Redesigned 2009 Acura RL Debuts at Chicago Auto Show

Bold Styling, Larger Engine, and Improved Handling Help RL Raise The Luxury Performance Bar

CHICAGO, U.S.A., February 6, 2008 The redesigned 2009 Acura RL luxury sedan made its world debut today at the Chicago Auto Show. Featuring bold, sleek exterior styling, an upgraded interior, advanced technologies and powerful new engine, the RL once again pushes the limits of performance, style, and luxury. The 2009 RL will go on-sale this spring at Acura dealerships nationwide.

The 2009 RL furthers cutting edge technology with the addition of new high-tech items including AcuraLink® weather, AcuraLink®Traffic Rerouting , XM® Note, Active Sound Control, and Bluetooth® Audio to an already robust list of features found on the previous RL. To enhance handling, new chassis technology abounds in the drivetrain in the form of an improved Super Handling All-Wheel Drive system, a revised steering system, upgraded coil springs, better performing shock absorbers, larger rear stabilizer bar, and more aggressive wheels and tires. Performance improves with the RL thanks to a new, larger 3.7-liter V-6 that incorporates the first ever SOHC use of VTEC® valvetrain actuation for both the intake and exhaust valves.

RL represents the very best we have to offer in terms of engineering, technology, performance, luxury and safety , said Dick Colliver, executive vice president, sales. It s designed for a new generation of performance-luxury buyers looking to travel more quickly, more efficiently and more connected to the world around them.

For 2009, the RL will be offered in three different trim levels including RL, RL with Technology Package and RL with Technology Package Plus CMBS . All RL s receive a potent new 3.7-liter V-6 engine, Super Handling All-Wheel Drive , a Bose® Surround Sound audio system, Bluetooth® HandsFreeLink® connectivity and a GPS-based solar-sensing climate control system. The Technology Package includes the satellite-linked Acura Navigation System with Voice Activation with rearview camera, AcuraLink® Real-time traffic, AcuraLink® weather, Traffic Rerouting , a rear view back-up camera, Active Front Lighting System (AFS), ventilated front seats, and a wood/leather steering wheel and shift knob. The top RL package is the Technology Package with CMBS which also includes Acura s acclaimed Collision Mitigation Braking System (CMBS), Adaptive Cruise Control (ACC), and genuine wood instrument panel trim.

All-New 2009 TSX to Debut at New York International Auto Show

TORRANCE, Calif., U.S.A., February 11, 2008 Acura announced today it will debut the all-new 2009 Acura TSX sports sedan at the 2008 New York International Auto Show and released an exterior photo of the new model. Scheduled to go on-sale in the spring, the 2009 Acura TSX will be the second generation of Acura's popular entry level sedan and feature numerous advancements in performance, styling, technology and safety.

The new 2009 TSX speaks clearly to the direction we are taking our Acura sedans in the future," said Dick Colliver, executive vice president auto sales. The TSX is a significant step in the advancement of our sedan lineup and the continued enhancement of the Acura brand.

Acura unveiled the new 2009 RL at the Chicago Auto Show last week and also announced the company will introduce an-all new TL performance luxury sedan later this year.

The 2009 Acura TSX will be introduced during the New York International Auto Show media days which occur on March 19th and 20th.

**Honda Sets All-Time Record for Auto Production in the Month of January
for Regions Outside Japan and Worldwide**

February 26, 2008 Honda Motor Co., Ltd., today announced a summary of automobile production, Japan domestic sales, and export results for the month of January 2008.

<Production>

Production in Japan experienced a year-on-year decrease for the fifth consecutive month (since September 2007).

Production in regions outside of Japan experienced a year-on-year increase for the 30th consecutive month (since August 2005), setting an all-time record for the month of January. This includes record production in North America, the U.S., Europe, Asia, and China.

Worldwide production also experienced a year-on-year increase for the 30th consecutive month (since August 2005), setting an all-time record for the month of January.

<Japan Domestic Market Sales>

Total domestic sales for the month of January 2008 experienced a year-on-year increase for the first time in 13 months (since December 2006).

Due to strong sales of the all-new *Fit*, new vehicle registrations in January experienced a year-on-year increase for the third consecutive month (since November 2007).

Sales of mini-vehicles in January experienced a year-on-year increase for the first time in 11 months (since February 2007).

<Vehicle registrations - excluding mini-vehicles>

Fit was the industry's best-selling car among new vehicle registrations for the month of January 2008, with sales of 15,083 units.

<Mini-vehicles - under 660cc>

Life was the industry's sixth best-selling car among mini-vehicles for the month of January 2008, with sales of 5,936 units.

<Exports from Japan>

Due mainly to a decrease in exports to North America and Europe, total exports from Japan in January 2008 experienced a year-on-year decline for the first time in seven months (since June 2007).

Table of Contents**PRODUCTION, SALES and EXPORTS (January 2008)****Worldwide Production**

	January	
	Units	vs.07
Japan	100,330	-3.7%
