TAXPAYERS TO RECEIVE \$1.03 BILLION FROM SALE OF GM COMMON STOCK

WASHINGTON The U.S. Department of the Treasury today announced that it has agreed to sell 30 million shares of General Motors Company (GM) common stock at \$34.41 per share in an underwritten public offering in conjunction with GM's inclusion in the S&P 500 index. The aggregate proceeds to Treasury from the common stock offering are expected to total approximately \$1.03 billion. The UAW Retiree Medical Benefits Trust (VEBA) has also agreed to sell 20 million shares in the offering, making the total offering size 50 million shares. Aggregate proceeds to VEBA from the common stock offering are expected to total approximately \$688 million.

In December 2012, GM repurchased 200 million shares of GM common stock from Treasury. At that time, Treasury also announced that it intended to sell its remaining 300 million shares into the market in an orderly fashion and fully exit its GM investment within the next 12-15 months, subject to market conditions. Since then, Treasury has been selling shares of GM common stock through its pre-defined written trading plans. After giving effect to this offering, Treasury will own approximately 189.2 million shares of GM common stock.

Treasury's sale of its GM common stock is part of its continuing efforts to wind down the Troubled Asset Relief Program (TARP). At the conclusion of this sale, the taxpayers will have recovered \$32.53 billion of the initial GM investment.
