the Quality and Reliability of products, business operations, employees and other aspects of corporate management as well as social responsibility-related matters including compliance, safety and health. Komatsu regards the fulfillment of social responsibilities and commitment to environmental conservation as one of top management priorities.

All Komatsu Technology Olympics Held

In October, Komatsu held the 27th All Komatsu Technology Olympics at the Awazu Plant (Komatsu City) and Osaka Plant (Hirakata City). This year's competition was participated in by 89 contestants, including 13 from suppliers and 18 from overseas subsidiaries, who competed with their technical skills in six categories such as machining, welding and parts inspection. To further improve its technical skills on global and Groupwide bases, Komatsu has designated the third Saturday of October as the Day of Komatsu Group's Technical Skills and is going to hold this event annually.

Ayumi Wins Gold Medal at the Athens 2004 Olympic Games

Ayumi Tanimoto of Komatsu Women's Judo Club won the Gold Medal in the 63kg category at the Athens 2004 Olympic Games in August. She won all her matches by Ippon in the preliminaries all the way through the finals, marking an outstanding record of wins.

This was the first time for both Komatsu Women's Judo Club and Ayumi herself to even participate in Olympic Games, not to mention winning the Gold.

Thank you all very much for your support.

Cautionary Statement

This Semi-Annual Report contains forward-looking statements that reflect management's views and assumptions in the light of information currently available with respect to certain future events, including expected financial position, operating results and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects, plans, expects and similar terms and expressions to identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Any forward-looking statements speak only as of the date of this Semi-Annual Report, and Komatsu assumes no duty to update such statements. Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated costs or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new information technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; the impact of regulatory changes and accounting principles and practices; and the introduction, success and timing of business initiatives and strategies.
