

Edgar Filing: RIO TINTO PLC - Form 425

RIO TINTO PLC
Form 425
August 06, 2008

Filed by: BHP Billiton Plc

and BHP Billiton Limited

Pursuant to Rule 425 under the Securities Act of 1933

Subject Company: Rio Tinto plc

Commission File No.: 001-10533

The following are slides comprising a presentation that was given on June 24, 2008, and was subsequently amended to edit the footnote on slide 31 to show BHP Billiton attributable Mineral Resource and Ore Reserve figures for FY2006 and FY2007. The amended version of this presentation has been posted to www.bhpbilliton.com, replacing the version that was originally posted there.

not
relevant
persons.
Certain

statements
in
this
presentation
are
forward-looking
statements
(including
statements
regarding
contribution
synergies,
future
cost
savings,
the
cost
and
timing
of
development
projects,
future
production
volumes,
increases
in
production
and
infrastructure
capacity,
the
identification
of
additional
mineral
Reserves
and
Resources
and
project
lives
and,
without
limitation,
other
statements
typically
containing
words

such
as
"intends,"
"expects,"
"anticipates,"
"targets,"
plans,"
"estimates"
and
words
of
similar
import.)
These
statements
are
based
on
current
expectations
and
beliefs
and
numerous
assumptions
regarding
BHP
Billiton's
present
and
future
business
strategies
and
the
environments
in
which
BHP
Billiton
and
Rio
Tinto
will
operate
in
the

differ
materially.
Factors
that
could
cause
actual
results
or
performance
to
differ
materially

from
those
expressed
or
implied
in
the
forward-looking
statements
include,
but
are
not
limited
to,
BHP
Billiton's
ability
to
successfully
combine
the
businesses
of
BHP
Billiton
and
Rio
Tinto
and
to
realise
expected
synergies
from
that
combination,
the
presence
of
a
competitive
proposal
in
relation
to
Rio
Tinto,
satisfaction
of

any
conditions
to
any
proposed
transaction,
including
the
receipt
of
required
regulatory
and
anti-trust
approvals,
Rio
Tinto's
willingness
to
enter
into
any
proposed
transaction,
the
successful
completion
of
any
transaction,
and
the
risk
factors
discussed
in
BHP
Billiton's
and
Rio
Tinto's
filings
with
the
U.S.
Securities
and
Exchange
Commission
("SEC")

(including
in
Annual
Reports
on
Form
20-F)

Information
for
US
Holders
of
Rio
Tinto
Limited
Shares
BHP
Billiton
Limited
is
not
required
to,
and
does
not
plan
to,
prepare
and
file
with
the
SEC
a
registration
statement
in
respect
of
the

Rio
Tinto
Limited
Offer.
Accordingly,
Rio
Tinto
Limited
shareholders
should
carefully
consider
the
following:
The
Rio
Tinto
Limited
Offer
will
be
an
exchange
offer
made
for
the
securities
of
a
foreign
company.
Such
offer
is
subject
to
disclosure
requirements
of
a
foreign
country
that
are
different
from
those
of
the

United
States.
Financial
statements
included
in
the
document
will
be
prepared
in
accordance
with
foreign
accounting
standards
that
may
not
be
comparable
to
the
financial
statements
of
United
States
companies.
Information
Relating
to
the
US
Offer
for
Rio
Tinto
plc
and
the
Rio
Tinto
Limited
Offer
for
Rio
Tinto
shareholders

located
in
the
US
It
may
be
difficult
for
you
to
enforce
your
rights
and
any
claim
you
may
have
arising
under
the
U.S.
federal
securities
laws,
since
the
issuers
are
located
in
a
foreign
country,
and
some
or
all
of
their
officers
and
directors
may
be
residents
of
foreign

countries.
You
may
not
be
able
to
sue
a
foreign
company
or
its
officers
or
directors
in
a
foreign
court
for
violations
of
the
U.S.
securities
laws.
It
may
be
difficult
to
compel
a
foreign
company
and
its
affiliates
to
subject
themselves
to
a
U.S.
court's
judgment.
You
should
be

aware
that
BHP
Billiton
may
purchase
securities
of
either
Rio
Tinto
plc
or
Rio
Tinto
Limited
otherwise
than
under
the
exchange
offer,
such
as
in
open
market
or
privately
negotiated
purchases.

Blast Furnace Production Inputs

Slide 9

Blast furnace steel production is continuing to increase

66% of global crude steel is currently
generated via blast furnaces

Blast furnace production and

share is
continuing to rise

Trend is to larger, higher productivity
furnaces

China's steel policy is supportive of this
move and the shift towards blast furnace

Shift in size and efficiency demands will
require high-quality raw materials

Slide 10

BHP Billiton's businesses are leaders in their own right

BHP Billiton is the only mining company with a top three marketing position in all three steel raw material groups

Australian based operations have a significant location advantage with close proximity to Asian growth market

Expected mineralisation base will support metallurgical coal and iron ore production lives of >50 years

We are aggressively expanding production capacity

production

(a)
(mt, CY2007 based on JFY2008 prices)

Slide 11

Three large, low cost, high quality and expandable businesses

Production is expected to triple between 2007 and 2015

benefits of
operational scale and simplicity

High quality resources, and low costs of production

Large resource base in close proximity to key growth markets

Iron Ore

Metallurgical

Coal

Manganese

Bowen Basin produces ~64% of the global seaborne metallurgical coal

Large, low cost operations, supplying extremely high quality products to customers

Resource base and infrastructure provides growth optionality

Unique high grade ore position

High value in use is being reflected in price

12bt of high quality Mineral Resource
(100% basis)

Potential Mineralisation range has
increased by 17% (21
35bt, 100%
basis)

Large tonnages of Marra
Mamba and
Brockman ores, available for blending, at
both Central and East Pilbara hubs

Benefits of concentrated resources

-

Infrastructure scale efficiencies

-

More resource unlocked by local
blending

-

Smaller environmental footprint

2008 Delivered

2007 Delivered

Low cost supply to customers

Proximity to market drives a delivered cost advantage

Freight costs have become a much larger component of delivered cost

Supply side pressures has seen increased supply of low cost Chinese domestic ore in 2008

Tier 1 direct ship ore producers are best placed to deliver sustainable low cost product in an environment of rising input costs

Other

Source: IMnI

a) Includes Australia, Burma, Indonesia, Phillipines, Taiwan, Vietnam and Korea

Ore is produced globally

Individual ores are unique, large
variation in grade and quality

Low grade ore (less than 30% Mn)

Cannot carry transport cost thus
used domestically

Largest producers China, India
and Ukraine

Medium and high grade ore (between
37-48% Mn)

Dominates seaborne market

Largest producers South Africa,
Gabon and Australia
...but based on lower grade ores. High grade ore is located
principally in Australia and South Africa
Manganese ore production by grade and country
(mt, CY2007)

Slide 69

High grade ore has significant value in use benefits

Source: BHP Billiton estimates.

a) Assumed ore inputs for example of 40% domestic ore (25% Mn), 20% imported ore (44% Mn) and 40% rich slag (33% Mn)

Low grade ore performance in alloy
production is substantially inferior

Using low grade ores:

Increases input costs

Produces a greater amount of
slag output

Decreases volume of saleable
product

Decreases quality of final
product

High grade ore therefore has a
higher value in use

manganese cost curve

(Index, FOB 2008)

Samancor

Metalloids
TEMCO
Units of Supply

Alloy is a global commodity with essentially
homogenous products

Pricing is driven by marginal producer

Cost curve has steepened in recent years

Ore and alloy integration adds value:

Markets can be accessed using an
optimal mix of products

Deep understanding of ore
performance in smelters adds to ore
market offering

Ore and alloy output can be optimised
to best suit market conditions

Alloy plants significant profit
contributors in their own right

Slide 85
Marius Kloppers, Chief Executive Officer
24 June 2008
Concluding Remarks

Slide 86

BHP Billiton's businesses are leaders in their own right

BHP Billiton is the only mining company with a top three marketing position in all three steel raw material groups

Australian based operations have a significant location advantage with close proximity to Asian growth market

Expected mineralisation base will support metallurgical coal and iron ore production lives of >50 years

We are aggressively expanding production capacity

Slide 90

Consistent with our core strategy

Tier 1 assets that are large, low-cost,
expandable and consistently profitable

Upstream focus and export-oriented

commodities

A deep inventory of growth options

Portfolio diversified by commodity,
geography and customer

Overriding commitment to ethics,
safety, environment and community
engagement

Employer of choice and a preferred
partner
