DORMAN PRODUCTS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THIRTY-NINE WEEKS ENDED SEPTEMBER 26, 2015 AND SEPTEMBER 27, 2014

(UNAUDITED)

1. Basis of Presentation

As used herein, unless the context otherwise requires, Dorman, the Company, we, us, or our refers to Dorman Products, Inc. and its subsidiaries. Our ticker symbol on the NASDAQ Global Select Market is DORM.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the U.S. for interim financial information and in accordance with the rules and regulations of the U.S. Securities and Exchange Commission (SEC). However, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of only normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the thirty-nine weeks ended September 26, 2015 are not necessarily indicative of the results that may be expected for the fiscal year ending December 26, 2015. We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of net sales. The introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter. These financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the fiscal year ended December 27, 2014.

Certain prior year amounts have been reclassified to conform with current year presentation.

2. Sales of Accounts Receivable

We have entered into several customer sponsored programs administered by unrelated financial institutions that permit us to sell certain accounts receivable at discounted rates to the financial institutions. Transactions under these agreements were accounted for as sales of accounts receivable and were removed from our Consolidated Balance Sheet at the time of the sales transactions. Pursuant to these agreements, we sold \$391.9 million and \$380.2 million of accounts receivable during the thirty-nine weeks ended September 26, 2015 and September 27, 2014, respectively. If receivables had not been sold, \$339.9 million and \$298.9 million of additional accounts receivable would have been outstanding at September 26, 2015 and December 27, 2014, respectively, based on standard payment terms. Selling, general and administrative expenses for the thirty-nine weeks ended September 26, 2015 and September 27, 2014 included \$5.4 million and \$5.0 million, respectively, in financing costs associated with these accounts receivable sales programs.

3. Inventories

Inventories include the cost of material, freight, direct labor and overhead utilized in the processing of our products, and are stated at the lower of cost or market. Cost is determined by the first-in, first-out method. Inventories were as

follows:

(in thousands)	September 26, 2015	December 27, 2014
Bulk product	\$ 75,548	\$ 65,603
Finished product	116,863	105,117
Packaging materials	2,839	2,803
Total	\$ 195,250	\$ 173,523

4. Stock-Based Compensation

Our 2008 Stock Option and Stock Incentive Plan (the Plan) was approved by our shareholders on May 20, 2009. Under the terms of the Plan, our Board of Directors may grant up to 2,000,000 shares of common stock in the form of shares of restricted stock, incentive stock options and non-qualified stock options or combinations thereof to officers, directors, employees, consultants and

Table of Contents

advisors. Grants under the Plan must be made within ten years of the date the Plan was approved and stock options are exercisable upon the terms set forth in the grant agreement approved by the Board of Directors, but in no event more than ten years from the date of grant. Restricted stock vests in accordance with the terms set forth in each restricted stock agreement. At September 26, 2015, 1,679,336 shares were available for grant under the Plan.

We grant restricted stock to certain employees and members of our Board of Directors. The value of restricted stock issued is based on the fair value of our common stock on the grant date. Vesting of restricted stock is conditional based on continued employment or service for a specified period and in certain circumstances, the attainment of financial goals. We retain the restricted stock, and any dividends paid thereto, until the vesting conditions have been met. For awards with a service condition only, compensation cost related to restricted stock is recognized on a straight-line basis over the vesting period. For awards that have a service condition and require the attainment of financial goals, compensation cost related to restricted stock is recognized over the vesting period if it is probable that the financial goals will be attained. Compensation cost related to restricted stock was \$0.7 million and \$1.5 million for the thirty-nine weeks ended September 26, 2015 and September 27, 2014, respectively.

The following table summarizes our restricted stock activity for the thirty-nine weeks ended September 26, 2015:

	Shares	Weighted Average Price
Balance at December 27, 2014	72,900	\$ 27.82
Granted	44,104	\$ 45.68
Vested	(32,160)	\$ 25.16
Cancelled	(3,674)	\$ 42.46
Balance at September 26, 2015	81,170	\$ 37.92

As of September 26, 2015, there was approximately \$2.5 million of unrecognized compensation cost related to nonvested restricted stock, which is expected to be recognized over a weighted-average period of approximately 1.4 years.

Cash flows resulting from tax deductions in excess of the tax effect of compensation cost recognized in the financial statements are classified as financing cash flows. The excess tax benefit generated from restricted shares which vested in the thirty-nine weeks ended September 26, 2015 and the thirty-nine weeks ended September 27, 2014 was \$0.3 million and \$0.4 million, respectively, and was credited to additional paid-in capital.

We grant stock options to certain employees and members of the Board of Directors. We expense the grant-date fair value of stock options. Compensation cost is recognized on a straight-line basis over the vesting period for which related services are performed. The compensation cost charged against income for the thirty-nine weeks ended September 26, 2015 and September 27, 2014 was less than \$0.1 million in each period. The compensation costs were classified as selling, general and administrative expense in the Consolidated Statements of Income. No cost was capitalized during the thirty-nine weeks ended September 26, 2015 or September 27, 2014.

No stock options were granted during the thirty-nine weeks ended September 26, 2015 or September 27, 2014. Historically, we have used the Black-Scholes option valuation model to estimate the fair value of stock options granted.

Edgar Filing: Dorman Products, Inc. - Form 10-Q

The following table summarizes our stock option activity for the thirty-nine weeks ended September 26, 2015:

	Shares	Weighted Average Price	Weighted Average Remaining Term (In years)	Aggregate Intrinsic Value
Balance at December 27, 2014	75,000	\$ 7.28		
Exercised	(31,000)	\$ 6.26		
Balance at September 26, 2015	44,000	\$ 7.99	2.8	\$ 1,855,300

Options exercisable at September 26, 2015 42,000 \$ 7.45 2.6 \$ 1,793,710

The total intrinsic value of stock options exercised in the thirty-nine weeks ended September 26, 2015 was \$1.3 million. As of September 26, 2015, there was less than \$0.1 million of unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a weighted-average period of less than one year.

Table of Contents

Cash received from option exercises was approximately \$0.5 million in the thirty-nine weeks ended September 27, 2014. The excess tax benefit generated from options which were exercised in the thirty-nine ended September 27, 2014 was \$0.1 million, and was credited to additional paid-in capital. Cash received and the excess tax benefit generated in the thirty-nine weeks ended September 26, 2015 was de minimis.

5. Earnings Per Share

Basic earnings per share is calculated by dividing our net income by the weighted average number of common shares outstanding during the period, excluding nonvested restricted stock which is considered to be contingently issuable. To calculate diluted earnings per share, common share equivalents are added to the weighted average number of common shares outstanding. Common share equivalents are calculated using the treasury stock method and are computed based on outstanding stock-based awards. However, in periods when the price of our stock-based awards, by grant, is greater than our average stock price during the period, those common share equivalents are considered anti-dilutive and are excluded from the calculation of diluted earnings per share. Approximately 7,000 shares from stock-based awards were considered anti-dilutive as of September 26, 2015. No stock-based awards were considered anti-dilutive as of September 27, 2014.

The following table sets forth the computation of basic earnings per share and diluted earnings per share:

(in thousands, except per share data)	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Numerator:				
Net income	\$ 26,060	\$ 24,536	\$ 70,542	\$ 71,331
Denominator:				
Weighted average basic shares outstanding	35,514	35,898	35,535	36,217
Effect of stock-based compensation awards	61	126	76	155
Weighted average diluted shares outstanding	35,575	36,024	35,611	36,372
Earnings Per Share:				
Basic	\$ 0.73	\$ 0.68	\$ 1.99	\$ 1.97
Diluted	\$ 0.73	\$ 0.68	\$ 1.98	\$ 1.96

6. Common Stock Repurchases

We periodically repurchase, at the then current market price, and cancel common stock issued to the Dorman Products, Inc. 401(k) Retirement Plan and Trust (the 401(k) Plan). Shares are generally purchased from the 401(k) Plan when participants sell units as permitted by the 401(k) Plan or elect to leave the 401(k) Plan upon retirement, termination or other reasons. For the thirty-nine weeks ended September 26, 2015, we repurchased and cancelled 28,740 shares of common stock for \$1.4 million at an average price of \$48.26 per share. During the fifty-two weeks ended December 27, 2014, we repurchased and cancelled 61,830 shares of common stock for \$3.1 million at an average price of \$50.71 per share.

The Board of Directors has authorized a share repurchase program, authorizing the repurchase of up to \$100 million of our outstanding common stock through December 31, 2015. Under this program, share repurchases may be made from time to time depending on market conditions, share price, share availability and other factors at our discretion. The share repurchase program does not obligate us to acquire any specific number of shares. For the thirty-nine weeks ended September 26, 2015, we repurchased and cancelled 122,000 shares of common stock for \$5.9 million at an average price of \$48.77 per share under this program. For the fifty-two weeks ended December 27, 2014, we repurchased and cancelled 855,600 shares of common stock for \$40.4 million at an average price of \$47.20 per share under this program. At September 26, 2015, we had approximately \$53.7 million remaining under the program. As discussed in Note 11, this share repurchase program was increased and extended on October 28, 2015.

7. Related-Party Transactions

We have a non-cancelable operating lease for our primary operating facility with a partnership in which Steven L. Berman, our Executive Chairman, and his family members, are partners. Based upon the terms of the lease, payments will be approximately \$1.5 million in fiscal 2015 and were \$1.5 million in fiscal 2014. The lease with the partnership expires December 31, 2017. In the opinion of our Audit Committee, the terms and rates of this lease are no less favorable than those which could have been obtained from an unaffiliated party.

Table of Contents

8. Income Taxes

At September 26, 2015, we had \$1.6 million of net unrecognized tax benefits, \$1.1 million of which would affect our effective tax rate if recognized. We recognize interest and penalties related to uncertain tax positions in income tax expense. As of September 26, 2015, we had approximately \$0.2 million of accrued interest related to uncertain tax positions.

We file income tax returns in the United States, China and Mexico. All years before 2012 are closed for federal tax purposes. The examination by the Internal Revenue Service for the 2011 and 2012 tax years resulted in de minimis adjustments. We are currently under examination by one state tax authority for the years 2009-2012. Tax years before 2011 are closed for the remaining states in which we file. We filed tax returns in Sweden through 2012 and all years prior to 2008 are closed. It is reasonably possible that audit settlements, the conclusion of current examinations or the expiration of the statute of limitations could impact the Company's unrecognized tax benefits.

9. Fair Value Disclosures

The carrying value of financial instruments such as cash, accounts receivable, accounts payable, and other current assets and liabilities approximate their fair value based on the short-term nature of these instruments.

10. New and Recently Adopted Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. As originally issued, the new standard would have been effective for annual periods beginning after December 15, 2016. The FASB has amended the standard to be effective for annual periods beginning after December 15, 2017. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our consolidated financial statements and related disclosures.

In July 2015, the FASB issued ASU No. 2015-11, *Simplifying the Measurement of Inventory*, which changes the measurement principle for inventory from the lower of cost or market to the lower of cost and net realizable value. The amendments in this guidance do not apply to inventory that is measured using last-in, first-out (LIFO) or the retail inventory method. The amendments apply to all other inventory, which includes inventory that is measured using first-in, first-out or average cost. Within the scope of this new guidance, an entity should measure inventory at the lower of cost and net realizable value; where, net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The new guidance is effective for annual periods beginning after December 15, 2016, with early adoption permitted. The new guidance must be applied on a prospective basis. We are evaluating the effect that the new guidance will have on our consolidated financial statements and related disclosures.

11. Subsequent Event

On October 28, 2015, we announced that our Board of Directors authorized an increase to the existing share repurchase program from \$100 million to \$150 million and an extension of the program from December 31, 2015 to

December 31, 2016. Including the additional authorization, we have approximately \$103.7 million remaining under the program.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this document constitute forward-looking statements within the meaning of the Federal Private Securities Litigation Reform Act of 1995. While forward-looking statements sometimes are presented with numerical specificity, they are based on various assumptions made by management regarding future circumstances over many of which the Company has little or no control. Forward-looking statements may be identified by words including anticipate, believe, estimate, expect, and similar expressions. The Company cautions readers that forward-looking statements, including, without limitation, those relating to future business prospects, revenues, working capital, liquidity, and income, are subject to certain risks and uncertainties that would cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ from forward-looking statements include but are not limited to competition in the automotive aftermarket industry, unfavorable economic conditions, loss of key suppliers, loss of third-party transportation providers, an increase in patent filings by original equipment manufacturers, quality problems, delay in the development and design of new products, space limitations on our customers' shelves, concentration of the Company's sales and accounts receivable among a small number of customers, the impact of consolidation in the automotive aftermarket industry, foreign currency fluctuations, timing and amount of customers' orders of Company's products, dependence on senior management, disruption from events beyond the Company's control, risks associated with conflict minerals, risks associated with cyber-attacks and other risks and factors identified from time to time in the reports the Company files with the SEC. For additional information concerning factors that could cause actual results to differ materially from the information contained in this report, reference is made to the information in Part I Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the fiscal year ended December 27, 2014. You should not place undue reliance on forward-looking statements. Such statements speak only as to the date on which they are made, and we undertake no obligation to update publicly or revise any forward-looking statement, regardless of future developments or availability of new information.

Introduction

The following discussion and analysis, as well as other sections in this Quarterly Report on Form 10-Q, should be read in conjunction with the unaudited consolidated financial statements and footnotes thereto of Dorman Products, Inc. and its subsidiaries included in Item 1. Financial Statements of this Quarterly Report on Form 10-Q and with Management's Discussion and Analysis of Financial Condition and Results of Operations and the audited consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 27, 2014.

Overview

We are a leading supplier of replacement parts and fasteners for passenger cars, light trucks and heavy duty trucks in the automotive aftermarket. We distribute and market approximately 140,000 stock keeping units (SKU's) of automotive replacement parts, many of which we design and engineer. These SKU's are sold under our various brand names, under our customers' private label brands or in bulk. We believe we are the dominant aftermarket supplier of original equipment dealer exclusive items. Original equipment dealer exclusive parts are those parts which were traditionally available to consumers only from original equipment manufacturers or salvage yards. These parts include, among other parts, intake manifolds, exhaust manifolds, window regulators, radiator fan assemblies, tire pressure monitor sensors, complex electronics devices and exhaust gas recirculation (EGR) coolers.

We generate virtually all of our revenues from customers in the United States and Canada. Our products are sold primarily through automotive aftermarket retailers (such as Advance Auto Parts, AutoZone and O'Reilly Auto Parts), national, regional and local warehouse distributors (such as Genuine Parts Co - NAPA), specialty markets and salvage yards. We also distribute automotive replacement parts to customers in Europe, Mexico, the Middle East and Asia.

The automotive aftermarket has benefited from some of the factors affecting the general economy, including the impact of recessions, unemployment, and fluctuating gas prices. We believe vehicle owners have become more likely to keep their current vehicles longer and perform necessary repairs and maintenance in order to keep those vehicles well maintained as a result of these factors. According to data published by AutoCare Association, the average age of vehicles was 11.5 years as of May 2015 despite increasing new car sales. The number of miles driven is another important statistic that impacts our business. According to the United States Department of Transportation, the number of miles driven has increased each year since 2011, including a 1.7% increase in 2014 over 2013 levels. Generally, as vehicles are driven more miles, the more likely it is that parts will fail. The combination of the vehicle age increase and number of miles driven has accounted for a portion of our sales growth.

Table of Contents

The overall automotive aftermarket in which we compete has benefited from the conditions mentioned above. However, our customer base has consolidated in recent years. As a result, our customers regularly seek more favorable pricing, product returns and extended payment terms when negotiating with us. We attempt to avoid or minimize these concessions as much as possible, but we have granted pricing concessions, extended customer payment terms and allowed a higher level of product returns in certain cases. These concessions impact our profit levels and may require additional capital to finance the business. We expect our customers to continue to exert pressure on our margins as the customer base continues to consolidate.

New product development is a critical success factor for us and is our primary vehicle for growth. We have made incremental investments to increase our new product development efforts each year since 2003 in an effort to grow our business and strengthen our relationships with our customers. The investments are primarily in the form of increased product development resources, increased customer and end-user awareness programs and customer service improvements. These investments have enabled us to provide an expanding array of new product offerings and grow revenues at levels that exceed market growth rates.

Our complex electronics program capitalizes on the growing number of electronic components being utilized on today's Original Equipment platforms. Current production models contain an average of approximately thirty-five electronic modules, with some high-end luxury vehicles containing over one hundred modules. Our complex electronics products are designed and developed in-house and extensively tested to ensure consistent performance.

In 2012, we introduced a new line of products to be marketed for the medium and heavy duty truck aftermarket. We believe that this market provides many of the same opportunities for growth that the automotive aftermarket has provided us over the past several years. Our focus here is on Formerly Dealer Only parts as it is on the automotive side of the business. We launched the initial program with a limited offering, but have made additional investments in new product development efforts to expand our product offering. We currently have approximately 660 SKUs in our medium and heavy duty product line.

We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of net sales. The introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter.

We operate on a fifty-two or fifty-three week fiscal year period ended on the last Saturday of the calendar year. Our 2015 fiscal year will be a fifty-two week period that will end on December 26, 2015. The fiscal year ended December 27, 2014 was also a fifty-two week period.

Results of Operations

The following table sets forth, for the periods indicated, the percentage of net sales represented by certain items in our Consolidated Statements of Income:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Net sales	100.0%	100.0%	100.0%	100.0%

Edgar Filing: Dorman Products, Inc. - Form 10-Q

Cost of goods sold	61.7	61.6	61.5	61.8
Gross profit	38.3	38.4	38.5	38.2
Selling, general and administrative expenses	18.7	18.9	19.8	18.8
Income from operations	19.6	19.5	18.7	19.4
Interest expense, net	0.1	0.1	0.0	0.0
Income from before income tax	19.5	19.4	18.7	19.4
Provision for income taxes	7.1	7.0	6.9	7.0
Net income	12.4%	12.4%	11.8%	12.4%

Page 12 of 20

Table of Contents

Thirteen Weeks Ended September 26, 2015 Compared to Thirteen Weeks Ended September 27, 2014

Net sales increased 7% to \$210.9 million for the thirteen weeks ended September 26, 2015 from \$197.8 million for the thirteen weeks ended September 27, 2014. Our revenue growth rate was primarily driven by strong overall demand for our new products along with a return to more normalized buying patterns from a large customer that had been reducing inventory. Partially offsetting this growth is approximately \$10 million in customer stock-up orders during the thirteen weeks ended September 27, 2014 that did not recur in the thirteen weeks ended September 26, 2015.

Gross profit was \$80.8 million, or 38.3% of net sales, for the thirteen weeks ended September 26, 2015 compared to \$75.9 million, or 38.4% of net sales, for the thirteen weeks ended September 27, 2014.

Selling, general and administrative expenses were approximately \$39.6 million for the thirteen weeks ended September 26, 2015 compared to \$37.4 million for the thirteen weeks ended September 27, 2014. The increase during the thirteen weeks ended September 26, 2015 is primarily due to higher variable costs associated with the 7% increase in net sales and additional investments in new product development.

Our effective tax rate was 36.7% for the thirteen weeks ended September 26, 2015 compared to 36.1% for the thirteen weeks ended September 27, 2014. The effective tax rate increased primarily due to higher provisions for state income taxes.

Thirty-Nine Weeks Ended September 26, 2015 Compared to Thirty-Nine Weeks Ended September 27, 2014

Net sales increased 4% to \$598.1 million for the thirty-nine weeks ended September 26, 2015 from \$577.5 million for the thirty-nine weeks ended September 27, 2014. Net sales growth was primarily driven by increased demand for our products, especially our new products. Our revenue growth rate was negatively impacted by an inventory reduction plan at one major customer which continued through the first half of fiscal 2015 and the shipment of several large line updates in the thirty-nine weeks ended September 27, 2014 which did not recur in the thirty-nine weeks ended September 26, 2015 at the same level.

Gross profit was \$230.3 million, or 38.5% of net sales, for the thirty-nine weeks ended September 26, 2015 compared to \$220.5 million, or 38.2% of net sales, for the thirty-nine weeks ended September 27, 2014. The increased gross profit margin was primarily due to a favorable sales mix and lower transportation costs which were partially offset by lower overall selling prices during the thirty-nine weeks ended September 26, 2015 as compared to the thirty-nine weeks ended September 27, 2014.

Selling, general and administrative expenses were approximately \$118.5 million for the thirty-nine weeks ended September 26, 2015 compared to \$108.4 million for the thirty-nine weeks ended September 27, 2014. The increase during the thirty-nine weeks ended September 26, 2015 was primarily due to approximately \$5.4 million of incremental costs associated with the ERP conversion, additional investments in new product development initiatives and inflationary increases during the thirty-nine weeks ended September 26, 2015 as compared to the thirty-nine weeks ended September 27, 2014.

Our effective tax rate was 36.8% for the thirty-nine weeks ended September 26, 2015 compared to 36.3% for the thirty-nine weeks ended September 27, 2014. The effective tax rate increased primarily due to higher provisions for state income taxes.

Liquidity and Capital Resources

Historically, we have financed our growth through a combination of cash flow from operations, accounts receivable sales programs and our revolving credit facility. At September 26, 2015, working capital was \$416.8 million, while shareholders' equity was \$526.1 million. Cash and cash equivalents as of September 26, 2015 was \$79.3 million.

Over the past several years we extended payment terms to certain customers as a result of customer requests and market demands. These extended terms have resulted in increased accounts receivable levels and significant uses of cash flows. We participate in accounts receivable sales programs with several customers which allow us to sell our accounts receivable to financial institutions to offset the negative cash flow impact of these payment terms extensions. Without these programs, these extended terms would have resulted in increased accounts receivable and significant uses of cash flow. Pursuant to these agreements, we sold accounts receivable in the aggregate amount of \$391.9 million and \$380.2 million during the thirty-nine weeks ended September 26, 2015 and September 27, 2014 respectively. We had the ability to sell significantly more accounts receivable under these programs if the needs of the business warranted. If receivables had not been sold, \$339.9 million and \$298.9 million of additional receivables would have been outstanding at September 26, 2015 and December 27, 2014, respectively, based on standard payment terms.

Table of Contents

We have a \$30.0 million revolving credit facility which expires in June 2017. Borrowings under the facility are on an unsecured basis with interest at rates ranging from LIBOR plus 65 basis points to LIBOR plus 250 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA, as defined by our credit agreement. The interest rate at September 26, 2015 was LIBOR plus 65 basis points (0.84 %). There were no borrowings under the facility as of September 26, 2015. As of September 26, 2015, we had two outstanding letters of credit for approximately \$1.0 million in the aggregate which were issued to secure ordinary course of business transactions. Net of these letters of credit, we had approximately \$29.0 million available under the facility at September 26, 2015. The credit agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA. As of September 26, 2015, we were in compliance with all financial covenants contained in the revolving credit facility.

Cash Flows

Below is a table setting forth the key lines of our Consolidated Statements of Cash Flows:

(in thousands)	Thirty-Nine Weeks Ended	
	September 26, 2015	September 27, 2014
Cash provided by operating activities	\$ 57,483	\$ 47,406
Cash used in investing activities	(18,534)	(22,992)
Cash used in financing activities	(7,284)	(40,797)
Net increase (decrease) in cash and cash equivalents	\$ 31,665	\$ (16,383)

Cash provided by operating activities during the thirty-nine weeks ended September 26, 2015 was \$57.5 million. Net income was \$70.5 million compared to \$71.3 million in the thirty-nine weeks ended September 27, 2014. During the thirty-nine weeks ended September 26, 2015 accounts receivable declined by \$6.7 million due to increased sales of receivables which were partially offset by higher net sales. Additionally, inventory increased by \$21.7 million due to purchases to support sales growth and new product initiatives during the thirty-nine weeks ended September 26, 2015.

Investing activities used \$18.5 million of cash in the thirty-nine weeks ended September 26, 2015 and \$23.0 million of cash in the thirty-nine weeks ended September 27, 2014. Capital spending in 2015 was primarily related to tooling associated with new products, enhancements and upgrades to information systems including our new ERP system, scheduled equipment replacements, certain facility improvements and other capital projects. The new ERP system was implemented in two phases, the last of which was completed on September 29, 2014. We capitalized \$37.9 million related to the project through December 27, 2014, of which \$12.3 million was spent in the thirty-nine weeks ended September 27, 2014. During the thirty-nine weeks ended September 26, 2015, we spent \$2.0 million to purchase a minority equity interest in a supplier.

Financing activities used \$7.3 million of cash in the thirty-nine weeks ended September 26, 2015 and \$40.8 million in the thirty-nine weeks ended September 27, 2014. The net use of cash in each period resulted from the repurchase of our common stock and stock plan activities. During the thirty-nine weeks ended September 26, 2015 and September 27, 2014 we used \$7.3 million of cash and \$41.3 million of cash, respectively, to purchase and retire shares of our common stock.

Edgar Filing: Dorman Products, Inc. - Form 10-Q

On October 28, 2015, we announced that our Board of Directors authorized an increase to the existing share repurchase program from \$100 million to \$150 million and an extension to the expiration of the program from December 31, 2015 to December 31, 2016.

Based on our current operating plan, we believe that our sources of available capital are adequate to meet our ongoing cash needs for at least the next twelve months.

During the thirty-nine weeks ended September 26, 2015, we experienced no material changes to our contractual obligations as disclosed in our Annual Report on Form 10-K for the year ended December 27, 2014.

Page 14 of 20

Table of Contents

Foreign Currency Fluctuations

In fiscal 2014, approximately 73% of our products were purchased from vendors in a variety of foreign countries. The products generally are purchased through purchase orders with the purchase price specified in U.S. dollars. Accordingly, we generally do not have exposure to fluctuations in the relationship between the dollar and various foreign currencies between the time of execution of the purchase order and payment for the product. To the extent that the dollar decreases in value to foreign currencies in the future, the price of the product in dollars for new purchase orders may increase.

The largest portion of our overseas purchases comes from China. During the thirty-nine weeks ended September 26, 2015, the Chinese Yuan decreased in value relative to the U.S. Dollar by approximately 3.8%. During the fifty-two weeks ended December 27, 2014, the Chinese Yuan decreased in value relative to the U.S. Dollar by approximately 0.3%. Significant changes in the value of the Yuan relative to the U.S. Dollar may result in changes to the cost of products that we purchase from China.

Impact of Inflation

The cost of many of the commodities that are used in our products have fluctuated over time resulting in increases and decreases in the prices of our products. In addition, we have periodically experienced increased transportation costs as a result of higher fuel prices. Inflation may also increase our labor costs and the cost of general services utilized. We will attempt to offset cost increases by passing along selling price increases to customers, using alternative suppliers and by resourcing purchases to other countries. However, there can be no assurance that we will be successful in these efforts.

New and Recently Adopted Accounting Pronouncements

Please refer to Note 10, New and Recently Adopted Accounting Pronouncements, to the Notes to Consolidated Financial Statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our market risk is the potential loss arising from adverse changes in interest rates. Substantially all of our borrowing capacity and our accounts receivable sale programs bear interest at rates tied to LIBOR. Under the terms of our revolving credit facility and customer-sponsored programs to sell accounts receivable, a change in either the lender's base rate, LIBOR or discount rates under our accounts receivable sale programs would affect the rate at which we could access funds thereunder. Hypothetically, a one percentage point increase in LIBOR would increase our interest expense on our variable rate debt, if any, and our financing costs associated with our sales of accounts receivable by approximately \$3.4 million annually. This estimate assumes that our variable rate debt balance and the level of sales of accounts receivable remains constant for an annual period and the interest rate change occurs at the beginning of the period. The hypothetical changes and assumptions may be different from what actually occurs in the future.

We have not historically and do not intend to use derivative financial instruments for trading or to speculate on changes in interest rates or commodity prices. We are not exposed to any significant market risks, foreign currency exchange risk or interest rate risk from the use of derivative instruments.

Item 4. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosures.

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, conducted an evaluation, as of the end of the period covered by this report, of the effectiveness of our disclosure controls and procedures, as such term is defined in Exchange Act Rule 13a-15(e). Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures, as defined in Rule 13a-15(e), were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal control over financial reporting to determine whether any changes occurred during the quarter ended September 26, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there was no such change during the quarter ended September 26, 2015.

Limitations on the Effectiveness of Controls

Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be

detected. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

We are a party to or otherwise involved in legal proceedings that arise in the ordinary course of business, such as various claims and legal actions involving contracts, competitive practices, patent rights, trademark rights, product liability claims and other matters arising out of the conduct of our business. In the opinion of management, none of the actions, individually or in the aggregate, would likely have a material financial impact on the Company and we believe the range of reasonably possible losses from current matters is immaterial.

Item 1A. Risk Factors

You should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 27, 2014, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

During the thirteen weeks ended September 26, 2015, we purchased shares of our common stock as follows:

Period	Total Number of Shares Purchased (1) (2)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (2) (3)
June 28, 2015 through July 25, 2015	9,110	\$ 47.98	4,900	\$ 107,847,337
July 26, 2015 through August 22, 2015	18,000	\$ 50.03	16,100	\$ 107,047,669
August 23, 2015 through September 26, 2015	73,360	\$ 49.74	68,100	\$ 103,666,291
Total	100,470	\$ 49.63	89,100	\$ 103,666,291

- (1) Includes 11,370 shares purchased from the Dorman Products, Inc. 401(k) Plan and Trust (as described in Note 6 to the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q).
- (2) On December 12, 2013 we announced that our Board of Directors authorized a share repurchase program, authorizing the repurchase of up to \$10 million of our outstanding common stock by the end of 2014. We announced that our Board of Directors increased the share repurchase program authorization to \$30 million on May 20, 2014, to \$50 million on October 29, 2014 and to \$100 million on October 28, 2014. In addition, on May 20, 2014, we announced that our Board of Directors extended the share repurchase program through May 31, 2015, and on October 28, 2014, we announced that our Board of Directors further extended the share repurchase program through December 31, 2015. Under this program, share repurchases may be made from time to time depending on market conditions, share price, share availability and other factors at our discretion. The share repurchase program does not obligate us to acquire any specific number of shares. We repurchased 89,100 shares under this program during the thirteen weeks ended September 26, 2015. On October 28, 2015, we announced that our Board of Directors increased the share repurchase program authorization to \$150 million and extended the share repurchase program through December 31, 2016.
- (3) Numbers in this column assume that the repurchase program had been expanded to authorize the repurchase of up to \$150 million at the beginning of the thirteen week period ended September 26, 2015.
