Notes to Schedule of Investments (Unaudited)

Note 1 Organization and Significant Accounting Policies

A. ORGANIZATION

The Swiss Helvetia Fund, Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the Act), as a non-diversified, closed-end management investment company. The Fund is organized as a corporation under the laws of the State of Delaware.

The investment objective of the Fund is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies. The Fund may also acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

B. SECURITIES VALUATION

The Fund values its investments at fair value in accordance with accounting principles generally accepted in the United States (GAAP).

It is the responsibility of the Fund s Board of Directors (the Board) to establish procedures to provide for the valuation of the Fund s portfolio holdings. When valuing securities for which market quotations are not readily available, or for which the market quotations that are available are considered unreliable, the Fund determines a fair value in good faith in accordance with these procedures (a Fair Value). The Fund may use these procedures to establish the Fair Value of securities when, for example, a significant event occurs between the time the market closes and the time the Fund values its investments.

After consideration of various factors, the Fund may value the securities at their last reported price or at some other value.

When valuing listed equity securities, the Fund uses the last sale price on the securities exchange or national securities market on which such securities primarily are traded (the Primary Market) prior to the calculation of the Fund s net asset value (NAV). When valuing equity securities that are not listed (except privately-held companies and private equity limited partnerships) or that are listed but have not traded on a day on which the Fund calculates its NAV, the Fund uses the mean between the bid and asked prices for that day. If there are no asked quotations for such a security, the value of such security will be the most recent bid quotation on the Primary Market on that day. On any day when a security s Primary Market is closed because of a local holiday or other scheduled closure, but the New York Stock Exchange is open, the Fund may use the prior day s closing prices in valuing such security regardless of the length of the scheduled closing.

When valuing fixed-income securities, the Fund uses the last bid price prior to the calculation of the Fund s NAV. If there is no current bid price for a fixed-income security, the value of such security will be the mean between the last quoted bid and asked prices on that day. Overnight and certain other short-term fixed-income securities with maturities of less than sixty days will be valued by the amortized cost method, unless it is determined that the amortized cost method would not represent the fair value of such security.

Swiss exchange-listed options, including Eurex-listed options, are valued at their most recent sale price (latest bid for long options and the latest ask for short options) on the Primary Market, or if there are no such sales, at the average of the most recent bid and asked quotations on such Primary Market, or if such quotations are not available, at the last bid quotation (in the case of purchased options) or the last asked quotation (in the case of written options). If, however, there are no such quotations, such options will be valued using the implied volatilities observed for similar options or from aggregated data as an input to a model. Options traded in the over-the-counter market are valued at the price communicated by the counterparty to the option, which typically is the price at which the counterparty would close out the transaction. Option contracts that are neither exchange-listed nor traded in the over-the-counter market are valued using implied volatilities as input into widely accepted models (e.g., Black-Scholes). The implied volatilities are obtained through several means and are cross-checked. For valuations where divergent information is received, the Fund uses the most conservative volatility (the lowest volatility in the case of long positions and the highest volatility in the case of short positions).

Notes to Schedule of Investments (Unaudited) (continued)

The Fund is permitted to invest in investments that do not have readily available market quotations. For such investments, the Act requires the Board to determine their Fair Value. The aggregate value of these investments amounted to \$27,233,920, or 6.25% of the Fund s net assets at March 31, 2013, and are listed in Note 3 to the Schedule of Investments.

Various inputs are used to determine the value of the Fund s investments. These inputs are summarized in the three broad levels listed below:

Level 1 unadjusted quoted prices in active markets for identical assets and liabilities

Level 2 other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund s investments as of March 31, 2013:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant servable Inputs	Total
Investments in Securities				
Common Stock* Preferred Stock* Private Equity Limited Partnerships	\$ 402,635,846	\$	\$ 5,518,171 7,416,707 14,299,042	\$ 408,154,017 7,416,707 14,299,042
Total Investments in Securities	\$ 402,635,846	\$	\$ 27,233,920	\$ 429,869,766

^{*} Please see the Schedule of Investments for industry classifications.

Level 3 securities, which are listed in Note 3 to the Schedule of Investments, consist of the Fund s investments in privately-held companies and private equity limited partnerships that invest in privately-held companies.

Inputs and valuation techniques used by the Fund to value its Level 3 investments in privately-held companies may include the following: acquisition cost; fundamental analytical data; discounted cash flow analysis; nature and duration of restrictions on disposition of the investment; public trading of similar securities of similar issuers; economic outlook and condition of the industry in which the issuer participates; financial condition of the issuer; and the issuer s prospects, including any recent or potential management or capital structure changes. At March 31, 2013, privately-held companies, except Eyesense AG, Kuros Biosurgery AG and SelFrag AG, were valued based on a market approach using the most recent observable round of financing, which may also have been acquisition cost. Although these valuation inputs may be observable in the marketplace as is characteristic of Level 2 investments, the privately-held companies, categorized as Level 3 investments, generally are highly illiquid in terms of resale.

The Fund values its Level 3 investments in the two private equity limited partnerships in accordance with Accounting Standards Codification 820-10-35, *Investments in Certain Entities that Calculate Net Asset Value Per Share (Or its Equivalent)* (ASC 820-10-35). ASC 820-10-35 permits a reporting entity to measure the fair value of an investment that does not have a readily determinable fair value, based on the NAV of the investment as a practical expedient, without further adjustment, unless it is probable that the investment will be sold at a value significantly different than the NAV. If the NAV of the investment is not as of the Fund s measurement date, then the NAV should be adjusted to reflect any significant events that may change the valuation. Inputs and valuation techniques for these adjustments may include fair valuations of the partnerships and their portfolio holdings provided by the partnerships general partners or managers, other available information about the partnerships portfolio holdings, values

Notes to Schedule of Investments (Unaudited) (continued)

obtained on redemption from other limited partners, discussions with the partnerships general partners or managers and/or other limited partners and comparisons of previously-obtained estimates to the partnerships audited financial statements. In using the unadjusted NAV as a practical expedient, certain attributes of the investment that may impact its fair value are not considered. Attributes of those investments include the investment strategies of the privately-held companies and may also include, but are not limited to, restrictions on the investor s ability to redeem its investments at the measurement date and any unfunded commitments.

When valuing Level 3 investments, management also may consider potential events that could have a material impact on the operations of a privately-held company or private equity limited partnership. Not all of these factors may be considered or available, and other relevant factors may be considered on an investment-by-investment basis. The table below summarizes the techniques and unobservable inputs for the valuation of Level 3 investments.

Quantitative Information about certain Level 3 Fair Value Measurements

	Fair Value at 3/31/2013	Valuation Technique	Unobservable inputs	Range ¹
Privately-held companies		1		
Medical Technology ²	\$2,617,368	Discounted cash flow	Weighted average cost of capital	12%-18%
			Expected compound annual growth rate of revenue (10 years)	39%-46%
Privately-held companies			· ·	
Medical Technology	\$2,639,812	Market approach	Recent round of financing	N/A
Privately-held companies				
Biotechnology	\$4,432,649	Market approach	Recent round of financing	N/A
Privately-held companies				
Biotechnology ³	\$2,217,646	Discounted cash flow	Weighted average cost of capital	16.50%
			Success rate on research and	
			development	50%
Privately-held companies				
Industrial goods &services ⁴	\$1,027,403	Discounted cash flow	Weighted average cost of capital	12%-25%
			Success rate on research and	
			development	20%-70%*
			Expected compound annual growth rate	
			of revenue (10 years)	38%
Privately-held companies				
Biotechnology venture	\$1,959,329	NAV as practical expedient	N/A	N/A
Privately-held companies		_		
Industrial buy-out	\$12,339,713	NAV as practical expedient	N/A	N/A

Significant changes in any of these ranges would result in a significantly higher or lower fair value measurement. Generally, a change in the success rate on research and development or the expected long-term 10-year revenue growth rate is accompanied by a directionally similar change in fair value. Conversely, a change in the weighted average cost of capital is accompanied by a directionally opposite change in fair value.

² Eyesense AG Preferred Shares, Kuros Biosurgery AG Common Shares were valued based on this technique.

³ Ixodes Preferred shares were valued based on this technique

- SelFrag AG Preferred Shares were valued based on this technique.
- * The inputs range corresponds to different stages of the company s development. The weighted average succes rate is 41%.

Notes to Schedule of Investments (Unaudited) (continued)

The Fund s policy is to disclose transfers between Levels based on their market prices at the reporting period end. There were no transfers between Levels for the three-month period ended March 31, 2013.

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value.

Balance as of December 31, 2012 Change in Unrealized Appreciation/Depreciation Net Realized Gain (Loss) Gross Purchases Gross Sales	Common Stock \$ 5,708,671 (190,500)	Preferred Stock \$ 7,672,749 (256,042)	Private Equity \$ 14,321,652 (353,332) 330,722	Total \$ 27,703,072 (799,874) 330,722
Balance as of March 31, 2013	\$ 5,518,171	\$ 7,416,707	\$ 14,299,042	\$ 27,233,920

C. FOREIGN CURRENCY TRANSLATION

The Fund maintains its accounting records in U.S. dollars. The Fund s assets are invested primarily in Swiss equities. In addition, the Fund makes its temporary investments in Swiss franc-denominated bank deposits, short-term debt securities and money market instruments. Substantially all income received by the Fund is in Swiss francs. The Fund s NAV, however, is reported, and distributions from the Fund are made, in U.S. dollars, resulting in gain or loss from currency conversions in the ordinary course of business. Historically, the Fund has not entered into transactions designed to reduce currency risk and does not intend to do so in the future. The cost basis of foreign denominated assets and liabilities is determined on the date that they are first recorded within the Fund and translated to U.S. dollars. These assets and liabilities are subsequently valued each day at prevailing exchange rates. The difference between the original cost and current value denominated in U.S. dollars is recorded as unrealized foreign currency gain/loss. In valuing securities transactions, the receipt of income and the payment of expenses, the Fund uses the prevailing exchange rate on the transaction date.

D. ESTIMATES

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

E. CONCENTRATION OF MARKET RISK

The Fund primarily invests in securities of Swiss issuers. Such investments may carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include future political and economic developments, unfavorable movements in the U.S. dollar relative to the Swiss franc, and the possible imposition of exchange controls and changes in governmental law and restrictions. In addition, concentrations of investments in securities of issuers located in a specific region exposes the Fund to the economic and government policies of that region and may increase risk compared to a fund whose investments are more diversified.

Notes to Schedule of Investments (Unaudited) (concluded)

Note 2 Capital Commitments

As of March 31, 2013, the Fund maintains illiquid investments in two private equity limited partnerships and one corporation. These investments appear in the Fund s Schedule of Investments. The Fund s capital commitments for these issuers are shown in the table below:

Investments	Original Capital Commitment*	Unfunded Commitment*	Fair Value as of March 31, 2013
Limited Partnerships International (a)			
Aravis Biotech II, LP	\$	\$	\$ 1,959,329
Zurmont Madison Private Equity, LP			12,339,712
Preferred Stock International			
SelFrag AG, Class A, Series D (b)			1.027.403

- * The original capital commitment represents 3,250,000, 14,000,000 and 77,101 Swiss francs for Aravis Biotech II, LP, Zurmont Madison Private Equity, LP and SelFrag AG, respectively. The unfunded commitment represents 781,300, 1,466,682 and 77,101 Swiss francs, respectively. The Swiss franc (CHF)/U.S.dollar exchange rate as of March 31, 2013 was used for conversion and equals 0.9497.
- (a) This category consists of two private equity limited partnerships that invest primarily in ventures, biotechnology and in management buyout of industrial and consumer goods companies. There is no redemption right for the interests in these two limited partnerships. Instead, the nature of the investments in this category is that distributions are received through the realization of the underlying assets of the limited partnership. If these investments were held, it is estimated that the underlying assets of each limited partnership would be realized over 3 to 5 years.
- (b) The unfunded commitment for this security represents a capital commitment in a future round of financing, which has been approved by shareholders but is contingient upon action by the board of directors of SelFrag AG, on or before December 31, 2013.

Item 2. Controls and Procedures.

- (a) The registrant s principal executive officer and principal financial officer have concluded, based on their evaluation of the registrant s disclosure controls and procedures as conducted within 90 days of the filing date of this report, that these disclosure controls and procedures are adequately designed and are operating effectively to ensure that information required to be disclosed by the registrant on Form N-Q is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms.
- (b) There were no changes in the registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the Act (17 CFR 270.30a-3(d)) that occurred during the registrant s most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant s internal control over financial reporting.

Item 3. Exhibits.

Certifications pursuant to Rule 30a-2(a) are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

(Registrant): The Swiss Helvetia Fund, Inc.

By (Signature and Title)*: /s/ Rudolf Millisits

Rudolf Millisits, Chief Executive Officer

Date: May 28, 2013

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, this report has been signed below by the following persons on behalf of the registrant and in the capacities and on the dates indicated.
