NOTES TO SCHEDULE OF INVESTMENTS:

(A) Floating or variable rate note. Rate is listed as of December 31, 2013.

(B) Illiquid. Total aggregate fair value of illiquid securities is \$590,680, or 0.41% of the fund's net assets.

(C)

All or a portion of this security is on loan. The value of all securities on loan is \$12,480,546. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.

- (D) *The security has a perpetual maturity. The date shown is the next call date.*
- (E) *Step bond - Coupon rate changes in increments to maturity. Rate disclosed is as of December 31, 2013. Maturity date disclosed is the ultimate maturity date.*
- (F) *Rate shown reflects the yield at December 31, 2013.*
- (G) *Aggregate cost for federal income tax purposes is \$150,514,991. Aggregate gross unrealized appreciation and depreciation for all securities in which there is an excess of value over tax cost were \$10,731,899 and \$1,408,328, respectively. Net unrealized appreciation for tax purposes is \$9,323,571.*
- (H) *Transfers between levels are considered to have occurred at the end of the reporting period. There were no transfers between Levels 1 and 2 during the period ended December 31, 2013. See the notes to the schedules of investments for more information regarding pricing inputs and valuation techniques.*

DEFINITIONS:

144A	<i>144A Securities are registered pursuant to Rule 144A of the Securities Act of 1933. These securities are deemed to be liquid for purposes of compliance limitations on holdings of illiquid securities and may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2013, these securities aggregated \$58,333,278, or 40.46% of the fund's net assets.</i>
AGM	<i>Assured Guaranty Municipal Corporation</i>
IO	<i>Interest only portion of a STRIP (Separate Trading of Registered Interest and Principal Security) Security</i>
MTN	<i>Medium Term Note</i>

NOTES TO SCHEDULES OF INVESTMENTS

At December 31, 2013

(unaudited)

NOTE 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the Fund) is a diversified closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The following is a summary of significant accounting policies followed by the Fund.

Securities lending: Securities are lent to qualified financial institutions and brokers. State Street Bank & Trust Company serves as securities lending agent to the Fund pursuant to a Securities Lending Agreement. The lending of securities exposes the Fund to risks such as the following: (i) the borrowers may fail to return the loaned securities; (ii) the borrowers may not be able to provide additional collateral; (iii) the Fund may experience delays in recovery of the loaned securities or delays in access to collateral; or (iv) the Fund may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash collateral with a value of at least 102% of the current value of the loaned securities for securities traded on U.S. exchanges and a value of at least 105% for all other securities loaned. The lending agent has agreed to indemnify the Fund in the case of default of any securities borrower.

Cash collateral received is invested in the State Street Navigator Securities Lending Trust-Prime Portfolio (Navigator), a money market mutual fund registered under the 1940 Act. The Transamerica Asset Management, Inc. (TAM) family of mutual funds is a significant shareholder of the Navigator as of December 31, 2013. No individual fund has a significant holding in the Navigator.

The value of loaned securities and related collateral outstanding at December 31, 2013 are shown on a gross basis in the Schedule of Investments.

Repurchase agreements: In a repurchase agreement, the Fund purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Fund's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Fund will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

The open repurchase agreements and related collateral at December 31, 2013 are shown on a gross basis in the Schedule of Investments.

Foreign currency denominated investments: The accounting records of the Fund are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

To be announced (TBA) commitments: TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. They are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of the Fund's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities, according to the procedures described under Security Valuations.

When-Issued, forward delivery securities and delayed delivery settlements: The Fund may purchase or sell securities on a when-issued, forward (delayed) delivery basis or delayed settlement. When-issued and forward delivery transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Fund engages in when-issued transactions to obtain an advantageous price and yield at the time of the transaction. The Fund engages in when-issued and forward delivery transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Fund may be required to pay more at settlement than the security is worth. In addition, the Fund is not entitled to any of the interest earned prior to settlement.

Delayed delivery transactions involve a commitment by the Fund to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Fund will segregate with its custodian either cash, U.S. Government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Fund if the other party to the transaction defaults on its obligation to make payment or delivery, and the Fund is delayed or prevented from completing the transaction. The Fund may dispose of or renegotiate a delayed delivery transaction after it is entered into, which may result in a realized gain or loss. When the Fund sells a security on a delayed delivery basis, the Fund does not participate in future gains and losses on the security.

NOTES TO SCHEDULES OF INVESTMENTS (continued)

At December 31, 2013

(unaudited)

NOTE 1. (continued)

Treasury inflation-protected securities (TIPS): The Fund invests in TIPS. TIPS are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Any upward or downward adjustment in the principal amount of a TIPS will be included as interest income, even though investors do not receive their principal until maturity. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

Illiquid securities: The Fund may invest in illiquid securities. A security may be considered illiquid if it lacks a readily available market or if its valuation has not changed for a certain period of time. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at the current valuation may be difficult.

The illiquid securities at December 31, 2013 are listed in the Schedule of Investments

Real estate investment trusts (REITs): There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

NOTE 2. SECURITY VALUATIONS

All investments in securities are recorded at their estimated fair value. The Fund values its investments at the close of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The Fund utilizes various methods to measure the fair value of its investments on a recurring basis.

Accounting principles generally accepted in the United States of America (GAAP) establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three Levels of inputs of the fair value hierarchy are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical securities.

Level 2 Inputs, other than quoted prices included in Level 1, that are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3 Unobservable inputs, which may include TAM's internal valuation committee's (the Valuation Committee) own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the sub-adviser, issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer's financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

The Fund's Board of Directors has delegated the valuation functions on a day-to-day basis to TAM, subject to board oversight. TAM has formed the Valuation Committee to monitor and implement the fair valuation policies and procedures as approved by the Board of Directors. These policies and procedures are reviewed at least annually by the Board of Directors. The Valuation Committee, among other tasks, monitors for when market quotations are not readily available or are unreliable and determines in good faith the fair value of the portfolio investments. For instances in which daily market quotes are not readily available, securities may be valued, pursuant to procedures adopted by the Board of Directors, with reference to other instruments or indices. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

The Valuation Committee may employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the security to determine the fair value of the security. An income-based valuation approach may also be used in which the anticipated future cash flows of the security are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the securities. When the Fund uses fair value methods that rely on significant unobservable inputs to determine a security's value, the Valuation Committee will choose the method that is believed to accurately reflect fair value. These securities are categorized in Level 3 of the fair value hierarchy. The Valuation Committee reviews fair value measurements on a regular and ad hoc basis and may, as deemed appropriate, update the security valuations as well as the fair valuation guidelines.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the Valuation Committee's determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material. The Valuation Committee employs various methods for calibrating these valuation approaches, including a regular review of valuation methodologies, key inputs and assumptions, transactional back-testing, and reviews of any market related activity.

NOTES TO SCHEDULES OF INVESTMENTS (continued)

At December 31, 2013

(unaudited)

NOTE 2. (continued)

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety.

Fair value measurements: Descriptions of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities (common and preferred stocks): Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, Exchange Traded Funds, and the movement of the certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Preferred stock and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2 or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the net asset value of the underlying securities and no valuation adjustments are applied. It is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are traded on inactive markets or valued by reference to similar instruments and are generally categorized in Level 2.

Corporate bonds: The fair value of corporate bonds is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable

inputs, they are categorized in Level 3.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Short-term notes: Short-term notes are valued using amortized cost, which approximates fair value. To the extent the inputs are observable and timely, the values would be generally categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Government securities: Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Government securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

U.S. government agency securities: U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage passthroughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government securities. Mortgage passthroughs include TBA securities and mortgage passthrough certificates. Generally, TBA securities and mortgage passthroughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

The hierarchy classification of inputs used to value the Fund's investments at December 31, 2013, is disclosed in the Valuation Summary of the Schedule of Investments.

Item 2. Controls and Procedures.

- (a) The Registrant's principal executive officer and principal financial officer evaluated the Registrant's disclosure controls and procedures within 90 days of this filing and have concluded that the Registrant's disclosure controls and procedures as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended, are appropriately designed to ensure that information required to be disclosed by the Registrant in the reports that it files on Form N-Q (a) is accumulated and communicated to Registrant's management, including its principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure, and (b) is recorded, processed, summarized and reported, within the time periods specified in the rules and forms adopted by the U.S. Securities and Exchange Commission.

- (b) The Registrant's principal executive officer and principal financial officer are aware of no change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

Separate certifications by the Registrant's principal executive officer and principal financial officer, as required by Rule 30a-2(a) under the 1940 Act, are attached.
