Table of Contents**PROVIDENT FINANCIAL SERVICES, INC. AND SUBSIDIARY****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****Note 1. Summary of Significant Accounting Policies*****A. Basis of Financial Statement Presentation***

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly owned subsidiary, The Provident Bank (the Bank, together with Provident Financial Services, Inc., the Company).

In preparing the interim unaudited consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the periods presented. Actual results could differ from these estimates. The allowance for loan losses is a material estimate that is particularly susceptible to near-term change. The current unstable economic environment has resulted in a heightened degree of uncertainty inherent in this material estimate.

The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and six months ended June 30, 2012 are not necessarily indicative of the results of operations that may be expected for all of 2012.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission.

These unaudited consolidated financial statements should be read in conjunction with the December 31, 2011 Annual Report to Stockholders on Form 10-K.

B. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations:

	For the three months ended June 30,						For the six months ended June 30,					
	2012			2011			2012			2011		
	Net	Weighted	Per	Net	Weighted	Per	Net	Weighted	Per	Net	Weighted	Per

		Common	Amount		Common	Amount		Common	Amount		Common	Amount
		Shares			Shares			Shares			Shares	
		Outstanding			Outstanding			Outstanding			Outstanding	
Net income	\$ 16,003			\$ 13,977			\$ 34,431			\$ 26,908		
Basic earnings per share:												
Income available to common stockholders	\$ 16,003	57,152,952	\$ 0.28	\$ 13,977	56,846,186	\$ 0.25	\$ 34,431	57,102,389	\$ 0.60	\$ 26,908	56,808,747	\$ 0.47
Dilutive shares		34,461			21,602			32,632			10,800	
Diluted earnings per share:												
Income available to common stockholders	\$ 16,003	57,187,413	\$ 0.28	\$ 13,977	56,867,788	\$ 0.25	\$ 34,431	57,135,022	\$ 0.60	\$ 26,908	56,819,547	\$ 0.47

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Anti-dilutive stock options and awards totaling 3,962,816 shares at June 30, 2012, were excluded from the earnings per share calculations.

Table of Contents**Note 2. Acquisition**

On August 11, 2011, the Company's wholly owned subsidiary, The Provident Bank, completed its acquisition of Beacon Trust Company, a New Jersey limited purpose trust company, and Beacon Global Asset Management, Inc., an SEC-registered investment advisor incorporated in Delaware (Beacon). Pursuant to the terms of the Stock Purchase Agreement announced on May 19, 2011, Beacon's former parent company, Beacon Financial Corporation may be paid cash consideration in an amount up to \$10.5 million, based upon the acquired companies' financial performance in the three years following the closing of the transaction. Subsequent to the acquisition, Beacon Global Asset Management was merged with and into Beacon Trust Company.

The purpose of the Beacon acquisition was to significantly expand the Company's wealth management business throughout the state of New Jersey. Beacon's expertise in trust and wealth management services strategically positions the Company to increase market share and enhance the Company's non-interest earnings growth.

The purchase price was allocated to the acquired assets and liabilities of Beacon based on their fair value as of August 11, 2011. The allocation of the purchase price is presented in the following table.

<i>(in thousands)</i>	
Assets:	
Cash and cash equivalents	\$ 96
Securities	164
Premises and equipment	241
Goodwill	7,124
Core relationship intangible	2,423
Other assets	1,378
Total assets	\$ 11,426
Liabilities:	
Other liabilities	4,076
Total liabilities	\$ 4,076

In connection with the Beacon transaction, the Company recorded goodwill of \$7.1 million, none of which was estimated to be deductible for income tax purposes. In addition, a core relationship intangible (CRI) of \$2.4 million was recognized in connection with the Beacon acquisition and is being amortized on an accelerated basis over an estimated useful life of twelve years.

Note 3. Investment Securities

At June 30, 2012, the Company had \$1.31 billion and \$363.2 million in available for sale and held to maturity investment securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, lack of reliable pricing information, regulatory actions, changes in the business environment or any changes in the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment on certain investment securities in future periods. Included in the Company's investment portfolio are private label mortgage-backed securities. These investments may pose a higher risk of future impairment charges as a result of the uncertain economic environment and the potential negative effect on future performance of these private label mortgage-backed securities. The total number of all held to maturity and available for sale securities in an unrealized loss position as of June 30, 2012 totaled 50, compared with 24 at December 31, 2011. This included four private label mortgage-backed securities at June 30, 2012, with an amortized cost of \$13.0 million and unrealized losses totaling \$804,000. Three of these private label mortgage-backed securities

were below investment grade at June 30, 2012. All securities with unrealized losses at June 30, 2012 were analyzed for other-than-temporary impairment. Based upon this analysis, no other-than-temporary impairment existed at June 30, 2012.

Securities Available for Sale

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for securities available for sale at June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 99,414	512		99,926
Mortgage-backed securities	1,165,542	30,753	(1,246)	1,195,049
State and municipal obligations	10,450	479	(1)	10,928
Corporate obligations	3,006	29		3,035
Equity securities	307	17		324
	\$ 1,278,719	31,790	(1,247)	1,309,262

	December 31, 2011			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 105,130	442	(14)	105,558
Mortgage-backed securities	1,221,988	31,206	(2,191)	1,251,003
State and municipal obligations	11,066	553	(5)	11,614
Corporate obligations	7,517	119		7,636
Equity securities	307	1		308
	\$ 1,346,008	32,321	(2,210)	1,376,119

The amortized cost and fair value of securities available for sale at June 30, 2012, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	June 30, 2012	
	Amortized cost	Fair value
Due in one year or less	\$ 29,009	29,076
Due after one year through five years	83,022	83,905
Due after five years through ten years	839	908
Mortgage-backed securities	1,165,542	1,195,049
Equity securities	307	324
	\$ 1,278,719	1,309,262

No securities were sold from the available for sale portfolio during the three months ended June 30, 2012, while proceeds from the sale of securities available for sale for the six months ended June 30, 2012 were \$47,131,000, resulting in gross gains of \$2,160,000 and no gross losses.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

During the three and six months ended June 30, 2011, no securities were sold from the available for sale portfolio. However, for the three and six months ended June 30, 2011, the Company recognized gains of \$14,000 and \$0, respectively, related to calls on certain securities in the available for sale portfolio, with proceeds from the calls totaling \$514,000 for the three and six months ended June 30, 2011.

The following table presents a roll-forward of the credit loss component of other-than-temporary impairment (OTTI) on debt securities for which a non-credit component of OTTI was recognized in other

Table of Contents

comprehensive income. OTTI recognized in earnings after that date for credit-impaired debt securities is presented as an addition in two components, based upon whether the current period is the first time a debt security was credit-impaired (initial credit impairment) or is not the first time a debt security was credit impaired (subsequent credit impairment). Changes in the credit loss component of credit-impaired debt securities were as follows (in thousands):

	June 30, 2012	June 30, 2011
Beginning credit loss amount	\$ 1,240	938
Add: Initial OTTI credit losses		
Subsequent OTTI credit losses		302
Less: Realized losses for securities sold		
Securities intended or required to be sold		
Increases in expected cash flows on debt securities		
Ending credit loss amount	\$ 1,240	1,240

The Company did not incur an other-than-temporary impairment charge on securities for the three and six months ended June 30, 2012. For the three and six months ended June 30, 2011, the Company recorded a net other-than-temporary impairment charge of \$302,000.

The following table represents the Company's disclosure regarding securities available for sale with temporary impairment at June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair Value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	81,996	(444)	12,128	(802)	94,124	(1,246)
State and municipal obligations	513	(1)			513	(1)
	\$ 82,509	(445)	12,128	(802)	94,637	(1,247)

	December 31, 2011 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair Value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	\$ 64,838	(278)	12,453	(1,913)	77,291	(2,191)
State and municipal obligations	777	(5)			777	(5)
Agency notes	5,032	(14)			5,032	(14)
	\$ 70,647	(297)	12,453	(1,913)	83,100	(2,210)

The temporary loss position associated with debt securities is the result of changes in market interest rates relative to the coupon of the individual security and changes in credit spreads. In addition, there remains a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The review of the portfolio for other-than-temporary impairment considers the percentage and length of time the market value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risk, whether the Company has the intent to sell the securities and whether it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. For each private-label mortgage-backed security, the Company estimates loss projections by stressing the

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the three and six months ended June 30, 2012

Table of Contents

Based upon the review of the securities portfolio, the Company believes that as of June 30, 2012, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary, does not have the intent to sell the securities and it is more likely than not that the Company will not be required to sell the securities before the anticipated recovery.

Investment Securities Held to Maturity

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for investment securities held to maturity at June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 3,698	32	(1)	3,729
Mortgage-backed securities	15,878	666		16,544
State and municipal obligations	335,143	15,554	(399)	350,298
Corporate obligations	8,491	265	(2)	8,754
	\$ 363,210	16,517	(402)	379,325

	December 31, 2011			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 3,647	36		3,683
Mortgage-backed securities	22,321	859		23,180
State and municipal obligations	314,108	16,863	(69)	330,902
Corporate obligations	8,242	296	(7)	8,531
	\$ 348,318	18,054	(76)	366,296

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. For the three and six months ended June 30, 2012, the Company recognized gains of \$1,000 and \$24,000, respectively, related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$1,249,000 and \$3,956,000, respectively.

For the three and six months ended June 30, 2011, the Company recognized gains of \$0 and \$14,000, respectively, related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$2,140,000 and \$8,136,000 for the three and six months ended June 30, 2011, respectively.

The amortized cost and fair value of investment securities at June 30, 2012 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	June 30, 2012	
	Amortized cost	Fair value
Due in one year or less	\$ 49,994	50,187
Due after one year through five years	83,794	86,763
Due after five years through ten years	88,075	94,277
Due after ten years	125,469	131,554

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Mortgage-backed securities	15,878	16,544
	\$ 363,210	379,325

Table of Contents

The following table represents the Company's disclosure on investment securities held to maturity with temporary impairment at June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012 Unrealized Losses				Total Gross unrealized losses	
	Less than 12 months		12 months or longer			
	Fair Value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Agency obligations	\$ 499	(1)			499	(1)
State and municipal obligations	27,309	(399)			27,309	(399)
Corporate obligations	502	(2)			502	(2)
	\$ 28,310	(402)			28,310	(402)

	December 31, 2011 Unrealized Losses				Total Gross unrealized losses	
	Less than 12 months		12 months or longer			
	Fair Value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
State and municipal obligations	3,868	(63)	316	(6)	4,184	(69)
Corporate obligations	394	(7)			394	(7)
	\$ 4,262	(70)	316	(6)	4,578	(76)

The temporary loss position associated with held to maturity securities portfolio is the result of changes in market interest rates relative to the coupon of the individual security and changes in credit spreads. The review of the portfolio for other-than-temporary impairment considers the percentage and length of time the market value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risks, whether the Company has the intent to sell the securities and whether it is more likely than not that the Company would be required to sell the securities before the anticipated recovery.

Based upon the review of the held to maturity securities portfolio, the Company believes that as of June 30, 2012, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary, does not have the intent to sell the securities and it is more likely than not that the Company will not be required to sell the securities before the anticipated recovery.

Table of Contents**Note 4. Loans Receivable and Allowance for Loan Losses**

Loans receivable at June 30, 2012 and December 31, 2011 are summarized as follows (in thousands):

	June 30, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 1,307,578	1,308,635

Table of Contents

Within the loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amounts of these non-accrual loans were \$115.2 million and \$122.5 million at June 30, 2012 and December 31, 2011, respectively. Included in non-accrual loans were \$37.2 million and \$45.6 million of loans which were less than 90 days past due at June 30, 2012 and December 31, 2011, respectively. There were no loans ninety days or greater past due and still accruing interest at June 30, 2012, or December 31, 2011.

The Company defines an impaired loan as a non-homogenous loan greater than \$1.0 million for which it is probable, based on current information, all amounts due under the contractual terms of the loan agreement will not be collected. Impaired loans also include all loans modified as troubled debt restructurings (TDRs). A loan is deemed to be a TDR when a loan modification resulting in a concession is made in an effort to mitigate potential loss arising from a borrower's financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon (1) the present value of expected cash flows discounted at the effective interest rate; or (2) if a loan is collateral dependent, the fair value of collateral; or (3) the market price of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.

The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analyses of collateral dependent impaired loans. A third party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is updated annually or more frequently, if required.

A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral's fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each fiscal quarter end, if a loan is designated as a collateral dependent impaired loan and the third party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management's knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses during the process described above.

At June 30, 2012, there were 92 impaired loans totaling \$115.5 million, of which 71 loans totaling \$80.0 million were TDRs. Included in this total were 65 TDRs to 56 borrowers totaling \$77.3 million that were performing in accordance with their restructured terms and which continued to accrue interest at June 30, 2012. At December 31, 2011, there were 65 impaired loans totaling \$103.2 million, of which 48 loans totaling \$63.1 million were TDRs. Included in this total were 38 TDRs to 36 borrowers totaling \$38.9 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2011.

Table of Contents

Loans receivable summarized by portfolio segment and impairment method are as follows (in thousands):

	At June 30, 2012			Total Portfolio Segments

Total	\$ 39,443	25,381	5,515	70,339	4,012	74,351

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the number of loans modified as TDRs during the three and six months ended June 30, 2012 and their balances immediately prior to the modification date and post-modification as of June 30, 2012.

Troubled Debt Restructurings	Number of Loans	Three Months Ended June 30, 2012	
		Pre-Modification Outstanding Recorded Investment (\$ in thousands)	Post-Modification Outstanding Recorded Investment
Mortgage loans:			
Residential	8	\$ 2,010	1,823
Commercial			
Multi-family			
Construction			
Total mortgage loans	8	2,010	1,823
Commercial loans	3	3,846	3,846
Consumer loans	1	393	364
Total restructured loans	12	\$ 6,249	6,033

Table of Contents

Troubled Debt Restructurings	Number of Loans	Six Months Ended June 30, 2012	
		Pre-Modification Outstanding Recorded Investment (\$ in thousands)	Post-Modification Outstanding Recorded Investment
Mortgage loans:			
Residential	15	\$ 3,760	3,404
Commercial			
Multi-family			
Construction			
Total mortgage loans	15	3,760	3,404
Commercial loans	6	14,107	13,940
Consumer loans	3	498	439
Total restructured loans	24	\$ 18,365	17,783

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. Estimated collateral values of collateral dependent impaired loans modified during the three and six months ended June 30, 2012 exceeded the carrying amounts of such loans. As a result, there were no charge-offs recorded on collateral dependent impaired loans presented in the preceding tables for the three and six months ended June 30, 2012. The allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$1.4 million at June 30, 2012, and was included in the allowance for loan losses for loans individually evaluated for impairment.

The TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 4.52 percent, compared to a rate of 5.08 percent prior to modification for the three months ended June 30, 2012, and 5.11 percent, compared to a rate of 5.93 percent prior to modification for the six months ended June 30, 2012.

The following table presents loans modified as TDRs within the previous 12 months from June 30, 2012, and for which there was a payment default (90 days or more past due) during the quarter ended June 30, 2012:

Troubled Debt Restructurings	June 30, 2012	
	Number of Loans	Outstanding Recorded Investment (\$ in thousands)
Subsequently Defaulted		
Mortgage loans:		
Residential	1	\$ 903
Commercial		
Multi-family		
Construction		
Total mortgage loans	1	903
Commercial loans		
Consumer loans		
Total restructured loans	1	\$ 903

TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

Table of Contents

The activity in the allowance for loan losses by portfolio segment for the three and six months ended June 30, 2012 and 2011 is as follows (in thousands):

Table of Contents

Specific allocations of the allowance for loan losses attributable to impaired loans totaled \$8,578,000 and \$9,326,000 at June 30, 2012 and December 31, 2011, respectively. At June 30, 2012 and December 31, 2011, impaired loans for which there was no related allowance for loan losses totaled \$38,686,000 and \$25,983,000, respectively. The average balances of impaired loans during the six months ended June 30, 2012 was \$117,140,000.

The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar characteristics. Loans deemed to be acceptable quality (pass) are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of questionable quality are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by Credit Administration. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party. Reports concerning periodic loan review examinations by the independent third party are presented directly to both the Audit and Risk Committees of the Board of Directors.

Loans receivable by credit quality risk rating indicator are as follows (in thousands):

	At June 30, 2012							
	Residential	Commercial mortgage	Multi-family	Construction	Total mortgages	Commercial	Consumer	Total loans

Table of Contents**Note 6. Components of Net Periodic Benefit Cost**

The Bank has a noncontributory defined benefit pension plan (the Plan) covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The Plan was frozen on April 1, 2003. All participants in the Plan are 100% vested. The Plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee became fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

Net periodic benefit (increase) cost for the three and six months ended June 30, 2012 and 2011 includes the following components (in thousands):

	Three months ended June 30,				Six months ended June 30,					
	Pension benefits		Other post-retirement benefits		Pension benefits		Other post-retirement benefits			
	2012	2011	2012	2011	2012	2011	2012	2011		
Service cost	\$		63	46	\$		126	86		
Interest cost	322	313	261	256	644	626	522	509		
Expected return on plan assets	(645)	(561)			(1,290)	(1,122)				
Amortization of prior service cost			(1)	(1)			(2)	(2)		
Amortization of the net loss (gain)	357	180	3	(116)	714	360	6	(222)		
Net periodic benefit cost (increase)	\$	34	(68)	326	185	\$	68	(136)	652	371

In its consolidated financial statements for the year ended December 31, 2011, the Company previously disclosed that it does not expect to contribute to the Plan in 2012. As of June 30, 2012, no contributions to the Plan have been made.

The net periodic benefit (increase) cost for pension benefits and other post-retirement benefits for the three and six months ended June 30, 2012 were calculated using the actual January 1, 2012 pension valuation and the estimated results of the other post-retirement benefits January 1, 2012 valuations.

Note 7. Impact of Recent Accounting Pronouncements

Effective March 31, 2012, the Company adopted guidance regarding the presentation of comprehensive income. In June 2011, the Financial Accounting Standards Board (FASB) issued guidance providing an entity with the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both options, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. As originally issued, ASU 2011-5 requires entities to present reclassification adjustments out of accumulated other comprehensive income by component in the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements). This requirement was deferred by ASU 2011-12, Comprehensive Income (Topic 220) Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards. ASU No. 2011-05 is effective for all interim and annual periods beginning on or after December 15, 2011.

Table of Contents

with early adoption permitted, and must be applied retrospectively. The Company presented comprehensive income in a separate consolidated statement of comprehensive income for the three and six months ended June 30, 2012 and 2011.

In May 2011, the FASB issued guidance which results in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and International Financial Reporting Standards. This guidance is to be applied prospectively and is effective during interim and annual periods beginning after December 15, 2011. Early adoption was not permitted. The Company adopted this guidance effective March 31, 2012, and it did not have a material effect on the Company's consolidated statement of condition or results of operations.

In April 2011, the FASB issued guidance to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. The amendments to this guidance remove from the assessment of effective control: (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. Other criteria applicable to the assessment of effective control are not changed by this new guidance. Those criteria indicate that the transferor is deemed to have maintained effective control over the financial assets transferred (and thus must account for the transaction as a secured borrowing) for agreements that both entitle and obligate the transferor to repurchase or redeem the financial assets before their maturity if all of the following conditions are met: (1) the financial assets to be repurchased or redeemed are the same or substantially the same as those transferred; (2) the agreement is to repurchase or redeem them before maturity, at a fixed or determinable price; and (3) the agreement is entered into contemporaneously with, or in contemplation of, the transfer. This guidance became effective for the first interim or annual period beginning on or after December 15, 2011, and should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption was not permitted. The adoption of this guidance did not have a material effect on the Company's consolidated statement of condition or results of operations.

Note 8. Fair Value Measurements

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.

Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

- Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and
- Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

Table of Contents

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Assets Measured at Fair Value on a Recurring Basis

The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of June 30, 2012 and December 31, 2011.

Securities Available for Sale

For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also may hold equity securities and debt instruments issued by the U.S. government and U.S. government-sponsored agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.

Assets Measured at Fair Value on a Non-Recurring Basis

The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of June 30, 2012 and December 31, 2011.

For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell of up to 6%. The Company classifies these loans as Level 3 within the fair value hierarchy.

Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated costs to sell of up to 6%. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure.

Table of Contents

Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

There were no changes to the valuation techniques for fair value measurements as of June 30, 2012 and December 31, 2011.

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of June 30, 2012 and December 31, 2011, by level within the fair value hierarchy.

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	June 30, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale:				
Agency obligations	\$ 99,926	99,926		
Mortgage-backed securities	1,195,049		1,195,049	
State and municipal obligations	10,928		10,928	
Corporate obligations	3,035		3,035	
Equity securities	324	324		
	\$ 1,309,262	100,250	1,209,012	
Measured on a non-recurring basis:				
Loans measured for impairment based on the fair value of the underlying collateral				
	\$ 37,645			37,645
Foreclosed assets	13,925			13,925
	\$ 51,570			51,570

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	December 31, 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale:				
Agency obligations	\$ 105,558	105,558		
Mortgage-backed securities	1,251,003		1,251,003	
State and municipal obligations	11,614		11,614	
Corporate obligations	7,636		7,636	
Equity securities	308	308		
	\$ 1,376,119	105,866	1,270,253	
Measured on a non-recurring basis:				
Loans measured for impairment based on the fair value of the underlying collateral				
	\$ 56,620			56,620
Foreclosed assets	12,802			12,802
	\$ 69,422			69,422

There were no transfers between Level 1 and Level 2 during the three and six months ended June 30, 2012.

Table of Contents

Other Fair Value Disclosures

The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities.

Cash and Cash Equivalents

For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.

Investment Securities Held to Maturity

For investment securities held to maturity, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

FHLB-NY Stock

The carrying value of FHLB-NY stock was its cost. The fair value of FHLB-NY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date. The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.

The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.

Table of Contents

Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.

Borrowed Funds

The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy.

Commitments to Extend Credit and Letters of Credit

The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

The following tables present the Company's financial instruments at their carrying and fair values as of June 30, 2012 and December 31, 2011. Fair values are presented by level within the fair value hierarchy.

Table of Contents

(Dollars in thousands)	Carrying value	Fair value	Fair Value Measurements at June 30, 2012 Using:

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.
Forward Looking Statements**

Certain statements contained herein are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as may, will, believe, expect, estimate, anticipate, continue, or similar terms, variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not undertake and specifically declines any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:

Adequacy of the allowance for loan losses

Goodwill valuation and analysis for impairment

Valuation of securities available for sale and impairment analysis

Valuation of deferred tax assets

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.

The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectibility of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis.

Table of Contents

When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be acceptable quality are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of questionable quality are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial and construction loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party and periodically, by the Credit Committee in the credit renewal or approval process.

Management assigns general valuation allowance (GVA) percentages to each risk rating category for use in allocating the allowance for loan losses, giving consideration to historical loss experience by loan type and other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries, loan volume, as well as, the national and local economic trends and conditions. The appropriateness of these percentages is evaluated by management at least annually and monitored on a quarterly basis, with changes made when they are required. In the first quarter of 2012, management completed its most recent evaluation of the GVA percentages. As a result of that evaluation, GVA percentages applied to the indirect marine loan portfolio were increased to reflect an increase in historical loss experience.

As part of its evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

Management believes the primary risks inherent in the portfolio are a continued decline in the economy, generally, a continued decline in real estate market values, rising unemployment or a protracted period of unemployment at current elevated levels, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.

Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company s allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Additional critical accounting policies relate to judgments about other asset impairments, including goodwill, investment securities and deferred tax assets. Goodwill is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates.

Table of Contents

The Company qualitatively determines whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing Step 1 of the goodwill impairment test. If an entity concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the entity would be required to perform Step 1 of the assessment and then, if needed, Step 2 to determine whether goodwill is impaired. However, if it is more likely than not that the fair value of the reporting unit is more than its carrying amount, the entity does not need to apply the two-step impairment test. For this analysis, the Reporting Unit is defined as the Bank, which includes all core and retail banking operations of the Company but excludes the assets, liabilities, equity, earnings and operations held exclusively at the Company level. The guidance provides certain factors an entity should consider in its qualitative assessment in determining whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. The factors include:

Macroeconomic conditions, such as deterioration in economic condition and limited access to capital.

Industry and market considerations, such as increased competition, regulatory developments and decline in market-dependent multiples.

Cost factors, such as increased labor costs, cost of materials and other operating costs.

Overall financial performance, such as declining cash flows and decline in revenue or earnings.

Other relevant entity-specific events, such as changes in management, strategy or customers, litigation and contemplation of bankruptcy.

Reporting unit events, such as selling or disposing a portion of a reporting unit and a change in composition of assets.

The Company completed its annual goodwill impairment test as of September 30, 2011. Based upon its qualitative assessment of goodwill, the Company concluded it was more likely than not that the fair value of the reporting unit exceeded its carrying amount, goodwill was not impaired and no further quantitative analysis (Step 1) is warranted.

The Company may, based upon its qualitative assessment, or at its option, perform the two-step process to evaluate the potential impairment of goodwill. If, based upon Step 1, the fair value of the Reporting Unit exceeds its carrying amount, goodwill of the Reporting Unit is considered not impaired. However, if the carrying amount of the Reporting Unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the Reporting Unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

At June 30, 2012, the carrying value of goodwill was \$353.3 million. Management has evaluated potential goodwill impairment triggers and based upon its interim qualitative assessment of goodwill, has determined that goodwill is not impaired and no further analysis is warranted.

The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 8 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. The Company conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, the Company would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the

Table of Contents

securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. A lack of liquidity in certain sectors of the mortgage-backed securities market for certain securities and increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the decline in value is considered other-than-temporary. In this evaluation, the Company did not recognize other-than-temporary securities impairment losses in earnings for the three and six months ended June 30, 2012 and 2011.

The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities, utilization against carryback years and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. At June 30, 2012, the Company maintained a valuation allowance of \$246,000, related to unused capital loss carryforwards.

COMPARISON OF FINANCIAL CONDITION AT JUNE 30, 2012 AND DECEMBER 31, 2011

Total assets increased \$37.4 million, or 0.5%, to \$7.13 billion at June 30, 2012, from \$7.10 billion at December 31, 2011. The increase was primarily due to an increase in net loans, partially offset by a decrease in securities.

Total investments decreased \$50.2 million, or 2.8%, to \$1.71 billion at June 30, 2012, from \$1.76 billion at December 31, 2011. The decrease was primarily due to principal repayments on mortgage-backed securities, the sale of specific mortgage-backed securities which had a high risk of prepayment and maturities of municipal and agency bonds, partially offset by purchases of mortgage-backed securities. A portion of the repayments on the investment portfolio were reinvested in higher-yielding loans, primarily commercial mortgage and commercial business loans.

Total loans increased \$81.6 million, or 1.8%, during the six months ended June 30, 2012 to \$4.74 billion. Loan originations totaled \$766.3 million and loan purchases totaled \$49.0 million for the six months ended June 30, 2012. The loan portfolio had net increases of \$58.1 million in commercial and multi-family mortgage loans, \$15.3 million in consumer loans, \$5.2 million in commercial loans and \$4.9 million in construction loans, which were partially offset by a \$1.1 million decrease in residential mortgage loans. Commercial real estate, commercial and construction loans represented 60.2% of the loan portfolio at June 30, 2012, compared to 59.8% at December 31, 2011.

The Company does not originate or purchase sub-prime or option ARM loans. Prior to September 30, 2008, the Company originated Alt-A mortgages in the form of stated income loans with a maximum loan-to-value ratio of 50% on a limited basis. The balance of these Alt-A loans at June 30, 2012 was \$10.1 million. Of this total, 9 loans totaling \$1.6 million were 90 days or more delinquent. General valuation reserves of 6.5%, or \$106,000, were allocated to these loans at June 30, 2012.

The Company participates in loans originated by other banks, including participations designated as Shared National Credits (SNCs). The Company's gross commitments and outstanding balances as a participant in SNCs were \$72.6 million and \$47.4 million, respectively, at June 30, 2012. The Company's participations in SNCs included three relationships classified as substandard (rated 7) under the Company's loan risk rating system with gross commitments and outstanding balances of \$25.9 million at June 30, 2012. Of these adversely classified SNCs, one relationship consisted of a commercial construction loan and the other two were commercial mortgage loans. These properties are located in New York City and New Jersey. All of the Company's SNCs were current as to the payment of principal and interest at June 30, 2012.

The Company had outstanding junior lien mortgages totaling \$256.3 million at June 30, 2012. Of this total, 51 loans totaling \$4.5 million were 90 days or more delinquent. General valuation reserves of 10%, or \$445,000, were allocated to these loans at June 30, 2012.

Table of Contents

The Company had outstanding indirect marine loans totaling \$46.2 million at June 30, 2012. Of this total, 3 loans totaling \$561,000 were 90 days or more delinquent. General valuation reserves of 60%, or \$336,000 were allocated to these loans at June 30, 2012. Marine loans are currently made only on a direct, limited accommodation basis to existing customers.

The following table sets forth information regarding the Company's non-performing assets as of June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 34,207	40,386
Commercial	31,865	29,522
Multi-family		997
Construction	10,757	11,018
Total mortgage loans	76,829	82,923
Commercial loans	31,488	32,093
Consumer loans	6,899	8,533
Total non-performing loans	115,216	122,549
Foreclosed assets	13,925	12,802
Total non-performing assets	\$ 129,141	135,351

The following table sets forth information regarding the Company's 60-89 day delinquent loans as of June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 4,504	7,936
Commercial	215	1,155
Multi-family	35	
Construction		
Total mortgage loans	4,754	9,091
Commercial loans	1,428	526
Consumer loans	2,028	1,908
Total 60-89 day delinquent loans	\$ 8,210	11,525

At June 30, 2012, the allowance for loan losses totaled \$72.4 million, or 1.53% of total loans, compared with \$74.4 million, or 1.60% of total loans at December 31, 2011. Total non-performing loans were \$115.2 million, or 2.43% of total loans at June 30, 2012, compared to \$122.5 million, or 2.63% of total loans at December 31, 2011.

The decrease in non-performing loans at June 30, 2012, compared with December 31, 2011, was largely due to a \$6.2 million decrease in non-performing residential loans, a \$1.6 million decrease in non-performing consumer loans, a \$997,000 decrease in non-performing multi-family loans and a \$604,000 decrease in non-performing commercial loans, partially offset by a \$2.3 million increase in non-performing commercial mortgage loans.

At June 30, 2012, the Company held \$13.9 million of foreclosed assets, compared with \$12.8 million at December 31, 2011. Foreclosed assets at June 30, 2012 are carried at fair value based on recent appraisals and valuation estimates, less estimated selling costs. Foreclosed assets consisted of \$6.9 million of residential real estate, \$6.4 million of commercial real estate and \$600,000 of marine vessels.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Non-performing assets totaled \$129.1 million, or 1.81% of total assets at June 30, 2012, compared to \$135.4 million, or 1.91% of total assets at December 31, 2011.

Table of Contents

Other assets decreased \$6.2 million, or 7.9%, to \$72.6 million at June 30, 2012, from \$78.8 million at December 31, 2011, primarily due to the amortization of prepaid FDIC insurance and an increase in income tax accruals.

Total deposits increased \$49.4 million, or 1.0%, during the six months ended June 30, 2012 to \$5.21 billion. Core deposits, consisting of savings and demand deposit accounts, increased \$145.0 million, or 3.6%, to \$4.17 billion at June 30, 2012. The majority of the core deposit increase was in demand deposits. Time deposits decreased \$95.6 million, or 8.5%, to \$1.03 billion at June 30, 2012, with the majority of the decrease occurring in the 18- and 24-month maturity categories. The Company remains focused on developing core deposit relationships, while strategically permitting the run-off of time deposits. Core deposits represented 80.2% of total deposits at June 30, 2012, compared to 78.1% at December 31, 2011.

Borrowed funds were reduced \$36.0 million, or 3.9% during the six months ended June 30, 2012, to \$884.2 million, as core deposit growth continued to replace wholesale funding. Borrowed funds represented 12.4% of total assets at June 30, 2012, a reduction from 13.0% at December 31, 2011.

Total stockholders' equity increased \$22.1 million, or 2.3%, to \$974.5 million at June 30, 2012. This increase was due to net income of \$34.4 million, a \$5.1 million increase due to shares issued through the Company's dividend reinvestment plan, a net increase due to the allocation of shares to stock-based compensation plans of \$3.1 million and a net increase of \$79,000 in other comprehensive income, partially offset by \$15.2 million in cash dividends and common stock repurchases of \$5.6 million. At June 30, 2012, book value per share and tangible book value per share were \$16.20 and \$10.23, respectively, compared with \$15.88 and \$9.87, respectively, at December 31, 2011. Common stock repurchases for the three and six months ended June 30, 2012, totaled approximately 268,000 and 408,000 shares at an average cost of \$13.75 and \$13.81 per share, respectively. As of June 30, 2012, 1.4 million shares remained eligible for repurchase under the current stock repurchase program authorized by the Company's Board of Directors.

Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLB-NY and approved broker dealers.

Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.

As of June 30, 2012, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

	At June 30, 2012			
	Required Amount	Ratio	Actual Amount	Ratio
(Dollars in thousands)				
Bank:				
Regulatory Tier 1 leverage capital	\$ 270,971	4.00%	\$ 527,365	7.78%
Tier 1 risk-based capital	182,977	4.00	527,365	11.53
Total risk-based capital	365,928	8.00	584,733	12.78
Company:				
Regulatory Tier 1 leverage capital	\$ 270,963	4.00%	\$ 607,000	8.96%
Tier 1 risk-based capital	182,964	4.00	607,000	13.27
Total risk-based capital	365,928	8.00	664,364	14.52

Table of Contents**COMPARISON OF OPERATING RESULTS FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2012 AND 2011**

General. The Company reported net income of \$16.0 million, or \$0.28 per basic and diluted share for the three months ended June 30, 2012, compared to net income of \$14.0 million, or \$0.25 per basic and diluted share for the three months ended June 30, 2011. For the six months ended June 30, 2012, the Company reported net income of \$34.4 million, or \$0.60 per basic and diluted share, compared to net income of \$26.9 million, or \$0.47 per basic and diluted share for the same period last year.

The improvement in earnings for the second quarter and year-to-date period ended June 30, 2012, was largely attributable to improvements in asset quality and related reductions in the provision for loan losses. Loan loss provisions decreased by \$4.0 million and \$6.9 million for the three and six months ended June 30, 2012, respectively, compared with the same periods in 2011. In addition, net interest income increased \$402,000 and \$1.8 million for the three and six months ended June 30, 2012, respectively, primarily due to an increase in average loans outstanding, funded by growth in average core deposits. Further contributing to the year-to-date improvement, the Company realized \$2.2 million in gains during the first quarter of 2012 from the sale of certain mortgage-backed securities identified as having a significant risk of accelerated prepayment. Excluding this gain, non-interest income increased \$1.3 million and \$4.7 million for the three and six months ended June 30, 2012, respectively, compared with the same periods last year. These improvements were partially offset by increases in non-interest expense of \$1.8 million and \$3.3 million for the three and six months ended June 30, 2012, respectively, compared with the same periods in 2011. Income tax expense increased \$1.9 million and \$4.8 million for the three and six months ended June 30, 2012, respectively, compared with same periods last year.

Net Interest Income. Total net interest income increased \$400,000 or 0.7%, to \$54.6 million for the quarter ended June 30, 2012, from \$54.2 million for the quarter ended June 30, 2011. For the six months ended June 30, 2012, total net interest income increased \$1.8 million, or 1.7%, to \$109.5 million, from \$107.6 million for the same period in 2011. Interest income for the second quarter of 2012 decreased \$3.8 million to \$66.0 million, from \$69.8 million for the same period in 2011. For the six months ended June 30, 2012, interest income decreased \$6.4 million to \$132.9 million, from \$139.3 million for the six months ended June 30, 2011. Interest expense decreased \$4.2 million, or 26.9%, to \$11.4 million for the quarter ended June 30, 2012, from \$15.6 million for the quarter ended June 30, 2011. For the six months ended June 30, 2012, interest expense decreased \$8.2 million, or 25.9%, to \$23.5 million, from \$31.7 million for the six months ended June 30, 2011. The improvement in net interest income for the three and six months ended June 30, 2012, versus the comparable 2011 periods, resulted from an increase in average interest-earning assets, primarily average loans outstanding, funded with growth in lower-cost core deposits. The improvement in earning asset volume and the funding mix was partially offset by compression in the net interest margin.

The net interest margin for the quarter ended June 30, 2012 was 3.39%, a decrease of 3 basis points from 3.42% for the quarter ended March 31, 2012, and 14 basis points from 3.53% for the quarter ended June 30, 2011. The decrease in the net interest margin was primarily attributable to the decline in yields on interest-earning assets, which outpaced the downward re-pricing of the Company's interest-bearing liabilities as longer-term market interest rates have declined and the yield curve has flattened. The weighted average yield on interest-earning assets was 4.11% for the three months ended June 30, 2012, compared with 4.19% for the trailing quarter, and 4.56% for the three months ended June 30, 2011. The weighted average cost of interest-bearing liabilities was 0.85% for the quarter ended June 30, 2012, compared with 0.90% for the trailing quarter and 1.19% for the second quarter of 2011. The average cost of interest bearing deposits for the three months ended June 30, 2012 was 0.58%, compared with 0.62% for the trailing quarter and 0.89% for the same period last year. Partially offsetting the effects of interest rate spread compression on the margin, average non-interest bearing demand deposits totaled \$689.3 million for the quarter ended June 30, 2012, compared with \$670.1 million for the trailing quarter and \$580.5 million for the quarter ended June 30, 2011. The average cost of borrowings for the three months ended June 30, 2012 was 2.20%, compared with 2.25% for the trailing quarter, and 2.65% for the same period last year.

Table of Contents

For the six months ended June 30, 2012, the net interest margin decreased 11 basis points to 3.41%, compared with 3.52% for the six months ended June 30, 2011. The weighted average yield on interest-earning assets declined 42 basis points to 4.15% for the six months ended June 30, 2012, compared with 4.57% for the six months ended June 30, 2011, while the weighted average cost of interest-bearing liabilities declined 34 basis points to 0.87% for the six months ended June 30, 2012, compared with 1.21% for the same period in 2011. The average cost of interest bearing deposits for the six months ended June 30, 2012 was 0.60%, compared with 0.90% for the same period last year. Average non-interest bearing demand deposits totaled \$679.7 million for the six months ended June 30, 2012, compared with \$568.1 million for the six months ended June 30, 2011. The average cost of borrowings for the six months ended June 30, 2012 was 2.22%, compared with 2.67% for the same period last year.

Interest income on loans secured by real estate decreased \$997,000 to \$38.7 million, or 2.5% for the three months ended June 30, 2012, from \$39.7 million for the three months ended June 30, 2011. Commercial loan interest income decreased \$570,000 to \$10.2 million, or 5.3% for the three months ended June 30, 2012, from \$10.8 million for the three months ended June 30, 2011. Consumer loan interest income decreased \$155,000, or 2.4%, to \$6.3 million for the three months ended June 30, 2012, from \$6.5 million for the three months ended June 30, 2011. For the three months ended June 30, 2012, the average balance of net loans increased \$223.2 million to \$4.62 billion, from \$4.39 billion for the same period in 2011. The average loan yield for the three months ended June 30, 2012, decreased 40 basis points to 4.76%, from 5.16% for the same period in 2011.

Interest income on loans secured by real estate decreased \$2.3 million, to \$77.6 million for the six months ended June 30, 2012, from \$80.0 million for the six months ended June 30, 2011. Consumer loan interest income decreased \$385,000, or 3.0%, to \$12.6 million for the six months ended June 30, 2012, from \$13.0 million for the six months ended June 30, 2011. Interest income on commercial loans decreased \$282,000, or 1.4%, to \$20.6 million for the six months ended June 30, 2012, from \$20.9 million for the six months ended June 30, 2011. The average loan yield for the six months ended June 30, 2012, decreased 40 basis points to 4.80%, from 5.20% for the same period in 2011. For the six months ended June 30, 2012, the average balance of net loans increased \$227.0 million, or 5.2%, to \$4.60 billion, from \$4.37 billion for the same period in 2011.

Interest income on investment securities held to maturity decreased \$40,000, or 1.3%, to \$3.0 million for the quarter ended June 30, 2012, compared to the same period last year. Average investment securities held to maturity increased \$14.9 million, or 4.3%, to \$357.2 million for the quarter ended June 30, 2012, from \$342.4 million for the same period last year. For the six months ended June 30, 2012, interest income on investment securities held to maturity decreased \$215,000, or 3.5%, to \$5.9 million, from \$6.1 million for the same period in 2011. Average investment securities held to maturity increased \$7.9 million, or 2.3%, to \$350.5 million for the six months ended June 30, 2012, from \$342.5 million for the same period last year.

Interest income on securities available for sale and FHLB-NY stock decreased \$2.0 million, or 20.3%, to \$7.8 million for the quarter ended June 30, 2012, from \$9.8 million for the quarter ended June 30, 2011. The average balance of securities available for sale increased \$125.4 million, or 10.0%, to \$1.38 billion for the three months ended June 30, 2012, from \$1.26 billion for the same period in 2011. For the six months ended June 30, 2012, interest income on securities available for sale and FHLB-NY stock decreased \$3.2 million, or 16.3%, to \$16.1 million, from \$19.3 million for the six months ended June 30, 2011. The average balance of securities available for sale increased \$81.3 million, or 0.6%, to \$1.38 billion for the six months ended June 30, 2012, from \$1.30 billion for the same period in 2011.

The average yield on all securities decreased to 2.42% for the three months ended June 30, 2012, compared with 3.01% for the same period in 2011. For the six months ended June 30, 2012, the average yield on all securities was 2.48%, compared with 2.96% for the same period in 2011.

Interest paid on deposit accounts decreased \$3.1 million, or 32.4%, to \$6.5 million for the quarter ended June 30, 2012, from \$9.6 million for the quarter ended June 30, 2011. For the six months ended June 30,

Table of Contents

2012, interest paid on deposit accounts declined \$6.0 million, or 30.6%, to \$13.5 million, from \$19.5 million for the six months ended June 30, 2011. The average cost of interest-bearing deposits decreased to 0.58% and 0.60% for the three and six months ended June 30, 2012, respectively, from 0.89% and 0.90% for the three and six months ended June 30, 2011, respectively. The average balance of interest-bearing core deposit accounts increased \$325.7 million, or 10.4%, to \$3.45 billion for the quarter ended June 30, 2012, from \$3.12 billion for the quarter ended June 30, 2011. For the six months ended June 30, 2012, average interest-bearing core deposits increased \$329.6 million, or 10.7%, to \$3.42 billion, from \$3.09 billion for the same period in 2011. Average time deposit account balances decreased \$175.9 million, or 14.3%, to \$1.06 billion for the quarter ended June 30, 2012, from \$1.23 billion for the same period in 2011. For the six months ended June 30, 2012, average time deposits decreased \$167.9 million, or 13.4%, to \$1.08 billion, from \$1.25 billion for the same period in 2011.

Interest paid on borrowed funds decreased \$1.1 million, or 17.8%, to \$4.9 million for the quarter ended June 30, 2012, from \$6.0 million for the quarter ended June 30, 2011. For the six months ended June 30, 2012, interest paid on borrowed funds decreased \$2.2 million, or 18.3%, to \$10.0 million, from \$12.2 million for the six months ended June 30, 2011. The average cost of borrowings decreased to 2.20% and 2.22% for the three and six months ended June 30, 2012, respectively, from 2.65% and 2.67% for the three and six months ended June 30, 2011, respectively. Average borrowings decreased \$6.8 million, or 0.8%, to \$903.1 million for the quarter ended June 30, 2012, from \$909.9 million for the quarter ended June 30, 2011. For the six months ended June 30, 2012, average borrowings decreased \$19.8 million, or 2.1%, to \$901.9 million, from \$921.7 million for the six months ended June 30, 2011.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance. The Company's emphasis on continued diversification of the loan portfolio through the origination of commercial loans has been one of the more significant factors management has considered in evaluating the allowance for loan losses and the provision for loan losses for the past several years. In the event the Company further increases the amount of such types of loans in the portfolio, management may determine that additional or increased provisions for loan losses are necessary, which could adversely affect earnings.

The Company recorded provisions for loan losses of \$3.5 million and \$8.5 million for the three and six months ended June 30, 2012, respectively. This compared with provisions for loan losses of \$7.5 million and \$15.4 million recorded for the three and six months ended June 30, 2011, respectively. For the three and six months ended June 30, 2012, the Company had net charge-offs of \$5.1 million and \$10.5 million, respectively, compared with net charge-offs of \$7.9 million and \$11.8 million, respectively, for the same periods in 2011. At June 30, 2012, the Company's allowance for loan losses was 1.53% of total loans, compared with 1.60% of total loans at December 31, 2011 and 1.62% of total loans at June 30, 2011.

Non-Interest Income. Non-interest income totaled \$9.3 million for the quarter ended June 30, 2012, an increase of \$1.3 million, or 16.2%, compared to the same period in 2011. Fee income increased \$1.6 million to \$7.4 million for the three months ended June 30, 2012, compared with the three months ended June 30, 2011, due primarily to increased wealth management fees attributable to Beacon Trust Company (Beacon), acquired in August 2011, and an increase in commercial loan prepayment fees. These increases were partially offset by lower deposit-based fee revenue. The Company did not experience any other-than-temporary impairment on its securities portfolio in 2012, compared with a \$302,000 charge recognized in the same period last year associated with an investment in a non-Agency mortgage-backed security. Additionally, other income decreased \$485,000 for the three months ended June 30, 2012, compared to the same period in 2011, resulting from a decrease in gains related to loan sales and increased net losses on the sale of foreclosed real estate.

Table of Contents

For the six months ended June 30, 2012, non-interest income totaled \$22.1 million, an increase of \$6.9 million, or 45.1%, compared to the same period in 2011. Fee income totaled \$15.5 million for the six months ended June 30, 2012, an increase of \$4.1 million compared with the same period in 2011, largely due to an increase in wealth management fees related to the Beacon acquisition and increased prepayment fees on commercial loans, which were partially offset by lower deposit-based fee income, primarily overdraft fees. Net gains on securities transactions totaled \$2.2 million for the six months ended June 30, 2012, compared to \$28,000 for the same period in 2011. During the period, the Company identified and sold certain mortgage-backed securities which had a high risk of accelerated prepayment. The proceeds from the sales were reinvested in similar securities with more stable projected cash flows. Also contributing to the increase in non-interest income, other income increased \$435,000 for the six months ended June 30, 2012, compared with the same period in 2011, primarily due to income associated with the termination of the Company's debit card rewards program and an increase in gains related to loan sales, partially offset by increased net losses on the sale of foreclosed real estate. The Company did not experience any other-than-temporary impairment on its securities portfolio for the six months ended June 30, 2012, compared with a \$302,000 charge recognized in the same period last year associated with an investment in a non-Agency mortgage-backed security.

Non-Interest Expense. For the three months ended June 30, 2012, non-interest expense increased \$1.8 million, or 5.1%, to \$37.8 million, compared to the three months ended June 30, 2011. Compensation and benefits increased \$1.7 million for the quarter ended June 30, 2012, to \$20.4 million, compared to the quarter ended June 30, 2011. This increase was due to higher salary expense associated with annual merit increases, personnel added as a result of the Beacon acquisition, an increased incentive compensation accrual, and increased employee health, medical and retirement benefit costs. Other operating expenses increased \$279,000, to \$6.6 million for the quarter ended June 30, 2012, from the same period in 2011, due mainly to a \$213,000 charge related to the termination of a software contract in connection with the Beacon integration.

Non-interest expense for the six months ended June 30, 2012 was \$74.5 million, an increase of \$3.3 million, or 4.6%, from the six months ended June 30, 2011. Compensation and benefits expense increased \$3.7 million, to \$41.0 million for the six months ended June 30, 2012 compared to the six months ended June 30, 2011, due to higher salary expense associated with annual merit increases, personnel added as a result of the Beacon acquisition, an increased incentive compensation accrual and increased employee health, medical and retirement benefit costs. In addition, other operating expense increased \$929,000 for the six months ended June 30, 2012, compared to the same period in 2011, due primarily to increased loan collection and administration expenses, a \$213,000 charge related to the termination of a software contract in connection with the Beacon integration, and \$162,000 in charges related to the consolidation of four underperforming branch locations. Data processing expense increased \$437,000 for the six months ended June 30, 2012, compared to the same period in 2011, because of increased software maintenance and core processing fees. Partially offsetting these increases, impairment of premises and equipment declined \$807,000 for the six months ended June 30, 2012, compared to the same period last year, due to the impairment charge incurred in the first quarter of 2011 related to the then planned sale and relocation of the Company's former loan center, which was completed in November 2011. FDIC insurance expense decreased \$544,000 to \$2.6 million for the six months ended June 30, 2012, compared with the same period in 2011. The decrease was primarily due to a lower assessment rate and a change in assessment methodology from a deposit-based to an asset-based assessment, effective in the second quarter of 2011. Net occupancy expense decreased \$337,000 to \$10.2 million, compared to the same period last year, due to the consolidation and relocation of the Company's administrative offices in April 2011 and the elimination of prior year carrying costs on previously occupied facilities owned by the Company that were sold in November 2011. Additionally, amortization of intangibles decreased \$149,000 for the six months ended June 30, 2012, compared with the same period of 2011, as a result of scheduled reductions in core deposit intangible amortization, partially offset by the amortization of the customer relationship intangible arising from the Beacon acquisition and increased amortization of mortgage servicing rights.

Table of Contents

Income Tax Expense. For the three and six months ended June 30, 2012, the Company's income tax expense was \$6.7 million and \$14.0 million, respectively, compared with \$4.8 million and \$9.2 million, for the three and six months ended June 30, 2011, respectively. The increase in income tax expense was primarily a function of growth in pre-tax income from taxable sources. The Company's effective tax rates were 29.4% and 28.9% for the three and six months ended June 30, 2012, respectively, compared with 25.6% for both the three and six months ended June 30, 2011, respectively.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.

The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing certificate of deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB of New York during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analyses capture changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

Parallel yield curve shifts for market rates;

Current asset and liability spreads to market interest rates are fixed;

Traditional savings and interest-bearing demand accounts move at 10% of the rate ramp in either direction;

Table of Contents

Retail Money Market and Business Money Market accounts move at 25% and 75% of the rate ramp in either direction; respectively; and

Higher-balance demand deposit tiers and promotional demand accounts move at up to 75% of the rate ramp in either direction. The following table sets forth the results of a twelve-month net interest income projection model as of June 30, 2012 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-100	210,304	(3,120)	(1.5)
Static	213,424		
+100	211,349	(2,075)	(1.0)
+200	206,618	(6,806)	(3.2)
+300	202,295	(11,129)	(5.2)

The preceding table indicates that, as of June 30, 2012, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 5.2%, or \$11.1 million. In the event of a 100 basis point decrease in interest rates, net interest income is projected to decrease 1.5%, or \$3.1 million.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of June 30, 2012 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-100	1,234,755	(12,109)	(1.0)	16.6	(1.1)
Flat	1,246,864			16.7	
+100	1,214,483	(32,381)	(2.6)	16.4	(1.7)
+200	1,155,938	(90,926)	(7.3)	15.8	(5.3)
+300	1,075,622	(171,242)	(13.7)	15.0	(10.5)

The preceding table indicates that as of June 30, 2012, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease 13.7%, or \$171.2 million. If rates were to decrease 100 basis points, the model forecasts a 1.0%, or \$12.1 million increase in the present value of equity.

Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Table of Contents

Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in

Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition and results of operations.

Item 1A. Risk Factors

There have been no material changes to the risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1)
April 1, 2012 Through April 30, 2012				1,633,485
May 1, 2012 Through May 31, 2012	760	\$ 14.59	760	1,632,725
June 1, 2012 Through June 30, 2012	267,100	13.75	267,100	1,365,625
Total	267,860	\$ 14.12	267,860
