- (i) Direct costs above excludes helicopter lease and associated costs. These costs are combined in the consolidated statement of operations, which are included in the unaudited interim consolidated financial statements and the audited annual consolidated financial statements included elsewhere in this prospectus.
- (ii) Adjusted EBITDAR is a non-GAAP measure that is defined as earnings (loss) before interest, taxes, depreciation, amortization and helicopter lease and associated costs or total revenue plus earnings from equity accounted investees, less direct costs excluding helicopter lease and associated costs less general and administration costs. Adjusted EBITDAR also excludes restructuring costs, asset impairments, gain (loss) on disposal of assets and goodwill impairment, if any. These items are significant components to understanding and assessing financial performance and liquidity. Adjusted EBITDAR margin is calculated as Adjusted EBITDAR divided by total revenue less reimbursable revenue. Cost reimbursements from customers are recorded as reimbursable revenue with the related reimbursement expense in direct costs. See our Management's Discussion and Analysis of

Use of Proceeds

We estimate that the net proceeds we receive from this offering, after deducting underwriting discounts and estimated offering expenses of \$24.7 million payable by us in connection with the offering, will be approximately \$285.3 million, or approximately \$329.4 million if the underwriters exercise in full their right to purchase additional ordinary shares from us, based on our initial public offering price of \$10.00 per share.

We intend to use approximately \$134.0 million of the net proceeds from this offering to redeem 10% of the aggregate principal amount of our senior secured notes at 103% of the principal amount, plus accrued and unpaid interest, if any, a portion of the net proceeds, together with cash then on hand, to repay borrowings under our existing senior secured revolving credit facility of \$225.0 million and the remaining net proceeds, if any, for general corporate purposes. The senior secured notes bear interest at an annual rate of 9.25%, with semi-annual interest payments due on April 15 and October 15, and mature on October 15, 2020.

As of October 31, 2013, we had \$15.0 million of borrowings outstanding under our existing senior secured revolving credit facility and \$53.4 million of letters of credit were issued and outstanding under such credit facility. Subsequent to October 31, 2013, the borrowings under our existing senior secured revolving credit facility increased from \$15.0 million by \$210.0 million to \$225.0 million as of the date of this prospectus. This indebtedness had a weighted average interest rate of 7.25% as of October 31, 2013. Our existing senior secured revolving credit facility matures in 2015. We intend to enter into a new senior secured revolving credit facility concurrently with the consummation of this offering. See Description of Indebtedness.

Affiliates of certain of the underwriters hold a portion of our indebtedness being repaid and as a result, may receive a portion of the proceeds from this offering. See Underwriting (Conflicts of Interest).

- (i) As of October 31, 2013, we had \$15 million of borrowings outstanding under our existing senior secured revolving credit facility and \$53.4 million of letters of credit were issued and outstanding under such credit facility. Subsequent to October 31, 2013, the borrowings under our existing senior secured revolving credit facility increased by \$210 million from \$15 million to \$225 million as of the date of this prospectus. As of December 31, 2013, after giving effect to the increase in borrowings under our existing senior secured revolving credit facility as of such date, our total indebtedness had increased by approximately \$245 million from \$1,677 million to \$1,922 million.

Subsequent to October 31, 2013, our cash and cash equivalents also increased by approximately \$182 million from \$84 million to \$266 million as of December 31, 2013.

The \$11 million of cash and cash equivalents in the as adjusted column above gives effect to the use of net proceeds from this offering, together with cash on hand, for the repayment of \$225 million of outstanding borrowings under our existing senior secured revolving credit facility (including the \$210 million drawn subsequent to October 31, 2013), but does not give effect to the increase of \$182 million in our cash and cash equivalents as of December 31, 2013.

- (iii) Represents the aggregate principal amount of the senior unsecured notes issued and outstanding.
- (iv) The deficit is adjusted for the loss on extinguishment of \$7.8 million related to the redemption of \$130.0 million of senior secured notes. The loss on extinguishment is comprised of the redemption premium, the unamortized deferred financing costs and the original issuance discount and premium.
- (v) If the underwriters' option to purchase additional ordinary shares is exercised in full, the as adjusted amount of each of cash and cash equivalents, additional paid-in capital, total shareholder's equity and total capitalization would increase by approximately \$44.1 million, after deducting underwriting discounts and estimated expenses, and we would have 82,169,484 ordinary shares issued and outstanding, as adjusted.

The table above excludes the following ordinary shares:

7,500,000 ordinary shares issuable pursuant to the 2013 Incentive Plan; and

2,812,015 ordinary shares issuable pursuant to the 2013 ESPP.

Dilution

If you invest in our ordinary shares, your interest will be diluted to the extent of the difference between the initial public offering price per share of our ordinary shares and the as adjusted net tangible book value per share of our ordinary shares immediately after the completion of this offering.

The as adjusted net tangible book value of our ordinary shares as of October 31, 2013 was approximately \$(216.2) million, or \$(4.65) per share. Adjusted net tangible book value per share represents our total tangible assets less our total tangible liabilities, divided by the number of outstanding ordinary shares.

After giving effect to the share capital restructuring transactions and receipt of the net proceeds from our sale of ordinary shares based on the public offering price of \$10.00 per share, after deducting the underwriting discounts and estimated expenses payable by us, and the application of the net proceeds from this offering to repay certain of our outstanding indebtedness, as described under Use of Proceeds, our as adjusted net tangible book value as of October 31, 2013 would have been approximately \$61.3 million, or \$0.79 per share. This represents an immediate increase in pro forma as adjusted net tangible book value of \$5.44 per share to our existing shareholders and an immediate dilution of \$9.21 per share to investors purchasing ordinary shares in this offering.

The following table illustrates this dilution per share of our ordinary shares to new investors:

Initial public offering price per share	\$ 10.00
Historical net tangible book value per share as of October 31, 2013	(4.65)
Increase in pro forma net tangible book value per share attributable to new investors purchasing shares in this offering	5.44
As adjusted net tangible book value per share after giving effect to this offering and the use of proceeds therefrom	0.79
Dilution in pro forma net tangible book value per share to new investors in this offering	\$ 9.21

If the underwriters' option to purchase additional shares is exercised in full, the following will occur:

the number of ordinary shares purchased by investors in this offering will increase to 35,650,000 ordinary shares, or approximately 43.4% of the total number of ordinary shares outstanding; and

the immediate dilution experienced by investors in this offering will be \$8.72 per share and the as adjusted net tangible book value per share will be \$1.28 per share.

To the extent that any outstanding options are exercised, new options are issued under our stock-based compensation plans or we issue additional shares of ordinary shares in the future, there will be further dilution to investors participating in this offering. We have no outstanding options under our 2013 Incentive Plan as of January 6, 2014.
