x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended June 30, 2009

or

¨ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from _______ to _______

Commission file number 0-28030

i2 Technologies, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware	**75-2294945**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**
11701 Luna Road Dallas, Texas	**75234**
(Address of principal executive offices)	**(Zip code)**

(469) 357-1000

(Registrant s telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No ¨

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ¨ No ¨ (not applicable to registrant)

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (check one):

Large accelerated filer	¨	Accelerated filer	x
Non-accelerated filer	¨ (Do not check if a smaller reporting company)	Smaller reporting company	¨

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ¨ No x

As of August 3, 2009, the Registrant had 22,426,471 shares of $0.00025 par value Common Stock outstanding.

i2 TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Table dollars in thousands, except per share data)

(Unaudited)

1. Summary of Significant Accounting Policies

Nature of Operations. We operate our business in one segment, supply chain management solutions, that are designed to help enterprises optimize business processes both internally and among trading partners. We are a provider of supply chain management solutions, consisting of various software and service offerings. Our service offerings include business optimization and licensed technical consulting, managed services, training, solution maintenance, software upgrades and development. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The business goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, and improving operational visibility. Our offerings are designed to help customers better achieve the following critical business objectives:

Visibility a clear and unobstructed view up and down the supply chain

Planning supply chain optimization to match supply and demand while considering system-wide constraints

Collaboration interoperability with supply chain partners and elimination of functional silos

Control management of data and business processes across the extended supply chain

Basis of Presentation. Our unaudited condensed consolidated financial statements have been prepared by management and reflect all adjustments (all of which are normal and recurring in nature) that, in the opinion of management, are necessary for a fair presentation of the interim periods presented. The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for any subsequent quarter or for the entire year ending December 31, 2009. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted under the Securities and Exchange Commission s (SEC) rules and regulations. These unaudited condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and notes thereto, together with management s discussion and analysis of financial condition and results of operations, presented in our Annual Report on Form 10-K for the year ended December 31, 2008 filed on March 12, 2009 with the SEC (2008 Annual Report on Form 10-K).

Recent Accounting Pronouncements. In May 2008, the FASB issued FASB staff position (FSP) APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement) (FSP APB 14-1). FSP APB 14-1 requires that the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) be separately accounted for in a manner that reflects an issuer s nonconvertible debt borrowing rate. FSP APB 14-1 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years and shall be applied retrospectively to all periods presented. Early adoption of FSP APB 14-1 was not permitted.

Our 5% Senior Convertible Notes (Notes) were within the scope of FSP APB 14-1. In the accompanying condensed financial statements, we reported the debt component of the Notes at fair value as of the date of issuance and amortized the discount as an increase to interest expense over the expected life of the debt. The implementation of this standard resulted in a decrease to net income and earnings per share for all prior periods presented; however, there is no effect on our cash interest payments. The incremental non-cash expense associated with adoption for the three months ended June 30, 2008 was $0.5 million and was zero for the three months ended June 30, 2009 due to the repurchase of the Notes. The incremental non-cash expense associated with adoption for the six months ended June 30, 2009 and 2008 was $0.3 and $1.0 million, respectively, see *Note 10, Restatement of Financial Statements.*

In March 2008, FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an Amendment of FASB Statement No. 133* (SFAS 161). SFAS 161 applies to all derivative instruments within the scope of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133). It also applies to non-derivative hedging instruments and all hedged items designated and qualifying as hedges under SFAS 133. SFAS 161 is effective prospectively for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this statement in the first quarter of 2009 did not have a material impact on the Company s financial statements, see *Note 7, Commitments and Contingencies.*

Table of Contents

In January 2009, the FASB issued Staff Position (FSP) EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities (FSP EITF 03-6-1). Under FSP EITF 03-6-1, unvested share-based payment awards which receive non-forfeitable dividend rights, or dividend equivalents, are considered participating securities and are required to be included in computing EPS under the two-class method. The adoption of this provision in the six months ended 2009 had no effect on the Company s financial statements.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments (FSP FAS 107-1 and APB 28-1), which requires public entities to disclose in their interim financial statements the fair value of all financial instruments within the scope of FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments (SFAS 107), as well as the method(s) and significant assumptions used to estimate the fair value of those financial instruments. The Company has adopted the provisions of FSP FAS 107-1 and APB 28-1. The adoption of FSP FAS 107-1 and APB 28-1 had no impact on the Company s financial position or results of operations.

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events* (SFAS No. 165). SFAS No. 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date, but before financial statements are issued or are available to be issued. SFAS No. 165 requires disclosure of the date through which an entity has evaluated subsequent events and the basis for that date. Accordingly, the Company adopted SFAS No. 165 as of June 30, 2009 and evaluated its financial statements for subsequent events through August 7, 2009, the filing date of our financial statements. The Company is not aware of any such events, which would require recognition or disclosure in the financial statements.

From time to time, new accounting pronouncements applicable to the Company are issued by the FASB or other standards setting bodies, which we will adopt as of the specified effective date. Unless otherwise discussed, we believe the impact of recently issued standards that are not yet effective will not have a material impact on our consolidated financial statements upon adoption.

2. Investment Securities

Short-term time deposits and other liquid investments in debt securities with original maturities of less than three months when acquired are reported as cash and cash equivalents on our condensed consolidated balance sheet. Based on their maturities, interest rate movements do not affect the balance sheet valuation of these investments.

Historically, we have invested our cash in a variety of interest-earning financial instruments, including bank time deposits, money market funds, taxable and tax-exempt variable-rate, fixed-rate obligations of corporations, federal, state and local government entities, and agencies. These investments are primarily denominated in U.S. Dollars.

Due to current economic volatility, we have elected to keep our cash balances in overnight funds comprised of a combination of Treasury and government agency money market mutual funds (MMMF). These MMMF have the stated goal of maintaining a net asset value of $1 per share and their interest rate resets daily to achieve this goal. These MMMF are considered Level 1 securities because they are actively traded and they are valued on our condensed consolidated balance sheets at quoted market prices. The balances held as MMMF reported as cash and cash equivalents were $167.1 million and $230.0 million as of June 30, 2009 and December 31, 2008, respectively. The balances held as time deposits reported as cash and cash equivalents were $1.6 million and $1.8 million as of June 30, 2009 and December 31, 2008, respectively.

3. Borrowings and Debt Issuance Costs

The following table summarizes the outstanding debt and related capitalized debt issuance costs recorded on our condensed consolidated balance sheet at June 30, 2009 and December 31, 2008.

	June 30, 2009	December 31, 2008 (as restated, see Note 10)
Senior convertible notes, 5% annual rate payable semi-annually, due November 15, 2015		86,250
Unamortized discount on 5% notes		(21,730)
Total debt	$	$ 64,520

Capitalized debt issuance costs, net	$	$ 1,322

We recorded capitalized debt issuance costs, net of accumulated amortization, in other non-current assets and were amortizing these costs over a five-year period, beginning in November 2005.

We were required to adopt FASB staff position (FSP) APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement) (FSP APB 14-1) on January 1, 2009. FSP APB 14-1 requires that the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) be separately accounted for in a manner that reflects an issuer s nonconvertible debt borrowing rate. Based on our analysis of comparable nonconvertible debt issuances by similar-sized technology companies at or near the time of our debt issuance, we determined our borrowing rate would have been 9.5% for nonconvertible debt versus the stated 5% coupon rate of the Notes.

Upon adoption, we allocated the original debt proceeds between debt and the debt s conversion feature based on the fair value of the liability component at issuance. This results in the debt being recorded at a discount to its face value. This discount is amortized as additional interest expense using the effective interest method over the 10-year life of the debt, which is the estimated life of a similar debt instrument without a related equity conversion feature. The effect on our financial statements is to record additional non-cash interest expense in each historical period in which our Notes were outstanding. We also were required to reallocate our capitalized debt issuance costs between cost of debt and cost of equity based on the relative values of the debt and the conversion feature. The result of this change is to reduce the original balance of capitalized debt issuance costs, as well as to reduce the amortization of such costs in each historical period in which our Notes were outstanding. The accompanying condensed consolidated financial statements have been restated to reflect the net increase to non-cash expense and balance sheet reclassifications. See *Note 10, Restatement of Financial Statements*, for the effect of FSP APB 14-1 on the historical financial statements included herein.

As of June 30, 2009, all Notes have been repurchased, the majority of which occurred in the first quarter of 2009. The total cash paid for the debt repurchase of $84.8 million was allocated, based on the fair values of the liability component as required by FSP APB 14-1, $64.5 million to the repurchased debt and $20.3 million to the conversion feature included in equity.

In connection with the issuance of our 5% senior convertible notes, we issued 484,449 warrants to purchase our common stock. We assessed the characteristics of the warrants and determined that they should be included in additional paid in capital in the stockholders equity portion of our condensed consolidated balance sheet, valued using a Black-Scholes model. The effect of recording the warrants as equity was that the 5% senior convertible notes were recorded at an original discount to their face value. The discount recorded was originally $3.1 million, and this discount was being accreted through earnings over five years. We determined a five-year life to be appropriate due to the conversion features of the 5% senior convertible notes and our assessment of the probability that the debt would be converted prior to the scheduled maturity. All of the warrants remain outstanding as of June 30, 2009.

4. Restructuring Charges and Adjustments

Restructuring Plans. In prior periods, we implemented restructuring plans, which included the elimination of personnel as well as other targeted cost reductions. See *Note 11, Restructuring Charges and Adjustments*, in our Notes to Consolidated Financial Statements in our 2008 Annual Report on Form 10-K for a description of our previous restructuring plans. In the first quarter of 2009, we eliminated approximately 80 positions, resulting in severance costs of $3.0 million.

Table of Contents

The following table summarizes the changes to our restructuring accruals, as well as the components of the remaining restructuring accruals at June 30, 2009 and June 30, 2008.

	Employee Severance and Termination	
	2009	2008
January 1,	$ 6	$ 283
Restructuring charges	3,006	
Cash payments	(1,776)	(108)
Remaining accrual balance at March 31,	$ 1,236	$ 175
Adjustments to restructuring plans	(11)	
Cash payments	(1,101)	(46)
Remaining accrual balance at June 30,	$ 124	$ 129

5. Net Income Per Common Share

Net Income Per Common Share. Basic net income per common share was computed by dividing net income applicable to common stockholders by the weighted average number of common shares outstanding for the reporting period following the two-class method. Our Series B Convertible Preferred Stock is a participating security because in the event dividends are declared on our common stock it participates in those dividends on a 1:1 ratio on an as converted basis. Under the two-class method, participating convertible securities are required to be included in the calculation of basic net income per common share when the effect is dilutive. Accordingly, for the periods presented, the effect of the convertible preferred stock is included in the calculation of basic net income per common share.

Diluted net income per common share includes the dilutive effect of stock options, share rights awards, and warrants granted using the treasury stock method, and the effect of contingently issuable shares earned during the period and shares issuable under the conversion feature of our convertible debt and convertible preferred stock using the if-converted method. A loss causes all common stock equivalents to be anti-dilutive due to an increase of the weighted average shares from the potential dilution that could occur if securities or other contracts were exercised or converted into common stock. EITF 04-8 requires the inclusion of the effect of contingently convertible instruments in the calculation of diluted income per share including when the market price of our common stock is below the conversion price of the convertible security and the effect is not anti-dilutive. Accordingly, the effect of our convertible debt is included in the calculation of diluted earnings per share. The effect of our convertible preferred stock is included in basic earnings per share under the two-class method per EITF 03-6, *Participating Securities and the Two-Class Method* under FASB No. 128 *Earnings per Share*; therefore, it is similarly included in diluted income per share when the effect is dilutive.

The following is a reconciliation of the number of shares used in the calculation of basic income per share under the two-class method and diluted earnings per share and the number of anti-dilutive shares excluded from such computations for the three and six months ended June 30, 2009 and June 30, 2008.

Table of Contents

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Common and common equivalent shares outstanding using two-class method - basic:				
Weighted average common shares outstanding	22,012	21,500	21,972	21,475
Unissued vested RSUs to be included in basic	80		80	
Participating convertible preferred stock	4,722	4,605	4,722	4,605
Total common and common equivalent shares outstanding using two-class method - basic	26,814	26,105	26,774	26,080
Effect of dilutive securities:				
Outstanding stock option and share right awards	352	370	112	379
Weighted average common and common equivalent shares outstanding - diluted	27,166	26,475	26,886	26,459
Anti-dilutive shares excluded from calculation:				
Outstanding stock option and share right awards	2,897	3,723	3,334	3,612
Total anti-dilutive shares excluded from calculation	2,897	3,723	3,334	3,612

6. Segment Information, International Operations and Customer Concentrations

We operate our business in one segment, supply chain management solutions, that are designed to help enterprises optimize business processes both internally and among trading partners. SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information,* establishes standards for the reporting of information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, who is our Chief Executive Officer (CEO), in deciding how to allocate resources and in assessing performance.

We market our software and services primarily through our worldwide sales organization augmented by other service providers, including both domestic and international systems consulting and integration firms and other industry-related partners. Our CEO evaluates resource allocation decisions and our performance based on financial information, presented on a consolidated basis, accompanied by disaggregated information by geographic regions. Sales to our customers generally include products from some or all of our product suites. We have not consistently allocated revenues from such sales to individual products for internal or general-purpose financial statements.

Revenues are attributable to regions based on the locations of the customers operations. Total revenues by geographic region, as reported to our CEO, were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
United States	$ 28,566	$ 36,058	$ 58,180	$ 74,425
International revenue:				
Non-US Americas	1,522	1,297	3,405	2,276
Europe, Middle East and Africa	11,488	15,294	22,339	27,867
Greater Asia Pacific	15,479	12,079	29,507	22,736
Total international revenue	28,489	28,670	55,251	52,879
Total Revenue	$ 57,055	$ 64,728	$ 113,431	$ 127,304
International revenue as a percent of total revenue	50%	44%	49%	42%

Table of Contents

No individual customer accounted for more than 10% of our total revenues during the periods presented.

Long-lived assets by geographic region excluding deferred taxes, as reported to our CEO, were as follows:

	June 30, 2009	December 31, 2008 (as restated, see Note 10)
United States	$ 19,251	$ 21,344
Europe, Middle East and Africa	125	137
Greater Asia Pacific	4,870	5,140
Total Long-lived Assets	$ 24,246	$ 26,621

7. Commitments and Contingencies

Derivative Action

On October 23, 2007, a purported shareholder derivative lawsuit was filed in the Delaware Chancery Court against certain of our current and former officers and directors, naming the company as a nominal defendant. The complaint, originally *entitled John McPadden, Sr. v. Sanjiv S. Sidhu, Stephen Bradley, Harvey B. Cash, Richard L. Clemmer, Michael E. McGrath, Lloyd G. Waterhouse, Jackson L. Wilson, Jr., Robert L. Crandall and Anthony Dubreville and i2 Technologies, Inc.,* alleges breach of fiduciary duty and unjust enrichment based upon allegations that the company sold its wholly-owned subsidiary, Trade Services Corporation, for an inadequate price in 2005. Since the filing of the complaint, Eugene Singer has been substituted for John McPadden as plaintiff. The defendants moved to dismiss the complaint on December 28, 2007. On August 29, 2008, the court granted the motion to dismiss as to all defendants but Mr. Dubreville (one of our former officers). The complaint, derivative in nature, does not seek relief from the company, but does seek damages and other relief from the sole remaining defendant, Mr. Dubreville. On June 23, 2009, a related derivative action was filed in the Superior Court for the State of California, County of San Diego, styled *Eugene Singer v. Sunrise Ventures, LLC; James A. Simpson; Trade Service Holdings LLC; Trade Service Holdings, Inc.; Steven Borgardt; and Does 1-50*; *and i2 Technologies, Inc* as a nominal defendant. This action purports to arise out of the same set of facts as the aforementioned *Singer v. Dubreville* action pending in Delaware, and asserts a claim for aiding and abetting breach of fiduciary duty. The complaint, derivative in nature, does not seek relief from the company, but does seek damages and other relief from the named defendants.

Shareholder Class Action Lawsuits

On August 11, 2008, two suits were filed in state district court in Texas against (among others) the Company and certain members of its Board of Directors. Each of the two suits sought injunctive relief prohibiting the closing of the sale of the Company s common stock to an affiliate of JDA Software Group, Inc. (JDA), and each of the named plaintiffs purported to represent a class of holders of the Company s common stock. One of the two suits was thereafter dismissed by the plaintiff; the other, styled *John D. Norsworthy, on Behalf of Himself and All Others Similarly Situated, v. i2 Technologies, Inc., et al.*, remained pending in the 134th District Court of Dallas County, Texas. On November 5, 2008, the District Court held a hearing on Plaintiff Norsworthy s motion for a temporary restraining order, and at the conclusion of the hearing denied the motion in its entirety. On May 29, 2009, Mr. Norsworthy non-suited this action as to all defendants.

Table of Contents

Oracle Litigation

On April 29, 2009, the Company filed a lawsuit for patent infringement against Oracle Corporation (NASDAQ: ORCL). The lawsuit, filed in the United States District Court for the Eastern District of Texas, alleges infringement of 11 patents related to supply chain management, available to promise software and other enterprise software applications. We incurred expenses related to this matter of $0.2 million for the three and six months ended June 30, 2009.

Indemnification Agreements

We have indemnification agreements with certain of our officers, directors and employees that may require us, among other things, to indemnify such officers, directors and employees against certain liabilities that may arise by reason of their status or service as directors, officers or employees and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. We have also entered into agreements regarding the advancement of costs with certain other officers and employees.

We may continue to advance fees and expenses incurred by certain current and former directors, officers and employees in the future. The maximum potential amount of future payments we could be required to make under these indemnification and cost-advancement agreements is unlimited. Additionally, our corporate by-laws allow us to choose to indemnify any employee for certain events or occurrences while the employee is, or was, serving at our request in such capacity. We incurred $0.2 million of expenses during the three and six months ended June 30, 2009.

Under the terms of our software license agreements with our customers, we agree that in the event the licensed software infringes upon any patent, copyright, trademark, or any other proprietary right of a third-party, we will indemnify our customer licensees against any loss, expense, or liability from any damages that may be awarded against our customer. We include this infringement indemnification in substantially all of our software license agreements and selected managed service arrangements. In the event the customer cannot use the software or service due to infringement and we cannot obtain the right to use, replace or modify the software or service in a commercially feasible manner so that it no longer infringes, then we may terminate the license and provide the customer a pro-rata refund of the fees paid by the customer for the infringing software or service. We believe the estimated fair value of these intellectual property indemnification clauses is minimal.

India Tax Assessments

We currently are under income tax examinations in India primarily related to our intercompany pricing for services rendered by our Indian subsidiary to other i2 companies, the taxability of certain payments received from our Indian customers, and our statutory qualification for a tax holiday. The tax authorities have assessed an aggregate of approximately $8.1 million for the Indian statutory fiscal years ended March 31, 2002 through March 31, 2005.

We believe the Indian tax authorities positions regarding these matters to be without merit, that all intercompany transactions were conducted at arm s length pricing levels, all payments received from our Indian customers have been properly treated for tax purposes, and that our operations qualify for the tax holiday claimed. Accordingly, we appealed all of these assessments and sought assistance from the United States competent authority under the mutual agreement procedure of the income tax treaty between the United States and the Republic of India. This provides us with an opportunity to resolve these matters in a forum that includes governmental representatives of both countries.

Pending resolution of these matters, we have paid approximately $3.0 million of the assessed amount and have arranged for $4.2 million in bank guarantees in favor of the Indian government in respect of a portion of the balance as required. The bank guarantees are supported by letters of credit issued in the United States. Cash that is collateralizing these letters of credit is reflected on our condensed consolidated balance sheet as restricted cash.

We expect subsequent tax years to be examined, assessments made similar to those discussed above, and no assurances can be given that these issues ultimately will be resolved in our favor. We continue to monitor and assess these issues as they progress through the relevant processes and believe that the ultimate resolution of these matters will not exceed the tax contingency reserves we have established for them.

Table of Contents

Derivative Financial Instruments

On January 1, 2009, we adopted FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement 133*. The adoption of Statement 161 had no financial impact on our consolidated financial statements and only required additional financial statement disclosures. We have applied the requirements of Statement 161 on a prospective basis. Accordingly, disclosures related to interim periods prior to the date of adoption have not been presented.

The Company utilizes a foreign currency risk mitigation program that uses foreign currency forward exchange contracts (Contracts) to economically reduce exposure to various amounts denominated in nonfunctional currencies. These foreign currency exposures typically arise from intercompany transactions, cash balances and accounts receivable held in non-functional currencies. The objective of this program is to reduce the effect of changes in foreign currency exchange rates on our results of operations. Although the Company does not designate these Contracts as hedges for accounting purposes, the objective of the program is to offset foreign currency transaction gains and losses recorded for accounting purposes with gains and losses realized on the Contracts.

Our Contracts generally settle within 30 days, maturing at month end. We do not use these forward contracts for trading purposes. We do not designate these forward contracts as hedging instruments pursuant to Statement 133. Accordingly, we record the fair value of these contracts as of the end of our reporting period to our consolidated balance sheet with changes in fair value recorded in our consolidated statement of operations. The balance sheet classification for the fair values of these forward contracts is to other current assets for unrealized gains and to accrued liabilities for unrealized losses. The statement of operations classification for the fair values of these forward contracts is to other income (expense), net, for both realized and unrealized gains and losses.

The tables below summarize the Company s outstanding forward contracts held in USD functional currency.

	June 30, 2009		December 31, 2008	
	Notional	Estimated Fair Value*	Notional	Estimated Fair Value*
Commitments to purchase foreign currency	$ 35,118	$	$ 41,399	$
Commitments to sell foreign currency	76		1,133	
Total	$ 35,194	$	$ 42,532	$

		Amount of Gain (Loss) Recognized in Income			
		Three Months Ended June 30,		Six Months Ended June 30,	
Derivatives Not Designated as Hedging Instruments	Location	2009	2008	2009	2008
Foreign Currency Forward Contracts	Other Income(Expense)	2,338	$ (1,468)	$ 467	$ (1,657)

* *Estimated fair value is zero due to contracts maturing at end of month.*

Certain Accruals

We have accrued for estimated losses in the accompanying condensed consolidated financial statements for matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable.

We are subject to various claims and legal proceedings that arise in the ordinary course of our business from time to time, including claims and legal proceedings that have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. The adverse resolution of any one or more of those matters or the matters described above, over and above the amount, if any, that has been estimated and accrued in our condensed consolidated financial statements could have a material adverse effect on our business, financial condition, results of operations and/or cash flows.

14

Table of Contents

8. Stock-Based Compensation Plans.

For a description of our stock-based compensation plans, see *Note 10, Stock-Based Compensation*, in our Notes to Consolidated Financial Statements filed in our 2008 Annual Report on Form 10-K.

Stock-based compensation expense for the three and six months ended June 30, 2009 and June 30, 2008 is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Services	$ 201	$ 432	$ 381	$ 1,043
Maintenance	49	61	95	130
Sales and marketing	549	760	1,348	1,386
Research and development	477	627	935	1,382
General and administrative	1,191	1,090	2,286	1,931
Total	$ 2,467	$ 2,970	$ 5,045	$ 5,872

Included in stock-based compensation expense was restricted stock expense of $1.3 million and $1.0 million for the three-month periods ended June 30, 2009 and June 30, 2008, respectively, and $2.2 million and $1.9 million for the six-month periods ended June 30, 2009 and June 30, 2008, respectively.

In February 2007, we granted Restricted Stock Units (RSUs) to certain key employees that contain vesting provisions based on specified performance over a two-year performance period. This performance period is from January 1, 2008 to December 31, 2009. The grant vested 33% on February 19, 2009 based on the increase of our Generally Accepted Accounting Principles (GAAP) EPS of more than 40% over the 2-year period from the close of calendar year 2006 to the close of calendar year 2008. The remaining 67% of the performance RSU grant shares are scheduled to vest on February 19, 2010, subject to the Company s EPS as of the close of the 2009 calendar year increasing by 60% or more over the 2006 calendar year GAAP EPS. This would require achieving GAAP EPS of more than $1.20 in 2009.

We are required to assess whether the performance criteria are probable of being achieved, and only recognize compensation expense if the vesting is considered probable. On a quarterly basis, we assess whether vesting is probable and based on that assessment record the appropriate expense, if any. Based on our current assessment of 2009 GAAP EPS vesting is not probable; therefore, the Company has not recorded compensation expense for the remaining unvested portion of this award in its 2008 or 2009 annual financial statements.

In February 2009, we granted RSUs to two key executives that contain vesting provisions based on achieving specified performance criteria. The RSUs vest upon completion of the defined objectives as determined by the Board s Compensation Committee in its sole discretion on or before December 31, 2010. In April 2009, we granted RSUs to additional key employees that contain vesting provisions based on achieving specified performance criteria. The RSUs vest upon completion of the defined objectives for each year as determined by the Board s Compensation Committee in its sole discretion as to one-third of the shares per year on or before December 31, 2009, 2010 and 2011. Based on our assessment that vesting of the awards is probable as of June 30, 2009, we recognized compensation expense in the six-month period ended June 30, 2009 for the performance based 2009 RSUs based on the time period such awards were outstanding.

Table of Contents

Fair values of stock options are estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	Stock Options Three Months Ended June 30,		Stock Options Six Months Ended June 30,	
	2009	2008	2009	2008
Expected term (years)	4	4	4	4
Volatility factor	65%	66%	65%	67%
Risk-free interest rate	1.97%	2.95%	1.97%	2.74%
Dividend yield	0%	0%	0%	0%

9. Income Taxes

Income taxes are provided using the liability method in accordance with SFAS No. 109, *Accounting for Income Taxes* (SFAS 109). In accordance with Accounting Principles Board Opinion No. 28, *Interim Financial Reporting* (APB 28), and FASB Interpretation No. 18, *Accounting for Income Taxes in Interim Periods an interpretation of APB Opinion No. 28* (FIN 18), the provision for income taxes reflects the Company s estimate of the effective rate expected to be applicable for the full fiscal year, adjusted by any discrete events which are reported in the period in which they occur. This estimate is re-evaluated each quarter based on our estimated tax expense for the year.

We recognized income tax expense of approximately $2.3 million and $2.7 million for the three months ended June 30, 2009 and 2008, respectively, representing effective income tax rates of 18.1% and 3.2%, for the corresponding periods. We recognized income tax expense of approximately $3.0 million and $3.8 million for the six months ended June 30, 2009 and 2008, respectively, representing effective income tax rates of 18.3% and 4.3% for the corresponding periods. Various factors affect our effective income tax rate including, among others, changes in our valuation allowance, the effect of foreign operations, state income taxes (net of federal income tax benefits), non-deductible meals and entertainment expenses, research and development tax credits, and the effect of foreign withholding taxes. Our effective income tax rates during the three months and six months ended June 30, 2009 and June 30, 2008 differ from the U.S. statutory rate primarily due to the effect these items have on our valuation allowance.

Income tax expense included the effect of foreign withholding taxes of $0.3 million for the three months ended June 30, 2009 and $0.6 million for the three months ended June 30, 2008 and $0.6 million for the six months ended June 30, 2009 and $1.1 million for the three months ended June 30, 2008. Foreign withholding taxes are incurred on certain payments from international customers and are recorded upon receipt of such payments that are received net of the withheld taxes. Foreign withholding taxes generally are available to reduce domestic income tax. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these withholding taxes increase our income tax expense.

During the six months ended June 30, 2008, we recorded a benefit to operating expense of approximately $83.3 million related to the settlement of the SAP patent litigation. We utilized net operating loss carryforwards and other tax attributes to reduce taxes on the settlement. We recorded federal and state alternative minimum tax (AMT) of approximately $1.1 million and $0.1 million, respectively, and other state income taxes of approximately $0.2 million in income tax expense during the three months and six months ended June 30, 2008 related to the settlement. Alternative minimum tax generally is available to reduce regular income tax in the future. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these AMT amounts increase our income tax expense.

Estimated potential interest and penalties related to our unrecognized tax benefits within our global organization are recorded in income tax expense and totaled approximately $0.2 million for the three months ended June 30, 2009 and resulted in a benefit of approximately $0.1 million for the six months ended June 30, 2009. Accrued interest and penalties were approximately $2.1 million at June 30, 2009. Management believes recording interest and penalties related to income tax uncertainties as income tax expense better reflects income tax expense and provides better information reporting.

Table of Contents

We or one of our subsidiaries file income tax returns in the United States (U.S.) federal jurisdiction and various state and foreign jurisdictions. We have open tax years for the U.S. federal return back to 1993 with respect to our net operating loss (NOL) carryforwards, where the IRS may not raise tax for these years, but can reduce NOLs. Otherwise, with few exceptions, we are no longer subject to federal, state, local or foreign income tax examinations for years prior to 2004.

We are subject to potential change by various tax jurisdictions in the inter-company pricing at which we have conducted business within our global related group of companies. Additional tax examinations may be opened or existing examinations may be resolved within the next 12 months. We closely monitor developments in this area and make changes as necessary in the accruals we have made for what we believe will be the ultimate outcome of any tax adjustments. It is not possible to reasonably estimate a range of potential increases or decreases of such changes.

As part of the process of preparing unaudited condensed consolidated financial statements, we are required to estimate our full-year income and the related income tax expense in each jurisdiction in which we operate. Changes in the geographical mix or estimated level of annual pre-tax income can affect our effective tax rate. This process involves estimating our current tax liabilities in each jurisdiction in which we operate, including the impact, if any, of additional taxes resulting from tax examinations, as well as making judgments regarding the recoverability of deferred tax assets. To the extent recovery of deferred tax assets is not likely based on, among other things, our estimation of future taxable income in each jurisdiction, a valuation allowance is established. Tax controversies often involve complex issues across multiple jurisdictions and may require an extended period to resolve.

10. Restatement of Financial Statements

As discussed in *Note 3, Borrowings and Debt Issuance Costs*, we adopted FSP APB 14-1 in the six months ended June 30, 2009. The accompanying condensed consolidated financial statements have been restated to reflect the resulting increase to non-cash expense and balance sheet reclassifications.

Following is a summary of the effects of the restatement described above (in thousands, except per share data).

Condensed Consolidated Balance Sheet

	As of December 31, 2008		
	As Previously Reported	**Adjustment**	**As Restated**
Other non-current assets	5,775	(751)	5,024

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical or current facts, including, without limitation, statements about our business strategy, plans, objectives and future prospects, are forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from these expectations, which could have a material adverse effect on our business, results of operations, cash flow and financial condition. Such risks and uncertainties include, without limitation, the following:

Beginning in the third quarter of 2008 and continuing through and beyond our second quarter of 2009, we have experienced purchasing delays and a reduction in maintenance services by some customers and prospects attributable to the current economic environment, uncertainties caused by the termination of our planned merger in the fourth quarter of 2008 and continued speculation about our future strategic direction. The current economic downturn may result in customers and prospects reducing their capital and maintenance expenditures, filing for bankruptcy protection or ceasing operations, which would negatively affect our bookings, revenue and cash flows.

We have implemented and continue to evaluate restructuring and reorganization initiatives, including a reduction in our workforce in the first quarter of 2009 and reorganization of our sales force. Failure to achieve the desired results of our restructuring and reorganization initiatives could harm our business, results of operations, cash flow and financial condition.

18

Table of Contents

Our financial results have varied and may continue to vary significantly from quarter-to-quarter. We may fail to meet analysts and investors expectations.

We experienced historical volatility in our quarterly cash flows. A failure to maintain profitability and achieve consistent positive cash flows would have a significant adverse effect on our business, impair our ability to support our operations and adversely affect our liquidity.

We may require additional private or public debt or equity financing. Such financing may only be available on disadvantageous terms, or may not be available at all. Any new financing could have a substantial dilutive effect on our existing stockholders.

If we are unable to develop and generate additional demand for our products or develop new products, serious harm could result to our business.

We may not be competitive, and increased competition could seriously harm our business.

We face risks related to product quality and performance claims and other litigation that could have a material adverse effect on our relationships with customers and our business, results of operations, cash flow and financial condition. We may face other claims and litigation in the future that could harm our business and impair our liquidity.

Loss of key personnel or our failure to attract, train, and retain certain additional personnel could negatively affect our operating results and revenues and seriously harm our company.

We face other risks indicated in Item 1A, Risk Factors, in the 2008 Annual Report on Form 10-K.

Many of these risks and uncertainties are beyond our control and, in many cases, we cannot accurately predict the risks and uncertainties that could cause our actual results to differ materially from those indicated by the forward-looking statements. When used in this document, the words believes, plans, expects, anticipates, intends, continue, may, will, should or the negative of such terms and similar express relate to us, our customers or our management are intended to identify forward-looking statements.

References in this report to the terms optimal and optimization and words to that effect are not intended to connote the mathematically optimal solution, but may connote near-optimal solutions, which reflect practical considerations such as customer requirements as to response time, precision of the results and other commercial factors.

Overview

Nature of Operations

We operate our business in one segment, supply chain management solutions, that are designed to help enterprises optimize business processes both internally and among trading partners. We are a provider of supply chain management solutions, consisting of various software and service offerings. Our service offerings include business optimization and licensed technical consulting, managed services, training, solution maintenance, software upgrades and development. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The business goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, and improving operational visibility. Our offerings are designed to help customers better achieve the following critical business objectives:

Visibility a clear and unobstructed view up and down the supply chain

Planning supply chain optimization to match supply and demand while considering system-wide constraints

Collaboration interoperability with supply chain partners and elimination of functional silos

Control management of data and business processes across the extended supply chain

Revenue Categories

We recognize revenue for software and our related service offerings in accordance with *Statement of Position (SOP) 81-1, Accounting for Certain Construction Type and Certain Production Type Contracts, SOP 97-2, Software*

Table of Contents

Revenue Recognition, *as modified by SOP 98-9,* *Modification of SOP 97-2, Software Revenue Recognition with Respect to Certain Transactions,* *SEC Staff Accounting Bulletin (SAB) 104,* *Revenue Recognition,* and *SAB 103,* *Update of Codification of Staff Accounting Bulletins,* and *SEC Staff Accounting Bulletin* *Topic 13, Revenue Recognition.*

Software Solutions. Software solutions revenue includes core and recurring license revenue, and revenue to develop the licensed functionality. We recognize these revenues under SOP 97-2 or SOP 81-1 based on our evaluation of whether the associated services are essential to the licensed software as described within SOP 97-2. If the services are considered essential, revenue is generally recognized on a percentage of completion basis under SOP 81-1. Services are considered essential to the software when they involve significant modifications or additions to the software features and functionality. In addition, we have several subscription and other recurring revenue transactions, which are recognized ratably over the life of each contract.

Services. Services revenue is primarily derived from fees for services that are not essential to the software, including implementation, integration, training, consulting, hosting, and managed services, and is generally recognized when services are performed. In addition, services revenue may include fees received from arrangements to customize or enhance previously purchased licensed software, when such services are not essential to the previously licensed software. Services revenue also includes reimbursable expense revenue, with the related costs of reimbursable expenses included in cost of services.

Maintenance. Maintenance revenue consists of fees generated by providing support services, such as telephone support, and unspecified upgrades/enhancements on a when-and-if available basis. A customer typically prepays maintenance and support fees for an initial period, and the related revenue is deferred and generally recognized over the term of such initial period. Maintenance is renewable by the customer on an annual basis thereafter. Rates for maintenance, including subsequent renewal rates, are typically established based upon a specified percentage of net license fees as set forth in the contract.

Key Performance Indicators and Operating Metrics

The markets in which we operate are highly competitive. Our competitors are diverse and offer a variety of solutions targeting various segments of the extended supply chain as well as the enterprise as a whole. Some competitors offer suites of applications, while most offer solutions designed to target specific processes or industries. We believe our principal competitors continue to strengthen, in part based on consolidation within the industry. In addition, our shift to a more solutions-oriented approach, where services are more critical, increases our exposure to competition from offshore providers and consulting companies. All of these factors are creating pricing pressure for our software and service offerings. However, we believe our focus on a solutions-oriented approach that leverages our deep supply chain expertise differentiates us from our competitors.

In managing our business and reviewing our results, management focuses most intently on our revenue generation process, including bookings, backlog, revenue, cash flow from operations and liquidity.

Bookings. We define bookings as the total value of non-contingent fees payable to the company pursuant to the terms of duly executed contracts. Bookings are expected to result in revenue as products are delivered or services are performed, and may reflect contracts from which revenue will be recognized over multi-year periods, however there can be no assurance that bookings will result in future revenue. Bookings do not include amounts subject to contingencies, such as optional renewal periods, amounts subject to a customer s internal approvals, amounts subject to customer specific cancellation provisions and amounts that are refundable for reasons outside of our standard warranty provisions. Based on the nature of the transactions, certain of our subscription bookings have termination provisions upon payment of a penalty. Because our revenues are recognized under several different accounting standards and thus are subject to period-to-period variability, we closely monitor our bookings as a leading indicator of future revenues and the overall performance of our business.

Total bookings for the three months ended June 30, 2009 and June 30, 2008 were $61.6 million and $64.1 million, respectively, a decrease of 4% or $2.5 million. Included in total bookings are $23.5 million and $4.2 million of multi-year contracts, respectively. Total bookings for the six months ended June 30, 2009 and June 30, 2008 were $128.1

Table of Contents

million and $130.5 million, respectively, a decline of approximately 2% or $2.4 million. This includes $32.1 million and $7.7 million of multi-year contracts, respectively. The multi-year contracts in the three months ended June 30, 2009 include approximately $13.5 million in maintenance agreements and $10 million in software solutions, which is higher than in previous quarters. The average term of these multi-year agreements is slightly less than 3 years.

Backlog. Backlog represents the balance of bookings that has not been recognized as revenue. The amount of backlog for which we have received payment is recorded as deferred revenue on our condensed consolidated balance sheet. We review our backlog to assess future revenue that may be recognized from bookings in previous fiscal periods. This review allows us to determine whether we are recognizing more or less revenue compared to the bookings in that period and whether our backlog is increasing or decreasing.

	Three Months Ended		Twelve Months Ended	
	June 30, 2009	**March 31, 2009**	**December 31, 2008**	**December 31, 2007**
Additions to Backlog:				
Software Solutions Bookings	$ 14,815	$ 24,062	$ 29,812	$ 54,556
Platform Technology/Source Code Bookings				500
Net Additions to Backlog	14,815	24,062	29,812	55,056
Less: Software Solutions Revenue Recognized	15,269	10,203	46,852	47,721
Increase/(Decrease) in Backlog	$ (454)	$ 13,859	$ (17,040)	$ 7,335

Revenue. For the three months ended June 30, 2009, total revenue decreased by 12% or $7.7 million compared to the same period in 2008 and decreased by 11% or $13.9 million for the six months ended June 30, 2009 compared to the same period in 2008. The changes in each category of our revenue are described below.

Software solutions revenue increased 21% or $2.7 million for the three months ended June 30, 2009 compared to the same period in 2008, and increased 5% or $1.2 million for the six months ended June 30, 2009 compared to the same period in 2008 due to revenue recognized from our SOP 81-1 transactions. The increase primarily resulted from the significant software solutions bookings in the first quarter of 2009

Services revenue decreased 23% or $6.9 million for the three months ended June 30, 2009 when compared to the same period in 2008 and decreased 15% or $9.0 million for the six months ended June 30, 2009 when compared to the same period in 2008. The decrease was driven by a decline in demand for our services due to our customers economic constraints, resulting in a 20% and 14% reduction in billable hours, respectively. We adjusted our services capacity accordingly through cost reductions including decreasing our average headcount by 10% and 9%, respectively, as well as reducing our usage of third party contractors.

Maintenance revenue decreased 16% or $3.5 million for the three months ended June 30, 2009 when compared to the same period in 2008 and decreased 14% or $6.1 million for the six months ended June 30, 2009 when compared to the same period in 2008. This decrease was primarily due to the impact of lower renewal rates as well as cancellations of certain contracts by customers who previously had multiple maintenance agreements. In addition, a significant maintenance-paying customer decided not to renew maintenance in the second quarter of 2009, which resulted in a $1.0 million reduction in maintenance revenue for the three and six months ended June 30, 2009 when compared to the same period in 2008. This trend of lower renewal rates and customer losses may continue if our customers reduce their expenditures during the current economic downturn.

Operating Cash Flow and Liquidity. We closely monitor our operating cash flow, working capital and cash levels. In doing so, we attempt to limit our restricted cash and cash balances held by foreign subsidiaries.

Our operating cash flow for the six months ended June 30, 2009 was $22.3 million compared to operating cash flow of $20.4 million in the six months ended June 30, 2008 primarily due to our cost reductions as a result of our restructuring and reorganization efforts.

Table of Contents

Our working capital was $124.9 million at June 30, 2009, compared to the $106.5 million balance at March 31, 2009 and the $187.4 million at December 31, 2008. In the first quarter of 2009, we used $84.8 million to repurchase debt, see *Note 3, Borrowings and Debt Issuance Cost*.

The chart below shows the components of our working capital and the dollar changes from December 31, 2008 through the first and second quarters of 2009.

WORKING CAPITAL.

	June 30, 2009	March 31, 2009	December 31, 2008
Total cash	$ 181,532	$ 166,580	$ 243,790
Accounts receivable	20,989	22,980	25,846
Other current assets, net	7,203	7,418	9,477
Total current assets	209,724	196,978	279,113
Current liabilities	32,594	31,865	38,650
Deferred revenue	52,202	58,597	53,028
Total current liabilities	84,796	90,462	91,678
Working capital	$ 124,928	$ 106,516	$ 187,435
Net cash	$ 181,532	$ 166,579	$ 157,540

In addition to assessing our liquidity based on operating cash flow and working capital, management also considers our cash balances and our net cash balance, which we define as the sum of our total cash and cash equivalents and restricted cash minus the face value of our debt.

Application of Critical Accounting Policies and Accounting Estimates

There have been no changes during the second quarter of 2009 to the critical accounting policies or the areas that involve the use of significant judgments and estimates we described in our 2008 Annual Report on Form 10-K.

Analysis of Financial Results Three Months Ended June 30, 2009 Compared to Three Months Ended June 30, 2008.

Summary of Second Quarter 2009 Results

Total revenue decreased $7.7 million from the same period in 2008

Total costs and expenses increased $64.6 million from the same period in 2008. Total costs and expenses in the second quarter of 2008 included a benefit of $81.3 million, net of external patent litigation expenses, related to the company s intellectual property settlement.

Net income applicable to common stockholders was $9.8 million compared to $80.2 million in the same period in 2008. The second quarter of 2008 net income applicable to common stockholders amount includes $79.9 million, net of external patent litigation expenses and applicable taxes, from the intellectual property settlement.

Diluted earnings per share were $0.36 for the second quarter of 2009 and $3.03 for the second quarter of 2008

Cash flow from operations was $14.6 million versus cash flow from operations of $11.5 million in the 2008 period

Total bookings were $61.6 million versus $64.1 million in the same period in 2008. This includes $23.5 million and $4.2 million of multi-year contracts, respectively.

Table of Contents

Revenues

The following table sets forth revenues and the percentages of total revenues of selected items reflected in our condensed consolidated statements of operations and comprehensive income for the three months ended June 30, 2009 and June 30, 2008. The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended June 30, 2009	Percent of Revenue	Three Months Ended June 30, 2008	Percent of Revenue	Change 2009 versus 2008 Three months ended June 30 $ Change	% Change
SOP 97-2 recognition	$ 979	2%	$ 1,427	2%	$ (448)	-31%
SOP 81-1 recognition	9,689	17%	5,392	8%	4,297	80%
Recurring items	4,601	8%	5,750	9%	(1,149)	-20%

Services	23,598	41%	30,508	47%	(6,910)	-23%
Maintenance	18,188	32%	21,651	33%	(3,463)	-16%
Total revenues	$ 57,055	100%	$ 64,728	100%	$ (7,673)	-12%

Software Solutions Revenue. Total software solutions revenue increased 21% or $2.7 million for the three months ended June 30, 2009 compared to the same period in 2008. The components of the changes in software solutions revenue are explained below.

Revenue recognized under SOP 97-2 for the three months ended June 30, 2009 decreased 31% or $0.5 million compared to the same period in 2008. During the three months ended June 30, 2009 we recognized revenue related to 6 contracts at an average of $0.15 million per contract compared to 12 contracts at an average of $0.12 million in the same period of 2008.

Revenue recognized under SOP 81-1 increased 80% or $4.3 million for the three months ended June 30, 2009 when compared to the same period in 2008, primarily due to a significant increase in SOP 81-1 bookings in the first quarter of 2009. During the three months ended June 30, 2009, we recognized revenue related to 15 projects at an average of $0.64 million per project compared to 23 projects at an average of $0.23 million in the same period of 2008. Approximately $9.6 million of the software solutions revenue in the three months ended June 30, 2009, including revenue associated with essential services was from prior period bookings compared to $5.5 million recognized from prior period bookings for the same period in 2008. This amount was impacted by the significant software solutions bookings recorded in the first quarter of 2009.

Revenue from recurring items decreased by 20% or $1.1 million for the three months ended June 30, 2009 when compared to the same period in 2008. This decrease resulted primarily from a license arrangement that was required to be recognized ratably over the 12 months ended December 31, 2008 based on its terms. That arrangement is subject to a maintenance agreement in 2009.

Services Revenue. Services revenue decreased 23% or $6.9 million for the three months ended June 30, 2009 compared to the same period in 2008. The decrease was driven by a decline in demand for our services due to our customers economic constraints, resulting in a 20% reduction in billable hours. We adjusted our services capacity accordingly through cost reductions including decreasing our average headcount by 10% as well as reducing our usage of third party contractors.

Services revenue is dependent upon a number of factors, including:

- the number, value and rate per hour of services transactions booked during the current and preceding periods,
- the number and availability of service resources actively engaged on billable services projects,

the timing of milestone acceptance for engagements contractually requiring customer sign-off, and

the timing of cash payments when collectability is uncertain

Table of Contents

Maintenance Revenue. Maintenance revenue decreased by 16% or $3.5 million for the three months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily due to the impact of lower renewal rates as well as cancellations of certain contracts by customers who previously had multiple maintenance agreements. This trend of lower renewal rates and customer losses may continue if our customers reduce their expenditures during the current economic downturn. In addition, a significant maintenance-paying customer decided not to renew maintenance in the second quarter of 2009, which resulted in a $1.0 million reduction in maintenance revenue for the three months ended June 30, 2009 when compared to the same period in 2008.

Maintenance revenue varies from period-to-period based on several factors, including:

- initial maintenance from new software solutions bookings,
- the timing of negotiating and signing of maintenance renewals,
- completing a renewal several months into the annual maintenance period resulting in a one-time catch up for the period that maintenance services were performed prior to signature of the contract. A similar catch-up of revenue occurs due to the timing of cash receipts for cash basis customers when cash is not received until several months into the maintenance period,
- renewals that occur on less favorable terms than in the prior period, and
- customers that do not renew their maintenance agreements.

International Revenue. Our international revenues included in the categories discussed above are primarily generated from customers located in Europe, Asia, Latin America and Canada. International revenue totaled $28.5 million, or 50% of total revenue, in the three months ended June 30, 2009 compared to $28.7 million, or 44% of total revenue, in the same period in 2008.

Customer Concentration. During the periods presented, no individual customer accounted for more than 10% of total revenues.

Impact of Indian Rupee on Expenses

A large portion of our employee base is located in India, and as a result, a significant portion of our fixed expenses is denominated in the Indian Rupee (INR). Therefore, as the INR exchange rate fluctuates against the U.S. Dollar (USD), the resulting impact on our consolidated USD expenses can be significant. The impact of the depreciation in the value of the rupee was approximately $0.9 million less expense for the three months ended June 30, 2009, when compared to current period rupee expenditures at the prior year foreign exchange rates.

Cost of Revenues

The following table sets forth cost of revenues and the gross margins of selected items reflected in our condensed consolidated statements of operations and comprehensive income for the three months ended June 30, 2009 and June 30, 2008. The period-to period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended June 30,		Three Months Ended June 30,		Change 2009 versus 2008 Three months ended June 30	
	2009	Margin	2008	Margin	$ Change	% Change
Software solutions	$ 2,625	83%	$ 2,874	77%	$ (249)	-9%

Services		14,990	36%		23,624	23%	(8,634)	-37%
Maintenance		2,137	88%		2,655	88%	(518)	-20%
Total cost of revenues	$	19,752	65%	$	29,153	55%	$ (9,401)	-32%

Cost of Software Solutions. These costs consist of:

Salaries and other related costs of employees who provide essential services to customize or enhance the software for the customer

Table of Contents

- Commissions paid to non-customer third parties in connection with joint marketing and other related agreements, which are generally expensed when they become payable

- Royalty fees associated with third-party software utilized with our technology. Such royalties are generally expensed when the products are shipped; however, royalties associated with fixed cost arrangements are generally expensed over the period of the arrangement

- The cost of user product documentation

- The cost of delivery of software

- Provisions for the estimated costs of servicing customer claims, which we accrue on a case-by-case basis

Cost of software solutions decreased by 9% or $0.2 million for the three months ended June 30, 2009 compared to the same period in 2008. The decrease was primarily related to a reduction of $0.3 million in affiliate commission and royalty expense offset by an increase in costs associated with hours worked on projects requiring essential services of $0.1 million.

During the three months ended June 30, 2009 and June 30, 2008, the costs attributable to the performance of essential services related to SOP 81-1 was $2.0 million and $1.9 million, respectively. The remaining costs of software solutions are not directly attributable to specific arrangements, so we do not believe there is a reasonable basis to calculate the cost of each type of software solutions transaction or the resulting contribution margin.

Cost of Services. These costs consist of expenses associated with the delivery of non-essential services, such as implementation, integration, process consulting and training. Cost of services decreased 37% or $8.6 million for the three months ended June 30, 2009 compared to the same period in 2008. This decrease was related primarily to a decrease in employee-related costs of $4.8 million (inclusive of a decrease in utilization of shared resources of $1.3 million primarily from our research and development group), a decrease in contractor related costs of $1.3 million and by a decrease in travel and entertainment expense of $1.5 million. The decrease in employee-related costs is also attributable to a 10% decrease in headcount.

Cost of Maintenance. These costs consist of expenses including support services such as telephone support and unspecified upgrades/enhancements provided on a when-and-if-available basis. Cost of maintenance decreased 20% or $0.5 million for the three months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily related to a decrease in employee-related costs inclusive of a decrease in average headcount of 9%.

Total gross margin in the second quarter of 2009 was 65%, up 10 percentage points from the second quarter of 2008. The year over year decline in total cost of revenues was primarily due to the decrease in cost of services as explained above. Due to variations from period to period depending on the mix of revenues, the Company will continue to focus on our consolidated gross margin when evaluating efficiency metrics.

Operating Expenses

The following table sets forth operating expenses and the percentages of total revenue for those operating expenses as reported in our condensed consolidated statements of operations and comprehensive income. The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Three Months Ended June 30, 2009	Percent of Revenue	Three Months Ended June 30, 2008	Percent of Revenue	Change 2009 versus 2008 Three months ended June 30 $ Change	% Change
Sales and marketing	$ 9,047	16%	$ 13,072	20%	$ (4,025)	-31%
Research and development	6,689	12%	7,541	12%	(852)	-11%
General and administrative	8,294	14%	10,919	17%	(2,625)	-24%
Amortization of intangibles			25		(25)	-100%
Restructuring charges and adjustments	(11)				(11)	100%
Costs and expenses, subtotal	24,019		31,557		(7,538)	-24%
Intellectual property settlement, net	192		(81,315)		81,507	-100%
Total operating expense	$ 24,211		$ (49,758)		$ 73,969	-149%

Sales and Marketing Expense. These expenses consist primarily of personnel costs, commissions, office facilities, travel and promotional events such as trade shows, seminars, technical conferences, advertising and public relations programs. For the three months ended June 30, 2009, sales and marketing expense decreased 31% or $4.0 million when compared to the same period in 2008. The decrease was primarily related to a decrease in trade show events costs of $1.8 million, a reduction in employee-related costs of $1.4 million, and a decrease in travel and entertainment costs of $0.8 million. The decrease in trade show events is due to the cancellation of our 2009 Planet event typically held in the second quarter. The Company will continue to evaluate Planet and other customer events in the future in light of then-current economic conditions. The decrease in employee-related costs is associated with our restructuring and reorganization efforts. The decrease in travel and entertainment is attributable to the implementation of cost control initiatives.

Research and Development Expense. These expenses consist of costs related to software development and product enhancements to existing software. Software development costs are expensed as incurred until technological feasibility has been established, at which time such costs are capitalized until the product is available for general release to customers. To date, the establishment of technological feasibility of our products and general release of such software has substantially coincided. As a result, software development costs qualifying for capitalization have been insignificant; therefore, we have not capitalized any software development costs other than those recorded in connection with our acquisitions. The primary component of research and development expense is employee-related cost. For the three months ended June 30, 2009, the decrease in research and development expense included a $0.4 million decrease in employee-related costs and a $0.3 million decrease in facilities costs. The decrease in employee-related expenses is due to an 8% decrease in average headcount when compared to the same period in 2008 offset by a decrease in shared resources utilized on Services projects of $1.0 million.

General and Administrative Expense. These expenses include the personnel and other costs of our finance, legal, accounting, human resources, information systems and executive departments, as well as external legal costs. General and administrative expense for the three months ended June 30, 2009 decreased 24% or $2.6 million compared to the same period in 2008 primarily due to a reduction in legal and litigation related expenses of $1.8 million, and facilities costs of $0.9 million. The reduction in legal and litigation related expenses is due to $1.8 million of expenses related to the resolution of certain non-patent litigation activities in 2008, which date back to 2005. The decrease in facilities costs is mostly due to the renegotiation of the Dallas facilities lease for less square footage and a lower per square foot rate.

Amortization of Intangible Assets and Impairment of Intangible Assets. From time to time, we have sought to enhance our product offerings through technology and business acquisitions. When an acquisition of a business is accounted for using the purchase method, the amount of the purchase price is allocated to the fair value of assets acquired, net of liabilities assumed. Any excess purchase price is allocated to goodwill. Intangible assets are amortized over their estimated useful lives, while goodwill is only written down if and when it is deemed to be impaired.

Intellectual Property Settlement, Net. For the three months ended June 30, 2009, we incurred $0.2 million of costs related the Oracle patent suit. On June 23, 2008, we reached a settlement with SAP to settle existing patent litigation between i2 and SAP. Under the terms of the settlement, SAP agreed to pay i2 $83.3 million. We recorded the $83.3 million net of external patent litigation expenses of $2.0 million for the three months ended June 30, 2008.

Table of Contents

Non-Operating (Expense), Net

For the three months ended June 30, 2009 and June 30, 2008, non-operating (expense), net, was as follows:

	Three Months Ended June 30, 2009	Three Months Ended June 30, 2008 (as restated, see Note 10)	Change 2009 versus 2008 Three months ended June 30 $ Change	% Change
Interest income	$ 66	$ 932	$ (866)	-93%
Interest expense		(1,864)	(1,864)	-100%
Foreign currency hedge and transaction losses, net	(290)	(464)	(174)	-38%
Other income , net	64	(236)	300	127%
Total non-operating (expense), net	$ (160)	$ (1,632)	$ (1,472)	-90%

Total non-operating (expense) decreased $1.5 million for the three months ended June 30, 2009 as compared to the same period in 2008.

Interest income decreased in the three-month period ended June 30, 2009, compared to the same period in 2008 due to lower yields on average cash balances, partially offset by higher average cash balances. For the three months, ended June 30, 2009, average cash balances increased 21.7%. The average rate earned for the three months ended June 30, 2009, was 0.16%, and for June 30, 2008, was 2.50%. The lower interest rates are due to changes in the general direction of market interest rates in the U.S., where the majority of our cash is held, and a change in the mix of our holdings. Due to the demand nature of our money market funds and the short-term nature of our time deposits and debt securities portfolio, these assets are sensitive to changes in the Federal Funds rate. The Federal Funds rate decreased from 2.00% at June 30, 2008, to between 0.00% and 0.25% at June 30, 2009. During the first half of 2009, substantially all of our cash was held in Treasury and government agency money market mutual funds.

Interest expense decreased $1.9 million in the period ended June 30, 2009 as compared to the same period in 2008. The decline is due to our Convertible Notes repurchases; see *Note 3, Borrowings and Debt Issuance Cost.* The incremental non-cash interest expense associated with the adoption of FSP APB 14-1 for the three months ended June 30, 2008 was $0.6 million. The incremental non-cash other income associated with the adoption of FSP APB 14-1 for the three months ended June 30, 2009 was $0.1 million.

The market interest rates on investments and the relative exchange values of foreign currencies are influenced by the monetary and fiscal policies of the governments in the countries in which we operate. The nature, timing and extent of any impact on our financial statements resulting from changes in those governments policies are not predictable. Risks associated with market interest rates and foreign exchange rates are discussed below under the section captioned Sensitivity to Market Risks.

Provision for Income Taxes

We recognized income tax expense of approximately $2.3 and $2.7 million for the three months ended June 30, 2009 and 2008, respectively, representing effective income tax rates of 18.1% and 3.2% for the corresponding periods. Various factors affect our effective income tax rate including, among others, changes in our valuation allowance, the effect of foreign operations, state income taxes (net of federal income tax benefits), certain non-deductible meals and entertainment expenses, research and development tax credits, and the effect of foreign withholding taxes. Our effective income tax rates during the three months ended June 30, 2009 and June 30, 2008 differ from the U.S. statutory rate primarily due to the effect these items have on our valuation allowance.

Table of Contents

Income tax expense included the effect of foreign withholding taxes of $0.3 million for the three months ended June 30, 2009 and $0.6 million for the three months ended June 30, 2008. Foreign withholding taxes are incurred on certain payments from international customers and are recorded upon receipt of such payments that are received net of the withheld taxes. Foreign withholding taxes generally are available to reduce domestic income tax. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these withholding taxes increase our income tax expense.

During the three months ended June 30, 2008, we recorded a benefit to operating expense of approximately $83.3 million related to the settlement of the SAP patent litigation. We utilized net operating loss carryforwards and other tax attributes to reduce taxes on the settlement. Accordingly, we recorded federal and state alternative minimum tax (AMT) of approximately $1.1 million and $0.1 million, respectively, and other state income taxes of approximately $0.2 million in income tax expense during the three months ended June 30, 2008 related to the settlement. Alternative minimum tax generally is available to reduce regular income tax in the future. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these amounts increase our income tax expense.

Estimated potential interest and penalties related to our unrecognized tax benefits within our global organization are recorded in income tax expense and totaled approximately $0.2 million for the three months ended June 30, 2009. Accrued interest and penalties were approximately $2.1 million at June 30, 2009. Management believes recording interest and penalties related to income tax uncertainties as income tax expense better reflects income tax expense and provides better information reporting.

Analysis of Financial Results - Six Months Ended June 30, 2009 Compared to the Six Months Ended June 30, 2008

Summary of Year-to-Date June 30, 2009 Results

- Total revenue decreased $13.9 million from the same period in 2008
- Total costs and expenses increased $56.8. The six months ended June 30, 2008 amount reflects a benefit of $79.9 million related to the company s intellectual property settlement.
- Net income applicable to common stockholders was $11.7 million compared to $82.3 from the same period in 2008. This first half of 2008 includes the SAP litigation settlement of $78.4 million, net of external patent litigation expense and applicable taxes.
- Diluted earnings per share were $0.43 for the six months ended June 30, 2009 and $3.11 for the same period in 2008
- Cash flow from operations was $22.3 million versus cash flow from operations of $20.4 million in the 2008 period
- Total bookings were $128.1 million versus $130.5 million in the same period in 2008. Total bookings includes $32.1 million and $7.7 million of multi-year contracts, respectively.

Revenues

The following table sets forth revenues and the percentages of total revenues of selected items reflected in our condensed consolidated statements of operations and comprehensive income for the six months ended June 30, 2009 and June 30, 2008. The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Six Months Ended June 30, 2009	Percent of Revenue	Six Months Ended June 30, 2008	Percent of Revenue	Change 2009 versus 2008 Six months ended June 30 $ Change	% Change
SOP 97-2 recognition	$ 1,553	1%	$ 1,803	1%	$ (250)	-14%
SOP 81-1 recognition	14,007	12%	10,460	8%	3,547	34%
Recurring items	9,912	9%	11,978	9%	(2,066)	-17%
Total Software solutions	25,472	22%	24,241	19%	1,231	5%
Services	50,351	44%	59,350	47%	(8,999)	-15%
Maintenance	37,608	33%	43,713	34%	(6,105)	-14%
Total revenues	$ 113,431	100%	$ 127,304	100%	$ (13,873)	-11%

Software Solutions Revenue. Total software solutions revenue increased 5% or $1.2 million for the six months ended June 30, 2009 compared to the same period in 2008. The components of the changes in software solutions revenue are explained below.

Revenue recognized under SOP 97-2 decreased 14% or $0.25 million for the six months ended June 30, 2009 compared to the same period of 2008. During the six months ended June 30, 2009 we recognized revenue related to 10 contracts at an average of $0.15 million per contract compared to 19 contracts at an average of $0.10 million in the same period of 2008.

Revenue recognized under SOP 81-1 is dependent upon the amount of work performed on software solutions projects and milestones met during the applicable period on projects booked in prior periods. Revenue recognized under SOP 81-1 increased 34% or $3.5 million for the six months ended June 30, 2009 when compared to the same period in 2008. During the six months ended June 30, 2009, we recognized revenue related to 31 projects at an average of $0.45 million per project compared to 23 projects at an average of $0.45 million per project in the same period of 2008. The increase primarily resulted from the significant software solutions bookings in the first quarter of 2009.

Revenue from recurring items decreased by 17% or $2.1 million for the six months ended June 30, 2009 when compared to the same period in 2008. This decrease resulted primarily from a license arrangement that was required to be recognized ratably over the 12 months ended December 31, 2008 based on its terms. This arrangement is subject to a maintenance agreement in 2009.

Services Revenue. Services revenue decreased 15% or $9.0 million for the six months ended June 30, 2009 compared to the same period in 2008. The decrease was driven by a decline in demand for our services due to our customers economic constraints, resulting in a 14% reduction in billable hours. We adjusted our services capacity accordingly through cost reductions including decreasing our average headcount by 9% as well as reducing our usage of third party contractors.

Maintenance Revenue. Maintenance revenue decreased 14% or $6.1 million for the six months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily due to the impact of lower renewal rates as well as cancellations of certain contracts by customers who previously had multiple maintenance agreements. This trend of lower renewal rates and customer losses may continue if our customers reduce their expenditures during the current economic downturn. In addition, a significant maintenance-paying customer decided not to renew maintenance in the second quarter of 2009, which resulted in a $1.0 million reduction in maintenance revenue for the six months ended June 30, 2009 when compared to the same period in 2008.

International Revenue. Our international revenues included in the categories discussed above are primarily generated from customers located in Europe, Asia, Latin America and Canada. International revenue totaled $55.3 million, or 49% of total revenue, in the six months ended June 30, 2009 compared to $52.9 million, or 42% of total revenue, in the same period in 2008.

Customer Concentration. During the periods presented, no individual customer accounted for more than 10% of total revenues.

Table of Contents

Impact of Indian Rupee on Expenses

A large portion of our employee base is located in India, and as a result, a significant portion of our fixed expenses is denominated in the Indian Rupee (INR). Therefore, as the INR exchange rate fluctuates against the U.S. Dollar (USD), the resulting impact on our consolidated USD expenses can be significant. The impact of the depreciation in the value of the rupee was approximately $2.2 million less expense for the six months ended June 30, 2009, when compared to current period rupee expenditures at the prior year foreign exchange rates.

Cost of Revenues

The following table sets forth cost of revenues and the gross margins of selected items reflected in our condensed consolidated statements of operations and comprehensive income for the six months ended June 30, 2009 and June 30, 2008. The period-to period comparisons of financial results are not necessarily indicative of future results.

	Six Months Ended June 30, 2009	Margin	Six Months Ended June 30, 2008	Margin	Change 2009 versus 2008 Six months ended June 30	
					$ Change	% Change
Software solutions	$ 4,322	83%	$ 5,488	77%	$ (1,166)	-21%
Services	32,576	35%	46,095	22%	(13,519)	-29%
Maintenance	4,623	88%	5,498	87%	(875)	-16%
Amortization of acquired technology			4		(4)	-100%
Total cost of revenues	$ 41,521	63%	$ 57,085	55%	$ (15,564)	-27%

Cost of Software Solutions. Cost of software solutions decreased 21% or $1.2 million for the six months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily caused by a lower average cost rate of the resource mix working on software solutions projects compared to the same period in 2008 and a reduction in affiliate commission and royalty expense.

During the six months ended June 30, 2009 and June 30, 2008, the costs attributable to the performance of essential services related to software solutions projects recognized under SOP 81-1 was $3.2 million and $3.8 million, respectively.

Cost of Services. These costs consist of expenses associated with the delivery of non-essential services, such as implementation, integration, process consulting and training. Cost of services decreased 29% or $13.5 million for the six months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily related to a decrease in employee related costs of $6.8 (inclusive of a decrease in average headcount of 9% and a decrease in utilization of shared resources primarily from the research and development group of $1.5 million), a decrease in contractor costs of $2.1 and a decrease in travel and entertainment of $2.6 million.

Cost of Maintenance. These costs consist of expenses including support services such as telephone support and unspecified upgrades/enhancements provided on a when-and-if-available basis. Cost of maintenance decreased 16% or $0.9 million for the three months ended June 30, 2009 compared to the same period in 2008. This decrease was primarily related to a decrease in employee-related costs inclusive of a decrease in average headcount of 9%.

Amortization of Acquired Technology. In connection with our business acquisitions, we acquired developed technology that we offer as a part of our solutions. In accordance with applicable accounting standards, the amortization of acquired technology is included as a part of our cost of revenues because it relates to software products that are marketed to potential customers.

Table of Contents

Operating Expenses

The following table sets forth operating expenses and the percentages of total revenue for those operating expenses as reported in our condensed consolidated statements of operations and comprehensive income. The period-to-period comparisons of financial results are not necessarily indicative of future results.

	Six Months Ended June 30, 2009	Percent of Revenue	Six Months Ended June 30, 2008	Percent of Revenue	Change 2009 versus 2008 Six months ended June 30 $ Change	% Change
Sales and marketing	$ 18,956	17%	$ 25,022	20%	$ (6,066)	-24%
Research and development	13,764	12%	15,174	12%	(1,410)	-9%
General and administrative	17,263	15%	20,428	16%	(3,165)	-15%
Amortization of intangibles	25		50		(25)	-50%
Restructuring charges and adjustments	2,995	3%			2,995	100%
Costs and expenses, subtotal	53,003		60,674		(7,671)	-13%
Intellectual property settlement, net	192		(79,860)		80,052	-100%
Total operating expense	$ 53,195		$ (19,186)		$ 72,381	-377%

Sales and Marketing Expense. For the six months ended June 30, 2009, sales and marketing expense decreased 24% or $6.1 million when compared to the same period in 2008. The decrease in sales and marketing expense included a decrease in employee related costs of $3.2 million, a decrease in travel and entertainment expense of $1.3 million and a decrease in trade show and events of $1.5 million. The decrease in trade show events is due to the cancellation of our 2009 Planet event typically held in the second quarter. The Company will continue to evaluate Planet and other customer events in the future in light of then-current economic conditions. The decrease in employee-related costs is associated with our restructuring and reorganization efforts. The decrease in travel and entertainment is attributable to the implementation of cost control initiatives.

Research and Development Expense. For the six months ended June 30, 2009, the decrease in research and development expense included a decrease in employee-related costs $0.6 million and a decrease in facilities cost of $0.5 million. The decrease in employee-related expenses is due to a 6% decrease in average headcount when compared to the same period in 2008 offset by a decrease in shared resources utilized on Services projects of $1.7 million.

General and Administrative Expense. General and administrative expense for the six months ended June 30, 2009 decreased 15% or $3.2 million compared to the same period in 2008. The decrease is primarily due to a decrease in employee related expense of $0.3 million, a decrease in facilities cost of $1.2 million and a decrease in legal and litigation related expenses of $1.8 million related to the resolution of certain non-patent litigation activities, which date back to 2005. The decrease in facilities costs is mostly due to the renegotiation of the Dallas facilities lease for less square footage and a lower per square foot rate.

Amortization of Intangible Assets and Impairment of Intangible Assets. From time to time, we have sought to enhance our product offerings through technology and business acquisitions. When an acquisition of a business is accounted for using the purchase method, the amount of the purchase price is allocated to the fair value of assets acquired, net of liabilities assumed. Any excess purchase price is allocated to goodwill. Intangible assets are amortized over their estimated useful lives, while goodwill is only written down if it is deemed to be impaired.

Restructuring Expense. During the six months ended June 30, 2009 we had $3.0 million in restructuring expense related to the involuntary termination of approximately 80 associates and no expense in the six months ended June 30, 2008.

Intellectual Property Settlement, Net. For the six months ended June 30, 2009, we incurred $0.2 million of costs related the Oracle patent suit. On June 23, 2008, we reached a settlement with SAP to settle existing patent litigation between i2 and SAP. Under the terms of the settlement, SAP agreed to pay i2 $83.3 million. We recorded the $83.3 million net of external patent litigation expense of $3.5 million for the six months ended June 30, 2008.

Table of Contents

Non-Operating (Expense), Net

For the six months ended June 30, 2009 and June 30, 2008, non-operating (expense), net, was as follows:

	Six Months Ended June 30, 2009	Months Ended June 30, 2008 restated, see Note	Change 2009 versus 2008 Six months ended June 30 $ Change	% Change
Interest income	$ 196	$ 2,127	$ (1,931)	-91%
Interest expense	(899)	(3,725)	(2,826)	-76%
Foreign currency hedge and transaction losses, net	(831)	(605)	226	37%
Loss on extinguishment of debt	(892)		892	100%
Other (expense) income, net	(79)	481	560	116%
Total non-operating (expense), net	$ (2,505)	$ (1,722)	$ 783	45%

Total non-operating (expense) increased $0.8 million for the six months ended June 30, 2009 as compared to the same period in 2008.

Interest income decreased in the six-month period ended June 30, 2009, compared to the same period in 2008 due to lower yields on average cash balances, partially offset by higher average cash balances. For the six months, ended June 30, 2009, average cash balances increased 38.1%. The average rate earned for the six months ended June 30, 2009, was 0.17%, and for June 30, 2008, was 2.85%. The lower interest rates are due to changes in the general direction of market interest rates in the U.S., where the majority of our cash is held, and a change in the mix of our holdings. Due to the demand nature of our money market funds and the short-term nature of our time deposits and debt securities portfolio, these assets are sensitive to changes in the Federal Funds rate. The Federal Funds rate decreased from 2.00% at June 30, 2008, to between 0.00% and 0.25% at June 30, 2009. During the first half of 2009, substantially all of our cash was held in money market accounts invested in Treasury and agency securities.

Interest expense decreased $2.8 million in the period ended June 30, 2009 as compared to the same period in 2008. The decline is due to our Convertible Notes repurchases; see *Note 3, Borrowings and Debt Issuance Cost.* The incremental non-cash interest expense associated with the adoption of FSP APB 14-1 for the six months ended June 30, 2009 and 2008 is $0.3 million and $1.2 million respectively.

The repurchase of the notes resulted in a $0.9 million loss on extinguishment of debt.

The change in other income (expense) is primarily related to a refund of payroll tax interest of $0.7 million received in the first quarter of 2008. The incremental non-cash other income associated with the adoption of FSP APB 14-1 for the six months ended June 30, 2009 and 2008 is $0.05 million and $0.2 million respectively.

The market interest rates on investments and the relative exchange values of foreign currencies are influenced by the monetary and fiscal policies of the governments in the countries in which we operate. The nature, timing and extent of any impact on our financial statements resulting from changes in those governments policies are not predictable. Risks associated with market interest rates and foreign exchange rates are discussed below under the section captioned Sensitivity to Market Risks.

Table of Contents

Provision for Income Taxes

We recognized income tax expense of approximately $3.0 million and $3.8 million for the six months ended June 30, 2009 and 2008, respectively, representing effective income tax rates of 18.3% and 4.3% for the corresponding periods. Various factors affect our effective income tax rate including, among others, changes in our valuation allowance, the effect of foreign operations, state income taxes (net of federal income tax benefits), certain non-deductible meals and entertainment expenses, research and development tax credits, and the effect of foreign withholding taxes. Our effective income tax rates during the six months ended June 30, 2009 and June 30, 2008 differ from the U.S. statutory rate primarily due to the effect these items have on our valuation allowance.

Income tax expense included the effect of foreign withholding taxes of $0.6 million for the six months ended June 30, 2009 and $1.1 million for the six months ended June 30, 2008. Foreign withholding taxes are incurred on certain payments from international customers and are recorded upon receipt of such payments which are received net of the withheld taxes Foreign withholding taxes generally are available to reduce domestic federal regular income tax. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these withheld taxes increase our income tax expense.

The six months ended June 30, 2009 include a benefit resulting from adjustments to our global transfer pricing accruals, including the expiration of certain tax years related to international operations. The six months ended June 30, 2008 include the effect of a tax refund of approximately $1.0 million related to our international operations.

During the six months ended June 30, 2008, we recorded a benefit to operating expense of approximately $83.3 million related to the settlement of the SAP patent litigation. We utilized net operating loss carryforwards and other tax attributes to reduce taxes on the settlement. Accordingly, we recorded federal and state alternative minimum tax (AMT) of approximately $1.1 million and $0.1 million, respectively, and other state income taxes of approximately $0.2 million in income tax expense during the six months ended June 30, 2008 related to the settlement. Alternative minimum tax generally is available to reduce regular income tax in the future. Due to our net operating loss carryforwards and associated valuation allowance against our domestic deferred tax assets, these amounts increase our income tax expense.

Estimated potential interest and penalties related to our unrecognized tax benefits within our global organization are recorded in income tax expense and resulted in a benefit of approximately $0.1 million for the six months ended June 30, 2009. The benefit resulted from the reduction in interest and penalties associated with the adjustments to our global transfer pricing accruals mentioned above. Accrued interest and penalties were approximately $2.1 million at June 30, 2009. Management believes recording interest and penalties related to income tax uncertainties as income tax expense better reflects income tax expense and provides better information reporting.

Contractual Obligations

During the three-month and six-month periods ended June 30, 2009, there were no material changes outside the ordinary course of business in the specified contractual obligations set forth in our 2008 Annual Report on Form 10-K.

Off-Balance-Sheet Arrangements

As of June 30, 2009, we did not have any off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Liquidity and Capital Resources

Our working capital was $124.9 million at June 30, 2009 compared to $187.4 million at December 31, 2008, a reduction of $62.5 million or 33%. The reduction in working capital was principally attributable to the cash required for the convertible note repurchases during the first quarter of 2009. The reduction resulted from a $69.2 million decrease in current assets (comprised of a decrease of $62.3 million in cash, including restricted cash, a decrease of $2.3 million in other current assets and a decrease of $4.9 million in accounts receivable). This decrease in current assets was partially offset by a decrease in current liabilities of $6.9 million.

Table of Contents

Our working capital balance at June 30, 2009 and December 31, 2008 included deferred revenue. At June 30, 2009 and December 31, 2008, we had approximately $52.2 million and $53.0 million, respectively, of deferred revenue recorded as a current liability, representing pre-paid revenue for all of our different revenue categories. Our deferred revenue balance includes a margin to be earned when it is recognized, so the conversion of the liability to revenue will require cash outflows that are less than the amount of the liability.

Our cash and cash equivalents decreased $63.1 million during the six months ended June 30, 2008. This decrease is primarily the result of cash used in financing activities of $84.8 million; see *Note 3, Borrowings and Debt Issuance Cost.*

During the six months, ended June 30, 2009, cash provided by operating activities was approximately $22.3 million. Management tracks projected cash collections and projected cash outflows to monitor short-term liquidity requirements and to make decisions about future resource allocations and take actions to adjust our expenses with the goal of remaining cash flow positive from operations on an annual basis. We believe that, as of June 30, 2009, the Company s cash resources will be sufficient to meet our operating requirements for the next twelve months.

Cash used in investing activities was approximately $1.4 million during the six months ended June 30, 2009. We had an increase in restricted cash of approximately $0.9 million and purchases of property, plant and equipment of $0.6 million.

During the six months, ended June 30, 2009, cash used in financing activities was $84.4 million. The cash used is related to the repurchase of our convertible notes.

At June 30, 2009, we had a net cash balance of $181.5 million compared to a net cash balance of $157.5 million at December 31, 2008. We define net cash as the sum of our total cash and cash equivalents and restricted cash minus the face value of our debt. As of June 30, 2009, $5.4 million in letters of credit were outstanding and $5.9 million in restricted cash was pledged as collateral.

Sensitivity to Market Risks

Foreign Currency Risk. Revenues originating outside of the United States, a portion of which are denominated in foreign currencies, totaled 50% and 44% for the three months ended June 30, 2009 and June 30, 2008, respectively, and totaled 49% and 42% for the six months ended June 30, 2009 and June 30, 2008, respectively. Since we conduct business on a global basis in various foreign currencies, we are exposed to movements in foreign currency exchange rates. We utilize a foreign currency-hedging program that uses foreign currency forward exchange contracts to hedge various nonfunctional currency exposures. The objective of this program is to reduce the effect of changes in foreign currency exchange rates on our results of operations. Furthermore, our goal is to offset foreign currency transaction gains and losses recorded for accounting purposes with gains and losses realized on the forward contracts. Our hedging activities cannot completely protect us from the risk of foreign currency losses as our currency exposures are constantly changing and not all of these exposures are hedged. A large portion of our employee base is located in India, and as a result, a significant portion of our fixed expenses is denominated in the Indian Rupee (INR). Therefore, as the INR exchange rate fluctuates against the U.S. Dollar (USD), the resulting impact on our consolidated USD expenses can be significant.

Interest Rate Risk. Our investments are subject to interest rate risk. Interest rate risk is the risk that our financial condition and results of operations could be adversely affected due to movements in interest rates. We typically invest our cash in a variety of interest-earning financial instruments, including bank time deposits, money market funds and taxable and tax-exempt variable-rate and fixed-rate obligations of corporations and federal, state and local governmental entities and agencies. These investments are primarily denominated in U.S. Dollars. Cash balances in foreign currencies overseas are primarily operating balances and are generally invested in short-term time deposits of the local operating bank. Due to the demand nature of our money market funds and the short-term nature of our time deposits and debt securities portfolio, these assets are sensitive to changes in interest rates. The Federal Reserve Board influences the general direction of market interest rates in the U.S. where the majority of our cash and investments are held. The Federal Funds rate decreased from 2.00% at June 30, 2008, to between 0.00% and 0.25% at June 30, 2009. As of June 30, 2009 and 2008, the weighted-average yield on cash and cash equivalent balances was 0.16% and 2.50%, respectively.

Table of Contents

Credit Risk. Financial assets that potentially subject us to a concentration of credit risk consist principally of investments and accounts receivable. Cash on deposit is held with financial institutions with high credit standings. Investments are generally in money market funds comprised of a combination of Treasury and government agency obligations. We limit our investment in individual funds and with individual financial institutions to mitigate risk. We attempt to limit our restricted cash and cash balances held in foreign locations.

Our customer base consists of large numbers of geographically diverse enterprises dispersed across many industries. As a result, concentration of credit risk with respect to accounts receivable is not significant. However, we periodically perform credit evaluations for significant customers and maintain reserves for potential losses. In certain situations, we may seek letters of credit to be issued on behalf of some customers to mitigate our exposure to credit risk. We currently use foreign exchange contracts to reduce the effects of the foreign exchange risks associated with receivables denominated in non-functional currencies. Risk of non-performance by counterparties to such contracts is minimal due to the size and credit standings of the financial institutions involved. One of our large customers filed for bankruptcy and began liquidation proceedings in the three months ended March 31, 2009. We did not have a bad debt exposure associated with this customer because we had previously identified the potential collection risk and consequently only recognized revenue upon receipt of cash.

The current unprecedented disruptions in the financial markets may adversely affect the availability of credit already arranged and the availability and cost of credit in the future, which could result in bankruptcy or insolvency for customers, which would affect our cash collections from our accounts receivable. We are unable to predict the likely duration and severity of the current disruption in financial markets and adverse economic conditions in the U.S. and globally.

Inflation. Inflation has not had a material impact on our results of operations or financial condition.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This information is included in the section captioned Sensitivity to Market Risks, included in Item 2 -- Management s Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. As required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (Exchange Act), our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. As defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, disclosure controls and procedures are controls and other procedures of our company that are designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is accumulated and communicated to our company s management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Based on this evaluation, our CEO and CFO concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and to provide reasonable assurance that such information is accumulated and communicated to our company s management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. It should be noted that any system of controls, however well designed and operated, is based in part upon certain assumptions and can provide only reasonable, and not absolute, assurance that the objectives of the system are met.

Table of Contents

Changes in Internal Control over Financial Reporting. As required by Rule 13a-15(d) under the Exchange Act, our management, including our CEO and CFO, also conducted an evaluation of our internal control over financial reporting to determine whether any change occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. Based on our evaluation, during our most recent fiscal quarter there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth in *Note 7 Commitments and Contingencies* in our Notes to Condensed Consolidated Financial Statements is incorporated herein by reference.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed under the heading Risk Factors in Item 1A of our 2008 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On May 28, 2009, we held an annual meeting of our stockholders for the following purpose:

To elect Jackson L. Wilson, Jr. as Class III director to serve until the annual stockholders meeting in 2012, and to vote on a proposal to ratify the appointment of Grant Thornton LLP as the Company s independent registered public accounting firm for the fiscal year ending December 31, 2009.

Mr. Wilson was elected with 19,096,323 common shares voting for his election and 719,737 common shares withholding their vote. The proposal to ratify appointment of Grant Thornton LLP was passed with 19,722,057 common shares voting for the proposal, 71,590 common shares voting against the proposal and 22,413 common shares abstaining from the vote.

The terms of office of Stephen P. Bradley and Richard L. Clemmer, both Class I directors; J. Coley Clark, Richard Hunter and Lloyd G. Waterhouse, all Class II directors; and Michael J. Simmons a Class III director, continued after the meeting. Sanjiv S. Sidhu (a Class III director) and David L. Pope (a Class I director) did not stand for re-election at the annual meeting.

ITEM 5. OTHER INFORMATION
