EXPLANATORY STATEMENT

Why we are filing this Amendment to our Form 10-Q

We are filing this amendment to the Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2006 (the "Original Filing") of Trex Company, Inc. (the "Company") to restate the Company's consolidated financial statements and related disclosures in order to correct errors in the recording of certain expenses in cost of sales, selling, general and administrative expenses, and interest expense. The errors related to the improper recording of the receipt of goods and services, the timing of cost capitalization, the calculation of depreciation, the timing of recording certain liabilities, the improper recording of cash disbursements, the valuation of raw material inventory, and the calculation of a miscellaneous receivable.

This amendment includes the Company's restated consolidated balance sheet as of June 30, 2006, its restated statements of operations for the three and six months ended June 30, 2005 and 2006 and its restated statements of cash flows for the six months ended June 30, 2005 and 2006. The financial information as of December 31, 2005 and the consolidated statement of operations for the three months ended June 30, 2005 included in this amendment was also included in restated consolidated financial statements filed by the Company in an amendment on Form 10-K/A to its Annual Report on Form 10-K for the fiscal year ended December 31, 2005 (the "Amended 2005 10-K"). The Company does not intend to amend its Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2005.

The restatement adjustments had the effect of increasing the Company's reported net income for the three and six months ended June 30, 2006 by \$0.4 million, or \$0.03 per diluted share, and by \$0.3 million, or \$0.02 per diluted share, respectively.

Amended Items of Form 10-Q

We are amending the following items of the Original Filing:

Part I Item 1 Financial Statements

Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

Part I Item 4 Controls and Procedures

Part II Item 6 Exhibits

All information not affected by the restatement is unchanged

We have not changed any information included in the Original Filing that is not affected by the restatement. Accordingly, the information included in the Original Filing and included in this amendment that is not affected by the restatement describes conditions as they existed and were presented in the Original Filing at the time we filed that report with the Securities and Exchange Commission on August 9, 2006. We have not taken into account any other events occurring after we filed the Original Filing that might have affected those disclosures, nor have we modified or updated those disclosures, including the exhibits to the Original Filing, to reflect any other subsequent events. We are also filing an amendment to our Quarterly Report on Form 10-Q for the fiscal quarter ended September 30, 2006. Accordingly, in conjunction with reading this amendment to the Original Filing, you should also read our amendment to that Quarterly Report on Form 10-Q/A and all other filings we have made with the Securities and Exchange Commission since August 9, 2006, including the Amended 2005 10-K.

TREX COMPANY, INC.

Notes to Condensed Consolidated Financial Statements

For the Six Months Ended June 30, 2005 and 2006

(unaudited)

1. BUSINESS AND ORGANIZATION

Trex Company, Inc. (together with its subsidiaries, the Company) manufactures wood/plastic composite products primarily for residential and commercial decking and railing applications. Trex Wood-Polymer® lumber (Trex) is manufactured in a proprietary process that combines waste wood fibers and reclaimed polyethylene (PE material). The Company operates in one business segment.

2. RESTATEMENT

On January 26, 2007, the Audit Committee of the Company's Board of Directors concluded, based upon the recommendation of the Company's management that, to correct certain errors, the Company should restate its financial results, including quarterly results, for its fiscal years ended December 31, 2003, 2004 and 2005 and its quarterly results for the first nine months of its fiscal year ended December 31, 2006.

This amendment includes the Company's restated consolidated balance sheet as of June 30, 2006, its restated statements of operations for the three and six months ended June 30, 2005 and 2006 and its restated statements of cash flows for the six months ended June 30, 2005 and 2006. The financial information as of December 31, 2005 and the consolidated statement of operations for the three months ended June 30, 2005 included in this amendment was also included in restated consolidated financial statements filed by the Company in an amendment on Form 10-K/A to its Annual Report on Form 10-K for the fiscal year ended December 31, 2005 (the Amended 2005 10-K).

The restatements reflect the correction of errors related to the recording of certain expenses in cost of sales, selling, general and administrative expenses, and interest expense. The errors included:

- a) Errors related to improperly recording the receipt of goods and services, which resulted from the recording of expenses, inventory and fixed assets at the time of receipt of the goods or services and again at the time the related invoice was received. These errors caused an overstatement of accounts payable, accrued expenses, property, plant and equipment, cost of sales and selling, general and administrative expenses.
- b) Errors related to the timing of recording certain liabilities, which resulted from the failure to accrue accounts payable related to the purchase of raw materials at the time of receipt of the materials from one vendor that caused an understatement of accounts payable, inventory and cost of sales.
- c) Errors related to improperly recording cash disbursements, which resulted from recording certain wire transfers in the incorrect period and not appropriately recording certain void checks. These errors caused a net overstatement of cash and a net understatement of cost of sales and selling, general and administrative expenses.
- d) An error in the valuation of raw material inventory, which resulted from the miscalculation of the quantity of raw material inventory on hand that caused an understatement of inventory and an overstatement of cost of sales.
- e) Errors related to the timing of cost capitalization as a result of which costs associated with the Company's new manufacturing facility and the implementation of a new software system were erroneously expensed as incurred rather than capitalized. These errors caused an understatement of property, plant and equipment and an overstatement of selling, general and

Edgar Filing: TREX CO INC - Form 10-Q/A

administrative expenses in the period the costs were incurred.

- f) Errors related to the calculation of depreciation resulting primarily from the delay in transferring assets that had been placed in service from construction in process which caused a delay in the commencement of depreciation. These errors caused an overstatement of net property, plant and equipment and an understatement of cost of sales and selling, general and administrative expenses beginning in the period the assets were placed in service.

- g) An error in the calculation of a miscellaneous amount receivable from a service provider that caused an understatement of accrued expenses and an understatement of selling, general and administrative expenses in the period in which the receivable was recorded.

Table of Contents

The following tables summarize the effects of these adjustments on the Company's consolidated balance sheet as of June 30, 2006 (unaudited) and consolidated statements of operations for the three and six months ended June 30, 2005 and June 30, 2006, and consolidated statement of cash flows for the six months ended June 30, 2005 and 2006.

3. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, the accompanying condensed consolidated financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal and recurring adjustments) considered necessary for a fair presentation have been included in the accompanying

Edgar Filing: TREX CO INC - Form 10-Q/A

condensed consolidated financial statements. The consolidated results of operations for the three and six months ended June 30, 2006 are not necessarily indicative of the results that may be expected for the full fiscal year. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements as of December 31, 2004 and 2005 and for each of the three years in the period ended December 31, 2005 included in the annual report of Trex Company, Inc. on Form 10-K, as amended by Amendment No. 1 on Form 10-K/A, as filed with the Securities and Exchange Commission.

Table of Contents*New Accounting Standards*

In November 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 151, Inventory Costs, an Amendment of ARB No. 43, Chapter 4. SFAS No. 151 amends Accounting Research Bulletin 43, Chapter 4, to clarify that abnormal amounts of idle facility expense, freight, handling costs and wasted materials (spoilage) should be recognized as current period charges. It also requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company is currently evaluating the effect that the adoption of SFAS No. 151 will have on its year-end LIFO (last-in, first-out) calculation.

In June 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This interpretation is effective for fiscal years beginning after December 15, 2006, but earlier adoption is permitted. The Company is currently evaluating the effect that the adoption of FIN 48 will have on its results of operations or financial position.

Reclassifications

Certain reclassifications have been made in the presentation of the financial statements for the six months ended June 30, 2005 to conform with the presentation of the financial statements for the six months ended June 30, 2006.

4. INVENTORY

Inventories (at LIFO value) consist of the following (in thousands):

	December 31, 2005	
	As Restated	
	(See Note 2)	June 30, 2006
Finished goods	\$ 38,779	\$ 22,351
Raw materials	18,152	29,036
	\$ 56,931	\$ 51,387

An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs. Since inventory levels and costs are subject to factors beyond management's control, interim results are subject to the final year-end LIFO inventory valuation.

5. ACCRUED EXPENSES

Accrued expenses consist of the following (in thousands):

	December 31, 2005	June 30, 2006
Accrued sales and marketing costs	\$ 4,181	\$ 6,759
Accrued compensation and benefits	4,552	6,578
Accrued manufacturing expenses	1,854	2,404
Accrued rent obligations	488	1,500
Accrued freight	661	1,493
Accrued interest	349	468

Edgar Filing: TREX CO INC - Form 10-Q/A

Accrued professional and legal costs	686	114
Other	4,743	5,866
Total	\$ 17,514	\$ 25,182

Table of Contents**6. DEBT**

The Company's outstanding debt consists of senior notes, a variable rate promissory note, real estate loans and a revolving credit facility. The revolving credit facility provides for borrowings of up to \$20.0 million outstanding at any time. Amounts drawn under the revolving credit facility are subject to a borrowing base consisting of accounts receivable and finished goods inventories. As of June 30, 2006, no borrowings were outstanding under the revolving credit facility.

The senior notes, real estate loans, revolving credit facility, and bond loan documents contain negative and financial covenants. As of June 30, 2006, the Company was in compliance with these covenants.

The Company uses interest-rate swap contracts to manage its exposure to fluctuations in the interest rates under its real estate loans and variable rate promissory note. At June 30, 2006, the Company had capped its interest rate exposure at an annual effective rate of approximately 9.0% on all of its \$12.0 million principal amount of variable-rate real estate loans and capped its interest rate exposure at an annual effective rate of approximately 3.1% for six years on \$10.0 million principal amount of its \$25.0 million variable rate promissory note and at an annual effective rate of approximately 3.0% for four years on an additional \$10.0 million principal amount of such note.

7. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except share and per share data):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2006	2005	2006
	As Restated	As Restated	As Restated	As Restated
	(See Note 2)	(See Note 2)	(See Note 2)	(See Note 2)
Numerator:				
Net income (loss) available to common shareholders	\$ (581)	\$ 7,490	\$ 8,037	\$ 11,555
Denominator:				
Basic weighted average shares outstanding	14,772,498	14,833,282	14,752,306	14,818,651
Impact of potential common shares:				
Options		26,468	102,325	25,801
Restricted stock		53,055	57,668	47,125
Diluted weighted average shares outstanding	14,772,498	14,912,805	14,912,299	14,891,577
Basic earnings (loss) per share	\$ (0.04)	\$ 0.50	\$ 0.54	\$ 0.78
Diluted earnings (loss) per share	\$ (0.04)	\$ 0.50	\$ 0.54	\$ 0.78

8. STOCK-BASED COMPENSATION

The Company has one stock-based compensation plan, the 2005 Stock Incentive Plan (the "2005 Plan"), which was approved by its shareholders. The 2005 Plan is administered by the Compensation Committee of the Company's Board of Directors. Stock-based compensation is granted to officers, directors and certain key employees in accordance with the provisions of the 2005 Plan. The 2005 Plan provides for grants of stock options, stock appreciation rights ("SARs"), restricted stock and performance share awards ("PSAs"). The total aggregate number of shares of the Company's common stock that may be issued under the 2005 Plan is 2,150,000.

Stock Options and Stock Appreciation Rights

The 2005 Plan authorizes the grant of non-qualified stock options and SARs. Stock options are granted with an exercise price, and SARs are granted with a grant price, equal to the closing market price of the Company's common stock on the New York Stock Exchange on the date of

Edgar Filing: TREX CO INC - Form 10-Q/A

grant. These awards, which have ten-year contractual terms, generally vest with respect to one-third of the shares subject to the awards on each of the first, second and third anniversaries of the grant date. The Company recognizes compensation cost for these graded vesting awards on a straight-line basis over the requisite service period for the entire award.

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement 123R, *Share-Based Payment* (SFAS 123R), a revision of Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, which superseded APB Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25). SFAS 123R

Table of Contents

addresses the accounting for share-based payment transactions in which a company receives employee services in exchange for equity instruments of the company or liabilities that are based on the fair value of the company's equity instruments or that may be settled by the issuance of such equity instruments. This statement requires that share-based transactions be accounted for using a fair-value-based method to recognize compensation expense, and that the benefits of tax deductions in excess of recognized compensation cost (excess tax benefits) be reported as a financing cash flow, rather than as an operating cash flow. The Company adopted this standard on January 1, 2006 using the modified prospective method. Accordingly, results for prior periods have not been restated.

As a result of its adoption of SFAS 123R, the Company recognized share-based compensation expense for stock options and SARs of approximately \$0.3 million and \$0.6 million, respectively, for the three and six months ended June 30, 2006. This expense was included in

Selling, general and administrative expenses in the accompanying condensed consolidated statements of operations. As stock-based compensation expense recognized in the consolidated statements of operations for the six months ended June 30, 2006 is based on awards ultimately expected to vest, such expense has been reduced for estimated forfeitures, as required by SFAS 123R. The total income tax benefit recognized was approximately \$0.0 million and \$0.1 million, respectively, for the three and six months ended June 30, 2006. The Company's income before income taxes and net income for the six months ended June 30, 2006 were \$0.6 million and \$0.4 million, respectively, lower than if the Company had continued to account for stock options and SARs under APB 25. Basic and diluted earnings per share for the three and six months ended June 30, 2006 decreased \$0.01 and \$0.02 per share, respectively, as a result of the adoption of SFAS 123R. As of June 30, 2006, there was \$2.0 million of unrecognized compensation cost related to stock options and SARs expected to be recognized over a weighted-average period of approximately 2.6 years. The total fair value of stock options vested during the six months ended June 30, 2006 and June 30, 2005 were \$0.3 million and \$1.2 million, respectively. In the six months ended June 30, 2006, the Company also reflected \$0.1 million of excess tax benefits as a financing cash flow in the accompanying condensed consolidated statements of cash flows.

Prior to the adoption of SFAS 123R, the Company's stock-based employee compensation was accounted for in accordance with APB 25, under which no compensation expense was recorded for stock options because the exercise price of employee stock options equaled the market price of the underlying stock on the date of grant. If the Company had adopted SFAS 123R in prior periods, the impact of that statement would have approximated the impact of SFAS 123 (as if the fair-value-based recognition provisions of that statement had been applied) as shown in the following table:

	Three Months Ended	Six Months Ended
	June 30, 2005	June 30, 2005
	As Restated	As Restated
	(See Note 2)	(See Note 2)
Net income (loss), as reported	\$ (581)	\$ 8,037
Less: stock-based employee compensation expense determined under fair value based method, net of related tax	(488)	(931)
Net income (loss), pro forma	\$ (1,069)	\$ 7,106
Diluted earnings (loss) per share, as reported	\$ (0.04)	\$ 0.54
Diluted earnings (loss) per share, pro forma	\$ (0.07)	\$ 0.48

The fair value of each stock option award and SAR is estimated on the date of grant using a Black-Scholes-Merton option-pricing formula. Expected volatilities are based on historical volatility of the Company's common stock. The expected term of stock options and SARs represents the period of time for which such awards are expected to be outstanding and has been determined based on an analysis of historical exercise behavior. The risk-free interest rate equals the five-year U.S. Treasury rate. For option grants and SARs issued in the three months ended June 30, 2006, the assumptions shown in the following table were used:

Three Months Ended

June 30, 2006

Edgar Filing: TREX CO INC - Form 10-Q/A

Expected volatility	.40
Expected dividends	
Expected term (in years)	5
Risk-free rate	4.82%

The grant-date fair value of stock options and SARs granted during the three months ended June 30, 2006 was \$13.23.

Table of Contents

Performance Share Awards

In the year ended December 31, 2005 and the six months ended June 30, 2006, the Company granted PSAs to certain of the Company's officers and other employees under the 2005 Plan. The PSAs consist of a contingent right to receive shares of the Company's common stock if the Company meets specified performance criteria over a three-year performance period.

If specified performance objectives are satisfied for the three-year performance periods ending in 2007 and 2008, the estimated number of shares to be earned is 39,244 and 71,800, respectively, although a maximum number of 58,866 and 107,700 shares, respectively, may be earned depending on the extent to which such performance objectives are satisfied. Prior to January 1, 2006, PSAs were accounted for as prescribed by APB 25. Under APB 25, PSAs were accounted for by charging a ratable portion of compensation expense during each accounting period based on the probable number of shares to be issued. Beginning January 1, 2006, all PSAs are accounted for in accordance with the provisions of SFAS 123R. The fair value of the PSAs is determined based on the closing price of the Company's shares on the New York Stock Exchange on the date of grant. In the six months ended June 30, 2006, 71,800 PSAs were granted at \$24.17 per share. During the three and six months ended June 30, 2006, \$0.1 million and \$0.2 million, respectively, was charged to compensation expense for PSAs, based on the estimated number of shares that will be issued at the end of the applicable performance periods. There was no compensation expense for PSAs in the six months ended June 30, 2005. At June 30, 2006, there was \$1.3 million of total unrecognized compensation expense related to PSAs remaining to be recognized. Compensation expense attributable to PSAs is included in Selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

Restricted Stock

The 2005 Plan also authorizes the grant of restricted stock to employees, officers, and directors. Restricted shares vest either with respect to one-third of the award on each of the first, second and third anniversaries of the grant date or with respect to one-third of the award on each of the third, fourth and fifth anniversaries of the grant date. The fair value of the restricted stock is determined based on the closing price of the Company's shares on the New York Stock Exchange on the grant date. In the six months ended June 30, 2006, 20,000 restricted shares were granted at \$26.65 per share. In the three-month and six-month periods ended June 30, 2006, compensation expense of \$0.2 million and \$0.5 million, respectively, was recognized related to restricted stock awards. In the three and six months ended June 30, 2005, compensation expense of \$0.2 million and \$0.4 million, respectively, was recognized related to restricted stock awards. At June 30, 2006, there was \$1.1 million of total unrecognized compensation expense related to unvested restricted stock remaining to be recognized. Compensation expense related to restricted stock is included in Selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

9. SEASONALITY

The Company's net sales and income from operations have historically varied from quarter to quarter. Such variations are principally attributable to seasonal trends in the demand for Trex®. The Company has historically experienced lower net sales during the fourth quarter because holidays and adverse weather conditions in certain regions reduce the level of home improvement and new construction activity. Net sales during the six months ended June 30, 2004 and 2005 accounted for approximately 63% and 59% of annual net sales in the years ended December 31, 2004 and 2005, respectively.

10. COMMITMENTS AND CONTINGENCIES

Lease Contingency

In anticipation of relocating the Company's corporate headquarters to Dulles, Virginia, the Company entered into a lease agreement in July 2005. The Company has reconsidered and decided not to move its headquarters. The Company began paying rents under the lease on January 1, 2006. As of June 30, 2006, minimum payments remaining under the lease over the fiscal years ending December 31, 2006, 2007, 2008, 2009, and 2010 are \$0.4 million, \$1.1 million, \$1.5 million, \$1.6 million and \$1.6 million, respectively, and \$20.3 million thereafter. The Company is currently attempting to sublet the office space. Based on current market conditions, the Company estimates that the present value of the future sublease rentals, net of transaction costs, will be less than the Company's remaining minimum lease payment obligation. Accordingly, pursuant to FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, the Company recorded a charge of \$0.6 million in Selling, general and administrative expenses in the three months ended June 30, 2006. The change reflected a reduction in estimated future sublease income from previous estimates primarily as a result of a change in the Company's assumption regarding the commencement date of an anticipated sublease.

Edgar Filing: TREX CO INC - Form 10-Q/A

The Company's assumptions in estimating future sublease income included consideration of vacancy rates, rental rates and the timing of future sublease income. Vacancy rates in the area where the property is located at June 30, 2006 were consistent with vacancy rates at December 31, 2005. Management believes that the rental rate on the Company's lease is comparable to the current

Table of Contents

market rates in the area. However, the anticipated delivery of new office space in the area over the next 24 months may have a negative effect on vacancy rates and rental rates. The inability to sublet the office space or unfavorable changes to key management assumptions used in the estimate of the future sublease income may result in additional charges in future periods.

Legal Matters

The Company is involved in certain litigation as described in Note 12 to the audited consolidated financial statements included in the Company's annual report on Form 10-K/A for the fiscal year ended December 31, 2005. In addition, the Company currently has other lawsuits, as well as other claims, pending against it. Management believes that the ultimate resolution of these lawsuits and claims will not have a material effect on the Company's consolidated financial condition, results of operations, liquidity or competitive position.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend our forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in these sections. All statements regarding our expected financial position and operating results, our business strategy, our financing plans, forecasted demographic and economic trends relating to our industry and similar matters are forward-looking statements. These statements can sometimes be identified by our use of forward-looking words such as may, will, anticipate, estimate, expect or intend. We cannot promise you that our expectations in such forward-looking statements turn out to be correct. Our actual results could be materially different from our expectations because of various factors, including the factors discussed under Item 1A. Risk Factors in our Annual Report on Form 10-K, as amended on Form 10-K/A for fiscal year 2005 filed with the Securities and Exchange Commission.

Restatement

On January 26, 2007, the Audit Committee of the company's Board of Directors concluded, based upon the recommendation of the Company's management that, to correct certain errors, the Company should restate its financial results, including quarterly results, for its fiscal years ended December 31, 2003, 2004 and 2005 and its quarterly results for the first nine months of its fiscal year ended December 31, 2006. Accordingly, we have restated our financial statements to correct these errors, as described more fully in Note 2 of the consolidated financial statements in this Form 10-Q/A. The restatement adjustments have the effect of increasing the Company's reported net income for the three and six months ended June 30, 2006 by \$0.4 million, or \$0.03 per diluted share, and by \$0.3 million, or \$0.02 per diluted share, respectively. This Management's Discussion and Analysis of Financial Condition and Results of Operations has been modified and updated principally to reflect the effect of these restatements.

Overview

General. Management considers growth in net sales, gross margin, selling, general and administrative expenses, and net income as key indicators of our operating performance. Growth in net sales reflects consumer acceptance of composite decking, the demand for Trex over competing products, the success of our branding strategy, the effectiveness of our distributors, and the strength of our dealer network and contractor franchise. Management emphasizes gross margin as a key measure of performance because it reflects the Company's ability to price its products accurately and to effectively manage its manufacturing operations. Managing selling, general and administrative expenses is important to support profitable growth. The Company's investment in research and development activities, which is included in selling, general and administrative expenses, enables it to enhance manufacturing operations, develop new products and analyze new technologies. Management considers net income to be a measure of the Company's overall financial performance.

In the last three years, the Company has expanded its product offerings by introducing the Trex Accents® and Trex Brasilia® decking product lines and the new Trex Designer Series Railing™ and Trex Artisan Series Railing® products. Sales of the Trex Accents® product, which was launched in the fourth quarter of 2003, accounted for approximately 66% of total gross sales in the second quarter of 2006. Sales of the Trex Brasilia® and Trex Artisan Series Railing® products accounted for approximately 9% of total gross sales in the second quarter of 2006. The Company expects that the demand for the Trex Brasilia® and Trex Artisan Series Railing® products will grow as these products become generally more available through the Company's distribution channels. Because these new products have a higher price per unit, the introduction of the products into the sales mix has a positive effect on total revenue.

The management of raw materials costs, the strengthening of manufacturing performance and the enhancement of product quality constitute some of the Company's principal operating objectives. In 2005, manufacturing unit costs increased primarily because of higher costs for reclaimed polyethylene, or PE material, and lower manufacturing plant utilization resulting in part from the temporary suspension of operations of some production lines. In 2006, manufacturing unit costs have been negatively affected by continued increases in the cost of PE material and incremental costs associated with the Company's quality initiatives. In the first six months of 2006, the Company's PE material costs increased 24.1% over the first six months of 2005. The Company expects that new PE material sourcing and processing initiatives will be necessary for it to manage effectively its costs of PE material and improve manufacturing performance in future periods. The Company continues to focus on product quality initiatives to enhance the appearance of the entire product line. These initiatives emphasize color consistency and other product specifications. They also have contributed to higher manufacturing costs by reducing manufacturing line efficiencies, as well as increasing labor, packaging and raw material costs. Each manufacturing plant has added personnel to its inspection functions and finished goods packaging has been redesigned to minimize damage to the product in transit.

Net Sales. Net sales consists of sales and freight, net of returns and discounts. The level of net sales is principally affected by sales volume and the prices paid for Trex. The Company's branding and product differentiation strategy enables it to command premium prices over wood and to maintain price stability for Trex. To ensure adequate availability of product to meet anticipated

Table of Contents

seasonal consumer demand, the Company has historically provided its distributors and dealers incentives to build inventory levels before the start of the prime deck-building season. These incentives include prompt payment discounts or extended payment terms. In addition, the Company from time to time may offer price discounts on specified products and other incentives based on increases in distributor purchases as part of specific promotional programs.

There are no product return rights granted to the Company's distributors except those granted pursuant to the warranty provisions of the Company's agreement with its distributors. Under such warranty provisions, the Company warrants that its products will be free from defects in workmanship and materials and will conform to the Company's standard specifications for its products in effect at the time of the shipment. If there is such a defect in any of its products, the Company has an obligation under its warranty to replace the products. On some occasions, the Company will voluntarily replace products for distributors as a matter of distributor relations, even though the Company does not have a legal obligation to do so. Product returns were not material to net sales in the three months ended June 30, 2005 or June 30, 2006.

Under the Company's limited warranty with consumers, the Company warrants that its products will be free from material defects in workmanship and material and will not check, split, splinter, rot or suffer structural damage from termites or fungal decay. If there is such a defect in any of its products, the Company has an obligation either to replace the defective product or refund the purchase price, in either case without any payment for labor to replace the defective product or freight. Warranty costs have not been material during the three months ended June 30, 2006. On some occasions, the Company will voluntarily replace a product or refund a portion of the purchase price to consumers as a matter of consumer relations, even though the Company does not have a legal obligation to do so. The Company considers on a case-by-case basis each situation in which it may effect such a discretionary replacement or refund.

Gross Profit. Gross profit represents the difference between net sales and cost of sales. Cost of sales consists of raw materials costs, direct labor costs, manufacturing costs and freight. Raw materials costs generally include the costs to purchase and transport waste wood fiber, PE material and pigmentation for coloring Trex products. Direct labor costs include wages and benefits of personnel engaged in the manufacturing process. Manufacturing costs consist of costs of depreciation, utilities, maintenance supplies and repairs, indirect labor, including wages and benefits, and warehouse and equipment rental activities.

Selling, General and Administrative Expenses. The largest components of selling, general and administrative expenses are branding and other sales and marketing costs, which have increased significantly as the Company has sought to build brand awareness of Trex in the decking and railing market. Sales and marketing costs consist primarily of salaries, commissions and benefits paid to sales and marketing personnel, advertising expenses and other promotional costs. General and administrative expenses include salaries and benefits of personnel engaged in research and development, procurement, accounting and other business functions, office occupancy costs attributable to these functions, and professional fees. As a percentage of net sales, selling, general and administrative expenses have varied from quarter to quarter due, in part, to the seasonality of the Company's business.

Three Months Ended June 30, 2006 Compared With Three Months Ended June 30, 2005

Net Sales. Net sales in the quarter ended June 30, 2006 (the 2006 quarter) increased 46.6% to \$121.5 million from \$82.9 million in the quarter ended June 30, 2005 (the 2005 quarter). The increase in net sales was primarily attributable to a 37.6% increase in sales volume as a result of an increase in demand from dealers and distributors and, to a lesser extent, an increase in price per unit. The increase in price per unit resulted from a price increase, effective January 2006, of 4.0% and a price increase, effective May 2006, of 7.0%, as well as from increased sales of higher unit priced products. The effect of the price increase was partially offset by incentives offered by the Company as part of its early buy annual discount programs. The Company has historically utilized an annual early buy sales program to create an incentive for distributors and dealers to commit to purchase Trex products before the start of the decking season. The Company's early buy program in 2006 and 2005 included extended payment terms for purchases in the first four months of each year. The payment options provided in the 2006 early buy program included prompt payment discounts from 0.5% to 2.5% or extended payment terms from 30 to 90 days. The payment options provided in the 2005 early buy program included prompt payment discounts from 1.0% to 2.0% or extended payment terms from 45 to 90 days.

Gross Profit. Gross profit increased 52.8% to \$35.8 million in the 2006 quarter from \$23.4 million in the 2005 quarter. The increase was primarily attributable to higher net sales volume, increased sales prices, and increased sales of higher unit priced products. Gross profit as a percentage of net sales, or gross margin, increased to 29.4% in the 2006 quarter from 28.3% in 2005 quarter. The increased cost of PE material resulted in a decrease in gross margin of approximately 3.8% from the 2005 quarter. Increased sales prices and increased sales of higher margin products had a positive impact on gross margin of 5.1% in the 2006 quarter.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased 6.0% to \$23.4 million in the 2006 quarter from \$24.9 million in the 2005 quarter. The lower selling, general and administrative expenses resulted principally from decreases of \$2.9 million in branding expenses, \$0.6 million in expenses related to capital projects, \$0.5 million

Table of Contents

in personnel-related expenses and \$0.4 million in professional fees. Selling, general and administrative expenses in the 2005 quarter also included the write-off of \$0.8 million in equipment which the Company disposed of during 2005 in connection with its retooling of certain production lines. The effect of these factors was offset in part by a \$3.5 million increase in compensation and benefits and a \$0.9 million increase in costs associated with the lease for office space the Company is attempting to sublet. The increase in compensation and benefits was primarily the result of incentive compensation accruals recorded in the 2006 quarter as well as the reversal of \$0.9 million in compensation accruals during the 2005 quarter. The 2005 reversal resulted from management's assessment that lesser amounts would be earned and payable under these programs for the year ended December 31, 2005. For additional information regarding the lease, see Note 10 to the unaudited consolidated financial statements appearing elsewhere in this report. As a percentage of net sales, selling, general and administrative expenses decreased to 19.3% in the 2006 quarter from 30% in the 2005 quarter.

Interest Expense. Net interest expense increased to \$1.1 million in the 2006 quarter from \$0.7 million in the 2005 quarter. The increase in net interest expense resulted from a decrease in interest capitalized on construction in process. The Company capitalized \$0.4 million and \$0.8 million of interest on construction in process in the 2006 and 2005 quarters, respectively.

Provision for Income Taxes. The Company recorded a provision for income taxes of \$3.8 million in the 2006 quarter compared to a benefit for income taxes of \$1.6 million in the 2005 quarter. The provisions reflected an effective tax rate of approximately 34% in the 2006 quarter and a tax benefit of approximately 73% in the 2005 quarter. The 2005 effective rate was due to a lower state tax rate driven by the recognition of incentives related to the expansion of the Company's operations in Mississippi and the recognition of certain state tax credits for which the Company qualified in the 2005 quarter.

Six Months Ended June 30, 2006 Compared With Six Months Ended June 30, 2005

Net Sales. Net sales in the six-month period ended June 30, 2006 (the 2006 six-month period) increased 31.3% to \$226.8 million from \$172.8 million in the six-month period ended June 30, 2005 (the 2005 six-month period). The increase in net sales was primarily attributable to a 19.4% increase in sales volume as a result of an increase in demand from dealers and distributors and, to a lesser extent, an increase in price per unit. The increase in price per unit resulted from a price increase, effective January 2006, of 4.0% and a price increase, effective May 2006, of 7.0%, as well as from increased sales of higher unit priced products. The effect of the price increase was partially offset by incentives offered by the Company as part of its early buy annual discount programs.

Gross Profit. Gross profit increased 7.0% to \$60.9 million in the 2006 six-month period from \$56.9 million in the 2005 six-month period. The increase was primarily attributable to the higher net sales volume, increased sales prices, and increased sales of higher unit priced products. Gross profit as a percentage of net sales, or gross margin, decreased to 26.9% in the 2006 six-month period from 33.0% in 2005 six-month period. The increased cost of PE material resulted in a decrease in gross margin of approximately 5.3% from the 2005 six-month period. Gross margin was also adversely affected by a decrease in production rates due to product quality initiatives and lower capacity utilization and the associated decrease in absorption of fixed manufacturing expenses which contributed to a 7.6% decrease in gross margin. The negative effect of the foregoing factors on gross margin in the 2006 six-month period was offset, in part, by the positive impact on gross margin of 7.2% from increased sales prices and increased sales of higher margin products.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased 6.8% to \$41.1 million in the 2006 six-month period from \$44.1 million in the 2005 six-month period. The lower selling, general and administrative expenses resulted principally from a decrease of \$5.1 million in branding expenses, \$1.1 million in expenses related to capital projects, \$1.1 million in professional fees and \$0.4 million in research and development expenses. Selling, general and administrative expenses in the 2005 six-month period also included the write-off of \$0.8 million in equipment which the Company disposed of during 2005 in connection with its retooling of certain production lines. The effect of these factors was offset in part by a \$4.3 million increase in compensation and benefits and a \$1.1 million increase in expenses related to the lease for office space the Company is attempting to sublet. The increase in compensation and benefits was primarily the result of incentive compensation accruals recorded in the 2006 six-month period. For additional information regarding the lease, see Note 10 to the unaudited consolidated financial statements appearing elsewhere in this report. As a percentage of net sales, selling, general and administrative expenses decreased to 18.1% in the 2006 six-month period from 25.5% in the 2005 six-month period.

Interest Expense. Net interest expense increased to \$2.0 million in the 2006 six-month period from \$1.5 million in the 2005 six-month period. The increase in net interest expense resulted from a decrease in interest capitalized on construction in process. The Company capitalized \$0.7 million and \$1.4 million of interest on construction in process in the 2006 and 2005 six-month periods, respectively. The effect of such capitalization of interest was partially offset by a decrease in interest expense, which resulted from reduced average debt balances in the 2006 six-month period.

Provision for Income Taxes. The Company recorded a provision for income taxes of \$6.2 million in the 2006 six-month period compared to a provision of \$3.3 million in the 2005 six-month period. The provisions reflected an effective tax rate of approximately 35% in the 2006

Edgar Filing: TREX CO INC - Form 10-Q/A

six-month period and approximately 29% in the 2005 six-month period. The 2005 effective rate was due to a lower state tax rate driven by the recognition of incentives related to the expansion of the Company's operations in Mississippi and the recognition of certain state tax credits for which the Company qualified in the 2005 six-month period.

Table of Contents**Liquidity and Capital Resources**

The Company finances its operations and growth primarily with cash flow from operations, borrowings under its credit facility and other loans, operating leases and normal trade credit terms from operating activities in the 2006 six-month period.

Sources and Uses of Cash. The Company's cash provided by operating activities for the 2006 six-month period was \$25.4 million compared to \$16.6 million for the 2005 six-month period. Cash from operating activities for the 2006 six-month period was positively affected by the 43.8% increase in net income in the 2006 six-month period over the 2005 six-month period. Accounts receivable increased \$25.8 million from \$12.4 million at December 31, 2005 to \$38.2 million at June 30, 2006, compared to an increase of \$4.9 million from \$22.0 million at December 31, 2004 to \$26.9 million at June 30, 2005. The smaller use of cash in 2005 to support accounts receivable was attributable to the effect of a higher level of accounts receivable at December 31, 2004. The higher accounts receivable balance at December 31, 2004 resulted from the extended payment terms offered to customers in the fourth quarter of 2004 to facilitate new product introductions and to provide additional incentives to customers to meet early season demand. The Company did not offer this type of program in the fourth quarter of 2005. The higher accounts receivable balance at June 30, 2006 compared to June 30, 2005 was principally attributable to increased sales in the 2006 quarter. The days of sales outstanding decreased from 29 for the 2005 quarter to 28 for the 2006 quarter. The Company's total inventories, including raw materials and finished goods, decreased from \$56.9 million at December 31, 2005 to \$51.4 million at June 30, 2006, compared to an increase from \$44.4 million at December 31, 2004 to \$47.9 million at June 30, 2005. Raw materials inventories increased from \$18.2 million at December 31, 2005 to \$29.0 million at June 30, 2006, compared to an increase from \$11.8 million at December 31, 2004 to \$19.1 million at June 30, 2005. Finished goods inventories decreased from \$38.8 million at December 31, 2005 to \$22.4 million at June 30, 2006, compared to a decrease from \$32.6 million at December 31, 2004 to \$28.8 million at June 30, 2005. A decrease in finished goods inventories during the first six months of the year is consistent with the seasonality in the Company's business. An increase in accounts payable and accrued expenses and receipt of the Company's income tax refunds had a positive effect on cash from operating activities in the 2006 six-month period. The increase in accounts payable resulted primarily from the timing of payments for raw materials and freight. The increase in accrued expenses was principally attributable to the timing of expenses and related payments.

The Company's cash used in investing activities totaled \$7.1 million in the 2006 six-month period, compared to \$23.4 million in the 2005 six-month period. In the 2006 six-month period, the Company's expenditures primarily consisted of the purchase of plastic reprocessing and additional embossing equipment. In the 2005 six-month period, the Company's expenditures primarily consisted of the construction of the Olive Branch, Mississippi manufacturing site, as well as the purchase of related machinery and equipment.

The Company's cash used in financing activities was \$12.7 million in the 2006 six-month period compared to \$8.2 million in the 2005 six-month period. In the 2006 six-month period, the Company's net debt reductions included \$4.1 million under its revolving credit facility and \$8.0 million of its senior notes. In the 2005 six-month period, the Company's net debt reduction included \$8.0 million of its senior notes.

Indebtedness. At June 30, 2006, the Company's indebtedness totaled \$61.6 million and the annualized overall weighted average interest rate of such indebtedness, including the effect of the Company's interest rate swaps, was approximately 6.3%.

The Company's ability to borrow under its revolving credit facility is tied to a borrowing base that consists of account receivables and finished goods inventories. At June 30, 2006, the borrowing base was \$46.9 million and no borrowings were outstanding under the facility.

Debt Covenants. To remain in compliance with its credit facility, senior note and bond loan document covenants, the Company must maintain specified financial ratios based on its levels of debt, capital, net worth, fixed charges, and earnings (excluding extraordinary gains and extraordinary non-cash losses) before interest, taxes, depreciation and amortization. At June 30, 2006, the Company was in compliance with these covenants.

Capital Requirements. The Company made capital expenditures in the 2006 six-month period totaling \$7.1 million, primarily to purchase raw material reprocessing and additional embossing equipment. The Company currently estimates that its capital requirements in 2006 will be \$25 to \$30 million. The Company expects that it will continue to make significant capital expenditures in subsequent years as the Company expands its manufacturing operations in order to meet the anticipated increase in the demand for Trex.

At June 30, 2006, the Company had a total of approximately \$7.0 million of cash and cash equivalents. The Company believes that cash on hand, cash from operations and borrowings expected to be available under the Company's existing revolving credit facility will provide sufficient funds to enable the Company to fund its planned capital expenditures, make scheduled principal and interest payments, meet its other cash requirements and maintain compliance with terms of its borrowing

Table of Contents

agreements for at least the next 12 months. Thereafter, significant capital expenditures may be required to provide increased capacity to meet the expected growth in demand for the Company's products. The Company currently expects that it will fund its future capital expenditures from operations and financing activities. The actual amount and timing of the Company's future capital requirements may differ materially from the Company's estimate depending on the demand for Trex and new market developments and opportunities. The Company may determine that it is necessary or desirable to obtain financing for such requirements through bank borrowings or the issuance of debt or equity securities. Debt financing would increase the Company's level of indebtedness, while equity financing would dilute the ownership of the Company's stockholders. There can be no assurance as to whether, or as to the terms on which, the Company would be able to obtain such financing.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. The Company's management, with the participation of its Chief Executive Officer, who is the Company's principal executive officer, and its Senior Vice President and Chief Financial Officer, who is the Company's principal financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of June 30, 2006.

As previously disclosed under Item 9A. Controls and Procedures in our Annual Report on Form 10-K for our 2005 fiscal year, as amended on Form 10-K/A, our management identified a material weakness in our internal control over financial reporting as of December 31, 2005. Management concluded that the Company did not have a sufficient complement of personnel with knowledge of and experience in the Company's financial reporting processes or with adequate technical expertise in the application of U.S. generally accepted accounting principles and in resolving non-routine or complex accounting matters. As a result, the review of the accounting for certain transactions and the reconciliation of certain accounts was not appropriately completed on a timely basis, which resulted in errors in the recording of certain expenses (including cost of sales, selling, general and administrative expenses, and interest expense) and the related accounts payable and accrued expenses, errors in recording cash disbursements, errors in accounts receivable and inventory valuation, errors in cost capitalization and the related depreciation, and errors in income taxes as well as errors in the preparation of financial statement disclosures.

In 2006 and into 2007, we added additional accounting, finance and information technology staff members at our headquarters and plant locations and implemented a series of new internal control procedures to improve the effectiveness of our transaction processing and our financial statement close processes. In addition to these enhancements, we have provided training regarding effective review and approval procedures to the appropriate personnel. The additional personnel and process enhancements contributed to the discovery in 2006 of additional errors that led to management's determination that restatement of the prior period financial statements was warranted. There can be no assurance at this time that the actions taken to date will effectively remediate the material weakness referred to above. Accordingly, the material weakness in our internal control over financial reporting that existed as of December 31, 2005, as described above and as disclosed in Item 9A of our Amended 2005 10-K, had not yet been remediated as of June 30, 2006. Our Chief Executive Officer and our Senior Vice President and Chief Financial Officer have concluded that, as a result of the foregoing material weakness in our internal control over financial reporting, our disclosure controls and procedures were not effective as of June 30, 2006.

We are continuing to closely monitor the effectiveness of our processes, procedures and controls, and will make any further changes as management determines appropriate.

Changes in Internal Control Over Financial Reporting. Except in connection with actions we are taking to remediate the material weakness in our internal control financial reporting discussed above there was no change in our internal control over financial reporting that occurred during the fiscal quarter covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. Accordingly, the material weakness in our internal control over financial reporting that existed as of December 31, 2005, as described above and as disclosed in Item 9A of our Amended 2005 10-K, had not yet been remediated as of June 30, 2006.
