Registration No. 333-72374

PROSPECTUS SUPPLEMENT

(To prospectus dated May 31, 2002)

\$5,361,000

Wachovia Corporation

7% Trigger CAPITALSSM

(Covered Asset Participation Target exchangeable Securities)

Linked to the Common Stock of Nabors Industries Ltd.

due April 25, 2006

| | |
|-------------------------|---|
| Issuer: | Wachovia Corporation |
| Principal Amount: | Each note will have a principal amount of \$1,000. Each note will be offered at an original public offering price of \$1,000. |
| Maturity Date: | April 25, 2006. |
| Interest: | 7% per annum, payable quarterly |
| Interest Payment Dates: | January 25, April 25, July 25 and October 25, beginning on July 25, 2005 |
| Record Dates: | For the interest payment dates specified above, January 10, April 10, July 10 and October 10. Interest will accrue from and including the settlement date to but excluding the maturity date. |
| Underlying Stock: | Nabors Industries Ltd. common stock. Nabors Industries Ltd. has no obligations relating to, and does not sponsor or endorse, the notes. |
| Payment at Maturity: | On the maturity date, you will receive the principal amount of your notes, plus any accrued but unpaid interest, unless: (a) a trigger event has occurred; and (b) the final stock price multiplied by the share multiplier is less than the initial stock price. If the conditions described in (a) and (b) both occur, at maturity you will receive a payment per note equal to the following: |

$$\$1,000 \times \left(\frac{\text{final stock price} \times \text{share multiplier}}{\text{initial stock price}} \right),$$

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

initial stock price

plus any accrued but unpaid interest.

If a trigger event has occurred and the final stock price multiplied by the share multiplier is less than the initial stock price, you will lose some or all of your principal. If the final stock price is \$0, the maturity payment amount will be \$0 (but you will still receive any accrued but unpaid interest).

A trigger event will occur if the market price of the Underlying Stock multiplied by the share multiplier at any time on any business day, from the first business day following the pricing date to and including the valuation date, is less than or equal to the trigger price. The trigger price will equal \$38.97, a price that is 30% below the initial stock price.

Listing: The notes have been approved for listing on the American Stock Exchange under the symbol WDB.J .
Pricing Date: April 18, 2005
Expected Settlement Date: April 25, 2005
CUSIP Number: 92976WAQ9

For a detailed description of the terms of the notes, see Summary Information beginning on page S-1 and Specific Terms of the Notes beginning on page S-10.

Investing in the notes involves risks. See Risk Factors beginning on page S-6.

| | <u>Per Note</u> | <u>Total</u> |
|--------------------------------------|-----------------|-----------------|
| Public Offering Price | 100.00% | \$ 5,361,000.00 |
| Underwriting Discount and Commission | 1.75% | \$ 93,817.50 |
| Proceeds to Wachovia Corporation. | 98.25% | \$ 5,267,182.50 |

The notes solely represent senior, unsecured debt obligations of Wachovia and are not the obligation of, or guaranteed by, any other entity. The notes are not deposits or accounts and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

Wachovia may use this prospectus supplement in the initial sale of the notes. In addition, Wachovia Capital Markets, LLC or any other broker-dealer affiliate of Wachovia may use this prospectus supplement in a market-making or other transaction in any note after its initial sale. *Unless Wachovia or its agent informs the purchaser otherwise in the confirmation of sale, this prospectus supplement is being used in a market-making transaction.*

Wachovia Securities

The date of this prospectus supplement is April 18, 2005.

Unless otherwise indicated, you may rely on the information contained in this prospectus supplement and the accompanying prospectus. Neither we nor the underwriter has authorized anyone to provide information different from that contained in this prospectus supplement and the accompanying prospectus. When you make a decision about whether to invest in the notes, you should not rely upon any information other than the information in this prospectus supplement and the accompanying prospectus. Neither the delivery of this prospectus supplement nor sale of the notes means that information contained in this prospectus supplement or the accompanying prospectus is correct after their respective dates. This prospectus supplement and the accompanying prospectus are not an offer to sell or solicitation of an offer to buy the notes in any circumstances under which the offer of solicitation is unlawful.

Table of Contents

SUMMARY INFORMATION

This summary includes questions and answers that highlight selected information from this prospectus supplement and the accompanying prospectus to help you understand the 7% *Trigger CAPITALS*SM (Covered Asset Participation Target Exchangeable Securities) Linked to the Common Stock of Nabors Industries Ltd. due April 25, 2006 (the notes). You should carefully read this prospectus supplement and the accompanying prospectus to fully understand the terms of the notes as well as the tax and other considerations that are important to you in making a decision about whether to invest in the notes. You should carefully review the section **Risk Factors** in this prospectus supplement and the accompanying prospectus, which highlights certain risks associated with an investment in the notes, to determine whether an investment in the notes is appropriate for you.

Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus supplement to Wachovia, we, us and our or similar references mean Wachovia Corporation and its subsidiaries. Unless otherwise mentioned or unless the context requires otherwise, all references to WBNA mean Wachovia Bank, National Association. Wachovia Capital Markets, LLC is an indirect, wholly owned subsidiary of Wachovia Corporation. Wachovia Corporation conducts its investment banking, capital markets and retail brokerage activities through its various broker-dealer, bank and non-bank subsidiaries, including Wachovia Capital Markets, LLC, under the trade name Wachovia Securities. Any reference to Wachovia Securities in this prospectus supplement does not, however, refer to Wachovia Securities, LLC, member of the New York Stock Exchange and the Securities Investor Protection Corporation or Wachovia Securities Financial Network, LLC, member of the National Association of Securities Dealers, Inc. and the Securities Investor Protection Corporation, broker-dealer affiliates of Wachovia Corporation and Wachovia Capital Markets, LLC. All references to this prospectus supplement mean the pricing supplement contemplated in the accompanying prospectus.

What are the notes?

The notes offered by this prospectus supplement will be issued by Wachovia and will mature on April 25, 2006, a date that is one year following the settlement date. The return on the notes will depend on whether a trigger event occurs during the term of the notes and whether the final stock price multiplied by the share multiplier is less than the initial stock price.

As discussed in the accompanying prospectus, the notes are debt securities and are part of a series of debt securities entitled **Medium-Term Notes, Series E** that Wachovia may issue from time to time. The notes will rank equally with all other unsecured and unsubordinated debt of Wachovia. For more details, see **Specific Terms of the Notes** beginning on page S-10.

Each note will have a principal amount of \$1,000. Each note will be offered at an original public offering price equal to \$1,000. You may transfer only whole notes. Wachovia will issue the notes in the form of a global certificate, which will be held by The Depository Trust Company, also known as DTC, or its nominee. Direct and indirect participants in DTC will record your ownership of the notes.

Will I receive interest on the notes?

The notes will bear interest at 7% per annum payable on each of January 25, April 25, July 25 and October 25, beginning on July 25, 2005. Interest will accrue from and including the settlement date to but excluding the maturity date. The interest rate on the notes is higher than the current dividend rate of the Underlying Stock.

Table of Contents

What will I receive upon maturity of the notes?

At maturity, for each note you own, you will receive a cash payment equal to the maturity payment amount, plus any accrued but unpaid interest. The maturity payment amount to which you will be entitled will equal the principal amount of your notes unless:

- (a) a trigger event has occurred; and
- (b) the final stock price multiplied by the share multiplier is less than the initial stock price.

If the conditions described in (a) and (b) both occur, at maturity you will receive a payment per note equal to the following:

$$\$1,000 \times \left(\frac{\text{final stock price} \times \text{share multiplier}}{\text{initial stock price}} \right),$$

plus any accrued but unpaid interest.

If a trigger event has occurred and the final stock price multiplied by the share multiplier is less than the initial stock price, you will lose some or all of your principal. If the final stock price is \$0, the maturity payment amount per note will equal \$0 (but you will still receive any accrued but unpaid interest).

The initial stock price is \$55.6752, the average price per share of the Underlying Stock that any affiliate of Wachovia has paid to hedge Wachovia's obligations under the notes on April 18, 2005.

The final stock price will be determined by the calculation agent and will equal the average price per share of the Underlying Stock that any affiliate of Wachovia receives to unwind the hedge of Wachovia's obligations under the notes on the valuation date.

The share multiplier is 1.0, subject to adjustment for certain corporate events relating to the Underlying Stock Issuer described in this prospectus supplement under Specific Terms of the Notes Antidilution Adjustments.

A trigger event will occur if the market price of the Underlying Stock multiplied by the share multiplier at any time on any business day, from April 19, 2005 to and including the valuation date, is less than or equal to the trigger price.

The trigger price will equal \$38.97, a price that is 30% below the initial stock price.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The valuation date means the fifth business day prior to the maturity date. However, if that day occurs on a day that is not a business day or on a day on which the calculation agent has determined that a market disruption event has occurred or is continuing, the valuation date will be postponed until the next succeeding business day on which the calculation agent determines that a market disruption event does not occur and is not continuing. *If the valuation date is postponed, then the maturity date of the notes will be postponed by an equal number of business days.*

If a trigger event has occurred and the final stock price multiplied by the share multiplier is less than the initial stock price, you will lose some or all of your principal.

S-2

Table of Contents

Hypothetical Examples

Set forth below are four hypothetical examples of the calculation of the maturity payment amount (which do not consider any accrued but unpaid interest). Interest will be paid quarterly regardless of whether a trigger event occurs.

Initial stock price: \$55.6752

Trigger price: \$38.97

Share multiplier: 1.0

Example 1 The hypothetical final stock price is equal to 50% of the initial stock price and a trigger event *has* occurred:

Hypothetical final stock price: \$27.8376

$$\text{Maturity payment amount (per note)} = \$1,000 \times \left(\frac{\$27.8376 \times 1.0}{\$55.6752} \right) = \$500$$

Since the hypothetical final stock price multiplied by the share multiplier is *less* than the initial stock price and a trigger event *has* occurred, the maturity payment amount will be less than the principal amount of your note and you will lose some of your principal. Your total cash payment at maturity would be \$500 per note, representing a 50% loss of the principal amount of your note.

Example 2 The hypothetical final stock price is equal to 85% of the initial stock price and a trigger event *has* occurred:

Hypothetical final stock price: \$47.3239

$$\text{Maturity payment amount (per note)} = \$1,000 \times \left(\frac{\$47.3239 \times 1.0}{\$55.6752} \right) = \$850$$

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Since the hypothetical final stock price multiplied by the share multiplier is *less* than the initial stock price and a trigger event *has* occurred, the maturity payment amount will be less than the principal amount of your note and you will lose some of your principal. Your total cash payment at maturity would be \$850 per note, representing a 15% loss of the principal amount of your note.

Example 3 The hypothetical final stock price is equal to 85% of the initial stock price but a trigger event *has not* occurred:

Hypothetical final stock price: \$47.3239

Maturity payment amount (per note) = \$1,000

Since a trigger event *has not* occurred, your principal would be protected even though the hypothetical final stock price multiplied by the share multiplier is *less* than the initial stock price . Your total cash payment at maturity would be \$1,000 per note, representing the principal amount of your note.

Example 4 The hypothetical final stock price is equal to 150% of the initial stock price, whether a trigger event has occurred or not:

Hypothetical final stock price: \$83.5128

Maturity payment amount (per note) = \$1,000

S-3

Table of Contents

Since the hypothetical final stock price multiplied by the share multiplier is *greater* than the initial stock price, regardless of whether a trigger event has occurred, the maturity payment amount will be equal to the principal amount of your note. Your total cash payment at maturity would be \$1,000 per note, representing the principal amount of your note. Your total return on your note will not reflect the increase in the market price of the underlying stock during the term of the notes.

Who should or should not consider an investment in the notes?

We have designed the notes for investors who want to receive a quarterly interest payment of 7% per annum and who are willing to make an investment that is contingently exposed to the full downside performance risk of the Underlying Stock and the potential loss of some or all of their principal.

The notes are not designed for, and may not be a suitable investment for, investors who are unwilling to make an investment that is exposed (or contingently exposed) to the full downside performance risk of the Underlying Stock. The notes are also not designed for, and may not be a suitable investment for, investors who seek the full upside appreciation in the market price of the Underlying Stock. This may not be a suitable investment for investors who prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings, or who are unable or unwilling to hold the notes to maturity.

What will I receive if I sell the notes prior to maturity?

The market value of the notes may fluctuate between the date you purchase them and the maturity of the notes. Several factors and their interrelationship will influence the market value of the notes, including the market price of the Underlying Stock, dividend yields on the Underlying Stock, the time remaining to maturity of the notes, interest and yield rates in the market and the volatility of the market price of the Underlying Stock. The notes are 100% principal protected only if held to maturity and if no trigger event occurs during the term of the notes. If you sell your notes prior to maturity, you may have to sell them at a discount and you will not have contingent principal protection. Depending on the impact of these factors, you may receive less than the principal amount in any sale of your notes before the maturity date of the notes and less than what you would have received had you held the notes until maturity. For more details, see **Risk Factors**. Many factors affect the market value of the notes.

Who is Nabors Industries Ltd.?

Nabors Industries Ltd. (the Underlying Stock Issuer) has disclosed that it is a land drilling contractor that conducts oil, gas and geothermal land drilling operations in the United States, Canada, South and Central America, the Middle East, the Far East and Africa. You should independently investigate the Underlying Stock Issuer and decide whether an investment in the notes linked to the Underlying Stock is appropriate for you.

Because the Underlying Stock is registered under the Securities Exchange Act of 1934, as amended (the Exchange Act), the Underlying Stock Issuer is required to file periodically certain financial and other information specified by the Securities and Exchange Commission (the SEC). Information provided to or filed with the SEC by the Underlying Stock Issuer can be located by reference to SEC file number 000-49887 and inspected at the SEC's public reference facilities or accessed over the Internet through the SEC's website. The address of the SEC's website is <http://www.sec.gov>. In addition, information regarding the Underlying Stock may be obtained from other sources including, but not limited to, press releases, newspaper articles and

Table of Contents

other publicly disseminated information. We make no representation or warranty as to the accuracy or completeness of any such information. For further information, please see the section entitled "The Underlying Stock" "The Underlying Stock Issuer" in this prospectus supplement.

What is the Underlying Stock Issuer's role in the notes?

The Underlying Stock Issuer has no obligations relating to the notes or amounts to be paid to you, including no obligation to take the needs of Wachovia or of holders of the notes into consideration for any reason. The Underlying Stock Issuer will not receive any of the proceeds of the offering of the notes, is not responsible for, and has not participated in, the offering of the notes and is not responsible for, and will not participate in, the determination or calculation of the maturity payment amount. Wachovia is not affiliated with the Underlying Stock Issuer.

How has the Underlying Stock performed historically?

You can find a table with the high, low and closing prices per share of the Underlying Stock during each calendar quarter from calendar year 2002 to the present in the section entitled "The Underlying Stock" "Historical Data" in this prospectus supplement. We have provided this historical information to help you evaluate the behavior of the Underlying Stock in the recent past; however, past performance of the Underlying Stock is not indicative of how it will perform in the future.

What about taxes?

The United States federal income tax consequences of your investment in the notes are complex and uncertain. By purchasing a note, you and Wachovia hereby agree, in the absence of administrative or judicial ruling to the contrary, to characterize a note for all tax purposes as an investment unit consisting of a non-contingent debt instrument and payments for a put option. Under this characterization of the notes, you should be required to treat a portion of the payments on the note as an interest payment, and the remainder of the payments as amounts paid to you in respect of the put option. In the opinion of our counsel, Sullivan & Cromwell LLP, it is reasonable to treat the notes as described above, but it would also be reasonable to treat the notes as a single debt instrument subject to the special tax rules governing contingent debt instruments. **Because of this uncertainty, we urge you to consult your tax advisor as to the tax consequences of your investment in the Notes.** For a further discussion, see "Supplemental Tax Considerations" beginning on page S-20.

Will the notes be listed on a stock exchange?

The notes have been approved for listing on the American Stock Exchange under the symbol "WDB.J". You should be aware that the listing of the notes on the American Stock Exchange will not necessarily ensure that a liquid trading market will develop for the notes. Accordingly, if you sell your notes prior to maturity, you may have to sell them at a substantial loss. You should review the section entitled "Risk Factors" "There may not be an active trading market for the notes" in this prospectus supplement.

Are there any risks associated with my investment?

Yes, an investment in the notes is subject to significant risks, including the risk of loss of some or all of your principal. We urge you to read the detailed explanation of risks in **Risk Factors** beginning on page S-6.

How to reach us

You may get information about the notes by calling 1-888-215-4145 or 1-212-909-0038 and asking for Equity Structured Products.

S-5

Table of Contents

RISK FACTORS

An investment in the notes is subject to the risks described below, as well as the risks described under Risk Factors Risks Related to Indexed Notes in the accompanying prospectus. Your notes are a riskier investment than ordinary debt securities. Also, your notes are not equivalent to investing directly in the Underlying Stock to which your notes are linked. You should carefully consider whether the notes are suited to your particular circumstances.

Your investment may result in a loss of some or all of your principal

We will not repay you a fixed amount of principal on the notes at maturity. With an investment in the notes, you bear the risk of losing some or all of your principal if a trigger event occurs during the term of the notes and the final stock price multiplied by the share multiplier is less than the initial stock price. Under these circumstances, the amount of cash you receive at maturity will equal the product of the principal amount of the note and the quotient of: (i) the product of the final stock price and the share multiplier; and (ii) the initial stock price. ***Accordingly, if a trigger event has occurred during the term of the notes and the market price of the Underlying Stock has declined over the term of the notes (i.e., the final stock price multiplied by the share multiplier is less than the initial stock price), you will lose some or all of the principal amount of your notes. Your principal protection is contingent and, therefore, your principal will be protected only if a trigger event never occurs during the term of the notes and you hold your notes until maturity. Even if a trigger event occurs during the term of the notes, you will receive a full return of the principal amount of your notes at maturity if the final stock price multiplied by the share multiplier is greater than or equal to the initial stock price.***

Your yield may be lower than the yield on a standard debt security of comparable maturity

The yield that you will receive on your notes, which could be negative if a trigger event occurs, may be less than the return you could earn on other investments. Even if your yield is positive, your yield may be less than the yield you would earn if you bought a standard senior non-callable debt security of Wachovia with the same maturity date. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money. Unlike standard senior non-callable debt securities, the notes do not guarantee the return of a principal amount at maturity.

Owning the notes is not the same as owning the Underlying Stock

Your return will not reflect the return you would realize if you actually owned and held the Underlying Stock for a similar period because the maturity payment amount will never exceed the principal amount of the notes and will be determined without taking into consideration the value of any dividends that may be paid on the Underlying Stock. In addition, you will not receive any dividend payments or other distributions on the Underlying Stock, and as a holder of the notes, you will not have voting rights or any other rights that holders of the Underlying Stock may have. If the return on the Underlying Stock over the term of the notes exceeds the principal amount of the notes and the interest payments you receive, your return on the notes at maturity will be less than the return on a direct investment in the Underlying Stock without taking into account taxes and other costs related to such a direct investment. Even if the market price of the Underlying Stock increases above the initial stock price during the term of the notes, the market value of the notes may not increase by the same amount. It is also possible for the market price of the Underlying Stock to increase while the market value of the notes declines.

There may not be an active trading market for the notes

The notes have been approved for listing on the American Stock Exchange under the symbol WDB.J . You should be aware that the listing of the notes on the American Stock Exchange will not necessarily ensure that a liquid trading market will develop for the notes. The development of a trading market for the notes will depend on our financial performance and other factors such as the increase, if any, in the market price of the Underlying Stock. Even if a secondary market for the notes develops, it may not provide significant liquidity and we expect that transaction costs in any secondary market would be high. As a result, the difference between bid and asked prices for your note in any secondary market could be substantial. If you sell your notes before maturity, you may have to do so at a discount from the original public offering price, and, as a result, you may suffer substantial losses.

S-6

Table of Contents

Wachovia Capital Markets, LLC and other broker-dealer affiliates of Wachovia currently intend to make a market for the notes, although they are not required to do so and may stop any such market-making activities at anytime. As market makers, trading of the notes may cause Wachovia Capital Markets, LLC or any other broker-dealer affiliates of Wachovia to have long or short positions of the notes in their inventory. The supply and demand for the notes, including inventory positions of market makers, may affect the secondary market for the notes.

Many factors affect the market value of the notes

The market value of the notes will be affected by factors that interrelate in complex ways. It is important for you to understand that the effect of one factor may offset the increase in the market value of the notes caused by another factor and that the effect of one factor may exacerbate the decrease in the market value of the notes caused by another factor. The following paragraphs describe the expected impact on the market value of the notes given a change in a specific factor, assuming all other conditions remain constant.

The market price of the Underlying Stock is expected to affect the market value of the notes

We expect that the market value of the notes will depend substantially on the market price of the Underlying Stock as compared with the initial stock price. If you choose to sell your notes when the market price of the Underlying Stock exceeds or is equal to the initial stock price, you may receive substantially less than the amount that would be payable at maturity based on this market price because of the expectation that the market price of the Underlying Stock will continue to fluctuate until the final stock price is determined and the risk that a trigger event will occur.

Changes in the volatility of the Underlying Stock are expected to affect the market value of the notes

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility of the Underlying Stock increases or decreases, the market value of the notes may be adversely affected.

Changes in the levels of interest rates are expected to affect the market value of the notes

We expect that changes in interest rates, even if they do not affect the market price of the Underlying Stock as described above, may affect the market value of the notes and may be adverse to holders of the notes.

***Changes in dividend yields of the Underlying Stock are expected to affect the market value
of the notes***

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

In general, if dividend yields on the Underlying Stock increase, we expect that the market value of the notes will decrease and, conversely, if dividend yields on the Underlying Stock decrease, we expect that the market value of the notes will increase. The return on the notes will not reflect any dividends paid on the Underlying Stock.

S-7

Table of Contents

Changes in our credit ratings may affect the market value of the notes

Our credit ratings are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings may affect the market value of the notes. However, because the return on your notes is dependent upon factors in addition to our ability to pay our obligations under the notes, such as the percentage change in the market price of the Underlying Stock shortly prior to maturity relative to the pricing date, an improvement in our credit ratings will not reduce the other investment risks related to the notes.

In general, assuming all relevant factors are held constant, we expect that the effect on the market value of the notes of a given change in some of the factors listed above will be less if it occurs later in the term of the notes than if it occurs earlier in the term of the notes.

Wachovia and its affiliates have no affiliation with the Underlying Stock Issuer and are not responsible for its public disclosure of information

Wachovia and its affiliates are not affiliated with the Underlying Stock Issuer in any way and have no ability to control or predict its actions, including any corporate actions of the type that would require the calculation agent to adjust the maturity payment amount, and have no ability to control the public disclosure of these corporate actions or any events or circumstances affecting them.

Each note is an unsecured debt obligation of Wachovia only and is not an obligation of the Underlying Stock Issuer. None of the money you pay for your notes will go to the Underlying Stock Issuer. Since the Underlying Stock Issuer is not involved in the offering of the notes in any way, it has no obligation to consider your interest as an owner of notes in taking any actions that might affect the value of your notes. The Underlying Stock Issuer may take actions that will adversely affect the market value of the notes.

This prospectus supplement relates only to the notes and does not relate to the Underlying Stock. We have derived the information about the Underlying Stock Issuer in this prospectus supplement from publicly available information, without independent verification. We have not participated in the preparation of any of the documents or made any due diligence investigation or any inquiry of the Underlying Stock Issuer in connection with the offering of the notes. Neither we nor any of our affiliates assumes any responsibility for the adequacy or accuracy of the information about the Underlying Stock Issuer contained in this prospectus supplement. Furthermore, we do not know whether the Underlying Stock Issuer has disclosed all events occurring before the date of this prospectus supplement including events that could affect the accuracy or completeness of the publicly available documents referred to above, the market price of the Underlying Stock and, therefore, the initial stock price and the final stock price of the Underlying Stock that the calculation agent will use to determine the maturity payment amount with respect to your notes. You, as an investor in the notes, should make your own investigation into the Underlying Stock Issuer.

You have limited antidilution protection

WBNA, as calculation agent for your notes, will, in its sole discretion, adjust the share multiplier for certain events affecting the Underlying Stock, such as stock splits and stock dividends, and certain other corporate actions involving the Underlying Stock Issuer, such as mergers. However, the calculation agent is not required to make an adjustment for every corporate event that can affect the Underlying Stock. For example, the calculation agent is not required to make any adjustments to the share multiplier if the Underlying Stock Issuer or anyone else makes a partial tender or partial exchange offer for the Underlying Stock. Consequently, this could affect the calculation of the maturity payment amount and the market value of the notes. You should refer to *Specific Terms of the Notes – Antidilution Adjustments* beginning on page S-13

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

for a description of the general circumstances in which the calculation agent will make adjustments to the share multiplier.

S-8

Table of Contents

Historical performance of the Underlying Stock should not be taken as an indication of its future performance during the term of the notes

It is impossible to predict whether the market price of the Underlying Stock will rise or fall. The Underlying Stock has performed differently in the past and is expected to perform differently in the future. The market price of the Underlying Stock will be influenced by complex and interrelated political, economic, financial and other factors that can affect the Underlying Stock Issuer. You should refer to **The Underlying Stock** beginning on page S-17 for a description of the Underlying Stock Issuer and historical data on the Underlying Stock.

Purchases and sales by us and our affiliates may affect the return on the notes

As described below under **Use of Proceeds and Hedging** on page S-24, we or one or more of our affiliates may hedge our obligations under the notes by purchasing the Underlying Stock, futures or options on the Underlying Stock or other derivative instruments with returns linked or related to changes in the market price of the Underlying Stock, and we may adjust these hedges by, among other things, purchasing or selling the Underlying Stock, futures, options or other derivative instruments with returns linked to the Underlying Stock at any time. Although they are not expected to, any of these hedging activities may adversely affect the market price of the Underlying Stock and, therefore, the market value of the notes. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the notes declines.

The calculation agent may postpone the valuation date and, therefore, the determination of the final stock price and the maturity date if a market disruption event occurs on the valuation date

The valuation date and, therefore, the determination of the final stock price may be postponed if the calculation agent determines that a market disruption event has occurred or is continuing on the valuation date. If a postponement occurs, the calculation agent will use the average price per share of the Underlying Stock that any affiliate of Wachovia receives to unwind the hedge of the obligations under the notes on the next succeeding business day on which no market disruption event occurs or is continuing. As a result, the maturity date for the notes would also be postponed. You will not be entitled to any compensation from us or the calculation agent for any loss suffered as a result of the occurrence of a market disruption event, any resulting delay in payment or any change in the market price of the Underlying Stock resulting from the postponement of the valuation date. See **Specific Terms of the Notes Market Disruption Event** beginning on page S-12.

Potential conflicts of interest could arise

Our subsidiary, WBNA, is our agent for the purposes of calculating the final stock price and the maturity payment amount. Under certain circumstances, WBNA's role as our subsidiary and its responsibilities as calculation agent for the notes could give rise to conflicts of interest. These conflicts could occur, for instance, in connection with its determination as to whether the final stock price can be calculated on a particular business day, or what price any affiliate of Wachovia receives to unwind its hedge on the valuation date. See the section entitled **Specific Terms of the Notes Market Disruption Event** beginning on page S-12. WBNA is required to carry out its duties as calculation agent in good faith and using its reasonable judgment.

Wachovia or its affiliates may presently or from time to time engage in business with the Underlying Stock Issuer. This business may include extending loans to, or making equity investments in, the Underlying Stock Issuer or providing advisory services to the Underlying Stock Issuer,

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

including merger and acquisition advisory services. In the course of business, Wachovia or its affiliates may acquire non-public information relating to the Underlying Stock Issuer and, in addition, one or more affiliates of Wachovia may publish

S-9

Table of Contents

research reports about the Underlying Stock Issuer. Wachovia does not make any representation to any purchasers of the notes regarding any matters whatsoever relating to the Underlying Stock Issuer. Any prospective purchaser of the notes should undertake an independent investigation of the Underlying Stock Issuer as in its judgment is appropriate to make an informed decision regarding an investment in the notes.

Tax consequences are uncertain

You should consider the tax consequences of investing in the notes, significant aspects of which are uncertain. See Supplemental Tax Considerations beginning on page S-20.

Certain considerations for insurance companies and employee benefit plans

A fiduciary of a pension plan or other employee benefit plan that is subject to the prohibited transaction rules of the Employee Retirement Income Security Act of 1974, as amended, which we call ERISA, or the Internal Revenue Code of 1986, as amended, and that is considering purchasing the notes with the assets of such a plan, should consult with its counsel regarding whether the purchase or holding of the notes could become a prohibited transaction under ERISA, the Internal Revenue Code or any substantially similar prohibition. These prohibitions are discussed in further detail under Employee Retirement Income Security Act beginning on page S-23.

SPECIFIC TERMS OF THE NOTES

Please note that in this section entitled Specific Terms of the Notes, references to holders mean those who own notes registered in their own names, on the books that we or the trustee maintain for this purpose, and not indirect holders who own beneficial interests in notes registered in street name or in notes issued in book-entry form through The Depository Trust Company. Please review the special considerations that apply to indirect holders in the accompanying prospectus, under Legal Ownership.

The notes are part of a series of debt securities, entitled Medium-Term Notes, Series E, that we may issue under the indenture from time to time as described in the accompanying prospectus. The notes are also Indexed Notes and Senior Notes, each as described in the accompanying prospectus.

This prospectus supplement summarizes specific financial and other terms that apply to the notes. Terms that apply generally to all Medium-Term Notes, Series E, are described in Description of the Notes We May Offer in the accompanying prospectus. The terms described here supplement those described in the accompanying prospectus and, if the terms described there are inconsistent with those described here, the terms described here are controlling.

We describe the terms of the notes in more detail below.

Interest

The notes will bear interest at 7% per annum payable on each of January 25, April 25, July 25 and October 25, beginning on July 25, 2005. Interest will accrue from and including the settlement date to but excluding the maturity date. The interest rate on the notes is higher than the current dividend rate of the Underlying Stock.

The regular record dates will be the close of business on January 10, April 10, July 10 and October 10, respectively, in each case the fifteenth calendar day, whether or not a business day, immediately preceding the related interest payment date. For the purpose of determining the holder at the close of business on a day that is not a business day, the close of business will mean 5:00 P.M. in The City of New York, on that day.

S-10

Table of Contents

Denominations

Wachovia will issue the notes in principal amount of \$1,000 per note and integral multiples thereof.

Offering Price

Each note will be offered at an original public offering price equal to \$1,000.

Payment at Maturity

At maturity, for each note you own, you will receive a cash payment equal to the maturity payment amount, as provided below, plus any accrued but unpaid interest. The maturity payment amount to which you will be entitled will depend on whether a trigger event has occurred during the term of the notes and whether the final stock price multiplied by the share multiplier is less than the initial stock price.

Determination of the Maturity Payment Amount

The maturity payment amount for each note will be determined by the calculation agent and will equal the principal amount of your note unless:

(a) a trigger event has occurred; and

(b) the final stock price multiplied by the share multiplier is less than the initial stock price.

If the conditions described in (a) and (b) both occur, at maturity you will receive a payment per note equal to the following:

$$\$1,000 \times \left(\frac{\text{final stock price} \times \text{share multiplier}}{\text{initial stock price}} \right),$$

plus any accrued but unpaid interest.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

If a trigger event occurs and the final stock price multiplied by the share multiplier is less than the initial stock, you will lose some or all of your principal. If the final stock price is \$0, the maturity payment amount per note will equal \$0 (but you will still receive any accrued but unpaid interest).

The initial stock price is \$55.6752, the average price per share of the Underlying Stock that any affiliate of Wachovia has paid to hedge Wachovia's obligations under the notes on April 18, 2005.

The final stock price will be determined by the calculation agent and will equal the average price per share of the Underlying Stock that any affiliate of Wachovia receives to unwind the hedge of Wachovia's obligations under the notes on the valuation date.

The share multiplier is 1.0, subject to adjustment for certain corporate events relating to the Underlying Stock Issuer described in this prospectus supplement under Specific Terms of the Notes Antidilution Adjustments.

A trigger event will occur if the market price of the Underlying Stock multiplied by the share multiplier at any time on any business day, from April 19, 2005 to and including the valuation date, is less than or equal to the trigger price.

S-11

Table of Contents

The trigger price will equal \$38.97, a price that is 30% below the initial stock price.

The valuation date means the fifth business day prior to the maturity date. However, if that day occurs on a day that is not a business day or on a day on which the calculation agent has determined that a market disruption event has occurred or is continuing, the valuation date will be postponed until the next succeeding business day on which the calculation agent determines that a market disruption event does not occur and is not continuing. *If the valuation date is postponed, then the maturity date of the notes will be postponed by an equal number of business days.*

If any payment is due on the notes on a day which is not a day on which commercial banks settle payments in The City of New York, then that payment may be made on the next day that is a day on which commercial banks settle payments in The City of New York, in the same amount and with the same effect as if paid on the original due date.

WBNA, our subsidiary, will serve as the calculation agent. All determinations made by the calculation agent will be at the sole discretion of the calculation agent and, absent a determination of a manifest error, will be conclusive for all purposes and binding on Wachovia and the holders and beneficial owners of the notes. Wachovia may at any time change the calculation agent without notice to holders of notes.

Market Disruption Event

A market disruption event means the occurrence or existence of any of the following events:

a suspension, absence or material limitation of trading in the Underlying Stock on its primary market for more than two hours of trading or during the one-half hour before the close of trading in that market, as determined by the calculation agent in its sole discretion;

a suspension, absence or material limitation of trading in option or futures contracts relating to the Underlying Stock, if available, in the primary market for those contracts for more than two hours of trading or during the one-half hour before the close of trading in that market, as determined by the calculation agent in its sole discretion;

the Underlying Stock does not trade on the New York Stock Exchange, the American Stock Exchange, the Nasdaq National Market System or what was the primary market for the Underlying Stock, as determined by the calculation agent in its sole discretion; or

any other event, if the calculation agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the notes that we or our affiliates have effected or may effect as described below under Use of Proceeds and Hedging.

The following events will not be market disruption events:

a limitation on the hours or number of days of trading in the Underlying Stock on its primary market, but only if the limitation results from an announced change in the regular business hours of the relevant market; and

a decision to permanently discontinue trading in the option or futures contracts relating to the Underlying Stock.

For this purpose, an absence of trading in the primary securities market on which option or futures contracts relating to the Underlying Stock, if available, are traded will not include any time when that market is itself closed for trading under ordinary circumstances. In contrast, a suspension or limitation of trading in

S-12

Table of Contents

option or futures contracts relating to the Underlying Stock, if available, in the primary market for those contracts, by reason of any of:

a price change exceeding limits set by that market;

an imbalance of orders relating to those contracts; or

a disparity in bid and asked quotes relating to those contracts

will constitute a suspension or material limitation of trading in option or futures contracts, as the case may be, relating to the Underlying Stock in the primary market for those contracts.

Events of Default and Acceleration

In case an event of default with respect to any notes has occurred and is continuing, the amount payable to a beneficial owner of a note upon any acceleration permitted by the notes, with respect to each \$1,000 principal amount of each note, will be equal to the maturity payment amount, calculated as though the date of early repayment were the maturity date of the notes. If a bankruptcy proceeding is commenced in respect of Wachovia, the claim of the beneficial owner of a note may be limited, under Section 502(b)(2) of Title 11 of the United States Code, to the principal amount of the note plus an additional amount of contingent interest calculated as though the date of the commencement of the proceeding were the maturity date of the notes.

In case of default in payment of the notes, whether at their maturity or upon acceleration, the notes will not bear a default interest rate.

Antidilution Adjustments

The share multiplier is subject to adjustments by the calculation agent as a result of the dilution and reorganization adjustments described in this section. The adjustments described below do not cover all events that could affect the market value of your notes. We describe the risks relating to dilution above under **Risk Factors** **You have limited antidilution protection** beginning on page S-8.

How adjustments will be made

If one of the events described below occurs with respect to the Underlying Stock and the calculation agent determines that the event has a diluting or concentrative effect on the market price of the Underlying Stock, the calculation agent will calculate a corresponding adjustment to the share multiplier as the calculation agent deems appropriate to account for that diluting or concentrative effect. The share multiplier will be adjusted by the calculation agent by multiplying the existing share multiplier by a fraction whose numerator is the number of shares of the Underlying Stock outstanding immediately after the dilution or reorganization event and whose denominator is the number of shares of the Underlying Stock outstanding immediately prior to the dilution or reorganization event. For example, if an adjustment is required because of a

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

two-for-one stock split, then the share multiplier will be adjusted to double the prior share multiplier, due to the corresponding decrease in the market price of the Underlying Stock.

The calculation agent will also determine the effective date of that adjustment, and the replacement of the Underlying Stock, if applicable, in the event of consolidation or merger of the Underlying Stock Issuer. Upon making any such adjustment, the calculation agent will give notice as soon as practicable to the trustee, stating the adjustment to the share multiplier. In no event, however, will an antidilution adjustment to the share multiplier during the term of the notes be deemed to change the principal amount per note which is fixed at \$1,000.

If more than one event requiring adjustment occurs with respect to the Underlying Stock, the calculation agent will make an adjustment for each event in the order in which the events occur, and on a cumulative basis. Thus, having made an adjustment for the first event, the calculation agent will adjust the

S-13

Table of Contents

share multiplier for the second event, applying the required adjustment to the share multiplier as already adjusted for the first event, and so on for any subsequent events.

For any dilution event described below, other than a consolidation or merger, the calculation agent will not have to adjust the share multiplier unless the adjustment would result in a change to the share multiplier of at least 0.1% in the share multiplier then in effect. The share multiplier resulting from any adjustment will be rounded up or down, as appropriate, to the nearest one-hundred thousandth.

If an event requiring an antidilution adjustment occurs, the calculation agent will make the adjustment with a view to offsetting, to the extent practical, any change in your economic position relative to your notes that results solely from that event. The calculation agent may, in its sole discretion, modify the antidilution adjustments as necessary to ensure an equitable result.

The calculation agent will make all determinations with respect to antidilution adjustments, including any determination as to whether an event requiring adjustment has occurred, as to the nature of the adjustment required and how it will be made or as to the value of any property distributed in a reorganization event, and will do so in its sole discretion. In the absence of manifest error, those determinations will be conclusive for all purposes and will be binding on you and us, without any liability on the part of the calculation agent. You will not be entitled to any compensation from us for any loss suffered as a result of any of the above determinations by the calculation agent. The calculation agent will provide information about the adjustments that it makes upon your written request.

The following events are those that may require an antidilution adjustment of the share multiplier:

a subdivision, consolidation or reclassification of the Underlying Stock or a distribution or dividend of Underlying Stock to existing holders of the Underlying Stock by way of bonus, capitalization or similar issue;

a distribution or dividend to existing holders of the Underlying Stock of:

shares of the Underlying Stock,

other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the Underlying Stock Issuer equally or proportionately with such payments to holders of the Underlying Stock, or

any other type of securities, rights or warrants in any case for payment (in cash or otherwise) at less than the prevailing market price as determined by the calculation agent;

the declaration by the Underlying Stock Issuer of an extraordinary or special dividend or other distribution whether in cash or shares of the Underlying Stock or other assets;

a repurchase by the Underlying Stock Issuer of its common stock whether out of profits or capital and whether the consideration for such repurchase is cash, securities or otherwise;

any other similar event that may have a diluting or concentrative effect on the market price of the Underlying Stock; and

a consolidation of the Underlying Stock Issuer with another company or merger of the Underlying Stock Issuer with another company.

Stock Splits and Reverse Stock Splits

A stock split is an increase in the number of a corporation's outstanding shares of stock without any change in its stockholders' equity. Each outstanding share will be worth less as a result of a stock split.

A reverse stock split is a decrease in the number of a corporation's outstanding shares of stock without any change in its stockholders' equity. Each outstanding share will be worth more as a result of a reverse stock split.

Table of Contents

If the Underlying Stock is subject to a stock split or a reverse stock split, then once the split has become effective the calculation agent will adjust the share multiplier to equal the product of the prior share multiplier and the number of shares issued in such stock split or reverse stock split with respect to one share of the Underlying Stock.

Stock Dividends

In a stock dividend, a corporation issues additional shares of its stock to all holders of its outstanding stock in proportion to the shares they own. Each outstanding share will be worth less as a result of a stock dividend.

If the Underlying Stock is subject to a stock dividend payable in shares of Underlying Stock that is given ratably to all holders of shares of the Underlying Stock, then once the dividend has become effective the calculation agent will adjust the share multiplier on the ex-dividend date to equal the sum of the prior share multiplier plus the product of the number of shares issued with respect to one share of the Underlying Stock and the prior share multiplier. The ex-dividend date for any dividend or other distribution is the first day on and after which the Underlying Stock trades without the right to receive that dividend or distribution.

No Adjustments for Other Dividends and Distributions

The share multiplier will not be adjusted to reflect dividends, including cash dividends, or other distributions paid with respect to the Underlying Stock, other than:

stock dividends described above,

issuances of transferable rights and warrants as described in [Transferable Rights and Warrants](#) below,

distributions that are spin-off events described in [Reorganization Events](#) beginning on page S-16, and

extraordinary dividends described below.

A dividend or other distribution with respect to the Underlying Stock will be deemed to be an extraordinary dividend if its per share value exceeds that of the immediately preceding non-extraordinary dividend, if any, for the Underlying Stock by an amount equal to at least 10% of the closing price of the Underlying Stock on the business day before the ex-dividend date.

If the Underlying Stock is subject to an extraordinary dividend, then once the extraordinary dividend has become effective the calculation agent will adjust the share multiplier on the ex-dividend date to equal the product of the prior share multiplier and a fraction, the numerator of which is the closing price of the Underlying Stock on the business day preceding the ex-dividend date and the denominator of which is the amount by which the closing price of the Underlying Stock on the business day preceding the ex-dividend date exceeds the extraordinary dividend.

The amount of an extraordinary dividend for the Underlying Stock will equal:

for an extraordinary dividend that is paid in lieu of a regularly scheduled dividend, the amount of the extraordinary dividend per share of the Underlying Stock minus the amount per share of the immediately preceding dividend, if any, that was not an extraordinary dividend for the Underlying Stock, or

for an extraordinary dividend that is not paid in lieu of a regularly scheduled dividend, the amount per share of the extraordinary dividend.

Notwithstanding anything herein, the initiation by the Underlying Stock Issuer of an ordinary dividend on the Underlying Stock will not constitute an extraordinary dividend requiring an adjustment.

S-15

Table of Contents

To the extent an extraordinary dividend is not paid in cash, the value of the non-cash component will be determined by the calculation agent, in its sole discretion. A distribution on the Underlying Stock that is a dividend payable in shares of Underlying Stock, an issuance of rights or warrants or a spin-off event and also an extraordinary dividend will result in an adjustment to the number of shares of Underlying Stock only as described in *Stock Dividends* above, *Transferable Rights and Warrants* below or *Reorganization Events* below, as the case may be, and not as described here.

Transferable Rights and Warrants

If the Underlying Stock Issuer issues transferable rights or warrants to all holders of the Underlying Stock to subscribe for or purchase the Underlying Stock at an exercise price per share that is less than the closing price of the Underlying Stock on the business day before the ex-dividend date for the issuance, then the share multiplier will be adjusted to equal the product of the prior share multiplier and a fraction, the numerator of which will be the number of shares of the Underlying Stock outstanding at the close of business on the business day before the ex-dividend date (as adjusted for any subsequent event requiring an adjustment hereunder) plus the number of additional shares of the Underlying Stock offered for subscription or purchase pursuant to the rights or warrants and the denominator of which will be the number of shares of the Underlying Stock outstanding at the close of business on the business day before the ex-dividend date (as adjusted for any subsequent event requiring an adjustment hereunder) plus the number of additional shares of Underlying Stock which the aggregate offering price of the total number of shares of the Underlying Stock so offered for subscription or purchase pursuant to the rights or warrants would purchase at the closing price on the business day before the ex-dividend date for the issuance, which will be determined by multiplying the total number of additional shares of the Underlying Stock offered for subscription or purchase pursuant to the rights or warrants by the exercise price of the rights or warrants and dividing the product so obtained by the closing price on the business day before the ex-dividend date for the issuance. If the number of shares of the Underlying Stock actually delivered in respect of the rights or warrants differs from the number of shares of the Underlying Stock offered in respect of the rights or warrants, then the share multiplier will promptly be readjusted to the share multiplier which would have been in effect had the adjustment been made on the basis of the number of shares of the Underlying Stock actually delivered in respect of the rights or warrants.

Reorganization Events

Each of the following is a reorganization event:

the Underlying Stock is reclassified or changed;

the Underlying Stock Issuer has been subject to a merger, consolidation or other combination and either is not the surviving entity or is the surviving entity but all outstanding shares of Underlying Stock are exchanged for or converted into other property;

a statutory share exchange involving outstanding shares of Underlying Stock and the securities of another entity occurs, other than as part of an event described above;

the Underlying Stock Issuer sells or otherwise transfers its property and assets as an entirety or substantially as an entirety to another entity;

the Underlying Stock Issuer effects a spin-off, other than as part of an event described above (in a spin-off, a corporation), issues to all holders of its common stock equity securities of another issuer); or

the Underlying Stock Issuer is liquidated, dissolved or wound up or is subject to a proceeding under any applicable bankruptcy, insolvency or other similar law, or another entity completes a tender or exchange offer for all the outstanding shares of Underlying Stock.

S-16

Table of Contents

Adjustments for Reorganization Events

If a reorganization event occurs, then the calculation agent will adjust the share multiplier to reflect the amount and type of property or properties whether cash, securities, other property or a combination that a prior holder of the number of shares of the Underlying Stock represented by its investment in the notes would have been entitled to in relation to an amount of shares of the Underlying Stock equal to what a holder of shares of the Underlying Stock would hold after the reorganization event has occurred. We refer to this new property as the distribution property.

For the purpose of making an adjustment required by a reorganization event, the calculation agent, in its sole discretion, will determine the value of each type of the distribution property. For any distribution property consisting of a security, the calculation agent will use the closing price of the security on the relevant business day. The calculation agent may value other types of property in any manner it determines, in its sole discretion, to be appropriate. If a holder of shares of the Underlying Stock may elect to receive different types or combination of types of distribution property in the reorganization event, the distribution property will consist of the types and amounts of each type distributed to a holder of shares of the Underlying Stock that makes no election, as determined by the calculation agent in its sole discretion.

If a reorganization event occurs with respect to the shares of the Underlying Stock and the calculation agent adjusts the share multiplier to reflect the distribution property in the event as described above, the calculation agent will make further antidilution adjustments for any later events that affect the distribution property, or any component of the distribution property, comprising the new share multiplier. The calculation agent will do so to the same extent that it would make adjustments if the shares of the Underlying Stock were outstanding and were affected by the same kinds of events. If a subsequent reorganization event affects only a particular component of the number of shares of the Underlying Stock, the required adjustment will be made with respect to that component, as if it alone were the number of shares of the Underlying Stock.

For example, if the Underlying Stock Issuer merges into another company and each share of the Underlying Stock is converted into the right to receive two common shares of the surviving company and a specified amount of cash, the shares of the Underlying Stock will be adjusted to reflect two common shares of the surviving company and the specified amount of cash. The calculation agent will adjust the share multiplier to reflect any later stock split or other event, including any later reorganization event, that affects the common shares of the surviving company, to the extent described in this section entitled Antidilution Adjustments, as if the common shares were shares of the Underlying Stock. In that event, the cash component will not be adjusted but will continue to be a component of the number of shares of the Underlying Stock (with no interest adjustment). Consequently, the final stock price will include the final value of the two shares of the surviving company and the cash.

THE UNDERLYING STOCK

The Underlying Stock Issuer

Provided below is a brief description of the Underlying Stock Issuer obtained from publicly available information published by the Underlying Stock Issuer.

Nabors Industries Ltd. has disclosed that it is a land drilling contractor that conducts oil, gas and geothermal land drilling operations in the United States, Canada, South and Central America, the Middle East, the Far East and Africa. Nabors Industries Ltd. is a land well-servicing and workover contractor and a provider of offshore platform workover and drilling rigs. Nabors Industries Ltd. also offers a wide range of ancillary

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

well-site services, including engineering, transportation, construction, maintenance, well logging, directional drilling, rig instrumentation, data collection and other support services in selected domestic and international markets. In addition, Nabors Industries Ltd. manufactures and leases or sells top drives for a broad range of drilling applications, directional drilling systems, rig instrumentation and data collection equipment, and rig

S-17

Table of Contents

reporting software. Nabors Industries Ltd. has made selective investments in oil and gas exploration, development and production activities.

The Underlying Stock is registered under the Exchange Act. Companies with securities registered under the Exchange Act are required to file financial and other information specified by the SEC periodically. Information filed with the SEC can be inspected and copied at the Public Reference Section of the SEC, Room 1024, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of this material can also be obtained from the Public Reference Section, at prescribed rates. In addition, information filed by the Underlying Stock Issuer with the SEC electronically can be reviewed through a website maintained by the SEC. The address of the SEC's website is <http://www.sec.gov>. Information filed with the SEC by the Underlying Stock Issuer under the Exchange Act can be located by reference to SEC file number 000-49887.

Information about the Underlying Stock may also be obtained from other sources such as press releases, newspaper articles and other publicly disseminated documents, as well as from the Underlying Stock Issuer's website. We do not make any representation or warranty as to the accuracy or completeness of any materials referred to above, including any filings made by the Underlying Stock Issuer with the SEC.

Historical Data

The Underlying Stock is principally traded on the American Stock Exchange under the symbol NBR. The following table sets forth the high, low and closing prices for the Underlying Stock. The information given below is for the four calendar quarters in each of 2002, 2003 and 2004, as well as the first calendar quarter of 2005. Partial data is provided for the second calendar quarter of 2005. On April 18, 2005, the closing price for the Underlying Stock was \$55.76 per share. The prices listed below were obtained from Bloomberg Financial Services, without independent verification. The historical prices of the Underlying Stock should not be taken as an indication of future performance, and no assurance can be given that the price of the Underlying Stock will not decrease.

Quarterly High, Low and Closing Price of the Underlying Stock

| Quarter - Start Date | Quarter - End Date | High Intra-Day Price of the Underlying Stock | Low Intra-Day Price of the Underlying Stock | Quarter - End Closing Price of the Underlying Stock |
|---------------------------------|-------------------------------|---|--|--|
| 1/1/02 | 3/31/02 | 43.00 | 26.98 | 42.25 |
| 4/1/02 | 6/30/02 | 49.89 | 35.13 | 35.30 |
| 7/1/02 | 9/30/02 | 37.60 | 26.14 | 32.75 |
| 10/1/02 | 12/31/02 | 39.30 | 29.79 | 35.27 |
| 1/1/03 | 3/31/03 | 42.60 | 32.20 | 39.87 |
| 4/1/03 | 6/30/03 | 45.85 | 37.65 | 39.55 |
| 7/1/03 | 9/30/03 | 40.50 | 33.87 | 37.26 |
| 10/1/03 | 12/31/03 | 42.52 | 35.81 | 41.50 |
| 1/1/04 | 3/31/04 | 48.75 | 41.02 | 45.75 |
| 4/1/04 | 6/30/04 | 47.67 | 40.04 | 45.22 |
| 7/1/04 | 9/30/04 | 47.85 | 41.27 | 47.35 |
| 10/1/04 | 12/31/04 | 53.75 | 45.92 | 51.29 |
| 1/1/05 | 3/31/05 | 60.41 | 46.23 | 59.14 |
| 4/1/05 | 4/18/05 | 61.30 | 54.82 | 55.76 |

HYPOTHETICAL RETURNS

The following table illustrates, for the initial stock price, the trigger price and a range of hypothetical final stock prices, whether or not a trigger event has occurred:

the hypothetical price return of the Underlying Stock;

S-18

Table of Contents

the hypothetical pre-tax annualized rate of return of an investment in the Underlying Stock, as more fully described below;

the hypothetical maturity payment amount per note (excluding interest payments);

the hypothetical return at maturity of the notes (excluding interest payments); and

the hypothetical pre-tax annualized rate of total return on the notes.

The figures below are for purposes of illustration only. The actual maturity payment amount and the resulting total and pre-tax annualized rate of return will depend on the actual final stock price and whether or not a trigger event occurs, each determined by the calculation agent as described in this prospectus supplement.

| Hypothetical final stock price | Hypothetical price return of the Underlying Stock | Hypothetical pre-tax annualized rate of return of the Underlying Stock(1)(2) | A trigger event has occurred | | | A trigger event has not occurred | | |
|--------------------------------|---|--|--|---|--|--|---|--|
| | | | Hypothetical maturity payment amount per note (excluding interest payment) | Hypothetical return at maturity of the notes (excluding interest payment) | Hypothetical pre-tax annualized rate of total return on the notes(1) | Hypothetical maturity payment amount per note (excluding interest payment) | Hypothetical return at maturity of the notes (excluding interest payment) | Hypothetical pre-tax annualized rate of total return on the notes(1) |
| 27.84 | -50.00% | -50.00% | \$ 500.00 | -50.00% | -44.30% | | | |
| 30.62 | -45.00% | -45.00% | \$ 550.00 | -45.00% | -39.13% | | | |
| 33.41 | -40.00% | -40.00% | \$ 600.00 | -40.00% | -33.97% | | | |

SUPPLEMENTAL TAX CONSIDERATIONS

The following is a general description of certain United States federal tax considerations relating to the notes. It does not purport to be a complete analysis of all tax considerations relating to the notes. Prospective purchasers of the notes should consult their tax advisors as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of the United States of acquiring, holding and disposing of the notes and receiving payments of interest, principal and/or other amounts under the notes. This summary is based upon the law as in effect on the date of this prospectus supplement and is subject to any change in law that may take effect after such date. This summary does not address all aspects of United States federal income taxation of the notes that may be relevant to you in light of your particular circumstances, nor does it address all of your tax consequences if you are a holder of notes who is subject to special treatment under the United States federal income tax laws.

Supplemental U.S. Tax Considerations

The discussion below supplements the discussion under **United States Taxation** in the accompanying prospectus and is subject to the limitations and exceptions set forth therein. Except as otherwise noted under **United States Alien Holders** below, this discussion is applicable to you only if you are a United States holder (as defined in the accompanying prospectus).

The treatment of the notes for United States federal income tax purposes is uncertain. In the opinion of Sullivan & Cromwell LLP, it would be reasonable to treat the notes as an investment unit consisting of (i) a non-contingent debt instrument subject to the rules governing debt instruments (as described under **United States Taxation - U.S. Holders** in the accompanying prospectus) issued by us to you (the **Debt Portion**) and (ii) a cash-settled put option on Nabors Industries Ltd. common stock written by you and purchased by us (the **Put Option**). The terms of the notes require you and us (in the absence of an administrative determination or a judicial ruling to the contrary) to treat the notes for all tax purposes in accordance with such characterization.

Table of Contents

No statutory, judicial or administrative authority directly discusses how the notes should be treated for United States federal income tax purposes. As a result, the United States federal income tax consequences of your investment in the notes are highly uncertain and alternative characterizations are possible. Accordingly, we urge you to consult your tax advisor in determining the tax consequences of an investment in the notes, including the application of state, local or other tax laws and the possible effects of changes in federal or other tax laws.

Treatment as an Investment Unit. If the notes are properly treated as an investment unit consisting of a Debt Portion and Put Option, it is likely that the Debt Portion of the note would be treated as having been issued for the amount you paid for the note and that interest payments on the note would be treated in part as payments of interest and in part as payments for the Put Option. If the amount you paid for the note is less than 99.75% of the principal amount, you will be subject to the market discount rule described in the accompanying prospectus under United States Taxation United States Holders Notes Purchased with Market Discount. Amounts treated as interest would be includible in income by you in accordance with your regular method of accounting for interest for United States federal income tax purposes. Amounts treated as payment for the Put Option would be deferred and would be included in income by you upon the maturity or sale of the note. The terms of the note require you and us to treat 3.56% of the stated interest payments on the note as payment of interest on the Debt Portion and the remaining 3.44% of the stated interest payments on the note as payment for the Put Option.

A cash payment of the full principal amount that is, \$1,000 of the note upon the maturity of the note would likely be treated as (i) payment in full of the principal amount of the Debt Portion (which would likely not result in the recognition of gain or loss if you are an initial purchaser of your Note) and (ii) the lapse of the Put Option, which would likely result in your recognition of short-term capital gain in an amount equal to the amount paid to you for the Put Option and deferred as described in the preceding paragraph.

A payment at maturity of less than \$1,000 per note would likely be treated as (i) payment in full of the principal amount of the Debt Portion (resulting in neither gain nor loss for an initial purchaser) and (ii) the exercise by us of the Put Option with a cash settlement, which would result in your recognition of short-term capital gain or loss, equal to the difference between (i) the \$1,000 you will be deemed to have received for the note and (ii) the amount paid to you for the Put Option plus the amount you receive at maturity. If the amount paid to you for the Put Option over the term of the note is greater than the difference between the principal amount and the payment at maturity, you must recognize short-term capital gain, even though you receive less than the full principal amount at maturity.

Upon the sale of the note, you would be required to apportion the value of the amount you receive between the Debt Portion and Put Option on the basis of the values thereof on the date of the sale. You would recognize gain or loss with respect to the Debt Portion in an amount equal to the difference between (i) the amount apportioned to the Debt Portion and (ii) your adjusted United States federal income tax basis in the Debt Portion (which would generally be equal to the principal amount of your Note if you are an initial purchaser of your Note). Such gain or loss would be short-term capital gain or loss if your holding period is one year or less. The amount of cash that you receive that is apportioned to the Put Option (together with any amount of premium received in respect thereof and deferred as described in the preceding paragraph) would be treated as short-term capital gain. If the value of the Debt Portion on the date of the sale of your Note is in excess of the amount you receive upon such sale, you would likely be treated as having made a payment (to the purchaser in the case of a sale) equal to the amount of such excess in order to extinguish your rights and obligations under the Put Option. In such a case, you would likely recognize short-term capital gain or loss in an amount equal to the difference between the premium you previously received in respect of the Put Option and the amount of the deemed payment made by you to extinguish the Put Option.

If you are a secondary purchaser of the note, you would be required to allocate your purchase price for the note between the Debt Portion and Put Option based on the respective fair market values of each on the date of purchase. If, however, the portion of your purchase price allocated to the Debt Portion is at a discount from, or is in excess of, the principal amount of the note, you may be subject to the market discount or amortizable bond premium rules described in the accompanying prospectus under United States Taxation United States Holders Notes Purchased with Market Discount and United States Taxation United

Table of Contents

States Holders Original Issue Discount Acquisition Premium with respect to the Debt Portion. The portion of your purchase price that is allocated to the Put Option would likely be offset for tax purposes against amounts you subsequently receive with respect to the Put Option (including amounts received upon a sale of the Note that are attributable to the Put Option), thereby reducing the amount of gain or increasing the amount of loss you would recognize with respect to the Put Option. If, however, the portion of your purchase price allocated to the Debt Portion as described above is in excess of your purchase price for your Note, you would likely be treated for tax purposes as having received a payment for the Put Option (which will be deferred as described in the fourth preceding paragraph) in an amount equal to such excess.

Example of Tax Treatment as an Investment Unit. The following example is for illustrative purposes only. Assume that you purchased a note on the initial issuance with an underlying hypothetical XYZ Index Stock, which has an initial value of \$100, at par for \$1,000 and will receive a 7% annual coupon. Assume further that the \$70 annual coupon consists of an interest payment with respect to the Debt Portion of 3%, or \$30, and a payment with respect to the Put Option of 4%, or \$40. Pursuant to the characterization described above, you would include the interest portion of \$30 in ordinary income in the year it is received or accrued, depending on your accounting method for tax purposes. Initially, the portion of the coupon attributable to the Put Option (\$40) would not be subject to tax.

For a 12-month note that is not sold prior to maturity, the coupon payments would total \$70, \$30 of which would be taxed as ordinary interest income in the year it is received or accrued and \$40 of which would not be subject to tax until maturity. If the value of the XYZ Index Stock never fell below the downside protection price and/or is equal to or higher than the initial value of \$100 at maturity, you would receive \$1,000 cash and recognize a short-term capital gain of \$40 (that is, the amount of the payments previously received by you with respect to the Put Option). If the value of the XYZ Index Stock at maturity is \$75 and at some point had fallen below the downside protection price of \$70, you would receive \$750. You would be treated as having a short-term capital loss of \$250 at the exercise of the Put Option, offset by the \$40 of payments previously received with respect to the Put Option, resulting in a short-term capital loss of \$210.

Alternative Characterization. In light of the uncertainty as to the United States federal income tax treatment, it is possible that the notes could be treated as a single debt instrument subject to the special tax rules governing contingent debt instruments. If the notes are so treated, you would be required to accrue interest income over the term of your notes based upon the yield at which we would issue a non-contingent fixed-rate debt instrument with other terms and conditions similar to your notes (the comparable yield). You would recognize gain or loss upon the sale or maturity of your notes in an amount equal to the difference, if any, between the amount you receive at such time and your adjusted basis in the notes. In general, your adjusted basis in your notes would be equal to the amount you paid for the notes, increased by the amount of interest you previously accrued with respect to your notes. Any gain you recognize upon the sale, redemption or maturity of your notes would be ordinary income and any loss recognized by you at such time would be ordinary loss to the extent of interest you included in income in the current or previous taxable years with respect to your notes, and thereafter, would be capital loss.

If the notes are treated as a contingent debt instrument and you purchase your notes in the secondary market at a price that is at a discount from, or in excess of, the adjusted issue price of the notes, such excess or discount would not be subject to the generally applicable market discount or amortizable bond premium rules described in the accompanying prospectus but rather would be subject to special rules set forth in treasury regulations governing contingent debt instruments. Accordingly, if you purchase your notes in the secondary market, you should consult your tax advisor as to the possible application of such rules to you.

United States Alien Holders. If you are a United States holder, you generally will not be subject to United States withholding tax or to generally applicable information reporting and backup withholding requirements with respect to payments on your notes as long as you comply with certain certification and identification requirements as to your foreign status. Please see the discussion under United States Taxation United States Alien Holders and Backup Withholding and Information Reporting.

Table of Contents

As discussed above, alternative characterizations of the notes for U.S. federal income tax purposes are possible. Should an alternative characterization of the notes, by reason of a change or clarification of the law, by regulation or otherwise, cause payments with respect to the notes to become subject to withholding tax, we will withhold at the applicable statutory rate. Prospective United States alien holders of the notes should consult their own tax advisors in this regard.

EMPLOYEE RETIREMENT INCOME SECURITY ACT

A fiduciary of a pension, profit-sharing or other employee benefit plan (a plan) subject to the Employee Retirement Income Security Act of 1974, as amended (ERISA), should consider the fiduciary standards of ERISA in the context of the plan's particular circumstances before authorizing an investment in the notes. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the plan, and whether the investment would involve a prohibited transaction under Section 406 of ERISA or Section 4975 of the Internal Revenue Code (the Code).

Section 406 of ERISA and Section 4975 of the Code prohibit plans, as well as individual retirement accounts and Keogh plans subject to Section 4975 of the Internal Revenue Code (also plans), from engaging in certain transactions involving plan assets with persons who are parties in interest under ERISA or disqualified persons under the Code (parties in interest) with respect to the plan or account. A violation of these prohibited transaction rules may result in civil penalties or other liabilities under ERISA and/or an excise tax under Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory, regulatory or administrative exemption. Certain employee benefit plans and arrangements including those that are governmental plans (as defined in section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA) and foreign plans (as described in Section 4(b)(4) of ERISA) (non-ERISA arrangements) are not subject to the requirements of ERISA or Section 4975 of the Code but may be subject to similar provisions under applicable federal, state, local, foreign or other regulations, rules or laws (similar laws).

The acquisition of the notes by a plan with respect to which Wachovia, Wachovia Securities or certain of our affiliates is or becomes a party in interest may constitute or result in a prohibited transaction under ERISA or Section 4975 of the Code, unless those notes are acquired pursuant to and in accordance with an applicable exemption. The U.S. Department of Labor has issued five prohibited transaction class exemptions, or PTCEs, that may provide exemptive relief if required for direct or indirect prohibited transactions that may arise from the purchase or holding of the notes. These exemptions are:

PTCE 84-14, an exemption for certain transactions determined or effected by independent qualified professional asset managers;

PTCE 90-1, an exemption for certain transactions involving insurance company pooled separate accounts;

PTCE 91-38, an exemption for certain transactions involving bank collective investment funds;

PTCE 95-60, an exemption for transactions involving certain insurance company general accounts; and

PTCE 96-23, an exemption for plan asset transactions managed by in-house asset managers.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The notes may not be purchased or held by (1) any plan, (2) any entity whose underlying assets include plan assets by reason of any plan's investment in the entity (a plan asset entity) or (3) any person investing plan assets of any plan, unless in each case the purchaser or holder is eligible for the exemptive relief available under one or more of the PTCEs listed above or another applicable similar exemption. Any purchaser or holder of the notes or any interest in the notes will be deemed to have represented by its purchase and holding of the notes that it either (1) is not a plan or a plan asset entity and is not purchasing

S-23

Table of Contents

those notes on behalf of or with plan assets of any plan or plan asset entity or (2) with respect to the purchase or holding, is eligible for the exemptive relief available under any of the PTCEs listed above or another applicable exemption. In addition, any purchaser or holder of the notes or any interest in the notes which is a non-ERISA arrangement will be deemed to have represented by its purchase and holding of the notes that its purchase and holding will not violate the provisions of any similar law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is important that fiduciaries or other persons considering purchasing the notes on behalf of or with plan assets of any plan, plan asset entity or non-ERISA arrangement consult with their counsel regarding the availability of exemptive relief under any of the PTCEs listed above or any other applicable exemption, or the potential consequences of any purchase or holding under similar laws, as applicable.

If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan, and propose to invest in the notes, you should consult your legal counsel.

USE OF PROCEEDS AND HEDGING

The net proceeds from the sale of the notes will be used as described under Use of Proceeds in the accompanying prospectus and to hedge market risks of Wachovia associated with its obligation to pay the maturity payment amount at the maturity of the notes.

The hedging activity discussed above may adversely affect the market value of the notes from time to time and the maturity payment amount you will receive on the notes at maturity. See Risk Factors Purchases and sales by us or our affiliates may affect the return on the notes and Risk Factors Potential conflicts of interest could arise for a discussion of these adverse effects.

SUPPLEMENTAL PLAN OF DISTRIBUTION

Wachovia Capital Markets, LLC has agreed, subject to the terms and conditions of the distribution agreement and a terms agreement, to purchase from Wachovia as principal \$5,361,000 aggregate principal amount of notes. Wachovia Capital Markets, LLC has engaged the services of each of Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC, as broker, to resell \$5,283,000 and \$78,000, respectively, aggregate principal amount of the notes purchased by Wachovia Capital Markets, LLC and has agreed to reallow Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC 1.50% of the principal amount of each note sold through Wachovia Securities, LLC or Wachovia Securities Financial Network, LLC, respectively, as broker.

The distribution agreement provides that the obligations of Wachovia Capital Markets, LLC are subject to certain conditions and that Wachovia Capital Markets, LLC is obligated to purchase the notes. Wachovia Capital Markets, LLC has advised Wachovia that it proposes initially to offer all or part of the notes directly to the public at the offering price set forth on the cover page of this prospectus supplement. In addition to the compensation paid at the time of the original public offering of the notes, an additional administrative fee of 0.25% will be paid to Wachovia Securities, LLC in connection with the administration of orders for the notes. After the initial public offering, the public offering price may be changed and a concession to dealers may be offered. Wachovia Capital Markets, LLC is offering the notes subject to receipt and acceptance and subject to its right to reject any order in whole or in part.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Proceeds to be received by Wachovia in this offering will be net of the underwriting discount, commission and expenses payable by Wachovia.

S-24

Table of Contents

Wachovia Capital Markets, LLC, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any other broker-dealer affiliate of Wachovia may use this prospectus supplement and the accompanying prospectus for offers and sales related to market-making transactions in the notes. Wachovia Capital Markets, LLC, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any other broker-dealer affiliate of Wachovia may act as principal or agent in these transactions, and the sales will be made at prices related to prevailing market prices at the time of sale.

Wachovia Capital Markets, LLC, Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC are affiliates of Wachovia. Rule 2720 of the Conduct Rules of the National Association of Securities Dealers, Inc. (the "NASD") imposes certain requirements when an NASD member such as Wachovia Capital Markets, LLC, Wachovia Securities, LLC or Wachovia Securities Financial Network, LLC distributes an affiliated company's debt securities. Wachovia Capital Markets, LLC, Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC have advised Wachovia that this offering will comply with the applicable requirements of Rule 2720. Wachovia Capital Markets, LLC, Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC will not confirm initial sales to accounts over which they exercise discretionary authority without the prior written approval of the customer.

No action has been or will be taken by Wachovia, Wachovia Capital Markets, LLC, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any other broker-dealer affiliate of Wachovia that would permit a public offering of the notes or possession or distribution of this prospectus supplement or the accompanying prospectus in any jurisdiction, other than the United States, where action for that purpose is required. No offers, sales or deliveries of the notes, or distribution of this prospectus supplement or the accompanying prospectus, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligations on Wachovia, Wachovia Capital Markets, LLC, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any other broker-dealer affiliate of Wachovia. In respect of specific jurisdictions, please note the following:

The notes, and the offer to sell such notes, does not constitute a public offering in Argentina. Consequently, no public offering approval has been requested or granted by the Comision Nacional de Valores, nor has any listing authorization of the notes been requested on any stock market in Argentina.

The notes will not be offered or sold to any persons who are residents of the Bahamas within the meaning of the Exchange Control Regulations of 1956 issued by the Central Bank of the Bahamas.

The notes may not be offered or sold to the public in Brazil. Accordingly, the notes have not been submitted to the Comissao de Valores Mobiliarios for approval. Documents relating to this offering may not be supplied to the public as a public offering in Brazil or be used in connection with any offer for subscription or sale to the public in Brazil.

Neither the notes nor Wachovia Corporation is registered in the Securities Registry of the Superintendency of Securities and Insurance in Chile.

The notes have not been registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission and may not be offered or sold publicly in Mexico. This prospectus supplement and the accompanying prospectus may not be publicly distributed in Mexico.

RECENT DEVELOPMENTS

Certain Proceedings

Wachovia's periodic reports filed with the SEC contain information regarding certain pending legal and regulatory proceedings involving Wachovia. The following supplements Wachovia's Annual Report on Form 10-K for the period ended December 31, 2004.

S-25

Table of Contents

Wachovia and certain of its subsidiaries are involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising from the conduct of our business activities. These proceedings include actions brought against Wachovia and/or its subsidiaries with respect to transactions in which Wachovia and/or our subsidiaries acted as banker, lender, underwriter, financial advisor or broker or in activities related thereto. In addition, Wachovia and its subsidiaries may be requested to provide information or otherwise cooperate with governmental authorities in the conduct of investigations of other persons or industry groups. It is Wachovia's policy to cooperate in all regulatory inquiries and investigations.

Although there can be no assurance as to the ultimate outcome, Wachovia and/or our subsidiaries have generally denied, or believe we have a meritorious defense and will deny, liability in all significant litigation pending against us, including the matters described below, and we intend to defend vigorously each such case. Reserves are established for legal claims when payments associated with the claims become probable and the costs can be reasonably estimated. The actual costs of resolving legal claims may be substantially higher or lower than the amounts reserved for those claims.

Securities Litigation. A number of purported class actions were filed in June through August 1999 against us in the United States District Courts for the Western District of North Carolina and for the Eastern District of Pennsylvania. These actions named Legacy First Union and certain executive officers as defendants and were purported to be on behalf of persons who purchased shares of our common stock from August 14, 1998, through May 24, 1999. These actions were consolidated into one case in the U.S. District Court for the Western District of North Carolina in October 1999. These complaints alleged various violations of federal securities law, including violations of Section 10(b) of the Exchange Act, and that the defendants made materially misleading statements and/or material omissions which artificially inflated prices for our common stock. The complaints alleged that management failed to disclose integration problems in the CoreStates Financial Corp merger and misstated the value of our interest in certain mortgage-backed securities of The Money Store, Inc. (TMSI) acquired by Legacy First Union on June 30, 1998. Plaintiffs sought a judgment awarding damages and other relief. In January 2001, the U.S. District Court for the Western District of North Carolina granted Wachovia's motion to dismiss the litigation for failure to state a claim upon which relief could be granted. Although the plaintiffs did not appeal this ruling, they sought, and received permission to file an amended complaint. In August 2001, plaintiffs filed an amended complaint that abandoned their previous allegations concerning the CoreStates Financial Corp merger and primarily raised new allegations of irregularities at TMSI prior to its acquisition by Legacy First Union. In October 2001, Wachovia filed a motion to dismiss the securities litigation consolidated in the U.S. District Court for the Western District of North Carolina. In September 2002, the court granted the motion in part, limiting any new complaint to claims regarding alleged misstatements or omissions pled in earlier complaints. The plaintiffs filed a third consolidated and amended complaint in October 2002, purportedly on behalf of a class of purchasers of our common stock during the period from March 4, 1998 to May 24, 1999. The complaint alleges, among other things, that Legacy First Union disregarded problems at TMSI and did not write down goodwill from the TMSI acquisition soon enough. In December 2003, the court denied Wachovia's motion to strike portions of this complaint. In February 2004, Wachovia filed a motion to dismiss the amended complaint. We believe the allegations contained in this latest complaint are without merit and will vigorously defend them.

Pioneer Litigation. On July 26, 2000, a jury in the Philadelphia County (PA) Court of Common Pleas returned a verdict in the case captioned Pioneer Commercial Funding Corporation v. American Financial Mortgage Corporation, CoreStates Bank, N.A., et al. The verdict against CoreStates Bank, N.A. (CoreStates), a predecessor of WBNA, included consequential damages of \$13.5 million and punitive damages of \$337.5 million. The trial court had earlier directed a verdict against CoreStates for compensatory damages of \$1.7 million. The plaintiff, who was not a CoreStates customer, alleged that the sum of \$1.7 million, which it claims it owned, was improperly setoff by CoreStates. Upon Wachovia's motion, the trial court reduced the amount of the punitive damages award to \$40.5 million in December 2000. Wachovia believes that numerous reversible errors occurred at the trial, and that the facts do not support the damages awards. In March 2002, the Pennsylvania Superior Court vacated the award of punitive damages, affirmed the awards of

Table of Contents

consequential and compensatory damages and remanded the case for a new trial on punitive damages. On August 19, 2004, the Pennsylvania Supreme Court reversed the Pennsylvania Superior Court's judgment and remanded the case to the trial court for an entry of judgment in favor of Wachovia on all counts. The Court denied the plaintiff's application for re-argument on December 20, 2004.

Securities and Exchange Commission. As previously disclosed, on July 23, 2004, the SEC staff advised Wachovia that the staff was considering recommending to the SEC that it institute an enforcement action against Wachovia and certain former Legacy Wachovia officers, some of whom remain with the combined company, relating to Legacy Wachovia's purchases of Legacy First Union common stock and the disclosures made by both legacy companies related to those purchases following the April 2001 announcement of the merger between First Union and Legacy Wachovia. Wachovia, without admitting or denying the allegations set forth in the complaint filed on November 4, 2004, consented to entry of final judgment by the United States District Court for the District of Columbia permanently enjoining Wachovia from directly or indirectly violating Sections 13(a) and 14(a) of the Securities Exchange Act of 1934 and Rules 12b-20, 13a-13 and 14a-9 promulgated thereunder. The judgment also orders Wachovia to pay a civil money penalty of \$37 million pursuant to Section 21(d)(3) of the Securities Exchange Act of 1934. Wachovia anticipates that there will be no additional SEC enforcement proceedings related to this matter against it or any current or former officers.

In the Matter of KPMG LLP Certain Auditor Independence Issues. The SEC has requested Wachovia to produce certain information concerning any agreements or understandings by which Wachovia referred clients to KPMG LLP during the period January 1, 1997 to November 2003 in connection with an inquiry regarding the independence of KPMG LLP as Wachovia's outside auditors during such period. Wachovia is continuing to cooperate with the SEC in its inquiry, which is being conducted pursuant to a formal order of investigation entered by the SEC on October 21, 2003. Wachovia believes the SEC's inquiry relates to certain tax services offered to Wachovia customers by KPMG LLP during the period from 1997 to early 2002, and whether these activities might have caused KPMG LLP not to be independent from Wachovia, as defined by applicable accounting and SEC regulations requiring auditors of an SEC-reporting company to be independent of the company. Wachovia and/or KPMG LLP received fees in connection with a small number of personal financial consulting transactions related to these services. KPMG LLP has confirmed to Wachovia that during all periods covered by the SEC's inquiry, including the present, KPMG LLP was and is independent from Wachovia under applicable accounting and SEC regulations.

Mutual Fund Sales Practices. The staff of the Securities and Exchange Commission is currently investigating Wachovia Securities, LLC regarding Wachovia Securities, LLC's practices and procedures for the offer and sale of certain mutual funds. Wachovia believes the SEC is reviewing the adequacy of Wachovia Securities, LLC's disclosures regarding revenue sharing arrangements with certain investment companies and Wachovia Securities, LLC's mutual fund sales and distribution practices.

Research Matters. Various regulators have been investigating Wachovia Capital Markets, LLC, Wachovia's institutional broker-dealer subsidiary, related to the existence of alleged conflicts of interest between Wachovia Capital Markets, LLC's equity research and investment banking departments. Certain of those regulators have notified Wachovia Capital Markets, LLC that they are considering instituting proceedings based upon various purported regulatory violations, including generally state securities laws and state laws regarding business practices. Wachovia Capital Markets, LLC is in discussions with these regulators about resolving these matters.

Adelphia Litigation. Certain Wachovia affiliates are defendants in an adversary proceeding pending in the United States Bankruptcy Court for the Southern District of New York related to the bankruptcy of Adelphia Communications Corporation (Adelphia). The Official Committee of Unsecured Creditors in that bankruptcy case has filed an adversary proceeding on behalf of Adelphia against over 300 financial services companies, including the Wachovia affiliates. The complaint asserts claims against the defendants under state law, bankruptcy law and the Bank Holding Company Act and seeks equitable relief and an unspecified amount of compensatory and punitive damages. The Official Committee of Equity Security Holders has

Table of Contents

sought leave to intervene in that complaint and sought leave to bring additional claims against certain of the financial services companies, including the Wachovia affiliates, including additional federal and state claims. The bankruptcy court has not yet permitted the creditors committee or the equity holders committee to proceed with either of their claims and Wachovia and other defendants have filed motions to dismiss the complaints.

In addition, certain affiliates of Wachovia, together with numerous other financial services companies, have been named in several private civil actions by investors in Adelphia debt and/or equity securities, alleging among other claims, misstatements in connection with Adelphia securities offerings between 1997 and 2001. Wachovia affiliates acted as an underwriter in certain of those securities offerings, as agent and/or lender for certain Adelphia credit facilities, and as a provider of Adelphia's treasury/cash management services. These complaints, which seek unspecified damages, have been consolidated in the United States District Court for the Southern District of New York.

Bluebird Partners, L.P., Litigation. On December 12, 2002, the jury in the Supreme Court of the State of New York, County of New York, returned a verdict against First Fidelity Bank, N.A. New Jersey, a predecessor to WBNA in the case captioned Bluebird Partners, L.P. v. First Fidelity Bank, N.A., et al. The trial court directed a verdict in favor of CoreStates New Jersey National Bank, another predecessor of WBNA. In this action for breach of contract, breach of fiduciary duty, negligence and malpractice, plaintiff alleges that First Fidelity, while serving as indenture trustee for debt certificates issued by Continental Airlines, failed to take the necessary action to protect the value of the collateral after Continental Airlines filed for bankruptcy on December 3, 1990 and that the decline in the value of the collateral during the pendency of the bankruptcy caused plaintiff's losses. On July 10, 2003, the trial judge granted First Fidelity's motion to set aside the verdict, holding that the evidence was insufficient to support the verdict. Plaintiff appealed, and on October 7, 2004, the Supreme Court, Appellate Division, First Department reversed the dismissal and reinstated the verdict. On January 13, 2005, the court entered judgment against WBNA in the amount of \$32.9 million plus pre- and post-judgment interest at the statutory rate from April 27, 1993. Post-judgment interest continues to accrue at the statutory rate until the judgment is paid. On January 24, 2005, Bluebird filed a notice of appeal of the judgment amount. Wachovia filed a motion for a new trial. In addition, Wachovia believes that numerous reversible errors occurred, and that the evidence was insufficient to support the verdict that First Fidelity's actions caused Bluebird's loss. Wachovia has filed a motion for leave to appeal to the Court of Appeals.

Other Regulatory Matters. Governmental and self-regulatory authorities have instituted numerous ongoing investigations of various practices in the securities and mutual fund industries, including those discussed in Wachovia's previous filings with the SEC and those relating to revenue sharing, market-timing, late trading and record retention. The investigations cover advisory companies to mutual funds, broker-dealers, hedge funds and others. Wachovia has received subpoenas and other requests for documents and testimony relating to the investigations, is endeavoring to comply with those requests, is cooperating with the investigations, and where appropriate, is engaging in discussions to resolve the investigations. Wachovia is continuing its own internal review of policies, practices, procedures and personnel, and is taking remedial action where appropriate. In connection with one of these investigations, on July 28, 2004, the SEC staff advised Wachovia's investment advisory subsidiary that the staff is considering recommending to the SEC that it institute an enforcement action against the investment advisory subsidiary, Evergreen Investment Management Company, LLC (Evergreen), and other Evergreen entities. The SEC staff's proposed allegations relate to (i) an arrangement involving a former Evergreen employee and an individual broker pursuant to which the broker, on behalf of a client, made exchanges to and from a mutual fund during the period December 2000 through April 2003 in excess of the limitations set forth in the mutual fund prospectus, (ii) purchase and sale activity from September 2001 through January 2003 by a former Evergreen portfolio manager in the mutual fund he managed at the time, (iii) the sufficiency of systems for monitoring exchanges and enforcing exchange limitations stated in mutual fund prospectuses, and (iv) the adequacy of e-mail retention practices. In addition, on September 17, 2004, the SEC staff advised Wachovia Securities, LLC that

Table of Contents

the staff is considering recommending to the SEC that it institute an enforcement action against the brokerage subsidiary regarding the allegations described in (i) of the preceding sentence. Wachovia currently is engaged in discussions with the SEC staff regarding the matters described in (i) through (iv) above. Wachovia intends to make a written Wells submission, if it is unable to satisfactorily resolve these matters, explaining why Wachovia believes enforcement action should not be instituted.

In addition, as previously disclosed, Wachovia also is cooperating with governmental and self-regulatory authorities in matters relating to the brokerage operations of Prudential Financial, Inc. that were included in Wachovia's retail brokerage combination with Prudential. Under the terms of that transaction, Wachovia is indemnified by Prudential for liabilities relating to those matters.

Outlook. Based on information currently available, advice of counsel, available insurance coverage and established reserves, Wachovia believes that the eventual outcome of the actions against Wachovia and/or its subsidiaries, including the matters described above, will not, individually or in the aggregate, have a material adverse effect on Wachovia's consolidated financial position or results of operations. However, in the event of unexpected future developments, it is possible that the ultimate resolution of those matters, if unfavorable, may be material to Wachovia's results of operations for any particular period.

Leveraged Lease Accounting For a Leveraged Lease, SFAS No. 13, Accounting for Leases (SFAS 13), as amended and interpreted, states that if a change in an important lease assumption changes the total estimated net income under the lease, then the rate of return and the allocation of lease income to positive investment years must be recalculated from inception of the lease using the revised important assumption. The net investment in the lease must then be adjusted to the revised amount by a charge or credit to the results of operations in the period in which the important assumption is changed. Changes that affect only the timing of cash flows and not the total net income under the lease do not result in a recalculation of the lease.

The Financial Accounting Standards Board (the FASB) continues to discuss several matters related to leveraged lease accounting including the extent to which changes that affect the timing of cash flows but not the total net income under the lease should be incorporated into the recalculation when a change in an important lease assumption occurs. If the FASB modifies existing interpretations of SFAS 13 and related industry practice, it could result in a one-time charge to the results of operations. An amount approximating this one-time charge would then be recognized in income over the remaining terms of the affected leases. It is not possible at this time to determine when any changes to existing lease accounting guidance and related industry practice might occur or the extent of the one-time charge that would likely result from any such changes that are adopted.

Wachovia understands that the FASB intends to continue discussing this matter at a board meeting in the near future. Wachovia will monitor these discussions and to the extent any decisions are reached by the FASB that result in material changes from our current accounting treatment for leveraged leases, Wachovia will provide appropriate disclosures.

WACHOVIA CORPORATION

(Formerly named First Union Corporation)

Senior Global Medium-Term Notes, Series E

and

Subordinated Global Medium-Term Notes, Series F

Terms of Sale

Wachovia Corporation may from time to time offer and sell notes with various terms, including the following:

| | |
|--|---|
| stated maturity of 9 months or longer | amount of principal or interest may be determined by reference to an index or formula |
| fixed or floating interest rate, zero-coupon or issued with original issue discount; a floating interest rate may be based on: | book-entry form only through The Depository Trust Company |
| commercial paper rate | redemption at the option of Wachovia or repayment at the option of the holder |
| prime rate | interest on notes paid monthly, quarterly, semi-annually or annually |
| LIBOR | denominations of \$1,000 and multiples of \$1,000 |

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

| | |
|---|---|
| EURIBOR | denominated in a currency other than U.S dollars or in a composite currency |
| treasury rate | settlement in immediately available funds |
| CMT rate | |
| CD rate | |
| federal funds rate | |
| ranked as senior or subordinated indebtedness of Wachovia | |

The final terms of each note will be included in a pricing supplement. Wachovia will receive between \$3,995,000,000 and \$3,960,000,000 of the proceeds from the sale of the notes, after paying the agents' commissions of between \$5,000,000 and \$40,000,000.

Wachovia has filed an application to list notes issued under this prospectus on the Luxembourg Stock Exchange. The Luxembourg Stock Exchange has advised us that with respect to notes so listed, this prospectus is valid for one year from the date of this prospectus.

Prior to September 1, 2001, our company was named First Union Corporation. We changed our name on September 1, 2001, following our merger with the former Wachovia Corporation.

Neither the Securities and Exchange Commission, any state securities commission or the Commissioner of Insurance of the state of North Carolina has approved or disapproved of the securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

These securities will be our unsecured obligations and will not be savings accounts, deposits or other obligations of any bank or non-bank subsidiary of ours and are not insured by the Federal Deposit Insurance Corporation, the Bank Insurance Fund or any other governmental agency.

Wachovia may sell the notes directly or through one or more agents or dealers, including the agents listed below. The agents are not required to sell any particular amount of the notes.

Wachovia may use this prospectus in the initial sale of any notes. In addition, First Union Securities, Inc. or any other affiliate of Wachovia may use this prospectus in a market-making or other transaction in any note after its initial sale. ***Unless Wachovia or its agent informs the purchaser otherwise in the confirmation of sale or pricing supplement, this prospectus is being used in a market-making transaction.***

ABOUT THIS PROSPECTUS

General

This document is called a prospectus and is part of a registration statement that we filed with the SEC using a shelf registration or continuous offering process. Under this shelf registration, we may from time to time sell any combination of the securities described in this prospectus in one or more offerings up to a total dollar amount of \$4,000,000,000.

This prospectus provides you with a general description of the securities we may offer. Each time we sell securities we will provide a pricing supplement containing specific information about the terms of the securities being offered. That pricing supplement may include a discussion of any risk factors or other special considerations that apply to those securities. The pricing supplement may also add, update or change the information in this prospectus. If there is any inconsistency between the information in this prospectus and any pricing supplement, you should rely on the information in that pricing supplement. You should read both this prospectus and any pricing supplement together with additional information described under the heading **Where You Can Find More Information**.

The registration statement containing this prospectus, including exhibits to the registration statement, provides additional information about us and the securities offered under this prospectus. The registration statement can be read at the SEC web site or at the SEC offices mentioned under the heading **Where You Can Find More Information**.

When acquiring any securities discussed in this prospectus, you should rely only on the information provided in this prospectus and in any pricing supplement, including the information incorporated by reference. Neither we nor any underwriters or agents have authorized anyone to provide you with different information. We are not offering the securities in any state where the offer is prohibited. You should not assume that the information in this prospectus, any pricing supplement or any document incorporated by reference is truthful or complete at any date other than the date mentioned on the cover page of these documents.

We may sell securities to underwriters who will sell the securities to the public on terms fixed at the time of sale. In addition, the securities may be sold by us directly or through dealers or agents designated from time to time, which agents may be our affiliates. If we, directly or through agents, solicit offers to purchase the securities, we reserve the sole right to accept and, together with our agents, to reject, in whole or in part, any of those offers.

The pricing supplement will contain the names of the underwriters, dealers or agents, if any, together with the terms of offering, the compensation of those underwriters and the net proceeds to us. Any underwriters, dealers or agents participating in the offering may be deemed underwriters within the meaning of the Securities Act of 1933 (the **Securities Act**).

One or more of our subsidiaries, including First Union Securities, Inc., may buy and sell any of the securities after the securities are issued as part of their business as a broker-dealer. Those subsidiaries may use this prospectus and the related pricing supplement in those transactions. Any sale by a subsidiary will be made at the prevailing market price at the time of sale. Unless otherwise mentioned or unless the context requires otherwise, any reference in this prospectus to **Wachovia Securities** means First Union Securities, Inc. and does not mean Wachovia Securities, Inc., a broker-dealer subsidiary of Wachovia which is not participating in this offering.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus to Wachovia , we , us , our or similar references mean Wachovia Corporation and its subsidiaries.

Table of Contents

Selling Restrictions Outside the United States

Offers and sales of the notes are subject to restrictions in the United Kingdom. The distribution of this prospectus and the offering of the notes in certain other jurisdictions may also be restricted by law. This prospectus does not constitute an offer of, or an invitation on Wachovia's behalf or on behalf of the agents or any of them to subscribe to or purchase, any of the notes. This prospectus may not be used for or in connection with an offer or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation. Please refer to the section entitled "Plan of Distribution".

As long as the notes are listed on the Luxembourg Stock Exchange, a supplemental prospectus will be prepared and filed with the Luxembourg Stock Exchange in the event of a material change in the financial condition of Wachovia that is not reflected in this prospectus, for the use in connection with any subsequent issue of debt securities to be listed on the Luxembourg Stock Exchange. As long as the notes are listed on the Luxembourg Stock Exchange, if the terms and conditions of the notes are modified or amended in a manner which would make this prospectus materially inaccurate or misleading, a new prospectus or supplemental prospectus will be prepared.

Wachovia accepts responsibility for the information contained in this prospectus. The Luxembourg Stock Exchange takes no responsibility for the contents of this document, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss no matter how arising from or in reliance upon the whole or any part of the contents of this prospectus.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's public reference room in Washington, D.C. Please call the SEC at 1-800-SEC-0330 for further information on the public reference rooms. In addition, our SEC filings are available to the public at the SEC's web site at <http://www.sec.gov>. You can also inspect reports, proxy statements and other information about us at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York.

The SEC allows us to incorporate by reference into this prospectus the information in documents we file with it. This means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be a part of this prospectus and should be read with the same care. When we update the information contained in documents that have been incorporated by reference by making future filings with the SEC the information incorporated by reference in this prospectus is considered to be automatically updated and superseded. In other words, in the case of a conflict or inconsistency between information contained in this prospectus and information incorporated by reference into this prospectus, you should rely on the information contained in the document that was filed later. We incorporate by reference the documents listed below and any documents we file with the SEC in the future under Section 13(a), 13(c), 14, or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act) until our offering is completed:

Annual Report on Form 10-K for the year ended December 31, 2001;

Quarterly Report on Form 10-Q for the quarter ended March 31, 2002; and

Current Reports on Form 8-K dated August 30, 2001, September 6, 2001, January 23, 2002 and April 18, 2002.

You may request a copy of these filings, other than an exhibit to a filing unless that exhibit is specifically incorporated by reference into that filing, at no cost, by writing to or telephoning us at the following address:

Corporate Relations

Wachovia Corporation

One Wachovia Center

301 South College Street

Charlotte, North Carolina 28288-0206

(704) 374-6782

As long as the notes are listed on the Luxembourg Stock Exchange, you may also obtain documents incorporated by reference in this prospectus free of charge from the Luxembourg Listing Agent or the Luxembourg Paying Agent and Transfer Agent.

Table of Contents

FORWARD-LOOKING STATEMENTS

This prospectus and applicable pricing supplements contain or incorporate statements that are forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements can be identified by the use of forward-looking language such as will likely result, may, are expected to, is anticipated, estimate, projected, intends to, or other similar words. Our actual performance or achievements could be significantly different from the results expressed in or implied by these forward-looking statements. These statements are subject to certain risks and uncertainties, including but not limited to certain risks described in the pricing supplement or the documents incorporated by reference. When considering these forward-looking statements, you should keep in mind these risks, uncertainties and other cautionary statements made in this prospectus and the pricing supplements. You should not place undue reliance on any forward-looking statement, which speaks only as of the date made. You should refer to our periodic and current reports filed with the SEC for specific risks which could cause actual results to be significantly different from those expressed or implied by these forward-looking statements.

WACHOVIA CORPORATION

Wachovia was incorporated under the laws of North Carolina in 1967. We are registered as a financial holding company and a bank holding company under the Bank Holding Company Act of 1956, as amended, and are supervised and regulated by the Board of Governors of the Federal Reserve System. Our banking and securities subsidiaries are supervised and regulated by various federal and state banking and securities regulatory authorities. On September 1, 2001, the former Wachovia Corporation merged with and into First Union Corporation, and First Union Corporation changed its name to Wachovia Corporation.

In addition to North Carolina, Wachovia's full-service banking subsidiaries operate in Connecticut, Delaware, Florida, Georgia, Maryland, New Jersey, New York, Pennsylvania, South Carolina, Virginia and Washington, D.C. These full-service banking subsidiaries provide a wide range of commercial and retail banking and trust services. Wachovia also provides various other financial services, including mortgage banking, home equity lending, leasing, investment banking, insurance and securities brokerage services through other subsidiaries.

In 1985, the Supreme Court upheld regional interstate banking legislation. Since then, Wachovia has concentrated its efforts on building a large regional banking organization in what it perceives to be some of the better banking markets in the eastern United States. Since November 1985, Wachovia has completed over 90 banking-related acquisitions.

Wachovia continually evaluates its business operations and organizational structures to ensure they are aligned closely with its goal of maximizing performance in its core business lines, Capital Management, Wealth Management, the General Bank and Corporate and Investment Banking. When consistent with our overall business strategy, we may consider the disposition of certain of our assets, branches, subsidiaries or lines of business. We continue to routinely explore acquisition opportunities, particularly in areas that would complement our core business lines, and frequently conduct due diligence activities in connection with possible acquisitions. As a result, acquisition discussions and, in some cases, negotiations frequently take place, and future acquisitions involving cash, debt or equity securities can be expected.

Wachovia is a separate and distinct legal entity from its banking and other subsidiaries. Dividends received from our subsidiaries are our principal source of funds to pay dividends on our common and preferred stock and debt service on our debt. Various federal and state statutes and regulations limit the amount of dividends that our banking and other subsidiaries may pay to us without regulatory approval.

Table of Contents

RISK FACTORS

Our Credit Ratings May Not Reflect All Risks of An Investment in the Notes

The credit ratings of our medium-term note program may not reflect the potential impact of all risks related to structure and other factors on any trading market for, or trading value of, your notes. In addition, real or anticipated changes in our credit ratings will generally effect any trading market for, or trading value of, your notes.

Risks Relating to Indexed Notes

We use the term *indexed notes* to mean notes whose value is linked to an underlying property or index. Indexed notes may present a high level of risk, and those who invest in indexed notes may lose their entire investment. In addition, the treatment of indexed notes for U.S. federal income tax purposes is often unclear due to the absence of any authority specifically addressing the issues presented by any particular indexed note. Thus, if you propose to invest in indexed notes, you should independently evaluate the federal income tax consequences of purchasing an indexed note that apply in your particular circumstances. You should also read *United States Taxation* for a discussion of U.S. tax matters.

Investors in Indexed Notes Could Lose Their Investment

The amount of principal and/or interest payable on an indexed note and the cash value or physical settlement value of a physically settled note will be determined by reference to the price, value or level of one or more securities, currencies, commodities or other properties, any other financial, economic or other measure or instrument, including the occurrence or non-occurrence of any event or circumstance, and/or one or more indices or baskets of any of these items. We refer to each of these as an *index*. The direction and magnitude of the change in the price, value or level of the relevant index will determine the amount of principal and/or interest payable on the indexed note, and the cash value or physical settlement value of a physically settled note. The terms of a particular indexed note may or may not include a guaranteed return of a percentage of the face amount at maturity or a minimum interest rate. Thus, if you purchase an indexed note, you may lose all or a portion of the principal or other amount you invest and may receive no interest on your investment.

The Issuer of a Security or Currency That Serves as an Index Could Take Actions That May Adversely Affect an Indexed Note

The issuer of a security that serves as an index or part of an index for an indexed note will have no involvement in the offer and sale of the indexed note and no obligations to the holder of the indexed note. The issuer may take actions, such as a merger or sale of assets, without regard to the interests of the holder. Any of these actions could adversely affect the value of a note indexed to that security or to an index of which that security is a component.

If the index for an indexed note includes a non-U.S. dollar currency or other asset denominated in a non-U.S. dollar currency, the government that issues that currency will also have no involvement in the offer and sale of the indexed note and no obligations to the holder of the indexed note. That government may take actions that could adversely affect the value of the note. See *Risks Relating to Notes Denominated or Payable*

in or Linked to a Non-U.S. Dollar Currency below for more information about these kinds of government actions.

An Indexed Note May Be Linked to a Volatile Index, Which Could Hurt Your Investment

Some indices are highly volatile, which means that their value may change significantly, up or down, over a short period of time. The amount of principal or interest that can be expected to become payable on an

Table of Contents

indexed note may vary substantially from time to time. Because the amounts payable with respect to an indexed note are generally calculated based on the value or level of the relevant index on a specified date or over a limited period of time, volatility in the index increases the risk that the return on the indexed note may be adversely affected by a fluctuation in the level of the relevant index.

The volatility of an index may be affected by political or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of an indexed note.

An Index to Which a Note Is Linked Could Be Changed or Become Unavailable

Some indices compiled by us or our affiliates or third parties may consist of or refer to several or many different securities, commodities or currencies or other instruments or measures. The compiler of such an index typically reserves the right to alter the composition of the index and the manner in which the value or level of the index is calculated. An alteration may result in a decrease in the value of or return on an indexed note that is linked to the index. The indices for our indexed notes may include published indices of this kind or customized indices developed by us or our affiliates in connection with particular issues of indexed notes.

A published index may become unavailable, or a customized index may become impossible to calculate in the normal manner, due to events such as war, natural disasters, cessation of publication of the index or a suspension or disruption of trading in one or more securities, commodities or currencies or other instruments or measures on which the index is based. If an index becomes unavailable or impossible to calculate in the normal manner, the terms of a particular indexed note may allow us to delay determining the amount payable as principal or interest on an indexed note, or we may use an alternative method to determine the value of the unavailable index. Alternative methods of valuation are generally intended to produce a value similar to the value resulting from reference to the relevant index. However, it is unlikely that any alternative method of valuation we use will produce a value identical to the value that the actual index would produce. If we use an alternative method of valuation for a note linked to an index of this kind, the value of the note, or the rate of return on it, may be lower than it otherwise would be.

Some indexed notes are linked to indices that are not commonly used or that have been developed only recently. The lack of a trading history may make it difficult to anticipate the volatility or other risks associated with an indexed note of this kind. In addition, trading in these indices or their underlying stocks, commodities or currencies or other instruments or measures, or options or futures contracts on these stocks, commodities or currencies or other instruments or measures, may be limited, which could increase their volatility and decrease the value of the related indexed notes or the rates of return on them.

We May Engage in Hedging Activities that Could Adversely Affect an Indexed Note

In order to hedge an exposure on a particular indexed note, we may, directly or through our affiliates, enter into transactions involving the securities, commodities or currencies or other instruments or measures that underlie the index for the note, or involving derivative instruments, such as swaps, options or futures, on the index or any of its component items. By engaging in transactions of this kind, we could adversely affect the value of an indexed note. It is possible that we could achieve substantial returns from our hedging transactions while the value of the indexed note may decline.

Information About Indices May Not Be Indicative of Future Performance

If we issue an indexed note, we may include historical information about the relevant index in the relevant pricing supplement. Any information about indices that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in the relevant index that may occur in the future.

Table of Contents

We May Have Conflicts of Interest Regarding an Indexed Note

First Union Securities, Inc. and our other affiliates may have conflicts of interest with respect to some indexed notes. First Union Securities, Inc. and our other affiliates may engage in trading, including trading for hedging purposes, for their proprietary accounts or for other accounts under their management, in indexed notes and in the securities, commodities or currencies or other instruments or measures on which the index is based or in other derivative instruments related to the index or its component items. These trading activities could adversely affect the value of indexed notes. We and our affiliates may also issue or underwrite securities or derivative instruments that are linked to the same index as one or more indexed notes. By introducing competing products into the marketplace in this manner, we could adversely affect the value of an indexed note.

Wachovia Bank, N.A. (formerly named First Union National Bank) or another of our affiliates may serve as calculation agent for the indexed notes and may have considerable discretion in calculating the amounts payable in respect of the notes. To the extent that Wachovia Bank, N.A. or another of our affiliates calculates or compiles a particular index, it may also have considerable discretion in performing the calculation or compilation of the index. Exercising discretion in this manner could adversely affect the value of an indexed note based on the index or the rate of return on the security.

Risks Relating to Notes Denominated or Payable in or Linked to a Non-U.S. Dollar Currency

If you intend to invest in a non-U.S. dollar note e.g., a note whose principal and/or interest is payable in a currency other than U.S. dollars or that may be settled by delivery of or reference to a non-U.S. dollar currency or property denominated in or otherwise linked to a non-U.S. dollar currency you should consult your own financial and legal advisors as to the currency risks entailed by your investment. Notes of this kind may not be an appropriate investment for investors who are unsophisticated with respect to non-U.S. dollar currency transactions.

An Investment in a Non-U.S. Dollar Note Involves Currency-Related Risks

An investment in a non-U.S. dollar note entails significant risks that are not associated with a similar investment in a note that is payable solely in U.S. dollars and where settlement value is not otherwise based on a non-U.S. dollar currency. These risks include the possibility of significant changes in rates of exchange between the U.S. dollar and the various non-U.S. dollar currencies or composite currencies and the possibility of the imposition or modification of foreign exchange controls or other conditions by either the United States or non-U.S. governments. These risks generally depend on factors over which we have no control, such as economic and political events and the supply of and demand for the relevant currencies in the global markets.

Changes in Currency Exchange Rates Can Be Volatile and Unpredictable

Rates of exchange between the U.S. dollar and many other currencies have been highly volatile, and this volatility may continue and perhaps spread to other currencies in the future. Fluctuations in currency exchange rates could adversely affect an investment in a note denominated in, or where value is otherwise linked to, a specified currency other than U.S. dollars. Depreciation of the specified currency against the U.S. dollar could result in a decrease in the U.S. dollar-equivalent value of payments on the note, including the principal payable at maturity. That in turn could cause the market value of the note to fall. Depreciation of the specified currency against the U.S. dollar could result in a loss to the investor on a U.S. dollar basis.

In courts outside of New York, investors may not be able to obtain judgment in a specified currency other than U.S. dollars. For example, a judgment for money in an action based on a non-U.S. dollar note in many other U.S. federal or state courts ordinarily would be enforced in the United States only in U.S. dollars.

Table of Contents

The date used to determine the rate of conversion of the currency in which any particular note is denominated into U.S. dollars will depend upon various factors, including which court renders the judgment.

Information About Exchange Rates May Not Be Indicative of Future Performance

If we issue a non-U.S. dollar note, we may include in the relevant pricing supplement a currency supplement that provides information about historical exchange rates for the relevant non-U.S. dollar currency or currencies. Any information about exchange rates that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in currency exchange rates that may occur in the future. That rate will likely differ from the exchange rate used under the terms that apply to a particular note.

Table of Contents**USE OF PROCEEDS**

Wachovia currently intends to use the net proceeds from the sale of any notes for general corporate purposes, which may include:

reducing debt;

investments at the holding company level;

investing in, or extending credit to, our operating subsidiaries;

acquisitions;

stock repurchases; and

other purposes as mentioned in any pricing supplement.

Pending such use, we may temporarily invest the net proceeds. The precise amounts and timing of the application of proceeds will depend upon our funding requirements and the availability of other funds. Except as mentioned in any pricing supplement, specific allocations of the proceeds to such purposes will not have been made at the date of that pricing supplement.

Based upon our historical and anticipated future growth and our financial needs, we may engage in additional financings of a character and amount that we determine as the need arises.

CONSOLIDATED EARNINGS RATIOS

The following table provides Wachovia's consolidated ratios of earnings to fixed charges and preferred stock dividends:

| | Three Months Ended March 31, | Years Ended December 31, | | | | |
|---|---|---------------------------------|-------------|-------------|-------------|-------------|
| | 2002 | 2001 | 2000 | 1999 | 1998 | 1997 |
| Consolidated Ratios of Earnings to Fixed Charges and Preferred Stock Dividends | | | | | | |
| Excluding interest on deposits | 3.20x | 1.61 | 1.13 | 2.29 | 2.13 | 2.50 |
| Including interest on deposits | 1.88x | 1.27 | 1.06 | 1.62 | 1.51 | 1.57 |

For purposes of computing these ratios

earnings represent income from continuing operations before extraordinary items and cumulative effect of a change in accounting principles, plus income taxes and fixed charges (excluding capitalized interest);

fixed charges, excluding interest on deposits, represent interest (including capitalized interest), one-third of rents and all amortization of debt issuance costs; and

fixed charges, including interest on deposits, represent all interest (including capitalized interest), one-third of rents and all amortization of debt issuance costs.

One-third of rents is used because it is the proportion deemed representative of the interest factor.

Table of Contents**SELECTED CONSOLIDATED CONDENSED FINANCIAL DATA**

The following is selected unaudited consolidated condensed financial information for Wachovia for the three months ended March 31, 2002, and for the year ended December 31, 2001. The summary below should be read in conjunction with the consolidated financial statements of Wachovia, and the related notes thereto, and the other detailed information contained in Wachovia's March 31, 2002 Quarterly Report on Form 10-Q and 2001 Annual Report on Form 10-K.

| | Three Months Ended March 31, 2002 | Year Ended December 31, 2001(a) |
|---|--|--|
| (In millions, except per share data) | | |
| CONSOLIDATED CONDENSED SUMMARIES OF INCOME | | |
| Interest income | \$ 3,903 | \$ 16,100 |
| Interest expense | 1,477 | 8,325 |
| Net interest income | 2,426 | 7,775 |
| Provision for loan losses | 339 | 1,947 |
| Net interest income after provision for loan losses | 2,087 | 5,828 |
| Securities transactions | (6) | (67) |
| Noninterest income | 2,033 | 6,363 |
| Merger-related and restructuring charges | (8) | 106 |
| Noninterest expense | 2,777 | 9,725 |
| Income before income taxes | 1,345 | 2,293 |
| Income taxes | 432 | 674 |
| Net income | 913 | 1,619 |
| Dividends on preferred stock | 6 | 6 |
| Net income available to common stockholders | \$ 907 | \$ 1,613 |
| PER COMMON SHARE DATA | | |
| Basic earnings | \$ 0.67 | \$ 1.47 |
| Diluted earnings | 0.66 | 1.45 |
| Cash dividends | 0.24 | 0.96 |
| Average common shares basic | 1,355 | 1,096 |
| Average common shares diluted | \$ 1,366 | \$ 1,105 |
