**REPLIGEN CORPORATION**

**NOTES TO FINANCIAL STATEMENTS**

**(Unaudited)**

**1. Basis of Presentation**

The financial statements included herein have been prepared by Repligen Corporation (the Company, Repligen or we), in accordance with accounting principles generally accepted in the United States and pursuant to the rules and regulations of the Securities and Exchange Commission for quarterly reports on Form 10-Q and Article 10 of Regulation S-X and do not include all of the information and footnote disclosures required by accounting principles generally accepted in the United States. These financial statements should be read in conjunction with the audited financial statements and accompanying notes thereto included in our Form 10-K for the year ended March 31, 2006.

In the opinion of management, the accompanying unaudited financial statements include all adjustments, consisting of only normal, recurring adjustments, necessary for a fair presentation of the financial position, results of operations and cash flows. The results of operations for the interim periods presented are not necessarily indicative of results to be expected for the entire year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Certain reclassifications of prior period data have been made to conform to the current reporting period. A reclassification on the Statement of Cash Flows of \$233,000 was made from investing activities to operating activities on September 30, 2005 due to a reclassification made in the classification of interest receivables on the balance sheet as of March 31, 2005 on the Form 10K Balance Sheet dated March 31, 2006.

**2. Revenue Recognition**

We apply Staff Accounting Bulletin No. 104, Revenue Recognition, (SAB No. 104) to our revenue arrangements. We generate product revenues from the sale of our Protein A products to customers in the pharmaceutical and process chromatography industries and from the sale of SecreFlo® to hospital-based gastroenterologists. In accordance with SAB No. 104, we recognize revenue related to product sales upon delivery of the product to the customer as long as there is persuasive evidence of an arrangement, the sale price is fixed or determinable and collection of the related receivable is reasonably assured.

During the three month period ended September 30, 2006, we recognized approximately \$149,000 in revenue from a sponsored research and development project under an agreement with the Stanley Medical Research Institute. Research revenue is recognized for costs plus fixed-fee contracts as costs are incurred. Additionally, during the three month period ended September 30, 2006, the Company earned and recognized approximately \$36,000 in royalty revenue from ChiRhoClin, Inc. Please see footnote 11 for a summary of the royalty arrangement with ChiRhoClin, Inc.

**3. Earnings (Loss) Per Share**

We follow the provisions of Statement of Financial Accounting Standard (SFAS) No. 128, Presenting Earnings Per Share, (SFAS No. 128). Basic earnings per share for the three and six month periods ended September 30, 2006 and 2005 were computed on the basis of the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed on the basis of the weighted average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method in accordance with SFAS No. 128. Dilutive potential common shares include outstanding stock options.

**Table of Contents**

Basic and diluted weighted average shares outstanding were as follows:

	Three Months Ended September 30,		Six Months Ended September 30,	
	2006	2005	2006	2005
Weighted average common shares	30,364,250	30,098,391	30,360,943	30,096,413
Dilutive common stock options				510,590
Weighted average common share, assuming dilution	30,364,250	30,098,391	30,360,943	30,607,003

For the three and six month periods ended September 30, 2006 options to purchase 2,518,650 shares of our common stock were excluded from the calculation of diluted earnings per share because the the Company incurred a net loss and they would be anti-dilutive.

For the three month period ended September 30, 2005 options to purchase 2,475,100 at a weighted exercise price of \$2.92 were excluded from the calculation of diluted earnings per share because the exercise prices of the stock options were greater than or equal to the average price of the common shares. For the six month period ended September 30, 2005 options to purchase 1,194,100 shares at a weighted average exercise price of \$4.42 per share were excluded from the calculation of diluted earnings per share because the exercise prices of the stock options were greater than or equal to the average price of the common shares.

#### 4. Stock-Based Compensation

In December 2004, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 123R, Share-Based Payment An Amendment of FASB Statements No. 123 and 95, ( SFAS No. 123R ), which requires all companies to measure compensation cost for all share-based payments, including employee stock options, at fair value. Generally, the approach in SFAS No. 123R is similar to the approach described in SFAS No. 123, Accounting for Stock-Based Compensation, ( SFAS No. 123 ). However, SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair value over the requisite service period. Pro forma disclosure is no longer an alternative. In March 2005, the SEC issued Staff Accounting Bulletin ( SAB ) No. 107 ( SAB No. 107 ), which expressed the views of the SEC regarding the interaction between SFAS No. 123R and certain rules and regulations of the SEC. SAB No. 107 provides guidance related to the valuation of share-based payment arrangements for public companies, including assumptions such as expected volatility and expected term.

Effective April 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123R, using the modified prospective transition method. Under this transition method, compensation cost recognized in the statement of operations for the six months ended September 30, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of April 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123; and (b) compensation cost for all share-based payments granted, modified or settled subsequent to April 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. In accordance with the modified prospective transition method, results for prior periods have not been restated.

For the three and six months ended September 30, 2006, the Company recorded stock-based compensation expense of approximately \$255,000 and \$504,000 for stock options granted under the Amended and Restated 2001 Repligen Corporation Stock Plan. Basic and diluted earnings per share amounts for the three and six months ended September 30, 2006 were decreased by \$0.01 and \$0.02, respectively, as a result of the adoption of SFAS No. 123R.

The Company currently has the following stock-based employee compensation plans which are subject to the provisions of SFAS No. 123R: the 1992 Repligen Corporation Stock Option Plan, as amended, and the Amended and Restated 2001 Repligen Corporation Stock Plan (collectively, the Plans ). The 1992 Repligen Corporation Stock Option Plan expired on September 14, 2001, though this had no impact on outstanding option grants. Options granted prior to the date of termination remain outstanding and may be exercised in accordance with their terms.

The Plans allow for the granting of incentive and nonqualified options and restricted stock and other equity awards to purchase shares of Common Stock. Historically, incentive options granted to employees under the Plans generally vested over a four to five-year period, with 20%-25% vesting on the first anniversary of the date of grant and the remainder vesting in equal yearly installments thereafter. Nonqualified options issued to non-employee directors and consultants under the Plans generally vest over one year. Options granted under the Plans have a maximum term of ten years from the date of grant and generally, the exercise price of the stock options equals the fair market value of the Company's Common Stock on the date of grant. At September 30, 2006, options to purchase 1,540,150 shares were outstanding under the

## Edgar Filing: REPLIGEN CORP - Form 10-Q

Amended and Restated 2001 Repligen Corporation Plan and 978,500 were outstanding under the 1992 Repligen Corporation Stock Option Plan. At September 30, 2006, 286,209 shares were available for future grant under the Amended and Restated 2001 Repligen Corporation Stock Plan.

**Table of Contents**

The Company uses the Black-Scholes option pricing model to calculate the fair value on the grant date of stock-based compensation for stock options granted under the Plans. The fair values of stock options granted during the three months ended September 30, 2006 and 2005 were calculated using the following estimated weighted- average assumptions:

	2006	2005
Expected term (years)	6.5	7
Volatility	82.55%-91.86%	93.8%
Risk-free interest rate	4.74%-5.07%	4.06%
Expected dividend yield		

**Expected term** - The expected term of options granted represents the period of time for which the options are expected to be outstanding and is derived from the Company's historical stock option exercise experience and option expiration data. For option grants made subsequent to the adoption of SFAS No. 123R, the expected life of stock options granted is based on the simplified method allowable under SAB No. 107. Accordingly, the expected term is presumed to be the midpoint between the vesting date and the end of the contractual term. In addition, for purposes of estimating the expected term, the Company has aggregated all individual option awards into one group as the Company does not expect substantial differences in exercise behavior among its employees.

**Expected volatility** - The expected volatility is a measure of the amount by which the Company's stock price is expected to fluctuate during the expected term of options granted. The Company determines the expected volatility solely based upon the historical volatility of the Company's Common Stock over a period commensurate with the option's expected term. The Company does not believe that the future volatility of its Common Stock over an option's expected term is likely to differ significantly from the past.

**Risk-free interest rate** - The risk-free interest rate is the implied yield available on U.S. Treasury zero-coupon issues with a remaining term equal to the option's expected term on the grant date.

**Expected dividend yield** - The Company has never declared or paid any cash dividends on any of its capital stock and does not expect to do so in the foreseeable future. Accordingly, the Company uses an expected dividend yield of zero to calculate the grant-date fair value of a stock option.

The Company recognizes compensation expense on a straight-line basis over the requisite service period based upon options that are ultimately expected to vest, and accordingly, such compensation expense has been adjusted by an amount of estimated forfeitures. Forfeitures represent only the unvested portion of a surrendered option. SFAS No. 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Prior to the adoption of SFAS No. 123R, the Company accounted for forfeitures upon occurrence as permitted under SFAS No. 123. Based on an analysis of historical data, the Company has calculated an 8% annual forfeiture rate for non-director level employees, a 3% annual forfeiture rate for director-level employees, and a 0% forfeiture rate for non-employee members of the Board of Directors, which it believes is a reasonable assumption to estimate forfeitures. However, the estimation of forfeitures requires significant judgment, and to the extent actual results or updated estimates differ from the Company's current estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised.

Prior to April 1, 2006, the Company applied the pro forma disclosure requirements under SFAS No. 123 and accounted for its stock-based employee compensation plans using the intrinsic value method under the recognition and measurement provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, (APB No. 25) and related interpretations. Accordingly, no stock-based employee compensation cost was recognized in the statement of operations for the three and six month periods ended September 30, 2005, as all stock options granted under the Plans had an exercise price equal to the market value of the underlying Common Stock on the date of grant.

The following table illustrates the effect on net income and net income per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to options granted under the Plans for the three and six months ended September 30, 2005. Since stock-based compensation expense for the three and six months ended September 30, 2006 was calculated under the provisions of SFAS No. 123R, there is no disclosure of pro forma net income and net income per share for that period. For purposes of the pro forma disclosure for the three and six months ended September 30, 2005 set forth in the table below, the value of the options is estimated using a Black-Scholes option pricing model and amortized on a straight-line basis to expense over the options' vesting periods.

**Table of Contents**

	Three Months Ended September 30, 2005	Six Months Ended September 30, 2005
Net (loss) income as reported	\$ (467,508)	\$ 1,718,818
Deduct: Stock-based employee compensation cost that would have been included in the determination of net loss as reported if the fair value method had been applied to all awards	\$ (180,988)	\$ (352,964)
Pro forma net (loss) income	\$ (648,496)	\$ 1,365,854
Basic and diluted net income per common share, as reported	\$ (0.02)	\$ 0.06
Basic and diluted net income per common share, as pro forma	\$ (0.02)	\$ 0.05

Information regarding option activity for the six months ended September 30, 2006 under the Plans is summarized below:

	Options Outstanding (in thousands)	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousand)
Options outstanding at April 1, 2006	2,403	\$ 3.17		
Granted	199	2.98		
Exercised	(18)	1.04		
Forfeited/Cancelled	(65)	2.11		
Options outstanding at September 30, 2006	2,519	\$ 3.20	5.81	\$ 2,109
Options exercisable at September 30, 2006	1,638	\$ 3.13	4.28	\$ 1,693
Vested and expected to vest at September 30, 2006 (1)	2,439	\$ 2.59	5.70	\$ 2,058

(1) This represents the number of vested options as of September 30, 2006 plus the number of unvested options expected to vest as of September 30, 2006 based on the unvested outstanding options at September 30, 2006 adjusted for the estimated forfeiture rate of 8% for awards granted to non-director level employees and 3% for awards granted to director level employee as described previously in Note 4. The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the closing price of the Common Stock on September 30, 2006 of \$3.40 and the exercise price of each in-the-money option) that would have been received by the option holders had all option holders exercised their options on September 30, 2006.

The weighted average grant date fair value of options granted during the six months ended September 30, 2006 was \$2.34. The total fair value of stock options that vested during the three months ended September 30, 2006 and 2005 was approximately \$296,000 and \$184,000, respectively.

During the three months ended September 30, 2006 and 2005, the total intrinsic value of options exercised was \$39,340 and \$22,100, respectively. The total amount of cash received from exercise of these options during the three months ended September 30, 2006 and 2005 was \$18,800 and \$13,700, respectively.

## Table of Contents

As of September 30, 2006, there was \$1,958,000 of total unrecognized compensation cost related to unvested share-based awards. This cost is expected to be recognized over a weighted average remaining requisite service period of 3.26 years. The Company expects approximately 801,000 in unvested options to vest over the next five years.

The range of exercise prices for options outstanding and exercisable as of September 30, 2006 are as follows:

Range of Exercise Prices	Outstanding as of 9/30/2006			Exercisable as of 9/30/2006	
	Number of	Weighted Average Remaining Contractual Life in years	Weighted Average Exercise price	Number of	Weighted Average Exercise price
\$0.00 - \$1.24	37,000	1.88	\$ 0.74	37,000	\$ 0.74
\$1.25 - \$2.49	963,000	3.95	1.63	778,700	1.58
\$2.50 - \$3.73	861,150	7.09	3.04	478,100	3.03
\$3.74 - \$4.98	242,500	9.28	4.19	5,700	4.41
\$4.99 - \$6.22	196,000	6.48	5.53	119,999	5.54
\$6.23 - \$7.47	5,000	3.97	7.19	5,000	7.19
\$7.48 - \$8.56	214,000	5.19	7.93	214,000	7.93
	2,518,650	5.81	\$ 3.20	1,638,499	\$ 3.13

### 5. Cash, Cash Equivalents and Marketable Securities

We follow the provisions of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. At September 30, 2006, our investments included short-term marketable securities, the majority of which are classified as held-to-maturity investments as we have the positive intent and ability to hold to maturity. As a result, these investments are recorded at amortized cost. Marketable securities are investments with original maturities of greater than 90 days. Long-term marketable securities are investment grade securities with maturities of greater than one year.

At September 30, 2006, marketable securities also include investment grade auction rate securities, which provide higher yields than money market and other cash equivalent investments. Auction rate securities have long-term underlying maturities, but have interest rates that are reset every 90 days or less, at which time the securities can typically be purchased or sold, which creates a highly liquid market for these securities. We do not intend to hold these securities to maturity, but rather to use the securities to provide liquidity as necessary. Auction rate securities are classified as available-for-sale and reported at fair value. Due to the reset feature and their carrying value equaling their fair value, there are no gross unrealized gains or losses from these short-term investments.

Cash, cash equivalents and marketable securities consist of the following:

	September 30, 2006	March 31, 2006
Cash and cash equivalents	\$ 5,479,296	\$ 5,428,477
Marketable securities:		
U.S. Government and agency securities	\$ 5,649,147	\$ 8,048,129
Auction rate securities	775,000	1,075,000
Corporate and other debt securities	8,659,309	4,324,471

(Average remaining maturity, 5 months at September 30, 2006, assumes auction rate maturity set at date of next auction)

\$ 15,083,456 \$ 13,447,600

## Edgar Filing: REPLIGEN CORP - Form 10-Q

Long-term marketable securities:			
U.S. Government and agency securities	\$	500,000	\$ 1,900,000
Corporate and other debt securities		970,854	2,631,548
(Average remaining maturity, 16 months at September 30, 2006)	\$	1,470,854	\$ 4,531,548

Restricted cash of \$200,000 is related to our facility lease obligation.

**Table of Contents****6. Inventories**

Inventories are stated at the lower of cost (first-in, first-out) or market. Work-in-process and finished goods inventories consist of material, labor, outside processing costs and manufacturing overhead. Inventories at September 30, 2006 and March 31, 2006 consist of the following:

	September 30, 2006	March 31, 2006
Raw materials	\$ 454,734	\$ 600,948
Work -in -process	301,698	596,386
Finished goods	212,314	268,258
Total	\$ 968,746	\$ 1,465,592

**7. Accrued Liabilities**

Accrued liabilities consist of the following:

	As of September 30, 2006	As of March 31, 2006
Payroll & payroll related costs	\$ 379,345	\$ 474,923
Research & development costs	545,725	436,016
Professional and consulting costs	365,566	320,694
Other accrued expenses	135,322	62,767
Unearned revenue	4,507	38,599
Other current liabilities	377,002	536,350
Total	\$ 1,807,477	\$ 1,869,349

**8. Comprehensive Income/Loss**

We follow the provisions of SFAS No. 130, Reporting Comprehensive Income, ( SFAS No. 130 ). SFAS No. 130 requires disclosure of all components of comprehensive income on an annual and interim basis. Comprehensive income is defined as the change in equity of a business enterprise during a period resulting from transactions and other events and circumstances from nonowner sources. Our comprehensive income is equal to our reported net income for all periods presented.

**9. Segment Reporting**

We follow the provisions of SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, ( SFAS No. 131 ). SFAS No. 131 establishes standards for reporting information regarding operating segments in annual financial statements and requires selected information for those segments to be presented in interim financial reports issued to stockholders. SFAS No. 131 also establishes standards for related disclosures about products and services and geographic areas. The chief operating decision maker, or decision-making group, in making decisions how to allocate resources and assess performance, identifies operating segments as components of an enterprise about which separate discrete financial information is available for evaluation. To date, we view our operations and manage our business as one operating segment. As a result, the financial information disclosed herein represents all of the material financial information related to our principal operating segment.

The following table represents percentage of total revenue classified by geographic area:

Edgar Filing: REPLIGEN CORP - Form 10-Q

	Three months ended September 30,		Six months ended September 30,	
	2006	2005	2006	2005
Europe	57%	58%	63%	55%
US	42%	40%	36%	44%
Other	1%	2%	1%	1%
Total	100%	100%	100%	100%

## **Table of Contents**

During the three months ended September 30, 2006 there were 2 customers who accounted for approximately 55% and 13% of product revenues, respectively. During the three months ended September 30, 2005 there were two customers who accounted for approximately 53% and 15% of product revenues, respectively. At September 30, 2006, one customer accounted for 62% of our accounts receivable. At March 31, 2006, four customers accounted for 25%, 25%, 13% and 11% of accounts receivable, respectively.

### **10. New Accounting Pronouncements**

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an Interpretation of FASB Statement No. 109 (the *Interpretation*). The Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. The Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Interpretation is effective for fiscal years beginning after December 15, 2006. The Company has not completed its evaluation of the Interpretation, but does not currently believe that adoption will have a material impact on its results of operations, financial position or cash flows.

In September 2006, FASB issued Statement No. 157, *Accounting for Fair Value Measurements* (SFAS 157). SFAS 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, with early adoption permitted. We do not expect adoption of this standard to have a material impact on our consolidated financial statements.

### **11. Settlement Agreement**

In February 2004, Repligen terminated the September 1999 Licensing Agreement with ChiRhoClin, its supplier of SecreFlo®, based on ChiRhoClin's alleged failure to meet its obligations under the Licensing Agreement.

On April 9, 2004, Repligen filed an arbitration demand against ChiRhoClin with the American Arbitration Association in New York seeking to recover payments made to ChiRhoClin and additional damages. In this arbitration demand, Repligen alleged that ChiRhoClin breached several of its obligations under the September 1999 Licensing Agreement including failure to use best efforts to obtain various FDA approvals and to manufacture and supply SecreFlo®, in a timely manner. In June 2004, ChiRhoClin filed a counterclaim alleging that Repligen had wrongfully terminated the Licensing Agreement.

On May 9, 2005, Repligen entered into a Settlement Agreement (the *Agreement*) with ChiRhoClin, Inc., in full settlement of the arbitration proceedings described above. Under the terms of the Agreement, Repligen received a payment of \$750,000 and is entitled to continue to market SecreFlo®, for the next few years under a royalty structure more favorable to Repligen than under the Licensing Agreement. ChiRhoClin is obligated to deliver a certain amount of SecreFlo®, to Repligen over the next few years. This payment was recorded as *Accrued Liabilities* and has a balance of approximately \$338,000 as of September 30, 2006. The adoption by the Company of Emerging Issues Task Force (EITF) Issue No. 20-16, *Accounting by a Customer (including a Reseller) for Certain Consideration Received from a Vendor* (EITF 02-16) has resulted in the reduction of cost of goods sold as future inventory purchased from ChiRhoClin is sold. After depletion of all supplies of SecreFlo® provided by ChiRhoClin, including those to be delivered under the Agreement, Repligen will cease marketing and selling a secretin product supplied by ChiRhoClin. ChiRhoClin will pay Repligen a per unit royalty on all sales by ChiRhoClin of its secretin products subject to certain time and/or volume limits. Repligen was not required to pay approximately \$1,169,000 of unremitted royalties to ChiRhoClin related to sales from February 2004 to March 2005. This amount which was accrued at March 31, 2005 was recorded as other income in the quarter ended June 30, 2005. Repligen has received security for ChiRhoClin's performance under the Agreement.

---

## **Table of Contents**

### **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

#### **Overview**

We are a biopharmaceutical company focused on the development of novel therapeutics for the treatment of diseases of the central nervous system. A number of drug development programs are currently being conducted to evaluate our naturally occurring drug candidates in diseases such as schizophrenia, bipolar disorder and neurodegeneration. In addition, we sell two commercial products, Protein A for monoclonal antibody purification and SecreFlo® for assessment of pancreatic disorders.

Our business strategy is to deploy the profits from our current commercial products and any revenue that we may receive from our patents to enable us to invest in the development of our product candidates in the treatment area of neuropsychiatric diseases.

We are subject to a number of risks typically associated with similar companies in the biotechnology industry. Principally those risks are associated with our dependence on collaborative arrangements, development by us or our competitors of new technological innovations, dependence on key personnel, protection of proprietary technology, results of clinical trials, compliance with the U.S. Food and Drug Administration and other governmental regulations and approval requirements, as well as the ability to grow our business and to obtain adequate capital to fund this growth, as well as other potential risk factors included in the filings made by us from time to time with the SEC, including under the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended March 31, 2006.

#### **Critical Accounting Policies and Estimates**

The SEC requires that reporting companies discuss their most critical accounting policies in Management's Discussion and Analysis of Financial Condition and Results of Operations. The SEC indicated that a critical accounting policy is one that is important to the portrayal of a company's financial condition and operating results and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

We have identified the policies and estimates below as critical to our business operations and the understanding of our results of operations. The impact and any associated risks related to these policies on our business operations is discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect our reported and expected financial results. For a detailed discussion on the application of these and other accounting policies, see the Notes to Financial Statements of this report.

#### **Revenue Recognition**

We apply Staff Accounting Bulletin No. 104, "Revenue Recognition" (SAB No. 104) to our revenue arrangements. We generate product revenues from the sale of our Protein A products to customers in the pharmaceutical and process chromatography industries, and from the sale of SecreFlo® to hospital-based gastroenterologists. In accordance with SAB No. 104, we recognize revenue related to product sales upon delivery of the product to the customer as long as there is persuasive evidence of a sale, the price is fixed or determinable and collection of the related receivable is reasonably assured.

During the three month period ended September 30, 2006, we recognized non-product revenues from sponsored research and development projects under an agreement with the Stanley Medical Research Institute. Research revenue is recognized for costs plus fixed-fee contracts as costs are incurred. Research expenses in the accompanying statements of operations include funded and unfunded expenses. Additionally, during the three and six-month periods ended September 30, 2006, the Company earned approximately \$36,000 and \$81,000, respectively, in royalty revenue pursuant to a settlement agreement with ChiRhoClin, Inc., discussed further in "Cost of Product Revenue," below. This amount is included in Other Revenue in the accompanying Statement of Operations.

#### **Inventory**

We value inventory at cost or, if lower, fair market value. We determine cost using the first-in, first-out method. We regularly review our inventories and record a provision for excess and obsolete inventory based on certain factors that may impact the realizable value of our inventory. Factors we consider include expected sales volume, production capacity and expiration dates. We write down inventory that has become obsolete, inventory that has a cost basis in excess of its expected net realizable value and inventory in excess of expected requirements to cost of product revenue.

## **Table of Contents**

### **Accrued Liabilities**

We prepare our financial statements in accordance with accounting principles generally accepted in the United States. These principles require that we estimate accrued liabilities. This process involves identifying services, which have been performed on our behalf, and estimating the level of service performed and the associated cost incurred for such service as of each balance sheet date. Examples of estimated expenses for which we accrue expenses include fees paid to our contract manufacturers in conjunction with the production of clinical materials and service fees paid to organizations for their performance in conducting our clinical trials. In the event that we do not identify certain costs which have begun to be incurred or we under or over-estimate the level of services performed or the costs of such services, our reported expenses for that period may be too low or too high. The date on which certain services commence, the level of services performed on or before a given date, and the cost of such services are often judgmental. We make these judgments based upon the facts and circumstances known to us in accordance with generally accepted accounting principles.

### **Cost of Product Revenue**

During the three-month period ended June 30, 2005, Repligen entered into a Settlement Agreement (the "Agreement") with ChiRhoClin, Inc., ("CRC") in full settlement of their arbitration proceedings. Under the terms of the Agreement, Repligen received a payment of \$750,000 and is entitled to continue to market SecreFlo® for the next few years. The balance of the settlement payment of approximately \$338,000 is recorded in Accrued Liabilities as of September 30, 2006. CRC also agreed to continue to supply additional product to the Company. The Emerging Issues Task Force ("EITF") Issue No. 02-16, "Accounting by a Customer (including a Reseller) for Certain Consideration Received from a Vendor" ("EITF 02-16") addresses the accounting and income statement classification for consideration given by a vendor to a customer in connection with the sale of the vendor's products. The EITF concluded that such consideration received from vendors should be reflected as a decrease in prices paid for inventory and recognized in cost of sales as the related inventory is sold, unless specific criteria are met qualifying the consideration for treatment as reimbursement of specific, identifiable incremental costs.

### **Stock-Based Compensation**

Effective April 1, 2006, we adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123R, "Share-Based Payment" (an Amendment of FASB Statements No. 123 and 95, or SFAS No. 123R), using the modified prospective transition method. Under this transition method, compensation cost recognized in the statement of operations for the six months ended September 30, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of April 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123; and (b) compensation cost for all share-based payments granted, modified or settled subsequent to April 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. In accordance with the modified prospective transition method, results for prior periods have not been restated.

Effective with the adoption of SFAS No. 123R, we have elected to use the Black-Scholes option pricing model to calculate the fair value of share-based awards on the grant date.

The expected term of options granted represents the period of time for which the options are expected to be outstanding and is derived from our historical stock option exercise experience and option expiration data. For option grants made subsequent to the adoption of SFAS No. 123R, the expected life of stock options granted is based on the simplified method allowable under SAB No. 107. Accordingly, the expected term is presumed to be the midpoint between the vesting date and the end of the contractual term. In addition, for purposes of estimating the expected term, we have aggregated all individual option awards into one group as we do not expect substantial differences in exercise behavior among its employees. The expected volatility is a measure of the amount by which our stock price is expected to fluctuate during the expected term of options granted. We determined the expected volatility solely based upon the historical volatility of our Common Stock over a period commensurate with the option's expected term. We do not believe that the future volatility of our Common Stock over an option's expected term is likely to differ significantly from the past. The risk-free interest rate is the implied yield available on U.S. Treasury zero-coupon issues with a remaining term equal to the option's expected term on the grant date. We have never declared or paid any cash dividends on any of our capital stock and do not expect to do so in the foreseeable future. Accordingly, we use an expected dividend yield of zero to calculate the grant-date fair value of a stock option.

We recognize compensation expense on a straight-line basis over the requisite service period based upon options that are ultimately expected to vest, and accordingly, such compensation expense has been adjusted by an amount of estimated forfeitures.

## **Table of Contents**

Forfeitures represent only the unvested portion of a surrendered option. SFAS No. 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Prior to the adoption of SFAS No. 123R, we accounted for forfeitures upon occurrence as permitted under SFAS No. 123. Based on an analysis of historical data, we have calculated an 8% annual forfeiture rate for non-director level employees, a 3% annual forfeiture rate for director-level employees, and a 0% forfeiture rate for non-employee members of the Board of Directors, which we believe is a reasonable assumption to estimate forfeitures. However, the estimation of forfeitures requires significant judgment, and to the extent actual results or updated estimates differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised.

Prior to April 1, 2006, we applied the pro forma disclosure requirements under SFAS No. 123 and accounted for our stock-based employee compensation plans using the intrinsic value method under the recognition and measurement provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, ( APB No. 25 ) and related interpretations. Accordingly, no stock-based employee compensation cost was recognized in the statement of operations for the three and six month periods ended September 30, 2005, as all stock options granted under the Plans had an exercise price equal to the market value of the underlying Common Stock on the date of grant.

For the three and six months ended September 30, 2006, we recorded stock-based compensation expense of approximately \$255,000 and \$504,000 for stock options granted under the Amended and Restated 2001 Repligen Corporation Stock Plan. Basic and diluted earnings per share amounts for the three and six months ended September 30, 2006 were decreased by \$0.01 and \$0.02, respectively, as a result of the adoption of SFAS No. 123R.

As of September 30, 2006, there was \$1,958,000 of total unrecognized compensation cost related to unvested share-based awards. This cost is expected to be recognized over a weighted average remaining requisite service period of 3.26 years. The Company expects approximately 801,000 in unvested options to vest over the next five years.

## **Results of Operations**

### **Three months ended September 30, 2006 vs. September 30, 2005**

#### **Total revenue**

Total revenue for the three-month periods ended September 30, 2006 and September 30, 2005 were approximately \$2,865,000 and \$2,800,000 respectively, an increase of \$65,000 or 2%. During the three-month period ended September 30, 2006, a decrease in the volume of Protein A sales accounted for the majority of the decrease as they decreased to \$2,230,000 from \$2,278,000 during the same period in the prior fiscal year. Our product revenues are subject to significant quarterly fluctuations based on the timing of large-scale production orders of Protein A.

During the three-month periods ended September 30, 2006 and September 30, 2005 we recognized \$149,000 and \$84,000, respectively, of revenue from a sponsored research and development project under an agreement with the Stanley Medical Research Institute. Research revenue is recognized for costs plus fixed-fee contracts as costs are incurred. Additionally, during the three-month period ended September 30, 2006, we earned and recognized approximately \$36,000 in royalty revenue from ChiRhoClin, Inc.

#### **Operating expenses**

Total operating expenses for the three-month periods ended September 30, 2006 and September 30, 2005 were approximately \$3,961,000 and \$3,480,000, respectively, an increase of \$481,000 or 14%.

Cost of product revenue for the three-month periods ended September 30, 2006 and September 30, 2005 were approximately \$915,000 and \$872,000, respectively, an increase of \$43,000 or 5%. This increase in cost of product revenue primarily reflects increased personnel costs of \$60,000, increased consulting costs of \$56,000 and increased depreciation of \$26,000 partially offset by the decrease in license fees on the SecreFlo® product of \$14,000, decreased material costs of \$36,000 and decreased obsolete materials expenses of \$42,000 in the period ended September 30, 2006.

Research and development expenses for the three-month periods ended September 30, 2006 and September 30, 2005 were approximately \$1,583,000 and \$1,325,000, respectively, an increase of \$258,000 or 19%. During the three-month period ended September 30, 2006, this increase is largely attributable to an increase in clinical trial expenses of \$391,000 and stock option expense of \$59,000 off-set by a \$202,000 decrease in clinical material expenses. Significant fluctuations in research and development expenses may occur from period to period depending on the nature, timing, and extent of development activities over any given period of time.

## **Table of Contents**

Selling, general and administrative expenses for the three-month periods ended September 30, 2006 and September 30, 2005 were approximately \$1,463,000 and \$1,283,000 respectively, an increase of \$180,000 or 14%. This increase is attributable to an increase in professional fees of \$124,000, stock option expenses of \$190,000 and increased personnel expenses of \$114,000 off set by a decrease in legal expenses of \$229,000 during the three-month period ended September 30, 2006.

### **Interest income**

Interest income for the three-month periods ended September 30, 2006 and September 30, 2005 was approximately \$236,000 and \$212,000 respectively. The increase in the three months ended September 30, 2006 is a result of increased interest rates.

### **Six months ended September 30, 2006 vs. September 30, 2005**

#### **Total revenue**

Total revenue for the six-month periods ended September 30, 2006 and September 30, 2005 were approximately \$6,493,000 and \$7,038,000 respectively, a decrease of \$545,000 or 8%. During the six-month period ended September 30, 2006, a decrease in the volume of Protein A sales accounted for the majority of the decrease as they decreased to \$5,171,000 from \$5,757,000 during the same period in the prior fiscal year. Our product revenues are subject to significant quarterly fluctuations based on the timing of large-scale production orders of Protein A.

During the six-month periods ended September 30, 2006 and September 30, 2005 we recognized \$369,000 and \$310,000, respectively, of revenue from a sponsored research and development project under an agreement with the Stanley Medical Research Institute. Research revenue is recognized for costs plus fixed-fee contracts as costs are incurred. Additionally, during the six-month period ended September 30, 2006, we earned and recognized approximately \$81,000 in royalty revenue from ChiRhoClin, Inc.

#### **Operating expenses**

Total operating expenses for the six-month periods ended September 30, 2006 and September 30, 2005 were approximately \$7,710,000 and \$6,838,000, respectively, an increase of \$872,000 or 13%.

Cost of product revenue for the six-month periods ended September 30, 2006 and September 30, 2005 were approximately \$1,908,000 and \$1,846,000, respectively, an increase of \$62,000 or 3%. This increase in cost of product revenue primarily reflects increased personnel costs of \$139,000, an increase in consulting fees of \$97,000 and increased depreciation of \$52,000 partially offset by the decrease in license fees on the SecreFlo® product of \$40,000, decreased manufacturing services of \$45,000 and decreased material costs of \$137,000 in the period ended September 30, 2006.

Research and development expenses for the six-month periods ended September 30, 2006 and September 30, 2005 were approximately \$2,798,000 and \$2,514,000, respectively, an increase of \$284,000 or 11%. During the six-month period ended September 30, 2006, this increase is largely attributable to an increase in personnel expenses of \$67,000, stock option expense of \$111,000 and clinical trial expenses of \$370,000 off-set by a \$222,000 decrease in external research and material expenses. Significant fluctuations in research and development expenses may occur from period to period depending on the nature, timing, and extent of development activities over any given period of time.

Selling, general and administrative expenses for the six-month periods ended September 30, 2006 and September 30, 2005 were approximately \$3,004,000 and \$2,478,000 respectively, an increase of \$526,000 or 21%. This increase is attributable to an increase in professional fees of \$222,000, stock option expense of \$381,000 and increased personnel expenses of \$244,000 off set by a decrease in legal expenses of \$297,000 during the six-month period ended September 30, 2006.

---

## **Table of Contents**

### **Interest income**

Interest income for the six-month periods ended September 30, 2006 and September 30, 2005 was approximately \$460,000 and \$349,000 respectively. The increase in the six months ended September 30, 2006 is a result of increased interest rates.

### **Other income**

During the six-month period ended September 30, 2005, Repligen entered into a Settlement Agreement with ChiRhoClin, Inc., in full settlement of their arbitration proceedings. Under terms of the Agreement, Repligen was not required to pay approximately \$1,169,000 of previously accrued but unremitted royalties to ChiRhoClin related to SecreFlo® sales from February 2004 to March 2005. This amount, which was accrued at March 31, 2005, was reversed at the time of settlement and is recorded as other income in the six months ended September 30, 2005.

### **Liquidity and capital resources**

We have financed our operations primarily through sales of equity securities and revenues derived from product sales and grant and research agreements. Our revenue for the foreseeable future will be primarily limited to our product revenue related to Protein A and SecreFlo®. However, after the depletion of all supplies of Secreflo® provided by ChiRhoClin, including those to be delivered under the Agreement, the Company will cease marketing and selling a secretin product supplied by ChiRhoClin. Given the uncertainties related to pharmaceutical product development, we are currently unable to reliably estimate when, if ever, our therapeutic product candidates will generate revenue and cash flows. Total cash and marketable securities at September 30, 2006 totaled \$22,034,000, a decrease of \$1,374,000 from \$23,408,000 at March 31, 2006.

### **Operating activities**

Our operating activities used cash of approximately \$373,000 for the six-month period ended September 30, 2006. Cash uses from operating activities consisted of a net loss of approximately \$763,000, which includes non-cash charges of approximately \$252,000 for depreciation and amortization and \$504,000 in stock based compensation expense. The primary reasons our operating loss is higher than cash receipts for the six-month period ended September 30, 2006, are spending associated with the expansion of our manufacturing facility and spending associated with our clinical trials. In addition the timing of shipments in the quarter resulted in an increased accounts receivable balance at period end.

### **Investing activities**

Our cash was reduced by capital expenditures of \$1,024,000 for the six-month period ended September 30, 2006. Our investing activities provided cash of approximately \$1,433,000 primarily from redemptions of marketable securities. We do not currently use derivative financial instruments. We generally place our marketable security investments in high quality credit instruments, as specified in our investment policy guidelines.

Working capital increased to \$20,485,000 at September 30, 2006 from \$18,575,000 at March 31, 2006 primarily as a result of the change in classification for marketable securities which are now classified as short-term investments as they mature within twelve months of the period end date and the timing of shipments in the quarter resulting in an increased accounts receivable balance.

Our future capital requirements will depend on many factors, including the following:

the success of our clinical studies;

the scope of and progress made in our research and development activities;

our ability to acquire additional product candidates;

the success of any proposed financing efforts; and

the ability to sustain sales and profits of our commercial products.

Absent an acquisition of a product candidate, we believe our current cash and investment balances are adequate to meet our needs for at least the next twenty-four months. Our future capital requirements include, but are not limited to, continued investment in our research and development programs, capital expenditures primarily associated with purchases of equipment and continued investment in our intellectual property portfolio.

**Table of Contents**

We plan to continue to invest in key research and development activities. We actively evaluate various strategic transactions on an ongoing basis, including licensing or acquiring complementary products, technologies or businesses that would complement our existing portfolio of development programs. We continue to seek to acquire such potential assets that may offer us the best opportunity to create value for our shareholders. In order to acquire such assets, we may need to seek additional financing to fund these investments. This may require the issuance or sale of additional equity or debt securities. The sale of additional equity may result in dilution to our stockholders. Should we need to secure additional financing to acquire a product, fund future investment in research and development, or meet our future liquidity requirements, we may not be able to secure such financing, or obtain such financing on favorable terms because of the volatile nature of the biotechnology marketplace.

**Off-Balance Sheet Arrangements**

As of September 30, 2006, we did not have any off-balance sheet arrangements

**Commitments**

As of September 30, 2006 we had the following fixed obligations and commitments:

	Total	Payments Due by Period			
		Less than 1	1-3	3-5	More than 5
		Year	Years	Years	Years
(In thousands)					
Operating lease obligations	\$ 2,184	\$ 395	\$ 826	\$ 856	\$ 107
Capital lease obligations (1)	145	30	84	31	
Purchase obligations (2)	34	34			
Contractual obligations (3)	739	121	281	239	98
Total	\$ 3,102	\$ 580	\$ 1,191	\$ 1,126	\$ 205

- (1) The above amounts represent principal payments only, while principal and interest are payable through a fixed annual payment of approximately \$52,000.
- (2) These amounts represent minimum commitments due under third-party manufacturing agreements and non-cancelable purchase orders.
- (3) These amounts include payments for license, supply and consulting agreements.

**Cautionary Statement Regarding Forward-Looking Statements**

Statements in this Quarterly Report on Form 10-Q, as well as oral statements that may be made by Repligen or by officers, directors or employees of Repligen acting on its behalf, that are not historical facts constitute forward-looking statements which are made pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The forward-looking statements in this Quarterly Report on Form 10-Q do not constitute guarantees of future performance. Investors are cautioned that statements in this Quarterly Report on Form 10-Q which are not strictly historical statements, including, without limitation, statements regarding current or future financial performance, management's strategy, litigation strategy, costs of legal proceedings, disputes with suppliers, plans and objectives for future operations, clinical trials and results, marketing plans, revenue potential of therapeutic product candidates, product research, intellectual property and development, manufacturing plans and performance, delays in manufacturing by us or our partners, timing of customer orders, the anticipated growth in our target markets, including, without limitation, the market for neuropsychiatric disorders treatment, the market for pancreatic disease treatment, the monoclonal antibody market and the process chromatography industry and projected growth in product sales, costs of operations, sufficiency of funds to meet management objectives and availability of financing and effects of accounting pronouncements constitute forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from the historical results or from any results expressed or implied by such forward-looking statements, including, without

## **Table of Contents**

limitation, risks associated with: the success of current and future collaborative relationships, the success of our clinical trials and our ability to develop and commercialize products, our ability to obtain required regulatory approvals, our compliance with all Food and Drug Administration regulations, our ability to obtain, maintain and protect intellectual property rights for our products, the risk of current and future litigation regarding our patent and other intellectual property rights, the risk of litigation with collaborative partners, our limited sales and marketing experience and capabilities, our limited manufacturing capabilities and our dependence on third-party manufacturers and value-added resellers, our ability to hire and retain skilled personnel, the market acceptance of our products, our ability to compete with larger, better financed pharmaceutical and biotechnology companies that may develop new approaches to the treatment of our targeted diseases, our history of losses and expectation of incurring continued losses, our ability to generate future revenues, our ability to raise additional capital to continue our drug development programs, our volatile stock price, and the effects of our anti-takeover provisions. Further information on potential risk factors that could affect our financial results are included in the filings made by us from time to time with the Securities and Exchange Commission including under the section entitled "Certain Factors That May Affect Future Results" in our Annual Report on Form 10-K for the year ended March 31, 2006.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

#### **Interest Rate Risk**

We have investments in commercial paper, U.S. Government and agency securities as well as corporate bonds and other debt securities. As a result, we are exposed to potential loss from market risks that may occur as a result of changes in interest rates, changes in credit quality of the issuer or otherwise.

We generally place our marketable security investments in high quality credit instruments, as specified in our investment policy guidelines. A hypothetical 100 basis point increase in interest rates would result in an approximate \$69,000 decrease in the fair value of our investments as of September 30, 2006. We believe, however, that the conservative nature of our investments mitigates our interest rate exposure, and our investment policy limits the amount of our credit exposure to any one issue, issuer (with the exception of U.S. agency obligations) and type of instrument. We do not expect any material loss from our marketable security investments and therefore believe that our potential interest rate exposure is limited. We intend to hold the majority of our investments to maturity, in accordance with our business plans.

### **ITEM 4. CONTROLS AND PROCEDURES**

The Company's management, with the participation of our chief executive officer and chief financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, our chief executive officer and chief financial officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures were effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, on a timely basis, and is accumulated and communicated to the Company's management, including the Company's chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

## **PART II. OTHER INFORMATION**

### **ITEM 1. LEGAL PROCEEDINGS**

#### **Imclone**

In July 2006, Repligen reported that the United States District Court for the District of Massachusetts issued a Summary Judgment ruling in favor of Repligen and The Massachusetts Institute of Technology ("MIT") and rejected ImClone Systems Incorporated's ("Imclone") defense of patent exhaustion in the ongoing patent infringement lawsuit over the production of Erbitux®. In their complaint, Repligen and MIT allege that ImClone's production of Erbitux® infringes U.S. patent 4,663,281 which covers certain genetic elements that increase protein production in a mammalian cell. This patent is assigned to MIT and exclusively licensed to Repligen.

ImClone had previously reported that it produced approximately \$1 billion worth of Erbitux® prior to the expiration of the patent-in-suit in 2004 and that Bristol-Myers Squibb, ImClone's commercial partner, has paid ImClone \$900 million in up-front and milestone payments as well as a 39% royalty on the net sales of Erbitux® in the United States.

**Table of Contents**

Repligen and MIT allege that the cell line that ImClone uses to produce Erbitux® employs key technology that is claimed in the patent-in-suit. Repligen and MIT also allege that the cell line was created under contract for the National Cancer Institute ( NCI ) by a predecessor to Repligen and subsequently transferred from the NCI to ImClone for use in research and development only. In its ruling, the Court found that neither the transfer to the NCI by Repligen's predecessor nor the subsequent transfer to ImClone by the NCI exhausted the proprietary rights of Repligen and MIT. The Court's ruling has eliminated these arguments as a potential defense for ImClone at trial. Repligen and MIT intend to seek damages adequate to compensate Repligen and MIT for ImClone's unlicensed use of the patented technology and a multiplier of any such damage award based on ImClone's willful infringement.

For more information on this litigation or other litigation to which we are a party, please see our Annual Report on Form 10K.

From time to time, we may be subject to legal proceedings and claims, other than those described in the Company's Annual Report on Form 10-K for the period ended March 31, 2006 and the Company's Quarterly Report on Form 10-Q for the period ended June 30, 2006, in the ordinary course of business. We are not currently aware of any such proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on the business, financial condition or results of operations.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

The Company's Annual Meeting of Stockholders (the Annual Meeting ) was held on September 15, 2006. At the Annual Meeting, the stockholders of the Company considered and acted upon a proposal to elect a Board of Directors for the ensuing year.

**Proposal 1. Election of Directors:**

The stockholders elected all of the Company's nominees for directors.
