**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

**October 31, 2013**

**1. Organization and Summary of Significant Accounting Policies**

***Nature of Business***

Korn/Ferry International, a Delaware corporation (the Company), and its subsidiaries are engaged in the business of providing talent management solutions, including executive recruitment on a retained basis, recruitment process outsourcing and leadership & talent consulting services. The Company's worldwide network of 87 offices in 37 countries enables it to meet the needs of its clients in all industries.

***Basis of Consolidation and Presentation***

The accompanying financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the year ended April 30, 2013 for the Company and its wholly and majority owned/controlled domestic and international subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. The preparation of the consolidated financial statements conforms with United States ( U.S. ) generally accepted accounting principles ( GAAP ) and prevailing practice within the industry. The consolidated financial statements include all adjustments, consisting of normal recurring accruals and any other adjustments that management considers necessary for a fair presentation of the results for these periods. The results of operations for the interim period are not necessarily indicative of the results for the entire fiscal year.

Investments in affiliated companies, which are 50% or less owned and where the Company exercises significant influence over operations, are accounted for using the equity method.

The Company considers events or transactions that occur after the balance sheet date but before the consolidated financial statements are issued to provide additional evidence relative to certain estimates or to identify matters that require additional disclosures.

***Use of Estimates and Uncertainties***

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates, and changes in estimates are reported in current operations as new information is learned or upon the amounts becoming fixed and determinable. The most significant areas that require management judgment are revenue recognition, restructuring, deferred compensation, annual performance related bonus, evaluation of the carrying value of receivables, marketable securities, goodwill and other intangible assets, fair value of contingent consideration, share-based payments and the recoverability of deferred income taxes.

***Revenue Recognition***

Substantially all professional fee revenue is derived from fees for professional services related to executive recruitment performed on a retained basis, recruitment for non-executive professionals, recruitment process outsourcing and leadership & talent consulting services. Fee revenue from executive recruitment activities and recruitment for non-executive professionals are generally one-third of the estimated first year cash compensation of the placed executive or non-executive professional, as applicable, plus a percentage of the fee to cover indirect expenses. The Company generally recognizes revenue on a straight-line basis over a three-month period, commencing upon client acceptance, as this is the period over which the recruitment services are performed. Fees earned in excess of the initial contract amount are recognized upon completion of the engagement, which reflect the difference between the final actual compensation of the placed executive and the estimate used for purposes of the previous billings. Since the initial contract fees are generally not contingent upon placement of a candidate, our assumptions primarily relate to establishing the period over which such service is performed. These assumptions determine the timing of revenue recognition and profitability for the reported period. Any revenue associated with services that are provided on a contingent basis are recognized once the contingency is fulfilled. In addition to recruitment for non-executive professionals, Futurestep provides recruitment process outsourcing ( RPO ) services and fee revenue is recognized as services are rendered. Fee revenue from Leadership & Talent Consulting ( LTC ) services is recognized as services are rendered for consulting engagements and other time-based services, measured by total hours

---

**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES**

**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**October 31, 2013**

incurred to the total estimated hours at completion. It is possible that updated estimates for the consulting engagement may vary from initial estimates with such updates being recognized in the period of determination. Depending on the timing of billings and services rendered, the Company accrues or defers revenue as appropriate. LTC revenue is also derived from the sale of solution services, which includes revenue from licenses and from the sale of products. Revenue from licenses is recognized using a straight-line method over the term of the contract (generally 12 months). Products sold by the Company mainly consist of books and automated services covering a variety of topics including performance management, team effectiveness, and coaching and development. The Company recognizes revenue for its products when the product has been sold.

***Allowance for Doubtful Accounts***

An allowance is established for doubtful accounts by taking a charge to general and administrative expenses. The amount of the allowance is based on historical loss experience, assessment of the collectability of specific accounts, as well as expectations of future collections based upon trends and the type of work for which services are rendered. After the Company exhausts all collection efforts, the amount of the allowance is reduced for balances identified as uncollectible.

***Cash and Cash Equivalents***

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

***Restricted Cash***

During the six months ended October 31, 2013, the Company transferred the standby letters of credit associated with certain leases for premises from its prior senior secured credit agreement to its current senior unsecured revolving credit agreement and as a result the Company has no restricted cash balance at October 31, 2013 compared to \$2.9 million at April 30, 2013 (see Note 9 *Long-Term Debt*).

***Marketable Securities***

The Company currently has investments in marketable securities and mutual funds which are classified as either trading securities or available-for-sale, based upon management's intent and ability to hold, sell or trade such securities. The classification of the investments in these marketable securities and mutual funds is assessed upon purchase and reassessed at each reporting period. These investments are recorded at fair value and are classified as marketable securities in the accompanying consolidated balance sheets. The investments that the Company may sell within the next twelve months are carried as current assets. Realized gains (losses) on marketable securities are determined by specific identification. Interest is recognized on an accrual basis, dividends are recorded as earned on the ex-dividend date. Interest and dividend income are recorded in the accompanying consolidated statements of income in interest expense, net.

The Company invests in mutual funds (for which market prices are readily available), which are held in trust to satisfy obligations under the Company's deferred compensation plans (see Note 5 *Marketable Securities*), and are classified as trading securities. Such investments are based upon the employees' investment elections in their deemed accounts in the Executive Capital Accumulation Plan and similar plans in Asia Pacific and Canada (ECAP) from a pre-determined set of securities and the Company invests in marketable securities to mirror these elections. The changes in fair value in trading securities are recorded in the accompanying consolidated statements of income in other income, net.

The Company also invests cash in excess of its daily operating requirements and capital needs primarily in marketable fixed income (debt) securities in accordance with the Company's investment policy, which restricts the type of investments that can be made. The Company's investment portfolio includes corporate bonds and U. S. Treasury and agency securities. These marketable fixed income (debt) securities are classified as available-for-sale securities based on management's decision, at the date such securities are acquired, not to hold these securities to maturity or actively trade them. The Company carries these marketable debt securities at fair value based on the market prices for these marketable debt securities or similar debt securities whose prices are readily available. The changes in fair values, net of applicable taxes, are

## Edgar Filing: KORN FERRY INTERNATIONAL - Form 10-Q

recorded as unrealized gains or losses as a component of comprehensive income. When, in the opinion of management, a decline in the fair value of an investment below its amortized cost is considered to be other-than-temporary, a credit loss is recorded

---

**Table of Contents****KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****October 31, 2013**

in the statement of income in other income, net; any amount in excess of the credit loss is recorded as unrealized gains or losses as a component of comprehensive income. Generally, the amount of the loss is the difference between the cost or amortized cost and its then current fair value; a credit loss is the difference between the discounted expected future cash flows to be collected from the debt security and the cost or amortized cost of the debt security. The determination of the other-than-temporary decline includes, in addition to other relevant factors, a presumption that if the market value is below cost by a significant amount for a period of time, a write-down may be necessary. During the three and six months ended October 31, 2013 and 2012, no other-than-temporary impairment was recognized.

***Business Acquisitions***

Business acquisitions are accounted for under the acquisition method. The acquisition method requires the reporting entity to identify the acquirer, determine the acquisition date, recognize and measure the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquired entity, and recognize and measure goodwill or a gain from the purchase. The acquiree's results are included in the Company's consolidated financial statements from the date of acquisition. Assets acquired and liabilities assumed are recorded at their fair values and the excess of the purchase price over the amounts assigned is recorded as goodwill, or if the fair value of the assets acquired exceeds the purchase price consideration, a bargain purchase gain is recorded. Adjustments to fair value assessments are generally recorded to goodwill over the measurement period (not longer than twelve months). The acquisition method also requires that acquisition-related transaction and post-acquisition restructuring costs be charged to expense as committed, and requires the Company to recognize and measure certain assets and liabilities including those arising from contingencies and contingent consideration in a business combination. During the six months ended October 31, 2013, the Company paid contingent consideration to the selling stockholders of PDI Ninth House (PDI) of \$15 million, as required under the merger agreement, as a result of the achievement of certain pre-determined goals associated with expense synergies.

***Goodwill and Intangible Assets***

Goodwill represents the excess of the purchase price over the fair value of assets acquired. The goodwill impairment test compares the fair value of a reporting unit with its carrying amount, including goodwill. If the carrying amount of a reporting unit exceeds its fair value, goodwill of the reporting unit would be considered impaired. To measure the amount of the impairment loss, the implied fair value of a reporting unit's goodwill is compared to the carrying amount of that goodwill. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. If the carrying amount of a reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. For each of these tests, the fair value of each of the Company's reporting units is determined using a combination of valuation techniques, including a discounted cash flow methodology. To corroborate the discounted cash flow analysis performed at each reporting unit, a market approach is utilized using observable market data such as comparable companies in similar lines of business that are publicly traded or which are part of a public or private transaction (to the extent available). Results of the annual impairment test performed as of January 31, 2013, indicated that the fair value of each reporting unit exceeded its carrying amount. As a result, no impairment charge was recognized. There were no indicators of impairment as of October 31, 2013 and April 30, 2013.

Intangible assets primarily consist of customer lists, non-compete agreements, proprietary databases, intellectual property and trademarks and are recorded at their estimated fair value at the date of acquisition and are amortized in a pattern in which the asset is consumed if that pattern can be reliably determined, or using the straight-line method over their estimated useful lives which range from two to 24 years. For intangible assets subject to amortization, an impairment loss is recognized if the carrying amount of the intangible assets is not recoverable and exceeds fair value. The carrying amount of the intangible assets is considered not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from use of the asset. Intangible assets with indefinite lives are not amortized, but are reviewed annually for impairment or more frequently whenever events or changes in circumstances indicate that the fair value of the asset may be less than its carrying amount. As of October 31, 2013 and April 30, 2013, there were no indicators of impairment with respect to the Company's intangible assets.

***Compensation and Benefits Expense***

Compensation and benefits expense in the accompanying consolidated statements of income consist of compensation and benefits paid to consultants (employees who originate business), executive officers and administrative and support personnel.

---

**Table of Contents**

**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES**

**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**October 31, 2013**

The most significant portions of this expense are salaries and the amounts paid under the annual performance related bonus plan to employees. The portion of the expense applicable to salaries is comprised of amounts earned by employees during a reporting period. The portion of the expenses applicable to annual performance related bonuses refers to the Company's annual employee performance related bonus with respect to a fiscal year, the amount of which is communicated and paid to each eligible employee following the completion of the fiscal year.

Each quarter, management makes its best estimate of its annual performance related bonuses, which requires management to, among other things, project annual consultant productivity (as measured by engagement fees billed and collected by executive search consultants and revenue and other performance metrics for LTC and Futurestep consultants), Company performance including profitability, competitive forces and future economic conditions and their impact on the Company's results. At the end of each fiscal year, annual performance related bonuses take into account final individual consultant productivity, Company results including profitability, the achievement of strategic objectives, the results of individual performance appraisals, and the current economic landscape. Accordingly, each quarter the Company re-evaluates the assumptions used to estimate annual performance related bonus liability and adjusts the carrying amount of the liability recorded on the consolidated balance sheet and reports any changes in the estimate in current operations.

Because annual performance-based bonuses are communicated and paid only after the Company reports its full fiscal year results, actual performance-based bonus payments may differ from the prior year's estimate. Such changes in the bonus estimate historically have been immaterial and are recorded in current operations in the period in which they are determined. The performance related bonus expense was \$68.2 million and \$54.0 million for the six months ended October 31, 2013 and 2012, respectively, which was reduced by a change in the previous years' estimate recorded in the first quarter of fiscal 2014 and 2013 of \$0.7 million and \$0.2 million, respectively. This resulted in net bonus expense of \$67.5 million and \$53.8 million in the six months ended October 31, 2013 and 2012, respectively, included in compensation and benefits expense in the consolidated statements of income. During the three months ended October 31, 2013 and 2012, the performance related bonus expense was \$37.0 million and \$27.4 million, respectively, included in compensation and benefits expense. No change in estimate related to previous years' estimates was recorded in the three months ended October 31, 2013 or 2012.

Other expenses included in compensation and benefits expense are due to changes in deferred compensation and pension plan liabilities, changes in cash surrender value (CSV) of company owned life insurance (COLI) contracts, amortization of stock compensation awards, payroll taxes and employee insurance benefits.

***Restructuring Charges, Net***

The Company accounts for its restructuring charges as a liability when the obligations are incurred and records such charges at fair value. Changes in the estimates of the restructuring charges are recorded in the period the change is determined.

***Stock-Based Compensation***

The Company has employee compensation plans under which various types of stock-based instruments are granted. These instruments principally include stock options, restricted stock units, restricted stock and an Employee Stock Purchase Plan (ESPP). The Company recognizes compensation expense related to restricted stock units, restricted stock and the estimated fair value of stock options and stock purchases under the ESPP on a straight-line basis over the service period for the entire award.

***Reclassifications***

Certain prior year amounts have been reclassified to conform to the current year presentation.

***Recently Adopted Accounting Standards***

## Edgar Filing: KORN FERRY INTERNATIONAL - Form 10-Q

In February 2013, the Financial Accounting Standards Board ( FASB ) issued updated guidance requiring entities to provide information about the amounts reclassified out of accumulated other comprehensive income ( AOCI ) by component. In addition, an entity is required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is

**Table of Contents****KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****October 31, 2013**

required to be reclassified in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional details about those amounts. No changes were made to the current requirements for reporting net income or other comprehensive income in the financial statements. The guidance is effective for annual and interim reporting periods beginning after December 15, 2012. The Company adopted this guidance during the six months ended October 31, 2013 and the adoption did not have an impact on the financial statements of the Company.

In July 2012, the FASB issued updated guidance on the periodic testing of indefinite-lived intangible assets for impairment. This guidance allows companies to assess qualitative factors to determine if it is more likely than not that the indefinite lived intangible asset might be impaired and whether it is necessary to perform a quantitative impairment test. This new guidance is effective for the Company beginning May 1, 2013, with early adoption permitted. The Company will perform its annual impairment test as of January 31, 2014, and plans to perform a quantitative impairment test.

***Recently Proposed Accounting Standards***

In March 2013, the FASB issued guidance on releasing cumulative translation adjustments when a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity. In addition, these amendments provide guidance on the release of cumulative translation adjustments in partial sales of equity method investments and in step acquisitions. This new guidance is effective on a prospective basis for fiscal years and interim reporting periods beginning after December 15, 2013. The amendments should be applied prospectively to derecognition events occurring after the effective date. Prior periods should not be adjusted and early adoption is permitted. The Company plans to adopt this guidance beginning May 1, 2014. The Company does not expect the adoption of this guidance to have a material impact on its financial condition or results of operations.

In June 2013, the FASB issued guidance on how a liability for an unrecognized tax benefit should be presented in the financial statements if the ultimate settlement of such liability will not result in a cash payment to the tax authority but will, rather, reduce a deferred tax asset for a net operating loss or tax credit carryforward. The FASB concluded that, when settlement in such manner is available under tax law, an unrecognized tax benefit should be presented as a reduction of the deferred tax asset associated with the net operating loss or tax credit carryforward. This new guidance is effective for fiscal years and interim periods within those years beginning after December 15, 2013. The Company will adopt the provisions of this new guidance beginning May 1, 2014, and does not expect the adoption of this guidance to have a material impact on its financial condition or results of operations.

**2. Basic and Diluted Earnings Per Share**

Basic earnings per common share was computed by dividing net earnings attributable to common stockholders by the weighted-average number of common shares outstanding. Diluted earnings per common share was computed by dividing net earnings attributable to common stockholders by the weighted-average number of common shares outstanding plus dilutive common equivalent shares. Dilutive common equivalent shares include all in-the-money outstanding options or other contracts to issue common stock as if they were exercised or converted. During both the three and six months ended October 31, 2013, options to purchase 0.1 million shares were outstanding but not included in the computation of diluted earnings per share because they were anti-dilutive. During both the three and six months ended October 31, 2012, options to purchase 0.6 million shares were outstanding but not included in the computation of diluted earnings per share because they were anti-dilutive.

The Company uses the Black-Scholes option valuation model to estimate the grant date fair value of employee stock options. The expected volatility reflects consideration of the historical volatility in the Company's publicly traded stock during the period the option is granted. The Company believes historical volatility in these instruments is more indicative of expected future volatility than the implied volatility in the price of the Company's common stock. The expected life of each option is estimated using historical data. The risk-free interest rate is based on the U.S. Treasury zero-coupon issue with a remaining term approximating the expected term of the option. The Company uses historical data to estimate forfeiture rates applied to the gross amount of expense determined using the option valuation model. The Company did not grant stock options in the three and six months ended October 31, 2013 and 2012.

The Black-Scholes option pricing model was developed for use in estimating the fair value of traded options. The assumptions used in option valuation models are highly subjective, particularly the expected stock price volatility of the underlying stock.

**Stock Incentive Plans**

At the Company's 2012 Annual Meeting of Stockholders, held on September 27, 2012, the Company's stockholders approved an amendment and restatement to the Korn/Ferry International Amended and Restated 2008 Stock Incentive Plan (the 2012 amendment and restatement being the Second A&R 2008 Plan), which among other things, increased the current maximum number of shares that may be issued under the plan to 5,700,000 shares, subject to certain changes in the Company's capital structure and other extraordinary events. The Second A&R 2008 Plan provides for the grant of awards to eligible participants, designated as either nonqualified or incentive stock options, restricted stock and restricted stock units, any of which may be performance-based or market-based, and incentive bonuses, which may be paid in cash or a combination thereof. Under the Second A&R 2008 Plan, the ability to issue full-value awards is limited by requiring full-value stock awards to count 1.91 times as much as stock options.

***Restricted Stock***

The Company grants time-based restricted stock awards to executive officers and other senior employees generally vesting over a three to four year period. Employees may receive restricted stock annually in conjunction with the Company's performance review as well as upon commencement of employment. Time-based restricted stock awards are granted at a price equal to fair value, which is determined based on the closing price of the Company's common stock on the grant date. The Company recognizes compensation expense for time-based restricted stock awards on a straight-line basis over the vesting period.

The Company also grants market-based restricted stock units to executive officers and other senior employees. The market-based units vest after three years depending upon the Company's total stockholder return over the three-year performance period relative to other companies in its selected peer group. The fair value of these market-based restricted stock units was determined by a third-party valuation using extensive market data that are based on historical Company and peer group information. The Company recognizes compensation expense for market-based

**Table of Contents****KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****October 31, 2013****6. Deferred Compensation and Retirement Plans**

The Company has several deferred compensation and retirement plans for eligible consultants and vice-presidents that provide defined benefits to participants based on the deferral of current compensation or contributions made by the Company subject to vesting and retirement or termination provisions. In June 2003, the Company amended the deferred compensation plans, with the exception of the ECAP and international retirement plans, so as not to allow new participants or the purchase of additional deferral units by existing participants.

The components of net periodic benefit costs are as follows:

	<b>Three Months</b>		<b>Six Months Ended</b>	
	<b>Ended October 31, 2013</b>	<b>2012</b>	<b>October 31, 2013</b>	<b>2012</b>

<b>Net periodic benefit costs</b>	<b>\$ 1,455</b>	<b>\$ 1,350</b>	<b>\$ 2,911</b>	<b>\$ 2,700</b>

The Company purchased COLI contracts insuring employees eligible to participate in the deferred compensation and pension plans as a means of funding benefits under such plans. The gross CSV of these contracts of \$164.2 million and \$159.2 million is offset by outstanding policy loans of \$73.3 million in the accompanying consolidated balance sheets as of October 31, 2013 and April 30, 2013, respectively. The market value of the underlying COLI investments increased by \$3.3 million and \$4.6 million during the three and six months ended October 31, 2013, respectively, and is recorded as a decrease in compensation and benefits expense in the accompanying consolidated statement of income. During the three and six months ended October 31, 2012, the market value of the underlying COLI investments increased by \$1.5 million and \$2.2 million, respectively, and is recorded as a decrease in compensation and benefits expense in the accompanying consolidated statement of income.

The Company has an ECAP, which is intended to provide certain employees an opportunity to defer salary and/or bonus on a pre-tax basis or make an after-tax contribution. The Company made contributions to the ECAP during the three and six months ended October 31, 2013, of \$2.5 million and \$16.7 million, respectively. The Company made contributions to the ECAP during the three and six months ended October 31, 2012, of \$1.8 million and \$19.3 million, respectively. As these contributions vest, the amounts are recorded as a liability in deferred compensation and other retirement plans on the accompanying balance sheet and compensation and benefits on the accompanying consolidated statement of income. Certain key management may also receive Company ECAP contributions upon commencement of employment. Participants generally vest in Company contributions over a four year period. The ECAP is accounted for whereby the changes in the fair value of the vested amounts owed to the participants are adjusted with a corresponding charge (or credit) to compensation and benefits costs. During the three and six months ended October 31, 2013, deferred compensation liability increased; therefore, the Company recognized an increase in compensation expense of \$3.4 million and \$5.0 million, respectively. During the three and six months ended October 31, 2012, deferred compensation liability increased; therefore, the Company recognized an increase in compensation expense of \$1.5 million and \$0.5 million, respectively.

Offsetting these changes in compensation and benefits expense was an increase in the fair value of marketable securities classified as trading (held in trust to satisfy obligations under certain deferred compensation liabilities) of \$4.4 million and \$1.9 million in the three months ended October 31, 2013 and 2012, respectively, and \$6.4 million and \$1.1 million in the six months ended October 31, 2013 and 2012, respectively, recorded in other income, net on the consolidated statement of income.

**Executive Summary**

Korn/Ferry International (referred to herein as the Company, Korn/Ferry, or in the first person notations we, our, and us) is a premier global provider of talent management solutions that helps clients design strategies to assist clients in building and attracting their talent. We are a premier provider of executive recruitment, leadership and talent consulting and talent acquisition solutions with the broadest global presence in the recruitment industry. Our services include Executive Recruitment, consulting and solutions services through Leadership & Talent Consulting (LTC) and recruitment for non-executive professionals and recruitment process outsourcing (RPO) through Futurestep. Approximately 75% of the executive recruitment searches we performed in fiscal 2013 were for board level, chief executive and other senior executive and general management positions. Our 5,228 clients in fiscal 2013 included many of the world's largest and most prestigious public and private companies, including approximately 42% of the FORTUNE 500, middle market and emerging growth companies, as well as government and nonprofit organizations. We have built strong client loyalty, with 81% of assignments performed during fiscal 2013 having been on behalf of clients for whom we had conducted assignments in the previous three fiscal years.

In an effort to maintain our long-term strategy of being a leading provider of talent management solutions, our strategic focus for fiscal 2014 centers upon enhancing the integration of our multi-service strategy. We plan to continue to address areas of increasing client demand including LTC and RPO. We further plan to explore new products and services, continue to pursue a disciplined acquisition strategy, enhance our technology and processes and aggressively leverage our brand through thought leadership and intellectual capital projects as a means of delivering world-class service to our clients.

During fiscal 2013, nearly 88% of our top 50 clients utilized at least two of our service lines. During fiscal 2013, we completed the acquisitions of Minneapolis-based PDI Ninth House (PDI), a leading, globally-recognized provider of leadership assessment and development solutions, and Global Novations, LLC, (Global Novations) a leading provider of

diversity and inclusion and leadership development solutions, which are collectively referred to herein as the prior year acquisitions. As a result, in fiscal 2013, we implemented a restructuring plan focused on integrating the synergies associated with the prior year acquisitions. We continued to implement this plan during the first half of fiscal 2014 and in connection with the plan, recorded restructuring charges of \$3.7 million during the six months ended October 31, 2013, of which \$2.9 million was for facility costs in order to integrate PDI by consolidating and eliminating redundant office space around the world and severance costs of \$0.8 million to consolidate certain overhead functions.

The Company currently operates in three global business segments: Executive Recruitment, LTC and Futurestep. See Note 8 *Business Segments*, in the Notes to our Consolidated Financial Statements for discussion of the Company's global business segments. The Company evaluates performance and allocates resources based on the chief operating decision maker's review of (1) fee revenue and (2) earnings before interest, taxes, depreciation and amortization (EBITDA), which is further adjusted to exclude restructuring charges (net of recoveries), and/or transaction, integration and separation costs (Adjusted EBITDA). EBITDA and Adjusted EBITDA are non-GAAP financial measures. They have limitations as analytical tools, should not be viewed as substitutes for financial information determined in accordance with GAAP, and should not be considered in isolation or as substitutes for analysis of the Company's results as reported under GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Management believes the presentation of these non-GAAP financial measures provides meaningful supplemental information regarding Korn/Ferry's performance by excluding certain charges and other items that may not be indicative of Korn/Ferry's ongoing operating results. The use of these non-GAAP financial measures facilitates comparisons to Korn/Ferry's historical performance. Korn/Ferry includes these non-GAAP financial measures because management believes they are useful to investors in allowing for greater transparency with respect to supplemental information used by management in its evaluation of Korn/Ferry's ongoing operations and financial and operational decision-making. The accounting policies for the reportable segments are the same as those described in the summary of significant accounting policies in the accompanying consolidated financial statements, except that the above noted items are excluded from Adjusted EBITDA.

Fee revenue increased \$41.8 million, or 21% (7% increase excluding fee revenue from the prior year acquisitions), in the three months ended October 31, 2013 to \$238.0 million compared to \$196.2 million in the year-ago quarter, with increases in fee revenue in all regions of Executive Recruitment, Futurestep, and LTC. During the three months ended October 31, 2013, we recorded operating income of \$23.2 million with Executive Recruitment, LTC, and Futurestep segments contributing \$28.1 million, \$7.0 million, and \$2.6 million, respectively, offset by corporate expenses of \$14.5 million. Net income during the three months ended October 31, 2013 and 2012 was \$18.8 million and \$1.2 million, respectively. Adjusted EBITDA was \$36.7 million with Executive Recruitment, LTC, and Futurestep segments contributing \$30.7 million, \$10.3 million, and \$3.0 million, respectively, offset by corporate expenses of \$7.3 million during the three months ended October 31, 2013. Adjusted EBITDA increased \$12.3 million during the three months ended October 31, 2013, from Adjusted EBITDA of \$24.4 million during the three months ended October 31, 2012.

Our cash, cash equivalents and marketable securities decreased \$51.1 million, or 14%, to \$314.9 million at October 31, 2013 compared to \$366.0 million at April 30, 2013, mainly due to bonuses earned in fiscal 2013 and paid during the first quarter of fiscal 2014 and \$15.0 million in contingent consideration paid to selling stockholders of PDI, partially offset by cash provided by operating activities. As of October 31, 2013, we held marketable securities to settle obligations under the ECAP with a cost value of \$109.4 million and a fair value of \$118.0 million. Our vested and unvested obligations for which these assets were held in trust totaled \$119.3 million as of October 31, 2013. Our working capital increased by \$42.3 million to \$220.8 million in the six months ended October 31, 2013. We believe that cash on hand and funds from operations will be sufficient to meet our anticipated working capital, capital expenditures and general corporate requirements in the next twelve months. We had no long-term debt or any outstanding borrowings under our credit facility at October 31, 2013 or April 30, 2013. As of April 30, 2013, under our previous senior secured credit agreement we were required to maintain \$2.9 million in restricted cash to provide collateral for the standby letters of credit that were outstanding. There is no restricted cash requirement under our current senior unsecured revolving credit agreement and, as a result, the Company had no restricted cash balance as of October 31, 2013. As of October 31, 2013 and April 30, 2013, there was \$2.7 million of standby letters of credit issued under our long-term debt arrangements.

***Interest Expense, Net***

Interest expense, net primarily relates to borrowings under our COLI policies, which is partially offset by interest earned on cash and cash equivalent balances. Interest expense, net was \$1.2 million in the six months ended October 31, 2013 as compared to \$1.4 million in the six months ended October 31, 2012.

***Income Tax Provision***

The provision for income taxes was \$16.0 million in the six months ended October 31, 2013 compared to \$8.3 million in the six months ended October 31, 2012. The provision for income taxes in the six months ended October 31, 2013 and 2012 reflects a 36% and 44% effective tax rate, respectively. The decrease in the effective tax rate for the six months ended October 31, 2013 is due to a higher percentage of taxable income arising in jurisdictions with lower statutory tax rates and lower restructuring costs in jurisdictions in which tax benefits cannot be recognized.

***Equity in Earnings of Unconsolidated Subsidiaries***

Equity in earnings of unconsolidated subsidiaries is comprised of our less than 50% interest in our Mexican subsidiary and IGroup, LLC. We report our interest in earnings or loss of our Mexican subsidiary and IGroup, LLC on the equity basis as a one-line adjustment to net income. Equity in earnings was \$1.0 million in both the six months ended October 31, 2013 and 2012.

**Table of Contents****Liquidity and Capital Resources**

Our performance is subject to the general level of economic activity in the geographic regions and the industries which we service. While we believe, based on current economic conditions, that our cash on hand and funds from operations will be sufficient to meet anticipated working capital, capital expenditures and general corporate requirements during the next twelve months, if the national or global economy, credit market conditions, and/or labor markets were to deteriorate in the future, it is likely that such changes would put negative pressure on demand for our services and affect our operating cash flows. If these conditions were to persist over an extended period of time, we may incur negative cash flows, and it might require us to access our existing credit facility to meet our capital needs.

Cash and cash equivalents and marketable securities were \$314.9 million and \$366.0 million as of October 31, 2013 and April 30, 2013, respectively. As of October 31, 2013 and April 30, 2013, we held \$128.1 million and \$146.8 million, respectively of cash and cash equivalents in foreign locations, substantially all of which is readily convertible into other foreign currencies. If these amounts were distributed to the United States, in the form of dividends, we would be subject to additional U.S. income taxes. The Company has a plan to distribute a portion of the cash held in foreign locations to the United States and has recorded a \$0.9 million deferred tax liability for additional taxes that would arise in connection with these distributions. Cash and cash equivalents consist of cash and highly liquid investments purchased with original maturities of three months or less. Marketable securities consist of mutual funds and investments in corporate bonds and U.S. Treasury and agency securities. The primary objectives of our investment in mutual funds are to meet the obligations under certain of our deferred compensation plans, while the other securities are available for general corporate purposes.

As of October 31, 2013 and April 30, 2013, our marketable securities of \$132.3 million and \$141.9 million, respectively, included \$118.0 million (net of gross unrealized gains of \$9.2 million and gross unrealized losses of \$0.6 million) and \$98.0 million (net of gross unrealized gains of \$3.1 million and no gross unrealized losses), respectively, held in trust for settlement of our obligations under certain deferred compensation plans, of which \$113.5 million and \$93.5 million, respectively, are classified as non-current. Our vested and unvested obligations for which these assets were held in trust totaled \$119.3 million and \$99.2 million as of October 31, 2013 and April 30, 2013, respectively. As of October 31, 2013, we had marketable securities classified as available-for-sale with a balance of \$14.3 million. These securities represent excess cash invested under our investment policy with a professional money manager and are available for general corporate purposes.

The net increase in our working capital of \$42.3 million as of October 31, 2013 compared to April 30, 2013 is primarily attributable to an increase in accounts receivable, a decrease in other accrued liabilities and in compensation and benefits payable, partially offset by a decrease in cash and cash equivalents and marketable securities. Cash and cash equivalents, marketable securities and compensation and benefits payable decreased due to the payment of annual bonuses earned in fiscal 2013 and paid during the first quarter of fiscal 2014 and Company contributions made to the ECAP while accounts receivable increased due to an increase in the number of days sales outstanding which increased from 59 days to 71 days (which is consistent with historical experience) from April 30, 2013 to October 31, 2013. Also contributing to the decrease in cash and cash equivalents and other accrued liabilities was the contingent consideration payment of \$15.0 million made to the selling stockholders of PDI. Cash used in operating activities was \$35.6 million in the six months ended October 31, 2013, a decrease of \$7.7 million, from cash used in operating activities of \$43.3 million in the six months ended October 31, 2012. The decrease in cash used in operating activities is primarily due to an increase in profitability offset by an increase in our days of sales outstanding in the six months ended October 31, 2013 compared to the six months ended October 31, 2012.

Cash used in investing activities was \$7.9 million in the six months ended October 31, 2013; a decrease of \$35.2 million from cash used in investing activities of \$43.1 million in the six months ended October 31, 2012. The decrease in cash used in investing activities is primarily attributable to the acquisition of Global Novations of \$34.4 million in prior year, an increase of \$17.7 million in net proceeds from the purchase and sale/maturities of marketable securities and \$2.9 million in restricted cash that became unrestricted during the six months ended October 31, 2013, as described below, offset by the payment of the contingent consideration to the selling stockholders of PDI of \$15.0 million and an increase in cash used to purchase property and equipment (including capitalized software) of \$4.8 million.

Cash provided in financing activities during the six months ended October 31, 2013 was \$2.0 million as compared to cash used by financing activities of \$1.5 million in the six months ended October 31, 2012. Cash provided in financing activities increased primarily due to an increase of \$2.8 million in cash proceeds from the exercise of employee stock options and a decrease in the cash used to repurchase shares of common stock to satisfy tax withholding requirements upon the vesting of restricted stock by \$0.7 million. As of October 31, 2013, \$24.4 million remained available for common stock repurchases under our stock repurchase program, approved by the Board of Directors on November 2, 2007.

**Table of Contents*****Cash Surrender Value of Company Owned Life Insurance Policies, Net of Loans***

As of October 31, 2013 and April 30, 2013, we held contracts with gross CSV of \$164.2 million and \$159.2 million, respectively. In fiscal 2014 and 2013, we paid our premiums under our COLI contracts from operating cash, and in prior years, we generally borrowed under our COLI contracts to pay related premiums. Such borrowings do not require annual principal repayments, bear interest primarily at variable rates and are secured by the CSV of COLI contracts. Total outstanding borrowings against the CSV of COLI contracts were \$73.3 million as of October 31, 2013 and April 30, 2013. At October 31, 2013 and April 30, 2013, the net cash value of these policies was \$90.9 million and \$85.9 million, respectively.

***Long-Term Debt***

Our senior unsecured revolving Credit Agreement provides for an aggregate availability up to \$75.0 million with an option to increase the facility by an additional \$50.0 million, subject to lender consent, and a \$15.0 million sub-limit for letters of credit (the Facility). The Facility matures on January 18, 2018. Borrowings under the Facility bear interest, at our election, at the London Interbank Offered Rate (LIBOR) plus the applicable margin or the base rate plus the applicable margin. The base rate is the highest of (i) the published prime rate, (ii) the federal funds rate plus 1.50%, or (iii) one month LIBOR plus 1.50%. The applicable margin is based on a percentage per annum determined in accordance with a specified pricing grid based on the total funded debt to adjusted EBITDA ratio. For LIBOR loans, the applicable margin will range from 0.50% to 1.50% per annum, while for base rate loans the applicable margin will range from 0.00% to 0.25% per annum. We are required to pay a quarterly commitment fee of 0.25% to 0.35% on the Facility's unused commitments based on the Company's funded debt to adjusted EBITDA ratio. The financial covenants include a maximum consolidated funded debt to adjusted EBITDA ratio, and a minimum adjusted EBITDA, each as defined in the Credit Agreement. As of October 31, 2013, we complied with the financial covenants. In addition, there is a domestic liquidity requirement that we maintain \$50 million in unrestricted cash and/or marketable securities (excluding any marketable securities that are held in trust for the settlement of our obligations under certain deferred compensation plans) as a condition to consummating permitted acquisitions, paying dividends to our stockholders and shares repurchases of our common stock. We are permitted to pay up to \$50.0 million in dividends in any fiscal year (subject to the satisfaction of certain conditions), which amount is further limited by any shares repurchased and any consideration paid with respect to acquisitions during such fiscal year.

As of October 31, 2013 and April 30, 2013, we had no borrowings under the Facility. At October 31, 2013 and April 30, 2013, there was \$2.7 million of standby letters of credit issued associated with certain lease premises. As of April 30, 2013, under our previous secured senior credit agreement, we were required to maintain \$2.9 million in restricted cash to provide collateral for the standby letters of credit that remain outstanding. During the six months ended October 31, 2013 we transferred the standby letters of credit to the Facility. Since there is no restricted cash requirement under the Facility, the Company has no restricted cash balance as of October 31, 2013.

**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements and have not entered into any transactions involving unconsolidated, special purpose entities. We had no material changes in contractual obligations as of October 31, 2013, as compared to those disclosed in our table of contractual obligations included in our Annual Report.

**Critical Accounting Policies**

Preparation of this Quarterly Report on Form 10-Q requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results may differ from those estimates and assumptions and changes in the estimates are reported in current operations. In preparing our interim consolidated financial statements and accounting for the underlying transactions and balances, we apply our accounting policies as disclosed in the notes to our consolidated financial statements. We consider the policies related to revenue recognition, performance related bonus, deferred compensation, and the carrying values of receivables, marketable securities, goodwill, intangible assets, fair value of contingent consideration and recoverability of deferred income taxes as critical to an understanding of our interim

consolidated financial statements because their application places the most significant demands on management's judgment. Specific risks for these critical accounting policies are described in our Form 10-K filed with the Securities Exchange Commission. There have been no material changes in our critical accounting policies since fiscal 2013.

### ***Item 3. Quantitative and Qualitative Disclosures About Market Risk***

As a result of our global operating activities, we are exposed to certain market risks, including foreign currency exchange fluctuations and fluctuations in interest rates. We manage our exposure to these risks in the normal course of our business as described below. We have not utilized financial instruments for trading, hedging or other speculative purposes nor do we trade in derivative financial instruments.

#### **Foreign Currency Risk**

Substantially all our foreign subsidiaries' operations are measured in their local currencies. Assets and liabilities are translated into U.S. dollars at the rates of exchange in effect at the end of each reporting period and revenue and expenses are translated at average rates of exchange during the reporting period. Resulting translation adjustments are reported as a component of accumulated other comprehensive income on our consolidated balance sheets.

Transactions denominated in a currency other than the reporting entity's functional currency may give rise to transaction gains and losses that impact our results of operations. Historically, we have not realized significant foreign currency gains or losses on such transactions. During the six months ended October 31, 2013, we recognized foreign currency gains, on an after tax basis, of \$0.4 million compared to the six months ended October 31, 2012 in which we recognized foreign currency losses, on an after tax basis, of \$0.1 million.

Our primary exposure to exchange losses or gains is based on outstanding intercompany loan balances denominated in U.S. dollars. If the U.S. dollar strengthened or weakened by 15%, 25% and 35% against the Pound Sterling, the Euro, the Canadian dollar, the Australian dollar and the Yen, our exchange loss or gain for the three months ended October 31, 2013 would have been \$2.7 million, \$4.5 million and \$6.3 million, respectively, based on outstanding balances at October 31, 2013.

#### **Interest Rate Risk**

We primarily manage our exposure to fluctuations in interest rates through our regular financing activities, which generally are short term and provide for variable market rates. As of October 31, 2013 and April 30, 2013, we had no outstanding borrowings under our Facility. We had \$73.3 million of borrowings against the CSV of COLI contracts as of October 31, 2013 and April 30, 2013, bearing interest primarily at variable rates. The risk of fluctuations in these variable rates is minimized by the fact that we receive a corresponding adjustment to our borrowed funds crediting rate on the CSV on our COLI contracts.

### ***Item 4. Controls and Procedures***

#### **(a) Evaluation of Disclosure Controls and Procedures.**

Based on their evaluation of our disclosure controls and procedures conducted as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective.

#### **(b) Changes in Internal Control over Financial Reporting.**

There were no changes in our internal control over financial reporting during the three months ended October 31, 2013 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

**Table of Contents****PART II.****Item 1. Legal Proceedings**

From time to time, the Company has been and is involved in litigation incidental to its business. The Company is currently not a party to any litigation, which, if resolved adversely against the Company, would, in the opinion of management, after consultation with legal counsel, have a material adverse effect on the Company's business, financial position or results of operations.

**Item 1A. Risk Factors**

In our Form 10-K for the year ended April 30, 2013, we described material risk factors facing our business. Additional risks not presently known to us or that we currently deem immaterial may also impair our business operations. As of the date of this report, there have been no material changes to the risk factors described in our Form 10-K.

(2) On November 2, 2007, the Board of Directors approved the repurchase of \$50 million of our common stock in a common stock repurchase program. The shares can be repurchased in open market transactions or privately negotiated transactions at our discretion.

Under our credit facility, we are permitted to pay up to \$50.0 million in dividends in any fiscal year (subject to the satisfaction of certain conditions), which amount is further limited by any shares repurchased and any consideration paid with respect to acquisitions during such fiscal year and requires us to maintain \$50.0 million in unrestricted cash and/or marketable securities (excluding any marketable securities that are held in trust for the settlement of the Company's obligation under certain deferred compensation plans) as a condition to consummating permitted acquisitions, paying dividends to our stockholders and repurchasing shares of our common stock.
