Item 1 Reports to Stockholders

11

Aberdeen Asia Pacific Income Fund, Inc.

Semi-Annual Report

April 30, 2011

Invests primarily in Australian and Asian debt securities.

Letter to Shareholders (unaudited)

June 8, 2011

Dear Shareholder,

We present this Semi-Annual Report which covers the activities of Aberdeen Asia-Pacific Income Fund, Inc. (the Fund) for the six months ended April 30, 2011. The Fund's investment objective is to seek current income. The Fund may also achieve incidental capital appreciation.

Net Asset Value Performance

The Fund's total return based on net asset value (NAV) was 9.93% for the six months ended April 30, 2011 and 9.80% per annum since inception, assuming the reinvestment of distributions.

Share Price Performance

The Fund's share price increased by 6.4% over the six month period, from \$6.90 on October 31, 2010 to \$7.34 on April 30, 2011. The Fund's share price on April 30, 2011 represented a discount of 5.3% to the NAV per share of \$7.75 on that date, compared with a discount of 5.1% to the NAV per share of \$7.27 on October 31, 2010. At the date of this letter, the share price was \$7.16 representing a discount of 5.4% to the NAV per share of \$7.57.

Portfolio Allocation

As of April 30, 2011, the Fund held 44.2% of its total investments in Australian debt securities, 51.5% in Asian debt securities, 2.8% in European debt securities, 1.4% in U.S. debt securities and 0.1% in Canadian debt securities.

Of the Fund's total investments, 33.7% were held in U.S. Dollar denominated bonds issued by foreign issuers, bringing the Fund's U.S. Dollar exposure to 34.1%. The rest of the Fund's currency exposure was 47.3% in the Australian Dollar and 18.6% in various Asian currencies.

Credit Quality

As of April 30, 2011, 67.3% of the Fund's portfolio was invested in securities where either the issue or the issuer was rated A or better by the Standard & Poor's Corporation or Moody's Investors Services, Inc., or judged by Aberdeen Asset Management Asia Limited (the Investment Manager) to be of equivalent quality.

Distributions

Distributions to common shareholders for the twelve months ended April 30, 2011 totaled \$0.42 per share. Based on the share price of \$7.34 on April 30, 2011, the distribution rate over the twelve months ended was 5.7%. Since all distributions are paid after deducting applicable withholding taxes, the effective distribution rate may be higher for those U.S. investors who are able to claim a tax credit.

On June 7, 2011, the Board of Directors of the Fund (the Board) authorized a monthly distribution of \$0.035 per share, payable on July 15, 2011 to common shareholders of record as of June 30, 2011.

The Fund's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent the Fund does not generate earnings from dividends, interest and net realized capital gains equal to or in excess of the aggregate distributions paid by the Fund, paid-in capital, which is a non-taxable return of capital. It is the Board's intention that a monthly distribution of \$0.035 per share be maintained for twelve months, beginning with the July 15, 2011 distribution payment. This policy is subject to regular review at the Board's quarterly meetings, unless market conditions require an earlier evaluation. The next review is scheduled to take place in September 2011.

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

Share Repurchase Policy

The Fund's policy is generally to buy back Fund shares on the open market when the Fund trades at certain discounts to NAV. During the six months ended April 30, 2011 and the fiscal year ended October 31, 2010, the Fund did not repurchase any shares.

Revolving Credit Facility and Leverage

The Fund has entered into a \$600 million loan facility with a syndicate led by The Bank of Nova Scotia, which was renewed for a 364 day term on April 13, 2011. Under the terms of the loan facility and applicable regulations, the Fund is required to maintain certain asset coverage ratios for the amount of its outstanding borrowings. The Board regularly reviews the use of leverage by the Fund. The Fund is also authorized to use reverse repurchase agreements as another form of leverage.

Portfolio Holdings Disclosure

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information about the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330. The Fund makes the information on Form N-Q available to shareholders on the Fund's website or upon request and without charge by calling Investor Relations toll-free at 1-800-522-5465.

Proxy Voting

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities, and information regarding how the Fund voted proxies relating to

Aberdeen Asia-Pacific Income Fund, Inc.

Letter to Shareholders (unaudited) (concluded)

portfolio securities during the twelve months ended June 30, 2010, is available: (i) upon request and without charge by calling Investor Relations toll-free at 1-800-522-5465; and (ii) on the SEC's website at <http://www.sec.gov>.

From the site you will also be able to review performance, download literature and sign up for email services. The site houses topical information about the funds, including fact sheets from Morningstar that are updated daily and monthly manager reports. If you sign up

for our email service online, we can ensure that you are among the first to know about Aberdeen's latest closed-end fund news.

Included within this report is a reply card with postage paid envelope. Please complete and mail the card if you would like to be added to our enhanced email service and receive future communications from Aberdeen.

Yours sincerely,

Christian Pittard

President

Dividend Reinvestment and Direct Stock Purchase Plan

The Fund has a Dividend Reinvestment and Direct Stock Purchase Plan (the "Plan"), which is sponsored and administered by Computershare Trust Company, N.A., the Fund's transfer agent.

The Plan allows registered stockholders and first time investors to buy and sell shares and automatically reinvest dividends and capital gains through our transfer agent. This is a cost-effective way to invest in the Fund.

Please note that for both purchases and reinvestment purposes, shares will be purchased in the open market at the current share price and cannot be issued directly by the Fund.

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

For more information about the Plan and a brochure that includes the terms and conditions of the Plan, please call Computershare at 1-800-647-0584 or visit www.computershare.com/buyaberdeen.

All amounts are U.S. Dollars unless otherwise stated.

Aberdeen Asia-Pacific Income Fund, Inc.

Distribution Disclosure Classification (unaudited)

The Fund's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. Dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore, the exact amount of distributable income for each fiscal year can only be determined as of the end of the Fund's fiscal year, October 31. However, under the Investment Company Act of 1940 (the "1940 Act"), the Fund is required to indicate the sources of certain distributions to shareholders.

The Fund estimates that distributions for the fiscal year commencing November 1, 2010, including the distribution paid on June 17, 2011 are comprised of 100% net investment income.

This estimated distribution composition may vary from month to month because it may be materially impacted by future realized gains and losses on securities and fluctuations in the value of the currencies in which Fund assets are denominated.

In January 2012, a Form 1099-DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with respect to their appropriate tax treatment for the 2011 calendar year.

Report of the Investment Manager (unaudited)

Share Price Performance

On April 30, 2011, the Fund's share price was \$7.34, which represented a discount of 5.3% to the NAV per share of \$7.75. As of June 8, 2011, the share price was \$7.16, representing a discount of 5.4% to the NAV per share of \$7.57.

Loan Facility and the Use of Leverage

The Fund utilizes leverage to seek to increase the yield for its shareholders. The amounts borrowed from the line of credit may be invested to return higher rates than the rates in the Fund's portfolio. However, the cost of leverage could exceed the income earned by the Fund on the proceeds of such leverage. To the extent that the Fund is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Fund's stock will decrease. In addition, in the event of a general market decline in the value of assets in which the Fund invests, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage. Non-recurring expenses in connection with the implementation of the loan facility will reduce the Fund's performance.

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the loan facility may constitute a substantial lien and burden by reason of their prior claim against the income of the Fund and against the net

assets of the Fund in liquidation. The Fund is not permitted to declare dividends or other distributions in the event of default under the loan facility. In the event of a default under the credit agreement, the lenders have the right to cause a liquidation of the collateral (i.e., sell portfolio securities and other assets of the Fund) and, if any such default is not cured, the lenders may be able to control the liquidation as well. The loan facility has a term of 364 days and is not a perpetual form of leverage; there can be no assurance that the loan facility will be available for renewal on acceptable terms, if at all.

The credit agreement governing the loan facility includes usual and customary covenants for this type of transaction. These covenants impose on the Fund asset coverage requirements, fund composition requirements and limits on certain investments, such as illiquid investments, which are more stringent than those imposed on the Fund by the 1940 Act. The covenants or guidelines could impede the Investment Manager, Aberdeen Asset Management Limited (the Investment Adviser) or Aberdeen Asset Management Investment Services Limited (the Sub-Adviser) from fully managing the Fund's portfolio in accordance with the Fund's investment objective and policies. Furthermore, non-compliance with such covenants or the occurrence of other events could lead to the cancellation of the loan facility. The covenants also include a requirement that the Fund maintain a NAV of no less than \$1 billion.

Aberdeen Asia-Pacific Income Fund, Inc.

Report of the Investment Manager (unaudited) (continued)

The Board regularly reviews the use of leverage by the Fund and may explore other forms of leverage. The Fund may implement a reverse repurchase agreement program if the Board determines it would be advantageous for the Fund and shareholders to do so. A reverse repurchase agreement involves the sale of a security, with an agreement to repurchase the same or substantially similar securities at an agreed upon price and date. Whether such a transaction produces a gain for the Fund depends upon the costs of the agreements and the income and gains of the securities purchased with the proceeds received from the sale of the security. If the income and gains on the securities purchased fail to exceed the costs, the Fund's NAV will decline faster than otherwise would be the case. Reverse repurchase agreements, as with any leveraging techniques, may increase the Fund's return; however, such transactions also increase the Fund's risks in down markets.

Interest Rate Swaps

The Fund enters into interest rate swaps to efficiently gain or hedge interest rate or currency risk. On November 11, 2010, the Fund unwound two interest rate swap agreements with aggregate notional amounts of Hong Kong Dollar (HKD) 53 and 74 million. On April 21 and April 28, 2011, the Fund entered into new interest rate swap agreements with an aggregate notional amount of \$116.0 and \$127.5 million, respectively. As of April 30, 2011, the Fund held interest rate swap agreements with an aggregate notional amount of \$540.0 million and Thailand Baht (THB) 695.0 million which represented 94% of the total borrowings. Under the terms of the agreements currently in effect, the Fund receives a floating rate of interest. The U.S. Dollar agreements receive the three month USD-LIBOR BBA rate. The THB agreement received the six month Thai Baht Fixing rate. The Fund pays fixed rates of interest for the terms and based upon the notional amounts set forth below:

Remaining Term as of April 30, 2011	Amount (in millions)	Fixed Rate Payable (%)
60 months	\$ 116.0	2.3180
60 months	\$ 127.5	2.1875
38 months	\$ 144.0	3.0125
38 months	\$ 22.5	2.9600
18 months	THB 695.0	3.2300
12 months	\$ 130.0	1.8170

A significant risk associated with interest rate swaps is the risk that the counterparty may default or file for bankruptcy, in which case the Fund would bear the risk of loss of the amount expected to be received under the swap agreements. There can be no assurance that the Fund will have an interest rate swap in place at any given time nor can there be any assurance that, if an interest rate swap is in

place, it will be successful in hedging the Fund's interest rate risk with respect to the loan facility. The implementation of this strategy is at the discretion of the Leverage Committee of the Board of Directors.

Economic Review

Asian bond yields rose during the reporting period, as sentiment was weighed down by Europe's sovereign debt crisis and inflationary fears. Market participants appeared unmoved by the European Union's and the International Monetary Fund's (IMF) 85 billion bailout package for Ireland, while higher food and energy prices and strong economic growth drove inflation numbers beyond targets set by central banks. Losses were slightly pared from February onwards, thanks to heightened risk aversion and a pick-up of inflows into the asset class. Continued political unrest in the Middle East and north Africa, as well as the devastating earthquake and tsunami in Japan, curtailed risk appetite, which benefited bond markets. Towards the end of the period, sentiment was further lifted by a rally in U.S. Treasuries after the Federal Reserve signaled its intent to maintain an accommodative monetary policy stance in response to disappointing economic data.

Positive currency returns helped the iBoxx Asia ex-Japan Government Bond Index and UBS Composite Index rise by 3.96% and 14.40%, respectively. The Australian Dollar was the best performer, gaining by 11.55% against the U.S. Dollar on the back of rising commodity prices. Next was the Taiwan Dollar, favored for its increasingly close economic ties to the mainland, while the Singapore Dollar rallied after the central bank allowed the currency to appreciate faster.

Asia dollar credit, as measured by the Merrill Lynch Asian U.S. Dollar Bond Index, returned 0.29%. Investors brushed aside negative news as they sought better yield and fund flows returned to emerging bond markets towards the period-end. Amid a flight to safety, investment-grade

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

bonds outperformed their high-yield counterparts. At the sector level, banks and corporates performed well. In the primary market, there were a total of 64 new issues worth a total of \$35.55 billion.

On the economic front, regional growth remained firm. Third- and fourth-quarter GDP continued to improve across most countries, driven by an acceleration in investment and consumption, as well as a rebound in exports. The anticipated moderation in growth this year back towards more sustainable levels as a result of tighter monetary policy and an easing of low base effects was unexpectedly mild.

Unsurprisingly, inflationary pressures intensified as output gaps closed or narrowed, while supply-side uncertainties, such as the

Aberdeen Asia-Pacific Income Fund, Inc.

Report of the Investment Manager (unaudited) (concluded)

devastating floods and Cyclone Yasi in Australia, added pressure on food and energy prices. Most central banks were increasingly hawkish and continued to tighten monetary policy. Even Bangko Sentral ng Philipines, the central bank of the Philippines, which had been one of the more dovish central banks, raised its policy rate to 4.25% for the first time since mid-2009. China hiked lending rates three times as consumer prices rose to about 5% year-on-year for most of the reporting period.

The use of bond and interest rate futures contracts was primarily to hedge and manage the interest rate exposure of the Australian bond

and U.S. dollar-denominated Asian credit portfolios. While the Australian futures detracted value, the latter added to the Fund's overall performance.

The portfolio's paid interest rate swap positions in both Thailand and Hong Kong were also positive as yields rose during the period. The Hong Kong position was unwound in November 2010.

We also employed foreign-exchange forwards to manage the exposure to Asian currencies. These forwards detracted marginally, although the Fund's overall Asian currency exposure added value.

Portfolio Composition (unaudited)

Quality of Investments

As of April 30, 2011, 67.3% of the Fund's total investments were invested in securities where either the issue or the issuer was rated A or better by Standard & Poor's Corporation or Moody's Investors Service, Inc. or, if unrated, judged to be of equivalent quality by the Investment Manager. The table below shows the asset quality of the Fund's portfolio as of April 30, 2011, compared with the previous six and twelve months:

	AAA/Aaa	AA/Aa	A	BBB/Baa	BB/Ba*	B*
Date	%	%	%	%	%	%
April 30, 2011	30.1	14.2	23.0	11.8	20.1	0.8
October 31, 2010	26.8	12.9	25.0	12.7	19.8	2.8

- (a) Indicates a variable rate security. The maturity date presented for these instruments is the later of the next date on which the security can be redeemed at par or the next date on which the rate of interest is adjusted. The interest rate shown reflects the rate in effect at April 30, 2011.
- (b) The maturity date presented for these instruments represents the next call/put date.
- (c) Security acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2011, the aggregate market value of these securities amounted to \$516,579,273 or 25.54% of net assets applicable to common shareholders.

Aberdeen Asia-Pacific Income Fund, Inc.

Financial Highlights (concluded)

- (a) Based on average shares outstanding.
- (b) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment return does not reflect brokerage commissions.
- (c) Ratios calculated on the basis of income, expenses and preferred share dividends applicable to both the common and preferred shares relative to the average net assets of common shareholders. Ratios of net investment income before preferred stock dividends to average net assets of common shareholders are 5.43%, 5.44%, 6.40%, 6.44%, 6.65% and 4.65% for the six months ended April 30, 2011 and the fiscal years ended October 31, 2010, 2009, 2008, 2007 and 2006, respectively.
- (d) Annualized.
- (e) Includes expenses of both preferred and common stock.
- (f) In 2009, the Fund filed a non-routine proxy to consider approval of a new sub-advisory agreement among the Fund, Investment Manager, and Sub-Adviser. The Fund and the Investment Manager agreed to each bear equal responsibility with respect to the costs of soliciting proxies associated with the non-routine item.
- (g) Asset coverage ratio is calculated by dividing net assets plus the amount of any borrowings, including Auction Market Preferred Stock, for investment purposes by the amount of any borrowings.

See Notes to Financial Statements.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited)

Aberdeen Asia-Pacific Income Fund, Inc. (the Fund) was incorporated in Maryland on March 14, 1986 as a closed-end, non-diversified management investment company. The Fund's investment objective is to seek current income. The Fund may also achieve incidental capital appreciation. The Fund will seek to achieve its investment objective through investment in Australian and Asian debt securities. In order to comply with a rule adopted by the U.S. Securities and Exchange Commission (the SEC) under the Investment Company Act of 1940 (the 1940 Act) regarding fund names, the Board of Directors has adopted an investment policy that, for as long as the name of the Fund remains Aberdeen Asia-Pacific Income Fund, Inc., it shall be the policy of the Fund normally to invest at least 80% of its net assets plus the amount of any borrowings, in Asian debt securities, Australian debt securities and New Zealand debt securities. This 80% investment policy is a non-fundamental policy of the Fund and may be changed by the Fund's Board of Directors (the Board) upon 60 days prior written notice to shareholders. There can be no assurance that the Fund will achieve its objective. The ability of issuers of debt securities held by the Fund to meet their obligations may be affected by economic developments in a specific industry, country or region.

1. Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses for the period. Actual results could differ from those estimates. The accounting records of the Fund are maintained in U.S. Dollars. The U.S. Dollar is used as both the functional and reporting currency. However, the Australian Dollar is the functional currency for U.S. federal tax purposes.

(a) Security Valuation:

Securities for which market quotations are readily available are valued at current market value as of the Valuation Time. The Valuation Time is as of the close of regular trading on the New York Stock Exchange (usually 4:00 p.m. Eastern Time). Equity securities are valued at the last quoted sale price. Effective January 1, 2011, if there is no sale price available, the last quoted mean price provided by an independent pricing service approved by the Board is used. Prior to January 1, 2011, if there was no sale price, the last quoted bid price provided by an independent pricing service was used. Securities traded on NASDAQ are valued at the NASDAQ official

closing price. Management has concluded there is no significant effect on the value of the portfolio due to the change in methodology. Prices are taken from the primary market or exchange on which each security trades. Investment companies are valued at net asset value as reported by such company.

Most securities listed on a foreign exchange are valued at the last sale price at the close of the exchange on which the security is principally traded or by application of a valuation factor by an independent pricing service to the last sales price as further discussed below. Foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. Dollars at the exchange rate of said currencies against the U.S. Dollar, as of the Valuation Time, as provided by an independent pricing service approved by the Board.

Debt and other fixed-income securities (other than short-term obligations) are valued at the last quoted bid price and/or by using a combination of daily quotes and matrix evaluations provided by an independent pricing service, the use of which has been approved by the Board. In the event such quotes are not available from such pricing agents, then the security may be priced based on bid quotations from broker-dealers. Short-term debt securities of sufficient credit quality such as commercial paper and U.S. Treasury Bills having a remaining maturity of 60 days or less at the time of purchase, are valued at amortized cost, which approximates fair value.

Securities for which market quotations are not readily available, or for which an independent pricing service does not provide a value or provides a value that does not represent fair value in the judgment of the Fund's investment adviser or designee, are valued at fair value under procedures approved by the Board. In addition, fair value determinations are required for securities whose value is affected by a significant event that materially affects the value of a domestic or foreign security which occurs subsequent to the time of the close of the principal market on which such domestic or foreign security trades and before the Valuation Time (i.e., a subsequent event). Typically, this will involve events occurring after the close of a foreign market on which a security trades and before the next Valuation Time.

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

For the six months ended April 30, 2011, other than described above there have been no significant changes to the valuation procedures approved by the Board.

The Fund is required to disclose information regarding the fair value measurements of the Fund's assets and liabilities. Fair value is defined as the price that the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. The disclosure requirements utilize a three-tier hierarchy to maximize the

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

use of observable market data, minimize the use of unobservable inputs and establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk (for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique). Inputs may be observable or unobservable.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability, which are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, which are based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized below:

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value. The following is a summary of the inputs used to value the Fund's investments as of April 30, 2011:

Assets	Level 1*	Level 2*	Level 3

* For the six months ended April 30, 2011, there were no significant transfers in or out of Level 1 and Level 2 fair value measurements.

For the six months ended April 30, 2011, there have been no significant changes to the fair valuation methodologies.

(b) Repurchase Agreements:

The Fund may enter into repurchase agreements. It is the Fund's policy that its custodian/counterparty segregate the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. The repurchase price generally equals the price paid by the Fund plus interest negotiated on the basis of current short-term rates. To the extent that any repurchase transaction exceeds one business day, the collateral is valued on a daily basis to determine its adequacy. If the counterparty defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the counterparty of the security, realization of the collateral by the Fund may be delayed or limited. The Fund held a repurchase agreement of \$26,536,000 as of April 30, 2011.

(c) Foreign Currency Translation:

Foreign currency amounts are translated into U.S. Dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the exchange rates at the current daily rates of exchange; and
- (ii) purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The Fund isolates that portion of the results of operations arising from changes in the foreign exchange rates due to the fluctuations in the market prices of the securities held at the end of the reporting period. Similarly, the Fund isolates the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the reporting period.

Net exchange gain/(loss) is realized from sales and maturities of portfolio securities, sales of foreign currencies, settlement of

securities transactions, dividends, interest and foreign withholding taxes recorded on the Fund's books. Net unrealized foreign exchange appreciation/(depreciation) includes changes in the value of portfolio securities and other assets and liabilities arising as a result of changes in the exchange rate. The net realized and unrealized foreign exchange gain/(loss) shown in the composition of net assets represents foreign exchange gain/(loss) for book purposes that may not have been recognized for tax purposes.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the U.S. Dollar. Generally, when the U.S. Dollar rises in value against foreign currency, the Fund's investments denominated in that currency will lose value because its currency is worth fewer U.S. Dollars; the opposite effect occurs if the U.S. Dollar falls in relative value.

(d) Derivative Financial Instruments:

The Fund is authorized to use derivatives to manage both currency and interest rate risk for global debt securities. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract. The use of derivative instruments involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statement of Assets and Liabilities.

Swaps:

During the six-month period ended April 30, 2011, the Fund entered into interest rate swaps in order to obtain a desired return at a lower cost than if the Fund had invested directly in the asset that yielded the desired return or as a tool to hedge the leverage and also manage the local interest rate exposure of the Fund. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or notional principal amount. The Fund will enter into swaps only on a net basis, which means that the two payment streams are netted out, with the Fund receiving or paying, as the

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

case may be, only the net amount of the difference between the two payments. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index. The Fund records unrealized gains or losses on a daily basis representing the value and the current net receivable or payable relating to open swap contracts. Net amounts received or paid on the swap contract are recorded as realized gains or losses. Fluctuations in the value of swap contracts are recorded for financial statement purposes as unrealized appreciation or depreciation of swap contracts. Realized gains and losses from terminated swaps are included in net realized gains/losses on swap contracts transactions.

The Fund is a party to International Swap Dealers Association, Inc. Master Agreements (ISDA Master Agreements). These agreements are with select counterparties and they govern transactions, including certain over-the-counter derivative and foreign exchange contracts, entered into by the Fund and the counterparty. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral, and events of default or termination. The occurrence of a specified event of termination may give a counterparty the right to terminate all of its contracts and affect settlement of all outstanding transactions under the applicable ISDA Master Agreement.

Forward Foreign Currency Exchange Contracts:

A forward foreign currency exchange contract (forward contract) involves an obligation to purchase and sell a specific currency at a future date at a price set at the time of the contract. Forward contracts are used to manage the Fund's currency exposure in an efficient manner. They are used to sell unwanted currency exposure that comes with holding securities in a market, or to buy currency exposure where the exposure from holding securities is insufficient to give the desired currency exposure either in absolute terms or relative to the benchmark. Their use allows the separation of decision making between markets and currencies. The forward contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized appreciation or depreciation. Forwards prices are received daily from an independent pricing provider. When the forward contract is closed, the Fund records a realized gain or loss equal to the difference between the value at the time it was opened

and the value at the time it was closed. These unrealized and realized gains and losses are reported on the Statement of Operations. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts and from unanticipated movements in exchange rates. During the six months period ended April 30, 2011, forward contracts were used to both neutralize the currency exposure of the Fund relative to its benchmark and to overlay active currency decisions.

Futures Contracts:

The Fund may invest in financial futures contracts (futures contracts) for the purpose of hedging its existing portfolio securities or securities that the Fund intends to purchase against fluctuations in value caused by changes in prevailing market interest rates or prices. Futures contracts may also be entered into for non-hedging purposes; however, in those instances, the aggregate initial margin and premiums required to establish the Fund's positions may not exceed 5% of the Fund's net asset value (NAV) after taking into account unrealized profits and unrealized losses on any such contract it has entered into.

Upon entering into a futures contract, the Fund is required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount (initial margin deposit). Subsequent payments, known as variation margin, are made each day, depending on the daily fluctuations in the fair value/market value of the underlying assets. An unrealized gain or loss equal to the variation margin is recognized on a daily basis. When the contract expires or is closed the gain (loss) is realized and is presented in the Statement of Operations as a net realized gain (loss) on futures contracts. Futures contracts are valued daily at their last quoted sale price on the exchange they are traded.

A sale of a futures contract means a contractual obligation to deliver the securities or foreign currency called for by the contract at a fixed price at a specified time in the future. A purchase of a futures contract means a contractual obligation to acquire the securities or foreign currency at a fixed price at a specified time in the future.

Should market conditions change unexpectedly, the Fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. The use of futures transactions for hedging purposes involves the risk of imperfect correlation in movements in the price of futures contracts, interest rates and the value/market value of the underlying hedged assets. During the six months ended April 30, 2011, futures contracts were used to hedge the duration of the Fund against its benchmark and to manage the overall duration of the Fund.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

Summary of Derivative Instruments:

The Fund has adopted Accounting Standards Codification 815, Derivatives and Hedging. The Fund may use derivatives for various purposes. The following is a summary of the fair value of Derivative Instruments, not accounted for as hedging instruments, as of April 30, 2011:

	Asset Derivatives		Liability Derivatives	
	2011		2011	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Derivatives not accounted for as hedging instruments and risk exposure				
Interest rate swaps (interest rate risk)	Unrealized appreciation on interest rate swaps	\$ 327,803	Unrealized depreciation on interest rate swaps	\$ 13,216,880
Forward foreign exchange contracts (foreign exchange risk)	Unrealized appreciation on forward foreign currency exchange contracts	7,358,625	Unrealized depreciation on forward foreign currency exchange contracts	7,218,036
Futures contracts (interest rate risk)*	Unrealized appreciation on futures contracts	165,595	Unrealized depreciation on futures contracts	(1,120,916)
Total		\$ 7,852,023		\$ 19,314,000

* Includes cumulative appreciation/depreciation of futures contracts as reported in the Statement of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

Information about derivative instruments reflected as of the date of this report is generally indicative of the type of derivative activity for the second quarter of the period ended April 30, 2011. The volume of activity of futures increased throughout the period. The quarterly weighted average contracts and notional values were as follows:

Quarter	Weighted Average Contracts	Weighted Average Notional Value
1 st Quarter	(343)	(34,382,235)
2 nd Quarter	(1,135)	(556,769,382)

The volume of activity of interest rate swaps was consistent through the period. The quarterly weighted average notional values were as follows:

Quarter	Weighted Average Notional Value
1 st Quarter	1,107,500,000
2 nd Quarter	1,111,333,333

Information about forward foreign currency contracts reflected as of the date of this reports is generally indicative of the type of activity for the second quarter of the period ended April 30, 2011. The quarterly weighted average contracts and notional values were as follows:

Quarter	Average Notional Value
1 st Quarter	569,998,744
2 nd Quarter	633,696,160

The Fund values derivatives at fair value, as described in this note, and recognizes changes in fair value currently in the results of operations. Accordingly, the Fund does not follow hedge accounting even for derivatives employed as economic hedges.

(e) Credit-Linked Notes:

The Fund may invest in credit-linked securities, which are unstructured, unleveraged pass-through vehicles to an underlying security denominated in a local currency, used for the purposes of efficiently managing access to the market and interest rate risk. For instance, the Fund may invest in credit-linked securities as a cash management tool in order to gain exposure to a certain market and/or to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, investments in credit-linked securities represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer's receipt of

payments from, and the issuer's potential obligations to, the counterparties to the derivative instruments and other securities in which the issuer invests. For instance, the issuer may sell one or more credit default swaps, under which the issuer would receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par value (or other agreed upon value) of the referenced debt obligation. This, in turn, would reduce the amount of income and principal that the Fund would receive. The Fund's investments in these instruments are indirectly subject to the risks associated with derivative instruments, including, among others, credit risk, default or similar event risk, counterparty risk, interest rate risk, leverage risk and management risk. It is also expected that the securities will be exempt from registration under the Securities Act of 1933, as amended. Accordingly, there may be no established trading market for the securities and they may constitute illiquid investments.

(f) Security Transactions and Investment Income:

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

Securities transactions are recorded on the trade date. Realized and unrealized gains/(losses) from security and currency transactions are calculated on the identified cost basis. Interest income is recorded on an accrual basis. Discounts and premiums on securities purchased are accreted or amortized on an effective yield basis over the estimated lives of the respective securities. Expenses are accrued on a daily basis.

(g) Distributions:

It is the Fund's current policy to pay distributions from net investment income supplemented by net realized foreign exchange gains, net realized short-term capital gains and return of capital distributions if necessary, on a monthly basis. The Fund will also declare and pay distributions at least annually from net realized gains on investment transactions and net realized foreign exchange gains, if any. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Dividends and distributions to shareholders are determined in accordance with federal income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments for foreign currencies, loss deferrals and recognition of market discount and premium.

(h) Federal Income Taxes:

For federal income and excise tax purposes, substantially all of the Fund's transactions are accounted for using the Australian Dollar as

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

the functional currency. Accordingly, only realized currency gains/(losses) resulting from the repatriation of Australian Dollars into U.S. Dollars are recognized for U.S. federal tax purposes.

The Fund intends to qualify or continue to qualify as a regulated investment company by complying with the provisions available to certain investment companies, as defined in Subchapter M of the Internal Revenue Code, and to make distributions of net investment income and net realized capital gains sufficient to relieve the Fund from all, or substantially all, federal income taxes. Therefore, no federal income tax provision is required.

Management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Since tax authorities can examine previously filed tax returns, the Fund's U.S. federal and state tax returns for each of the four fiscal years up to the period ended October 31, 2010 are subject to such review.

(i) Cash Flow Information:

The Fund invests in securities and distributes dividends from net investment income and net realized gains on investment and currency transactions which are paid in cash or are reinvested at the discretion of shareholders. These activities are reported in the Statements of Changes in Net Assets and additional information on cash receipts and cash payments is presented in the Statement of Cash Flows. Cash includes domestic and foreign currency but does not include cash at brokers in segregated accounts for financial futures contracts because it is designated as collateral.

2. Agreements

Aberdeen Asset Management Asia Limited (the Investment Manager) serves as investment manager to the Fund, pursuant to a management agreement. Aberdeen Asset Management Limited (the Investment Adviser) serves as the investment adviser and Aberdeen Asset Management Investment Services Limited (the Sub-Adviser) serves as the sub-adviser, pursuant to an advisory agreement and a sub-advisory agreement, respectively. The Investment Manager, the Investment Adviser and the Sub-Adviser are wholly-owned subsidiaries of Aberdeen Asset Management PLC.

The Investment Manager makes investment decisions on behalf of the Fund on the basis of recommendations and information furnished to it by the Investment Adviser, including the selection of and the placement of orders with brokers and dealers to execute portfolio transactions on behalf of the Fund. The Sub-Adviser manages the portion of the Fund's assets that the Investment Manager allocates to it.

The management agreement provides the Investment Manager with a fee, payable monthly, at the following annual rates: 0.65% of the Fund's average weekly Managed Assets up to \$200 million, 0.60% of Managed Assets between \$200 million and \$500 million, 0.55% of Managed Assets between \$500 million and \$900 million, 0.50% of Managed Assets between \$900 million and \$1.75 billion and 0.45% of Managed Assets in excess of \$1.75 billion. Managed Assets are defined in the management agreement to mean total assets of the Fund, including any form of investment leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility or the issuance of debt securities), (ii) the issuance of preferred stock or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies, and/or (iv) any other means.

The Investment Manager pays fees to the Investment Adviser for its services rendered. The Investment Manager informed the Fund that it paid \$1,292,895 to the Investment Adviser during the six months ended April 30, 2011. As compensation for its services under the Sub-Advisory Agreement, the Sub-Adviser receives an annual fee paid by the Investment Manager in the amount of \$100,000, to be paid in monthly increments.

Aberdeen Asset Management Inc. (AAMI), an affiliate of the Investment Manager, Investment Adviser and Sub-Adviser, is the Fund's administrator, pursuant to an agreement under which AAMI receives a fee, payable monthly at an annual fee rate of 0.125% of the Fund's average weekly Managed Assets up to \$1 billion, 0.10% of the Fund's average weekly Managed Assets between \$1 billion and \$2 billion, and 0.075% of the Fund's average weekly Managed Assets in excess of \$2 billion.

Under terms of an Investor Relations Services Agreement, AAMI serves as the Fund's investor relations services provider. During the six months ended April 30, 2011, the Fund incurred fees of approximately \$248,085. Investor relations fees and expenses in the Statement of Operations

include certain out-of-pocket expenses.

3. Investment Transactions

Purchases and sales of investment securities (excluding short-term securities) for the six months ended April 30, 2011, were \$952,377,340 and \$976,680,468, respectively.

4. Common Stock

There are 400 million shares of \$0.01 par value common stock authorized. At April 30, 2011, there were 260,975,744 shares issued and outstanding.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

On March 1, 2001, the Board approved a stock repurchase program. The Board amended the program on December 12, 2007. The stock repurchase program allows the Fund to repurchase up to 10% of its outstanding common stock in the open market during any 12-month period, if and when the discount to NAV is at least 8%. For the six months ended April 30, 2011 and fiscal year ended October 31, 2010, the Fund did not repurchase any shares through this program.

5. Revolving Credit Facility

On April 13, 2011, the Fund renewed a \$600 million loan facility with a 364-day term with a syndicate of major financial institutions led by The Bank of Nova Scotia. As of April 30, 2011, the balance of the loan outstanding was \$600 million, and the average interest rate on the loan facility was 1.58%. The interest expense is accrued on a daily basis and is payable to The Bank of Nova Scotia on a monthly basis.

The amounts borrowed from the loan facility may be invested at higher rates than incurred under the facility. However, the cost of leverage could exceed the income earned by the Fund on the proceeds of such leverage. To the extent that the Fund is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Fund's common stock will decrease. In addition, in the event of a general market decline in the value of assets in which the Fund invests, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage. For the six months ended April 30, 2011, the impact of the leverage on the NAV attributable to shareholders was 2.1%. Bond movements made a negative contribution to the Fund while the gross yield differential and currency movements both made a positive contribution.

The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the loan facility may constitute a substantial lien and burden by reason of their prior claim against the income of the Fund and against the net assets of the Fund in liquidation. The Fund is not permitted to declare dividends or other distributions in the event of default under the loan facility. In the event of a default under the loan facility, the lenders have the right to cause a liquidation of the collateral (i.e., sell portfolio securities and other assets of the Fund) and, if any such default is not cured, the lenders may be able to control the liquidation as well. The loan facility has a term of 364 days and is not a perpetual form of leverage; there can be no assurance that the loan facility will be available for renewal on acceptable terms, if at all. Bank loan fees and expenses included in the Statement of Operations include fees for the renewal of the loan facility as well as

commitment fees for any portion of the loan facility not drawn upon at any time during the period.

The credit agreement governing the loan facility includes usual and customary covenants for this type of transaction. These covenants impose on the Fund asset coverage requirements, fund composition requirements and limits on certain investments, such as illiquid investments, which are more stringent than those imposed on the Fund by the 1940 Act. The covenants or guidelines could impede the Investment Manager, Investment Adviser, or Sub-Adviser from fully managing the Fund's portfolio in accordance with the Fund's investment objective and policies. Furthermore, non-compliance with such covenants or the occurrence of other events could lead to the cancellation of the loan facility. The covenants also include a requirement that the Fund maintain a NAV of no less than \$1 billion.

6. Portfolio Investment Risks

(a) Credit and Market Risk:

Funds that invest in high yield and emerging market instruments are subject to certain additional credit and market risks. The yields of high yield and emerging market debt obligations reflect, among other things, perceived credit risk. The Fund's investments in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk of not receiving timely and/or ultimate payment of interest and principal, greater market price volatility, and less liquid secondary market trading. The consequences of political, social, economic, or diplomatic changes may have disruptive effects on the market prices of emerging markets investments held by the Fund.

(b) Risks Associated with Foreign Securities and Currencies:

Investments in securities of foreign issuers carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include future political and economic developments, and the possible imposition of exchange controls or other foreign governmental laws and restrictions. In addition, with respect to certain countries, there is the possibility of expropriation of assets, confiscatory taxation, political or

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

social instability or diplomatic developments, which could adversely affect investments in those countries.

Certain countries also may impose substantial restrictions on investments in their capital markets by foreign entities, including restrictions on investments in issuers of industries deemed sensitive to relevant national interests. These factors may limit the investment opportunities available and result in a lack of liquidity and high price volatility with respect to securities of issuers from developing countries.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (concluded)

(c) Concentration Risk:

The Fund may have elements of risk not typically associated with investments in the United States of America due to concentrated investments in a limited number of countries or regions subject to foreign securities or currencies risks. Such concentrations may subject the Fund to additional risks resulting from political or economic conditions in such countries or regions and the possible imposition of adverse governmental laws or currency exchange restrictions could cause the securities and their markets to be less liquid and their prices to be more volatile than those of comparable U.S. securities.

7. Contingencies

In the normal course of business, the Fund may provide general indemnifications pursuant to certain contracts and organizational documents. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund, and therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

8. Tax Cost of Investments

The U.S. federal income tax basis of the Fund's investments and the net unrealized appreciation as of April 30, 2011 were as follows:

				Net
				Unrealized
Cost	Appreciation	Depreciation	Appreciation	
\$2,277,110,848	\$ 263,538,013	\$ 4,579,132	\$ 258,958,881	

9. Subsequent Events

Management has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date the Financial Statements were issued. Based on this evaluation, no disclosures or adjustments were required to the Financial Statements other than the following disclosed subsequent event.

The Fund declared monthly distributions of \$0.035 cents per share payable on June 17, 2011 and July 15, 2011 to shareholders of record as of May 31, 2011 and June 30, 2011, respectively.

Total assets are as of April 30, 2011 and have been translated to U.S. dollars at a rate of £1.00 = \$1.66795.

There are no accounts with respect to which part of the advisory fee is based on the performance of the account.

(3) The following is a description of the compensation structure for portfolio managers employed by Aberdeen Asset Management PLC and its subsidiaries, including the Registrant's Investment Manager and its Investment Adviser (the Aberdeen Group) as of October 31, 2010.

The Aberdeen Group recognizes the importance of compensation in attracting and retaining talent and has structured remuneration to include an attractive base salary, a discretionary bonus that is directly linked to one's contribution to the overall success of the Aberdeen Group and a long-term incentive plan for key staff members comprised of a mixture of cash, options, and shares. Overall compensation packages are designed to be competitive relative to investment management industry standards.

The compensation policy has been designed to deliver additional rewards through appropriate incentive schemes, both annual and long term. These are directly linked to performance at both a corporate and an individual level. The policy seeks to reward performance in a manner which aligns the interests of clients, shareholders and executives.

Each Aberdeen Group member recognizes that any remuneration policy must be sufficiently flexible to take into account any changes in the business environment. In accordance with this need for flexibility, the Aberdeen Group takes into account the overall competitiveness of the total remuneration package of all senior executives including some portfolio managers. When justified by performance, the at risk performance elements will form the most significant element of total remuneration for executive officers and senior employees.

Base Salary

The base salary is determined by prevailing market conditions and the compensation for similar positions across the industry. The Aberdeen Group uses industry compensation surveys as a tool in determining each portfolio manager's base salary.

Annual Bonus

The Aberdeen Group's policy is to recognize corporate and individual achievements each year through an appropriate bonus scheme. The aggregate incentive compensation pool each year is determined by the Board of the parent company, Aberdeen PLC, and is dependent on each member of the Aberdeen Group's overall performance and profitability. The pool is comprised of a base level plus an agreed proportion of each member of the Aberdeen Group's profitability.

Staff performance is reviewed formally once a year. The review process evaluates the various aspects that the individual has contributed to the Aberdeen Group, and specifically, in the case of portfolio managers, to the relevant investment team. Discretionary bonuses are based on a combination of both the team and the individual's performance. Overall participation in team meetings, generation of original research ideas and contribution to presenting the team externally are also evaluated. Discretionary bonuses are not formally laid down and generally range from 10% to 50% of annual salary for portfolio managers.

In the calculation of the portfolio management teams bonus, the Aberdeen Group takes into consideration investment matters (which include the performance of funds, adherence to the company investment process, and quality of company meetings) as well as more subjective issues such as team participation and effectiveness at client presentations. The split between the two will vary but generally 80% of bonus will be determined by investment related matters, the remaining 20% will be more subjective in nature. Each fund's performance is judged against the benchmark as listed below over a broad time frame invested to capture relevant performance.

Portfolio manager performance on investment matters are judged over all of the accounts the portfolio manager contributes to and is documented in the appraisal process. A combination of the team's and individual's performance is considered and evaluated.

Although performance is not a substantial portion of a portfolio manager's compensation, the Aberdeen Group also recognizes that fund performance can often be driven by factors outside one's control, such as (irrational) markets, and as such pays attention to the effort by portfolio managers to ensure integrity of our core process by sticking to disciplines and processes set, regardless of momentum and hot themes. Short-terming is thus discouraged and trading-oriented managers will thus find it difficult to thrive in the Aberdeen Group's environment.

Additionally, if any of the aforementioned undue risks were to be taken by a portfolio manager, such trend would be identified via Aberdeen's dynamic compliance monitoring system.

Long-Term Incentives

As part of an effective remuneration package, a long-term incentive plan is used to structure the package so as to retain, motivate, and reward key staff members with a view to improving their performance and thereby increasing the value of the Aberdeen Group for the benefit of shareholders. Long-term incentive plans can be either cash or share based and typically vest over a three year period.
