UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For Quarterly Period Ended May 31, 2011

Commission File Number 001-14920

McCORMICK & COMPANY, INCORPORATED

(Exact name of registrant as specified in its charter)

MARYLAND
(State or other jurisdiction of

52-0408290
(I.R.S. Employer

Edgar Filing: MCCORMICK & CO INC - Form 10-Q

incorporation or organization)

Identification No.)

18 Loveton Circle, P. O. Box 6000, Sparks, MD
(Address of principal executive offices)

21152-6000
(Zip Code)

Registrant's telephone number, including area code (410) 771-7301

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of accelerated filer, large accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

	Shares Outstanding May 31, 2011
Common Stock	12,499,510
Common Stock Non-Voting	119,776,364

MCCORMICK & COMPANY, INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all the information and notes required by United States generally accepted accounting principles for complete financial statements. In our opinion, the accompanying condensed consolidated financial statements contain all adjustments, which are of a normal and recurring nature, necessary to present fairly the financial position and the results of operations for the interim periods.

The results of consolidated operations for the three and six month periods ended May 31, 2011 are not necessarily indicative of the results to be expected for the full year. Historically, our net sales, net income and cash flow from operations are lower in the first half of the fiscal year and increase in the second half. The increase in net sales, net income and cash flow from operations in the second half of the year is mainly due to the consumer business cycle, where customers typically purchase more products in the fourth quarter due to the holiday season.

For further information, refer to the consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended November 30, 2010.

Accounting and Disclosure Changes

In June 2011, the Financial Accounting Standards Board issued Accounting Standards Update No. 2011-05 *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. This guidance is intended to increase the prominence of other comprehensive income in financial statements by presenting it in either a single statement or two-statement approach. This new accounting pronouncement is effective for our first quarter of 2013 and we do not expect any material impact on our financial statements from adoption.

2. FINANCIAL INSTRUMENTS

We use derivative financial instruments to enhance our ability to manage risk, including foreign currency and interest rate exposures, which exist as part of our ongoing business operations. We do not enter into contracts for trading purposes, nor are we a party to any leveraged derivative instrument. The use of derivative financial instruments is monitored through regular communication with senior management and the use of written guidelines.

Table of Contents

In May 2011, we entered into \$150 million of forward U.S. Treasury rate lock agreements to manage the U.S. Treasury portion of our interest rate risk associated with the anticipated issuance of at least \$150 million of fixed rate medium-term notes in 2011. We intend to cash settle these agreements upon issuance of the medium-term notes thereby effectively locking in the U.S. Treasury fixed interest rate in effect at the time the agreements were initiated. The U.S. Treasury locked weighted average fixed rate of these agreements is 3.18%. We have designated these outstanding forward U.S. Treasury rate lock agreements, which expire on July 22, 2011, as cash flow hedges. The gain or loss on these agreements is deferred in other comprehensive income and will be amortized over the life of the medium-term notes as a component of interest expense. Hedge ineffectiveness of these agreements was not material in the quarter.

As of May 31, 2011, the maximum time frame for our foreign exchange forward contracts is 18 months. For all derivatives, the net amount of accumulated other comprehensive income expected to be reclassified in the next 12 months is \$3.4 million as a reduction of earnings.

All derivatives are recognized at fair value in the balance sheet and recorded in either current or noncurrent other assets or other accrued liabilities or other long-term liabilities depending upon nature and maturity.

The following table discloses the fair values of derivative instruments on our balance sheet (in millions):

As of May 31, 2011

	Other current Balance Sheet Location	Other current Asset Derivatives Notional Amount	Other current Fair Value	Other current Balance Sheet Location	Other current Liability Derivatives Notional Amount	Other current Fair Value
Interest rate contracts	Other current assets	\$ 100.0	\$ 17.7	Other accrued liabilities	\$ 150.0	\$ 0.9
Foreign exchange contracts	Other current assets	187.3	3.5	Other accrued liabilities	\$ 38.2	2.7
Total			\$ 21.2			\$ 3.6

Table of Contents

As of May 31, 2010

	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet

Interest rate contracts	Other current assets	\$ 100.0	\$ 16.1			
Foreign exchange contracts	Other current assets	235.5	3.1	Other accrued liabilities	\$ 34.4	\$ 0.7
Total			\$ 19.2			\$ 0.7

As of November 30, 2010

	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet	Balance Sheet
	Location	Asset Derivatives	Fair Value	Location	Liability Derivatives	Fair Value
		Notional Amount			Notional Amount	
Interest rate contracts	Other current assets	\$ 100.0	\$ 19.2			
Foreign exchange contracts	Other current assets	4.5	0.2	Other accrued liabilities	\$ 203.7	\$ 2.8
Total			\$ 19.4			\$ 2.8

The following tables disclose the impact of derivative instruments on our other comprehensive income (OCI), accumulated other comprehensive income (AOCI) and our income statement for the quarters ending May 31, 2011 and 2010 (in millions):

Fair Value Hedges

Derivative	Interest expense Income statement location	Interest expense	Interest expense	Interest expense	Interest expense	Interest expense
		For the 3 months ended 5/31/11	For the 3 months ended 5/31/10	Expense	For the 6 months ended 5/31/11	For the 6 months ended 5/31/10
Interest rate contracts	Interest expense	\$ 1.3	\$ 1.3	\$ 2.5	\$ 2.5	
Cash Flow Hedges	For the 3 months ended May 31,					

Edgar Filing: MCCORMICK & CO INC - Form 10-Q

Derivative	Interest expense		Interest expense Income statement location	Interest expense	
	2011	Gain or (Loss) recognized in OCI		2011	Gain or (Loss) reclassified from AOCI
Interest rate contracts	\$	(0.9)	Interest expense	\$	(0.4)
Foreign exchange contracts		\$	Cost of goods sold	(1.0)	(0.1)
Total	\$	(0.9)		\$	(1.4)

Table of Contents

Cash Flow Hedges For the 6 months ended May 31,

Derivative	Interest expense Gain or (Loss) recognized in OCI		Interest expense Income statement location		Interest expense Gain or (Loss) reclassified from AOCI	
	2011	2010			2011	2010
Interest rate contracts	\$ (0.9)		Interest expense		\$ (0.7)	\$ (0.7)
Foreign exchange contracts	(1.8)	\$ 1.7	Cost of goods sold		(1.6)	0.0
Total	\$ (2.7)	\$ 1.7			\$ (2.3)	\$ (0.7)

The amount of gain or loss recognized in income on the ineffective portion of derivative instruments was not material. The amounts noted in the tables above for OCI do not include any adjustments for the impact of deferred income taxes.

3. FAIR VALUE MEASUREMENTS

Fair value can be measured using valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). Accounting standards utilize a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Table of Contents

Our population of financial assets and liabilities subject to fair value measurements on a recurring basis are as follows (in millions):

Assets	Fair Value	Fair value measurements using fair value hierarchy As of May 31, 2011		
		Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 47.9	\$ 47.9	\$	\$
Insurance contracts	61.9		61.9	
Bonds & other long-term investments	12.9	12.9		
Interest rate derivatives	17.7		17.7	
Foreign currency derivatives	3.5		3.5	
Total	\$ 143.9	\$ 60.8	\$ 83.1	\$

Liabilities

Foreign currency derivatives	\$ 2.7		\$ 2.7	
Interest rate derivatives	0.9		0.9	
Total	\$ 3.6	\$	\$ 3.6	\$

Assets	Fair Value	Fair value measurements using fair value hierarchy As of May 31, 2010		
		Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 23.1	\$ 23.1	\$	\$
Insurance contracts	44.3		44.3	
Bonds & other long-term investments	19.7	19.7		
Interest rate derivatives	16.1		16.1	
Foreign currency derivatives	3.1		3.1	
Total	\$ 106.3	\$ 42.8	\$ 63.5	\$

Liabilities

Foreign currency derivatives	\$ 0.7	\$	\$ 0.7	\$
------------------------------	--------	----	--------	----

Table of Contents

	Fair Value	Fair value measurements using fair value hierarchy As of November 30, 2010		
		Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	\$ 50.8	\$ 50.8	\$	\$
Insurance contracts	52.8		52.8	
Bonds & other long-term investments	13.0	13.0		
Interest rate derivatives	19.2		19.2	
Foreign currency derivatives	0.2		0.2	
Total	\$ 136.0	\$ 63.8	\$ 72.2	\$
Liabilities				
Foreign currency derivatives	\$ 2.8	\$	\$ 2.8	\$

The fair values of insurance contracts are based upon the underlying values of the securities in which they are invested and are from quoted market prices from various stock and bond exchanges. The fair values of bonds and other long-term investments are based on quoted market prices from various stock and bond exchanges. The fair values for interest rate and foreign currency derivatives are based on quotations from various banks for similar instruments using models with market based inputs.

4. PENSION AND POSTRETIREMENT BENEFITS

The following table presents the components of our pension expense of the defined benefit plans for the three months ended May 31 (in millions):

	United States		International	
	2011	2010	2011	2010
Defined benefit plans				
Service cost	\$ 3.8	\$ 3.2	\$ 1.6	\$ 1.3
Interest costs	7.6	7.3	3.2	2.8
Expected return on plan assets	(8.5)	(8.0)	(4.0)	(3.4)
Amortization of prior service costs			.1	.1
Recognized net actuarial loss	3.3	3.0	.6	.3
Total pension expense	\$ 6.2	\$ 5.5	\$ 1.5	\$ 1.1

The following table presents the components of our pension expense of the defined benefit plans for the six months ended May 31 (in millions):

	United States		International	
	2011	2010	2011	2010
Defined benefit plans				
Service cost	\$ 7.6	\$ 6.4	\$ 3.1	\$ 2.7
Interest costs	15.1	14.6	6.3	5.7
Expected return on plan assets	(17.0)	(16.0)	(7.9)	(6.9)
Amortization of prior service costs			.2	.2
Recognized net actuarial loss	6.6	5.9	1.2	.7
Total pension expense	\$ 12.3	\$ 10.9	\$ 2.9	\$ 2.4

Edgar Filing: MCCORMICK & CO INC - Form 10-Q

During the six months ended May 31, 2011 and 2010, we made \$39.0 million and \$44.5 million, respectively, in total contributions to our pension plans. Total contributions to our pension plans in 2011 are expected to be approximately \$46 million. Total contributions to our pension plans in fiscal year 2010 were \$49.5 million.

Table of Contents

The following table presents the components of our other postretirement benefits expense (in millions):

	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Other postretirement benefits				
Service cost	\$ 0.8	\$ 1.3	\$ 1.9	\$ 2.5
Interest costs	1.1	1.2	2.2	2.5
Amortization of prior service costs	(1.5)	(1.2)	(3.0)	(2.7)
Amortization of losses and (gains)	0.1	0.2	0.4	0.6
Total other postretirement expense	\$ 0.5	\$ 1.5	\$ 1.5	\$ 2.9

5. STOCK-BASED COMPENSATION

The following table sets forth the stock-based compensation recorded in selling, general and administrative (SG&A) expense (in millions):

	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Stock-based compensation expense	\$ 5.5	\$ 5.5	\$ 7.6	\$ 7.5

Our 2011 annual grant of stock options and restricted stock units (RSU) occurred in the second quarter, similar to the 2010 annual grant. The weighted-average grant-date fair value of an option granted in 2011 was \$7.99 and in 2010 was \$6.88 under a lattice pricing model. The fair values of option grants in the stated periods were computed using the following range of assumptions for our various stock compensation plans:

	2011	2010
Risk-free interest rates	0.1 - 3.5%	0.2 - 3.8%
Dividend yield	2.4%	2.7%
Expected volatility	15.2 - 22.2%	20.4 - 24.2%
Expected lives	6.4	6.2

The following is a summary of all option activity for the six months ended May 31, 2011 and 2010:

(shares in millions)	2011		2010	
	Number of Shares	Weighted- Average Exercise Price	Number of Shares	Weighted- Average Exercise Price
Outstanding at beginning of period	7.4	\$ 32.01	11.3	\$ 29.45
Granted	0.9	47.40	1.0	38.39
Exercised	(1.0)	28.11	(2.1)	22.03
Cancelled			(0.1)	34.71
Outstanding at end of May 31,	7.3	34.62	10.1	31.77
Exercisable at end of May 31,	5.0	\$ 32.11	8.0	\$ 30.94

Table of Contents

As of May 31, 2011 the intrinsic value (the difference between the exercise price and the market price) for all options outstanding was \$113.5 million and for exercisable options was \$89.5 million. The total intrinsic value of all options exercised during the six months ended May 31, 2011 and 2010 was \$19.6 million and \$32.4 million, respectively.

The following is a summary of all of our RSU activity for the six months ended May 31, 2011 and 2010:

(shares in thousands)	2011		2010	
	Number of Shares	Weighted-Average Grant-Date Fair Value	Number of Shares	Weighted-Average Grant-Date Fair Value
Outstanding at beginning of period	289	\$ 35.42	353	\$ 32.40
Granted	134	\$ 47.40	176	\$ 38.36
Vested	(183)	\$ 34.03	(232)	\$ 33.17
Forfeited	(3)	\$ 37.20	(2)	\$ 28.26
Outstanding at end of February	237	\$ 43.24	295	\$ 35.36

6. INCOME TAXES

There were no significant changes to unrecognized tax benefits during the six months ended May 31, 2011 (which was \$20.7 million at November 30, 2010).

Income taxes for the three months ended May 31, 2011 did not include any discrete tax adjustments. Income taxes for the six months ended May 31, 2011 include \$0.8 million in discrete tax benefits for the adjustment of an estimate used in a prior year tax provision.

Income taxes for the three months and six months ended May 31, 2010 include \$2.9 million and \$4.7 million, respectively, in discrete tax benefits for the settlement of tax audits.

7. EARNINGS PER SHARE AND STOCK ISSUANCES

The following table sets forth the reconciliation of average shares outstanding (in millions):

	Six months			
	Three months ended May 31,		ended May 31,	
	2011	2010	2011	2010
Average shares outstanding basic	132.4	133.1	132.7	132.7
Effect of dilutive securities:				
Stock options, Restricted Stock Units (RSUs) and employee stock purchase plan	1.7	1.7	1.6	1.6
Average shares outstanding diluted	134.1	134.8	134.3	134.3

Table of Contents

The following table sets forth the stock options and RSUs for the three and six months ended May 31, 2011 and 2010 which were not considered in our earnings per share calculation since they were anti-dilutive.

	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Anti-dilutive securities	0.5	0.7	0.4	3.0

The following table sets forth the common stock activity for the three and six months ended May 31, 2011 and 2010 under the Company's stock option and employee stock purchase plans and the repurchases of common stock under its stock repurchase program (in millions):

	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Shares issued under stock option, employee stock purchase plans and RSUs	0.5	0.9	1.1	1.6
Shares repurchased in connection with the stock repurchase program	0.8	0.2	1.9	0.2

As of May 31, 2011, \$270 million remained of the \$400 million share repurchase authorization that was authorized by the Board of Directors in June 2010.

8. COMPREHENSIVE INCOME

The following table sets forth the components of comprehensive income (in millions):

	Three months		Six months	
	ended May 31,		ended May 31,	
	2011	2010	2011	2010
Net income	\$ 73.6	\$ 66.2	\$ 150.4	\$ 134.2
Other comprehensive income (loss), (net of tax):				
Pension and other postretirement costs, net of tax	1.3	3.2	1.0	7.1
Foreign currency translation adjustments	47.0	(93.1)	115.5	(193.9)
Derivative financial instruments, net of tax		0.2	(0.4)	1.0
Comprehensive income (loss)	\$ 121.9	\$ (23.5)	\$ 266.5	\$ (51.6)

The other comprehensive income (loss) amounts in the table above are net of tax expense of \$0.8 million and \$1.2 million for the three months ended May 31, 2011 and 2010, respectively, and net of tax expense of \$1.6 million and \$2.5 million for the six months ended May 31, 2011 and 2010, respectively.

Table of Contents

The following table sets forth the components of accumulated other comprehensive income, net of tax where applicable (in millions):

	May 31, 2011	May 31, 2010	November 30, 2010
Foreign currency translation adjustment	\$ 300.2	\$ 99.4	\$ 184.7
Unrealized gain (loss) on foreign currency exchange contracts	(1.2)	0.4	(0.7)
Unamortized value of interest rate contracts	(5.8)	(6.0)	(5.9)
Pension and other postretirement costs	(180.8)	(170.5)	(181.8)
Accumulated other comprehensive income	\$ 112.4	\$ (76.7)	\$ (3.7)

9. BUSINESS SEGMENTS

We operate in two business segments: consumer and industrial. The consumer and industrial segments manufacture, market and distribute spices, seasoning mixes, condiments and other flavorful products throughout the world. Our consumer segment sells to retail outlets, including grocery, mass merchandise, warehouse clubs, discount and drug stores under the McCormick brand and a variety of brands around the world, including Lawry's, Zatarain's, Simply Asia, Thai Kitchen, Old Bay, El Guapo, Ducros, Vahine, Silvo, Schwartz, Club House, and Aeroplano. Our industrial segment sells to food manufacturers and the foodservice industry both directly and indirectly through distributors.

In each of our segments, we produce and sell many individual products which are similar in composition and nature. With their primary attribute being to provide flavor, we regard the products within each of our segments to be fairly homogenous. It is impracticable to segregate and identify sales and profits for each of these individual product lines.

We measure segment performance based on operating income. Although the segments are managed separately due to their distinct distribution channels and marketing strategies, manufacturing and warehousing are often integrated to maximize cost efficiencies. We do not segregate jointly utilized assets by individual segment for internal reporting, evaluating performance or allocating capital. Because of manufacturing integration for certain products within the segments, products are not sold from one segment to another but rather inventory is transferred at cost. Intersegment sales are not material.

	Consumer	Industrial (in millions)	Total

10. SUBSEQUENT EVENTS

In June 2011, we signed an agreement to enter into a joint venture with Kohinoor Foods Ltd. in India. Kohinoor is a leading national brand of basmati rice as well as other convenience food products. We expect to invest \$115 million for an 85% interest in the joint venture, Kohinoor Speciality Foods India Private Limited. This will be a consumer business consolidated joint venture with projected annual net sales of approximately \$85 million and will market and sell branded basmati rice and other food products in India. The completion of the agreement is expected to occur by the end of the third quarter of 2011 subject to regulatory and other approvals in India.

In June 2011, we also signed an agreement to purchase the shares of Kamis, a brand leader of spices, seasonings and mustards in Poland for approximately \$291 million. Kamis is a privately held company based in Poland with distribution into Poland, Russia and other parts of Central and Eastern Europe and its annual net sales are approximately \$105 million. The acquisition is expected to be completed by the end of the third quarter of 2011, subject to regulatory approval, and will be included in our consumer business segment.

In June we entered into a new five year \$600 million revolving credit facility. The new facility expires in June 2016 and replaces our existing \$500 million revolving credit facility, which was due to expire in July 2012. The interest rate under this new credit facility, on a fully drawn basis, is LIBOR plus 0.875%. This credit facility supports our commercial paper program.

Table of Contents

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OVERVIEW

Our Business

We are a global leader in flavor, with the manufacturing, marketing and distribution of spices, seasonings mixes, condiments and other flavorful products to the entire food industry – retail outlets, food manufacturers and food service businesses. Our major sales, distribution and production facilities are located in North America and Europe. Additional facilities are based in Mexico, Central America, Australia, China, Singapore, Thailand and South Africa. Annually, approximately 40% of our sales have been outside of the United States.

We operate in two business segments, consumer and industrial. Consistent with market conditions in each segment, our consumer business has a higher overall profit margin than our industrial business. In 2010, the consumer business contributed 60% of sales and 79% of operating income and the industrial business contributed 40% of sales and 21% of operating income. Across both segments, we have the customer base and product breadth to participate in all types of eating occasions, whether it is cooking at home, dining out, purchasing a quick service meal or enjoying a snack. We offer consumers a range of products from premium to value-priced.

Our Strategy

Our strategy is straightforward – to increase sales and profits by investing in the business and to fund these investments with improved margins. This simple strategy has been driving our success for more than a decade and is our plan for growth in the future.

Improving Margins – We are improving margins with cost savings related to our Comprehensive Continuous Improvement (CCI) program. With CCI, each business unit develops cost reduction opportunities and sets specific goals. Our projects fall into the areas of cost optimization, cost avoidance and productivity that include streamlining processes. However the only amounts we report are actual cost reductions where costs have decreased from the prior year. In 2011 CCI-related cost savings are projected to be at least \$45 million (an increase of \$5 million from our first quarter 2011 estimate), with a large portion impacting our cost of goods sold. We are also improving margins with our acquisition of strong consumer brands and introduction of more value-added industrial products.

While we continue to experience an environment of volatile costs for many raw and packaging materials, in recent years we have offset this impact with a combination of pricing and cost savings initiatives.

Investing in the Business – We are investing in our consumer business with new products, new packaging and greater marketing support. In 2010, we increased brand marketing by \$21 million, or 14%, to support the launch of Recipe Inspirations, Perfect Pinch and other new products. We have planned further increases in brand marketing support in 2011 in line with our sales growth.

Table of Contents

As a global leader in flavor, McCormick brings innovative ideas to consumers and to industrial customers. Our 2011 new products for our consumer business include grilling, grinders and salad toppings in the U.S., Flavourful seasoning blends in Canada, new Flavourful varieties in the U.K. and in France, Ducros seasoning blends, organic spices and herbs, grinders and new Vahine dessert items. We are achieving further growth by introducing our most successful new products in other regions. Examples include the introduction of slow cookers into the U.K.,

Recipe Inspirations in Canada and Thai Chili Sauce in markets outside of China. Many of the new products currently being developed provide convenience, authentic ethnic flavors, a healthy profile and great taste. Industrial customers are particularly interested in more natural flavor solutions that utilize our expertise in spices and herbs. We founded the McCormick Science Institute in 2007 to advance the health benefits of spices and herbs.

Through acquisitions we are adding leading brands to extend our reach into new geographic regions where we currently have little or no distribution. We have a particular interest in emerging markets that offer high growth potential, such as India and China (see Note #10 for a discussion of our latest joint venture in India and our acquisition in Poland agreed to in June 2011). In our developed markets, we are seeking consumer brands that have a defensible market position and meet a growing consumer trend.

Increasing Sales and Profits Our long-term goals are to grow sales 4 to 6% and increase earnings per share 9 to 11% on an annual basis. Long-term, we expect to achieve mid-single digit sales growth with one-third from category growth, share gains and new distribution, one-third from product innovation and one-third from acquisitions. We are projecting 6 to 8% sales growth in local currency for 2011 which includes our pricing actions in response to higher material costs and increases in volume and product mix, along with acquisitions and joint ventures. Also in 2011, we expect to achieve earnings per share of \$2.74 to \$2.79, which includes \$2 million of acquisition related costs recorded in the second quarter of 2011 and another \$7 million which we expect to record in the third quarter of 2011. Profit from these acquisitions will be minimal in 2011 due to integration costs and initial investments in growth, but is expected to be \$0.07 to \$0.09 accretive to diluted earnings per share in 2012. Our 2011 earnings per share rate of growth is below our long-term objective for the business because of acquisition-related costs to be incurred in 2011 and items that favorably affected our 2010 tax rate, causing a significant increase in our expected 2011 tax rate when compared to 2010. In addition to increased sales and profit, our business generates strong cash flow (we generated \$388 million in cash flow from operations in 2010). Long-term, we expect higher cash flow and more efficient asset utilization as we grow net income and achieve further reductions in our working capital. We also have increased shareholder return with consistent dividend payments. We have paid dividends every year since 1925 and increased the dividend in each of the past 25 years.

Table of Contents

RESULTS OF OPERATIONS COMPANY

(in millions)	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Net sales	\$ 883.7	\$ 798.3	\$ 1,666.5	\$ 1,562.8
Percent increase	10.7%		6.6%	
Gross profit	\$ 350.7	\$ 326.7	\$ 678.9	\$ 636.9
Gross profit margin	39.7%	40.9%	40.7%	40.8%

The sales increase of 10.7% for the second quarter includes a 2.9% favorable impact from foreign currency exchange rates. Excluding the foreign currency impact, we grew sales 7.8%. Pricing actions, taken in response to increased raw and packaging material costs, added 4.8% to sales, while favorable volume and product mix drove a 3.0% increase. Our consumer business sales rose 10.2%, which included 2.9% from favorable foreign exchange rates. For this business segment, both higher pricing and increased volume and product mix added to sales. We grew volume and product mix through product introductions, brand marketing support and new distribution in a number of countries including the U.S., Canada, France and China. For our industrial business, sales rose 11.3%, which included 3.0% from favorable foreign exchange rates. Volume and product mix added 4.6%, while higher pricing increased sales by 3.7%. Customer demand for our industrial products, including new items, rose in each of our three geographic regions.

Gross profit for the second quarter of the year increased by 7.3% over the comparable period from last year, while our gross profit margin declined by 120 basis points. In the second half of 2010 we experienced increases in raw material and packaging costs. This higher level of costs has continued into the first half of 2011 and we expect it to persist through 2011. At the end of 2010 and into the first six months of 2011, we have implemented price increases to partially offset these cost increases with the remainder to be offset by CCI savings. We believe raw materials and packaging costs will increase by more than our initial estimate of 7 to 8% in the second half of 2011. In the first quarter, we had some lower cost inventory in the system and did not experience the full effect of higher material costs. In the second quarter, a greater impact of higher material and packaging costs had worked their way into our cost of goods sold. While we were able to fully offset the dollar impact of these costs with our pricing actions and CCI cost savings, the net impact of these factors caused some downward pressure on gross profit as a percentage of net sales. While we expect to achieve at least \$45 million of cost savings from CCI in 2011 (which is an increase

Table of Contents

from our initial projection last quarter of at least \$40 million), material costs are expected to also continue to increase. As a result, we expect gross profit margin in the second half of 2011 to be below that of the prior year period.

(in millions)	Three months		Six months	
	ended May 31,		ended May 31,	
	2011	2010	2011	2010
Selling, general & administrative expense (SG&A)	\$ 241.4	\$ 229.2	\$ 459.0	\$ 438.5
Percent of net sales	27.3%	28.7%	27.5%	28.1%

The decrease in SG&A as a percent of net sales is primarily driven by lower selling costs as a percentage of net sales as well as a slight decline in brand marketing support. With just a slight decrease in 2011 for our marketing support spending, we essentially maintained the higher level of marketing set in 2010 when we reported an 18% increase from the year-ago period. Last year, much of our marketing support increase was directed toward the launch of Recipe Inspirations and Perfect Pinch in the U.S. This year, incremental marketing support has been behind Zatarain's and Hispanic products in the U.S., as well as social media activity in a number of markets. In the third quarter of 2011, we are planning to invest further in our brands with at least \$6 million of incremental marketing, which includes an emphasis on brand value, a U.S. campaign behind Hispanic products and advertising for the Zatarain's brand. On a full year basis, we expect our marketing support costs to rise in line with our expected net sales increase.

(in millions)	Three months		Six months	
	ended May 31,		ended May 31,	
	2011	2010	2011	2010
Interest expense	\$ 12.3	\$ 12.3	\$ 24.5	\$ 24.6
Other income, net	0.9		1.4	0.4

Interest expense for the second quarter of 2011 was even with that of the prior year. The benefit from slightly lower average debt balances in 2011 compared to 2010 was mostly offset by the impact of slightly higher interest rates for 2011 compared to 2010.

(in millions)	Three months		Six months	
	ended May 31,		ended May 31,	
	2011	2010	2011	2010
Income from consolidated operations before income taxes	\$ 97.9	\$ 85.2	\$ 196.8	\$ 174.2
Income taxes	30.4	25.7	60.4	53.1
Effective tax rate	31.1%	30.2%	30.7%	30.5%

Table of Contents

Income taxes for the three months ended May 31, 2011 did not include any discrete tax adjustments. The effective tax rate for the six months ended May 31, 2011 includes \$0.8 million in discrete tax benefits for the adjustment of an estimate used in a prior year tax provision. The effective tax rate for the three months and six months ended May 31, 2010 includes \$2.9 million and \$4.7 million, respectively, in discrete tax benefits for the settlement of tax audits. The increase in the effective tax rate for the first six months of 2011 as compared to the same period for 2010 results from a reduction in the amount of discrete tax benefits. We are projecting a tax rate of approximately 31% for 2011.

(in millions)	Three months		Six months	
	ended May 31, 2011	2010	ended May 31, 2011	2010
Income from unconsolidated operations	\$ 6.1	\$ 6.7	\$ 14.0	\$ 13.1

Income from unconsolidated operations for the second quarter 2011 decreased \$0.6 million compared to the same period in 2010. The primary reason for the decline was the impact of higher soybean oil on our joint venture in Mexico, where mayonnaise is a leading item. The other fundamentals of our joint ventures indicate a strong performance, including aggregate sales growth of 24%, of which about half is due to the incremental impact from our Eastern Condiments joint venture in India, which was completed late in fiscal year 2010. For the six months ended May 31, 2011, the increase of \$0.9 million in income from unconsolidated operations is attributable to Eastern Condiments. For the full year 2011, we expect income from unconsolidated operations to be slightly lower than full year 2010. As we enter into the second half of 2011, we expect greater pressure on earnings at our joint venture in Mexico from higher costs for soybean oil and other key materials.

The following table outlines the major components of the change in diluted earnings per share from 2010 to 2011:

	Three months ended May 31,	Six months ended May 31,
2010 Earnings per share diluted	\$ 0.49	\$ 1.00
Higher operating income	.06	.11
Higher unconsolidated income		.01
2011 Earnings per share diluted	\$ 0.55	\$ 1.12

We expect to report approximately \$9 million in acquisition related costs related to our Kohinoor and Kamis transactions (see Note #10 for details), which would lower EPS by \$0.06. We have recorded \$2 million of these costs in our second quarter of 2011. We expect to complete these transactions by the end of the third quarter of 2011 and, in that period, to record another \$7 million in costs. Profit from these businesses is expected to be minimal in 2011 due to integration costs and initial investments in growth, but is expected to be \$0.07 to \$0.09 accretive to diluted earnings per share in 2012.

Table of Contents

RESULTS OF OPERATIONS SEGMENTS

CONSUMER BUSINESS

(in millions)	Three months		Six months	
	ended May 31,		ended May 31,	
	2011	2010	2011	2010
Net sales	\$ 499.0	\$ 452.7	\$ 953.1	\$ 906.2
Percent growth	10.2%		5.2%	
Operating income	77.0	68.2	163.9	148.0
Operating income margin	15.4%	15.1%	17.2%	16.3%

The 10.2% increase in sales in the second quarter of 2011 as compared to the second quarter of 2010 included a favorable impact of 2.9% from foreign currency rates. Excluding the foreign currency impact, we grew sales 7.3%, with increased pricing of 5.6% and favorable volume and product mix of 1.7%.

In the Americas, sales increased 9.4% in the second quarter of 2011, compared to the second quarter of 2010, including a 0.8% increase due to favorable foreign exchange rates. Excluding the foreign exchange impact, we grew sales 8.6%. Our pricing drove a large portion of this increase, although we also grew volume and product mix by 2.0% in the quarter. This increase was led by authentic regional cuisine in the U.S. and dry seasoning mixes and Billy Bee honey in Canada. Unit sales of Zatarain's branded products rose 16% as a result of distribution gains for frozen products and incremental marketing behind the brand. We grew net sales of Hispanic items in the U.S. at a double-digit pace through our direct store delivery system in western U.S. markets, increased advertising and our launch of a Spanish language consumer website to connect with consumers through recipes and other features. For many of our other products, we have seen some initial consumer reaction to higher prices, with some further share gains by private label and a channel shift to non-grocery retailers. We are responding to this environment, by analyzing and adjusting our promotional activities, launching differentiated new products and ensuring we have good distribution of our products, both brand and private label, in all channels.

Second quarter 2011 sales in EMEA increased 10.3% compared to the second quarter of 2010, including a favorable impact of 8.2% from foreign exchange rates. The impact from higher pricing of 3.7% was partially offset by the 1.6% reduction from lower volume and product mix. The lower volume and product mix was an improvement from a 5.6% decline experienced during the first quarter of this year. Our second quarter results for EMEA were mixed. Sales of our Ducros and Vahine brands in France benefited from new product

Table of Contents

introductions and product distribution. Increases in developing markets related primarily to distribution gains. In the U.K. and The Netherlands we experienced volume and product mix declines. In these countries, consumers remain under pressure and a competitive retail environment has led to aggressive actions with private label items in many categories. As we noted in the first quarter, we are addressing this situation by redirecting a portion of brand marketing support to emphasize the value of our products, accelerating new product activity to differentiate from private label and improving our in-store merchandising.

In the Asia/Pacific region, sales increased 22.5% in the second quarter of 2011, compared to the second quarter of 2010, with a 9.8% increase coming from favorable foreign exchange rates. Excluding the foreign currency impact, we grew sales 12.7% with 12.3% coming from higher volume and product mix and pricing adding 0.4%. This result was led by China, where we grew sales volume and product mix with our efforts to introduce new products and expand distribution geographically and into additional retail channels. This pace of growth in China is on top of a double-digit sales increase in the second quarter of 2010.

For the six months ended May 31, 2011, the total consumer business sales increase of 5.2% includes 0.9% from favorable foreign exchange rates. The remaining 4.3% increase was driven by pricing actions.

Second quarter 2011 operating income for our consumer business increased \$8.8 million, or 12.9%, compared to the second quarter of 2010. This increase exceeded the increase in sales due mainly to additional CCI-related cost savings in 2011. In the second quarter of 2010 we increased our brand marketing by 18% to support the launch of Recipe Inspirations and Perfect Pinch in the U.S. In 2011, we have maintained nearly this same level of spending with incremental marketing support behind Zatarain's and Hispanic products in the U.S., as well as social media activity in a number of markets.

For the six months ended May 31, 2011, consumer business operating income increased by 10.7% compared to the same period of 2010. The growth in operating income was the result of higher sales, cost savings from CCI and \$1.3 million of costs associated with a product recall recorded in 2010.

INDUSTRIAL BUSINESS

(in millions)	Three months ended May 31,		Six months ended May 31,	
	2011	2010	2011	2010
Net sales	\$ 384.7	\$ 345.6	\$ 713.4	\$ 656.6
Percent increase	11.3%		8.7%	
Operating income	32.3	29.3	56.0	50.4
Operating income margin	8.4%	8.5%	7.8%	7.7%

Table of Contents

The second quarter sales increase of 11.3% from the second quarter of 2010 includes a favorable foreign exchange rate impact of 3.0%. Excluding this impact of foreign currency, sales increased 8.3%. Volume and product mix increased sales by 4.6%, while higher pricing added 3.7% to sales. We saw increases in volume and product mix in all three of our geographic regions, as well as higher pricing. We expect the higher pricing to continue into the second half of 2011 as we pass through higher material costs to our industrial customers.

In the Americas, sales increased 9.4%, which included a favorable impact of 1.2% from foreign currency rates. Higher volume and product mix was driven by new products and increased demand by food manufacturers for snack seasonings, cereal flavors and other products. We have a robust pipeline of new products that include simple ingredients, a healthier profile, and ethnic flavors. Sales to the food service industry were comparable to the second quarter of 2010. We had stronger sale to quick service restaurants that included new products and expanded distribution, but saw some weakness this quarter in the sale of branded foodservice items.

Our industrial business in EMEA posted another quarter of strong sales growth. EMEA industrial sales increased 13.0% for the second quarter of 2011 compared to the same period for 2010, and increased 7.0% excluding the impact from favorable foreign exchange rates. Higher volume and product mix drove this increase, accounting for 3.9%, while increased pricing actions added 3.1% to sales. Demand from quick service restaurants continues to be the key sales driver in this region. We saw particular strength in the sales of products that we manufacture in our facilities in Turkey and South Africa. As a result, we have increased production capacity in our consolidated industrial joint venture in Turkey by 26%.

In the Asia/Pacific region, industrial sales increased 21.0% in the second quarter of 2011 compared to the second quarter of 2010, which included a favorable foreign exchange rate impact of 9.5%. Excluding this impact of foreign currency, sales rose 11.5%. This increase builds on a 13.0% increase in the second quarter of 2010. It is also a sequential turnaround from the first quarter of 2011 when sales were affected by the emphasis on certain menu items by our quick service restaurant customers. This quarter we benefitted from some new products for these customers along with support for their business-building activity in India.

For the six months ended May 31, 2011, the total industrial business sales increase of 8.7% includes 2.2% from favorable foreign exchange rates. The remaining 6.5% was mainly driven by favorable volumes and product mix of 3.7%, while higher pricing added 2.8%.

Table of Contents

Second quarter 2011 operating income for our industrial business increased \$3.0 million, or 10.2%, compared to the second quarter of 2010. This increase was driven by higher sales and CCI cost savings. We were able to improve our operating profit margins through CCI and a shift in mix toward more value-added products and achieved an 8.4% margin in the second quarter. We achieved this return despite the downward pressure on gross profit margins that is created by our pricing protocol in an inflationary environment, where we adjust prices dollar for dollar to reflect changes in material costs.

For the six months ended May 31, 2011, industrial business operating income increased by 11.1% compared to the same period of 2010. The growth in operating income was mostly the result of higher sales and cost savings from CCI. Cost of goods sold in 2010 also includes \$4.4 million of costs associated with a product recall recorded in 2010.

MARKET RISK SENSITIVITY**Foreign Exchange Risk**

We utilize foreign currency exchange contracts to enhance our ability to manage foreign currency exchange risk. We do not enter into contracts for trading purposes, nor are we a party to any leveraged derivative instrument and all derivatives are designated as hedges.

The following table sets forth the notional values and unrealized gain or (loss) of the portfolio of our forward foreign currency contracts (in millions):

	May 31, 2011	May 31, 2010	November 30, 2010
Notional value	\$ 225.5	\$ 269.9	\$ 208.2
Unrealized gain (loss)	0.8	2.4	(2.6)

The quarterly fluctuation in notional value is a result of our decisions on foreign currency exposure coverage, based on our foreign currency exposures.

Interest Rate Risk

We manage our interest rate exposure by entering into both fixed and variable rate debt arrangements. In addition, we use interest rate swaps to minimize worldwide financing costs and to achieve a desired mix of fixed and variable rate debt. We do not enter into contracts for trading purposes, nor are we a party to any leveraged derivative instrument and all derivatives are designated as hedges. As of May 31, 2011, we had a total of \$100 million, notional value, of interest rate swap contracts outstanding. The fair value of our interest rate swaps was a \$17.7 million gain as

Table of Contents

of May 31, 2011, compared to a \$19.2 million gain as of November 30, 2010. The change in fair values is due to changes in interest rates.

In May 2011, we entered into \$150 million of forward U.S. Treasury rate lock agreements to manage the U.S. Treasury portion of our interest rate risk associated with the anticipated issuance of at least \$150 million of fixed rate medium-term notes in 2011. We intend to cash settle these agreements upon issuance of the medium-term notes thereby effectively locking in the U.S. Treasury fixed interest rate in effect at the time the agreements were initiated. The U.S. Treasury locked weighted average fixed rate of these agreements is 3.18%. We have designated these outstanding forward U.S. Treasury rate lock agreements, which expire on July 22, 2011, as cash flow hedges. The gain or loss on these agreements is deferred in other comprehensive income and will be amortized over the life of the medium-term notes as a component of interest expense. Hedge ineffectiveness of these agreements was not material in the quarter.

Commodity Risk

We purchase certain raw materials which are subject to price volatility caused by weather, market conditions, growing and harvesting conditions, governmental actions and other factors beyond our control. Our most significant raw materials are dairy products, pepper, capsicums (red peppers and paprika), onion, wheat, soybean oil and garlic. While future movements of raw material costs are uncertain, we respond to this volatility in a number of ways, including strategic raw material purchases, purchases of raw material for future delivery and customer price adjustments. We have not used derivatives to manage the volatility related to this risk.

Credit Risk

The customers of our consumer business are predominantly food retailers and food wholesalers. Consolidations in these industries have created larger customers, some of which are highly leveraged. In addition, competition has increased with the growth in alternative channels including mass merchandisers, dollar stores, warehouse clubs and discount chains. This has caused some customers to be less profitable and increased our exposure to credit risk. Current credit markets are volatile and some of our customers and counterparties are highly leveraged. We continue to closely monitor the credit worthiness of our customers and counterparties. We feel that our allowance for doubtful accounts properly recognizes trade receivables at net realizable value. We consider nonperformance credit risk for other financial instruments to be insignificant.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

As of May 31, 2011, there have been no material changes in our contractual obligations and commercial commitments outside the ordinary course of business since November 30, 2010.

Table of Contents

LIQUIDITY AND FINANCIAL CONDITION

	Three months ended May 31,	
	2011	2010
	(in millions)	
Net cash provided by operating activities	\$ 36.3	\$ 65.2
Net cash used in investing activities	(33.1)	(32.2)
Net cash used in financing activities	(22.4)	(31.8)

In the statement of cash flows, the changes in operating assets and liabilities are presented excluding the translation effects of changes in foreign currency exchange rates, as these do not reflect actual cash flows. Accordingly, the amounts in the statement of cash flows do not agree with changes in the operating assets and liabilities that are presented in the balance sheet.

Due to the cyclical nature of the business, we generate much of our cash flow in the fourth quarter of the fiscal year.

Operating Cash Flow - Cash from operations is typically lower in the first and second quarters and then builds in the third and fourth quarters of our fiscal year. Higher net income added \$16.2 million to operating cash flow for the first half of 2011, however the decline in operating cash flow is driven by a higher level of inventory in 2011 as compared to last year. This increase is driven in part by higher material costs (including packaging costs) and inventory positions. As we disclosed last quarter, in response to world events and potential supply issues, we are currently holding certain positions of spices and herbs to assure a steady supply of high quality products for our customers. We are currently implementing a new inventory management process in North America which is expected to improve inventory levels. The unfavorable impact of inventories was partially offset by higher collections of trade accounts receivable in the first half of 2011 as compared to the first half of 2010.

Investing Cash Flow - The increase in cash outflow used for investing is due to the fact that we spent more in capital expenditures in 2011 as compared to 2010. We spent \$33.4 million on capital expenditures in the first six months of 2011, compared to \$32.4 million for the same period last year. Capital expenditures for the fiscal year 2011 are expected to be \$90 to \$100 million.

Table of Contents

Financing Cash Flow - The change in cash flow used in financing activities when compared to the prior year is primarily due to an increase in net borrowings. In the first six months of 2011, we increased short-term borrowings by \$107.9 million to fund investing cash requirements and to repurchase our common stock. In the first six months of 2010, we increased short-term borrowings by \$28.1 million to fund investing cash requirements.

The following table outlines the activity in our share repurchase program for the six months ended May 31 (in millions):

	2011	2010
Number of shares of common stock	1.9	0.2
Dollar amount	\$ 89.2	\$ 6.4

As of May 31, 2011, \$270 million remained of the \$400 million share repurchase authorization.

During the six months ended May 31, 2011, we received proceeds of \$31.1 million from exercised options compared to \$29.7 million in the same period in the prior year. We increased dividends paid to \$74.3 million for the six months ended May 31, 2011 compared to \$69.0 million in the same period last year. Dividends paid in the first quarter of 2011 were declared on November 23, 2010.

Our ratio of debt-to-total capital (total capital includes debt and total shareholders' equity) was 37.6% as of May 31, 2011, down from 43.8% at May 31, 2010 and equal to our ratio at November 30, 2010. The decrease in debt-to-total capital at May 31, 2011 as compared to May 31, 2010 is primarily due to an increase in total stockholders' equity.

Most of our cash is denominated in foreign currencies. We manage our worldwide cash requirements by considering available funds among the many subsidiaries through which we conduct our business and the cost effectiveness with which those funds can be accessed. The permanent repatriation of cash balances from certain of our subsidiaries could have adverse tax consequences; however, those balances are generally available without legal restrictions to fund ordinary business operations, capital projects and any possible future acquisitions. At quarter-end May 31, 2011, we temporarily used \$234.0 million of cash from our foreign subsidiaries to pay down short-term debt. At quarter-end May 31, 2010, we temporarily used \$293.5 million of cash from our foreign subsidiaries to pay down short-term debt. During a quarter, our short-term borrowings vary, but are lower at the end of a quarter. The average short-term borrowings outstanding for the three months ended May 31, 2011 and 2010 were \$318.2 million and \$370.0 million, respectively. Total average debt outstanding for the three months ended May 31, 2011 and 2010 was \$1,173.2 million and \$1,236.8 million, respectively.

Table of Contents

The reported values of our assets and liabilities are significantly affected by fluctuations in foreign exchange rates between periods. At May 31, 2011, the exchange rates for the Euro, the British pound sterling, the Canadian dollar and Australian dollar were higher than the same period last year. Exchange rate fluctuations resulted in an increase in accounts receivable of approximately \$27 million, inventory of approximately \$22 million, goodwill of approximately \$100 million and other comprehensive income of approximately \$201 million since May 31, 2010. At May 31, 2011, the exchange rates for the Euro, the British pound sterling the Canadian dollar and Australian dollar were higher than at November 30, 2010. Exchange rate fluctuations resulted in increases in accounts receivable of approximately \$17 million, inventory of approximately \$13 million, goodwill of approximately \$63 million and other comprehensive income of approximately \$115 million since November 30, 2010.

Credit and Capital Markets

Credit market conditions were volatile during 2008 and 2009 but have improved during 2010 and 2011.

Cash flows from operating activities are our primary source of liquidity for funding growth, dividends, capital expenditures and share repurchases. We also rely on our revolving credit facilities, or borrowings backed by these facilities, to fund seasonal working capital needs and other general corporate requirements. We generally use these facilities to support our issuance of commercial paper. If the commercial paper market is not available or viable we could borrow directly under our revolving credit facilities. The facilities are made available by syndicates of banks, with various commitments per bank. If any of the banks in these syndicates are unable to perform on their commitments, our liquidity could be impacted, which would reduce our ability to grow through funding of seasonal working capital.

We engage in regular communication with all of the banks participating in our revolving credit facilities. During these communications none of the banks have indicated that they may be unable to perform on their commitments. In addition, we periodically review our banking and financing relationships, considering the stability of the institutions, pricing we receive on services, and other aspects of the relationships. Based on these communications and our monitoring activities, we believe the likelihood of one of our banks not performing on its commitment is remote.

In June we entered into a new five year \$600 million revolving credit facility. The new facility expires in June 2016 and replaces our existing \$500 million revolving credit facility, which was due to expire in July 2012. The interest rate under this new credit facility, on a fully drawn basis, is LIBOR plus 0.875%. This credit facility supports our commercial paper program.

Table of Contents

We hold investments in equity and debt securities in both our qualified defined benefit pension plans and through a rabbi trust for our nonqualified defined benefit pension plan. We estimate that total contributions to our pension plans in 2011 are expected to be approximately \$46 million, which compares to \$49.5 million of contributions in 2010. Future increases or decreases in pension liabilities and required cash contributions are highly dependent on changes in interest rates and the actual return on plan assets.

We believe that internally generated funds, the existing sources of liquidity under our credit facilities and the ability to access debt markets are sufficient to meet current liquidity needs and fund ongoing operations.

ACCOUNTING AND DISCLOSURE CHANGES

New accounting pronouncements are issued periodically that affect our current and future operations. See Note 1 of the financial statements for further details of these impacts.

FORWARD-LOOKING INFORMATION

Certain statements contained in this report are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, including those related to: the expected results of operations of businesses acquired by us, the expected impact of the prices of raw materials on our results of operations and gross margins, the expected productivity and working capital improvements, expected trends in net sales and earnings performance and other financial measures, the expectations of pension and postretirement plan contributions, the holding period and market risks associated with financial instruments, the impact of foreign exchange fluctuations, the adequacy of internally generated funds and existing sources of liquidity, such as the availability of bank financing and our ability to issue additional debt or equity securities, and our expectations regarding purchasing shares of our Common Stock under the existing authorizations. Forward-looking statements are based on management's current views and assumptions and involve risks and uncertainties that could significantly affect expected results. Results may be materially affected by external factors such as: damage to our reputation or brand name, business interruptions due to natural disasters or similar unexpected events, actions of competitors, customer relationships and financial condition, the ability to achieve expected cost savings and margin improvements, the successful acquisition and integration of new businesses, fluctuations in the cost and availability of raw and packaging materials, and global economic conditions generally which would include the availability of financing, interest and inflation rates as well as foreign currency fluctuations, and other risks described in the our Form 10-K for the fiscal year ended November 30, 2010. Actual results could differ materially from those

Table of Contents

projected in the forward-looking statements. We undertake no obligation to update or revise publicly, any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding our exposure to certain market risks, see "Market Risk Sensitivity" in the Management's Discussion and Analysis of Financial Condition and Results of Operations above and Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K for the year ended November 30, 2010. Except as described in Management's Discussion and Analysis of Financial Condition and Results of Operations above, there have been no significant changes in our financial instrument portfolio or market risk exposures since our November 30, 2010 fiscal year end.

ITEM 4 CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

No change occurred in our internal control over financial reporting (as defined in Rule 13a-15(f)) during our last fiscal quarter which was identified in connection with the evaluation required by Rule 13a-15(a) as materially affecting, or reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There are no material pending legal proceedings in which the Registrant or any of its subsidiaries is a party or in which any of their property is the subject.

ITEM 1A. RISK FACTORS

There have been no material changes in our risk factors from those disclosed in Part I, Item 1A to our Annual Report on Form 10-K for the fiscal year ended November 30, 2010.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

The following table summarizes our purchases of Common Stock (CS) and Common Stock Non-Voting (CSNV) during the second quarter of 2011:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased		Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
March 1, 2011 to March 31, 2011	CS	27,000	\$ 47.99	27,000	\$ 289 million
	CSNV	371,778	\$ 48.31	371,778	
April 1, 2011 to April 30, 2011	CS	900	\$ 47.68	900	\$ 273 million
	CSNV	333,400	\$ 47.74	333,400	
May 1, 2011 to May 31, 2011	CS	23,737	\$ 50.21	23,737	\$ 270 million
	CSNV	50,000	\$ 49.33	50,000	
Total	CS	51,637	\$ 49.01	51,637	\$ 270 million
	CSNV	755,178	\$ 48.13	755,178	

As of May 31, 2011, \$270 million remained of a \$400 million share repurchase authorization approved by the Board of Directors in June 2010.
